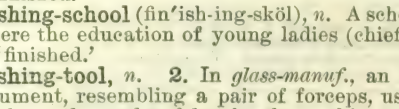
finishing-rolls (fin'ish-ing-rōlz), *n. pl.* The rolls or a train of rolls in which a bar of metal is finished.

finishing-school (fin'ish-ing-sköl), *n.* A school where the education of young ladies (chiefly) is 'finished.'



finishing-tool, *n.* 2. In *glass-manuf.*, an instrument, resembling a pair of forceps, used to shape the necks of bottles, lamp-chimneys, etc. Also called *borcellas, ponteglo,* and *procellas.* See *procellas.*

Finite in its kind, having an end or boundary. A thing that can be limited by another of the same nature is said to be *finite in its kind.* For example, body is said to be finite because we always conceive a larger. So thought is limited by another thought.—**Finite number, point.** See ★*number,* ★*point*[1].

finitesimal, *a.* [*finite* + *-esimal,* as in *infinitesimal.*] In *math.*, distinguished by a finite ordinal.

finitude, *n.*—**The axiom of finitude,** in the terminology of Russell, the false assumption that a kind of quantity such that, given any one of the kind, there is a greater of the same kind, can have no finite limit. The class of fractions whose denominators exceed their numerators is an obvious instance of the falsity of the principle. Russell appears to call it an axiom derisively.—**Relative finitude,** the being in a finite ratio to another magnitude.

fin-keel (fin'kēl), *n.* A projection downward from the bottom of a sail-boat or yacht, in general shape like the ventral fin of a fish. The fin-keel is usually made of metal, and acts as additional ballast, and being low down gives increased stability.

Fin-keel.

Finn. An abbreviation of *Finnish.*

Finno-Slav (fin-ō-slàv'), *n.* A person of mixed Finnish and Slavic descent. *Keane*, Ethnol., p. 200.

Finno-Slavonic (fin″ō-sla-von'ik), *a.* Of mixed Finnish and Slavic descent; of or pertaining to the Finno-Slavs.

Finno-Tatar (fin-ō-tä'tär), *a.* 1. Of or pertaining to the group of languages usually called Ural-Altaic, or to the people who speak them. See *Altaic.*—2. In a somewhat more limited sense, relating to or including those peoples which comprise the western branch of the Ural-Altaic group, especially the Finns and Turks.

Finno-Turki (fin-ō-tėr'kē), *n.* The group of peoples which speak Finnic and Turkish languages. Also called *Ural-Altaic.* See *Altaic.*

Finno-Turkish (fin-ō-tėr'kish), *a.* Of or pertaining to the Finns and Turks: same as *Ural-Altaic.* See *Altaic.*

Finno-Ugrian (fin-ō-ū'gri-an), *a.* Of or pertaining to that group of peoples which speak either Finnic or Ugrian languages.

Finno-Ugric (fin-ō-ū'grik), *a.* Same as ★*Finno-Ugrian.*

Finnsko (fin'skō), *n.* [Norw. *Finnsko,* < *Finn,* Finn, + *sko,* shoe.] In Norway, a boot made of the skin of the legs of the reindeer buck steeped in a decoction of birch bark or tanned in tar-water. It is worn with the hair outside.

These *finnesko* . . . are a pre-eminently warm covering for the feet, and are very suitable for use on ski or snow-shoes. *Nansen* (trans.), First Crossing of Greenland, I. 48.

Fin. Sec. An abbreviation of *Financial Secretary.*

Finsen lamp, light treatment, ray or **light.** See ★*lamp*[1], ★*light*[1], ★*ray*[1].

Finsen's apparatus. See ★*apparatus.*

finta (fēn'tä), *n.* [Sp. Pg.] Originally, in Spain and Portugal, a land-tax or contribution to a common expense or tribute to the king, levied on every subject in time of special emergency. The Sephardim (Spanish Jews) still apply the term to their fixed contributions for the synagogue.

fiord-valley (fyôrd'val″i), *n.* A narrow, nearly parallel-walled valley occupied by an arm of the sea. *J. Geikie,* The Great Ice Age, p. 46.

fiorino (fē-ō-rē'nō), *n.* [It.: see *florin.*] A Tuscan gold coin equal to about 27 United States cents: so called from the fact that it bore the fleur-de-lis, the arms of Florence.

fir, *n.*—**Algerian fir,** a tall pyramidal species, *Abies Numidica,* native on high mountains in Algiers. It is hardy in France and England, and is attractive in ornamental cultivation.—**Alpine fir,** *Abies lasiocarpa,* a tall tree, 80–175 feet high and 2–5 feet in diameter, which occupies high mountain slopes and summits from Arizona to Alaska and eastward to Colorado and Idaho. It has dense foliage, small dark-purple cones, and light, soft wood of little value except for fuel. Also called *balsam-fir, subalpine fir,* and *Oregon balsam-tree.*—**Amabilis fir.** Same as *lovely* ★*fir.*—**Balsam-fir.** (*a*) *Abies balsamea.* See *Abies, fir,* and *balsam-tree.* (*b*) The she-balsam or Fraser fir, *Abies Fraseri,* of the more southern Appalachian Mountains. (*c*) Same as *alpine* ★*fir.*—**Balsam of fir.** Same as *Canada balsam.*—**Bristle-cone fir,** *Abies venusta,* a large tree, 100–150 feet high and sometimes 3 feet in diameter, distinguished by the long awns of the bracts of its cones, which give them a bristly appearance. It is a rare tree, restricted to a small area of southern California on the slopes of the Santa Lucia Mountains in Monterey county. The under surface of the leaves is silvery white, for which reason it shares with several other firs the name of *silver fir.*—**Cephalonian fir,** *Abies Cephalonica,* a fir with large cones, a native of the highlands of Cephalonia and Greece. Also called *Greek fir.*—**Crimean fir,** *Abies Nordmanniana,* a native of the Crimea and western Caucasus, which has long cones the bracts of which are tipped with a conspicuous sharp point. Also called the *Nordmann fir* and *Nordmann's silver fir.* It is common in the parks of Europe.—**Double fir, double fir-balsam,** the she-balsam or Fraser fir, *Abies Fraseri.*—**Douglas fir,** the Douglas spruce.—**Douglas fir blight.** See ★*blight.*—**Fraser fir,** *Abies Fraseri,* a small tree of the more southern Appalachian region, from southwestern Virginia to western North Carolina and eastern Tennessee. It has dense foliage and small cones with a rough surface, thus differing markedly from the more northern balsam-fir which it replaces. Also called *balsam-fir* and *she-balsam.* **Grand, great California,** or **silver fir,** the Oregon white fir, *Abies grandis.*—**Greek fir.** Same as *Cephalonian* ★*fir.*—**Indian fir,** the mast-tree, *Polyalthia longifolia.* See *mast-tree,* 2, and ★*asoka,* 2.—**Lovely fir,** *Abies amabilis,* one of the largest and most beautiful of western American trees, often attaining a height of 250 feet and a diameter of 6 feet. When growing in open situations it is clothed to near the ground with branches which sweep down in graceful curves and which are covered with reddish-brown or purple branchlets. The wood is light but hard and fine-grained, and is valuable for the interior finish of buildings. The tree occupies high mountain slopes and benches in the Cascade and Coast ranges from British Columbia to Oregon; it has been introduced into parks in western Europe. Also called *amabilis fir, red fir, red silver fir,* and *white fir.*—**Lowland fir.** Same as *grand* ★*fir.*—**Magnificent fir.** Same as *Shasta* ★*fir.*—**Mexican fir.** Same as *sacred* ★*fir.*—**Noble fir,** *Abies nobilis,* a very large tree, sometimes attaining a height of 250 feet and a diameter of 8 feet, forming extensive forests in the Cascade range and Siskiyou Mountains at from 2,500 to 5,000 feet elevation. It has densely set short leaves and large oblong cones, the bracts broad with fimbriate margins and strong midribs produced into conspicuous tips. The wood is light but strong and rather fine-grained, and is used under the name of larch for the interior finish of buildings. Also called *red fir.*—**Nordmann's silver fir.** Same as *Crimean* ★*fir.* **Oregon white fir.** Same as *grand* ★*fir.*—**Parasol fir.** See *parasol-fir.*—**Pitch fir,** *Abies Pichta,* a small tree of northeastern Russia and Siberia, extending to Kamchatka. Also called *Siberian fir.*—**Plum-fir,** *Nageia Andina.* See *Podocarpus,* 2.—**Red fir.** (*a*) Same as *noble* ★*fir.* (*b*) Same as *Shasta* ★*fir.* (*c*) The Douglas spruce, *Pseudotsuga mucronata.*—**Red silver fir.** Same as *lovely* ★*fir.*—**Sacred fir,** *Abies religiosa,* a native of Mexico and Guatemala, forming forests in the highlands to 9,000 feet altitude. It is a large tree, sometimes 150 feet high, the leaves silvery white beneath, and bears oblong-oval purple cones with cuspidate bracts. It was discovered by Humboldt and introduced into Europe by Hartweg in 1838, and is much planted in the more southern countries. The specific name as well as the common name alludes to the practice in Mexico of decorating churches with the branches of this tree. Also called *Mexican fir.*—**Scotch fir.** Same as *Scotch pine* (which see, under *pine*[1]).—**Shasta fir,** *Abies magnifica,* a large tree, sometimes attaining a height of 200 feet and a diameter of 10 feet, a native of the Cascade range and Sierra Nevada Mountains, common on Mount Shasta, reaching a maximum elevation of 10,000 feet. It has large oblong-cylindrical cones with smooth surfaces and short curving leaves. The wood is light and soft, not strong but durable, making coarse lumber. It is considerably planted in Europe and to some extent in the eastern United States as an ornamental tree. Also called *red fir.*—**She-balsam fir.** See *balsam-*★*fir* (*b*).—**Siberian fir.** Same as *pitch* ★*fir.*—**Silver fir,** the name given to most firs which have the under surface of their leaves silvery white or glaucous: (*a*) *Abies Picea.* See *silver fir,* under *silver.* (*b*) Same as *Algerian* ★*fir.* (*c*) Same as *bristle-cone* ★*fir.* (*d*) Same as *grand* ★*fir.* (*e*) Same as *Fraser* ★*fir.* (*f*) Same as *white* ★*fir.* (*g*) Same as *Shasta* ★*fir.* (*h*) *Abies amabilis,* distinguished as *red silver fir.* (*i*) *Abies Pichta,* sometimes called *Siberian silver fir.* (*j*) The king-pine, *Abies Webbiana,* often called *Webb's silver fir.* See *king-pine,* under *pine*[1].—**Silver-fir leaf-disease.** See ★*disease.*—**Spruce-fir,** the Norway spruce, *Picea Abies* (which see, under *spruce*[3]).—**Subalpine fir.** Same as *alpine* ★*fir.*—**Umbrella fir.** Same as *umbrella pine.* See *Sciadopitys.*—**White fir.** (*a*) *Abies concolor,* a large tree of the Rocky Mountains, extending westward to California, north to Oregon, and south to Mexico, attaining its maximum height of 250 feet in the Sierras. It is the only fir of the arid regions and Great Basin. The wood is light, soft, and coarse-grained, but is somewhat used for lumber. (*b*) Same as *grand* ★*fir.* (*c*) Same as *lovely* ★*fir.*

Fraser Fir (*Abies Fraseri*).
(From Sargent's "Manual of the Trees of North America.")

fir. An abbreviation of *firkin.*

fire, *n.*—**Automatic fire.** Same as *spontaneous combustion* (which see, under *combustion*).—**Electrical fire,** a term used by Benjamin Franklin as synonymous with *electric fluid* and frequently in the sense in which *electric charge* is used by modern writers.

There is no more *electrical fire* in a bottle after charging than before.
Franklin, New Experiments and Observations on Electricity, p. 35.

Greek fire. (*b*) A solution of phosphorus in carbon disulphid. When this is exposed to the air at ordinary temperature the solvent soon evaporates, and in a very short time the phosphorus, which is left behind in a finely divided condition, bursts into flame. It has been proposed to use this solution in war in setting fire to ships, houses, etc., but it is not very effective, since the oxid of phosphorus formed in combustion coats over the wood or other less inflammable material, protecting it from the oxygen of the air, and so from the fire.—**Red fire,** a pyrotechnic mixture of readily combustible materials, one ingredient of which is strontium nitrate or chlorate, which causes the whole to burn with a vivid red light: much used for theatrical and out-of-door exhibitions, and in signaling. *Thorpe,* Dict. Applied Chem., III. 341.

fire, *v. i.* 7. In *geol.*, to break out in flames or incandescent gases: said of volcanoes.

fire-altar (fīr'âl″tär), *n.* An altar upon which burnt sacrifices were offered, as distinguished from one used for incense only. In some cases the fire-altar was built up of the remains of former burnt sacrifices: the most remarkable known instance of this was at Pergamon in Asia Minor.

firearm, *n.*—**Automatic firearm.** See ★*automatic.*

fire-bag (fīr'bag), *n.* A bag containing fire-making implements such as are used by Indians.

fire-bean (fīr'bēn), *n.* The scarlet runner, *Phaseolus multiflorus.*

fire-bird, *n.* 2. The vermilion flycatcher, *Pyrocephalus rubineus.* one of the South American fire-crowned flycatchers, represented in the southwestern United States by the subspecies *P. rubineus mexicanus.* The full rounded crest and under parts of the male are of a brilliant scarlet, whence the name.

fire-blende (fīr'blend), *n.* Same as *pyrostilpnite.*

fire-blight (fīr'blīt), *n.* 1. See *pear-blight,* under *blight.*—2. A disease of flax and hops.

fire-bolt (fīr'bōlt), *n.* A bolt of fire or flame; a discharge of lightning such as sets fire to inflammable terrestrial objects; any severe flash which appears to strike downward to the earth's surface.

fire-boss (fīr'bos), *n.* A mine official who examines the mine for gas and inspects safety-lamps taken into the mine. *Jour. Franklin Inst.*, Aug., 1903, p. 106.

fire-bowl (fīr'bōl), *n.* A large bowl-shaped utensil made by Japanese and Chinese potters for holding fire. See ★*hibachi* and ★*koro*[2].

fire-box, *n.*—**Belpaire fire-box,** a locomotive fire-box the flat crown-sheet of which is stayed to the parallel boiler-shell, thus avoiding the necessity for using crown-bars.

fire-brat (fīr-brat), *n.* A thysanurous insect, *Thermobia furnorum,* of the family *Lepismatidæ;* found in bake-houses, and supposed to be fond of heat.

fire-bug, *n.* 2. Same as *cabbage-bug.*

fireburn-bush (fīr'bėrn-bŭsh), *n.* A West Indian shrub, *Triopteris Jamaicensis,* belonging to the family *Malpighiaceæ:* so called from the use of its leaves in the treatment of burns.

fire-cracker, *n.*—**Floral fire-cracker, vegetable fire-cracker,** the crimson satin-flower, *Brevoortia Ida-Maia.* See ★*Brevoortia,* 2.

fire-crome (fīr'krōm), *n.* A long pole with a hook at one end, used in pulling down buildings at a fire in order to save adjoining property.

fire-cure (fīr′kūr), *v. t.* To cure (tobacco) by means of open fires. After the tobacco has yellowed for a few days, hanging on scaffolds or in the barn, slow wood fires are kindled on the floor of the barn and maintained for four or five days. This method is used with 'dark export tobacco,' and imparts to it a creosotic flavor demanded by the export trade. See *export* ★*tobacco.*

Tobaccos that have been *fire-cured*, as the plug tobaccos, contain in most cases neither oxidase, peroxidase, nor catalase. *U. S. Dept. Agr.*, Rep. 65, p. 34.

fire-door, *n.* 2. A fire-proof door in a wall or partition, designed to retard or prevent the spread of fire into or through a building. It is made of iron, or of wood covered with sheet-iron, and sometimes closes automatically, moving into place when the heat of a fire melts a fusible link.

fire-drill (fīr′dril″), *n.* 1. A primitive instrument used in producing fire by friction, consisting of a pointed stick pressed into a hole in a piece of dry wood and rapidly twirled between the hands: later the twirling was done by means of a thong or bow.—2. The exercises and training given to a company of firemen, the crew of a ship, etc., to accustom them to the duties proper to each in case of fire, or the disciplinary drill given to school-children in school to insure calmness among them, and prevention of panic, in case of fire occurring in the school-buildings.

fire-drilling (fīr′dril″ing), *n.* The process of obtaining fire by means of the fire-drill.

fire-finch, *n.* 2. A name applied to various weaver birds (*Ploceidæ*) of the genus *Pyromelana*, on account of the brilliant red shown by the males in breeding plumage.

fire-fish (fīr′fish), *n.* A name of species of fishes of the genus *Pterois* found in the East Indies.

fire-flame (fīr′flām), *n.* A fish, *Cepola rubescens*, of the family *Cepolidæ;* found in European waters.

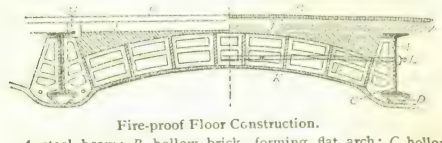
fire-grass (fīr′gras), *n.* The parsley-piert, *Alchemilla arvensis.*

fire-lane (fīr′lān), *n.* Same as ★*fire-line*, 1.

fire-line (fīr′līn), *n.* 1. In *forestry*, a strip kept clear of inflammable material as a protection against the spread of forest fire.—2. *pl.* The 'lines' or cordon established by the police around the scene of a fire, and at a safe distance from it, thus setting up a danger-line within which no one is allowed who is not connected with fighting the flames or salving the property.

fire-on-the-mountain (fīr″on-the-moun′tān), *n.* A euphorbiaceous annual plant of the warmer regions of America, *Poinsettia heterophylla*, having bright red floral bracts which in this species are toothed. Also called *Mexican fire-plant.*

fire-painting (fīr′pān″ting), *n.* The action of the fire in bringing out certain iridescent effects in metallic luster-glazes by special treatment in the kiln. See the extract.



The biscuit ware is entirely covered with a glaze of a solid tint which, when exposed to the usual degree of heat in firing, would come from the kiln in a single lustreless color or valueless tone. By subjecting it to a peculiar firing, in a kiln especially designed for the purpose, a wonderful iridescence and variety of coloring is produced. So appropriately has this ware been named that if the finished product should be afterwards placed in an ordinary glost furnace, it will entirely lose its beautiful appearance, but if returned to the special kiln once more the *Fire-Painting* will again be restored in all its prismatic brilliancy. By this process Fire-Painted ware may be produced successfully in all colors and lustres.
E. A. Barber, Pottery and Porcelain of the U. S., p. 494.

fire-patrol (fīr′pā-trōl″), *n.* A salvage corps maintained by the insurance companies, and working with the fire-department of a city. Their business is to prevent looting at fires, and to protect goods or household stuff from damage by water with the tarpaulins, rubber sheets, etc., with which they are provided. They are also charged with the safe-keeping of the property until the insurance losses have been adjusted and paid. See *salvage corps*, under *salvage.* [Chiefly U. S.]

fire-pink (fīr′pink), *n.* See *pink*[2].

fire-plant (fīr′plant), *n.* Same as ★*fire-on-the-mountain.*

fireproofing, *n.* 2. Any building material used to retard or prevent the destruction of a building by heat or flame. Such materials used in portions of an otherwise non-fireproof building merely hinder the spread of a fire and tend to render the building slow-burning. Among them are stone, marble, terra-cotta, brick, artificial stone, corrugated iron, and sheet-metals for exterior walls, and slate, tiles, and sheet-metals for roofing. For interior walls, floors, and stairs, slate, marble, plain and ornamental brick, plasters, cements, reinforced concrete and mosaic, wire lathing, metallic window-frames, sashes, doors, shutters, and trim, and wire glass are extensively used. For floors between steel beams, reinforced concrete, hollow brick and hollow tile, plaster, and cements are used, not only to build flat arches, but also to inclose and protect the beams and columns, piping, and electric wiring. Woven wire, grille-work, and expanded metals are also used for inclosing stair- and elevator-wells. With these materials a steel-frame building can be made fire-resistant to a high degree and safe against serious injury from the burning of the furniture and ordinary contents.

Fire-proof Floor Construction.

A, steel beam; *B*, hollow brick, forming flat arch; *C*, hollow brick abutment for arch; *D*, tile, under beam; *E*, concrete filling; *F*, wood flooring; *G*, tile flooring; *H*, steel cleat; *I*, wood strip for flooring; *J*, cinder bedding under tile; *K*, plaster ceiling; *L*, stay-rod joining beams.

fire-resisting (fīr′rē-zis″ting), *a.* Fitted to resist the effects of fire: as, *fire-resisting* materials. [Suggested by the International Fire-prevention Congress as a substitute for *fire-proof.*] *Engineering* (London), July 24, 1903, p. 127.

fire-risk (fīr′risk), *n.* 1. The risk of loss by fire.—2. The obligation to make good loss or damage by fire undertaken by a fire-insurance company. Hence—3. The property on which this risk is taken: as, a good *fire-risk.*

fire-stick, *n.* 3. *pl.* A pair of sticks used for lifting coals out of the fire, or for rearranging the burning fagots.

In the same plate are included a pair of wooden *fire-sticks* or tongs [of the Tulare Indians.]
Smithsonian Rep. (Nat. Mus.), 1900, p. 180.

fire-stop (fīr′stop), *n.* Same as *fire-bridge.*

fire-syringe (fīr′sir″inj), *n.* 1. An instrument used by certain peoples of the East Indies to produce fire. It consists of a hollow cylinder of wood, bone, or metal, open at one end, and having a close-fitting piston by means of which the air in the cylinder can be suddenly compressed and thus a piece of tow or similar material at the bottom of the cylinder ignited.

The most interesting objects . . . from an ethnological point of view were a set of the *fire-syringes* (generally manufactured from bone or horn) which are still used in some up-country villages for the production of fire.
Rep. Brit. Ass'n Advancement of Sci., 1901, p. 418.

2. A device consisting of a cylinder and piston attached to a tinder-box. The tinder may be ignited by the heat generated in the compression of the air in the cylinder.

firetail, *n.* 3. An Australian name of two small weaver-birds, *Ægintha temporalis*, and *Zonæginthus bellus.*

fire-test (fīr′test), *n.* 1. The determination of the temperature at which kerosene or other hydrocarbon oil used for illumination on being gradually heated first gives off enough vapor to catch fire from a momentarily applied match or electric spark. Same as *flash-test.*—2. The subjecting of pottery or porcelain to various degrees of heat in a kiln to ascertain its relative hardness or fire-resisting properties.

Indeed, *fire-tests* made by Prof. Isaac Broome, to whom I submitted specimens, show that the Tucker porcelain will stand a higher degree of heat than the Sèvres ware.
E. A. Barber, Pottery and Porcelain of the U. S., p. 127.

fire-thorn (fīr′thôrn), *n.* The pyracanth or evergreen thorn, *Cotoneaster Pyracantha.*

fire-top (fīr′top), *n.* The great willow-herb or fireweed, *Chamænerion angustifolium.*

fire-walk (fīr′wâk), *n.* A ceremony of the Fijians in which a number of barefooted men walk over hot stones which fill a large circular pit.

Among these notable accounts is one by Col. Gudgeon, British resident at Raratonga, describing the experiment by a man from Raiatea, and also a like account of the Fiji fire ceremony from Dr. T. M. Hocken, whose article is also quoted in Mr. Lang's paper on the "*Fire Walk*," in the Proceedings of the Society for Psychical Research, February, 1900. This extraordinary rite is also described by Mr. Fraser in the Golden Bough, and by others.
Sci. Amer. Sup., Feb. 14, 1903, p. 22677.

fire-walking (fīr′wâ″king), *n.* Same as ★*fire-walk.* *Athenæum*, Feb. 13, 1904, p. 217.

fireweed, *n.* (*e*) The jimson-weed, *Datura Stramonium;* also, occasionally, *D. Tatula.* (*f*) The wild lettuce, *Lactuca Canadensis.* (*g*) The golden ragwort, *Senecio aureus.*

fire-well (fīr′wel), *n.* An emanation of inflammable gas from a natural vent.

In the second class of gas-springs we may group the emanations of carburetted hydrogen, which, when they take fire, are known as *Fire-wells.* *Encyc. Brit.*, X. 251.

fire-worm, *n.* 2. Same as *blackhead* ★*cranberry-worm.*

firing, *n.* 7. Same as ★*scorching*, 3: applied especially to tobacco and corn.

During very rainy seasons, and in some kinds of unfavourable soil, the plant is subject to a malady called *firing.*
Tatham, Cult. and Com. of Tobacco, p. 22.

firing-head (fīr′ing-hed), *n.* A box or head containing a percussion-cap and a firing-pin, fitted to an oil-well torpedo. After the torpedo is in place at the bottom of the well, a small weight called a go-devil is dropped on the firing-head, which explodes the torpedo.

firing-pin (fīr′ing-pin), *n.* That part of the breech-mechanism of a small arm or cannon which explodes the primer of the cartridge.

firm, *n.*—**Long firm,** a swindler or a pack of swindlers who, pretending to be in business in some particular line or lines, order goods, usually from a distance, to be sent to their pretended place of business, dispose of the goods at once for whatever they will bring, and disappear, leaving the bill unpaid, to repeat the swindle in some other place. [Colloq., Great Britain.]

fir-moss (fėr′môs), *n.* The fir club-moss, *Lycopodium Selago.* See ★*club-moss.*

fir-rape (fėr′rāp), *n.* 1. The pine-sap, *Hypopitys Hypopithys.*—2. The beech-drops, *Leptamnium Virginianum.*

First aid, hand, officer, etc. See ★*aid*[1], etc.

firstness, *n.* 2. In the phenomenology of C. S. Peirce, the mode of being of that which is whatever it is regardless of anything else. This is true only of qualities of feeling, such as red or scarlet, and of such qualities of a similar nature as we suppose things to possess. Thus, although hardness consists in resistance to being scratched by a second thing, yet our ordinary common-sense conception is that a hard body possesses in itself a quality which it retains although it never comes into contact with another, and that this quality, which it possesses regardless of anything else and would possess though all the rest of the universe never existed, is the cause of the difficulty of scratching it. The mode of being of such an internal quality is *firstness.* That which has firstness can have no parts, because the being of an object which has parts consists in the being of the parts, which are none of them the whole. Any analysis of the constituents of a quality is a description of something found to be true of whatever possesses that quality. But a quality of feeling, as it is in its mode of being as a quality, has no parts.

fiscalization (fis″ka-li-zā′shon), *n.* [Sp. *fiscalisacion* = Pg. *fiscalisacão:* as *fiscalize* + *-ation.*] The fiscal treatment of a matter.

It was also resolved, in view of the fact that they were interested in the development and *fiscalization* of the trade, to maintain the traditional regimen decreed in the royal letter of January 23, 1612.
Geog. Jour. (R. G. S.), XI. 188.

fiscalize (fis′ka-līz), *v. t.*; pret. and pp. *fiscalized*, ppr. *fiscalizing.* [Sp. Pg. *fiscalisar:* as *fiscal* + *-ize.*] To examine, manage, or regulate (a matter of business) in respect to its fiscal or revenue features.

fisetic (fi-set′ik), *a.* [G. **fisetisch*, < *fiset*(*holz*), young fustic.] Of or pertaining to fustic.—**Fisetic acid,** an incorrect name for fisetin.

fish[1], *n.*, 6. (*b*) The Southern Fish, Piscis Australis or Austrinus.—**Atka fish,** a fish of the genus *Pleurogrammus*, found about the island of Atka.—**Electric fish,** any of the fishes which have the power to give electric shocks, as several species of rays, the electric eel, and the electric catfish.—**Four-eyed fish.** (*a*) A common name of fishes of the genus *Anableps*, found in the fresh waters of South America. Their eyes are completely divided by a horizontal partition into an upper and a lower portion; the lower part is popularly supposed to be for use in the water, the other in the air. See *Anableps*, with cut. (*b*) A name sometimes applied to fishes having ocellated spots of color resembling auxiliary eyes.—**Indian fish.** (*a*) A name, in Jamaica, of *Ponacanthus paru*, of the family *Chætodontidæ.* (*b*) *Chænobryttus gulosus*, one of the sunfishes found in fresh waters of the eastern United States.—**Isinglass-fish,** any fish, as the sturgeon, from which isinglass is made.—**Jugular fish,** a fish in which the ventral fins are inserted in advance of the pectoral fins.—**San Pedro fish,** the opah, *Lampris luna.*—**Silver-bar fish,** a common name applied to *Chirocentrus dorab*, a large fish of the Indian Ocean.—**Southern Fish,** the constellation Piscis Australis.—**Struck fish,** a fish salted and then smoked.

fish-block (fish′blok), *n.* The hoisting-block used in fishing an anchor.

fished (fisht), *a.* Filled with fish.

When it [the net] was hove up alongside it was seen to be well *fished.*
Rep. Mass. Com. Fisheries and Game, 1904, p. 33.

fisher-fish (fish′ėr-fish), *n.* One of the remoras (*Echeneididæ*), said to be used by the Chinese to catch other fish and turtles. The remora has a powerful sucking-disk on top of its head, and clings tightly to any object. A line is said to be fastened to the tail of the remora, for the purpose of pulling it and its captures to the shore.

fishery, *n.* 4. The exercise of the right to fish; a fishing venture or season.

Only thirty-six [pearl] *fisheries* took place [in Ceylon] during the nineteenth century.
Nature, March 17, 1904, p. 465.

Bank fisheries. See ★*bank*[1].—**Bureau of Fisheries.** See ★*bureau.*—**Pelagic fishery.** See ★*pelagic.*

fish-eye (fish′ī), *n.* 1. A moonstone cut in the form of the eye of a fish and having a peculiar, soft, milky reflection.—2. An ichthyophthalmite. See *apophyllite.*

fish-fly (fish′flī), *n.* A member of the genus *Chauliodes*, of the neuropterous family *Sialidæ*; specifically, the comb-horned fish-fly, *Chauliodes pectinicornis*.

Comb-horned Fish-fly (*Chauliodes pectinicornis*).

fish-front (fish′-frunt), *n.* A strengthening slab placed on the front of a made mast; a piece of wood or iron used to strengthen a weak or broken spar.

fishing, *n.*—**Fishing bill,** in *law*, a bill for discovery in equity, improperly drawn upon loose, vague and insufficient allegations. It may be dismissed upon that ground. —**Gorge-fishing,** fishing with a gorge-bait, that is, one which is intended to be swallowed by the fish.

fishing-cat (fish′ing-kat), *n.* A small spotted species of cat, *Felis viverrina*, found in Bengal: so named from its habit of catching fish.

fishing-crib (fish′ing-krib), *n.* *Naut.*, a compartment in which the engine for fishing the anchor is placed.

fishing-rod (fish′ing-rod), *n.* A long, slender, tapering rod, frequently jointed and elaborately made, to which is attached the line and hook used in angling.

fish-kid (fish′kid), *n.* Same as *kid*[3], 2.

fish-leaves (fish′lēvz), *n.* The common pondweed, *Potamogeton natans*. See *pondweed* (with cut).

fish-mold (fish′mōld), *n.* A fungus which grows on fishes.

fish-mouth (fish′mouth), *n.* The snake-head or turtle-head, *Chelone glabra*.

Fish-mouth nebula. See ★*nebula*.

fish-pass (fish′pȧs), *n.* An artificial channel designed to enable fish to pass from one body of water to another or over river obstructions such as falls or dams. *Nature*, Aug. 18, 1904, p. 364.

fish-pendant (fish′pen″dant), *n.* *Naut.*, the rope to which the fish-hook is secured.

fish-poison, *n.* Also two species of *Cracca*, *C. purpurea* and *C. toxicaria*, used to stupefy fish. See *Tephrosia* and ★*ahuhu*.—**Brazilian fish-poison,** *Serjania lethalis* (called *timbó* by the natives) and *Paullinia pinnata*. See *Serjania* and ★*barbasco*.—**California fish-poison.** In California a number of plants are used by the Indians for stupefying fish. The two principal ones are *Chlorogalum pomeridianum*, belonging to the *Melanthiaceæ*, with a bulbous saponaceous root, also called amole, or soaproot; and *Piscaria setigera* (*Croton setigerus* of Hooker), belonging to the *Euphorbiaceæ*, of which the crushed leaves are used.—**Ceylon fish-poison,** *Hydnocarpus venenata*, a tree belonging to the family *Flacourtiaceæ*, the narcotic fruits of which are used to poison fish, but which sometimes render them unfit for food: also found in Malabar and Travancore. Called by the Cingalese *makulu*.—**East Indian fish-poison,** *Walsura piscidia*, a small tree of Ceylon, Travancore and Malabar, belonging to the *Meliaceæ*. It has a bright yellow fruit with a single seed surrounded by an edible aril. The bark is used as a fish intoxicant, which does not render the fish unfit for food.—**Guam fish-poison,** the fruit of a tree, *Barringtonia speciosa*. See ★*botong* and ★*puting*. —**Malayan fish-poison,** a poison derived from *Deguelia elliptica*, a handsome leguminous climber called *tuba* by the Malayans. See ★*tuba*[2].—**Mexican fish-poison.** (*a*) Several species of *Sebastiana* of the spurge family, especially *S. bilocularis* and *S. Palmeri*. (*b*) Two leguminous plants, *Ichthyomethia Piscipula* and *Cracca toxicaria*. (*c*) *Paullinia pteropoda*, of the soapberry family.—**Philippine fish-poison,** a poison derived from several Philippine plants, called *tuba* by the natives (see ★*tuba*[2]). Among them are the widely spread physicnut, *Jatropha Curcas*, and *Croton Tiglium* (see *Croton*, 1), of the spurge family, and *Cocculus Cocculus*. (See *Cocculus*).—**Polynesian fish-poison,** *Barringtonia speciosa* and *Deguelia trifoliata*, the latter a creeping leguminous strand-plant, the pounded leaves of which are used. See ★*botong* and *Malayan* ★*fish-poison*.—**South Sea Island fish-poison,** *Lepidium piscidium*, a cruciferous plant indigenous to islands of the southern Pacific Ocean.—**West Indian fish-poison.** *Jaquinia armillaris*. See ★*barbasco*.

fish-pole (fish′pōl), *n.* A slender pole to which a line is attached for fishing; specifically, a pole of natural growth and in one piece, as distinguished from an artificial jointed rod. See *rod*[1], 1 (*e*).

fish-powder (fish′pou″dėr), *n.* Dried fish pulverized: a food for use on arctic or other long voyages, where space and keeping qualities have to be considered. *Geog. Jour.* (R. G. S.), XIII. 140.

Fish-skin grain. See ★*grain*[1].

fish-tail, *a.*—**Fish-tail wind,** a wind which blows toward or from a target and causes a rifle-ball to strike either too high or low, respectively, so that the shot-holes are contained within an area whose outline suggests the shape of a fish's tail. The broad end of the tail is above the bull's-eye when the wind blows toward the target, but below it when the wind blows toward the marksman.

fish-well (fish′wel), *n.* An inclosure in a fishing-vessel, extending from the bottom to the deck, and designed to contain live fish. The floor of the well is a grating which freely admits the sea-water.

fissicœle, fissicœl (fis′i-sēl″), *n.* [L. *fissus*, split (see *fissile*), + Gr. κοῖλος, hollow.] A cavity in the embryo formed by the splitting of a mass of cells. Same as *schizocœle*.

Fissidentaceæ (fis″i-den-tā′sē-ē), *n. pl.* [NL., ⟨ *Fissidens* (*-dent-*) + *-aceæ*.] A family of acrocarpous mosses of the order *Bryales*, typified by the great genus *Fissidens*, and containing only two other genera. It is characterized by two-ranked leaves winged on the back and formed of a single layer of similar cells, and by having the teeth of the peristome united at the base and usually split into two thread-shaped divisions. They are handsome erect mosses growing in moist, shady places throughout the world. There are 579 species, all but 9 of which belong to the genus *Fissidens*.

fissigemmation (fis″i-je-mā′shọn), *n.* [L. *fissus*, split, + *gemma*, bud: see *gemmation*.] In *biol.*, reproduction by means of buds that become detached; gemmation.

fissil[2], *a.* A simplified spelling of *fissile*.

fission-algæ (fish′ọn-al″jē), *n. pl.* Same as *Schizophyceæ*.

fission-plants (fish′ọn-plantz), *n. pl.* Plants multiplying by simple division: usually restricted to the *Schizophyta*.

fissiparation (fis″i-pa-rā′shọn), *n.* [*fissiparous* + *-ation*.] Same as *fissiparism*. See *fission*, 2.

fissiparously (fi-sip′a-rus-li), *adv.* In a fissiparous manner.

fissirostrate (fis-i-ros′trāt), *a.* Having a deeply cleft beak; fissirostral.

fissura, *n.*—**Fissura flocculi,** a fissure which bounds the attachment of the flocculus to the cerebellum in mammals. Also known as the *paraflocular sulcus*.—**Fissura præclivalis,** a fissure present in the cerebellum of mammals. It has a transverse direction and separates the anterior lobe from the remainder. In animals below man it is also called *fissura prima*.—**Fissura prima,** the deepest fissure which crosses the mesal plane of the cerebellum. It separates the cephalic lobe or lobus anticus from the rest of the cerebellum, and is the most constant fissure in the mammalian series (Smith). It is also known as *fissura præclivalis*, *sulcus furcalis*, and *sulcus primarius cerebelli*.—**Fissura rhinalis,** a fissure, on the ventral surface of the mammalian brain, extending from the olfactory bulb or lobe to the Sylvian fissure at the temporal lobe. From this point to the caudal surface of the cerebrum, where it terminates, it is called the *posthrinal fissure*. In the human brain it is not represented.—**Fissura secunda,** a fissure in the cerebellum which passes in a transverse direction, more or less parallel with the fissura prima. The fissura prima separates the lobus anticus from the lobus centralis. The fissura secunda separates the lobus centralis from the lobus posticus.

fissure, *n.*—**Adoccipital fissure.** See ★*adoccipital*.—**Amygdaline fissure,** a fissure of the brain near the extremity of the temporal lobe.—**Ansate fissure** or **sulcus,** in *anat.*, one of the minor fissures lying on the superior aspect of the anterior half of the brain.—**Anterotemporal fissure,** a fissure just caudad to and more or less parallel with the fissure of Sylvius. Synonymous with the *superior temporal sulcus*, or the *parallel fissure* in apes. *Proc. Zool. Soc. London*, 1901, I. 128.—**Callosal fissure,** the interval between the dorsal surface of the corpus callosum and the cerebral cortex above. —**Craniofacial fissure.** See ★*craniofacial*.—**Ectorhinal fissure,** in *anat.*, the furrow which separates the rhinencephalon from the rest of the hemisphere.—**Exoccipital fissure.** Same as ★*ape-fissure*.—**Ilioischiadic fissure,** in *ornith.*, the space or cleft between the ilium and ischium. In the ostrich and most of its allies, this remains open throughout life; in the vast majority of birds, the distal portions of the ilium and ischium unite, converting the proximal portion of the fissure into the obturator foramen. Also called the *obturator fissure*.—**Inferofrontal fissure,** a fissure which lies between the middle and the inferior frontal convolutions of the brain. Also known as the *subfrontal fissure*.—**Intercerebral fissure,** the large fissure which separates the two hemispheres of the brain.—**Intraparietal fissure,** a fissure which arches through the parietal lobe of the brain in men and apes. It arises in the antero-inferior angle of the lobe, usually between the Sylvian and central fissures, and in rare cases is continued into the sylvian fissure. Also known as the *parietal fissure*.—**Longitudinal fissure.** (*a*) The deep cleft which separates the two hemispheres of the brain superiorly. (*b*) A longitudinal depression on the under surface of the liver. **Obturator fissure.** Same as *ilioischiadic* ★*fissure*.—**Occipital fissure.** Same as *parieto-occipital fissure*.—**Parietal fissure.** Same as *intraparietal* ★*fissure*.—**Postclival fissure,** a fissure of the cerebellum behind the clivus or inclined upper surface of the vermis.—**Postgracile fissure,** a fissure of the cerebellum between the slender and the inferior semilunar lobes.—**Postseptal fissure,** a fissure of the brain in the posterior portion of the occipital lobe.—**Preclival fissure.** Same as ★*fissura præclivalis*.—**Pregracile fissure,** a fissure of the cerebellum between the slender and biventer lobes.—**Rivinian fissure.** Same as *notch of Rivini*.—**Simian fissure,** a fissure found in the brains of monkeys on the lateral surface of the cerebrum between the occipital and parietal lobes. Caudad of the fissure the brain substance is so folded as to form an operculum under which portions of other fissures may be found. Also known as *ape-fissure* or *affenspalte*. See ★*ape-fissure*.—**Subfrontal fissure.** Same as *inferofrontal* ★*fissure*.—**Supercentral fissure,** a fissure nearly parallel to and above the fissure of Rolando.—**Suprasylvian fissure,** a fissure which lies above and arches more or less completely over the end of the Sylvian fissure. It is well developed in the brains of carnivores.

fissure-eruption (fish′ūr-ē-rup″shọn), *n.* An outbreak of lava through a fissure in the earth's crust without the production of a volcanic cone. The name was suggested by Sir A. Geikie to describe the great lava fields of the Snake river region of Idaho, where there are vast surface flows of basalt unaccompanied by volcanoes. *Geikie*, Text-book of Geol. (4th ed.), p. 264.

fissuring (fish′ūr-ing), *n.* The production of fissures through strata.

fist[1], *n.* 3. In *printing*, the index sign ☞, included by type-founders among the marks of reference.

fist[3], **fiste** (fīst), *n.* Same as *fise*[2] and *fise-dog*.

fistula, *n.* 5. A tube or pipe which normally connects some internal part or organ of an animal with the surrounding air or water, as the trachea of an insect or the blow-hole of a whale.

> Like cetaceous animals and Whales, the Lamprey hath a *fistula* spout or pipe at the back part of the head.
> *Sir T. Browne*, Pseud. Epidemica, iii. 19.

Amphibolic fistula. See ★*amphibolic*.—**Biliary fistula.** See ★*biliary*.—**Black** or **purging fistula.** Same as *purging-cassia*. See *Cassia*.—**Branchial fistula,** a congenital opening in the neck communicating with the pharynx, due to non-closure of a branchial cleft.—**Coccygeal fistula,** an opening near the coccyx leading down to a dermoid cyst of that region.—**Fecal fistula,** an opening in the abdominal wall communicating with the intestine.—**Gastric fistula,** a communication formed between the stomach and the external surface of the abdomen.—**Thiry-Vella fistula,** an artificial opening made into the intestine of an animal for the purpose of collecting the intestinal secretions.—**Urinary fistula,** an abnormal opening into any portion of the urinary apparatus. —**Vesical fistula,** an abnormal opening into the urinary bladder: variously called *vesico-intestinal*, *vesico-uterine*, or *vesicovaginal*, according as it affords a communication between the bladder and intestine, uterus, or vagina.

fistula-needle (fis′tụ-la-nē″dl), *n.* A blunt-pointed, flexible probe with an eye near its extremity, used for passing a ligature or seton through a fistulous tract.

Fistulata (fis-tụ-lā′tä), *n. pl.* [NL.: see *fistulate*.] In Wachsmuth and Springer's classification of the *Crinoidea*, an order containing forms in which the arms are free above the radials and the posterior side of the tegmen is extended into an elongate sac or ventral tube. The ambulacra are tegminal and roofed over by covering pieces. *Cyathocrinus*, *Poteriocrinus*, and *Lecythocrinus* are examples of the order. Most of the genera are Paleozoic: none survive after the Trias.

fistulation (fis-tụ-lā′shọn), *n.* The production of a fistula. *N. E. D.*

fistulatome (fis′tụ-la-tōm), *n.* [L. *fistula* + Gr. *-τομος*, ⟨ *ταμεῖν*, cut.] An instrument resembling a probe-pointed bistoury: used for laying open a fistulous tract.

fistule, *n.* 2. A sponge of the genus *Fistula*.

Fistulipora (fis-tụ-lip′ọ-rä), *n.* [NL., ⟨ L. *fistula*, pipe, + Gr. πόρος, pore.] The typical genus of the family *Fistuliporidæ*.

Fistuliporidæ (fis-tụ-li-por′i-dē), *n. pl.* [NL., ⟨ *Fistulipora* + *-idæ*.] A family of Paleozoic tabulate corals growing in incrusting, massive, or branching form, with very fine tubular corallites, having horizontal tabulæ and no septa.

fistulization (fis″tụ-lī-zā′shọn), *n.* [*fistula* + *-ize* + *-ation*.] Same as ★*fistulation*.

fit[1], *n.* 8. In *optics*, a periodic phase through which Newton, in his emission theory of light, assumed the luminous corpuscles to pass, and which enabled them to be alternately reflected or transmitted at the surface of a refracting medium. This assumption formed the basis of the so-called *theory of fits*.—**Nine-day fits.** Same as *trismus neonatorum*.

f. i. t. An abbreviation of *free in truck*. [Eng.]

fitcher (fich′ėr), *v. t.* and *i.* [Appar. ⟨ F. *ficher*, stick.] In *mining*, to stick; to cause to stick; to operate a drill without giving it a rotary motion, thus forming a wedge-shaped cavity in which the drill will stick.

fitchew, *n.* 2. The fur of the polecat, formerly known as the fitchew, later shortened to *fitch*. See *fitch*[2], 2.

fitting, *n.* 3. Specifically, any small casting or other metal part of a machine or apparatus used to fit together or assemble other parts, as a coupling or elbow used to join lengths of pipe.

Fittonia (fi-tō′ni-ä), *n.* [NL. (Coemans, 1865), named in honor of the sisters Elizabeth and Sarah M. *Fitton*, Irish writers on popular botany (1817).] A genus of plants of the family *Acanthaceæ*. They are trailing herbs, with inconspicuous flowers borne in bracted terminal spikes. The three species, all natives of Peru, are grown in greenhouses for the delicate and showy red or white venation

of the heart-shaped leaves. *F. Verschaffeltii* and *F. argyroneura*, the former with red, the latter with white veins, are frequent in good collections.

five, *n.*—**High five.** See ★*cinch*, 4.

five-corners (fīv′kôr-nêrz), *n.* The fruit of a small Australian tree, *Styphelia triflora*, belonging to the family *Epacridaceæ;* also the tree itself. The fruits are about the size of a pea and have a sweetish pulp with a large stone. They form part of the food of the aboriginals. [Australia.]

fivefinger, *n.* 5. The Virginia creeper, *Parthenocissus quinquefolia.*—**Dwarf fivefinger,** *Potentilla pumila*, a low perennial herb of the eastern United States, closely related to the common fivefinger, *P. Canadensis*, but much smaller and having more deeply toothed leaflets.

fivefingers (fīv′fing″gėrs), *n.* The American ginseng, *Panax quinquefolius.*

five-or-nine (fīv′ôr-nīn″), *n.* The game of Pope Joan or matrimony without the lay-out, the eldest hand beginning with the 5 or 9 of any suit.

five-sisters (fīv-sis′tėrs), *n.* The whorled loosestrife, *Lysimachia quadrifolia*, the whorls of which consist as often of five as of four leaves. It is a delicate and graceful plant with yellow flowers dark-streaked or spotted on filiform peduncles in the axils of the leaves. It grows in shady places throughout eastern North America. See *loosestrife*, with cut.

fivesprig-tree (fīv′sprig-trē), *n.* A West Indian tree, *Quararibea turbinata*, of the silk-cotton family; so called from its whorls of five branches. The leaves and flowers, when dried, possess a strong odor of fenugreek.

five-throw (fīv′thrō), *a.* Having five different cranks or cams, so that five separate motions can be received or imparted.

fix, *n.* 2. In *naut. surv.*, the operation of determining ('fixing') the position of an unknown point by the three-point problem, which involves the measurement, at the point, of the two angles between lines running to three known visible points.

There is nothing in a nautical survey which requires more attention than the "*fix*"; a knowledge of the principles involved is essential in order to select properly situated objects. The method of fixing by two angles between three fixed points is generally known as the "two-circle method," but there are really three circles involved. The "station-pointer" is the instrument used for plotting fixes.
Encyc. Brit., XXXIII. 97.

fixate, *v. t.* 3. In *psychological* and *physiological optics*, to direct the eyes upon; bring within the area of clearest vision.

The tendency to *fixate* the lower end of an oblique line drawn in perspective.
E. B. Titchener, Exper. Psychol., I. ii. 312.

fixation, *n.* 6. Attachment; adhesion: as, various parasites have organs for *fixation.*—7. In *psychological* and *physiological optics*, the act or process of directing the eyes upon some object, and of maintaining this direction during the time required for observation; the bringing of a retinal image into and holding it upon the area of direct vision.—**Fixation-circle, -cross, -mark, -point,** in *psychological* and *physiological optics*, a small object or a spot of light which the observer is required to fixate, and which thus serves to maintain his eye or eyes in a constant position during an experiment: used in perimetry, in tachistoscopic observations, etc.—**Inner fixation-point,** in *psychol.*, the element or aspect of an idea which is most clearly and distinctly perceived as the idea runs its course: an expression borrowed from the physiology of vision, and contrasted with outer fixation-point. *W. Wundt* (trans.), Outlines of Psychol., p. 155.—**Line of fixation,** in *psychological* and *physiological optics*, a line in the field of regard along which the fixation-point of the eyes moves as convergence is changed from a far to a near object, or conversely. *W. Wundt* (trans.), Outlines of Psychol., p. 135.—**Monocular fixation-point,** the point of regard or center of the area of direct vision of the single eye.—**Outer fixation-point.** Same as *fixation-point.* See ★*fixation-circle.*

fixative, *n.* 2. In perfumery, a substance used to detain from too speedy evaporation a highly volatile ingredient of agreeable odor. The substance so used may itself be inodorous or may contribute to the blended odor of the mixed perfume.—3. Same as ★*amboceptor.*

fixator (fik′sā-tor), *n.* Same as ★*amboceptor.*

Fixed cheek. See ★*cheek.*

Fizeau-Cornu method. See ★*method.*

Fizeau's experiment, method. See *velocity of* ★*light.*

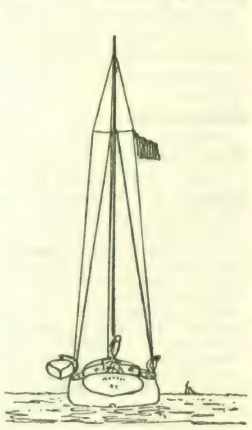
Fl. An abbreviation (*b*) of *Flanders;* (*c*) of *Flemish;* (*d*) of *Florida.*

Fla. An abbreviation of *Florida.*

flab (flab), *n.* [Var. of *flap.*] In *bot.*, the cap of any large mushroom. Also *flap.*

flabellifoliate (flā-bel-i-fō′li-āt), *a.* [L. *flabellum*, fan, + *folium*, leaf (see *foliate*).] Having fan-shaped or fan-like leaves, either such as those of the fan-palms or such as fold like a fan, as do those of *Oxalis.*

Flacian (flā′shiạn), *a.* and *n.* **I.** *a.* Of or pertaining to the works or doctrines of Flacius Illyricus, an eminent Lutheran reformer 1520–1575.



II. *n.* A follower of Flacius Illyricus. See ★*Flacianism.*

Flacianism (flā′shiạn-izm), *n.* The doctrine of Flacius Illyricus, who as a strict Lutheran opposed the teachings of Melanchthon in the adiaphoristic and synergistic controversies.

Flacourtiaceæ (fla-kör-ti-ā′sē-ē), *n. pl.* [NL. (Lindley, 1830), ⟨ *Flacourtia* + *-aceæ.*] A family of dicotyledonous choripetalous plants of the order *Hypericales*, typified by the genus *Flacourtia*, formerly included in the *Bixaceæ*, but more closely related to the *Violaceæ.* It includes 79 genera and about 300 species, chiefly woody plants of the tropics. See *Samydaceæ.*

flag[2], *n.* 7. A trade-name for the outer or distal portion of bristle, which is thinner and lighter than the basal portion.

The *flag* is much thinner and more flexible, and is used for paint brushes. *Sci. Am. Sup.*, 1903, p. 22,611.

Absence Flag.

Absence flag, a small, square, blue flag hoisted at the starboard spreader of a yacht to signify that the owner is not on board.—**Flag day.** See ★*day*[1].—**Foul-weather flag,** a storm signal.—**Rattlesnake flag,** a flag of the American Revolution: a coiled rattlesnake on a yellow field.—**Spanish flag,** a name of certain fishes which are alternately banded with bright red and golden or white. *Gonioplectrus hispanus* of the West Indies, a small bass-like fish, is specially known by this name, as is also the crimson-banded rockfish of the California coast, *Sebastodes rubrivinctus.*—**Zionist flag,** the flag of the Zionists, which has two horizontal blue stripes upon a white ground. These colors are considered sacred. The prayer-scarf, *tallith* (which see), has the same colors. In the center of the flag is the cabalistic *Magen-David*, 'David's shield,' which consists of two intertwined triangles, supposed to be the emblem of protection.

flag[3], *n.*—**Crimson flag,** *Schizostylis coccinea*, an iridaceous plant of South Africa related to *Gladiolus*, with long tubular crimson flowers. It is a favorite in flower-gardens.—**False sweet-flag,** the yellow flag, *Iris Pseudacorus.*—**Narrow flag,** the slender blue flag, *Iris prismatica*, of eastern North America, with long, narrow leaves.—**Poison flag,** a name commonly applied to species of *Iris*, especially *I. versicolor* and *I. prismatica*, to distinguish them from the sweet-flag.—**Rattlesnake-flag,** the rattlesnake-master, *Eryngium yuccifolium*, which possesses a flag-like aspect. See cut under *rattlesnake-master.*—**White flag.** (*a*) See def. (*b*) *Iris Florentina*, with bluish-white flowers. See *Iris* and *orris-root.*

flag[4], *n.*—**Arbroath flags,** a local name of beds of gray flagstones in Forfarshire, Scotland, belonging to the Old Red Sandstone.—**Bannisdale flags,** a division of the Upper Silurian in Westmoreland, England, regarded as essentially equivalent to the Middle Ludlow formation of Shropshire, including the Aymestry limestone. The strata attain a thickness of more than 5,000 feet and carry many fossils.—**Bellvale flags,** a subdivision of the Devonian system in New Jersey and southeastern New York. It is regarded by New Jersey geologists as equivalent to a part of the Hamilton group. It attains, in New Jersey, a thickness of 1,800 feet or more and is underlain by the Monroe shales and overlain by the Skunnemunk conglomerate. Fossils are rare and they are those of the Hamilton group.—**Brathay flags** [*Brathay*, a small stream in Westmoreland], the lowest division of the Coniston flags of the Upper Silurian in Westmoreland and Cumberland, England: regarded as the equivalent of the Wenlock strata of Shropshire. They attain a thickness of 1,000 feet and contain many fossils, chiefly graptolites.—**Coniston flags,** in *Eng. geol.*, a name applied to several divisions of the Silurian rocks. The Coniston flags in Westmoreland and Cumberland attain a thickness of about 3,000 feet and underlie the Coniston grits. They are regarded by Geikie as equivalent to the Lower Ludlow group or Upper Silurian. The Coniston limestone in the same region is of Lower Silurian age and equivalent in part to the Bala limestone (which see).—**Ffestiniog flags** [*Ffestiniog* in Wales], a division of the Lingula flags (Upper Cambrian) of Wales, having a thickness of about 2,000 feet and carrying trilobites, brachiopods, and other fossils. They constitute, in Geikie's classification, the middle subdivision of the Lingula flags and lie between the Dolgelly slates above and the Maentwrog flags below.—**Gardeau flags,** a term introduced by the New York geologists for a division of the Portage group of the Upper Devonian lying above the Cashaqua shales and below the Portage sandstones. They attain a thickness of several hundred feet along the Genesee river and the Gardeau Reservation, from which they take name.—**Lingula flags,** a division of the Cambrian system which lies at the bottom of the upper or Olenus series in Wales and takes its name from the vast numbers of the brachiopod *Lingula* or *Lingulella davisi* which occur in some of the layers.

flag-dues (flag′dūz), *n. pl.* *Naut.*, a charge or tax made against a vessel in some harbors for displaying flags: an excuse for extorting a fee additional to the regular harbor-dues.

Flagellar agglutinin. See ★*agglutinin.*

flagellation, *n.* 2. In *biol.*, the formation or development of flagella.

flagellum, *n.* 5. In sporozoans, a vibratile male gamete in *Halteridium*, a blood-parasite found in birds.

flageolet, *n.* 2. In *organ-building*, a stop, usually of 2-feet tone, giving high fluty tones.

flag-lily (flag′lil″i), *n.* The common blue flag, *Iris versicolor.*

flag-list (flag′list), *n.* The list of admirals or flag officers of a navy.

flag-pay (flag′pā), *n.* In the British navy, the pay of a flag-officer while flying his flag or commanding a fleet or squadron.

flag-rank (flag′rangk), *n.* In the navy, the rank of officers above the grade of captain, including commodores and the various grades of admirals.

flag-reed (flag′rēd), *n.* In Australia, the common reed, *Trichoon Phragmites.* See *reed*[1], with cut.

flag-wire (flag′wīr), *n.* A rod pivoted at the ends so as to be free to rotate about its own axis and to serve as a hinge for any body supported by it; hence, in machinery, a part or member thus mounted and used to convert reciprocating into rotatory motion.

flail-joint (flāl′joint), *n.* A hinge-joint with abnormal mobility in opposite directions.

flair[2], *n.* 3. Scent; the critical sense in art and literature. [Rare.]

No better proof could be given of Vasari's genuine *flair* and intuition as a critic of art than this passage.
C. Phillips, in Portfolio, N. S., XXXVII. 95.

flakage (flā′kāj), *n.* [*flake* + *-age.*] The flakes, chips, or splinters which fall during the process of fashioning (flint-) arrow-heads and other implements by *flaking* (which see). *Amer. Anthropologist*, Jan.–March, 1902, p. 120.

flake[1], *n.*—**Icy flake,** the peculiar white cracks or fractures, usually along the cleavage-planes, produced in the diamond during the cutting process when the necessary care to prevent overheating has not been taken. The dullness is greater or less according to the amount of the fracture.

flake-hurdle (flāk′hėr′dl), *n.* Same as *flake*[2], 1.

flake-knife (flāk′nīf), *n.* In *archæol.*, a chip or flake of flint or of some other brittle stone used as a knife.

flaker, *n.* 2. An implement of bone, antler, or similar material, used for shaping implements from brittle stones like flint, jasper, and chert. The stone was first roughly shaped with a small hammer and then placed on a pad in the hand. By means of the flaker small chips were broken off.

flaking, *n.* 2. The occurrence of streaks or spots of white, or lighter color, in organisms that are not usually white. *Bateson and Saunders*, Rep. Evol. Com. Roy. Soc., 1902, I. 47.

flaking-rolls (flā′king-rōlz), *n. pl.* In *milling*, a roller-mill adapted to making flaked cereals or prepared breakfast foods in which the grains of wheat, oats, etc., are in the form of thin flakes; a flaking roller-mill.

flambage (floṅ-bäzh′), *n.* [F., ⟨ *flambe*, flame.] A cauterizing, sterilizing, or singeing process in which the thing to be operated upon is passed rapidly through a flame or over red-hot plates.

flame, *n.*—**Ciliary flame,** in *Platyhelmintha*, a bundle of vibratile cilia, situated, typically, in the interior of a cell (the flame-cell) terminating one of the capillary branches of the water-vascular or excretory system.

flame, *v. t.* 5. To hold in or pass through a flame, as an instrument, in order to sterilize it.

flame-arc (flām′ärc), *n.* See *electric* ★*arc.*

flame-band (flām′band), *n.* In *spectroscopy*, a bright band in the spectrum, due to the radiation from a flame.

flame-box (flām′boks), *n.* A fire-box which is intended to serve as a combustion-chamber, as in a deep fire-box on a locomotive-boiler.

flame-carbon (flām′kär″bon), *n.* See *electric* ★*arc.*

flame-carpet (flām′kär″pet), *n.* See ★*carpet*, 4.

flame-flue (flām′flö), *n.* The flue which leads directly away from the fire-box of a flue-boiler, and is supposed to be filled with flame: as distinguished from the smoke-flue which returns the gases to the front end of the boiler, after combustion has been completed.

flame-gage (flām′gāj), *n.* A device for measuring the height of standard flames used in photometry. It consists of a translucent screen, with a vertical scale, upon which an enlarged image of the tip of the flame is thrown by means of a lens of short focus.

flamenco (flä-men′kō), *n.* [Sp. *flamenco*, flamingo. The fish is so named in allusion to its red color.] The Mexican name of a species of snapper, *Lutianus guttatus*, a common food-fish of the Panama region.

flame-opal (flām′ō″pal), *n.* An opal in which the colors are distributed more or less regularly in bands or streaks.

flame-plate (flām′plāt), *n.* A plate, such as the crown-sheet, which, in a fire-box or furnace, is exposed to the flame or burning gases from the fire.

flame-reaction (flām′rē-ak″shon), *n.* Same as *flame-test* (which see, under ★*test*[1]).

flame-shoulder (flām′shōl″dėr), *n.* A British collectors' name for a European noctuid moth, *Agrotis plecta*, a small dark species with a flame-colored stripe on the shoulder of each fore-wing.

flame-test (flām′test), *n.* See ★*test*[1].

flame-tight (flām′tīt), *a.* Proof against the passage or escape of flame, as the safety-lamp used by miners.

flanch (flänch), *v.* Same as *flange*.

flanch-chuck (flänch′chuk), *n.* A chuck having the shape of a flange or face-plate, with points or teeth for carrying the work instead of slots to which the work is bolted. Also called *flange-chuck*.

flanch-mill (flänch′mil), *n.* A small hand-mill used principally for grinding coffee. As ordinarily made the grinders are of iron and can be set to grind to the desired size.

flange, *n.*—**Blind flange.** Same as *blank flange*. In England, also called a *no-thoroughfare*.

flange-chuck (flanj′chuk), *n.* Same as ★*flanch-chuck*.

flange-coupling (flanj′kup″ling), *n.* See ★*coupling*.

flange-iron (flanj′ī″ėrn), *n.* Any iron bar or beam having a projecting rib or flange, as an angle-iron, T-iron, etc.

flange-pulley (flanj′půl″i), *n.* A pulley having a flange around one or both edges. Such flanges are usually to keep the belt from slipping off the side of the pulley.

flanger (flan′jėr), *n.* 1. A flanging-machine. —2. Same as *snow-flange*.—3. In *mech.* and *ship-building:* (*a*) A mechanic skilled in flanging metal plates. Also called *flange-turner*. (*b*) Same as *flanging-machine*.

flange-steel (flanj′stēl), *n.* Steel having so low a percentage of carbon or other hardening constituents as to be sufficiently ductile to be bent at right angles in the process of flanging (see *flange*, *v. t.* and *flanging-machine*), without cracking or local overstrain.

flange-tile (flanj′tīl), *n.* A tile having a flange along one or more edges.

flange-turner (flanj′tėr″nėr), *n.* Same as ★*flanger*, 3 (*a*).

flanging-clamp (flan′jing-klamp), *n.* In *forging*, a large and massive beam-clamp for holding large work while it is being hammered to form a flange on its edge. It consists of two horizontal beams. The upper one is adjustable by means of screws; the lower one is rigid and is designed to hold formers over which the hot metal is bent to make the flange.

flanging-hammer (flan′jing-ham″ėr), *n.* 1. A hand-hammer used for turning a flange on the end of copper-pipe, etc.—2. A machine for turning up the edges or forming flanges on the edge of metal plates for boilers, pipes, tanks, etc.

flank[1], *n.*—**Flank en potence** (*milit.*), a flank which is either advanced or refused and perpendicular to the rest of the line.

flanky (flang′ki), *a.* [*flank* + *-y*[1].] In *leather-manuf.*, loose and coarse: as, a *flanky* skin. *Flemming*, Practical Tanning, p. 116.

flannel, *n.*—**Welsh flannel,** flannel made from the wool of Welsh sheep.

flannel-flower, *n.* 3. An Australian plant, *Actinotus Helianthi*, of the parsley family. It bears white flowers in simple umbels surrounded by a many-leaved involucre, which is longer than the flowers and looks as if it were cut out of white flannel.

flannel-leaf (flan′el-lēf), *n.* The mullen, *Verbascum Thapsus*.

flannellet, *n.* 2. A cotton fabric woven and finished in imitation of wool flannel.

flannel-moth (flan′el-môth), *n.* Any moth of the family *Megalopygidæ*. Especially the crinkled flannel-moth, *Lagoa crispata*, whitish in color, with its wings furnished with long curly hairs, resembling flannel. Its larvæ feed on apple, oak, elm, and raspberry.

flannel-plant (flan′el-plant), *n.* Same as ★*flannel-leaf*.

flap, *n.* 10. In *mycol.*, same as ★*flab*.—11. In *phonetics*, a flapping motion of the tongue or uvula or the sound produced by it, as in vocalizing the letters *l* or *r*.

The most distinct glide-consonants are the *flaps*, of which the Norwegian 'thick' *l* is an example.
H. Sweet, Eng. Sounds, p. 12.

flapmingo (flap′ming-gō), *n.* [An alteration of *flamingo*. Compare ★*flamenco*.] One of the file-fishes, *Monacanthus ciliatus*, found in the West Indies and northward to Florida.

flapper, *n.* 6. *pl.* Hinged channeled irons attached to the top of the low portion of the door of a landau. When up, they support the door-glass frame: when the glass is lowered, they fall flat upon the door-bar.—7. In crustaceans, the tail, or the telson together with the appendages of the last abdominal segment.

flap-rein (flap′rān), *n.* A strap extending from the bridle-bit to the flap of a saddle for training a horse to hold his head in a desired position.

flare-spot (flār′spot), *n.* In *photog.*, same as *ghost*, 8.

Thus obtained a flatter field and freedom from "*flare-spot*" [in portrait objective]. *Encyc. Brit.*, XXXI. 693.

flare-up, *n.* 3. *Naut.*, a distinguishing light exhibited as a signal by a pilot vessel, or a signal flare to a vessel which is overtaking another vessel, used as a warning to the ship coming up from astern.

flaser (flä′zėr), *n.* [G. dial. *flaser*, dial. form of *flader*, a streak, vein.] In German mining language, a streak or vein.

The word has been transferred to English use in connection with 'structure,' as *flaser* structure, a structure in dynamically metamorphosed granitoid rocks which consists of rounded and uncrushed areas in the midst of fine-grained and drawn-out materials, thus imitating flow-lines.
Kemp, Handbook of Rocks, p. 187.

flaser-gabbro (flä′zėr-gab″rō), *n.* Dynamically metamorphosed gabbro which has the flaser structure.

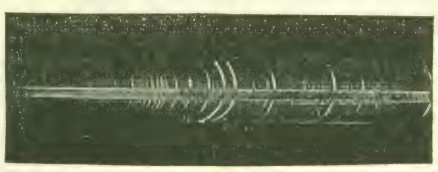
flash[1], *v.* I. *intrans.*—**To flash back,** to strike back: said of a flame of the Bunsen type in which, owing to undue admixture of air, ignition at the base of the burner occurs by the transmission of flame through the tube.—**To flash over,** in *elect.*, to pass, as a spark, from one commutator-bar to another.

II. *trans.* 7. In *photog.*, to cover with an exceedingly thin layer, as of metal in a plating-bath.

The so-formed negative is sprung from the wax, cleaned and polished, and *flashed* over with a very thin layer of nickel in a nickel bath. *Nature*, Jan. 29, 1903, p. 301.

flash[1], *n.* 9. In *elect.*, an accidental electric arc of short duration and great intensity.

flash-board (flash′bōrd), *n.* Same as *flashing-board*.

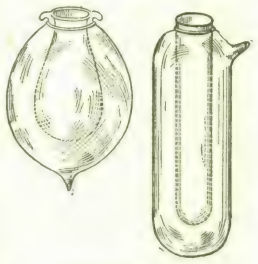


flash-boiler (flash′boi″lėr), *n.* A type of boiler, first perfected for steam motor-cars, in which the steam is instantly made by bringing small masses of hot water upon very hot surfaces. Such surfaces are usually tubes, heated by the fire on the outside, while the hot water is forced through them. A boiler of small bulk will make a large amount of steam per hour, the steam being usually superheated, which favors economy. The boiler has no store of reserve energy, but for this reason is safer. *Semiflash boilers* are those in which there is some water, at all times, in process of heating before flashing into steam. In the true flash-boiler there should be no liquid water except the last discharge of the feed-pump undergoing instant transformation into steam.

flasher[1], *n.* 6. A device for automatically lighting and extinguishing incandescent lamps or groups of lamps: used especially in the operation of electric advertising-signs.

flashing[1], *n.* 4. In *elect.*, on commutators of direct-current dynamo-electric machines, the carrying of a spark from one brush to another, when it appears as a flash encircling the commutator-surface.

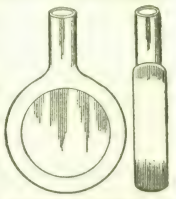
flash-lamp (flash′lamp), *n.* In *photog.*, a lamp for producing a flash-light. Powdered magnesium or aluminium is blown into an alcohol or gas flame.



flash-spectrum (flash′spek″trum), *n.* The spectrum of bright lines or luminous arcs seen

Flash-spectrum.
Eclipse of 1900. (Evershed.)

or photographed during a total eclipse of the sun at the beginning and end of the total obscuration. It lasts for a few seconds only.



flask, *n.*, 2. (*b*) In *stereotyping*, a molding-frame, with a screw at each corner, fitting closely to the form around which it is placed.—**Bologna flask,** a flask of heavy unannealed glass. It flies to pieces when any hard angular body is dropped into it.—**Dewar's flask, Dewar's liquid-air flask,** a flask, or one glass flask within another, having a complete double wall within whose intervening space is a very perfect vacuum. The glass surfaces of the vacuous space are often silvered, the conductivity for heat being thus reduced to a minimum and liquid air can be preserved in the flask for hours or even for days, while it is kept cold by its own evaporation.—**Erlenmeyer's flask,** a conical glass vessel with a flat bottom, used especially when liquids are to be decanted from precipitates.—**Fernbach's antitoxin flask.** See ★*antitoxin*.—**Giles's flask,** a graduated flask used in volumetric analysis. (See the cut.) The extra 100 cubic centimeters is used in standardizing the solution.—**Liter flask,** in *chem.*, a glass flask, usually furnished with a ground-glass stopper, having a mark on the neck indicating the capacity up to that level of a liter at a particular temperature, commonly 15° C. It is much used in connection with volumetric analysis, for preparing solutions of determinate strength.—**Miquel flask,** a culture-flask used in the bacteriological study of water.—**Soyka's bacteria flask,** a culture-flask with parallel sides, one of which may be ruled in squares for counting.

Dewar's Flasks.

Giles's Flask.

Soyka's Bacteria Flask.

flask-shell (flask′shell), *n.* A mollusk with a flask-shaped shell; in Great Britain, a boring mollusk, *Gastrochæna modiolina*.

flat[1], I. *a.* 11. In *cotton-shipping*, not compressed; not hard packed. Cotton which is to be shipped any great distance, by rail or ship, is usually compressed in very powerful presses to reduce the bulk as much as possible. Cotton which has not been through such a press is said to be *flat*.

12. In *printing*, said of the proof or print of a plate or engraving in relief which has received the flat impression of the press without the overlay used to develop light, shade, and perspective.—13. In *golf*, said of the lie of a club, when the head is at a very obtuse angle to the shaft.—14. Not distinguished by a characteristic termination: as, a *flat* adjective (a noun that occupies an adjectival position before another noun and becomes an adjective without inflection or modification of form: as, a *stone* wall; *garden* flowers); a *flat* adverb (see ★*adverb*).

II. *n.*, 4. (*g*) Something that is flat and shallow, as a basket or hamper for carrying produce to market, a shallow two-wheeled hand-cart, etc.

8. In *ship-building:* (*b*) A platform, deck, or floor which is of restricted area and does not form an important part of the vessel's structure.

It is evident, moreover, that the greatest loss of longitudinal stability must result from the flooding of compartments near the bow and stern, unless the buoyancy of the water-line area at the tops of these compartments is preserved by watertight *flats* or platforms.
White, Manual of Naval Arch., p. 120.

14. A narrow bar of iron or wood, covered with card-clothing, surmounting the main cylinder of a cotton-carding machine.—15. In *hort.*, a shallow box, usually 2 to 4 inches deep, used by gardeners to start seeds and cuttings, and also to serve as a tray on which to carry pots.—**Alkali flat.** See ★*alkali*.—**Heel of the flat,** that part of a top flat of a cotton-carding machine which is nearest to the main cylinder.—**Mahogany flat,** the bedbug, *Cimex lectularius*. [Local, southern U. S.]—**Stationary flat,** in *cotton-manuf.*, a small piece of wood faced with flannel, which rests on the top drafting-rollers of a drawing-frame, to clear the rollers of loose cotton and impurities.

flat[1], *v. t.* 6. In *leather-manuf.*, to shave or smooth on the flesh side. *C. T. Davis*, Manuf. of Leather, p. 403.

flat[1], *adv.*—**Flat aback.**—See ★*aback*.

flatfoot (flat′fůt), *n.* 1. In *pathol.*, a condition in which the arch of the foot is broken down, the sole touching the ground throughout its entire area.—2. A condition in heavy draft-horses (usually of the fore feet), in which the heel is

low, the ground-surface broad, the sole flat or slightly convex, and the wall more acutely slanted than is normal.

flat-hammer (flat'ham″ėr), *n.* The hammer first used by the gold-beater in flattening out a pile of quartiers or pieces of gold ribbon.

flathead, *n.* 4. *Notothenia coriiceps*, a fish of the family *Trachinidæ* found in Australian waters. Also called *Maori-chief*.

flatman (flat'man), *n.* One who navigated a flat-boat: used especially in early river navigation in the Ohio and Mississippi valleys.

Flatness of field, in *photog.*, the property in an objective of bringing the rays to a focus on a plane surface, as that of the sensitive plate. While this is theoretically impossible, many lenses are now made which approximate flatness of field very closely. See ★*curvature of field*.

flat-square (flat'skwār), *a.* Having rectangular cross-sections: said of a file.

flattening (flat'ning), *n.* In *vegetable teratol.*, the abnormal assumption by normally cylindrical stems, branches, or other organs of a compressed or flattened condition. It occurs in *Coccoloba*, *Bauhinia*, *Ruscus*, *Phyllanthus*, etc., in the spadices of araceous plants, and the petioles of aquatic plants. This phenomenon is to be distinguished from *fasciation* (which see). *Masters*.

flatter-dock (flat'ėr-dok), *n.* 1. Same as *can-dock*, 2.—2. Same as ★*batter-dock*, 2.

flattie (flat'i), *n.* [*flat*[1] + dim. *-ie*. Cf. *sharpie*, *sharpy*.] A flat-bottomed boat.

Flat-ware presser, a workman in a pottery who makes flat-ware, such as plates, saucers, etc., in a mold or on the jigger. See *jigger*[1], 2 (*d*).

flat-waste (flat'wāst), *n.* In *cotton-manuf.*, the impurities and short fibers of cotton which gather on the flats or upper carding-surfaces of a carding-machine; also, the loose fibers which gather on the clearing-flats that rest on the top drawing-rollers of a drawing-frame.

flatwoods (flat'wůdz), *n. pl.* 1. A local name in Ohio for valleys formerly occupied by rivers but now flats and covered with woods.—2. In Alabama, especially in the Coosa valley, a type of land consisting of an impervious clay derived from the Cambrian shales, supporting a dense growth of dwarf oaks, pines, etc.

flat-works (flat'wėrks), *n.* An ore deposit lying parallel with the inclosing rocks but of later origin than the walls. *Geikie*, Text-book of Geol., p. 819.

flautino, *n.* 4. In *organ-building*, a two-foot stop giving fluty tones.

flautone, *n.* 2. In *organ-building*, a stop pitched an octave lower than the ordinary flute-stop.

flavazol (flav-az'ōl), *n.* [L. *flavus*, yellow, + *az(o)* + *-ol*.] A mordant coal-tar color, similar to, if not identical with, *gambine* ★*yellow*.

flavenol (flav'en-ōl), *n.* [L. *flavus*, yellow, + *-en* + *-ol*.] A colorless crystalline compound, $C_{16}H_{13}ON$. Also called *2′,4′-hydroxyphenyl-methylquinoline*. It melts at 238° C.

flavin, *n.* 2. A bright yellow crystalline compound, $C_{13}H_{12}ON_2$. Also called *2.2′-diamino-benzophenone*. It melts at 135° C.—**Diamond flavin,** a mordant coal-tar color of the monoazo type, derived from benzidine and salicylic acid. It dyes chromium-mordanted wool orange-yellow in an acid bath.

flavinduline (fla-vin'dū-lin), *n.* [As *flav(in)* + *induline*.] A basic coal-tar color of the azonium-chlorid type. It dyes tannin-mordanted cotton yellow.

flavocastaneous (flā″vō-kas-tā'nē-us), *a.* [L. *flavus*, yellow, + *castanea*, chestnut, + *-ous*.] Of a yellowish-chestnut color. *Annals and Mag. Nat. Hist.*, June, 1903, p. 615.

flavocobaltic (flā-vō-kō'bâl-tik), *a.* [L. *flavus*, yellow, + E. *cobalt* + *-ic*.] Noting a class of amino-nitro cobaltic salts. The chlorid has the formula $Co_2Cl_2(NO_2)_4(NH_3)_{10}$.

flavohyaline (flā-vō-hī'a-lin), *a.* [L. *flavus*, yellow, + Gr. *ὑαλος*, glass.] Yellowish and transparent, as the wings of certain insects. *Annals and Mag. Nat. Hist.*, April, 1904, p. 290.

flavol (flav'ōl), *n.* [L. *flavus*, yellow, + *-ol*.] A bright yellow crystalline compound, $C_{14}H_{10}O_2$. Also called *dihydroxyanthracene*.

flavoline (flav'ō-lin), *n.* [*flavol* + *-ine*[2].] A crystalline compound, $C_{16}H_{13}N$, prepared synthetically from quinoline. It melts at 65° C.

flavone (flav'ōn), *n.* [L. *flavus*, yellow, + *-one*.] A group of naturally occurring yellow coloring-matters, some members of which are used as dyes. The parent substance is called phenylpheno-γ-pyrone, $C_{15}H_{10}O_2$.

flavopallid (flā-vō-pal'id), *a.* [L. *flavus*, yellow, + *pallidus*, pale.] Pale with a yellow tinge. [Rare.]

flavophenin (flā-vō-fē'nin), *n.* [L. *flavus*, yellow, + E. *phen(yl)* + *-in*[2].] A direct coal-tar color.

flavotestaceous (flā″vō-tes-tā'shius), *a.* [L. *flavus*, yellow, + *testaceus*, of a shell.] Dusky yellow. *Annals and Mag. Nat. Hist.*, June, 1903, p. 611.

flavovirescent (flā″vō-vī-res'ent), *a.* [L. *flavus*, yellow, + *virescens*, virescent.] Virescent with a yellow tinge. [Rare.]

flax, *n.*—**Blue flax.** See *Lewis's wild* ★*flax*.—**Cathartic flax.** Same as *purging-flax*.—**Cotton flax,** flax which has been prepared to resemble cotton, usually by chemical means, as with hydroxid and carbonate of sodium and sulphuric acid.—**Courtrai flax,** a fine quality of flax produced in Belgium, whence it is exported to other countries.—**Dutch flax,** the false flax, *Camelina sativa*.—**Dwarf flax.** Same as *purging-flax*.—**East Indian flax,** *Reinwardtia trigyna*, a small shrub of northern India, closely related to and resembling flax.—**Evergreen flax,** *Linum arboreum*, a large shrubby evergreen species native to Crete.—**False flax.** (*a*) *Camelina sativa*, also *C. microcarpa*, so called from its resemblance to flax and because it often grows in fields of flax as a weed. (*b*) The field-cress or mithridate mustard, *Lepidium campestre*.—**Lewis's wild flax,** *Linum Lewisii*, a large blue-flowered species very abundant on the western prairies and plains of North America, extending to Alaska: long confounded with the similar Old World species, *L. perenne*. Its stems yield a strong, fine fiber, utilized by the aborigines for cordage, etc., and the plant has been recommended for experiment as a source of commercial fiber. In California it is called *blue flax*, other local species having flowers of some different color.—**Mountain flax.** See ★*mountain-flax*.—**Native flax.** (*a*) In Australia, *Linum marginale*, a congener of the common flax. Though a smaller plant it yields fiber of excellent quality which is used by the aborigines for making fishing-nets and cordage. (*b*) In New Zealand, *L. monogynum*; also the New Zealand flax, *Phormium tenax*. See *Phormium*.—**Perennial flax,** *Linum perenne*, the large blue-flowered wild species of Europe and Asia, differing from the American *L. Lewisii*, which is still included in it by some botanists, in having heterogonous flowers.—**Rocky Mountain flax.** Same as *Lewis's wild* ★*flax*.—**Wild flax.** (*a*) *Linum Virginianum*, the common small yellow-flowered species of the eastern United States. Also called *slender yellow flax*. (*b*) Same as *Lewis's wild* ★*flax*. (*c*) Same as *toad-flax*. (*d*) Same as *false* ★*flax* (*a*). (*e*) The garden tickseed or calliopsis, *Coreopsis tinctoria*.—**Yellow flax,** any yellow-flowered species of *Linum*: usually with a further qualifying adjective: as, the *slender yellow flax*, *L. Virginianum*; the *stiff yellow flax*, *L. medium*; the *Florida yellow flax*, *L. Floridanum* of the southern United States; the *ridged yellow flax*, *L. striatum*; the *grooved yellow flax*, *L. sulcatum*. *L. rigidum*, the *large-flowered yellow flax*, is a species of the western United States.

Lewis's Wild Flax (*Linum Lewisii*). *a*, plant, one third natural size; *b*, capsule, two thirds natural size; *c*, seed, slightly reduced.

flax-blade (flaks'blād), *n.* In New Zealand, a leaf of the New Zealand flax. See *Phormium*.

flax-dodder (flaks'dod″ėr), *n.* See ★*dodder*[1].

flax-drop (flaks'drop), *n.* The flax-dodder, *Cuscuta Epilinum*.

flax-lily (flaks'lil″i), *n.* 1. Same as *flax-bush*.—2. A variety of *Dianella lævis*, an Australian fiber-plant belonging to the lily family. It yields a strong, silky fiber and was formerly much used by the aborigines for making baskets.—3. In Tasmania, *Dianella Tasmanica*. Called also *broad-leaved flax-lily*.

flax-plant (flaks'plant), *n.* Same as *flax-bush*.

flax-ripple (flaks'rip″l), *n.* Same as *ripple*[1].

flax-star (flaks'stär), *n.* A plant, *Asterolinon Linum-stellatum*, of the primrose family, a native of the Mediterranean region, bearing greenish star-shaped flowers.

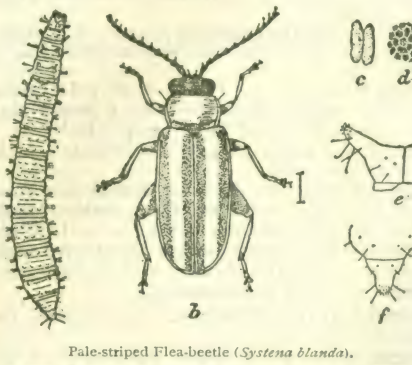
flax-tail (flaks'tāl), *n.* The common cattail or reed-mace, *Typha latifolia*.

flax-vine (flaks-vīn), *n.* The flax-dodder, *Cuscuta Epilinum*.

flaxwort (flaks'wėrt), *n.* Any plant of the flax family, especially of the genus *Linum*.

flea[1], *n.*—**Cat and dog flea.** See *Pulex*, 1.

fleabane, *n.*—**African fleabane,** *Tarchonanthus camphoratus*, an aromatic shrub or small tree of South Africa, but also found in Abyssinia and Somaliland, belonging to the aster family, with leaves silvery tomentose beneath and large pyramidal clusters of yellowish-white dioecious flowers. It has beautifully variegated yellow wood, used in making musical instruments. It is cultivated as an ornamental plant. See *wild sage* (*c*), under *sage*[2].—**Bitter fleabane,** the blue fleabane, *Erigeron acris*, a plant with blue or purple flowers and acrid juice, found in northern latitudes and at high altitudes in Europe, Asia, and North America.—**Canada** or **Canadian fleabane,** the horseweed, *Leptilon Canadense*.—**Daisy-fleabane,** any plant of the genus *Erigeron*, but more especially *E. ramosus*, *E. annuus*, and *E. Philadelphicus*. The *western daisy-fleabane* is *E. Bellidiastrum*, a small species, cinereous-pubescent throughout, with purplish flowers, found on the plains of Nebraska, Kansas, and Texas.—**Dwarf fleabane,** the low or purple horseweed, *Leptilon divaricatum*, of the Mississippi valley and Texas, a small hairy plant, rarely a foot high, with larger heads than the Canada fleabane and purplish rays.—**Early fleabane,** *Erigeron vernus*, a low plant with spatulate root-leaves and rather large white- or pink-rayed heads, found in moist soil from Virginia to Florida and Louisiana. It flowers in early spring.—**Marsh-fleabane,** any of the American species of *Pluchea*. *P. camphorata* is the salt-marsh fleabane. *P. fœtida*, *P. petiolata*, and several other species grow in inland swamps, especially in Florida. See *Pluchea*.—**Philadelphia fleabane,** *Erigeron Philadelphicus*, the most widely distributed and one of the most beautiful of American fleabanes, having soft pubescent stems and



Philadelphia Fleabane (*Erigeron Philadelphicus*). Two fifths natural size. (From Britton and Brown's "Illustrated Flora of the Northern States and Canada.")

leaves and large terminal heads, with rose-purple rays. Also called *sweet scabious* and *skevish*.—**Running fleabane,** *Erigeron flagellaris*, a small delicate plant running by decumbent rooting stems, the small oblong leaves mostly near the ground, and the large single heads with white or pink rays borne on long slender peduncles. It is confined chiefly to the Great Plains from South Dakota to New Mexico.—**Salt-marsh fleabane.** See *marsh-*★*fleabane*.—**Spicy fleabane,** the salt-marsh fleabane.—**Spreading fleabane,** *Erigeron divergens*, a diffusely branching species, ranging over the entire western United States from Montana to Washington, and south to Texas and Mexico. It is a hairy plant with large heads, the narrow violet or purple rays separated considerably from one another.—**Three-nerved fleabane,** *Erigeron subtrinervis* of the Plains and Great Basin, having lanceolate three-nerved leaves and large solitary terminal heads with very numerous, long, and showy blue or pink rays.

fleabane-mullet (flē'bān-mul″et), *n.* The common European fleabane, *Pulicaria dysenterica*.

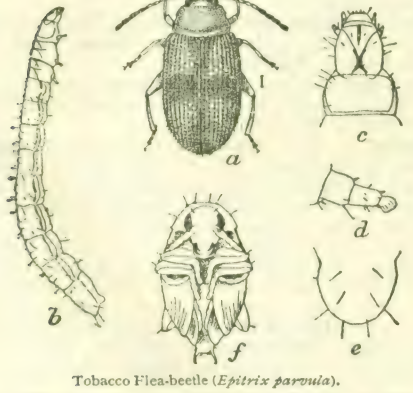
flea-beetle, *n.*—**Banded flea-beetle,** *Systena tæniata*, a species which is found commonly on beans and peas.—**Convex flea-beetle,** *Psylliodes convexior*, a beetle which occurs on the sugar-beet and on rhubarb and other garden vegetables.—**Cucumber flea-beetle.** Same as *potato* ★*flea-beetle*.—**Egg-plant flea-beetle,** *Epitrix fuscula*, a beetle which occurs on the egg-plant, cabbage, potato, and other plants.—**Elm flea-beetle,** the imported elm leaf-beetle. See ★*leaf-beetle*.—**Elongate flea-beetle,** *Systena elongata*, a species which lives on weeds, but sometimes eats the leaves of the cotton-plant.—**Horse-radish flea-beetle,** *Phyllotreta armoraciæ*, which feeds on the leaves of cruciferous weeds and vegetables.—**Pale-**

Pale-striped Flea-beetle (*Systena blanda*).

a, larva; *b*, beetle; *c*, eggs; *d*, sculpture of egg; *e*, anal segment, from side; *f*, same from above. *a–d*, six times natural size; *e*, *f*, much enlarged. (Chittenden, U. S. D. A.)

striped flea-beetle, an American chrysomelid beetle, *Systena blanda*, which injures the foliage of tomatoes and

potatoes.—**Potato flea-beetle,** a small American chrysomelid beetle, *Epitrix cucumeris*, which eats small round holes in potato-leaves. Also called *cucumber flea-beetle*. See *flea-beetle*. — **Red-headed flea-beetle,** *Systena frontalis*, a species noted for the damage which it inflicts upon sugar-beets. — **Red-legged flea-beetle,** *Crepidodera rufipes*, a species which injures the buds and tender foliage of fruit-trees. — **Spinach flea-beetle,** an American chrysomelid beetle, *Disonycha xanthomelæna*, black in color, with a yellowish prothorax and abdomen, and of wide distribution. It feeds on spinach and the sugar-beet.—



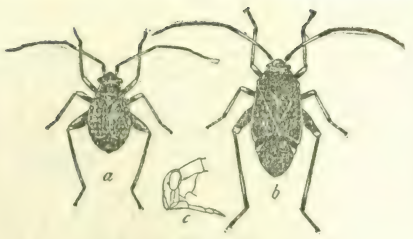
Potato Flea-beetle (*Epitrix cucumeris*).
Much enlarged. (Chittenden, U. S. D. A.)

Spinach Flea-beetle (*Disonycha xanthomelæna*).

a, beetle; *b*, egg-mass showing mode of escape of larva at right; *c*, full-grown larva; *d*, pupa. *a*, *c*, and *d*, five times natural size; *b*, more enlarged. (Chittenden, U. S. D. A.)

Strawberry flea-beetle, *Haltica ignita*, a widely distributed metallic-colored species which lives both as larva and as adult on the leaves of the strawberry and certain other plants, more frequently perhaps on the evening primrose.—**Sweet-potato flea-beetle,** *Chætocnema confinis*, a bronze-colored species which frequently destroys the leaves of young sweet-potato plants.—**Tobacco flea-beetle,** *Epitrix parvula*, a reddish-brown species

Tobacco Flea-beetle (*Epitrix parvula*).



a, beetle; *b*, larva; *c*, *d*, *e*, larval details; *f*, pupa. All much enlarged. (Chittenden, U. S. D. A.)

which punctures the leaves of young tobacco-plants.—**Violaceous flea-beetle,** *Crepidodera helxines*, a coppery, violet, or greenish-black species, often injurious to the foliage of the cherry.—**Wavy-striped flea-beetle,** *Phyllotreta vittata*, a species black in color, with a yellow wavy stripe down each wing-cover. Its larvæ mine the leaves of cruciferous vegetables, on which the adult beetles feed.—**Western flea-beetle,** *Phyllotreta pusilla*, a dark polished olive-green species which damages cabbage, turnips, and sugar-beets in the western United States.

flea-bug (flē′bug), *n.* Any small capsid bug of the genus *Halticus* or its near allies.—**Potato flea-bug,** an American capsid bug, *Halticus Uhleri*, which feeds on the leaves of the potato and other garden crops.

Western Flea-beetle (*Phyllotreta pusilla*).
Much enlarged. (Riley, U. S. D. A.)

Potato Flea-bug (*Halticus Uhleri*).

a, brachypterous female; *b*, full-winged female; *c*, head of male in outline. *a*, *b*, much enlarged; *c*, more enlarged. (Chittenden, U. S. D. A.)

flea-dock (flē′dok), *n.* Same as ★*batter-dock*, 1.

flea-mint (flē′mint), *n.* The pennyroyal, *Mentha Pulegium*.

flea-weevil (flē′wē′vil), *n.* A beetle of the family *Curculionidæ*.—**Apple-leaf flea-weevil,** an American curculionid beetle, *Orchestes pallicornis*.

flebotomy, *n.* A simplified spelling of *phlebotomy*.

flèche, *n.* **4.** In a chart, a barb attached to an arrow to indicate the force of the wind which blows in the direction of the arrow. Ordinarily six flèches are used to represent six different grades of wind from calm to hurricane; but in British charts sometimes twelve are used.—**5.** One of the points on a backgammon-board.

Flechsig's myelination method. See ★*myelination*.—**Flechsig treatment.** See ★*treatment*.

flection, *n.* **6.** In *geom.*, same as *flexure*, 1.

Flectional adverb. See ★*adverb*.

fleece, *n.* **6.** In *anat.*, white fibers, resembling wool, encircling the corpus dentatum in the cerebellum. Also called *fleece of Stilling*.—**Fallen fleece,** the fleece of a diseased animal.

fleet[1], *v. t.*—**To fleet the messenger** (*naut.*), to shift the eyes of the messenger, an endless rope used for heaving in a cable by a capstan. [Obsolete.]

Fleet in being, a fleet which, though it may be so inferior to the fleet of the enemy as to be unable to engage in open fight with him, is yet unconquered and able to hamper his offensive movements.

A *fleet in being*, therefore, is one the existence and maintenance of which, although inferior, on or near the scene of operations, is a perpetual menace to the various more or less exposed interests of the enemy, who cannot tell when a blow may fall, and who is therefore compelled to restrict his operations, otherwise possible, until that fleet can be destroyed or neutralized. It corresponds very closely to "a position on the flank and rear" of an enemy, where the presence of a smaller force, as every military student knows, harasses, and may even paralyze offensive movements. When such a force is extremely mobile, as a fleet of armoured cruisers may be, its power of mischief is very great; potentially, it is forever on the flank and rear, threatening the lines of communications. It is indeed as a threat to communications that the *fleet in being* is chiefly formidable.
A. T. Mahan, War with Spain, p. 76.

The fleet, the navy, especially the Royal Navy: as, admiral of *the fleet*.

fleet[5] (flēt), *a.* Skimmed; skim: applied to skim-milk or to cheese made from it: as, *fleet* milk, *fleet* cheese. [Eng.]

flegm, *n.* A simplified spelling of *phlegm*.

Fleischman's hygroma. See ★*hygroma*.

Fleitmann's test. See ★*test*[1].

Flem. An abbreviation of *Flemish*.

Flemingia (fle-min′ji-ạ), *n.* [NL. (Roxburgh, 1803), named in honor of John *Fleming* (died in 1815), a British physician who wrote on Indian botany.] A genus of dicotyledonous plants of the family *Acanthaceæ*. See *Thunbergia*.

flemingin (fle-min′jin), *n.* [*Flemingia* + *-in*[2].] An orange-red crystalline powder, $C_{12}H_{12}O_3$, obtained from *Moghania congesta* (*Flemingia congesta* of Roxburgh), and used as a dye. Its commercial name is *waras* (*wurus*) or *wars*.

Flemish accounts (*naut.*), abbreviated or deficient records.—**Flemish architecture, fake.** See ★*architecture*, ★*fake*[1].—**Flemish loop.** Same as *Flemish eye* (which see, under *eye*[1]).

flemish[2] (flem′ish), *v. i.* [Origin uncertain.] To make a quivering movement of the tail: said of a dog; to feather.

flesh, *n.*—**To go the way of all flesh,** to meet the fate of all living beings; to die.

flesh, *v.* **II.** *intrans.* To become more fleshy, as one who has been ill and is convalescent: used with *up*.

fleshen (flesh′n), *a.* [*flesh*, *n.*, + *-en*[2].] Of flesh; composed of flesh: as, *fleshen* hearts.

The contest between my *fleshen* and servile nature and the Law's spirituality of origin.
F. W. Farrar, St. Paul, II. 235 (trans. of Rom. vii. 14).

flesher, *n.* **5.** Same as ★*flesh-split*: commonly applied to sheepskin.

When unsplit it is called a roan; when split in two, the upper half is called a skiver, the under or fleshy half a *flesher*. *W. Matthews*, Modern Bookbinding, p. 37.

Spring flesher, a long, thin, pliable knife with a handle at each end: in distinction from the ordinary stiff flesher.

flesh-glove (flesh′gluv), *n.* A glove of somewhat rough material specially made for the same purpose as a flesh-brush.

fleshing (flesh′ing), *n.* **1.** In *leather-manuf.*, the process of shaving or scraping the loose flesh from hides or skins. *Sadtler*, Handbook of Indust. Chem., p. 325.—**2.** The distribution or the condition of the flesh of an animal.

This bull presents a well-nigh invulnerable body of beef; the holes the critics pick in it are few. He has ample scale and width, and the evenness of his *fleshing* is quite out of the usual.
13th Bien. Rep. Kan. State Board Agr., 1902–04, p. 228.

Green fleshing, the process of removing the flesh from a hide or skin while it is green, or before it has undergone any of the tanning processes. *C. T. Davis*, Manuf. of Leather, p. 379.

fleshing-beam (flesh′ing-bēm), *n.* A beam for working out the flesh side of a hide or skin.

fleshing-machine (flesh′ing-ma-shēn′), *n.* A machine which fleshes hides or skins by means of a roller fitted with knives. *C. T. Davis*, Manuf. of Leather, p. 148.

flesh-split (flesh′split), *n.* In split leather, that part of the hide or skin which is nearest the flesh, as distinguished from the ★*grain-split*. Also called *flesher*. *C. T. Davis*, Manuf. of Leather, p. 429.

Fletcherism (flech′ėr-izm), *n.* [Horace *Fletcher* (b. 1849).] The taking of food only when hungry, with extremely thorough mastication, continued until the bolus of food is entirely liquefied.

fleurdelised (flėr-dė-lēd′), *p. a.* **1.** Adorned or ornamented with fleurs-de-lis.—**2†.** Branded with a fleur-de-lis (as a criminal).

fleured (flėrd), *p. a.* Decorated with conventional flowers.

fleuron, *n.* **2.** In *arch.*, a floral ornament; specifically, the large conventional flower usually placed in the center of the abacus of a Corinthian capital or classic ceiling-caisson; also, the floreated termination of a Gothic finial.

flew[4] (flö), *n.* [Prob. from **flew*[2], *v.*, = **flue*[3], *v.*, contained in verbal noun *flewing*, *fluing*.] A layer or fold of cloth as it comes from the loom. *R. Marsden*, Cotton Weaving, p. 480.

flew[5], *n.* See ★*flue*[8].

flewing (flö′ing), *n.* [Prop. **fluing*, prob. < *flue* (spelled also *flew*), waste downy matter, etc.: see *flue*[3].] The process of examining cloth for blemishes in weaving by folding it upon the front of the loom as it is unrolled from the cloth-beam. *R. Marsden*, Cotton Weaving, p. 479.

flex[1] (fleks), *n.* [L. *flexus*, *pp.*: see *flex*[1], *v.*] A point of contrary flexure or a point of inflexion.

The ordinary singularities of a plane curve would thus be the node, the cusp, the link, and the *flex*.
Cayley, Collected Math. Papers, V. 521.

Flexibilia (flek-si-bil′i-ạ), *n. pl.* [NL., neut. pl. of L. *flexibilis*, flexible.] An order of the *Crinoidea* in which the tegmen is composed of numerous small loosely joined movable pieces. All species are Paleozoic and are stemmed except *Marsupites* and *Uintacrinus*, from the Cretaceous formation, which are without columns.

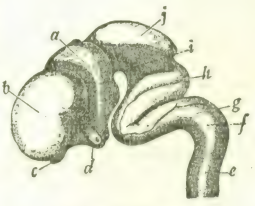
flexibilitas cerea (flek-si-bil′i-tas sē′rē-ạ). [NL., 'flexibility of wax.'] A form of muscular rigidity in catalepsy in which one can bend the limbs of the patient with a little force, the member retaining the position in which it was last placed.

flexil, *a.* A simplified spelling of *flexile*.

flexile, *a.* **2.** In *bacteriol.*, applied to filamentous forms of bacteria which are twisted and curved, although retaining their rigidity.

flexing (flek′sing), *n.* A bending; in *geol.*, a bending or crumpling of layers or strata.

flexuosity (flek-sū-os′i-ti), *n.* [*flexuous* + *-ity*.] The quality of being flexuous or full of bends and curves.



The cerebrum exhibits a decidedly superior degree of fissural complexity with notable *flexuosity* of the gyres; particularly of the pre-frontal, parieto-occipital, and parieto-temporal areas.
Amer. Anthropologist, Oct.–Dec., 1903, p. 617.

flexural (flek′sū-ral), *a.* [*flexure* + *-al*[1].] Of or pertaining to flexure or the bending of an elastic solid; producing or tending to produce flexure: as, a *flexural* stress.—**Flexural couple.** See ★*couple*.—**Flexural strength,** the strength of an

elastic solid as measured by its resistance to forces tending to bend it.

The transverse or *flexural* strength of the slates was selected for experiment because of the ease and accuracy with which the tests can be made.
U. S. Geol. Surv., 1897–98, p. 258.

flexure, *n.* **4.** In *geol.*, the folding or bending of strata under compression.—**Basicranial flexure,** a bend in the embryo at the upper end of the medulla oblongata.—**Cerebral flexure,** one of the bends or flexures in the embryonic brain.—**Cervical flexure,** a bend or flexure in the neural tube of the vertebrate embryo at the junction of the brain and the spinal cord.—**Compound flexure,** in *geol.*, a flexure or fold which contains other smaller flexures or crumplings subordinate to the major system.—**Cranial flexure,** the bending or flexure of the embryonic vertebrate brain around the anterior end of the notochord.—**Curve of flexure.** See ★*curve.*—**Elasticity of flexure.** See ★*elasticity.*—**Mesencephalic flexure,** a bend or flexure in the neural tube of the vertebrate embryo at the level of the midbrain, or mesencephalon. See cut.—**Reversed flexure,** in *geol.*, an overturned fold.—**Symmetrical flexure,** in *geol.*, a fold with equal dips on each side of its axis.—**Unsymmetrical flexure,** in *geol.*, a fold in strata with steeper dips on one side of the axis than on the other.

f. Cervical Flexure.

The brain of a human embryo, estimated as about the middle of the eighth week. (From His.)

a, thalamencephalon; *b*, cerebral hemisphere; *c*, olfactory lobe; *d*, optic stalk; *e*, spinal cord; *f*, cervical flexure; *g*, medulla oblongata; *h*, cerebellum; *i*, mesencephalic flexure; *j*, midbrain. (From Marshall's "Vertebrate Embryology.")

flexure-fault (flek′ṣūr-fâlt), *n.* In *geol.*, a fault situated within some portion of a fold and genetically connected with the development of it. Flexure-faults usually occur on the steeper limb of an asymmetrical fold. Overthrust faults are one type of them. *Dana*, Manual of Geol., p. 109.

flexus (flek′sus), *n.* [L., a bending, a winding: see *flexuous.*] A bend or bending.—**Hallux flexus,** a deformity marked by flexion of one joint of the great toe with extension of the other. Also called *hammer-toe.*

flick[1], *v.* **II.** *intrans.* **1.** In *cricket:* (*a*) To move the wrist or forearm quickly at the moment of delivering the ball: said of the bowler. [Colloq.] (*b*) To rise quickly from the pitch; bump: said of the ball. *Hutchinson*, Cricket, p. 110.—**2.** To flutter; flit, as a bird. *R. F. Burton.*

flick[1], *n.* **2.** In *cricket*, a quick turn of the bowler's wrist or forearm at the moment of delivering the ball.

flicker[1], *n.* **2.** Specifically, in *psychol.*, an unstable visual perception, occasioned by the intermittence or intensive fluctuation of stimuli.

For the determination then of the reflecting power, for example of a vermilion disc, it was only necessary to select from the series a gray disc which when combined with it in equal parts gave no perceptible *flicker.*
O. N. Rood, in Amer. Jour. Sci., Sept., 1893, p. 173.

Flicker method, the method of *flicker photometry* (which see, under ★*photometry*).

The brightnesses of these colors were determined by Rood's *flicker-method.*
Amer. Jour. Psychol., XIII. 139.

Flicker photometer. See ★*photometer.*

flicker-tail (flik′ėr-tāl), *n.* **1.** The gopher. [Western U. S.]—**2.** An epithet popularly applied to the State of North Dakota, in allusion to the gopher, which is very common in that State. *Encyc. Brit.*, XXXI. 256.

flier, *n.* **8.** One of the fresh-water sunfishes, *Centrarchus macropterus*, found in the southern United States.—**9.** An apparatus attached to a printing-machine, usually a gang of parallel rods worked by a rocking shaft, which seizes each sheet as it is printed and conveys it to the delivery-table.—**10.** One of the two lowermost leaves of a tobacco-plant.

Flyers, the first two bottom leaves, which are overripe and very trashy.
Yearbook U. S. Dept. Agr., 1899, p. 435.

Blue-pigeon flier. See ★*blue-pigeon.*

flier-frame (flī′ėr-frām), *n.* Same as *throstle*, 2.

flier-yarn (flī′ėr-yärn), *n.* Yarn that is spun on the throstle or fly-frame.

flight[1], *n.* **5.** In *archery:* (*c*) The course of an arrow through the air. (*d*) The distance traversed by an arrow.—**10.** In *mach.*: (*c*) A wing or scraper, pushed or pulled through the trough of a conveyer by a chain, to drag the load through it. (*d*) A flat bucket or vane on the periphery of a wheel-pump or on the chain which it drives. In practice this vane is made to traverse a pipe or box which prevents the water from flowing back, and as such pumps are used for only very low lifts, a fair percentage of the water is carried up.

11. Same as *flyboat.*—**12.** In *angling*, the set of spinning-baits attached by the trace to the reel-line in a spinning-tackle.—**13.** A primary, flight-feather, or remex: a term commonly used by pigeon-fanciers.—**14.** The distance a bird may or does fly; the height at which it flies: in these senses, largely figurative.—**15.** A group of three or more locks situated in such close proximity along a canal that the level of water between any two adjacent locks of the series may economically be raised and lowered to produce a lift: in distinction from locks arranged in isolated pairs with considerable distance between the different pairs. A greater number of lifts, and hence a greater aggregate height of lift, can be accomplished by a given number of locks if arranged in a flight than if the same number are arranged in isolated pairs.—**Flight of colors.** See ★*color.*—**Flight of ideas,** the mental state in which ideas follow one another in rapid succession, the patient being unable to keep his mind fixed on any one subject.—**Nuptial flight,** the flight of the queen bee during which she unites sexually with the males or drones. The queen bee leaves the hive soon after her escape from the brood-cell, and, meeting the males in the air, is fertilized, probably by a number of males, and returns to the hive with her spermatic receptacle filled with male cells, which may retain their vitality and their fertilizing power for the rest of her life. See *normal* ★*parthenogenesis.*

flight[1] (flīt), *v.* [*flight*[1], *n.*] **I.** *intrans.* To take flight; fly: an English sporting use.

II. *trans.* To shoot (wildfowl) in their flight to or from their feeding-grounds.

flight-conveyer (flīt-kọn-vā″ėr), *n.* See ★*conveyer*, 4.

flight-muscle (flīt′mus″l), *n.* One of the muscles used in flight; a wing muscle.

flight-shooting, *n.* **2.** In *archery*, distance-shooting with flight-arrows.

flimflam (flim′flam), *v. t.*; pret. and pp. *flimflammed*, ppr. *flimflamming.* [*flimflam, n.*] To cheat out of (money), as in making or receiving change or the like. [Slang.]

flimsy, *n.* **3.** A manifold copy of a report or despatch made on flimsy; reporters' 'copy'; a duplicate or a triplicate writing made on flimsy.

flindosa, flindosy (flin-dō′zä, -zi), *n.* [Australian corruption of *Flindersia.*] The rasp-pod or crow's-ash, *Flindersia australis.* See *Flindersia* and *rasp-pod.*

fling, *n.* **6.** A sudden or rapid throwing; a whipping action; a sidewise motion with respect to the principal direction of motion: as, the *fling* of a connecting-rod.

flinkite (fling′kīt), *n.* [Named for Prof. Gustav *Flink*, a Swedish mineralogist.] A basic manganese arseniate occurring in greenish-brown orthorhombic crystals: found in Sweden.

flint, *n.* **4.** Sheepskin dried in the sun. *Modern Amer. Tanning*, p. 175.—**5.** An abbreviation of *flint-glass.*—**Flint age.** See ★*age.*—**Flint corn.** See ★*corn*[1].

flint-brick (flint′brik), *n.* A hard brick made of pulverized flint; fire-brick. *Stand. Dict.*

flint-core (flint′kōr), *n.* Same as *core*[1], 2 (*k*).

flint-dried (flint′drīd), *a.* In *leather-manuf.*, dried in the sun. *Modern Amer. Tanning*, p. 32.

flint-flake (flint′flāk), *n.* In *archæol.*, one of the fragments of flint from which, in prehistoric times, implements were made, or one of the chips broken off in shaping implements.

flint-flaker (flint′flā″kėr), *n.* Same as ★*flaker*, 2.

flint-knappery (flint′nap″er-i), *n.* In *archæol.*, a place where flint was knapped or chipped.

flint-paper (flint′pā″pėr), *n.* Paper coated with glue and finely crushed quartz or flint, used like sandpaper for polishing.

flioma (flē-ō′mä), *n.* *Sebastodes pinniger*, one of the rockfishes of the family *Scorpænidæ:* found on the Pacific coast of the United States.

flipflap, *n.* **5.** A kind of tea-cake. [U. S.]

flip-glass (flip′glàs), *n.* A small glass goblet from which flip, or toddy, was drunk; also, a large glass tumbler in which flip was mixed and heated. See *flip*[2] and *flip-dog.*

flipper, *n.* **5.** In a sawmill, a steam-operated device for flipping, upsetting, or throwing over a log, cant, or piece of timber from a set of live rolls to other rolls, or for throwing a log out of the log-slide to the log-deck preparatory to rolling it down the sloping deck to the log-loader.

flirt, *v.* **I.** *trans.* **6.** To throw over; discard; jilt. [Slang, western U. S.]

I did n't wonder at folks thinking that preacher done *flirted* me. *Fursman*, Sanctified Town, p. 72.

II. *intrans.* **4.** In *archery*, to fly unsteadily: said of an arrow.

flitch (flich), *n.* **4.** A strap; a doubling-plate; a fishing-bar; a metal or wooden plate bolted to a beam or girder at a joint or other weak spot, to strengthen it and keep it straight when exposed to endwise thrust.

flitch (flich), *v. t.* [*flitch, n.*] To cut into flitches: as, to *flitch* hogs; to *flitch* halibut.

flitch-plate (flich′plāt), *n.* A strap or plate of rolled metal used to connect two or more pieces of a flitch-beam.

float, *v. i.*—**Floated and set fair.** See *lath floated and set fair*, under *lath*[1].

float, *n.* **12.** A timber drag used for dressing off roads, especially race-courses.—**15.** In stereotyping by the plaster process, the iron plate (about half an inch thick) which upholds the baked plaster mold in its dipping-pan. The plate and the pan float in a bath of the much heavier medium of melted type-metal.—**16.** In *geol.* and *mining*, loose pieces of ore which have become detached from the parent mass in place and have traveled a greater or less distance. They indicate the presence of a vein and guide the prospector in his discoveries.

In the South claim, beside the marbles supposed to underlie the surface croppings, chrome iron ore is found as "*float*" all over the surface, and at one point a deposit of 75 or 100 tons crops above the surface. *U. S. Geol. Surv.*, 1897–98, p. 241.

17. *pl.* Commercial fertilizers consisting of low-grade phosphates ground to an impalpable powder. They are used with special advantage in connection with green manures and in composts to render the phosphoric acid more available.—**Erdmann's float,** in *chem.*, a hollow cylinder of glass, about two inches long and sealed at both ends, of rather smaller diameter than the burette in which it is placed and floating with uniform immersion in the liquid to be measured. It has a transverse mark at about the middle of its length. The graduation of the burette is read off at the level corresponding to the mark upon the float. This little appliance permits a reading to be made without error, due to the meniscus surface of the liquid.

float-boat (flōt′bōt), *n.* An old name for a ship's long-boat: so called because in some circumstances it was not hoisted on board, but towed astern; a raft for transporting cargo and passengers.

float-carbureter (flōt′kär″bụ-ret-ėr), *n.* See ★*carbureter.*

float-chamber (flōt′chām″bėr), *n.* The chamber surrounding a float, as in certain forms of float-traps, float-valves, etc.

float-cut (flōt′kut), *a.* Single-cut; cut in one direction only: used in connection with files, to distinguish from double-cut.

floater, *n.* **5.** A dead human body found floating in the water. [U. S.]—**6.** In Mississippi and Tennessee, a representative in the State legislature who may be elected indifferently from either of two or more counties.—**7.** A vat in which hides are tanned. *C. T. Davis*, Manuf. of Leather, p. 403.—**8.** A cask, buoy, or other hermetically sealed vessel containing messages or records and left to drift on the ocean surface in the hope that it will be found by others. See ★*drifter. Geog. Jour.* (R. G. S.), XII. 527.—**9.** A floating island. [Louisiana.]

Occasionally some of the land is torn away and becomes an island. Such islands are known as flottants or *floaters*, by the Creoles, and are among the most picturesque sights of these Louisiana lakes, sailing upon them, borne hither and thither by the winds or currents.
Sci. Amer. Sup., May 30, 1903, p. 22,911.

10. On the stock-exchange, a certificate, bond or other paper, especially one not officially funded or listed, that is accepted as a recognized security.

On the Stock Exchange, where slang abounds, '*floaters* is a term which would puzzle outsiders. *Floaters* are exchequer bills and similar unfunded stock.
Temple Bar Mag., Feb., 1871, p. 320.

float-feed (flōt′fēd), *n.* A device in which the flow or feed of a liquid is controlled by the rise and fall of a float: specifically, a device for carburetting an air-current in motor-cars, or in internal-combustion engines, in which the rising of the level of the liquid gasoline raises a valve to close the flow from the inlet, and a lowering of the level opens the flow again. Much used in modern motor-cars. *The Automobile*, May 2, 1903, p. 478.

float-gage (flōt'gāj), *n.* Same as *floating gage.*

floating, *n.* **8.** The process of fattening oysters and scallops by placing them in fresh or brackish water, thus causing the tissues to become distended. See *float,* *n.*, 1 (*e*), and *float,* *v. t.*, 3. Also known as *fattening, laying out,* and *plumping.*

Floating battery. (*b*) Same as *De la Rive's* ★*ring.* —**Floating fly.** Same as ★*dry-fly.*—**Floating plate.** Same as ★*float,* 15.—**Floating policy.** See ★*policy*2.

float-key (flōt'kē), *n.* A sliding key; a feather; a spline; a key which can move axially in a groove or keyway.

float-quartz (flōt'kwârts), *n.* See *float-mineral.*

float-stage (flōt'stāj), *n.* A raft; a construction of timber, or of barrels and timber; a floating stage; a buoyant platform held to a vessel's side by painters, or by fore-and-aft guys, and on which footing is obtained by men at work upon the outside of the ship.

float-trap (flōt'trap), *n.* A device for automatically discharging, by the aid of the steam-pressure, the water of condensation from a tank or pipe-line. The valve is operated by the rising or falling of a float attached to it.

float-valve (flōt'valv), *n.* A valve to which is attached a float for regulating the flow of a liquid. As the level of the liquid changes, the float rises or falls, thus closing or opening the valve.

flob (flob), *v.* [Also *flub;* imitative: cf. *flop.*] **I.** *intrans.* 1. To flop; bang.—**2.** To puff; swell. Compare ★*flub.*

II. *trans.* To puff; cause to swell. [Prov. Eng. in all uses.]

flocculate (flok'ū-lāt), *v. i.* [*floccul(us)* + *-ate*2.] To form visible loose, light masses, or flocculi, as of clay in soil-water or of nitrogenous substances in milk. The addition of lime or salt causes soil-water to flocculate; ammonia prevents the flocculation or breaks it up. A sheet of uniform stratus cloud often flocculates with numerous cirro-cumulus or alto-cumulus clouds arranged in rank and file.

flocculency (flok'ū-len-si), *n.* Same as *flocculence.*

flocculous (flok'ū-lus), *a.* [*floccul(us)* + *-ous.*] Resembling or of the nature of flocculi; floculose.

flocculus, *n.* **5.** in *astron.*, a name given by Hale to cloudy wisps, bright or dark, with which the sun's surface appears to be covered when photographed with the spectroheliograph by the light of some special wave-length, as, for instance, through a line in the spectrum due to some special element such as calcium, hydrogen, or iron.—**Fissure of the flocculus.** See ★*fissura flocculi.* *Astrophysical Jour.*, Jan., 1904, p. 42.

flock-duster (flok'dus″tėr), *n.* A duster adapted to shredding and dusting wool flock. Also *flock-opener.*

flocking (flok'ing), *n.* **1.** The act of removing flocks from a fabric. See *flocking-machine.*—**2.** A collection of damaged or broken cotton fibers from the combing-needles of a cotton-combing machine. It is liable to be formed when the needles are imperfectly adjusted.

flock-opener (flok'ōp″nėr), *n.* Same as ★*flock-duster.*

flocoon (flo-kön'), *n.* [F. *flocon,* < *floc,* < L. *floccus,* flock: see *flock*2.] The filamentous, waxy secretion of certain plant-lice, especially of those of the subfamilies *Chermesinæ* and *Pemphiginæ.*

floetz, *n.* See *fletz.*

flog, *v. t.*—**To flog the clock,** to move the hands forward surreptitiously and thus shorten the time one has to be on duty. [Slang.]

flogger, *n.* **3.** In *bridge,* a separate score-sheet or -book in which the winnings and losings on each rubber are entered. Also called wash-book.

flood, *n.*—**Main flood.** (*a*) High water. (*b*) A large, broad body of water; main tide. (*c*) The main ocean; main sea. *N. E. D.*

flood, *v. t.* **2.** See ★*splash,* 4.

flood-arch (flud'ärch), *n.* One of the arched openings in a bridge or viaduct over a valley or lowland through which flood-water may pass during high water: used in distinction from a channel arch, which spans the channel and through which water continuously or usually flows.

flood-board (flud'bōrd), *n.* One of several boards or timbers placed horizontally one on another between suitable supports or piers, usually on the top of a permanent dam, wall, dike, or bulkhead, to confine flood-waters temporarily.

flood-dam (flud'dam), *n.* See ★*splash-dam.*

flood-ground (flud'ground), *n.* The portion of a river valley which becomes submerged in times of flood; a flood-plain or river-flat. *Dana,* Manual of Geol. (4th ed.), p. 193.

flood-hatch (flud'hach), *n.* A sluice or gate, usually rectangular and of timber, sliding in vertical grooves or ways in a bulkhead or dam impounding water, for the purpose of closing a flood-opening; a flood-gate: to be opened by raising during floods, to prevent the water above the dam from reaching an undesirable height.

flooding, *n.* **3.** A method of applying water for irrigation by permitting it to spread over nearly level ground, with or without restraining checks or small dikes built of earth. In *wild flooding* the water is turned upon the field and guided by a hoe or shovel, without the previous construction of checks. In the check or block system the land is graded to a certain extent and the water controlled by checks or dikes.

flooding-dam (flud'ing-dam), *n.* Another name for ★*flood-dam. Dialect Notes,* II. vi.

flood-loam (flud'lōm), *n.* A fine silt deposited on the flood-plain of a river in time of overflow. *Science,* June 21, 1901, p. 988.

floodometer (flu-dom'e-tėr), *n.* A gage or instrument for indicating the height of water in a stream subject to floods.

flood-pipe (flud'pīp), *n.* A pipe by means of which some place is flooded.—**Magazine flood-pipe** (*naval*), one of a set of pipes leading from a sea-valve to a magazine by means of which sea-water is admitted to flood the ammunition-rooms when the magazine flood-cock is opened.

flood-plain (flud'plān), *n.* A nearly level alluvial plain formed by deposition of land waste by graded or aggrading streams during times of flood.

Sweeping up from the sandy shores of the sea across marshes, *flood-plains* and well-watered forests.
Pop. Sci. Mo., March, 1902, p. 387.

flood-plane (flud'plān), *n.* The highest level to which water rises during a time of flood. Such levels are often recorded by flood-marks, or bench-marks cut into stone walls, wooden posts, or buildings.

floor, *n.*, **5.** (*b*) In *wood ship-building,* same as *floor-timber.* (*c*) In *iron ship-building,* the bottom part of a frame, consisting of the floor-plate, frame-bar, and the reverse frame-bar.—**10.** A unit formerly used in the measurement of excavation and embankment. Its magnitude was different in different localities, but was generally equivalent to a prism of earthwork 18, though sometimes 20, feet square, and 1 foot in depth.

flooring-machine (flōr'ing-ma-shēn″), *n.* In *wood-working,* a machine for planing and finishing flooring, ceiling, siding, and casing. It is essentially a planer and matcher.

flooring-plate (flōr'ing-plāt), *n.* One of the plates which underlie the ambulacral grooves in the class *Edrioasteroidea.* They are mostly arranged in double series, and resemble the ambulacral ossicles of the *Asteroidea.*

floor-light (flōr'līt), *n.* A piece of glass, or a frame with many pieces of glass, let into a floor to allow of the transmission of light from above.

floor-plan (flōr'plan), *n.* In *arch.*, a drawing which shows the plan of one story, especially with reference to those parts which are in connection with the floor rising out of it. Thus the dotted lines indicating patterns of the ceiling and all indications of objects several feet above the floor have no necessary place in a floor-plan.

floor-plate (flōr'plāt), *n.* **1.** A foot-plate; a plate, usually of iron or steel but sometimes built up of boards, used as a floor around engines and boilers. The use of such plates permits of easy access to pipes placed beneath them, as they are usually held in place only by their own weight.

2. A massive plate usually of cast iron, with slots on its upper face, forming part of the floor of a machine-shop, so that work can be bolted to it.

floor-push (flōr'pùsh), *n.* An electric push-button inserted in the floor of a room and operated with the foot.

floor-rest (flōr'rest), *n.* A heavy standard which rests on the floor and supports the tool-rest for a hand-lathe. It is used by pattern-makers for turning large pieces, such as fly-wheels, etc., the bed of the lathe being cut away to permit such large work to swing.

floorway (flōr'wā), *n.* In bridges, that part of the construction which is immediately concerned with the floor, as the pavement, stringers, and floor-beams, and in railroad-bridges also the ties, rails, and guard-rails: used in distinction to the trusses or arches, whose function it is to support the floorway.

The floor of the bridge, which is supported upon the crown of the arches and upon steel bents extending from the arches to the *floorway,* provides for a driveway 23.5 feet in width, and two footways for foot passengers 8.8 feet in width, making a total width of *floorway* of 41.3 feet.
Sci. Amer. Sup., May 23, 1903, p. 22894.

floose (flös), *n.* See ★*falus.*

Floral zone. See ★*zone.*

floran (flō'ran), *n.* [Of undetermined (Cornish?) origin.] In *mining,* tin ore which is of fine grain or which has been very finely stamped.

floreate, floriate (flō'rē-, flō'ri-āt), *v.*; pret. and pp. *floreated, floriated,* ppr. *floreating, floriating.* **I.** *intrans.* To flower out; blossom. *Baring-Gould.*

II. *trans.* To decorate with flower-patterns.

floreation, floriation (flō″rē-, flō″ri-ā'shọn), *n.* Decoration with flower-patterns.

Florentine, *n.* **4.** [*l. c.*] Same as ★*fanchonnette.*—**Florentine school of painting.** See ★*painting.*—**Florentine school of sculpture.** See ★*sculpture.*—**Florentine twill,** *n.* Same as ★*cassimere-twill.*

flore pleno (flō'rē plē'nō). [L., abl. of *flos plenus,* 'full flower.'] With the flower full: used in *hort.* with reference to flowers which have the petals (or in composites the rays) multiplied so as to fill the whole disk; double-flowered; double.

florescence, *n.* **2.** A flowering or blossoming out; growth; development; maturity.

The age of greatest [artistic] *florescence* all over the area.
Encyc. Brit., XXXI. 59.

florette (flō-ret'), *n.* [F., dim. of *fleur.* OF. *flor,* flower.] A French coin of the time of Charles VI., equal to 20 deniers: so called from the three fleurs-de-lis crowned on the obverse.

floretum (flō-rē'tum), *n.*; pl. *floreta* (-tä). [NL., < L. *flos* (*flor-*), flower, + *-etum.*] A botanical garden limited in its scope to the scientific cultivation of flowers.

Florida bean, caper-tree, etc. See ★*bean*1, etc.—**Florida clover.** See *Richardsonia.*

floridean (flō-rid'ē-ạn), *a.* Of or belonging to the *Florideæ.*—**Floridean pit.** See ★*pit*1.

Floridian series, in *Amer. geol.*, a series of Pliocene Tertiary beds extending through the Atlantic States. They abound in marine fossils, and have been divided into a number of subordinate groups.

florid-song (flor'id-sông), *n.* Figurate or contrapuntal music, as distinguished from *plain-song.*

florigraphic (flō-ri-graf'ik), *a.* [L. *flos* (*flor-*), flower, + Gr. γράφειν, write.] Of or pertaining to flower-writing or literature in regard to flowers. *G. S. Hall,* Adolescence, II. 209.

florin, *n.* **6.** A Polish silver coin of the value of about 12 United States cents.—**Double florin,** an English silver coin of the value of four shillings, authorized in 1887.

floristic (flō-ris'tik), *a.* [*flora* + *-istic.*] Having in view, or otherwise related to, a flora: opposed to *œcological.* See ★*phytogeography.*

floristically (flō-ris'ti-kạl-i), *adv.* In a floristic view. *F. E. Clements.*

floristics (flō-ris'tiks), *n. pl.* Same as *floristic* ★*phytogeography.*

The species, considered primarily with reference to numbers, would be represented by distribution or *floristics.* *Pound and Clements,* Phytogeog. of Neb., p. 15.

florula (flor'ū-lạ), *n.*; pl. *florulæ* (-lē). [NL., dim. of *flora,* flora.] A little flora, as of a limited area or, in fossil plants, of a particular locality: either the plant content or the systematic exhibit.

florule (flor'ūl), *n.* [NL. *florula.*] Same as ★*florula. Amer. Jour. Sci.,* Dec., 1903, p. 417.

flory-boat (flō'ri-bōt), *n.* [Origin of *flory-* unknown.] A small boat employed in carrying passengers between a vessel and the shore.

floscelle (flo-sel'). *n.* [L. *floscellus,* dim. of *flos,* flower.] In certain of the echinoids or sea-urchins, an arrangement of the ambulacral rosette around the peristome in which the ambulacra are depressed and the intervening areas projected into lip-shaped ridges.

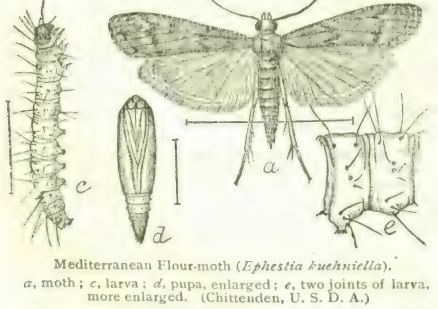
floscule (flos'kūl), *n.* **2.** Any rotifer of the family *Flosculariidæ.*

flosculus (flos'kū-lus), *n.*; pl. *flosculi* (-lī). [L. *flosculus,* a little flower: see *floscule.*] A tubular organ with a central style at the anus of certain homopterous insects of the family *Fulgoridæ. Kirby and Spence.*

floss3, *n.* **4.** The loose silk which envelops the cocoon-pod of the silkworm.

floss-silk, *n.* **3.** Loose or broken filaments of silk from the cocoons.—**3.** A soft, coarse yarn made from silk and used in making shawls, bands, and ordinary silk fabrics.

flotation, *n.* **3.** The act of launching, or 'floating,' a new enterprise, a loan, a new issue of stocks or bonds, or the like.—**Center of flotation.** See ★*center*[1].—**Curve of flotation.** See ★*curve.*—**Surface of flotation,** in *naval arch.*, in the theory of the unresisted rolling of a vessel, the surface formed by the envelop of the load-water planes of a vessel.



flounce[2], *n.* **2.** In *saddlery*, a covering for a pistol-holster, either of leather or bearskin.

flounder[2], *n.*—**Arctic flounder,** a small flounder, *Liopsetta glacialis*, found in arctic seas.—**Eel-back flounder,** a species of flounder, *Liopsetta putnami*, found along the New England coast; the female is nearly scaleless.—**Four-spotted flounder,** a species of flounder, *Paralichthys oblongus*, found along the Atlantic coast from Cape Cod to Cape Hatteras.—**Peacock flounder,** a large species of flounder, *Platophrys lunatus*, found in the West Indies; it is remarkable for the curved streaks of blue scattered over the body.—**Pole flounder,** the deep-sea flounder, *Glyptocephalus cynoglossus*, of the North Atlantic.—**Southern flounder,** *Paralichthys lethostigma*, a flounder found on the South Atlantic coast of the United States.—**Starry flounder,** a large, coarse flounder, *Platichthys stellatus*, with black spots: found in the North Pacific.—**Summer flounder,** the common large flounder, *Paralichthys dentatus*, found from New York southward along the Atlantic coast. See cut at *Paralichthys.*—**Winter flounder,** the small rough-scaled flounder, *Pseudopleuronectes americanus*, common along the New England coast.

flour, *n.*—**Clear flour,** a trade-name for the third of the three grades into which wheat flour is commercially divided. See *patent* ★*flour* and *straight* ★*flour.*—**Flour of rocks.** See ★*rock-flour.*—**Graham flour,** unbolted wheat flour or wheat meal, retaining the bran: used in making brown bread (which see, under *bread*[1]).—**Patent flour,** flour made from wheat by roller-milling instead of by grinding between millstones; the first of the three grades into which flour is commercially divided.—**Roller-process flour,** flour made by the roller process (which see, under ★*process*).—**Standard flour,** as defined by the United States Department of Agriculture, flour prepared from standard wheat, and containing not more than 13.5 per cent. of moisture, not less than 8.5 per cent. of protein, and not less than .4 per cent. of ash.—**Straight flour,** a trade-name for the second of the three grades into which wheat flour is commercially divided. See *patent* ★*flour* and *clear* ★*flour.*

flour-beetle, *n.* **2.** Any one of several beetles of the genus *Tribolium*, as *T. ferrugineum* and *T. confusum.*—**Broad-horned flour-beetle,** a cosmopolitan beetle, *Echocerus cornutus*, limited in its distribution in the United States to the sea-coast towns, and found in ground cereals of various sorts.—**Confused flour-beetle,** a cosmopolitan beetle, *Tribolium confusum*, occurring in grain of all kinds, usually following the attacks of the true grain-weevils. Its principal damage is done to flour.—**Depressed flour-beetle,** a cosmopolitan beetle, *Palorus subdepressus.*—**Rust-red flour-beetle,** the most abundant of the flour-beetles, *Tribolium ferrugineum*, occurring in various stored cereal products in most parts of the world.—**Slender-horned flour-beetle,** *Echocerus maxillosus.*—**Small-eyed flour-beetle,** the smallest of the tenebrionid flour-beetles, *Palorus ratzeburgi.*

flour-moth (flour′môth), *n.* Any one of several small moths whose larvæ feed on flour, as the Indian-meal moth, *Plodia interpunctella*, or the meal snout-moth, *Pyralis farinalis.*—**Mediterranean flour-moth,** a cosmopolitan phycitid moth,

Mediterranean Flour-moth (*Ephestia kuehniella*).
a, moth; *c*, larva; *d*, pupa, enlarged; *e*, two joints of larva, more enlarged. (Chittenden, U. S. D. A.)

Ephestia kuehniella, which does great damage in flour-mills. The larvæ form cylindrical silken tubes in which they feed. The infested flour becomes felted together and lumpy, and clogs the milling machinery.

flour-weevil (flour′wē″vl), *n.* Any one of the flour-beetles.

flour-worm (flour′wėrm), *n.* The larva of any one of the flour-moths or flour-beetles.

flow[1], *v. i.* **9.** In the *differential calculus*, to enlarge (or diminish) continuously, that is, by infinitesimal increments (+ or −).

flow[1], *n.* **9.** A quicksand. [Scotch.]—**Ebb-and-flow structure.** See ★*ebb.*—**Flow of marble,** in *geol.*, the gradual bending or deformation of marble, either minutely when in blocks at the surface or in mass and more extensively when buried beneath a heavy load of overlying strata: due to the plasticity developed under strain. *Nature*, July 9, 1903, p. 231.—**Tube of flow.** See ★*tube.*

flowage, *n.* **2.** In *mech.*, gradual internal motion or deformation, without fracture, of a viscous solid such as asphalt.—**Zone of flowage,** in *geol.*, the deepest of the three zones into which the earth's crust is conceived to be divided with regard to the deformation of rocks. In the zone of flowage the rocks are confined on all sides, yet loaded beyond their resistance as determined at the surface. Earth-movements therefore develop a viscous flow in these solids. The upper limit of the zone of flowage varies in depth, according to the nature of the rock, from 500 meters for soft shales to 10,000 meters for firm granites. The correlative zones are the *zone of fracture* and the *mixed zone of fracture and flowage.* The terms were suggested by C. R. van Hise.

flow-blue (flō′blö), *n.* In *ceram.*, blue color which spreads or flows more or less through the glaze which is placed upon it. Also called *flown blue.*

flow-dike (flō′dīk), *n.* A shallow artificial channel to convey running water: generally employed in drainage. [Obsolete.]

Flower of chivalry. See ★*chivalry.*—**Flowers of arsenic, of ocher.** See ★*arsenic,* ★*ocher.*

flower-basket (flou′ėr-bȧs″ket), *n.* **1.** A basket in which flowers are held.—**2.** A hexactinellid sponge, *Euplectella aspergillum.* Also called *Venus's flower-basket.*

flower-beetle (flou′ėr-bē″tl), *n.* Any one of many beetles which habitually frequent or feed upon flowers. A number of scarabæid beetles of the tribe *Cetoniinæ* have this habit, as the hermit flower-beetle, *Osmoderma eremicola*, the rough flower-beetle, *O. scabra*, the bumble flower-beetle, *Euphoria inda*, and the sad flower-beetle, *Euphoria melancholica.* Many of the *Malachiidæ* and *Cleridæ* are also flower-beetles, and certain species of the firefly family, *Lampyridæ*, particularly of the subfamily *Telephorinæ*, which contains the so-called soldier-beetles, feed on pollen and are called flower-beetles.—**California flower-beetle,** a western United States scarabæid beetle, *Hoplia callipyge*, which feeds on flowers.

flowerer, *n.* **2.** A person employed to paint flowers on pottery. [Eng.]

This last was usually done by women '*flowerers*,' who scratched a rough floral pattern into the body of the ware and rubbed a little zaffre or powdered cobalt glass over the incisions, a kind of ceramic tattooing which was largely practised at Burslem about 1750.
R. L. Hobson, in Burlington Mag., IV. 148.

flowering, *n.* **3.** The spawning of pelagic fishes, which sometimes cover large areas of the surface of the sea with their spawn.—**4.** The appearance of the surface of lakes and other large bodies of fresh water due to the occurrence of considerable quantities of algæ, usually blue-green forms.

flower-midge (flou′ėr-mij), *n.* A midge that infests flowers.—**Clover flower-midge** an American cecidomyiid fly, *Dasyneura trifolii*, which breeds in the flowers of red clover. Formerly called *clover seed-midge.*

flower-of-Jove (flou′ėr-o̤v-jōv′), *n.* The rose-campion, *Lychnis Flos-Jovis.* Also *Jupiter's-flower.*

flower-of-the-gods (flou′ėr-o̤v-ŦHē̤-godz′), *n.* See ★*Disa*, with cut.

flower-show (flou′ėr-shō), *n.* A public exhibition of flowers and flowering plants.

flow-gate (flō′gāt), *n.* A long gate at the side of a foundry-mold from which the molten metal flows into the mold at several points.

flow-glaze (flō′glāz), *n.* A glaze on pottery or porcelain which flows down the sides of the vessel, usually in streaks of different colors.

flow-line (flō′līn), *n.* In igneous rocks, one of a number of streaks or bands of different color, or parallel arrangement of crystals, which indicate the direction of differential flow or planes of movement along which the molten magma spread or flowed during its eruption just before its solidification. See *fluidal structure.*

flow-structure (flō′struk″tūr), *n.* Same as *fluidal structure.*

flox, *n.* A simplified spelling of *phlox.*

F. L. S. An abbreviation of *Fellow of the Linnæan Society.*

fluatation (flö-ā-tā′shọn), *n.* A trade-name for treatment with so-called 'fluate' solution. See ★*fluate,* 2.

fluate, *n.* **2.** A trade-name for a solution of a silico fluoride (salt of hydrofluosilicic acid) proposed for use by brushing over the surface of building-stone in order to close the pores and protect the stone from disintegration.

fluate (flö′āt), *v. t.*; pret. and pp. *fluated*, ppr. *fluating.* To treat with the so-called 'fluate' solution. See ★*fluate,* 2.

fluavil (flö′a-vil), *n.* [Appar. < L. *flu-ere*, flow, + F. *av(al)*, down, +*-il.*] That portion of crude gutta-percha which is dissolved by boiling absolute alcohol and which remains in solution after alban has separated out on cooling.

flub (flub), *v.* [Var. of ★*flob.*] To bang; flop. [Prov. Eng.]

flub (flub), *n.* [*flub, v.*] Same as *foozle,* 2.

fluce (flös), *n.* See ★*falus.*

Fluctuation structure. Same as *fluidal structure.*

flue[8], **flew**[5] (flö), *n.* [Also *flewe;* ME. *flew, flow;* related to MD. *vluwe*, a fishing-net, D. *flouw*, a snipe-net, F. *flu*, a net (Boiste). Origin obscure.] A fishing-net, stationary or used as a drag-net.

flue-chamber (flö′chām″bėr), *n.* A chamber or enlarged section in an exhaust-flue, formed to secure a thorough mixture of the fuel-gas with oxygen, or else to diminish the velocity of flow of the gas, so that dust or solid matter carried with it may have time to settle and be precipitated out.

flue-cure (flö′kūr), *v. t.* In the tobacco industry, to cure (tobacco) in a close barn by artificial heat distributed by flues of stone, brick, or iron. Flue-curing is practised upon 'bright-yellow' tobaccos. See ★*tobacco.*

flue-dust (flö′dust), *n.* The dust which collects in the flue of a metallurgical furnace, and which contains some very fine particles of metal, usually in the form of oxids.

flue-gas (flö′gas), *n.* Any mixture of gases from the flues of smelting-works or other chemical factories.

flue-heater (flö′hē″tėr), *n.* **1.** A device for heating a flue or air-shaft to promote the circulation of air.—**2.** A heater for feed-water or other material placed in the channels or passages carrying hot gases from a furnace.

fluellen, *n.*—**Sharp-pointed fluellin,** *Kickxia Elatine*, a plant of the figwort family having hairy stems and sharp-pointed triangular hastate leaves, native of Asia, but naturalized in Europe and in North America from Canada to North Carolina.

flue-net (flö′net), *n.* Same as ★*flue*[8]. *Habakkuk*, i. 15 (margin).

fluent, *a.* **4.** In fluxions, enlarging (or diminishing) continuously, that is, by infinitesimal increments (+ or −).

flue-pipe (flö′pīp), *n.* In *organ-building.* See *pipe*[1], 2.

flue-register (flö′rej″is-tėr), *n.* In *organ-building*, same as *flue-stop.*

flue-scraper (flö′skrā″pėr), *n.* A device for cleaning the small flues of a multitubular boiler. It consists of pieces of sheet-metal twisted into a helix of the diameter of the inside of the flue, or of brushes of wire or scraping-edges, and fastened to a rod long enough to reach through the flue from end to end. Modern scrapers are often revolving devices, driven by a motor and pushed through the tube while in motion.

flue-sheet (flö′shēt), *n.* The plate into which the flue or flues of a boiler are fastened. In some cases it is also the tube-sheet.

flue-way (flö′wā), *n.* The opening through a furnace or ventilating flue; a furnace or ventilating flue.

fluffing-wheel (fluf′ing-hwēl), *n.* In *leather-manuf.*, a wheel for smoothing or brushing the flesh side of sheepskins. *C. T. Davis*, Manuf. of Leather, p. 511.

fluffment (fluf′mẹnt), *n.* [*fluff* + *-ment.*] **1.** Light, loose talk or material. [Cumberland, Eng.]—**2.** Fuss or fussiness in either dress or manner. *A. E. Barr*, in The Century, XXXIX. 817.

fluid. I. *a.*—**Fluid measure.** Same as *apothecaries' measure* (which see, under *measure*).

II. *n.*—**Cephalorachidian fluid.** Same as *cerebrospinal fluid.*—**Coley's fluid,** a serum containing the toxins of the erysipelas streptococcus and of *Bacillus prodigiosus*, employed in the treatment of sarcoma and other malignant growths.—**Flux of a fluid,** in *phys.*, the flow in cubic centimeters per second through any imaginary surface in a fluid mass; the surface integral of fluid velocity over such a surface.—**Pasteur's fluid,** a nutrient solution used for the cultivation of bacteria and other micro-organisms, supposed to contain all the elements of protoplasm.

fluidally (flö′i-dạl-i), *adv.* In the manner of a fluid.

fluidiform (flö-id′i-fôrm), *a.* [L. *fluidus*, fluid, + *forma*, form.] Of fluid form; gaseous; ethereal; intangible.

fluidism, *n.* 2. Same as *humoralism.*

fluke[1], *n.* **6.** A result of accident or lucky chance rather than of skill.—**7.** A failure, as of a yacht-race for lack of wind.—**Mushroom fluke,** the circular iron flange or umbrella shape at the end of a mushroom-anchor shank or stem. A mushroom anchor has no stock.

fluke[1], *v. t.* **2.** In *shooting*, to hit by a chance shot.

Fluking kangaroos at 300 or 400 yards is not exhilarating sport, as anyone might understand if he tried catapulting grasshoppers at 50.
F. G. Aflalo, in Smithsonian Rep., 1901, p. 695.

fluke[2], *n.*—**Bronchial fluke.** Same as *lung* ★*fluke.*—**Indian liver-fluke.** *Opisthorchis noverca* (Braun, 1903), a trematoid worm found in the liver of man and dogs in India. It is from 9 to 12 millimeters long.—**Lung fluke,** *Distomaringeri.*

fluky, *a.* 3. Uncertain; shifty: said of the wind. Also *flooky.*

flume, *n.* 4. An inclined trough in which water runs, used in transporting logs or timbers.—**Rating flume,** a conduit or long box, usually rectanglar in section, forming part of an irrigating canal or ditch and arranged for the purpose of showing the quantity of water flowing through the canal or ditch. The flume is rated by suitable measurments, that is, the relation of height of water to quantity in the flume is ascertained and indicated by marks on the sides. *H. M. Wilson,* Irrigation Engineering, p. 93.

flume, *v.* **I.** *trans.* 2. In *lumbering,* to transport, as logs or timbers, by a flume.

II. *intrans.* 1. To conduct a channel or canal, by a flume, along an artificial temporary construction in situations where an earth or masonry channel cannot readily be secured by excavation and embankment.— 2. To build a flume or artificial channel and its supporting construction.

The original scheme was to develop the Coquitlam by *fluming* along the steep hillside a distance of about seven miles. *Elect. World and Engin.,* May 16, 1903, p. 837.

fluming, *n.* 2. An artificial channel and its supporting construction, generally of timber: used to conduct a stream or canal in situations where an earth or masonry channel cannot readily be secured.

flunky, *n.* 4. A cabin waiter on a passenger-vessel.

fluo-aluminate (flö″ō-a-lū′mi-nāt), *n.* In *chem.,* a compound of aluminium fluoride with the fluoride of a more electropositive metal, as the mineral cryolite, sodium and aluminium fluoride.

fluocalcium (flö-ō-kal′si-um), *n.* In *chem.,* same as ★*calcium fluoride.*

fluoniobate (flö-ō-nī′ō-bāt), *n.* [*fluo(ride)* + *niob(ium)* + *-ate*[1].] In *chem.,* a compound of niobium fluoride with a fluoride of a more electropositive metal: also called *niobifluoride* or *niobiofluoride.*

fluoradelite (flö-ō-rad′e-līt), *n.* Same as ★*tilasite.*

fluoramide (flö-ō-ram′id), *n.* In *chem.,* an explosive liquid of oily consistency said to have been obtained by electrolysis of a solution of ammonium fluoride. The name implies the presence of hydrogen as a constituent. The substance has also been called nitrogen fluoride, on the assumption that it consists of nitrogen and fluorin only. Its existence is doubtful.

fluoran (flö′ō-ran), *n.* [*fluor(ide)* + *-an.*] A crystalline compound, $C_{20}H_{12}O_3$, formed together with phenolphthalein, of which it is the anhydrid.

fluoranthene (flö-ō-ran′thēn), *n.* [*fluor(ide)* + Gr. *ἄνθος,* flower, + *-ene.*] A solid hydrocarbon, $C_{15}H_{10}$, found in coal-tar, in American petroleum, and in the organic distillate obtained in the preparation of mercury from its ores in Idria, whence its other name, *idryl.* It melts at 110° C. *Sadtler,* Handbook of Indust. Chem., p. 294.

fluorapatite (flö-ō-rap′a-tīt), *n.* See ★*chlorapatite.*

fluorate (flö′ō-rāt), *n.* [*fluor(ide)* + *-ate*[1].] In *chem.,* same as *fluate:* the correct modern term is *fluoride.*

fluorene (flö′ō-rēn), *n.* [*fluor(ide)* + *-ene.*] A solid hydrocarbon, $C_{13}H_{10}$, contained in portions of coal-tar boiling at 300–400° C. If not quite pure it has a violet fluorescence. Also called *orthodiphenylenemethane* or *2.2′-methylenebiphenyl.* It melts at 113° C.

Fluorescence absorption. See ★*absorption.*

Fluorescent screen, a screen usually of some material pervious to X-rays, one side of which is coated with calcium tungstate, calcium sulphid, barium platino-cyanide, or other substance which fluoresces under the action of these rays or under other influences. When used in X-ray examinations shadows appear on the screen. Similar screens are used in the spinthariscope, and in experimentation on luminescence. See also ★*fluoroscope.*

fluorescer (flö-ō-res′ėr), *n.* A fluorescent substance. *Nature,* March 31, 1904, p. 523.

fluorescin (flö-ō-res′in), *n.* [*fluoresce* + *-in*[2].] A colorless crystalline compound, $C_{20}H_{14}O_5$, prepared by the action of zinc dust and sodium hydroxid on fluorescein. It melts at 126° C.

fluor-herderite (flö-ọr-hėr′dėr-īt), *n.* See ★*herderite.*

fluoridation (flö″ō-ri-dā′shọn), *n.* In *geol.,* the process whereby fluorin combines with bases, and more especially with calcium, to yield fluorides. *Van Hise,* U. S. Geol. Surv., Monographs, XLVII. ii. 204.

fluoride, *n.*—**Silicon fluoride,** in *chem.,* a gaseous substance obtained by heating a mixture of fluor-spar and concentrated sulphuric acid with silica or any silicate. It is a colorless gas of irritant odor and high density, decomposed by water with formation of a jelly-like mass of silica or a silicic acid.

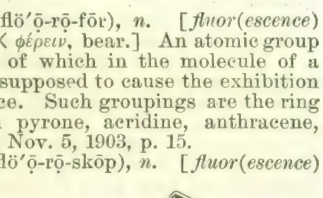
fluorin, *n.* After several abortive or doubtfully successful attempts by various chemists to isolate the element fluorin this result was finally attained by Moissan in 1886. He submitted to electrolysis anhydrous hydrofluoric acid in which a little potassium-hydrogen fluoride had been dissolved, using a specially constructed apparatus of platinum alloyed with iridium. Fluorin so obtained is a gas of pale greenish-yellow color, with a strongly irritant and penetrating odor, liquefiable at about −185° C. under atmospheric pressure, and intensely active in its chemical relations to other substances. It combines even in darkness with hydrogen with violent detonation; silicon, boron, arsenic, antimony, sulphur, and iodine take fire spotaneously in the gas; and it decomposes water with liberation of oxygen in the form of ozone. With oxygen itself fluorin will not combine.

fluorindine (flö-ō-rin′din), *n.* [*fluor(ide)* + *ind(igo)* + *-ine*[2].] A weakly basic dye, $C_{30}H_{20}N_4$, very fluorescent in alcoholic solution.

fluoroform (flö′ō-rō-fôrm), *n.* [*fluor(ide)* + *form(ic).*] A colorless gas, CHF_3, which liquefies at 20° C., under the pressure of 40 atmospheres. It is an analogue of chloroform and iodoform and is formed from these substances by the action of silver fluoride. Also called *trifluor methane.*

fluoroformol (flö″ō-rō-fôr′mōl), *n.* [*fluoroform* + *-ol.*] The trade-name for fluoroform (CHF_3) in dilute solution in water: recommended for medical use as an internally administered antiseptic in pulmonary phthisis. Also called *fluoryl.*

fluorography (flö-ō-rog′ra-fi), *n.* [*fluor(ide)* + Gr. *-γραφία,* ⟨ *γραφέιν,* write.] The process of etching on a surface of glass by means of hydrofluoric acid.



fluorol (flö′ō-rōl), *n.* [*fluor(ide)* + *-ol.*] A two per cent. solution of sodium fluoride: used as an antiseptic in place of corrosive sublimate and formaldehyde.

fluoroline (flö′ō-rō-lin), *n.* [*fluorol* + *-ine*[2].] A volatile base, $C_{12}H_{13}N$, found in paraffin-oil from lignite coal-tar. It has the odor of quinoline.

fluorometer (flö-ō-rom′e-tėr), *n.* An apparatus for the determination of fluorin by the action of sulphuric acid upon a mixture of the substance with powdered quartz, the volume of the silicon tetrafluoride evolved being measured.—**Dennis fluorometer,** an apparatus used in conjunction with X-rays in locating foreign substances in the body, or determining the nature of fractures or dislocations.

fluorophore (flö′ō-rō-fôr), *n.* [*fluor(escence)* + Gr. *-φορος,* ⟨ *φέρειν,* bear.] An atomic group the presence of which in the molecule of a compound is supposed to cause the exhibition of fluorescence. Such groupings are the ring structures in pyrone, acridine, anthracene, etc. *Nature,* Nov. 5, 1903, p. 15.

fluoroscope (flö′ō-rō-skōp), *n.* [*fluor(escence)* + Gr. *σκοπειν,* view.] An apparatus designed for observing the effect of the Röntgen rays by means of their action on a fluorescent substance. It consists essentially of a tube or box closed at one end by a screen coated with a fluorescent substance, as tungstate of calcium. When an object, as the hand, placed before a vacuum-tube is observed through the fluoroscope, the shadows of its parts that are not transparent to the X-rays are seen on the fluorescent screen.

Fluoroscope.

fluoroscopic (flö″ō-rō-skop′ik), *a.* Of or pertaining to the fluoroscope or to fluoroscopy.

fluoroscopy (flö-ō-ros′kō-pi), *n.* The art of using the fluoroscope or of examining by means of a fluorescent screen, the shadows of bodies exposed to X-rays.

fluorotype (flö′ō-rō-tīp), *n.* [*fluor(ide)* + Gr. *τύπος,* type.] In *photog.,* a photographic process in which sodium fluoride is used in sensitizing the paper.

fluoryl (flö′ō-ril), *n.* [*fluor(ide)* + *-yl.*] Same as ★*fluoroformol.*

fluosilicate, *n.* 1. (*b*) In *chem.,* a compound of silicon fluoride with a fluoride of a more electropositive element, as $Na_2SiF_6{=}2NaF{+}SiF_4$; also called *silicofluoride.*

fluotantalate (flö-ō-tan′ta-lāt), *n.* [*fluo(ride)* + *tantalum* + *-ite*[2].] In *chem.,* a compound of tantalum fluoride with a fluoride of a more electropositive metal: also called *tantalofluoride.*

fluotitanate (flö-ō-tī′ta-nāt), *n.* [*fluo(ride)* + *titan(ium)* + *-ate*[1].] In *chem.,* a compound of titanium fluoride with a fluoride of a more electropositive metal: also called *titanifluoride* or *titanofluoride.*

Fluotitanic acid, in *chem.,* a compound of titaninum fluoride with hydrogen fluoride (hydrofluoric acid), $H_2TiF_6 = 2HF + TiF_4$; also called *hydrogen titanifluoride* or *titanofluoride.* It may be viewed as derived from metatitanic acid (H_2TiO_3) by replacement of oxygen by fluorin.

fluozirconate (flö-ō-zėr′kō-nāt), *n.* [*fluo(ride)* + *zircon(ium)* + *-ate*[1].] In *chem.,* a compound of zirconium fluoride with a fluoride of a more electropositive metal: also called *zirconifluoride* or *zirconofluoride.*

flurish, *v.* and *n.* A simplified spelling of *flourish.*

flurry, *n.* 6. The scum that forms on top of a dye-vat, as an indigo-blue vat.

flush[1], *n.* 5. In *tea-growing,* a fresh growth of shoots with leaves fit for picking. After the removal of the pekoe tip (see ★*pekoe*) and the younger leaves a new flush is secured from axillary buds by stimulative culture or by removing the greater part of the plant's foliage.

flush[2], *v. i.* 3. To put out a new growth, as plants which have been partially deprived of their foliage: especially applied to tea-plants.

The trees *flush* three times a year . . . of these three flushes the first gives the best leaf, and brings the highest prices. *Kew Bulletin,* 1896, p. 15.

flush[3], *n.*—**Four flush,** in *poker,* four cards of the same suit; a bobtail.—**Monkey flush,** in *poker,* a flush of three cards only.

flush-board (flush′bōrd), *n.* Same as ★*flashboard.*

flush-gate (flush′gāt), *n.* A gate, sluice, or valve placed in a dam, reservoir-wall, or pipe-system, to be opened when desired to flush out the reservoir, the channel below the reservoir, or the pipe-system.

Next to the waste gates comes the *flush gate,* which is 16 ft. wide, and has its top edge at the same elevation when in normal position as the top of the main dam. *Elect. World and Engin.,* Feb. 13, 1904, p. 307.

flushing-tower (flush′ing-tou″ėr), *n.* A post- or after-condenser; a condenser, in the form of a vertical box, used in the manufacture of sulphuric acid to condense the acid which is not condensed in the first condenser.

flush-joint (flush′joint), *n.* In *masonry,* a joint between stones or bricks which has been filled with cement or mortar so as to be flush with their faces.

Flustrella (flus-trel′ä), *n.* [NL.] The typical genus of the family *Flustrellidæ. Gray,* 1848.

Flustrellidæ (flus-trel′i-dē), *n. pl.* [NL., ⟨ *Flustrella* + *-idæ.*] A family of ctenostomatous gymnolæmatous *Polyzoa,* having the zoœcia immersed in a gelatinous crust, the orifice bilabiate, and larvæ with a bivalve shell. *Flustrella* is the typical genus.

flute[1], *n.,* 1. and 2. The variety of names applied both to flutes proper and to fluty stops in the organ is very great. Thus the older direct flutes are also called *straight, à-bec,* or *beaked:* these were made in different sizes, with different fundamental tones, and were then distinguished as *discant, alto, tenor,* and *bass flutes.* The *transverse flute* is also called *traverse flute, flûte douce, flauto traverso, flute traversière, German flute, cross-flute,* etc. In the modern orchestra, besides the standard flute in C, the smaller size, called the *octave* or *piccolo flute,* is used; but in military bands several varieties are found, as the *terz* or *tierce flute,* and the *fourth* or *quart flute,* the fundamental tones of which are E♭ and F respectively. The old *flute d'armour* was an alto flute, its fundamental tone being A. Organ-stops of a fluty tone are of two kinds, with stopped or with open pipes and belonging properly to the stopped diapason and the open diapason classes respectively (see *diapason*). Unfortunately, most of the names used for these stops either have no fixed and recognized meaning or are purely fanciful.—**Corno flute.** See ★*corno-flute.*—**Double flute,** a direct flute with two tubes and (usually) a common mouthpiece.—**Onion flute,** a toy musical instrument of a sort represented by the kazoo.—**Swiss flute.** (*a*) An old name for the transverse flute. (*b*) In *organ-building,* a flue-stop with open metal pipes of narrow measure and penetrating tone.

flûte-douce (flüt′dös), *n.* [F.] An old name for the transverse flute, and for an organ-stop imitating it.

flute-organ (flöt′ôr″gan), *n.* A barrel-organ fitted with a set of pipes of flute-like tone.

flute-pipe (flöt′pīp), *n.* In *organ-building:* (*a*) Same as ★*flue-pipe.* (*b*) Specifically, a pipe in any one of the many flute-stops.

fluter, *n.* 3. In *laundry-work,* a hand- or power-machine, consisting essentially of a pair of

corrugated rolls, used in forming flutings in fabrics and clothing.

flute-tool (flōt′tōl), *n.* Same as *flute-bit.*

fluting, *n.*—**Magnesium fluting,** a group of lines in the spectrum of magnesium which present the appearance of the fluting of a column.

Fluvial formation, a deposit of river sediment along the lower course of a stream formed through inability of the stream to carry away its overload; an accumulation of the sediments of a river within its own valley.—**Fluvial period.** See ★*period.*

fluvioglacial (flō″vi-ō-glā′shial), *a.* [L. *fluvius,* a river, + *glacies,* ice, + *-al*[1].] Pertaining to the combined action of rivers and glaciers. *Science,* June 21, 1901, p. 988.—**Fluvioglacial theory,** in *geol.,* a theory which involves the action of glacial ice, of flowing water, and sometimes also of wind, and which is advanced to explain certain superficial deposits which have no connection with the underlying rock. The loess of China is an example.

fluviograph (flō′vi-ō-graf), *n.* [L. *fluvius,* a river, + Gr. *γράφειν,* write.] An instrument devised by W. M. Fuller for measuring and recording automatically the rise and fall of a river. The record is made at an observation station by the aid of an electric attachment.

fluviolacustrine (flō″vi-ō-lā-kus′trin), *a.* [L. *flavius,* river, + *lacustris,* of a lake, + *-ine*[1].] In *geol.,* noting those sediments which are partly the result of flowing waters and partly of lakes; such, for instance, as deltas formed in lakes and passing into beach gravels and sands. *Geikie,* Text-book of Geol., p. 1202.

fluviology (flō-vi-ol′ǭ-ji), *n.* The science of rivers and streams, in their physical forms and actions.

One of the elementary principles of the modern science of *fluviology* is that a vigorous stream will in time grade its channel consonant to its baselevel, whether that baselevel be another stream or static water.
Amer. Geol., Jan., 1904, p. 43.

Fluviomarine series, a name given by Edward Forbes to a series of Oligocene thin-bedded sediments in the Hampshire basin and on the Isle of Wight, England, which are partly of marine, partly of brackish, and partly of fresh-water origin. *Geikie,* Text-book of Geol., p. 1249.

fluviometer (flō-vi-om′e-tėr), *n.* [L. *fluvius,* a river, + *metrum,* a measure.] An apparatus for determining the height of water in a river; a river-gage.

flux, *n.,* **8.** (*b*) Continuous motion.—**9.** In *enameling,* a colorless vitreous base, composed of silica mixed with minium or red lead and potash or carbonate of soda. See ★*fondant*[2], 2. —**10.** In *bot.,* the slimy exudation from wounds in the bark of various trees.—**Baumé's quick flux.** Same as ★*powder of fusion.*—**Celiac flux.** See ★*celiac.*—**Flux density.** See ★*density.*—**Flux of a fluid.** See ★*fluid.*—**Gold flux.** Same as *aventurin,* 1.—**Light flux,** in *photom.,* the whole beam of light from a source; specifically, the quantity of luminous energy given off by a source of light divided by the time in which it is given. The unit of flux is called the *lumen.* This is the beam, from a unit light source, contained within a unit solid angle (the angle which subtends a square meter at a radius of 1 meter).—**Magnetic flux.** See *magnetic* ★*circuit.*—**Mainz flux,** a colorless glass, rich in lead, used for the manufacture of imitation diamonds or other imitation gems, the colors being added to this magma.—**Salivary flux,** salivation.—**Sebaceous flux.** Same as *seborrhea.*—**Unit of magnetic flux.** See ★*unit.*

flux-root (fluks′röt), *n.* The pleurisy-root, *Asclepias tuberosa,* the root of which is used in dysentery.

flux-turn (fluks′tėrn), *n.* In *elect.,* the mean magnetic flux through one turn of a coil multiplied by the number of turns.

fly[1], *v. i.*—**To fly up into the wind,** to come up into the wind; act as though the helm was to leeward; have the vessel's head point into the wind.

fly[1], *n.,* **3.** (*i*) Same as *swift*[1], *n.,* 2. (*j*) *Naut.,* in a screw-log, a hollow copper cylinder about 10 inches long, having a number of blades or fins twisted to a helix of uniform pitch which cause the log to make a revolution in traveling a certain distance through still water.

10. *Naut.,* an old-fashioned name for the compass-card.—**Fly rollway.** See ★*rollway.*

fly[2], *n.*—**Ant-decapitating fly,** a phorid fly, *Apocephalus pergandei,* which lays its egg on the neck of the black carpenter-ant, *Camponotus pennsylvanicus.* The larva penetrates the head of the ant which eventually becomes separated from the body.—**Big-eyed fly,** any syrphoid fly of the family *Pipunculidæ:* so called from the very large eyes.—**Black fly.** (*b*) Same as *collier* ★*plant-louse.*—**Circular-seamed fly,** a book-name for any dipterous insect of the suborder *Cyclorhapha* (which see).—**Floating fly.** Same as ★*dry-fly.*—**Golden-eyed lace-winged fly,** any neuropterous insect of the family *Chrysopidæ.* See cut under *Chrysops.*—**Grass-stem fly,** any one of very many species of the dipterous family *Oscinidæ,* whose larvæ live in the stems of gramineous plants.—**Green-bottle fly,** any green sarcophagid fly of the genus *Lucilia* or some closely allied genus. Also *green-bottle.*—**Hippelates fly,** any oscinid fly of the genus *Hippelates.* They are very small flies which swarm about the eyes of human beings and domestic animals and are supposed to transmit the disease known as pink-eye.—**Humpbacked fly,** any true fly of the family *Phoridæ* (which see).—**Long-legged fly,** any dipterous insect of the family *Dolichopodidæ.*—**Midge-like fly,** any nematocerous dipterous insect of the families *Tipulidæ, Blepharoceridæ, Dixidæ, Culicidæ, Chironomidæ, Mycetophilidæ,* or *Cecidomyiidæ.*—**Moth-like fly,** any member of the dipterous family *Psychodidæ.*—**Palmer fly.** See *palmer*[2], 3.—**Salt-water fly,** any fly of the family *Ephydridæ* whose larvæ breed in salt, brackish, or alkaline water.—**Screw-worm fly,** an American sarcophagid or flesh-fly, *Chrysomyia macellaria,* which lays its eggs on sores and wounds in domestic animals and human beings, its larvæ developing in the same places and greatly aggravating the injury. It will also oviposit in the nostrils of human beings, the larvæ developing in the posterior nares and fauces.—

Screw-worm Fly (*Chrysomyia macellaria*), enlarged. (Howard, U. S. D. A.)

Small-headed fly, any member of the dipterous family *Acroceridæ* (which see).—**Spear-winged fly,** any true fly of the family *Lonchopteridæ* (which see).—**Stem-eyed fly,** an American fly of the family *Diopsidæ, Sphyracephala brevicornis,* which has a horn-like process on either side of the head, on the tip of which the eye is situated. It is commonly found on the leaves of skunk-cabbage.—**Tangle-veined fly,** any dipterous insect of the family *Nemestrinidæ* (which see).—**Thick-head fly,** any dipterous insect of the family *Conopidæ.* See *Conopidæ* and cut under *Conops.*—**Tobacco white fly,** a European insect of the homopterous family *Aleyrodidæ, Aleyrodes tabaci,* occurring on tobacco-leaves.—**White fly.** (*c*) Any homopterous insect of the family *Aleyrodidæ* (see *Aleurodidæ*); specifically, the white fly of the orange, *Aleyrodes citri.*—**Yellow-fever fly,** an undetermined fungus-gnat of the family *Mycetophilidæ,* and probably of the genus *Sciara,* which occurs abundantly at times in the southern United States. Its simultaneous swarming with yellow-fever outbreaks gave rise to the popular name, but the fly has no connection with the fever.

fly-amanita (flī′am-ạ-nī″tạ), *n.* See ★*Amanita* and *fly-agaric.*

fly-ball (flī′bâl), *a.* Having balls or weights which fly outward from the action of centrifugal force as they are revolved.

flyblow, *n.* **II.** *a.* Of the nature of flyblow; flyblown. *Mrs. Browning.*

fly-by-night (flī′bī-nīt), *n.* A jib set like a studding-sail; a squaresail set on some sloops when running before the wind.

flycatcher, *n.*—**Great-crested flycatcher,** *Myiarchus crinitus,* a large species of the eastern United States.—**Paradise flycatcher,** an East Indian bird of the genus *Terpsiphone.* See *Terpsiphone.*

fly-eater (flī′ē″tėr), *n.* A small Australian flycatcher of the genus *Gerygone.*

fly-finish (flī′fin″ish), *v. t.* In *pianoforte-making,* to assemble the parts of the action.

fly-flick (flī′flik), *n.* A flat wire brush with a straight handle like that of a broom, used for killing flies.

fly-frame, *n.,* **2.** (*b*) A frame for transferring plate-glass to the grinding-bench.

fly-fungus (flī′fung″gus), *n.* Same as *fly-agaric.* See ★*Amanita.*

Flying dragon, handicap, horse, etc. See ★*dragon,* etc.—**Flying kites,** the loftiest sails in a ship, the skysails, moon-rakers, sky-scrapers, and star-gazers, all of these, except the skysail, being to a certain extent legendary sails claimed to have been carried on lofty ships in former times.—**Flying party.** Same as *flying column* (which see, under *column*).—**To set flying,** to hoist (a sail) from the deck to its position aloft, as, for instance, a maintopmast staysail on a schooner, or a club or sprit topsail.

flying-fish, *n.* **2.** A small constellation of the southern hemisphere, Piscis Volans. Sometimes simply Volans.—**Sharp-nosed flying-fish,** a small flying-fish, *Fodiator acutus,* found on both coasts of tropical America.

flying-homer (flī′ing-hō″mėr), *n.* A homing-pigeon raised for flying and not for its markings or other points.

flying-machine, *n.* Remarkably successful results have been attained both with dirigible balloons and with "heavier-than-air" machines. See ★*air-ship,* and ★*aëroplane.*

flying-rings (flī″ing-ringz′), *n. pl.* Apparatus in gymnasiums consisting of wooden or iron rings covered with leather and attached to ropes suspended in pairs from beams or in a series.

fly-mold (flī′mōld), *n.* The fungus, *Empusa muscæ,* which is parasitic on the house-fly.

fly-mushroom (flī′mush″röm), *n.* Same as *fly-agaric.* See ★*Amanita.*

fly-off (flī′ôf), *n.* That portion of the rainfall or precipitation upon the earth's surface which is evaporated and returned to the atmosphere: distinguished from the *run-off,* or that portion of the rainfall which flows away from the surface to form rivers. *J. W. Powell.*

fly-pulley (flī′půl″i), *n.* A pulley which is free to move endwise on the shaft.

fly-table (flī′tā″bl), *n.* **1.** A table with flaps or folding leaves.—**2.** The table on which printed sheets are laid in order when they have been delivered by the fly: used in connection with printing-machines.

fly-tick (flī′tik), *n.* A larval mite, *Trombidium muscarum,* commonly found attached to the house-fly.

fly-title (flī′tī″tl), *n.* The abbreviated title of a book on a fly-leaf before the full title-page.

fly-trap, *n.* **2.** In *bot.*: (*b*) The pitcher-plant, *Sarracenia purpurea;* also the trumpet-leaf, *S. flava,* the leaves of which entrap flies and other insects.

fly-weight (flī′wāt), *a.* Having weights which fly out as they are revolved.—**Fly-weight governor.** See ★*governor.*

fly-wheel, *n.*—**Segmental fly-wheel,** a fly-wheel made of sectors fastened together. This is frequently done on account of the difficulty of casting large wheels in one piece.—**Fly-wheel effect.** See ★*effect.*

fm. A contraction of *fathom.*

F. M. An abbreviation (*b*) of *Foreign Mission.*

fo. An abbreviation of *folio.*

F. O. An abbreviation (*b*) of *Foreign Office.*

foal, *n.*—**To be in foal,** to be pregnant, as a mare.

foam-flower (fōm′flou″ėr), *n.* The false miterwort, *Tiarella cordifolia:* so named from the light effect and white color of its flower-clusters. See *coolwort.*

foaming (fō′ming), *a.* Specifically, noting a class of sectional boilers in which each unit discharges the steam-gas formed in it into a chamber above the level of any water which may accumulate in the latter. The disengagement of steam from the water is therefore more tumultuous, by reason of the small area of cross-section, than in the other type called 'drowned,' where the ends of the generating-units are below the water level, and steam only frees itself from water at the larger disengagement area of the larger vessel or drum.

Focal disease. See ★*disease.*—**Focal idea, focal sensation,** in *psychol.,* a sensation or idea given in the state of maximal clearness, as the direct object of attention: opposed to *marginal* idea or sensation. *Amer. Jour. Psychol.,* XII. p. 252.—**Focal interval,** the distance between the foci of the two refracting surfaces of the segment of a sphere, as the cornea. See ★*interval of Sturm.*—**Focal plane, point, radii.** See ★*plane*[1], etc.

focimeter, *n.*—**Abbe's focimeter,** an instrument devised by Abbe (of Jena) for the determination of the focal length of lenses or lens-systems from measurements of their magnifying power.

focimetric (fō″si-me′trik), *a.* [*focimetr(y) -ic.*] Of or pertaining to focimetry or the focimeter.

focimetry (fō-sim′e-tri), *n.* [*focimeter* + *-y*[3].] The art of measuring the focal lengths of mirrors, lenses, or optical systems.

focoid (fō′koid), *n.* [*focus* + *-oid.*] One of the two circular points at infinity, or points where every circle in a given plane meets the straight at infinity or figurative straight of that plane.

focometric, *a.* Same as ★*focimetric.*

focometry (fǭ-kom′e-tri), *n.* Same as ★*focimetry.*

focus, *n.* **5.** In *pathol.,* a center of morbid action; one of the primary or principal lesions. *Jour. Exper. Med.,* Nov. 29, 1901, p. 45.—**Actinic focus,** the focus to which the shorter and, chemically, most active rays are gathered by a lens or optical system. The actinic focus, on account of the greater refrangibility of the chemically active rays, lies nearer to the lens than the so-called optical focus.—**Chemical focus,** in *photog.,* that point to which light rays inducing chemical changes, particularly in silver salts, are brought by the refractive power of a lens or objective.—**Depth of focus,** in *optics,* that property of a lens system which gives, simultaneously, well defined images of near and distant objects.—**Equivalent focus,** the focus of the single lens which is equivalent to a given lens system.

focus-adjuster (fō′kus-ạ-jus″tėr), *n.* An arrangement fitted to a lens, by means of which the focus can be adjusted to different lengths for different purposes. *Woodbury,* Encyc. Dict. of Photog., p. 210.

focusing-screen (fō′kus-ing-skrēn), *n.* In *photog.,* the material used in a camera upon which the image formed by the lens is seen. It is usually of very finely ground glass. Glass coated with a semi-opaque substance, as starch paste, may be used. Glass may be made mat by the use of fluorides.

fodder, *n.*—**To pull fodder,** to strip the leaves from standing corn. Each handful (termed a *hand*) is tied with a twisted leaf and hung on a broken stalk to cure. On gathering, a day or two later, three or four hands are tied into a 'bundle.' The expensive practice of pulling fodder.

formerly universal in the southern United States, is giving way to the process of shredding the stover, forming a kind of 'corn hay.'

foddering (fod'ėr-ing), *n.* The act of supplying fodder to cattle; feeding out fodder.

Foehn sickness. See ★*sickness*.

fog[1], *n.*—**Barometric fog,** a fog produced by the condensation of aqueous vapor in the atmosphere due to the cooling consequent on the expansion of the air when the barometric pressure diminishes, as when a wave of low pressure passes over a station, or when air is drawn horizontally into an area of low pressure.—**Chemical fog,** in *photog.*, a defect in gelatin negatives giving a veiled appearance. It is due to the emulsion used. *Nature*, Aug. 21, 1902, p. 389.—**Cosmic fog.** See ★*cosmic*.—**Dry fog.** (*a*) A light fog whose particles do not wet objects, but are themselves slowly evaporating owing to the warmth of the sun or of the ground and the dryness of the air; a fog from which all the heavier particles of water have dropped away, leaving their own latent heat of condensation in the air to evaporate the remaining fog-particles. Apparently the air between the drops in a foggy atmosphere is not necessarily saturated with moisture. (*b*) An atmospheric haze due to the presence of fine solid matter, such as dust or fine soot from soft coal fires or ashes from forest and prairie fires. These carbon particles collect about themselves special atmospheres of aqueous vapor and other gases. The spectrum of the transmitted light shows only the red and ultra-red waves. As the upper layers of the dry fog cool off by radiation and the little atmospheres of vapor become water, the dry fog changes to a drizzling mist and often to steady rain. Prairie fires and the resultant dry fog are mentioned by Marco Polo in his travels in India.—**Electric fog,** fog produced by an electric discharge from an electrical machine; also, a foggy state of the atmosphere, accompanied by electric phenomena, such as ball-lightning, St. Elmo's fire, and rapid changes from positive to negative electricity, or vice versa.—**Radiation fog,** fog formed by cooling due to radiation of heat from the lower layer of the atmosphere downward to the cold ground or upward to the clear, cold sky.—**Red fog.** (*b*) A cloud of wind-borne dust frequently noted off the northern part of the western coast of Africa.—**Woolly fog,** a layer of fog that rolls slowly over the low-lying slopes of a mountain in the night-time. [Alaska.]

fog[2], *n.*—**Yorkshire fog,** the velvet-grass, *Holcus lanatus*. See *Holcus*. [Eng.]

fog-bank, *n.* **3.** A term applied to a mist of condensing vapor of any liquid, not necessarily water, consisting in reality of an immense number of minute drops of the liquid in a state of suspension.

When sulphur or other nuclei are put into the globe containing benzol vapour the result is peculiar. Instead of distributing themselves homogeneously throughout the receiver they usually collect in a heavy band near the bottom. This is invisible until revealed by the first exhaustion, when a heavy sluggish *fog-bank* is seen, only a few centimetres high. *Nature*, Oct. 8, 1903, p. 549.

fog-billow (fog'bil″ō), *n.* Fog the upper surface of which is thrown into waves, breakers, and billows by the action of a gentle wind.

Fog-billows. (McAdie.)

fog-buoy (fog'boi), *n.* A buoy placed over or near a shoal, and provided with either a bell or an automatic whistle.

fog-chamber (fog'chām″bėr), *n.* In *physics*, a closed vessel containing dust-free air saturated with some vapor and used in the study of nucleation and the phenomena of condensation.

fog-drip (fog'drip), *n.* The drops of water which fall to the ground after being formed by the running together of the particles of fog collecting on solid bodies, especially vegetation.

fogger[3] (fog'ėr), *n.* A man who, in foggy or snowy weather, places detonators on a railroad-track to apprise the engine-driver of the position of a signal or switch. [Eng.]

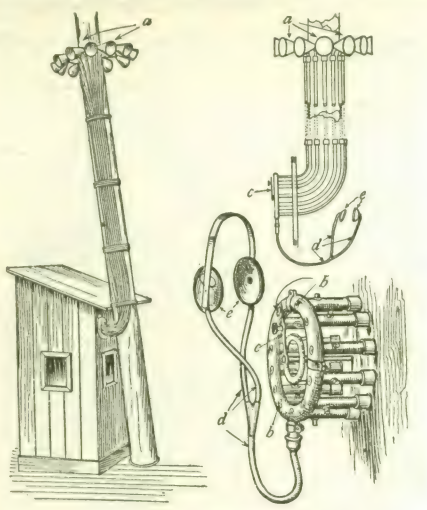
foggie (fog'i), *n.* [Also *fogie;* prob. connected with *fog*[2].] A bumblebee. [Prov. Eng. and Scotch.]

fogging (fog'ing), *n.* Fog-signaling on railways by means of detonators attached to the rails, etc.

But if, as sometimes happens, a fog continues for several days, great difficulty is experienced in obtaining sufficient men to carry on this important duty without undue prolongation of their hours of work. When this happens, signalmen, shunters, porters, yardsmen, and even clerks may have to be called on to take a turn at "*fogging*." *Encyc. Brit.*, XXXII. 148.

fog-limit (fog'lim″it), *n.* In *physics*, the difference between the outside atmospheric pressure and the pressure within a closed vessel containing dust-free air saturated with moisture at which condensation of the moisture begins.

A particular *fog-limit* and hence a particular size of nucleus is reached for each case until the *fog-limit* vanishes. *C. Barus*, in Science, Feb. 17, 1905, p. 275.



fogman (fog'man), *n.* A man engaged in signaling moving railway-trains during fogs.

Many attempts have been made to design a mechanical apparatus for conveying to a driver the requisite information as to the state of the signals during a fog, and for enabling the *fogmen* to be dispensed with. *Encyc. Brit.*, XXXII. 148.

fogo (fō'gō), *n.* [A variation of *hogo*, perhaps suggested by *foh* or *fie.*] A bad smell; a stink; a stench. [Scotch and north of Ireland.]

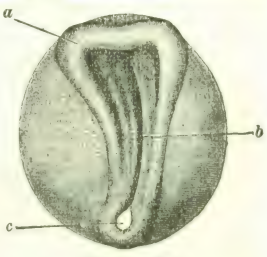
fog-scale (fog'skāl), *n.* Any arbitrary system of recording the intensity of fog. Symons's proposed scale requires the establishment of a set of five screens at a uniform distance of 20 yards from the observer, illumined by lamps from behind by night but by white screens and sunlight by day. Screen number 1 has narrow alternate white and black stripes and number 5 has broad stripes. The others are intermediate. The scale of 1, 2, 3, 4, 5, indicates that the stripes on number 1, etc., have become invisible owing to the diffuse light of the fog.

fog-signal, *n.*—**Edem fog-signal,** an apparatus for use on vessels at sea in thick weather, by which the direction of sound-waves approaching the ship can be determined. A series of twelve trumpet-shaped collectors

Edem Fog-signal.

a, *a*, sound-collecting cones; *b*, *b*, terminals of conductors from *a*, *a*; *c*, *c*, contact-arm to receiver-wires from conductors; *d*, *d*, receiver-wires connected electrically to *c*, *c*; *e*, *e*, telephone-receiver apparatus or ear-pieces.

is fastened to a mast, each directed toward a different point on the horizon. From each collector an acoustic tube leads to a central receiving apparatus from which two ear-tubes lead to the operator's head. The collectors convey sound to the operator, but when any one is coupled to the ear-tube, the others are cut off. By testing around the circle the direction of any signal is easily and certainly determined.



fog-tin (fog'tin), *n.* A tin piece for holding detonators or torpedoes on a railway-track: so called because used by British railroads during fogs, to notify the engineer of the location of a signal.

fog-trumpet (fog'trum″pet), *n.* A trumpet used as a signal during fogs.

foil[2], *v.* **II.** *intrans.* In *hunting*, of an animal, to retrace its own track for the purpose of baffling the hounds; 'run the foil.' See *foil*[2], *n.*

fold[1], *n.* **7.** In *geol.*, a bend in strata varying from a monoclinal or a simple change in the inclination of the beds with a dip still in the same direction as before, through anticlinals and synclinals, which have respectively opposing and converging dips on each side of a central axis, to overturned, collapsed, and fan-shaped folds, with very irregular dips. Folds are believed to be due to the compressive strains in the earth's crust. Compare *monoclinal, anticlinal, synclinal, isocline,* ★*dome, basin,* 9, etc.—**8.** In the *Brachiopoda*, a term applied with distinctive value to the median elevation of the shell, which is more or less pronounced in all except atrematous genera. Usually the fold extends along the longitudinal axis of the dorsal valve, accompanied by a corresponding sinus on the ventral valve, but in ontogeny this relation is sometimes found to be reversed in early stages, or it may manifest itself in either form only in the final stage of growth.—**Arnold's fold,** a sickle-shaped fold of mucous membrane in the lacrymal sac.—**Carinate fold.** Same as *isoclinic* ★*fold*.

—**Conjunctival fold,** the line where the conjunctiva is reflected from the eyeball upon the eyelid.—**Douglas's fold, ligament,** or **line,** a crescentic line which marks the lower edge of the sheath of the posterior portion of the rectus abdominis muscle.—**Epigastric fold,** a duplicature of the peritoneum covering the epigastric vessels.—**Gastro-ileal folds,** a valve-like structure which separates the intestine from the chylific stomach in locusts.—**Imaginal fold.** Same as *imaginal disk*.—**Isoclinic fold,** in *geol.*, a fold whose sides have the same dip, usually a succession of closed synclinals and anticlinals of the most uniform type. The attitude, whether vertical, overturned, or recumbent, is not essential. Also called *carinate fold*.—**Lime fold,** in *tanning*, a streak or mark in a skin from the action of lime in one of the folds. [Rare.]—**Marshall's fold,** a duplicature of the pericardium inclosing traces of the left superior vena cava, a vessel concerned in the fetal circulation.—**Medullary fold,** in *embryol.*, a fold of ectoderm which bounds the medullary plate on each side during the first stages in the development of the central nervous system. Also called *neural fold*.—**Opercular fold,** in embryo fishes, a fold of skin growing back over the branchial region to form the operculum.

Medullary Fold.

A Frog Embryo at the time of the appearance of the neural or medullary folds: seen from the dorsal surface. Magnified about 15 times. *a*, neural or medullary fold: the reference line points to the junction of the anterior and the left lateral folds; *b*, neural groove; *c*, yolk-plug, greatly reduced in size, but still visible through the blastopore. (From Marshall's "Vertebrate Embryology.")

folder, *n.* **4.** An attachment to a sewing-machine for bending and folding the fabric previous to sewing. It is made in a great variety of forms to produce the different plaits, folds, and bands used in garment-making and in decorative sewing.—**5.** In *sheet-metal work*, a hand-power machine for folding over the edges of sheet-metal plates to form a lock, turning the edges of small tinware and roofing-plates, etc.; a tin-folding machine.

folding, *n.*—**Intermittent folding,** in *geol.*, folding renewed at intervals, with periods of quiet between.

folding-machine, *n.* **3.** A machine, or a hand-tool, for turning over and folding under the edges of vamps or other parts of a shoe; a vamp-folding machine.—**Straight-edge folding-machine,** a hand-power machine for folding leather or fabrics; an edge-folding machine. It folds only in a straight line. Other machines follow the shape of the vamp or other part of a shoe.

foliary (fō'li-ā-ri), *a.* Same as *foliar*.

foliate, *v. t.* **3.** In *arch.*: (*a*) To adorn by means of foliation. See *foliation*, 7. (*b*) To divide, as an arch, into smaller arches or foils. See *foil*[1], 7.

foliate, *a.* **4.** Arranged in foliations: said of a pattern: divided into foliations: said of a bounding line or outline.

foliobranch (fō'li-ō-brangk), *a.* Same as ★*foliobranchiate*.

foliobranchiate (fō-li-ō-brang'ki-āt), *a.* [L. *folium*, a leaf, + *branchiæ*, gills, + *-ate*[1].] Having the leaflets of the gills expanded and plate-like: a form characteristic of archaic types of pelecypod mollusks like *Nucula* and *Yoldia*. Also *foliobranch*.

foliolose (fō'li-ō-lōs), *a.* [NL. **foliolosus*, < *foliolum*, foliole.] Bearing folioles or leaflets, especially an abundance of them.

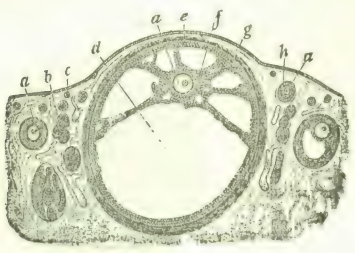
folk-craft (fōk'kraft), *n.* Popular or democratic art and skill in social self-control.

Suggestion, education, and publicity the choice instruments of the new *folk-craft* that is taking the place of the old state-craft. *E. Ross*, Social Control, p. 432.

folk-dance (fōk'dans), *n.* A popular dance, or the music for it, which originates in the same way as a folk-song and is similarly transmitted by tradition. Folk-dances and folk-songs are always historically intermingled.

folk-medicine (fōk'med″i-sin), *n.* The traditional medical maxims, remedies, and methods current among the people.

folk-state (fōk'stāt), *n.* A political state embracing only one homogeneous folk or people: in distinction from a composite nation formed by federation or conquest and comprising peoples of various bloods and languages that must be assimilated. *Gumplowicz* (trans.), Outlines of Sociol., p. 153.



folk-tale (fōk'tāl), *n.* A folk-story.

folletage (fol'e-tāj), *n.* [F. *feuilletage*, puff-paste, the rolling of paste, < *feuilleter*, roll paste, turn over leaves, < *feuillet*, a leaf: see *feuilleton*.] A disease of the grape-vine in Cal-

ifornia due to a condition of the soil in combination with intense heat. Also called *sunstroke*.

follicle, *n.*—**Agminate follicles.** Same as *Peyerian glands* (which see, under *gland*).—**Ciliary follicles.** Same as *Meibomian glands* (which see, under *gland*).—**Dental follicle,** the membranous bag which incloses the tooth before its eruption. See *dental sac.*—**Follicles of Lieberkühn.** Same as *Lieberkühn's glands* (which see, under *gland*).—**Meibomian follicles.** Same as *Meibomian glands* (which see, under *gland*).—**Montgomery's follicles,** depressions in the mucous membrane of the uterus.—**Nabothian follicles,** little vesicles on the mucous membrane of the cervix uteri, caused by distention of the mucous glands.

follicle-cell (fol'i-kl-sel), *n.* In *histol.*, one of the cells which go to make up a follicle,

h, follicle-cells.

Section through part of the ovary of an adult rabbit. The section is taken vertical to the surface of the ovary, and shows one fully formed Graafian follicle and others in various stages of development. Magnified.

a, ovum; *b*, nests of epithelial cells derived from the deeper layers of the genital epithelium; *c*, primitive ovum; *d*, cavity of Graafian follicle; *e*, outer layer of Graafian follicle or tunica granulosa; *f*, inner layer of Graafian follicle or discus proligerus; *g*, outer layer of columnar epithelial cells, investing the ovary; *h*, follicle cells surrounding an ovum. (From Marshall's "Vertebrate Embryology.")

such as the follicle which incloses the egg in the ovary.

Follicular mange. Same as ★*demodectic acariasis*.

follow, *v.* **I.** *trans.*—**To follow (its) innings,** in *cricket*, said of a side when, having completed its first innings, it immediately begins its second, in consequence of having made a certain number of runs (75 in a one day's match, 100 in a two days' match, and 150 in a three days' match) less than its opponents. Also *to follow on*.

II. *intrans.*—**Follow-on rule,** in *cricket*, the rule which requires that the side which bats first and leads by 150 runs in a three days' match, or by 100 runs in a two days' match, or by 75 runs in a one day's match, shall have the option of obliging the other side to go to the bat immediately for the second time. See *to* ★*follow (its) innings*.—**To follow through,** in *golf*, to allow the club, after striking the ball, to follow, without break or pause, on the line of the ball's flight until the swing ends.

follow, *n.* **2.** The difference in the external diameter of a spring, especially of a coiled or helical spring, when unloaded and when compressed by its working load. The torsion of the rod which forms the coil tends to increase the diameter as the spring closes.

follower, *n.* **4.** In *pile-driving*, a wooden block placed on top of a pile that is to be driven deeper than the weight of the pile-driver can fall. By the use of such a block the pile can be driven even after its head is under water. —**5.** A wheel which is driven by another wheel, either by a belt or by a tooth connection. —**6.** The smaller element of a compound piston, which is bolted to the larger to complete the structure. It is usually a plate, or it may be a ring. In old English designs using fibrous packing, the follower was called the *junk-ring*.

following, *p. a.* **3.** In *naval arch.*, said of the edge or end of a surface or blade, as a propeller blade, which is in the rear when moving through water: opposed to *leading*[1].

follow-rest (fol'ō-rest), *n.* Same as *rest*[1], 6 (*b*).

follow-shot (fol'ō-shot), *n.* In *billiards*, the reverse of the ★*draw-shot* (which see). Also *following*.

follow-through (fol'ō-thrö), *n.* In *golf*, the course described by the club in the swing after the ball is struck.

Fomalhaut (fō-mal-hât'), *n.* [Ar. *fumm*, mouth, + *al*, the, + *hūt*, a large fish (applied to a whale and to a cod).] The first-magnitude star situated in the mouth of the Southern Fish, Piscis Austrinus.

fond[4], *n.* **4.** A gravy from braized and spiced meats which serves as the foundation for sauces.

fonda (fon'dä), *n.* [Sp. *fonda*, also *honda*, = Pr. *fronda* = It. *fonda*, *fionda*, an inn, a purse, = OF. *fonde*, F. *fronde*, a sling, purse, < L. *funda*, a sling.] In Spain and Spanish-speaking countries, a hotel, inn, tavern or boarding-house.

fondamenta (fōn-dä-mān'tä), *n.* [Venetian *fondamenta* (< L. *fundamenta*, pl.), earlier plural of It. *fondamento*, foundation, < L. *fundamentum*, foundation.] A seaside quay; primarily, a landing-place: in Venice [cap.], specifically applied to the great quay which reaches from the Ducal Palace to the Public Garden in the Fondamenta degli Schiavone.

fondant[2] (fon-doṅ'), *n.* [F. *fondant*, ppr. of *fondre*, melt: see *found*[3], *v.*] **1.** A thick, smooth, creamy paste of sugar, used as a basis of French cream candies.—**2.** The base or flux, in enamel, which is colored throughout by metallic oxids while in a state of fusion.

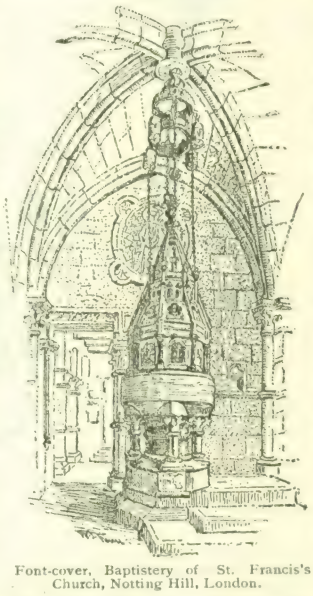
fonetic, fonetist, etc. Simplified spellings of *phonetic*, etc.

fonic, *a.* A simplified spelling of *phonic*.

fonograf, fonografer, etc. Simplified spellings of *phonograph*, etc.

fonologic, fonologist, etc. Simplified spellings of *phonologic*, etc.

fonotype, fonotypic, etc. Simplified spellings of *phonotype*, etc.



Fontainebleau schools of painting. See ★*painting*.

Fontana, spaces of. See ★*space*.

fontanal (fon-tā'nal), *a.* [L. *fontanalis*, var. of *fontinalis*, of a fountain: see **fontinal*.] Fountain-like.—**Fontanal decussation.** Same as ★*fountain decussation*.

fontanelle, *n.*—**Mandibular fontanelle,** a small, elliptical opening in the proximal half of the lower jaw of many birds.—**Supraorbital fontanelle,** a perforation in that part of the cranium which forms the upper portion of the orbit.

font-cover (font'kuv″ėr), *n.* In *church arch.*, a permanent and often decorative protection for the open top of a baptismal font. It frequently has the shape of a spire with pinnacles, or of a decorative cupola, or in some cases is richly sculptured. It may be hung with a pulley or windlass from a hinged arm overhead, so that it can be swung clear of the font after being lifted a few inches.

Font-cover, Baptistery of St. Francis's Church, Notting Hill, London.

fontein (fon-tīn'), *n.* [D.: see *fountain*.] A fountain or spring: common in South African Dutch place-names: as, Bloem-*fontein*.

fontinal (fon'ti-nal), *a.* [L. *fontinalis*, < *fons*, a fountain, spring: see *fount*, *fountain*.] In *phytogeog.*, growing in or about springs: said of a plant formation.

The rupestrine flora exhibits four types: The *fontinal* or dripping rock, the soil-covered ledge, the bare rock and the cliff summit types. *Science*, Jan. 29, 1904, p. 170.

food[1], *n.*—**Respiratory food,** food which supplies heat to the body by oxidation, and is then excreted through the lungs in the form of carbon dioxid and water.

food-chopper (föd'chop″ėr), *n.* A domestic machine for cutting up raw or cooked meat, vegetables, crackers, etc.

food-groove (föd'grōv), *n.* In brachiopods, a ciliated groove leading along the arms of the lophophore to the mouth; in crinoids, a ciliated groove on the ventral surface of a brachial.

food-of-the-gods (föd'ov-ŦHē-godz″), *n.* An umbelliferous plant, *Ferula Narthex*, the principal source of asafetida. See *asafetida* and *ferula*, 3.

food-rope (föd'rōp), *n.* In ascidians, a viscid mass of food-particles held together by a slimy substance secreted by the endostyle and passed along, by the action of ciliated cells borne by the same structure, toward the oral aperture.

fool-hay (föl'hā), *n.* The old-witch grass, *Panicum capillare*, and the rough bent-grass, *Agrostis hiemalis*, grasses resembling each other in the long, slender branches of their panicles: neither of much agricultural value.

foolometer (föl-om'e-tėr), *n.* Something by which fools may be gaged or measured. *Sydney Smith.* [Humorous.]

fool-proof (föl'prōf), *a.* Proof even against the ignorant or meddlesome handling of fools; secure against accidents even in the hands of a stupid person: said of machinery. [Humorous.]

The standard of construction has been raised, and it is claimed that the new motor starters are as *fool-proof* as rheostats can be constructed.

Elect. World and Engin., Feb. 18, 1905, p. 371.

foot, *n.* **16.** *Naut.*: (*a*) The lower edge of a sail. (*b*) The part of a mast near the deck. —**17.** In *bot.*, one of various organs of attachment. (*a*) A petiole. (*b*) The stalk of a frond in ferns. (*c*) The claw or point of attachment of a petal. (*d*) The organ of attachment and temporary nutrition of the embryo. (*e*) The base of hair below the epidermis.—**Antennary feet.** See ★*antennary*.—**Circular foot,** a unit of surface equal to the area of a circle whose diameter is one foot. It is equal to 0.785398+ of a square foot, and is used in order to dispense with the fractional number 0.785+.—**Cord foot.** See ★*cord*[1].—**Foot clue.** See ★*clue*.—**Foot lining,** a horizontal band of canvas on the bottom of a squaresail, designed to strengthen and take the chafe on that part of the sail.—**Foot of the perpendicular,** in *geom.*, the point where the perpendicular meets the straight line or plane to which it is at right angles. —**Mandibular foot,** the second trunk-appendage of the nauplius larva of *Crustacea*, so called because it develops into one of the mandibles of the adult.—**Morton's foot.** Same as *metatarsalgia*.—**Off their feet,** in *printing*, said of composed types that are not strictly vertical in a mass, and that receive undue impression on one side only of the face. Each printing-type, however small, rests at its base on two slight projections called feet. When one line or a larger mass of composed type is slightly tilted, the types are off their feet, and impression is unavoidably strong on one side and weak on the other; when they are truly vertical and rest squarely on both feet, they are *on their feet*. *De Vinne*, Mod. Book Composition, p. 260.—**Reel foot,** a pronounced degree of talipes equinovarus, so called because of the peculiar gait of bearers of such a deformity.—**Tabetic foot,** the distorted foot seen in some cases of tabes dorsalis.

footage (fůt'āj), *n.* In *mining*, a piece-work system of paying miners in which they are paid for each running foot of work done.

Foot-ball ear, deformity of the external ear following an effusion of blood from injury, as in foot-ball.

foot-boat (fůt'bōt), *n.* An old name for a small ferry-boat designed to carry foot-passengers only.

foot-bond (fůt'bond), *n.* An electric bond between the butted ends of two trolley-road rails. —**Hydraulic foot-bond,** an electric bond of this kind formed by a copper band or cable attached at each end to solid copper tapered plugs which are forced by a 'hydraulic' compressor into holes drilled in the foot of the two rails.

foot-brails (fůt'brālz), *n. pl.* See ★*brail*.

foot-brake (fůt'brāk), *n.* A brake which is applied or released by a lever or treadle operated by the foot.

foot-candle (fůt'kan″dl), *n.* A British unit of illumination equal to 12.2 luxes; the illumination produced by a British standard candle at a distance of one foot in a horizontal direction. See ★*candle-foot* and ★*illumination*, 1.

foot-clonus (fůt'klō″nus), *n.* Same as *ankle-clonus*.

foot-disk (fůt'disk), *n.* The lower attached end of the body of certain zoantharian polyps, as *Actinia*.

foot-drop (fůt'drop), *n.* Dropping of the anterior portion of the foot when the limb is raised from the ground, due to paralysis of the flexor muscles.

footeite (fůt'ī-it), *n.* [Named for A. E. *Foote* of Philadelphia (died 1895).] A hydrated oxid and chlorid of copper occurring in deep-blue monoclinic crystals: found in Arizona.

foot-fringe (fůt'frinj), *n.* In gastropods, the fringed or digitate margin of the epipodium.

foot-gland (fůt'gland), *n.* In certain bryozoans, a collection of granular cells at the bottom of the stalk arranged around a central space communicating with the exterior.

footing, *n.* **17.** In *archery*: (*a*) A piece of hard wood or other material placed at the forward end of an arrow to give weight and serve for the attachment of the head; foreshaft. (*b*) The position of an archer in shooting.

foot-lever (fůt'lev″ėr), *n.* A treadle; a lever for operating a machine or mechanism by the pressure of the foot.

footling[1], *n.* **3.** One of the strips of board which run longitudinally on top of the frames in the bottom of a boat.

foot-maker (fůt'mā″kėr), *n.* In *glass-manuf.*, a workman who makes the feet of dishes, goblets, etc. *Webb*, Indust. Democracy, II. 490.

footman, *n.*—**Banded footman,** a small lithosiid moth, *Ozonadia unifascia*, with lead-colored fore wings crossed by a yellow band and with pink hind wings. It is rather common throughout the South Atlantic United States.—**Painted footman,** *Hypoprepia fuscosa*, a species with red-and-yellow wings, occurring in the eastern United

States.—**Pale footman,** *Crambidia pallida*, a drab-colored species, occurring in the northeastern United States. —**Striped footman,** *Hypoprepia miniata*, a species occurring in the eastern United States. It is scarlet in color, with three broad lead-colored longitudinal stripes on the fore wings.—**Two-colored footman,** *Lexis bicolor*, a species occurring in Canada and the northern United States. It is slate-colored, with the prothorax, tip of abdomen, and costa of the fore wing yellow.

foot-phenomenon (fůt′fē-nom″e-non), *n.* Same as *ankle-clonus*.

foot-power (fůt′pou″ėr), *n.* Power applied by the motion and pressure of the foot, as for driving a bicycle or machine.

foot-pump (fůt′pump), *n.* A portable pump intended to be operated by hand, and having a bracket or stirrup so that it can be held in place by the pressure of the foot.

foot-rill (fůt′ril), *n.* In *coal-mining*, an entrance to a mine formed by driving a level into a hillside; a dip-road used for bringing out coal.

foot-rot, *n.* 2. A disease of the orange and other citrous trees, supposed to be due to *Fusarium Limonis*, but also affected by the use of fertilizers and methods of cultivation. Also called *gum-disease.*— 3. Same as ★*bottom-rot*.

foot-scab (fůt′skab), *n.* Any acarine disease of the feet; in particular, the chorioptic scab of sheep. The minute parasites cause an intense itching, and there is a reddening of the skin, followed by scaling, and later by the formation of yellowish-white crusts. The crusts thicken, cracks may form in the folds of the pasterns, and the legs may become quite unsightly.

foot-second (fůt′sek″und), *n.* 1. A unit for measuring the flow of liquids, equal to a flow of one cubic foot per second.—2. A unit of velocity equal to one foot per second, used in stating the velocity of a projectile. Also called *second-foot*.

foot-slope (fůt′slōp), *n.* The lower slope of a mountain-range.

> Norcia, a town . . . 29 miles north-east of Terni, on the south-west *foot-slopes* of the Sibylline Mountains.
> *Encyc. Brit.*, XXXI. 249.

footstone (fůt′stōn), *n.* A stone placed at the foot of a grave, usually small as compared with the *headstone*.

foot-tone (fůt′tōn), *n.* In *organ-building*, a general term for the pitch of stops or pipes with reference to that of the keys used. See *stop*[1], 6, and *foot*, 12 (*c*) (2).

footy[2], *n.* 2. A foot-soldier; an infantryman. [Slang.]

> And trampin' with the *Footies* ain't as pleasant as it looks—
> They scarcely ever sees a Boer, except in picture books.
> *A. B. Paterson*, in War's Brighter Side, p. 108.

foozle, *n.* 2. In *golf*, a badly played stroke. [Scotch.]

foozle (fō′zl), *v. t.* or *i.*; pret. and pp. *foozled*, ppr. *foozling*. To bungle; make a mess of; do clumsily or bunglingly: as, to *foozle* a shot, in golf.

F. O. B. An abbreviation of *free on rail*: compare *F. O. B.* [Eng.]

forage-plant (for′āj-plant), *n.* A plant suitable for forage; a plant that is commonly eaten by cattle.

forage-poisoning (for′āj-poi″zn-ing), *n.* A disease of animals, especially the horse, characterized by depression and paralysis of the nervous system, caused by eating damaged food or drinking stagnant water. Also called *leucoëncephalitis*, *spinal meningitis*, and *staggers*.

forage-press (for′āj-pres), *n.* A baling-press; a press used to compress hay or straw into bales for shipping.

forager, *n.* 2. A foraging ant, an ant of the tropical and subtropical genus *Eciton*.

foramen, *n.*—**Conjugate foramen,** an aperture between two apposed bones formed by a notch in each.—**Foramen centrale.** Same as *foramen of Soemmering*. —**Foramen epiploicum.** Same as *foramen of Winslow*. —**Foramen incisivum,** the opening between the premaxillary and maxillary, in such a skull as that of a deer: so called because the opening is formed, as it were, by cutting into the premaxilla.—**Foramen interosseum,** in *ornith.*, the space between the distal ends of the coracoid and clavicle and the proximal end of the scapula through which passes the great tendon of the wing muscle. Also *foramen triosseum*.—**Foramen of Botal.** Same as *ductus Botalli*.—**Foramen of Magendie,** an opening in the pia over the fourth ventricle of the brain.—**Foramen of Morgagni.** Same as *foramen cæcum* (*c*).—**Foramen of Tarini,** the uterine opening of the Fallopian tube.—**Foramen supracoracoideum.** Same as *supracoracoid* ★*foramen*.—**Foramen suprapyriforme,** an opening above the pyramidalis muscle through which the gluteal vessels and superior gluteal nerve emerge from the pelvis.—**Foramen triosseum.** Same as ★*foramen interosseum*.—**Foramina of Morgagni,** the openings of Littré's glands in the spongy portion of the urethra.—**Ilio-ischiadic foramen,** in *ornith.*, the oblong space between the ilium and ischium; the ilio-ischiadic fissure closed posteriorly by the union of the ilium and ischium.—**Ischiatic foramen.** Same as *ilio-ischiadic* ★*foramen*.—**Orbitonasal foramen,** in *ornith.*, a perforation in the anteorbital plate (prefontal) for the passage of the orbitonasal nerve.—**Parietal foramen.** (*c*) An opening in the parietal bone, or between the parietal bones of reptiles; the pineal foramen.—**Pneumatic foramen,** an opening, or perforation for the admission of air, found in various bones of many species of birds, very frequently in the humerus and almost always in the femur.—**Repugnatorial foramen.** Same as *repugnatorial pore*.—**Supracoracoid foramen,** in *ornith.*, a perforation through the distal half of the coracoid; also *foramen supracoracoideum*.—**Supratrochlear foramen,** a perforation in the olecranal fossa, immediately above the distal end of the humerus, occurring as an anomaly in man, but constant in some other animals. Also known as olecranon perforation.—**Trigeminal foramen,** the perforation for the exit of the trigeminal nerve. —**Vagus foramen,** the perforation for the exit of the vagus nerve.—**Visceral foramen,** the perforation or foramen in the hinge-plate of certain telotrematous brachiopods, *Athyris*, through which it has been supposed the posterior part of the intestine passed.

Foraminiferal limestone, sand. See ★*limestone*, ★*sand*[1].

foraminoöptic (fō-ram″i-nō-op′tik), *a.* In *craniom.*, relating to the foramen magnum and the optic foramen.—**Foraminoöptic line,** the distance between the basion and the optic foramen.

forbesite (fôrbz′it), *n.* [Named for David *Forbes*, an English chemist.] A hydrated arseniate of nickel and cobalt, occurring in grayish-white fibrous crystalline masses: found in Atacama.

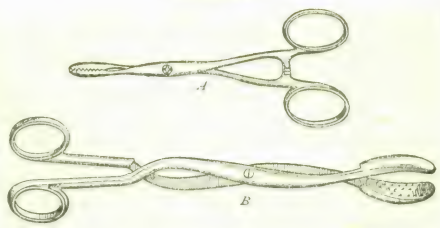
Forbidden fruit. (*d*) In Ceylon, a name applied by the English to the fruit of *Ervatamia dichotoma*. See ★*Eve's apple*.

force[1], *n.*, **10.** This billiard-stroke is so named because the cue-ball is forced to run counter to its natural or forward tendency. There are three kinds of force—the horizontal or draw, the perpendicular or piqué, and the curved or massé. At pocket games there is also the forcing hazard, a difficult pocketing risked for the sake of gaining position, but not necessarily involving draw, piqué, or massé.—**Accelerative, addititious force.** See ★*accelerative*, ★*addititious*.—**Directive force,** a force, or couple, which causes a suspended body to tend to assume a certain position: as, the *directive force* of the earth's magnetic field upon a magnet, or the *directive force* of a bifilar suspension upon the needle of an electrometer.—**Equation of force.** See ★*equation*.—**Field of force.** See ★*field*.— **Fresh force,** in *old Eng. law*, a trespass or force recently done (within forty days).—**Resultant force.** See *resultant* ★*vector*.— **Retarding force.** See ★*accelerative force*.— **Tide-raising force,** the force due to the difference both in amount and direction, between the attractions of the moon and sun on the body of the earth and on the movable masses (oceans, etc.) upon its surface. In response to this force the tides rise and fall. On the line of centers, drawn through the center of the earth and that of the disturbing body, that is, at points on the earth's surface where the body is in the zenith or the nadir, the force simply diminishes gravity slightly. On the circle 90° distant (where the disturbing body is in the horizon) it increases gravity just half as much. At points 54° distant from the line of centers the intensity of gravity remains unchanged, but the force is exactly tangential (that is, horizontal), urging the waters toward the line of centers. The actual tides can not, however, be calculated from a mere knowledge of the tide-raising forces, since they depend largely upon other circumstances, as the extent, depth, and shore-outline of the oceans, the rate of the earth's rotation, the density and viscosity of water, the action of winds, currents, etc.—**Tractive force,** the effort exerted by a locomotive or a draft-animal to pull the train or the vehicle attached to it. The force must be sufficient to overcome the resistances to motion, which include frictions, rolling and sliding, wind and air resistances, resistances due to inertia of the masses to be moved and the external and variable resistances due to grades, curves, and the condition of the road-bed. In railway practice in good weather the tractive force is from one-fifth to one-fourth of the weight upon the driving-wheels.

force[1], *v. t.*—**Forced lubrication, mate, move, vibration.** See ★*lubrication*, etc.

force-de-cheval (fôrs″dė-shė-väl′), *n.* [F., 'power of horse.'] The French horse-power or unit of power, equal to 0.986337 English horse-power

force majeure (fôrs mä-zhėr′). [F.] Superior force.



force-nozle (fōrs′noz″l), *n.* A blast-nozle; a nozle through which the exhaust-steam from a locomotive-engine passes to force the draft.

force-oiler (fōrs′oi″lėr), *n.* A device for feeding oil under pressure to bearings; a pressure feed-oiler.

force-pipe (fōrs′pīp), *n.* A pressure-pipe; the discharge-pipe from a pressure-pump.

force-power (fōrs′pou″ėr), *n.* The magnitude of a force.

forceps, *n.*—**Axis-traction forceps,** an obstetrical forceps with an attachment which enables traction to be made in the line of the pelvic axis.—**Bone forceps,** a forceps with sharp bills, used for cutting bone. —**Epilating forceps,** a forceps used for pulling out hairs.—**Fixation forceps,** a forceps used to hold the eye steady during an operation upon it.—**Hemostatic forceps,** a forceps used for the compression of an artery to control hemorrhage during a surgical operation.—**Ligature forceps.** (*b*) A forceps used to grasp and hold an artery while it is being ligated.—**Lion forceps,** a strong forceps with short serrated blades, used for grasping and crushing bone.—**Lithotomy forceps,** a forceps used for removing the stone from the bladder in the

Forceps.
A, hemostatic forceps; *B*, lithotomy forceps.

operation of lithotomy.—**Major forceps,** a collection of nerve-fibers passing from the corpus callosum to the occipital lobes.—**Minor forceps,** a collection of nerve-fibers passing from the corpus callosum to the frontal lobe.—**Roller forceps,** a forceps having a roller at the extremity of each broadened or fenestrated blade, used to compress the granulations of the lids in trachoma.

forcherite (fōr′shėr-īt), *n.* [Named for V. *Forcher*.] A variety of opal colored orange-yellow by orpiment: found in Styria.

forcing, *n.*, 1. In horticultural use *forcing* denotes: (*a*) The rearing of plants outside of, or in advance of, their natural seasons, by means of artificial heat and under glass. (*b*) The process of compelling flowers to appear from bulbs and tuberous parts (as from rhizomes of lily-of-the-valley) by subjecting them directly to an unusually high degree of heat, as when the pots or boxes are placed on hot pipes in a more or less confined space.

forcing-hill (fōr′sing-hil), *n.* A hill of plants so prepared as to be forced beyond its season just where the plants grow. Usually the earth is heaped around a box, forming a hollow embankment when the box is removed; then over the area a pane of glass is laid. Sometimes the seeds are planted in the bottom of a depression and the pane is laid over the cavity on the surface of the ground. *L. H. Bailey.* See ★*hand-box*.

forcing-jet (fōr′sing-jet), *n.* The jet of steam which comes through the blast-nozle and goes up the stack of a locomotive, thus forcing or inducing the draft; also, the steam jet in an injector for feeding boilers.

forcing-machine (fōr′sing-mą-shēn″), *n.* A machine for forcing one piece over another on which it fits tightly. Such machines are used for forcing gears, pulleys, propellers, etc., on or off their shafts, and are operated either by a screw or by hydraulic pressure.

forcing-press (fōr′sing-pres), *n.* A hydraulic press, of massive construction, for pressing locomotive wheels, armatures, motor-gears, etc., upon shafts or axles where a very tight fit is required. It has a hydraulic ram, in a vertical or horizontal position, and a resistance-head to hold the wheel or other object and sustain it against the powerful pressure of the ram. It is also used to force wheels from the axles or shafts. One type is called a *wheel-press*.

forcipiform (fôr-sip′i-fôrm), *a.* [L. *forceps* (*forcip-*), forceps, + *forma*, form.] Having the form of a forceps.—**Forcipiform pedicellaria,** in a starfish, one of the pedunculate pedicellariæ in which the two hooks cross each other and are attached to the end of the basal plate farthest from them.

Forcipiger (fôr-sip′i-jėr), *n.* [NL., < L. *forceps* (*forcip-*), forceps, + *gerere*, carry.] A genus of butterfly-fishes of the family of *Chætodontidæ*, having the snout very long with the short jaws at its end. *F. longirostris* is common in the South Seas.

forcipressure (fôr′si-presh-ūr), *n.* [For **forcipipressure*, < L. *forceps*, forceps, + *pressura*, pressure.] Arrest of hemorrhage from the cut end of a blood-vessel by pressure made by a self-retaining forceps.

> Bleeding vessels in the dura may be caught with the hæmostatic forceps; if the bleeding be not checked by such *forcipressure*, a curved needle threaded with catgut may be carefully passed under the vessels and the ligature then tied. *Buck*, Med. Handbook, VII. 877.

forcipulate (fôr-sip′ū-lāt), *a.* [NL. *forcipulatus*, < **forcipulus*, dim. of *forceps*, forceps: see *forceps*.] Shaped like a forceps, as the pedicellariæ of echinoderms.

forcive (fōr′siv), *a.* and *n.* [*force*[1] + *-ive*.]

I. *a.* Of or pertaining to 'force' as distinguished from 'energy.'

> To any one who has stood aloof from the polemic between the 'energetic' and the '*forcive* view, it must seem proved that the former has rendered a permanent service to physics. *Science*, March 25, 1904, p. 510.

II. *n.* An imaginary distribution of pressure over a level surface of water, such as to replace the pressures due to a given series of waves distributed over the same area.

> By a suitable synthesis of a series of distributed *forcives* with their associated surface displacements, the solution was put in a form which lent itself towards the elucidation of several important problems.
> *Nature*, Feb. 16, 1905, p. 383.

Fordilla (fôr-dil′ä), *n.* [NL., named for S. W. *Ford*, a paleontologist.] A primitive Cambrian genus of bivalved shells believed to be a pelecypod mollusk.

fore[1] (fôr), *interj.* In *golf*, a warning cry ('look out, before!') uttered to attract the attention of a person who is liable to be struck by the ball.

Fore-and-aft motion, rig, road, tackle. See ★*motion*, *fore-and-aft sails*, ★*road*, ★*tackle*.

fore-and-after (fôr′and-åf″tėr), *n.* 1. A vessel, such as a sloop or schooner, which carries fore-and-aft sails only.—2. A cocked hat having the peaks in front and behind, such as is worn for full dress in the navy.

fore-awning (fôr′â″ning), *n.* The forecastle awning; the awning which extends from the foremast forward.

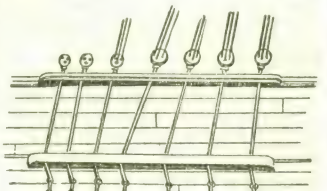
forebay, *n.* 2. A recess at the entrance of a canal or hydraulic device. Also called *bay*.—3. The sick-bay; also, an old name for the spar-deck galley on a merchant vessel.

fore-bowline (fôr′bō″lin), *n.* The bowline belonging to the bowline-bridle gear on the leech of the fore-course.

fore-cabin (fôr′kab″in), *n.* A cabin situated in the forward part of a vessel.

fore-caddie (fôr′kad-i), *n.* In *golf*, a person employed to go in advance of the players to watch where their balls alight. [Scotch.]

forecast, *n.* 3. Specifically, in *meteor.*, a statement of the expected weather. Official daily weather forecasts were first published by Fitzroy in England in 1861.—**Forecast district.** See ★*district*.—**Long-range forecast,** in *meteor.*, a statement of the weather to be expected at some quite distant date, such as a week, a month, or a year.—**Seasonal forecast,** in *meteor.*, a statement of the general average character of the weather during an approaching season, especially as to rainfall, temperature, or wind; the prediction of climatological averages rather than of detailed weather items. Seasonal forecasts of the monsoon rains have been officially published in India annually since 1885.



forecaster, *n.*—**Weather forecaster,** one who is skilled in meteorological science, and is regularly and officially engaged in forecasting the weather from the data supplied by meteorological observing-stations.

forecastle-deck (fôr′kås-l-dek), *n.* See ★*deck*, 2.

forecastle-head (fôr′kås-l-hed), *n.* The forward part of the forecastle-deck, or topgallant-forecastle near the knight-heads.

fore-chains (fôr′chānz), *n. pl.* Strong, narrow plates of iron bolted to the ship's timbers through the side, abreast the foremast. To the upper ends of these plates deadeyes are secured by an iron strap, and through these deadeyes are reeved the lanyards of the lower rigging. The ship's channels are also called chains, as *fore-chains*, *main-chains*, and *mizzen-chains*. On some vessels the upper ends of the chain-plates carry turnbuckles instead of deadeyes for setting up the lower rigging.

fore-channels (fôr′chan″elz), *n. pl.* Small horizontal platforms or projections on the outside of a narrow vessel, situated abreast of the respective masts and designed to give a greater spread to the lower rigging by having the upper part of the chain-plates secured to the outside rim of the channel.

Fore-channels.

fore-course (fôr′kōrs), *n.* The foresail of a square-rigged vessel, being that sail which is bent to the foreyard.

forefather's-cup (fôr′fä-ŦHėrz-kup), *n.* The pitcher-plant, *Sarracenia purpurea*.

forefeel (fôr′fēl), *n.* In *psychol.*, an anticipatory feeling or anticipatory tactual perception; a tactual image associatively aroused by the presentation of a visual, auditory, etc., stimulus.

The sight of ice yields a *forefeel* of its coldness, the smell of baked meats a foretaste of their savor.
Encyc. Brit., XXXII. 59.

forefeeling (fôr-fē′ling), *n.* A presentiment; a foreboding.

A strong *forefeeling* that much of my destined life in this world was yet to come. *Kinglake*, Eothen, p. 309.

fore-glow (fôr′glō), *n.* A glow seen in the east before sunrise, corresponding to the after-glow seen in the western sky after sunset.

foregon, *p. a.* A simplified spelling of *foregone*.

fore-guy (fôr′gī), *n.* A rope leading forward from the outboard end of the swinging or boat-boom, designed to steady the latter when it is swung out for use.

forehand, *a.* 3. In *lawn-tennis*, noting a stroke made by a right-handed player when the ball is on the right side of his body, or by a left-handed player when it is on the left side.

fore-hatch (fôr′hach), *n.* The hatch next abaft the foremast on sailing-vessels, but generally forward of the foremast on steamers.

forehead-drop (for′ed-drop), *n.* In a harness, an ornamental strap which rests against a horse's forehead. The upper end is attached to the crown-piece of the bridle.

Foreign car, judgment, piracy. See ★*car*[1], etc.

foreign-hearted (for′ān-här″ted), *a.* Affected with foreign sympathies, ideas, or ideals in literature and art; foreign at heart.

The classical school [in England] could not find encouragement for the ideals they admired, and were forced to seek the realization of their hopes . . . in sunny Italy and other distant lands, . . . and when they returned they were *foreign-hearted*.
Patten, Development Eng. Thought, p. 351.

fore-intestine (fôr′in-tes″tin), *n.* The first of the three primary divisions of the alimentary canal of an insect; the divisions indicated in the embryo; the stomodæum of the embryo. It includes the mouth and pharynx, the pumping-apparatus of haustellate orders, the esophagus, the crop, the sucking-stomach, and the proventriculus. *A. S. Packard*, Text-book of Entom., p. 299.

fore-kidney (fôr′kid″ni), *n.* Same as *pronephron*.

foreland, *n.* 3. The portion of the shore usually left outside of a protecting dike or embankment for the purpose of breaking the force of the waves.—4. In *phys. geog.*, low alluvial land added to the coast of the mainland by the action of the sea or of streams. *Geog. Jour.* (R. G. S.), IX. 538.—**Foreland grits.** See ★*grit*[2].

fore-leech (fôr′lēch), *n.* The luff of a sail; that part of a fore-and-aft sail which is against the mast. Also written *fore-leach*. [Eng.]

forellenstein (fō-rel′en-stīn), *n.* [G. *forelle*, trout, + *stein*, stone.] A phanerocrystalline rock composed of lime-soda feldspar and olivin with a little pyroxene, the olivin sometimes changed to serpentine. The dark minerals appear as spots in the feldspar and suggest the spotting of trout.

forelope (fôr′lōp), *v. i.* To act as a fore-looper.

foremast-hand (fôr′mast-hand), *n.* A man shipped before the mast; a forecastleman.

foremast-officer (fôr′mast-of″i-sėr), *n.* An old designation of the boatswain, carpenter, and sailmaker on a merchantman.

fore-milk (fôr′milk), *n.* Same as *colostrum*, 1.

foren, forener. Simplified spellings of *foreign*, *foreigner*.

fore-note (fôr′nōt), *n.* In *music*, same as *appoggiatura* or ★*vorschlag*.

fore-orlop (fôr′ôr′lop), *n.* The forward part of the orlop-deck; the space forward of the hold on the orlop-deck.

forepale (fôr′pāl), *v. t.* and *i.*; pret. and pp. *forepaled*, ppr. *forepaling*. 1. To fence off. Hence—2. In *mining*, to prevent the caving of an excavation by the use of shores or planks and braces so placed as to support the walls; shore; also, to drive the ends of the shoring-planks ahead of the end of the excavation, in very loose material, to hold it in place.

forepole (fôr′pōl), *v. t.* and *i.*; pret. and pp. *forepoled*, ppr. *forepoling*. Same as ★*forepale*.

fore-purpose (fôr′pėr″pos), *n.* Previous design; set purpose. *Southey*, Doctor, lii.

fore-rake (fôr′rāk), *n.* That part of a ship's head which projects beyond or overhangs the forward end of the keel.

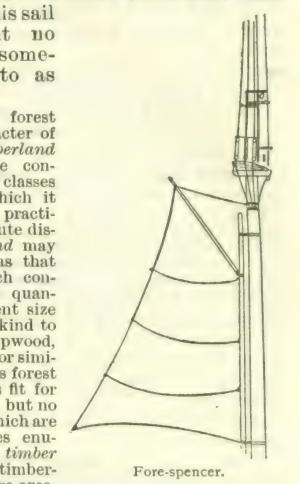
fore-rigging (fôr′rig″ing), *n.* The shrouds, and their ratlines, of the fore lower mast.

fore-royal (fôr′roi″al), *n.* The sail next above the topgallantsail on the foremast.

foresail, *n.*—**Balloon-foresail,** a large sail of light canvas carried in place of the regular fore-staysail, that is, the first head-sail forward of the foremast.

fore-set (fôr′set), *a.* In *geol.*, noting certain beds of a delta-deposit formed chiefly from heavier sediments rolled down a stream along the bottom and dumped at the steeper slope. Fore-set beds are those of greatest inclination and variability in a delta, often characterized by cross-bedding; they are underlain by the *bottom-set* and overlain by the *top-set* beds. See ★*bed*1. *Chamberlin and Salisbury*, Geol., I. 191.

Fore-sheet horse, traveler. See ★*horse*[1], ★*traveler*.



foreshift (fôr′shift), *v. t.* To move forward. Appendages that are farther forward upon the body than their equivalents in allied but more primitive animals may be regarded as having been moved forward, or *foreshifted*, during ancestral history. *E. R. Lankester*, in Nat. Science, April, 1897, p. 265.

foreshore, *n.* 2. The narrow level slope or berm constructed on the seaward side of a breakwater or dike, built to diminish and dissipate the force of waves before they strike the breakwater proper.

fore-shoulders (fôr′shōl″dėrz), *n. pl.* The projecting parts of a vessel's bows in the vicinity of the water-line.

fore-shrouds (fôr′shroudz), *n. pl.* The shrouds of the fore lower mast.

fore-spencer (fôr′spen″sėr), *n.* The fore-and-aft sail which sets on a small extra mast abaft the foremast. This sail has a gaff, but no boom, and is sometimes referred to as the *fore-trysail*.

Fore-spencer.

forest, *n.*, 1. A forest judged by the character of the stand may be *timberland* or *woodland*. These constitute the two great classes of forest between which it is possible to draw a practical but not an absolute distinction. *Timberland* may be broadly defined as that kind of forest which contains in commercial quantity trees of sufficient size and of the required kind to furnish sawlogs, pulpwood, ties, poles, or wood for similar uses; *woodland* as forest which contains trees fit for fire-wood or fencing, but no trees, or very few, which are suitable for the uses enumerated above. A *timber tract* is a body of timberland, usually of large area. A *wood-lot* is a forest of small area in which the wood is used mainly for fuel, fencing, and other farm purposes.

4. In *phytogeog.*, specifically, a closed woodland, that is, one in which the crowns of the trees touch.—**Absolute forest land** or **soil.** See ★*absolute*.—**Communal forest.** Same as *town* ★*forest*.—**Composite forest,** a forest in which both seedlings and sprouts occur in considerable number.—**Cromer forest-bed.** See *forest-bed group*, under *forest*.—**Crown forest, federal forest.** See *national* ★*forest*.—**Federal forest reserve.** See *national forest* ★*reserve*.—**Forest army-worm, cover, engineer,** etc. See ★*army-worm*, etc.—**Forest floor,** the deposit of vegetable matter on the ground in a forest. *Litter* includes the upper but slightly decomposed portion of the forest floor; *humus* the lower portion, in which decomposition is well advanced.—**Forest influences,** the influences exerted by forests on rainfall, temperature, wind, evaporation, humidity, run-off, dust, water-supply, and other climatological matters. Forest influences are determined by means of observing-stations placed within and without the forest. In general, in comparison with equal areas of prairie, forests tend to cool the air, to add less moisture by evaporation, to retard the run-off, to diminish erosions and floods, to conserve the rainfall and snowfall without altering the average run-off, to produce less dust and injurious germs, to prevent the water-table within the forest from sinking lower down, and to keep the soil from freezing. Forests have no particular influence on the amount of rainfall.—**Forest service,** that branch of the government service, in the Department of Agriculture, which is charged with the administration of the national forest reserves, and with forest investigations and coöperative forest work throughout the United States. See ★*Bureau of Forestry*.—**Fringing forest,** a luxuriant woodland growth, due, not to atmospheric precipitation, but to telluric water, as along streams and lakes. *A. F. W. Schimper* (trans.), Plant Geog., p. 177.—**Index forest,** that forest which in density, volume, and increment reaches the highest average which has been found in a given locality; a normal forest. Measurements of such a forest provide a standard for comparison with other forests of the same age and composition, grown under similar conditions.—**Keeper of the forest,** in *Eng. forest law*, the chief officer or warden of the forest.—**Light forest.** See ★*caatinga*.—**Monsoon forest,** a type of tropical woodland more or less leafless during the dry season, especially toward its close; tropophilous in character: usually lower than a rain forest; and rich in woody lianas and in herbaceous epiphytes, but poor in woody epiphytes.—**National forest,** a forest which is the property of the nation; in the United States called *federal forest*.—**National forest reserve.** See ★*reserve*.—**Normal forest.** Same as *index* ★*forest*.—**Park forest,** forest in which shade occurs only in isolated patches, under single trees or small groups of trees.—**Protection forest,** a forest whose chief value is to regulate stream-flow, prevent erosion, hold shifting sand, or exert any other indirect beneficial effect.—**Rain forest,** a type of evergreen (chiefly tropical) woodland, usually much over 30 meters high, and rich in thick-stemmed lianas and woody as well as herbaceous epiphytes, requiring heavy precipitation. *A. F. W. Schimper* (trans.), Plant Geog., p. 260.—**Reserve sprout forest,** a two-storied forest in which sprouts form the lower and seedlings the upper story. Also called *coppice with standards*, *standard coppice*, and *stored coppice*.—**Savanna forest,** a type of tropical woodland more or less leafless during the dry season, rarely evergreen, xerophilous in character, usually (but often much less than) 20 meters high, park-like, and very poor in underwood, lianas, and epiphytes, but

rich in terrestrial herbs, especially grasses.—**Thorn forest,** a tropical type of woodland, like the savanna forest in foliage and average height, but more xerophilous, very rich in underwood and slender-stemmed lianas, poor in terrestrial herbs, especially grasses, usually without epiphytes, and abounding in thorny plants.—**Town forest,** a forest which is the property of a city, town, or village. Also called *communal forest.*

fore-stage (fōr′stāj), *n.* The fighting-platform or forecastle which was built on the forward part of the upper deck of ancient vessels.

forestation (for-es-tā′shon), *n.* The planting or establishment of forests; afforestation.

Forestay tackle. See ★*tackle.*

fore-staysail (fōr′stā′sāl or -sl), *n.* The first headsail forward of the foremast, which sets on the forestay.

forester, *n.* 3. (*a*) One who is versed in forestry. (*b*) One who practises forestry as a profession.—7. [*cap.*] A member of any one of several benevolent and fraternal societies. (*a*) A member of the *Ancient Order of Foresters,* founded in Yorkshire, England, in 1745, and introduced into the United States in 1832. It has 'courts' or lodges in 36 countries, a membership of over a million, and disburses per annum over $5,000,000. (*b*) A member of the *Independent Order of Foresters,* founded in Newark, New Jersey, in 1874, with 'courts' or lodges in many countries. (*c*) A member of the *Foresters of America,* originally part of the Ancient Order of Foresters, but separated from it in 1889.

8. A pony raised in the New Forest. [Local, Eng.]—**Langton's forester,** a common moth, *Alypia langtonii,* occurring in Canada, the northern United States, and California.

forest-grown (for′est-grōn), *a.* Grown in the forest from self-sown seed.

forestian (fo-res′ti-an), *a.* [ML. *foresta,* forest.] Of or pertaining to forests.—**Forestian epoch,** in *geol.,* a subdivision of the Pleistocene or glacial series in northern Europe. It comprises the *Lower Forestian,* or fourth interglacial epoch (Ancyclus beds of the Baltic area and Littorina clays of Scandinavia), lying between the Mecklenburgian or fourth glacial epoch and the Lower Turbarian or fifth glacial epoch; and the *Upper Forestian,* or fifth interglacial epoch, indicated by a buried forest between the deposits of the fifth and sixth glacial epochs.

fore-stomach (fōr′stum″ak), *n.* A dilatation of the esophagus just above the stomach.

forest-rat (for′est-rat), *n.* See ★*rat*[1].

forestry, *n.*—**Bureau of Forestry.** See ★*bureau.*

forest-survey (for′est-sėr-vā″), *n.* An inspection or survey of woodlands or forests to ascertain the kinds, qualities, and number of trees on a given area. It includes also the study and examination of the commercial value of the trees as lumber and the value of the land in relation to lumber-production.

forest-wind (for′est-wind), *n.* 1. A wind in a forest.—2. In *forestry,* the wind which blows gently from an adjacent forest after it has been cooled by nocturnal radiation from the surface of the leaves.

fore-swifter (fōr′swift″tėr), *n.* The forward shroud of the fore-rigging.

fore-tacks (fōr′taks), *n. pl.* The tacks of the fore-course or foresail.

foretop, *n.* 4. Same as *forelock*[2].

foretopgallantmast (fōr′top-gal″ant or -to-gal′ant-mast), *n.* The mast next above the foretopmast.

foretopgallantsail (fōr′top-gal″ant or -to-gal′ant-sāl or -sl), *n.* The squaresail next above the topsail on the foremast of a square-rigged vessel.

foretopgallantyard (fōr′top-gal″ant or -to-gal′ant-yärd), *n.* The yard next above the topsail-yard on the foremast.

fore-topsail (fōr′top-sāl or -sl), *n.* The squaresail on the foremast next above the course or foresail.

fore-trysail (fōr′trī-sāl or -sl), *n.* Same as ★*fore-spencer.*

Forfars (for′fars), *n.* [Named from *Forfar* in Scotland.] Coarse, heavy, unbleached linen fabrics, made in Forfarshire, Scotland.

forfex, *n.* 2. A pair of anal organs which open or shut transversely and cross each other, as in the male of *Raphidia.* *Kirby and Spence.*

forficiform (fôr-fis′i-fôrm), *a.* [L. *forfex* (*forfic-*), scissors, + *forma,* form.] Having the form of scissors.—**Forficiform pedicellariæ,** in asteroids, one of the pedunculate pedicellariæ in which the two hooks are attached to the end of the basal plate nearest to them.

forficulid (fôr-fik′ū-lid), *n.* and *a.* **I.** *n.* A member of the *Forficulidæ.*

II. *a.* Of or belonging to the *Forficulidæ* or earwig family.

forge[1], *n.*—**Double-blast forge,** a forge for blacksmiths' use having two twyers or openings to admit the blast below the bed of fuel. The heat is less locally intense, and a larger mass may be uniformly heated for hammer treatment.

forge[3], *v. i.* [Prob. a particular use of *forge*[1], *v.*, 1, in allusion to the clicking sound.] In *farriery,* to strike the heel of the front shoe with the toe of the hind shoe, producing a clicking sound.

forge-cinder (fōrj′sin″dėr), *n.* The slag from a forge or bloomery.

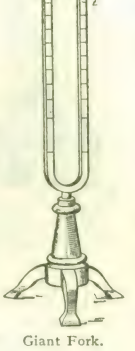
forge-hammer (fōrj′ham″ėr), *n.* Any heavy hammer for forging large pieces which is worked by machinery; a steam-hammer or power-driven hammer.

forge-limber (fōrj′lim″bėr), *n.* The limber of a forge-wagon, as distinguished from the gun-carriage limber or the caisson-limber; part of a field-battery.

forget[2], **forgett** (fôr-get′), *n.* In *glove-making,* same as *fourchette,* 2.

forge-test (fōrj′test), *n.* A bending test applied to wrought-iron and steel plates or bars. Specimens are bent both hot and cold, and also with and across the grain; the angles to which they are to be bent without fracture, and the radius about which they must be bent, depend in each case on the use for which they are intended and the thickness of the plate.

forget-me-not, *n.*—**White forget-me-not,** any species of several genera of the borage family (*Plagiobothrys, Oreocarya, Cryptanthe,* etc.), related to and somewhat resembling *Myosotis,* but bearing white flowers. These plants, forming many species, are natives of western North America and Mexico. Some or all are included under the names ★*nievitas* and ★*popcorn-flower* (which see).—**Wild forget-me-not,** the bluet or innocence, *Houstonia cærulea.*—**Yellow forget-me-not,** in California, any plant of the boraginaceous genus *Amsinckia.* They are very rough hairy herbs with yellow flowers shaped like those of the forget-me-not. *A. spectabilis,* common southward in the State, has the flowers half an inch wide. Called also *woolly-breeches.*



forging[2] (fōr′jing), *n.* [*forge*[3], *v.*, + *-ing*[1].] A defect in a horse's gait consisting in striking the heel of the front shoe with the toe of the hind shoe, which produces a clicking sound. It is not considered so serious a fault as overreaching or grabbing.

forgiv, *v.* A simplified spelling of *forgive.*

forhed, *n.* A simplified spelling of *forehead.*

fork, *n.*, 1. (*c*) In *glass-manuf.,* an implement with a long iron handle and two prongs, used for laying up bottles in tiers in the annealing-furnace.

8. In *mech.*: (*a*) A pair of teeth or pins standing out from a bar and inclosing a space within which runs the belt of a machine fitted with fast and loose pulleys. By moving the bar which carries the pins endwise the belt can be shifted. (*b*) A piece of steel fitting into the socket or chuck on a lathe, used for driving the piece to be turned. —9. A position, in a game of chess, where two pieces are attacked at the same time by a pawn.—**Electric fork,** in *acoustics,* a tuning-fork which is actuated by means of an electromagnet.—**Giant fork,** in *psychophys.,* a large tuning-fork, with a range of from 16 to 25 vibrations per second, used for determining the lower limit of tonal hearing.—**Self-interrupting fork.** Same as *electric* ★*fork.*—**Silver-fork deformity.** See ★*deformity.*

Giant Fork.

fork, *v. t.* 4. In *chess,* to attack (two hostile pieces) with a pawn.

forked-leaf (fôrkt′lēf), *n.* In the southern United States, the Turkey oak, *Quercus Catesbæi:* so called from the shape of the leaf.

fork-head, *n.* 2. A rod-end which is split or divided to form an opening for the reception of the end of another rod, the two being then fastened by a pin or bolt.

fork-tined (fôrk′tīnd), *a.* Noting antlers that lack the large, more or less depressed brow-tine found in the wapiti and European red deer of the genus *Cervus:* contrasted with ★*brow-tined.* The South American swamp deer, *Blastocerus paludosus,* and the mule-deer, *Odocoileus macrotis,* have typical fork-tined antlers.

Forli pottery. See ★*pottery.*

form, *n.*, 2. It is the combination of all the like faces possible on a crystal of given symmetry; that is, all the faces embraced by a given symbol. (See ★*symbol*[1], 7.) The forms of the isometric system (cube, octahedron, tetrahedron, pyritohedron, etc.) are closed forms. (See *form,* 2.) This is also true, in the other systems, of the various double pyramids (bipyramids), the bisphenoids, and also the rhombohedrons, scalenohedrons, and trapezohedrons. In these systems, however, most of the forms are open forms. They include the pinacoids, prisms, domes, etc. (See ★*pinacoid,* ★*prism,* ★*pyramid,* ★*sphenoid,* ★*pedion.*) In these cases it is obvious that two or more forms are required for a complete crystal. Two geometrically similar forms are said to be *complementary* when their combined faces correspond to all the faces of some form of a class of higher symmetry in the same system. Thus the faces of the two complementary tetrahedrons (tetrahedral class, isometric system) correspond to those of the octahedron (holosymmetric class). In such cases the complementary forms (which may be enantiomorphous) are often distinguished as *positive* and *negative, plus* and *minus,* or *direct* and *inverse.*

25. A flower-bud of the cotton-plant.

Forms appearing in May bloomed in 21 to 32 days.
U. S. Dept. Agr., The Cotton Plant, 1896, p. 263.

Biologic form. See ★*biologic.*—**Center of form.** See ★*center*[1].—**Form factor.** See ★*factor.*—**Form genus.** See ★*genus.*—**Forms of address.** Such forms are governed principally by social and official customs rather than by legal enactments. The external addresses of letters are generally more formal than the superscriptions with which they begin; but these latter, as well as the modes of address used in repetition in the body of a letter, and the forms of conclusion, vary considerably in proportion to the degree of intimacy between the writer and the person addressed, as well as to the character of the communication (official or social). Finer distinctions and greater elaborations of detail prevail in the social and official circles of the more conservative European monarchies. The forms here given are those most commonly used in the United States and Great Britain. Those which precede the colon are the most formal, and therefore most appropriate for use on the envelop of a letter. Those following the colon are adapted for internal superscription and for repetitions throughout the communication. The matter of abbreviation of such titles as *Right Honorable, Honorable, Reverend,* etc., is largely one of convenience or relative importance. Purely official addresses are frequently shortened to *Rt. Hon., Hon., Rev.,* etc., but the Department of State of the United States always spells out the term 'Honorable' in its official communications. An *Admiral* is addressed by the style of his rank and his ordinary name only: as, Vice-Admiral A. B.: Sir; except (in the British service) where the officer possesses hereditary or other special rank: as, Rear-Admiral the Earl of C., *or* Lord D.: My Lord; *or* The Hon. E. F.: Sir.—An *Ambassador from a Foreign Country to the United States* as His Excellency the Rt. Hon. Sir G. H. (titles): Excellency.—An *Ambassador of the United States* as His Excellency I. J.: Sir.—An *Apostolic Delegate* as His Excellency K. L. (*or* The Most Rev. K. L.), Delegate Apostolic: Your Excellency.—An *Archbishop* in the *Church of England* as His Grace (*or* The Most Rev.) the Lord Archbishop of C.: My Lord Archbishop, *or* Your Grace. In the *Roman Catholic Church* as The Most Rev. (*or* His Grace the Most Rev.) M. N., Archbishop of O., *or* The Most Rev. the Archbishop of O.: Your Grace, *or* Most Rev. Sir.—An *Archdeacon* as The Ven. P. Q., Archdeacon of R., *or* The Ven. the Archdeacon of R., *or* The Ven. the Archdeacon Jones: Ven. Sir, *or* Sir. —A *Baron* as The Rt. Hon. Lord S.: My Lord, *or* Your Lordship. Daughter as The Hon. (Christian and surname): Madam. (If married to a commoner, as The Hon. Mrs. B.). Son and his Wife as The Hon. T. U.: Sir; The Hon. Mrs. T. U.: Madam.—A *Baroness* as The Rt. Hon. Lady V., *or* The Lady V. (no Christian name): Your Ladyship, *or* Madam. Dowager as The Rt. Hon. Edith, (*or* The Dowager) Lady V.: Madam.—A *Baronet* as Sir W. X., Bart.: Sir. Wife as Lady X. (surname only, unless a Lady by birth, when the address of her specific rank is used): Your Ladyship, *or* Madam.—A *Bishop* or *Suffragan Bishop* in the *Church of England* as The Rt. Rev. the Lord Bishop of Y., *or* The Rt. Rev. the Bishop Suffragan of ——: My Lord, *or* My Lord Bishop, *or* Your Lordship, *or* Rt. Rev. Sir. In the *Roman Catholic Church* as The Rt. Rev. Z. A., Bishop of B., *or* The Rt. Rev. Bishop of B.: Right Reverend Sir. In the *Protestant Episcopal Church in the United States* as The Rt. Rev. Bishop —— (using either surname or name of diocese).—A *Cabinet Officer* in the United States as The Honorable the Secretary of War: Sir.—A *Canon* as The Rev. Canon C.: Rev. Sir, *or* Sir.—A *Cardinal* as His Eminence D. E., Cardinal (*or* Cardinal Archbishop) of F., *or* His Eminence the Cardinal (*or* Cardinal Archbishop) of F., *or* His Eminence James, Cardinal F.: Your Eminence.—A *Clergyman* as The Rev. J. K. (if above commoner's rank, The Rev. Lord L., *or* The Rev. the Hon. J. K., *or* The Rev. and Hon. J. K.; if a Doctor in any faculty, as The Rev. Dr. J. K., or The Rev. J. K., D.D.): Rev. Sir, *or* Sir.—A *Countess* as the Rt. Hon. the Countess of Q., *or* The Rt. Hon. Lady Q.: Your Ladyship, *or* Madam. Dowager as The Rt. Hon. Bertha, (*or* The Dowager) Countess of Q., *or* The Rt. Hon. the Dowager Lady Q.: Madam.—A *Dean* of the *Church of England* as The Very Rev. the Dean of R.: Very Rev. Sir, *or* Mr. Dean, *or* Sir. In the *Roman Catholic Church* as The Rev. S. T.: Your Reverence, *or* Rev. and Dear Sir.—A *Duchess* as Her Grace the Duchess of U.: Your Grace, *or* Madam. Dowager as Her Grace Charlotte, (*or* The Dowager) Duchess of U.: Madam.—A *Duke* as His Grace (*or* The Most Noble) the Duke of V.: My Lord Duke, *or* Your Grace, *or* May it please Your Grace. Daughter as The Rt. Hon. the Lady (*or* The Lady *alone*) (Christian and surname): Your Ladyship, *or* Madam. (If married to one of inferior rank, The Rt. Hon. the Lady Beatrice [husband's surname]: Madam.) Eldest Son and his Wife, same as Marquis or Earl, Marchioness or Countess, according to the rank assumed. Younger Son and his Wife as The Rt. Hon. the Lord (*or* The Lord *alone*) W. X.: My Lord, *or* Your Lordship; The Rt. Hon. the Lady (*or* The Lady *alone*) W. X.: Madam, *or* Your Ladyship.—An *Earl* as The Rt. Hon. the Earl of Y.: My Lord, *or* Your Lordship. Daughter as The Rt. Hon. the Lady (*or* The Lady *alone*) (Christian and surname): Madam. (If married to one of inferior rank, The Rt. Hon. the Lady Isabel [husband's surname]: Madam.) Eldest Son and his Wife same as Viscount and Viscountess, or other assumed rank. Younger Son and his Wife as The Hon. Z. A.: Sir; The Hon. Mrs. Z. A.: Madam.—An *Emperor* as Your Imperial Majesty, *or* Sire.—A *General* as is an Admiral.—A *Governor of a Colony* as His Excellency Sir B. C., Governor of D.: Sir (*or,* if of more exalted rank, His Excellency the Earl of D., with the proper style of that rank), *or* His Excellency Governor E.: Your Excellency.—A *Governor of a State or Territory* (United States) as His Excellency the Governor of F.: Sir.—A *Judge of a State Court* as The Hon. G. H.: Sir.—A *Justice of the Peace* or *Magistrate* (in Great Britain) as K. L., Esq., J. P., *or* The Worshipful K. L. (if above commoner's rank, then accordingly): Your Worship.—A *Justice of the Supreme Court of the United States* as The Hon. I. J.: Mr. Justice.—The *King*

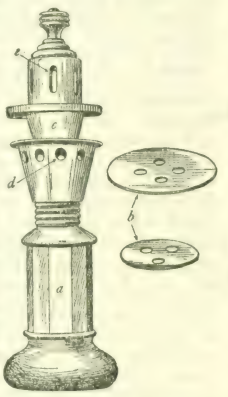
of England as The King's Most Excellent Majesty, *or* Your Majesty · May it please Your Majesty, *or* Sire.— A *King's Counsel* as M. N., Esq., K. C.: Sir.— A *Knight* as Sir O. P. (followed by the initials of his Order, or, in the case of a *Knight-Bachelor*, by Knt.): Sir.— A *Lieutenant-Governor of a State* (United States) as is a Judge of a State Court.— The *Lord Chancellor of England* as The Rt. Hon. the Lord High Chancellor: My Lord, *or* Your Lordship.— The *Lord Chief Justice of England* as The Rt. Hon. the Lord Chief Justice of England: My Lord, *or* Your Lordship.— A *Lord Justice of Appeal* as The Rt. Hon. Lord Justice Q., *or* The Rt. Hon. Sir R. S.: My Lord, *or* Sir.— The *Lord Lieutenant of Ireland* as His Excellency (or according to his rank of nobility) the Lord Lieutenant: Your Excellency, or according to rank.— A *Lord Mayor* as The Rt. Hon. the Lord Mayor of T.: My Lord, *or* Your Lordship. Wife as The Rt. Hon. the Lady Mayoress: as a Baroness.— A *Maid of Honour* as The Hon. U. V.: Madam.— A *Marchioness* as The Most Hon. the Marchioness of W.: Your Ladyship, *or* Madam. Dowager as The Most Hon. Alice (*or* The Dowager), Marchioness of W.: Madam.— A *Marquis* or *Marquess* as The Most Hon. the Marquis of X.: My Lord Marquis, *or* My Lord, *or* Your Lordship. Daughter as The Rt. Hon. the Lady (*or* The Lady *alone*) (Christian and surname): Madam. (If married to one of inferior rank, The Rt. Hon. the Lady Florence [husband's surname]: Madam). Eldest Son and his Wife according to the courtesy title assumed. Younger Son and his Wife as The Rt. Hon. the Lord Henry Y.: My Lord, *or* Your Lordship; The Rt. Hon. the Lady Henry Y.: Madam, *or* Your Ladyship.— The *Master of the Rolls* as The Rt. Hon. (name or title), *or* The Rt. Hon. the Master of the Rolls: Sir, *or* Judge (on the Bench as My Lord, *or* Your Honour).— A *Mayor* (Great Britain) (other than a Lord Mayor, which see, *supra*) as The Rt. Worshipful the Mayor of Z.: Sir. (United States) His Honor W. W., Mayor of A.: Sir.— A *Member of a Colonial Ministry*, etc., as The Hon. B. C.: Sir (unless of exalted rank, then accordingly).— A *Member of Parliament* as M. P. (these initials following the ordinary designation of the Member): Sir (or according to rank). — A *Minister* (British Diplomatic Service) as D. E., Esq., (other titles according to rank) H. B. M. Minister (*or* Minister Resident): Sir (or according to rank).— A *Minister of the United States Abroad* as F. G., Esq.: Sir.— A *Minister to the United States*, name, with title (if any): Sir.— A *Parish Priest* or *Rector* (*Roman Catholic Church*) as The Rev. N. O.: Your Reverence, *or* Rev. and Dear Sir.— A *Peer* who is a Knight of the Garter, of the Thistle, or of St. Patrick, should have the initials K.G., K.T., or K.P. appended to his name.— The *Pope* as His Holiness Pius X: Your Holiness, *or* Holy Father.— The *President of the United States* as His Excellency the President of the United States: Sir.— An *Ex-President* as is a Judge of a State Court.— The *Prime Minister of England* according to his rank, with the addition, after his name, of Head of His Majesty's Government.— A *Prince* as H. R. H. the Prince of W., K. G., etc., *or* H. R. H. Prince Alfred, *or* H. R. H. the Duke of R.: Your Royal Highness, *or* Sir. — A *Princess* as H. R. H. the Princess of W., etc., *or* H. R. H. Princess Alice, *or* H. R. H. the Duchess of S.: Your Royal Highness, *or* Madam.— A *Privy Councillor* as The Rt. Hon. T. U.: Sir. (If a Duke or Marquis, according to rank.)—The *Queen of England* as The Queen's Most Excellent Majesty: Your Majesty, *or* May it please Your Majesty, *or* Madam.— A *Representative in Congress* or in a *State Legislature* as is a Judge of a State Court.— The *Secretary of State* (United States) as The Honorable the Secretary of State: Sir.— A *Senator* (United States or State) as is a Judge of a State Court.— The *Speaker of the House of Commons* as The Rt. Hon. A. B.: Sir.— The *Speaker of the United States House of Representatives* or *of a State Assembly* as is a Judge of a State Court.— A *Vicar-General* as The Very Rev. C. D.: Very Rev. and Dear Sir.— The *Vice-President of the United States* as The Honorable E. F., Vice-President of the United States: Sir.— A *Viceroy* as His Excellency, followed by the usual form of address for his particular rank irrespective of his position as Viceroy, and by Viceroy and Governor-general of India (or Viceroy and Lord Lieutenant of Ireland, as the case may be).— A *Viscount* as The Rt. Hon. the Lord Viscount (*or* The Viscount) G.: Your Lordship, *or* My Lord. Daughter as The Hon. (Christian and surname): Madam. (If married to a commoner, as The Hon. Mrs. H.) A Son and his Wife as The Hon. I. J.: Sir; The Hon. Mrs. I. J.: Madam.— A *Viscountess* as The Rt. Hon. the Viscountess K.: Your Ladyship, *or* Madam. Dowager as The Rt. Hon. Felicia, (*or* The Dowager) Viscountess of K.: Madam. The wives of British Ambassadors, Archbishops, Bishops, Judges of Superior Courts, Lord Provosts, Mayors, and Members of Parliament, take no titles by virtue of their husbands' offices, but only such as are theirs by right of birth or marriage. The conclusion of a letter may generally consist of a repetition of the various terms used in the address and superscription, in the manner following, according to the class of communication: I have the honor to be, My Lord Duke, Your Grace's most obedient and humble servant; *or*, Very Reverend Sir, your obedient servant.— **Form species.** See ★*species*. —**Illusory form,** in *math.*, indeterminate form.— **Indeterminate form.** See *indeterminate*.— **Involution form,** in *bacteriol.*, an organism which has assumed a swollen, irregular outline which does not correspond with its typical shape.—**Setting-up form,** in *barrel-making*, a former or holder in which the staves are assembled to form a keg or barrel. It is adjustable to various sizes of barrels and is fitted with supports for the first or lowest truss-hoop. —**Synclinal forms.** See ★*synclinal*.— **Type form,** in *biol.*, the species or specimen which is accepted by the systematist as a type.—**Vibration form.** See ★*vibration*.

form, *v.* **I.** *trans.* **6.** In *elect.*, to change (the surface of the plates of a secondary or storage-cell) by repeated charge and discharge, so that they are in condition for use.

II. *intrans.* **3.** In *elect.*, to convert the active material of the positive plate of a storage-cell into lead monoxid or that of the negative plate into spongy lead, either by the action of the charging current or by direct chemical means.

formacoll (fôr'ma-kol), *n.* [*forma*(*ldehyde*) + Gr. *κόλλα*, glue.] Same as *formaldehyde* ★*gelatin*.

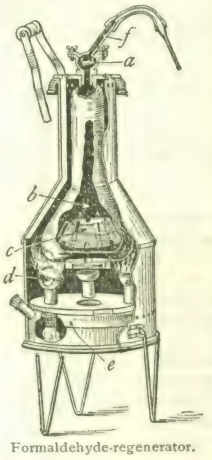
formal, *a.* **11.** Implicit; not active; latent; virtual.



Prejudice is *formal* scepticism.
A. Collier, Clavis Universalis, x. 84.

Formal abduction. See ★*abduction*.

formal[2] (fôrm'al), *n.* A trade-name for formaldehyde.



formaldehyde (fôr-mal'dē-hīd), *n.* [*form*(*ic*) + *aldehyde*.] A gas, CH_2O. It can be obtained in several ways, as, for example, by leading a mixture of vapor of methyl-alcohol, CH_4O, and air over a heated platinum spiral. The solution is called, commercially, *formalin*. It is a powerful disinfectant. The vapor, unlike sulphur dioxid, does not attack textiles, furniture, etc.; therefore it is largely used for the disinfection of rooms. Its solutions are extensively employed, as vapor and in solution, for the preservation of food and anatomical specimens, and for embalming. Also called *formic aldehyde*, *methyl aldehyde*, or *methanal*.— **Formaldehyde bisulphite,** a crystalline compound resulting from the action of formaldehyde upon sodium bisulphite. It is used as an antiseptic.—**Formaldehyde gelatin, lamp.** See ★*gelatin*, ★*lamp*.—**Formaldehyde tannin-albuminate** or **tannalbuminate,** a compound of tannin-albumin and formaldehyde which is insoluble in the acid fluids of the stomach but is slowly split up into its three components in the lower intestines. It is an intestinal astringent and antiseptic.—**Formaldehyde urea,** a compound resulting from the interaction of formalin and urea.

formaldehyde-generator (fôr-mal'dē-hīd-jen″ē-rā-tor), *n.* An apparatus designed to bring a mixture of the vapor of methyl alcohol (wood-alcohol) and air in contact with heated spongy or finely divided platinum, whereby the alcohol is oxidized to formaldehyde: used in disinfection. Methyl alcohol is placed in the receptacle *a*, and drawn up therefrom by a wick which ends just below the platinized disks *b*, held in the cone-shaped bottom of *c*. The alcohol is lighted and allowed to burn until the disks have become heated. The flame is then blown out, but the vapor of the alcohol, mixed with air, drawn in at the holes *d*, in passing through the disks, is oxidized, and the formaldehyde produced escapes through the apertures *e*.

Formaldehyde-generator.

formaldehyde-regenerator (fôr-mal'dē-hīd-rē-jen″ē-rā-tor), *n.* An apparatus designed to liberate formaldehyde from its solution, or some combination thereof, and permit the escaping vapor to be conducted into and be diffused through a space to be disinfected. Many machines of this type have been devised. The formaldehyde solution (formalin), with calcium chlorid or glycerin or both, is poured through the orifice *a*, into the boiler *b*. The latter contains partitions *c*, which induce a circulation of the liquid and a rapid evolution of formaldehyde vapor when heat is applied to the sides of the boiler by the burners *d*, fed by alcohol from the lamp *e*. The formaldehyde vapor is conducted through the flexible hose and nozle *f*, clamped at *a*, through a keyhole of the door closing the room to be disinfected, thus diffusing the vapor without exposing the operator who superintends the action of the machine.

Formaldehyde-regenerator.

formalesque (fôr-mal-esk'), *a.* [*formal* + *-esque*]. In *landscape-gardening*, noting that style or spirit of treatment which is characterized by an essentially formal handling, being dominated by the architecture or the engineering, while still retaining some natural features; not admittedly and designedly formal, but still not unreservedly free and natural. *L. H. Bailey*.

formalin (fôr'ma-lin), *n.* [*formal*(*dehyde*) + *-in*[2].] A trade-name for aqueous or dilute methyl alcoholic solutions of formaldehyde, containing up to 40 per cent. of the latter.

formalina (fôr-ma-lī'nä), *n.* [NL.] An iodine derivative of formaldehyde. It has been used for inhalation in cases of consumption. Also called *igazol*.

formalin-gelatin (fôr'ma-lin-jel″a-tin), *n.* Same as *formaldehyde* ★*gelatin*.

formalinize (fôr'ma-lin-īze), *v. t.*; pret. and pp. *formalinized*, ppr. *formalinizing*. [*formalin* + *-ize*.] To add small amounts of formalin to, as to cultures of typhoid organisms for the purpose of killing them. The dead bacteria give the same reaction as the living culture when used in a Widal test.

formalith (fôr'ma-lith), *n.* [*forma*(*lin*) + Gr. *λίθος*, stone.] A trade-name for blocks of infusorial earth soaked in formalin and used for disinfecting.

formamidate (fôrm-am'i-dāt), *n.* [*formamide* + *-ate*[1].] A salt of formamide, $H.CONH_2$. —**Mercury formamidate,** a soluble salt with a neutral reaction. It does not coagulate albumen, and gives but little pain when injected.

formamide (fôrm-am'id), *n.* [*form*(*ate*) + *amide*.] A colorless liquid, $O:CH.NH_2$, prepared by heating ammonium formate.

formanilide (fôrm-an'i-lid), *n.* [*form*(*ic*) + *anil*[2] + *-ide*[1].] A colorless crystalline compound, $C_6H_5NH.COH$, obtained by digesting aniline with formic acid. It is antipyretic and analgesic.

formant (fôr'mant), *n.* [L. *formans* (*formant-*), ppr. of *formare*, form: see *form*, *v.*] In *phonol.*, the name given by Hermann to "the tone of constant pitch for each vowel,—independent of the tone on which it is sung." *Scripture*, Exper. Phonetics, p. 39.

A vowel, according to him [Hermann], is a special acoustic phenomenon, depending on the intermittent production of a special partial, or '*formant*,' or 'characteristique.' The pitch of the '*formant*' may vary a little without altering the character of the vowel.
V. C. McKendrick, in Nature, Dec. 26, 1901, p. 187.

format (fôr-mä'), *n.* [F. *format* = It. *formato* = G. *format*, shape and size of a book, < NL. **formatum*, neut. of L. *formatus*, formed, pp. of *formare*, form.] **1.** In *printing*, the shape and size of a book, as, for example, duodecimo, octavo, quarto, folio, etc.— **2.** In *painting*, *engraving*, etc., the relation between length and breadth of surface.

formation, *n.*, **4.** (*b*) In the classification of rock-masses as adopted by the United States Geological Survey for cartographic purposes, the cartographic unit, or usually the ultimate rock body separately named and mapped.—**5.** In *œcol.*, a plant society or association. See the extract and *plant* ★*formation*.

Geologists, paleobotanists and a few botanists have several times called attention during the past few years to the persistent misuse by many ecologists of the word '*formation*,' when referring to plant societies or associations. Regardless of the sanction of a century . . . of usage for '*formation*' in the geological sense, they have proceeded . . . to transplant the word, viâ Germany, into English botanical literature.
Science, March 18, 1904, p. 467.

Barringtonia formation. See ★*Barringtonia*.—**Bonaventure formation,** a name given by Logan to a heavy sheet of red conglomerates and sandstones which unconformably overlie the Devonian and Silurian limestones of Gaspé, Canada, and are regarded by him as wholly of early Carboniferous age. It is named from the island of Bonaventure, which is composed wholly of these rocks. Later writers have assigned the lower portion of these beds, which attain a thickness of several thousand feet, to the Upper Devonian; but they are all deposits of lacustrine or estuarine origin, and are now regarded as representing one of the Old Red lakes which were numerous in northern latitudes during Devonian and early Carboniferous times.—**Boone formation,** in *geol.*, a subdivision of the Carboniferous in Arkansas, regarded as equivalent to the Burlington and Lower Keokuk groups. It attains a thickness of 250 feet and is underlain by the Eureka shale and overlain by the Wyman sandstone.—**Burrum formation,** in *geol.*, the lower division of the Jurassic formation in Queensland, Australia.— **Cape May formation,** strata formed during a portion of the Pleistocene period in New Jersey. —**Climatic formation,** a plant formation the character of whose vegetation is governed by atmospheric precipitation. According to Schimper, the author of the distinction, climatic formations fall into three types—*woodland*, *grass-land*, and *desert*. Opposed to *edaphic* ★*formation*, and alternatively termed *district formation*.—**Closed formation,** a plant formation in which the ground is completely occupied, as in a meadow.—**Columbia formation,** in *geol.*, a subdivision of the Quaternary formation of the Atlantic coastal plain and the Mississippi valley, consisting of a series of subestuarine and submarine deltas and associated delta-deposits. It is characterized by wide-spread stratified deposits and associated terraces which are newer than the Lafayette formation.— **Cultural plant formation,** in *phytogeog.*, an aggregation, in a given region, of cultivated plants of one or of several species as determined, on the one hand, by their adaptations, and, on the other, by economic considerations. Weeds, as governed by conditions of cultivation, are here included. —**Dakota formation,** in *geol.*, a division of the Cretaceous system in the interior region of the United States. It lies at the base of the series, and is largely composed of lacustrine sandstones, with deposits of lignite and an abundance of dicotyledonous leaves.—**Decker Ferry formation,** in *geol.*, a division of the Upper Silurian rocks of Pennsylvania and New Jersey. It consists of the Decker Ferry shale and the Decker Ferry sandstone of the Pennsylvania Geological Survey, the Decker Ferry limestone of that survey being a different formation. It is regarded by New Jersey geologists as equivalent to the Cobleskill (coralline) limestone of New York. It attains

a thickness of 450 feet, and is underlain by the Bossardville limestone and overlain by the Rondout formation. Its lower part is characterized by *Chonetes jerseyensis*.—**District formation.** Same as *climatic* ★*formation*.—**Edaphic formation,** in *phytogeog.*, a plant formation the vegetation of which is chiefly determined by edaphic influences (see ★*edaphic*).—**Heat of formation.** See ★*heat*.—**Ignacio formation,** in *geol.*, a stratum of quartzite near Silverton, Colorado, believed to be of Upper Cambrian age. *W. Cross*, Amer. Jour Sci., Oct., 1904, p. 249.—**Kansan formation,** in *geol.*, glacial deposits forming the lowest member of the Pleistocene.—**Layered formation,** a plant formation in which different vegetation forms succeed each other in strata. See ★*layer*, 7.—**Livingstone formation,** in *geol.*, the uppermost member of the Cretaceous system in the Rocky Mountain region, largely composed of volcanic sands in which have been found some fresh-water and terrestrial *Mollusca*, and a large number of land plants.—**Magothy formation,** in *geol.*, a series of sands and gravels in the Chesapeake Bay region overlying the Potomac formation, from which it is separated by a supposed plane of erosion. It is regarded as pertaining to Cretaceous time.—**Manasquan formation,** in *geol.*, one of the divisions of the Upper Cretaceous of the Atlantic border lying at the top of the series and composed largely of highly glauconitic sand.—**Maroon formation,** in *geol.*, a very thick series of mixed arenaceous and calcareous sediments, belonging to the Carboniferous period and occurring near Aspen, Colorado.—**Matawan formation,** in *geol.*, a series of Upper Cretaceous sands and clays lying at the bottom of the formation, attaining a thickness of about 400 feet in New Jersey, but gradually thinning southward. The fossils are wholly marine.—**Monmouth formation,** in *geol.*, a division of the Upper Cretaceous series of the Atlantic coast of North America resting on the Matawan and overlain by the Rancocas division. It consists largely of glauconitic sands with many fossils.—**Montana formation,** in *geol.*, a division of the Cretaceous rocks in the interior of the United States, regarded as lying above the Colorado and below the Livingstone formation. It is composed of lacustrine and brackish water deposits with coal seams and an abundant terrestrial flora, and also carries occasional bands of marine deposits.—**Negaunee formation,** in *geol.*, the uppermost member of the Middle Marquette series in the Marquette iron range of Michigan. It consists largely of cherty iron carbonate and slate, and is penetrated by numerous dikes of trap. The alteration of the cherty iron carbonate under the influence of the meteoric waters has produced the iron ores, which have been very productive.—**Neosho formation,** in *geol.*, a formation of Permian age in Kansas, immediately overlying the uppermost coal-measures and consisting of limestone and shale with many marine fossils (*Pseudomonotis, Pleurophorus*).—**Open formation,** a plant formation in which the ground is incompletely covered, as in a desert.—**Pampas formation,** in *geol.*, a deposit of Quaternary age, similar to the loess, of both æolian and aqueous origin, occurring in the pampas region of South America, in which have been found fossil remains of gigantic sloths (*Megatherium* and *Mylodon*) and armadillos (*Panochthus* and *Glyptodon*).—**Pamunkey formation,** in *geol.*, the Eocene deposits of Maryland, consisting of clays, greensand marls, sands, and limestones. They are divided, on lithic and biotic differences, as follows: at the base, the Aquia Creek stage with Piscataway and Pospotansa substages, and above, the Nanjemoy stage with Potapaco and Woodstock substages. The fauna has throughout a sublittoral expression and consists chiefly of mollusks with *Foraminifera, Bryozoa*, some corals, ostracodes, fish, and a few reptilian remains. *Darton*, 1891.—**Patagonian formation,** in *geol.*, a series of clays, sandstones, and limestones of Lower Miocene age in Argentina and Patagonia, which contain an abundant marine invertebrate fauna closely allied to that of the Miocene beds of Australia and New Zealand. It overlies the *Pyrotherium* beds and is overlain by the continental vertebrate-bearing beds of the Santa Cruz Miocene formations.—**Patuxent formation,** in *geol.*, a series of variegated sands and clays typically developed in the basin of the Patuxent river, Maryland, and forming the basal member of the Potomac group. With a thickness of 60–100 feet they overlap the Algonkian crystallines and the Newark sandstones and shales, of all of which they constitute the redeposited residuals, and they are themselves overlain by the clays of the Arundel formation. The contained fossils are almost wholly restricted to plant remains and afford indecisive evidence as to the Upper Jurassic or Lower Cretaceous age of the formation. See *Potomac* ★*formation*.—**Pensauken formation,** in *geol.*, a series of clays, sands, gravel, and boulder beds of Mid-pleistocene age, typically developed in a broad shallow trough extending across New Jersey in a northeasterly direction from the head of Delaware Bay to Raritan Bay. These beds unconformably overlie the Precambrian crystallines, Triassic sandstones, and the Cretaceous and older Tertiary beds, and their materials are the products of disintegration of the older rocks at the north as well as of the country rocks of the vicinity, all deposited from swiftly moving water carrying floating ice.—**Plant formation,** in *phytogeog.*, originally (Grisebach, 1838) an assemblage of plants, of one or of a plurality of species, which forms a distinct and complete feature of the landscape: in ecological plant geography (see ★*phytogeography*), an assemblage of plants occupying a congenial station, that is, inhabiting an area marked by a special sum of ecological conditions, and determined by their adaptations to life in such an environment, therefore considered biologically not taxonomically. The formation is the phytogeographical unit; but since the unit may be taken in a broader or narrower view, the application of the term has greatly varied and this has induced attempts to introduce a more precise terminology. Warming dropped 'formation' in favor of a term translated sometimes *association*, sometimes *society*, applying this to the units of his classification, which was based on water-content of the soil. Schimper subdivided formations into *climatic* and *edaphic*, the latter corresponding to Warming's 'associations,' and it is nearly with the latter equivalence that 'formation,' used without qualification, now seems to be applied. See ★*association*, 4, *plant association*, under ★*association*, and ★*region*, 8.—**Potomac formation,** in *geol.*, a series of clays, sands, and conglomerates lying at the base of the Cretaceous system along the inner edge of the middle Atlantic coastal plain region, and attaining its greatest development in Maryland. The deposits are almost wholly of fresh-water and estuarine origin, and portions contain an abundant flora of early Cretaceous expression, together with some brackish-water mollusks, fishes, plesiosaurs, and dinosaurs. The series has been divided into the lower Patuxent and Arundel stages which may be of late Jurassic age, and the upper Patapsco and Raritan stages which are of Lower Cretaceous age.—**Rancocas formation,** in *geol.*, a division of the Upper Cretaceous in New Jersey lying above the Monmouth and below the Manasquan divisions, and consisting chiefly of greensand marls carrying many fossils.—**Raritan formation,** in *geol.*, a subdivision of the Lower Cretaceous (Potomac group) of the Atlantic coast region extending from New Jersey into Maryland and attaining a thickness of 500 feet. It is underlain by the Patapsco formation and overlain by the Matawan formation, and is characterized in New Jersey by plant remains and a few brackish-water molluscan shells.—**Salt formation,** a series of related strata containing beds of rock salt or brine.—**Santa Cruz formation,** in *geol.*, a division of the Tertiary series, in southern South America lying above the Patagonian and remarkable for the profusion in number and variety of its mammalian remains which represent a fauna of austral type strongly contrasted with contemporary faunas of northern latitudes. It is regarded as of Miocene age.—**Soudan formation,** in *geol.*, a series of fragmental sediments, jaspers, and iron ores of the Archæan era, in the Vermilion iron range of Minnesota.—**Star formation,** in *geol.*, a division of the Carboniferous limestone in Australia.—**Timber Creek formation,** in *geol.*, a series of sandstones and limestones at the base of the Upper Cretaceous in Texas.—**Trinity formation,** in *geol.*, the lower division of the Comanche series of the Texan Lower Cretaceous series, comprising the Travis Peak, Glenrose, and Paluxy beds. The formation consists of conglomerates, sands, and limestones, with abundant molluscan fossils.—**Tularosa formation,** in *geol.*, a series of sandy marls containing fresh-water shells of Pliocene age, overlying the Tertiary Otero marls in southeastern New Mexico.—**Tuscaloosa formation,** in *geol.*, a series of clays and sands, aggregating 1,000 feet in thickness, forming the basal member of the Cretaceous system in western Alabama and northeastern Mississippi, and probably equivalent in part to the Raritan of New Jersey and the Patapsco of Maryland.—**Tuscan formation,** in *geol.*, a series of volcanic tuffs of Miocene age capping the Ione formation in the Sacramento valley of California.—**Waipara formation,** in *geol.*, a rock series in the Canterbury district of New Zealand believed to represent the Upper Cretaceous and possibly some of the older Tertiary formations. It consists of conglomerates which attain a thickness of 8,000 feet, sandstones, and shales, and contains numerous plant remains, fishes, and saurians.—**Washita formation,** in *geol.*, the highest division of the Lower Cretaceous deposits of Texas, resting on the Fredericksburg group, and subdivided into the Preston, Fort Worth, Denison, and Shoal Creek beds, in ascending order.—**Weber formation,** in *geol.*, a series of thin-bedded carbonaceous limestones and shales of the Carboniferous period, occurring near Aspen, Colorado.

formatol (fôr′mą-tōl), *n.* [*form*(*aldehyde*) + *-ate*[1] + *-ol*.] A disinfecting and antiseptic dusting-powder containing formaldehyde.

formatore (fôr-mä-tō′rē), *n.*; pl. *formatori* (-rē). [It., a former.] One who models in wax or plaster.

When found, one side of the skull and some fragments of limb-bones were all that was exposed; but the skilful removal of the matrix by Mr. J. Hall, assistant *formatore* in the Museum, has revealed most of the skull, the upper surface of the pelvis, and the femur.

Proc. Zool. Soc. London, 1899, p. 776.

formatory (fôr′mā-tō-ri), *a.* [NL. **formatorius*, ⟨L. *formare*, form: see *form*, *v.*] Tending or serving to form. *Ruskin.*

formene (fôr′mēn), *n.* [*form* (*ic*) + *-ene*.] Same as *methane*.

former[2], *n.*, 2. (*b*) One of a number of appliances and machines used in bending and shaping sheet-metal into tubes, cylinders, boxes, and other forms. For making cylindrical blanks for round vessels and pipes, the machines employ long bending-rolls in groups of three, the sheet-metal being bent to the right diameter by the size and adjustment of the rolls. Small machines using two short rolls having irregular faces are used in forming blanks for pepper-boxes, candlesticks, and other small cylindrical vessels. Forming-machines for making square or triangular blanks for boxes and pipes are properly sheet-metal bending-machines. Wire-forming machines, used in making wire rings, handles, and bails, all use rolls or sections of cylinders round which the wire is bent to give it the proper shape.

3. The templet used for the cutting of gear-teeth; the guide used for giving desired motion to the cutter when forming or cutting irregularly shaped pieces in a profiling-machine.—4. In *elect.*, a frame upon which the coils of certain types of armatures and transformers are wound.—**Line-former,** two concentric strips of brass leads, used by job-printers to keep in proper position lines of type arranged for a curve.—**Molding-former,** an appliance for reproducing the exact form of any molding or irregular surface. It consists of a large number of thin metal strips inclosed in a frame. Placed over the molding, or horizontally against it, the outer ends conform to the surface on which they rest and reproduce its form. A binding-screw holds the strips in place when removed from the molding.—**Slip-roll former,** a former in which one of the rolls can be released from the machine for convenience in slipping the finished blanks off the end of the roll.—**Square-pan former,** a tinman's stake for bending the edges of tin-plate in making baking-pans, etc.

former-wound (fôr′mėr-wound), *a.* In *elect.*, wound upon a former or frame before being mounted: said of certain types of armature-coils.

Formic aldehyde. Same as *formaldehyde*. *Jour. Soc. Chem. Ind.*, XIV. 1070.

formicarious (fôr-mi-kā′ri-us), *a.* [NL. **formicarius*: see *formicarium*.] Belonging to or resembling an ants' nest or formicary. *Annals and Mag. Nat. Hist.*, Oct., 1903, p. 427.

formicary, *n.* **II.** *a.* Of or pertaining to ants or an ant-hill or community: as, *formicary* routine. *The Atlantic*, Feb., 1892, p. 180.

formicate (fôr′mi-kāt), *v. i.*; pret. and pp. *formicated*, ppr. *formicating*. [L. *formicare*, swarm as ants, ⟨*formica*, an ant.] To swarm (in the manner of ants). *Lowell.*

formicide[2], *n.* [NL. **formicida* for **formicicida*, ⟨*formica*, ant, + *cædere*, kill.] One who or that which kills ants; a substance destructive to ants.

In the coffee regions the damage done by them is so serious that the Brazilian Government at one time offered a large premium for a successful *formicida* or ant exterminator.

Van Hise, U. S. Geol. Surv. Monographs, XLVII. 456.

formicivorous (fôr-mi-siv′ō-rus), *a.* [L. *formica*, ant, + *vorare*, devour.] Feeding on ants: a term applied to certain birds and mammals such as the flickers and ant-eaters.

formin (fôr′min), *n.* Same as ★*urotropin*.

forming-machine, *n.*, 2. (*b*) In *hat-making*, a felt-forming machine. It is the second machine used in the process of hat-making and follows the blowing-machine. It consists of an air-tight chamber having an air-inlet at the top and an air-outlet at the bottom. When ready for use a hollow cone or form of perforated metal is placed in the chamber in such a position that it covers the outlet, so that when an air-suction or exhaust is started all the air must be drawn through the perforations of the cone. When the chamber is closed and the exhaust started, a blast, bearing a cloud of loose hair from the blowing-machine, is turned on and the floating hair gathers in a film on the former, being pressed down by the air pressure and held in place by the suction through the perforations. When this film is sufficiently thick, the blast and exhaust are cut off, the chamber is opened, and the former is removed and plunged into water, when the film readily slips off in the shape of a felt cone the exact shape of the former and ready for the next process of working and matting together to form a felt hat-body. See *blowing-machine*.—**Lock-forming machine,** a machine for making the hook or lock on parallel edges of the blanks used in making the bodies of cans. It conveys each blank to the machine, clamps it, forms the hook, and releases and delivers the finished blank at a high speed.

forming-rolls (fôr′ming-rōls), *n.* The rolls used in a forming-machine; also, the machine itself.

forming-tool (fôr′ming-tōl), *n.* In *machine-shop practice*, a shaped cutter used in a lathe to give a special shape or form to a piece of work.

form-maker (fôrm′mā″kėr), *n.* One who works at a brake, in a cracker factory, forming the dough into sheets to be run on the cutting-machine.

formoform (fôr′mō-fôrm), *n.* [*form*(*aldehyde*) + *form*(*ic*).] A dusting-powder consisting of starch, zinc oxid, thymol, and formaldehyde.

formol (fôr′mōl), *n.* Same as ★*formalin*.

formopyrin (fôr-mō-pī′rin), *n.* [*form*(*aldehyde*) + (*anti*)*pyrin*.] A white crystalline compound obtained by the action of formaldehyde on antipyrin. It is antipyretic and antiseptic.

formose (fôr′mōs), *n.* [*form*(*aldehyde*) + *-ose*.] A mixture of at least two substances formed by the polymerization of formaldehyde under the influence of calcium oxid. It contains a sugar, $C_6H_{12}O_6$.

form-quality (fôrm′kwol″i-ti), *n.* In *psychol.*, that which gives to a group of elementary mental processes a certain perceptual or ideational form, or indicates the specific group-arrangement: regarded by certain authors as a positive ideational content, appearing in consciousness together with such ideational complexes as are composed of separable elements, but referred by others to the laws of association and the selective activity of attention. The term was introduced by C. von Ehrenfels in 1890.

In a very great variety of mental complexes, over and above the elements into which the complex falls, there remains, he insists, a mental factor which is a necessary and characteristic feature of the complex,—something which may remain unchanged even though all the elements be altered. This new factor, this 'positive ideational content,' is the *form-quality*.

Amer. Jour. Psychol., XIII. 276.

formula, *n.*—**Cippoletti's, D'Arcy's, Francis's,** etc., **formula,** various algebraic formulæ devised by the

authors whose names are given, to express the quantity of flow of water in terms of length, depth, etc., in a measuring-device.—**Constitutional** or **structural formula,** a formula expressing not only the kind and number of atoms in the molecules of any substance, but also their arrangement or order of attachment to each other. See *graphic formula.*—**Descartes's formula,** in *optics,* the trigonometrical statement of the relation between the angles of incidence (i) and of refraction (r), viz. : $\frac{\sin i}{\sin r} = n$, where n is the index of refraction. This is known as *Snell's law,* but the statement of it in the above form is attributed to Descartes.—**Dimensional formula,** an algebraic expression indicating the manner in which the three fundamental quantities of any system of measurements — usually length, mass, and time — enter into any derived physical quantity. Thus the dimensional formula of a force is LMT^{-2}.—**Euler's formula.** (*b*) In *geom.,* $F + S = E + 2$. In any convex polyhedron the number of faces increased by the number of summits exceeds by two the number of edges.—**Fechner's formula, Fechner's fundamental formula,** in *psychophys.,* the formula $dS = c\frac{dR}{R}$, where *S* stands for intensity of sensation, *R* for stimulus, and *c* for a constant value.—**Fechner's measurement formula, Fechner's metric formula,** in *psychophys.,* the formula $S = k \log \frac{R}{r}$, where *S* is a sensation of given intensity, *k* is a constant value, *R* is the stimulus which evokes *S,* and *r* is the liminal value of this stimulus. If we make $r = 1$, the formula becomes $S = k$ log. *R.*—**Ferrel's gradient formula.** See ★*gradient.*—**Formula of Avernarius,** an empirical formula for the electromotive force of a thermo-electric couple, proposed by M. P. Avernarius of Kief (1863). It has the form

$$E_{(t_1 - t_2)} = b(t_1 - t_2) + c(t_1^2 - t_2^2),$$

where E is the electromotive force, t_1 and t_2 are temperatures of the junctions, and b and c are constants which depend upon the metals employed.—**Formula of Stefan.** See *Stefan's* ★*law.*—**Fourier-Bessel formula,** a formula expressing the algebraic sum of a series of sines and cosines of successive multiples of a unit angle. The coefficients and angles may be so adjusted that the sum total shall represent the observed variations of any natural phenomenon. It serves as an interpolation formula if the observed quantities are not governed by any known law, but as a serial development if the natural law is known.—**Fresnel's formula.** See *reflection* ★*equations.*—**Galton's formula,** a formula of natality (which see) devised by Francis Galton.

If we denote the paternal age by p, the maternal by m, and the degree of natality by n, the formula is

$$m + p + n = 91\tfrac{1}{4}$$
$$n = 91\tfrac{1}{4} - (m + p);$$

that is to say, the natality can with satisfactory reliability be estimated to be equal to the difference between the age of both parents taken together and the number $91\frac{1}{4}$.

Philos. Trans. Roy. Soc. (London), 1895, ser. B, p. 847.

Garrod's formula. See *muscle* ★*formula.*—**Green's formula,** an equation for the distribution of magnetism in a cylinder acted upon by a uniform external force parallel to its axis. It is

$$\lambda = \pi k X p a \frac{e^{\frac{px}{a}} - e^{-\frac{px}{a}}}{e^{\frac{pl}{a}} + e^{-\frac{pl}{a}}},$$

where λ is the linear density of free magnetism at a distance x from the middle of the cylinder, whose radius is a and length 2 l, *k* is the coefficient of magnetization, X the magnetizing force, and p a constant.—**Heron's formula,**

$$\Delta = \sqrt{s(s-a)(s-b)(s-c)},$$

where $s = \frac{1}{2}(a + b + c)$, and $\Delta \equiv$ area of any triangle.—**Holman's formula,** the equation,

$$\Sigma_o^t e = mt^n,$$

which expresses the relation between the electromotive force of a thermo-element and the temperature of the hot junction. In this formula e is the electromotive force for a difference of temperature of 1° C., and t the temperature to be measured, and m and n are constants.—**Hypsometric formula,** the formula $H = \frac{B}{S} \log \frac{B}{y}$, where B is the pressure (in centimeters of mercury) and S the density (referred to mercury) of the air at the earth's surface; H centimeters the height, and y the atmospheric pressure at the elevation H.—**Lambert's formula,** a formula for obtaining the mean wind direction from a table of observed directions, namely,

$$\tan \phi = \frac{E - W + (NE + SE - SW - NW)\cos 45°}{N - S + (NE + NW - SE - SW)\cos 45°},$$

where ϕ is the angle between the north and the mean wind direction measured round by east.—**Le Chatelier's formula.** See *Le Chatelier's* ★*law of radiation.*—**Moseley's formula,** in *naval arch.,* an expression for the dynamical stability or the work done in inclining a vessel to a given angle. It considers the immersed and the emerged wedges of equal volume formed by the load-water planes in the upright and inclined positions and the distances of their centers of volume from the inclined water-plane. The product of the sum of these distances by the ratio of the volume of a wedge to the total volume of the under-water hull is diminished by the product of the versed sine of the angle of inclination and the distance between the center of gravity and the center of buoyancy in the upright position. The resultant quantity multiplied by the displacement or weight of the vessel is the work done in inclining the vessel to the given angle.—**Muscle formula,** a plan devised by A. H. Garrod for expressing by letters and symbols the presence or absence of certain leg-muscles used by him in classifying birds. The letters A B X Y represented respectively the femorocaudal, accessory femorocaudal, semitendinosus, and accessory semitendinosus, while + indicated the presence and – the absence of the ambiens. For example, A B X + showed that the first three muscles and the ambiens were present.—**Nerve formula,** a method of noting the arrangement of the spinal nerves, especially in the lower vertebrates, such as fishes, where some of the nerves of the pectoral and pelvic girdles have been fused, thus lessening their apparent number.—**Neumann's formula.** See *reflection* ★*equations.*—**Phalangeal formula,** a method of expressing the number of joints or phalanges in the digits of either the fore foot or hind foot, the enumeration being from the innermost digit outward.

The *phalangeal formula* is 2, 3, 4, 5, 4.

Osborn, The Reptilian Subclasses Diapsida [and Synapsida.

Poisson's formula,

$$\frac{\partial^2 V}{\partial x^2} + \frac{\partial^2 V}{\partial y^2} + \frac{\partial^2 V}{\partial z^2} = \nabla^2 V = \Delta^2 V = 4\pi\rho,$$

where ρ is a function of x, y, z, the coördinates of a point in space, and V may denote temperature, or concentration of a solution, or electric and magnetic potential, or the Newtonian potential due to an attracting mass, etc.—**Stansfield's formula,** the equation $T\frac{dE}{dT} = aT + b$, which expresses the relation between the electromotive force of a thermo-element, used for the measurement of high temperatures, and the temperature. T is the absolute temperature of the hot junction, E the electromotive force when the cold junction is in boiling water, and a and b are constants.—**Structural formula.** See *graphic formula.*—**Van der Waal's formula.** See *Van der Waal's* ★*equation.*

formulary, *n.* **3.** A collection of medical formulæ.

formulistic (fôr-mū-lis′tik), *a.* [*formula* + *-ist* + *-ic.*] Consisting of a formula; adhering or conforming to some recognized formula; taken from the recognized form or formula.

The sacred myths have a constant bearing upon *formulistic* prayers and observances.

Rep. Bur. Amer. Ethnol., 1897–98, p. 231.

fornix, *n.* **4.** In *topical geom.,* a part of a surface which, in conjunction with another similar part which inseparably accompanies it, increases the cyclosis of the surface by two. If cut away, it would leave two holes in the surface. Viewed from one side of the surface, it appears as a tubular bar (however much distorted or knotted) bridging the space from the edge of one hole to that of the other and leaving a transverse tunnel beneath formed by the twin fornix; while viewed from the other side it appears as a tunnel joining one hole to the other with a transverse bridge above formed by the twin fornix.—**Fornix longus,** a term sometimes used as a synonym for the arched portion of the fornix in the mammalian brain. Certain of the fibers are supposed to originate in the gyrus fornicatus.

fortescue (fôr′tes-kū), *n.* [Appar. from a surname *Fortescue,* whence by a popular adaptation the form *forty-skewer,* as alluding to the many sharp spines. But some consider *forty-skewer* to be the original.] A scorpænoid fish, *Pentaroge marmorata,* found in Australian waters.

Fortescue, or 40-skewer, a fish of New South Wales, Pentaroge marmorata, Cuv. and Val., family Scorpænidæ; called also the Scorpion, and the Cobbler. All its names allude to the thorny spines of its fins. The name *Fortescue* is an adaptation of Forty-skewer by the law of Hobson-Jobson. *E. E. Morris,* Austral English.

Fortification lines, the edge of a zigzag luminous figure sometimes observed subjectively during an attack of megrim.

Fortified milk. See ★*milk.*

fortoin (fôr′tō-in), *n.* [*for*(*maldehyde*) + (*co*)*toin*]. A yellow, tasteless crystalline compound obtained by the action of formaldehyde on cotoin. It is used as an intestinal astringent in diarrhea.

Fort Pierre group. See ★*group*[1].

fortress, *n.*—**The fortress.** Same as ★*Sebastopol.*

fortuitism, *n.* **2.** The doctrine that a tendency in the universe toward a certain direction of development may be accounted for by continual fortuitous changes, combined with an inherent possibility of an indefinite sum of change in the direction which development takes and an inherent impossibility of an indefinite sum of change in the opposite direction. The case is supposed to be analogous to that of a large number of gamblers playing against one another. Some of them are ruined from time to time and drop out of the game; and thus the average capital of those who remain tends to increase.

Fortuitous variation. See ★*variation.*

forty, *n.*—**Half forty.** See ★*half.*

forty-legs (fôr′ti-legz), *n.* An Australian myriapod, *Cermatia* or *Scutigera smithii.*

forty-skewer (fôr′ti-skū′ėr), *n.* Same as ★*fortescue.*

forty-spot (fôr′ti-spot), *n.* A shrike, *Pardalotus quadragintus,* one of the diamond-birds. [Australia.]

forward[1]. **I.** *a.*—**Forward glance,** in *cricket,* a glance-stroke played forward; a stroke by which the ball is turned in its course, usually to the leg side, by playing forward with the surface of the bat held slantwise.—**Forward play,** in *cricket,* the act of stocking or stopping the bowling by stepping forward with the left foot and meeting the ball soon after it has pitched.

II. *n.* In *foot-ball, basket-ball,* and other games, a player in the front line of the team.

forward[1], *adv.* **4.** In *cricket,* in front of the batsman's wicket: said of a fielder's position.

forwarding-yard (fôr′wärd-ing-yärd), *n.* See ★*drill-yard.*

fosfate, fosfatic, etc. Simplified spellings of *phosphate,* etc.

fosforic, fosforus, etc. Simplified spellings of *phosphoric,* etc.

foss, *n.* A simplified spelling of *fosse.*

fossa[1], *n.*—**Amygdaloid fossa,** the interval between the pillars of the fauces occupied by the tonsil.—**Crotaphite fossa.** See ★*crotaphite.*—**Douglas's fossa.** Same as *rectovaginal pouch* (which see, under *pouch*).—**Epigastric fossa.** (*a*) The urachal fossa. (*b*) The pit of the stomach.—**Ethmoid fossa,** a groove on the cribriform plate of the ethmoid bone in which lies the olfactory lobe.—**Eustachian fossa,** a sulcus in the petrous portion of the temporal bone which lodges a part of the Eustachian tube.—**Fossa capitis femoris,** the depression on the head of the femur giving attachment to the ligamentum teres.—**Fossa cerebelli.** See *occipital fossæ.*—**Fossa costalis,** depression on the body of a vertebra where it articulates with one of the ribs.—**Fossa intercondyloidea.** Same as *intercondyloid fossa.* See *intercondyloid.*—**Fossa of Rolando,** a groove which marks the division between the parietal and frontal lobes of the brain.—**Fossa sellæ.** Same as *pituitary fossa.*—**Harderian fossa,** the depression in advance of the orbit in which the Harderian gland is lodged. See *gland.*—**Hypogastric fossa,** a depression on the inner surface of the anterior abdominal wall between the hypogastric folds.—**Hypotrochanteric fossa,** a depression below the trochanter of the femur, well marked in the anthropoid apes and in certain of the lower races of man.—**Intercondyloid fossa.** See *intercondyloid.*—**Lacerate fossa,** an opening in the wall of the orbit of the eye, just above the alisphenoid: more or less irregular in shape, whence the name.—**Mastoid fossa,** a depression for the lateral sinus on the inner surface of the mastoid portion of the temporal bone.—**Mesencephalic fossa,** in *ornith.,* the depression in the cranium which contains the olfactory lobes and adjoining parts of the brain constituting the mesencephalon.—**Metencephalic fossa,** in *ornith.,* the depression in the floor of the cranium which contains the medulla.—**Olfactory fossa,** the depression on the interior of the cranium which contains the olfactory lobes.—**Patellar fossa.** (*a*) See *patellar.* (*b*) A depression in the hyaloid membrane of the eye on a level with the entrance of the optic nerve.—**Popliteal fossa,** the depression on the posterior face of the femur, near its distal end.—**Quadratojugal fossa,** the name given by Pycraft to the triangular space in the skull of a bird, bounded on the outside by the slender quadratojugal, on the inside by the palatine, and in front by the end of the maxillary. *Trans. Zool. Soc. London,* 1900, p. 185.—**Subtrochanteric fossa,** the deep pit on the posterior side of the proximal end of a bird's humerus. When the humerus is pneumatic the pneumatic foramina open in this fossa.—**Supraclavicular fossa.** (*a*) See *supraclavicular.* (*b*) The depression between the sternal and the clavicular origins of the sternomastoid muscle.—**Supracondyloid fossa,** a depression on the femur between the internal tuberosity and the internal supracondyloid tubercle.—**Sylvian fossa,** a depression on the under surface of the brain within the fissure of Sylvius containing the insula.—**Tonsillar fossa.** Same as *amygdaloid* ★*fossa.*—**Urachal fossa,** a depressed space on the inner surface of the anterior abdominal wall between the urachus and the hypogastric artery.

fossette, *n.* **3.** A hollow of considerable depth in the grinding-face of a tooth, more or less completely surrounded by enamel folds: typically shown in such a tooth as the molar of a rhinoceros. See cut under ★*tooth.*

fossiform (fos′i-fôrm), *a.* [L. *fossa,* ditch, + *forma,* form.] Having the form of a fossa or pit; pit-shaped.

Fossil oil, an early name for petroleum. *Dialect Notes,* II. vi.—**Fossil ore.** See *Clinton ore,* under *ore.*—**Fossil rain-marks,** scars made in the soft mud or sand by rain, which, before being obliterated, were covered by a layer of sediment that preserved them, the whole being subsequently compacted into rock.—**Fossil river-channel,** a former river channel buried beneath later formations.—**Fossil water,** water contained in rocks of sedimentary origin, especially that part of such water which is regarded as having been derived from the sea and incorporated in the muds at the time the sediments were laid down.

fossula, *n.* (*b*) In *anat.,* one of the numerous slight depressions on the surface of the brain.

fostite (fos′tīt), *n.* [(*sul*)*phost*(*eat*)*ite.*] A trade-name for cupric sulphate converted into a dusting-powder, for application to plants as a fungicide, by being soaked up in solution by an inert mineral powder, such as soapstone, and dried. Also known as *cupric steatite* and *sulphosteatite.*

F. O. T. An abbreviation of *free on truck.* [Eng.]

Fothergilla (foᵀᴴ-ėr-gil′ä), *n.* [NL. (Murray, 1774), named in honor of John *Fothergill* (1712–1780), an English physician and botanist.] A genus of shrubs of the family *Hamamelidaceæ.* It is distinguished from related genera by having apetalous flowers in terminal spikes, a bell-shaped and 5- to 7-lobed calyx, numerous stamens, and the fruit a 2-partitioned and 2-seeded capsule. There are three species of the southern Alleghany region, two of which, *F. Carolina* (*F. Gardeni* of Murray) and *F. major,* are planted for ornament. The former is sometimes known as *witch-alder.*

fotograf, fotografer, etc. Simplified spellings of *photograph*, etc.

fotometer, fotometric, etc. Simplified spellings of *photometer*, etc.

fototype, fototypic. Simplified spellings of *phototype, phototypic.*

Foucault prism. See ★*prism.*

Foucault's method. See ★*method* and *velocity of* ★*light.*

foujdar (fouj′där), *n.* [Also *fousdar, phousdar;* < Hind. Pers. *faujdār*, a military commander, < Pers. *fauj*, a regiment, + *dār*, one who holds.] Formerly, in Persia, a military officer; in India, under the Mogul government, an officer who had charge of the police and criminal matters. [Anglo-Indian.]

foujdari (fouj-dā′rē), *n.* [Hind. *faujdārī*, < *faujdār:* see *foujdar.*] In India, a local native court of justice.

Foul block, a block in which the rope has jammed.—**Foul chain.** Same as *foul hawse.*—**Foul coast,** a coast which is lined with reefs and breakers.—**Foul ground,** a harbor in which rocks, shoals, or wrecks endanger navigation.—**Foul hand,** in *poker*, a hand containing more or fewer than five cards, any part of which has been lifted or looked at.—**Foul tip,** in *base-ball*, a pitched ball just tipped by the batsman's club, so that its direction and speed are not appreciably altered.—**Foul water** (*naut.*). (*a*) Water in which the bottom mud and sand rises to the surface. See *to make foul water.* (*b*) Water which shows unequal soundings. (*c*) Water resting on a bottom of rocks and shoals.—**Foul wind** (*naut.*), a head wind.

foul-lines (foul′līnz), *n. pl.* In *base-ball*, lines drawn from the outer corner of the home plate along the outer edge of first and third bases to the boundaries of the ground. See *foul*[1], *n.*, 2.

foundation, *n.* 9. In *ship-building*, any part of a ship's structure which is built up or specially reinforced to support heavy weights, as engines and boilers, turrets, guns, boat-cranes, etc.

foundation-bolt (foun-dā′shọn-bōlt), *n.* A large and heavy bolt used to secure the base of steel columns to the foundation stones or to secure heavy machinery to a floor.

foundation-plate (foun-dā′shọn-plāt), *n.* 1. A bed-plate for a steam-engine or heavy machine, usually of cast-iron.—2. An anvil or base-plate upon which ornaments are arranged in a stamping- or embossing-press.—3. A plate used in a foundation which is built up of plates and angles, as the engine foundations in a ship.

foundation-stop (foun-dā′shọn-stop), *n.* See *stop*[1], 6.

founder[3], *v. i.* 4. In *golf*, to drive the ball into the ground by turning in the face of the club when striking.

founder-shaft (foun′dėr-shȧft), *n.* In *mining*, the original shaft for a mine. [Eng.]

foundry-proof (foun′dri-prōf), *n.* The last proof of composed type, supposed to be nearly free from fault. The proof-reader of the printing-house reads it for the detection of unnoticed typographical blemishes. When the type is not electrotyped or stereotyped it is called the *press-proof.*

fountain, *n.* 8. A fountain-shell or watering-pot shell; any shell of the genus *Aspergillum.*—**Fountain decussation,** a decussation of nerve-fibers of the crura cerebri beneath the posterior longitudinal fasciculus.

fountain-brush (foun′tȧn-brush), *n.* A marking, painting, or stenciling brush having a reservoir in the handle for ink or paint. Pressure upon a button at the end of the handle releases enough ink to wet the brush. When the brush is worn out it can be removed from the handle and a fresh brush affixed.

fountain-dues (foun′tȧn-dūz), *n. pl.* *Naut.*, the amount of money charged against a vessel for furnishing her with fresh water while in harbor and filling her water-tanks for sea.

fountain-pump (foun′tȧn-pump), *n.* A pump for throwing a spray like a fountain, for use on a lawn or for spraying trees.

fountain-syringe (foun′tȧn-sir″inj), *n.* A rubber bag terminating in a flexible tube, with appropriate tip for the administration of urethral, vaginal, or rectal injections.

fountain-tree (foun′tȧn-trē), *n.* The deodar, *Cedrus Deodara.* See *deodar.*

Fouquieriaceæ (fō-ki-ā-ri-ā′sē-ē), *n. pl.* [NL. (Dumortier, 1829), < *Fouquieria* + *-aceæ.*] A family of dicotyledonous choripetalous plants of the order *Hypericales*, consisting of the single genus *Fouquieria* (which see).

fouquieriaceous (fō-ki-ā-ri-ā′shius), *a.* Belonging to the plant family *Fouquieriaceæ.*

four, *n.* 7. In *cricket*, a boundary; also, a ball hit by the batsman, which reaches the boundary, thus scoring four runs. See ★*fourer.* *Hutchinson*, Cricket, p. 314.—**Four up and three to play,** in *golf*, noting the score of a player when he has four holes to the good, and there remain only three holes to be played: he wins the match.—**Long fours,** candles about eight inches long, weighing four to the pound.—**Short fours,** candles from four to five inches long, weighing four to the pound.

fourchette, *n.* 5. The combination in one hand of the cards immediately above and below the one led, such as queen and 10 over a jack.—**Imperfect fourchette,** the combination in one hand of the card immediately above and that next below the card led: as, queen, 9 on a jack led.

fourchite (fōr′shīt), *n.* [*Fourche* Mountain, Arkansas, + *-ite*[2].] An olivin-free monchiquite; a dark porphyry or non-porphyritic aphanite with hornblende or pyroxene in a more or less glassy ground-mass. It occurs in dikes.

four-coupled (fōr′kup″ld), *a.* Having four driving-wheels coupled or connected by side-rods, as the standard American passenger-engine which has two such drivers on each side.

four-course (fōr′kōrs), *n.* In *farming*, a course of crop-rotation which is completed in four years. See *rotation of crops*, under *rotation.*

four-cut (fōr′kut), *a.* Cut into four parts, as a piston-ring.

four-cycle (fōr′sī″kl), *n.* Same as *four-phase cycle* (which see, under *internal-combustion* ★*motor*).

four-cylinder (fōr′sil″in-dėr), *a.* Having four cylinders, either working together or each one working separately from the others.

Fourdrinier machine. See ★*paper-machine.*

fourer (fōr′ėr), *n.* [*four* + *-er*[1].] In *cricket*, a four; a ball hit by the batsman, which reaches the boundary, thus scoring four runs. *H. R. Lyttelton*, Cricket and Golf, p. 14.

four-horned (fōr′hôrnd), *a.* Having four horns, as the Quito sheep, or the four-horned antelope, *Tetraceros quadricornis*, of India.

Fourier-Bessel formula. See ★*formula.*

four-in-hand. I. *n.* 3. A long scarf or necktie. One of the ends (which are broader than the center which surrounds the neck) is wound over the other, passed up between the neck and the tie, and then brought down in front through the loop thus formed.

II. *a.*—**Four-in-hand coach,** a heavy coach, with square boot and box, and fitted with roof-seats on the main body, a driver's seat on the box, and a footman's seat on the boot; a gentleman's drag, wrongly called a *tally-ho* (a name given to an individual coach introduced into New York by Colonel Kane, about the year 1876).—**Four-in-hand harness,** a set of harness for four horses—two leaders and two at the pole. The standard pattern is without breechings. The pole-team have pads: these may be omitted on the leaders. The bridles of the pole-team are fitted with rein-rings to support the lead-reins.

four-o'clock, *n.*—**Californian four-o'clock,** *Mirabilis Californica* of southern California, a species with numerous small flowers resembling diminutive azaleas. *Parsons and Buck*, Wild Flowers of California, p. 208.—**Four-o'clock family,** the plant family *Nyctaginaceæ.*

four-on (fōr′on), *a.* Said of an arrangement of pages for presswork by which four copies in quadruplicate can be printed together on the same sheet by the same operation. See ★*two-on.* *De Vinne*, Mod. Book Composition, p. 349.

four-phase (fōr′fāz), *a.* Having four phases or conditions; in gas-engines, four-cycle.

foursome, *a.* II. *n.* A golf match in which four persons engage, two playing against the other two.

foursquare, *a.* II. *n.* A figure with four equal sides.

fourteener (fōr′tēn″ėr), *n.* A line of poetry of fourteen syllables. *G. Saintsbury.*

fourth. I. *a.*—**Fourth state of matter.** See ★*matter.*

II. *n.*—**Fourth best,** in *whist* and *bridge*, the fourth card of any suit counting from the top: the modern substitute for the penultimate and antepenultimate.

four-toes (fōr′tōz), *n.* The plantain-leaf everlasting, *Antennaria plantaginifolia.* Also called *dog-toes* and *pussy-toes.*

Fovea canina. Same as *canine fossa* (which see, under *canine*).—**Fovea capitis femoris.** Same as ★*fossa capitis femoris.*—**Fovea ischiadica,** in *ornith.*, the most evident depression on the lower side of the pelvis, lying just in advance of the first true sacral vertebra.—**Fovea jugularis,** the depression at the root of the neck between the sternal origins of the sternomastoid muscles.—**Fovea lumbalis,** in *ornith.*, a small depression on the under side of the anterior part of the ilium.—**Fovea navicularis.** Same as *navicular fossa* (which see, under *navicular*).—**Fovea nuchæ,** the groove at the back of the neck just below the skull.—**Fovea pharyngis.** Same as *Rosenmüller's fossa.*—**Fovea pudendalis,** in *ornith.*, that depression on the under side of the pelvis of a bird which lies just back of the first sacral and is crossed by the transverse processes of the sacrals.—**Fovea triangularis.** Same as *ventricle of Arantius.*

foveation (fō-vē-ā′shọn), *n.* [*foveate* + *-ion.*] The formation or the presence of pits, noting this phenomenon in the pock-mark or vaccination-scar. *Biometrika*, Feb., 1903, p. 137.

foveiform (fō′vē-i-fôrm), *a.* Having the character of a pit, depression, or fovea.

foveolated (fō′vē-ọ̄-lā-ted), *a.* Same as *foveolate.*

foveolate-punctate (fō′vē-ō-lat-pungk″tāt), *a.* In *entom.*, punctured with foveolæ, as the elytra of certain beetles.

fowl[1], *n.*—**Hollow fowl,** "poultry, rabbits, etc.; any meat not sold by butchers." *Halliwell.*

fowl-mite (foul′mīt), *n.* See ★*chicken-mite.*

fowl-pock (foul′pok), *n.* Same as ★*hen-pox.*

fowl-tick (foul′tik), *n.* Either *Argas persicus* of South Africa, or *Argas miniatus* of America, giant mites which attack chickens.

Fowl-tick (*Argas miniatus*). Ventral view, highly magnified. (Marx, U. S. D. A.)

fox[1], *n.* 5. A drain carried under another watercourse by means of a depressed culvert forming an inverted siphon. Commonly called a *dip-culvert* or a *dive-culvert.*—6. One of the northern constellations (Vulpecula), situated between the constellations of the Swan and the Dolphin.—7. [Tr. G. *fuchs.*] A freshman in a German university. [Not used in American colleges.]

A duel was going on between two Füchse (Freshmen). . . . The two "*foxes*" fought out their time and were released, greatly to their own satisfaction.
J. M. Hart, German Universities, pp. 71, 72.

fox-chop (foks′chop), *n.* A cultivated form of the dog's-chop, *Mesembryanthemum caninum.*

fox-farming (foks′fär-ming), *n.* The industry of rearing the blue or arctic fox (*Vulpes lagopus*) for its valuable skin. Uninhabited islands of the Aleutian chain in Alaska are used for the purpose, the animals being allowed to run wild. The only care given them consists in supplying them with food, and they are trapped as in the wild state.

fox-feet (foks′fēt), *n.* The fir club-moss, *Lycopodium Selago.*

foxglove, *n.* 4. The pitcher-plant, *Sarracenia purpurea.*—5. The trumpet-creeper, *Campsis radicans.*—**American foxglove,** *Dasistoma Pedicularia*, a large, much-branched, viscid-hairy herb of eastern North America, with broad twice-pinnatifid leaves and large yellow flowers resembling those of the foxglove in shape.—**Blue foxglove,** the throatwort, *Campanula Trachelium.* See *throatwort*, 1.—**False foxglove.** (*b*) Any species of *Dasistoma*, American plants with large yellow flowers, related to the foxglove. *D. flavum* is the *downy false foxglove; D. lævigatum,* the *entire-leaved foxglove; D. Pedicularia,* the *fern-leaved foxglove; D. Virginicum,* the *smooth foxglove;* and *D. grandiflorum,* the *western false foxglove.*—**Ladies'-** or **lady's-foxglove,** the mullen, *Verbascum Thapsus.*—**Lousewort foxglove,** the American lousewort, *Pedicularis Canadensis.*—**Mullen foxglove.** (*b*) *Digitalis Thapsi*, native in Spain.—**West Indian foxglove,** the Spanish calalu, *Phytolacca octandra.*—**White foxglove,** the haskwort, *Campanula latifolia.* See *haskwort.*—**Yellow foxglove,** the downy false foxglove, *Dasistoma flavum.*

fox-grass (foks′gràs), *n.* See *salt-marsh* ★*grass.*

fox-head (foks′hed), *n.* 1. The head of a fox.—2. A drinking-cup in the form of the head of a fox, suggested by the Grecian rhyton. Such cups were made by European potters in the latter part of the eighteenth century.

Fox Hills group. See ★*group*[1].

fox-key (foks′kē), *n.* A split key into the end of which is driven a thin wedge of steel to prevent it from working out.

fox-poison (foks′poi″zn), *n.* The spurge-laurel, *Daphne Laureola.*

foxtail, *n.*—**Alpine foxtail,** *Alopecurus alpinus*, an erect short-headed species which occurs in the arctic regions of both hemispheres.—**Branching foxtail,** *Chætochloa composita*, a stout species with a bristly, branching panicle. It extends from the West Indies into southern Florida. The name has also been applied to one of the windmill-grasses, *Chloris verticillata.*—**Bristly foxtail,** *Chætochloa verticillata*, a species with rather short adhesive awns, a weed found sparingly in waste places. Sometimes also the Hungarian grass *C. Italica.*—**Floating foxtail,** the water-foxtail, *Alopecurus geniculatus*, a species widely diffused in Europe, Asia, and North America, affording excellent grazing in wet places.—**Large foxtail,** in California, the larger species of barley-grass, *Hordeum*, more properly called *squirrel-tail.*—**Meadow-foxtail,** a pasture-grass, *Alopecurus pratensis*, native in Europe and introduced into North America. It is valuable in mixtures for pasture in moist ground on account of its earliness and other good qualities. Its heads, like those of other species of the genus, suggest a small timothy. See cut on following page.—**Mountain foxtail,** *Alopecurus occidentalis*, an erect species growing in mountain meadows of the Rocky Mountains, occasionally abundant and yielding a fine, long, bright-colored hay. The heads are thicker and shorter than those of the meadow-foxtail.—

Small foxtail, in California, the smaller species of *Hordeum*. See *large* ★*foxtail*. — **Smooth foxtail,** *Chætochloa imberbis*, a species somewhat resembling the yellow foxtail, but easily distinguished by its longer bristles and by its rootstocks. It is widely diffused in several varieties, being found in the southeastern United States, the West Indies, and Mexico. — **Western foxtail.** Same as *mountain* ★*foxtail*. — **Yellow foxtail,** *Chætochloa glauca*, a very common grass of mild latitudes, appearing as a weed in cultivated ground. Also known as *pigeon-grass* (which see). See cut at ★*Chætochloa*.

Meadow-foxtail (*Alopecurus pratensis*). *a*, plant, one fourth natural size; *b*, spikelet; *c*, flowering glume; *d*, stamens and pistil. (*b*, *c*, and *d* slightly enlarged.)

foxtail-pine (foks′tāl-pīn′), *n.* **1.** See *foxtail-pine*, under *pine*[1]. — **2.** *Pinus Balfouriana*, a small tree of the northwestern United States, resembling *P. aristata*, but having the scales destitute of prickles. — **3.** The loblolly-pine, *Pinus Tæda*.

foxy[1], *a.* **4.** In *painting*, marked by a disagreeable, hot quality of color. — **5.** Penetrating and well acquainted with the ways of the world; sharp; especially, having an air of knowingness: it then signifies a not very estimable character.

F. P. An abbreviation of *fire-plug*.

F. P. S. An abbreviation (*a*) of *Fellow of the Philological Society*; (*b*) of *Fellow of the Philosophical Society of Great Britain*.

Fr. An abbreviation (*b*) of *France*; (*c*) of *Friday*.

fractabling (frak′ta-bling), *n.* A coping, as of a fractable, but the term often extended to include the coping of any wall.

fractile (frak′til), *a.* [L. *fractus*, broken, + *-ile*.] That may be broken or cleft; pertaining to breakage or cleavage.

fraction, *n.*, **4.** In *math.*: (*c*) In *geom.*, any multiple of any submultiple of a magnitude. — **5.** In *chem.*, one of the parts into which a substance is separated in the process of fractional distillation. See *fractionation*. — **Continued fraction of the second order,** a fraction whose numerator and denominator are themselves continued fractions. See *continued fraction*, under *continued*. — **Ordinal fraction,** a mark for an object interpolated in a natural series or row.

fraction (frak′shon), *v. t.* [*fraction*, *n.*] Same as *fractionate*.

Although the gas contained so little silicon hydride, they succeeded in *fractioning* it.
Amer. Chem. Jour., March, 1903, p. 282.

Fractional crystallization, diffusion, equation, function, number. See ★*crystallization*, etc.

fractionate, *v. t.* — **Fractionating tube.** See ★*tube*.

fractionator (frak′shon-ā-tor), *n.* In *chem.*, an apparatus for fractional distillation.

fracto-cumulus (frak′tō-kū″mū-lus), *n.*; pl. *fracto-cumuli* (-lī). A ragged cumulus; an ill-defined cloud in the first stage of condensation and representing the tops of small, low atmospheric waves due to rapid winds near the surface of the ocean or land; scud. The fracto-cumulus is, relatively speaking, a low cloud, lying some distance below the flat base of the ordinary cumulus. See ★*cloud*[1], 1.

fracto-nimbus (frak′tō-nim″bus), *n.*; pl. *fracto-nimbi* (-bī). An ill-defined, ragged, or broken cloud from which rain falls or is threatening to fall. See ★*cloud*[1], 1.

fracto-stratus (frak′tō-strā″tus), *n.*; pl. *fracto-strati* (-tī). The edge of a stratus cloud which is disappearing through the evaporation of its moisture, leaving only ragged portions which soon disappear. See ★*cloud*[1], 1.

fracture, *n.* **4.** In *phonol.*, same as *breaking*, 2. *A. L. Mayhew*, Old Eng. Phonol., V. i. § 81. — **Barton's fracture,** fracture of the lower articular end of the radius. — **Bennet's fracture,** a fracture of the first metacarpal bone. — **Complicated fracture,** a fracture associated with injury to other structures, such as an important nerve or a large blood-vessel. — **Depressed fracture,** a fracture in which the broken part is sunken below the general surface of the bone: noting usually a common form of fracture of the skull. — **Extracapsular fracture,** fracture of a bone, such as the hip-bone, near the joint but outside of the capsular ligament. — **Fracture fever.** See ★*fever*[1]. — **Hickory-stick fracture.** Same as *greenstick fracture*. — **Incomplete fracture,** a fracture in which the bone is not broken entirely across: a greenstick fracture is of this nature. — **Intra-articular fracture,** a fracture involving the articular surface of the bone. — **Intracapsular fracture.** See *intracapsular*. — **Linear fracture,** a fracture running lengthwise of the bone. — **Multiple fracture,** fracture of several bones or of one bone in several places. — **Silver-fork fracture.** Same as *Colles's fracture*. — **Spontaneous fracture,** a fracture produced by a very slight force, such as simple muscular contraction, due to abnormal brittleness of the bone or to its partial destruction by a cancer or other lesion. — **Sprain fracture,** rupture of a tendon from its point of attachment to the bone, a splinter of the latter being torn away with the tendon. — **Willow fracture.** Same as *greenstick fracture*. — **Zone of fracture,** a name suggested by C. R. Van Hise for the outer portion of the earth's crust, in which the deformation of rocks produces fractures and open cavities. As the depth increases and the load becomes greater, weak rocks, such as shales, can at 500 meters no longer maintain cavities, and the limit of resistance of even the firmest granites is reached at 10,000 meters, or the *zone of* ★*flowage* (which see). Between these limits lies the mixed zone of fracture and flowage, embracing rocks of variable resistance.

frænum, *n.* See *frenum*.

fragarianin (frā-gā′ri-a-nin), *n.* [*Fragaria* + *-in*[2].] A glucoside found in the roots of *Fragaria vesca*.

fraghan (frân), *n.* [Also *frawn*, representing, respectively, the spelling and the present pronunciation of Ir. *fraochan*, the plural of *fraochag*, a whortleberry, < *fraoch*, heath.] The whortleberry, *Vaccinium Myrtillus*.

fragil, *a.* A simplified spelling of *fragile*.

fragilin (fraj′il-in), *n.* [L. *fragilis* (see def.) + *-in*[2].] A compound crystallizing in red or reddish-yellow needles and found in *Sphærophorus fragilis*.

fragilitas (frā-jil′i-tas), *n.* [L.] Brittleness. — **Fragilitas crinium,** brittleness of the hair. — **Fragilitas ossium,** a condition in which the bones break very easily, sometimes as a result of simple muscular action.

fragm., frgm. Abbreviations (*a*) of *fragment*; (*b*) of *fragmentary*.

fragment (frag′ment), *v. i.* [*fragment*, *n.*] To break up into pieces: said of a cell-nucleus or nucleolus that breaks up amitotically into two or more pieces of unequal size.

fragmental, *a.* **2.** Same as *clastic*.

fragmented (frag′men-ted), *p. a.* Broken into fragments; specifically, in *biol.*, broken or separated into parts each of which forms a new individual. See *fragmentation*.

A few streptococci and isolated filaments are found in the exudate of the catarrhal bronchitis and in the alveoli filled with *fragmented* leukocytes and organizing exudate.
Jour. Exper. Med., Oct. 25, 1900, p. 162.

Fragrant fern. See ★*fern*.

frail[2], *n.* **4.** A wooden carrier or crate used by glaziers to carry sheets of glass. [Eng.]

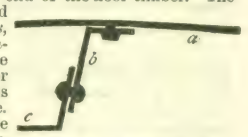
frailejon (frā-ē-lā-hōn′), *n.* [S. Amer. Sp., aug. of Sp. *fraile*, a friar: see *friar*. The name alludes to some fancied resemblance of the plant to a friar with his gown and cowl.] A general name for a growth of peculiar tall composite plants belonging to the paramos of the equatorial Andes. Their densely hairy ensiform leaves are as long as the arm and form rosettes, sometimes pressed to the ground, sometimes crowning a massive stem clad with dead leaf-bases.

fraising-machine (frā′zing-ma-shēn″), *n.* A profiling-, forming-, or routing-machine used in roughing out the carving or shapes on such articles as canes, umbrella-handles, and chair-legs.

fraktur (fräk-tör′), *n.* [G., < L. *fractura*, breaking: see *fracture*.] In *printing*, the form of pointed letter used in ordinary German books and newspapers. It differs from the older German black-letter in the greater stiffness and similarity of the shapes, and in the points or finials with which it bristles. Though black and forbidding, fraktur is a thin character. The small letters are about one fifth narrower than roman letters of same size of body. *DeVinne*, Mod. Book Composition, p. 253.

This is Fraktur Type.

F. R. A. M. An abbreviation of *Fellow of the Royal Academy of Music*.

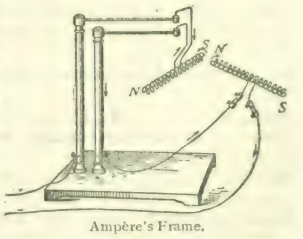


frambœsial (fram-bē′si-al), *a.* [*frambœsia* + *-al*[1].] Relating to or of the nature of frambœsia or yaws. *Lancet*, May 30, 1903.

frambœsiform (fram-bē′si-fôrm), *a.* Resembling frambœsia or yaws.

frame, *v. t.* **7.** In *ship-building*, to erect and adjust the frames of (a vessel) in place above the keel on the building-slip.

frame, *n.*, **5.** (*b*) In *ship-building*, one of the ribs or transverse members which extend up on each side of the keel and support the outside planking or plating. In a wooden vessel a frame is made up of curved pieces of timber. The lowest piece is the *floor-timber*, which extends across the keel.



The next piece is the *first futtock*, the lower part of which laps on one side of the floor, and the upper part laps on the side of the *second futtock*, the lower end of the latter butting against the upper end of the floor-timber. The successive pieces are called *third*, *fourth*, etc., *futtocks*, and the last the *top-timber*. The various pieces are through-bolted to each other across the central joint, thus forming the complete frame. In iron and steel vessels the frames are of the most varied construction, owing to the ease with which the material can be worked into various forms. The simplest is that consisting of a frame angle-bar, a reverse frame angle-bar, and a floor-plate. In the upper part of the frame the frame-bar and reverse frame-bar are riveted back to back, as shown in the section. This is called a *built frame*. In the lower part the two bars are spread apart and riveted to the floor-plate interposed between them. (See cut under *floor*, 5.) In modern steel vessels, particularly men-of-war, a single piece, as a channel-bar, bulb-angle, or Z-bar, takes the place of the frame-bar and reverse frame-bar. This is called a *solid frame*. In vessels with a double bottom the frame in the lower part becomes a part of the cellular bottom and is a more complex structure. (See cut under ★*bottom*.) The frame of a protected cruiser with double bottom is shown under *frame*, 5. In large merchant steamers with double bottoms a generally similar construction is adopted. The upper part of the frame is a piece separate from that in the bottom, and it is secured to the margin-plate by a bracket and gusset. (See cut under ★*bracket*[1].) Other forms of frames are used in vessels in various places. (See *deep* ★*frame*, ★*belt-frame*, ★*web-frame*.) The deep longitudinal members in the framework of the double bottom are sometimes called *longitudinal frames*, but more usually *longitudinals*. A *boss-frame* is one of the frames at the stern which are curved out around the stern-tube. The *transom-frame* is that at the stern-post in vessels having an overhanging stern. It has a very deep floor which is riveted to the upper interior part of the stern-post, and the radiating *stern-frames* abaft it, forming the contour of the stern, are secured to it at their heels.

Cross-section of ordinary Frame. *a*, outside plating; *b*, frame angle-bar; *c*, reverse frame-bar.

6. (*g*) In *bee-keeping*, an open four-cornered box, readily removed from the hive, in which the bees construct their combs. (*h*) In *printing*, same as *composing-stand*.

10. In *bowling* or *tenpins*, a division of the game through which a player continues at one setting of the pins. Three balls usually constitute a frame. — **11.** In *pool*: (*a*) The triangle used to spot the balls in pyramidal form at pyramid, continuous, following, and fifteen-ball pool and their offshoots. (*b*) The leg or game played with such a set of balls at all except continuous pool. — **Ampère's frame,** a support for a couple of wire helices through which an electric current is made to pass. The coils then behave as if they were magnets. Wires bent in other forms may be similarly suspended. — **Deep frame,** in *iron ship-building*, one of the frames in the side of a cargo-vessel which has no lower deck or hold-beams. In such vessels the frames are about 50 per cent. deeper transversely than in a similar vessel with hold-beams or lower deck. — **Frame angle-bar,** in *iron ship-building*, the outer bar of a frame to which the outside plating is riveted. See ★*frame*, 5 (*b*). — **In frame,** in *ship-building*, said of a vessel of which the frames are erected and regulated in place on the building-slip before the outside planking or plating is put on. — **Intermediate frame,** in *ship-building*, an extra frame for additional strength placed between two of the regularly spaced frames of a vessel. — **Square frame,** in *ship-building*, one of the frames which stand square across the central plane of the vessel, as distinguished from a cant-frame or cant. The greater part of the frames of all vessels are square frames, and in modern iron and steel vessels, in which the material used permits beveling without loss of material, nearly or quite all are square frames.

Ampère's Frame.

frame-angle (frām′ang″gl), *n.* Same as ★*frame angle-bar*.

frame-bar (frām′bär), *n.* Same as ★*frame angle-bar*.

frame-hive (frām′hīv), *n.* A beehive so constructed as to contain movable frames.

frame-lifter (frām′lif″tėr), *n.* A strip of lace, attached to the glass frame of a carriage, by which it is lifted out of its bed in the door or body.

frame-liner (frām′lī″nėr), *n.* See ★*liner*[2], 5.

frame-plate (frām′plāt), *n.* A rolled plate forming the web of the side-frame for a locomotive.

frame-slotter (frām′slot″ėr), *n.* A slotting-machine especially adapted for finishing the side-frames of locomotives.

Frame-slotting machine. See ★*slotting-machine*.

frame-work, *n.* **4.** Spinning done on a throstle- or ring-frame; also, knitting done on a stocking-frame.

framing-piece (frām'ing-pēs), *n.* A straight piece of wood placed at the center of a carriage head at right angles with the axle and extending from the front of the fifth wheel-plate to the horn-bar.

franceschino (frän-ches-kē'nō), *n.* [It., < *Francesco*, Francis.] A Tuscan silver coin of the value of 5 paoli.

francescone (frän-ches-kō'ne), *n.* [It., < *Francesco*, Francis.] The silver ecudo of Francis of Lorraine, who died in 1737, equal to 10 paoli or 6⅔ lire.

franchise, *n.*—**Municipal franchise.** (*a*) A legislative grant or charter by which a municipality, as a city, town, village, etc., is organized and empowered to make laws or ordinances for its own government. (*b*) A privilege or grant extended by a municipal corporation to a private corporation or person, as the right to maintain a street-railway, to use streets for water- or gas-mains, etc.

francisc (fran-sisk'), *n.* [*francisca.*] Same as *francisca.*

Franckean (frank'ē-an), *a.* Of or pertaining to the work or opinions of A. H. Francke, one of the leaders in the Pietist movement in Germany at the beginning of the eighteenth century.

franckeite (frang'kā-īt), *n.* [Named after Carl and Ernest *Francke*, mining engineers.] A sulphid of antimony, tin, and lead, containing also small amounts of silver and germanium, found in the mining region of Las Animas, Bolivia.

Franco-Annamese (frang″kō-an-a-mēs'), *a.* and *n.* **I.** *a.* Pertaining to both France and Annam.

II. *n.* A person of mixed French and Annamese descent.

Franco-Canadian (frang″kō-ka-nā'di-an), *a.* and *n.* **I.** *a.* Pertaining to both France and Canada.

II. *n.* A person of mixed French and Canadian-Indian descent. [Rare.]

Francophil, Francophile (frang'kō-fil), *a.* and *n.* [NL. *Francus*, French, + Gr. *φίλος*, loving.] **I.** *a.* Very friendly to France or the French.

The *Francophil* attitude of Italy towards the end of the Franco-German war. *Encyc. Brit.*, XXIX. 634.

II. *n.* One who is very friendly to France or the French.

Francophobe (frang'kō-fōb), *n.* [NL. *Francus*, a Frenchman, + Gr. *-φοβος*, < *φοβεῖν*, fear.] One who is possessed with a morbid fear of the French. *N. E. D.*

Francophone (frang'kō-fōn), *n.* [NL. *Francus*, French, + Gr. *φωνή*, sound.] One who speaks the French language. *Deniker*, Races of Man, p. 508.

frangulic (frang'gū-lik), *a.* [*frangul-in* + *-ic.*] Of or pertaining to frangulin.—**Frangulic acid**, a brownish-yellow crystalline compound, $C_{14}H_8O_4$, isomeric with alizarin.

Frankfort agreement. See ★*agreement.*

frankfurter (frangk'fėr-tėr), *n.* [G. *Frankfurter wurst*, 'Frankfort sausage.'] A highly seasoned variety of German sausage.

frankincense, *n.* **1.** The principal trees yielding resinous exudations known as frankincense are: (*a*) *Boswellia Carterii* (see *Boswellia*); (*b*) the Norway spruce, *Abies Picea*; (*c*) the loblolly-pine, *Pinus Tæda* (see *frankincense*, 2); and (*d*) *Styrax punctata* (see *Styrax*).—**West African frankincense.** Same as ★*bumbo*[2]. See also *bungo-tree.*

franking-machine (frang'king-ma-shēn″), *n.* A machine for cutting the ends of the bars for a window-sash in such a way as to give the joints the appearance of mitered joints.

Frankist (frang'kist), *n.* One of a semi-Christian sect of Jews founded by Jacob Frank (1712–91) in the province of Podolia, Poland. The Frankists are also called *Zoharites*, because they rejected the teachings of the Talmud and accepted for their guide the mystical doctrines of the cabala of the Zohar, or "book of splendor."

franklin[2] (frangk'lin), *n.* A Franklin stove. See *stove.* *Lowell*, Fritz Adam's Story.

Franklinia (frangk-lin'i-ạ), *n.* [NL. (Bartram, 1785), named in honor of Benjamin *Franklin* (1706–90), the American statesman and scientist.] A genus of plants of the family *Theaceæ*, closely related to *Lasianthus* and by some authors united with it. *F. Altamaha* (*Gordonia pubescens* of L'Héritier), the only species (discovered by the Bartrams on the Altamaha river in Georgia), is now known only in cultivation. It is a small tree with lustrous foliage and white magnolia-like flowers.

Franklinist (frangk'lin-ist), *n.* An electrician who advocated the one-fluid theory of electricity originated by Benjamin Franklin.

The terms Franklinism, *Franklinist* and the Franklinian system occur in almost every page. *Priestley*, Hist. of Electricity, I. 193.

frank-tenure (frangk'ten″ūr), *n.* In *feudal law*, a holding in frank-fee.

frappé, *a.*—**Café frappé**, black coffee and cream, taken in equal quantities, mixed and sweetened, and frozen.

F. R. A. S. An abbreviation of *Fellow of the Royal Astronomical Society.*

frasco (fräs'kō), *n.* [Sp., a flask: see *flask.*] A liquid measure used in some Spanish-American countries, equal to about 2½ United States quarts.

frase, *n.* and *v.* A simplified spelling of *phrase.*

fraseologic, fraseologist, etc. Simplified spellings of *phraseologic*, etc.

Fraser-Mortimer variation. See ★*variation.*

Fraser's attack. See ★*attack.*

frasil, *n.* See *frazil.*

Frasnian (fras'ni-an), *a* and *n.* [F. *Frasnes*, a town of Belgium.] **I.** *a.* In *geol.*, of or pertaining to the lower division or stage of the Upper Devonian in Belgium and northern France.

II. *n.* The Frasnian division.

frass (fräs), *n.* [G. *frass*, food for swine, nasty food (OHG. *frāz*, food), < OHG. *frezzen*, G. *fressen*, = AS. *fretan*, eat, devour: see *fret*[1].] The excrement of a larval insect.

frate (frä'te), *n.* [It., < L. *frater*, brother: see *friar.*] An Italian friar or monk.

fraternalism (frā-tėr'nal-izm), *n.* [*fraternal* + *-ism.*] The character of being fraternal; specifically, the cultivation and safeguarding of that fraternity, or brotherhood of an entire people, demanded by the French revolutionists.

In a New Zealand aiming to realize a democratic *fraternalism*, conscience strikes its high noon. *E. A. Ross*, Social Control, p. 53.

fraternity, *n.*—**Greek-letter fraternity**, in the United States, a (generally) secret society, formed among undergraduate collegians, chiefly for social purposes, and designated by two or more letters of the Greek alphabet. A fraternity usually consists of several 'branches or chapters' situated in the various colleges. Many have large and costly 'fraternity houses.' Membership does not terminate on graduation.

Fratricellians (frat-ri-sel'i-ạnz), *n. pl.* Same as *Fraticelli.*

frau (frou), *n.* [G., = D. *vrouw*, etc.: see *frow*[1].] In German use, a woman; a married woman; a wife; lady; as a title, Madame; Mrs.: as, *Frau* Schultze.

fraud, *n.*—**Badge of fraud.** See ★*badge*[1].—**Fraud order**, in *postal service*, an order from some postal authority to a local postmaster suspending the delivery of mail-matter to any party known or suspected of using the mails for illegal purposes.

fräulein (froi'līn), *n.* [G., < *frau*, woman, lady, + dim. *-lein.*] In German use, an unmarried woman; a young lady; as a title, Miss: as, *Fräulein* von Reuter.

frazzle (fraz'l), *v.*; pret. and pp. *frazzled*, ppr. *frazzling.* [Also *frazle*; orig. E. dial., a var. of *fasel*, E. dial. *fazle*, *fazzle*, *farzel*, *v.*, perhaps by association with *fray*[2], *v.*] **I.** *intrans.* To ravel out, as the edge of a fabric; unravel; fray.

II. *trans.* To wear, as by hard usage, into shreds, rags, or tatters; fray out; tear to pieces. [Prov. Eng. and U. S.]

frazzle (fraz'l), *n.* [*frazzle*, *v.*] A shred; a tatter; a frayed rag; a frayed or worn-out condition: as, to be worn to a *frazzle.* [Prov. Eng. and U. S.]

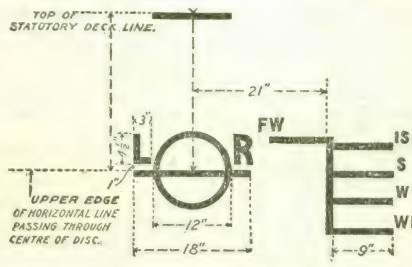
F. R. C. I. An abbreviation of *Fellow of the Royal Colonial Institute.*

F. R. C. O. An abbreviation of *Fellow of the Royal College of Organists.*

F. R. C. P. An abbreviation (*a*) of *Fellow of the Royal College of Physicians*; (*b*) of *Fellow of the Royal College of Preceptors.*

F. R. C. P. E. An abbreviation of *Fellow of the Royal College of Physicians, Edinburgh.*

F. R. C. S. (E., I., or L.) An abbreviation of *Fellow of the Royal College of Surgeons* (*of Edinburgh, of Ireland*, or *of London*).



F. R. C. V. S. An abbreviation of *Fellow of the Royal College of Veterinary Surgeons.*

freckle, *n.*—**Cold freckle**, a spot similar to a freckle occurring on a portion of the skin not exposed directly to the light.

free, *a.* **19.** In *hort.*, abundantly blooming or fruiting; also, of profuse and rapid growth.—**Free association**, in *exper. psychol.*, an association freely effected by the observer, in an experiment upon the association of ideas—effected, that is, in terms of his mental constitution and existing stock of ideas, without restraint or suggestion from the side of the experimenter: opposed to ambiguous or partially constrained and to univocal or constrained associations. *E. B. Titchener*, Exper. Psychol., II. i. 192.—**Free cheeks, hit, idea**, etc. See ★*cheek*, etc.—**Free coinage**, a phrase denoting that the mint is open to any one who may bring bullion to be coined. The United States mint is now closed to the free coinage of silver.—**Free Methodist Church.** See *Free Methodists*, under *Methodist.*—**Free of general and particular average**, in *marine underwriting*, a clause limiting liability to total loss. See *average.*—**Free overside**, in *com.*, free of all charges down to the moment of discharge: said of merchandise bought for import: same as ★*ex ship.*—**Free Quaker.** See *quaker.*

freeboard[1] (frē'bōrd), *n.* [Also formerly *freebord*, tr. OF. *frank bordum*, 'free board,' free border.] A margin of ground, specified in some cases as two and a half feet in width, in other cases much more, claimed beyond or outside of a fence which incloses a place, as a park or forest. [The nautical use is later: see *free-board.*]

free-board[2], *n.* The minimum free-board to which British merchant vessels may be loaded is indicated by a mark known as the Plimsoll mark. Lloyd's Register is empowered to assign the deepest water-line to which a vessel may be loaded. The lines must be permanently marked on the side of the vessel, as shown in the cut.

Free-board Marking for Steamers.

FW is the fresh-water free-board line to which the ship can be loaded in a fresh-water harbor. S is the corresponding summer load-line for the same displacement in salt water. W is the winter free-board line. WNA is the winter free-board line for voyages in the North Atlantic. IS is the line for summer voyages in the Indian Ocean. L R is Lloyd's Register. For sailing-vessels the FW and WNA lines only are marked.

freedom, *n.*—**Economic freedom**, the exercise of deliberate and free choice in economic activities, as in the sale or purchase of commodities or services, the production or consumption of wealth, or the selection of an occupation; absence of legal or customary restraints upon economic conduct.

freedomism (frē'dum-izm), *n.* [*freedom* + *-ism.*] The doctrine of the freedom of the will; libertarianism: opposed to *necessitarianism.* [Rare.]

It may be true that consciousness is an illusory guide, but this is nothing in favor of necessitarianism. . . . If it be illusory, argument on either side of the question is perfectly futile; for I have nothing but the testimony of consciousness to the cogency of the argument for necessitarianism. But if that authority be impeached, I am as much in the dark about that theory as I can possibly be about *freedomism.* *J. H. Hyslop*, Elem. of Ethics, p. 214.

free-fooder (frē'fō″dėr), *n.* One who is opposed to the taxing of food-stuffs. [Nonce-word.]

That class of *free-fooders* which regards any legislative interference with the buying and selling of anything of the nature of food, however bad, as noxious economic heresy, and a restriction of the free play of competition. *Nature*, Dec. 24, 1903, p. 179.

freeing-port (frē'ing-pōrt), *n.* In *ship-building*, a hole in the bulwarks close to the deck, with a flap-cover which opens outward to permit water that comes on the deck to run overboard freely. Also *freeing-scuttle.*

freeing-scuttle (frē'ing-skut″l), *n.* Same as ★*freeing-port.*

free-select (frē'sē-lekt″), *v. t.* To select and take up (undisposed-of crown lands) under the Australian land laws, and acquire title to the same by annual payments during a series of years. See ★*free-selection.* [Australia.]

free-selection (frē'sē-lek″shon), *n.* A system by which a settler in an Australian colony may select, take up, and acquire perfect title to a block of from 40 to 320 acres of crown lands at a fixed rate per acre (usually twenty shillings), and pay for the same at the rate of one shilling per acre per annum for twenty years. [Australia.]

free-selector (frē'sē-lek″tor), *n.* One who free-selects crown lands in Australia. See ★*free-selection.* [Australia.]

free-silver (frē'sil″vėr), *a.* Advocating the free and unlimited coinage of silver at an arbitrary standard rate: as, the *free-silver* party.

free-stater (frē'stā″tėr), *n.* A native or inhabitant of the Orange Free State of South Africa, now a British colony with the title of 'Orange River Colony.'

free-wheel (frē'hwēl), *v. i.* **1.** To ride a bicycle with the wheel free from the control of the

pedals; coast.—2. To free the wheel of a bicycle from the control of the pedals.

freez, *v.* and *n.* A simplified spelling of *freeze.*

freeze[1], *v. t.*—**To freeze out.** (*b*) In *poker,* to cause one to lose all his original stake in a game of freeze-out. See ★*freeze-out,* 2.

freeze-out (frēz′out), *n.* 1. The act of freezing out. See *to freeze out,* under *freeze*[1], *v. t.* —2. A variety of poker in which each player starts with an equal number of chips and no one is allowed to replenish his stock or to withdraw or loan any part of it. As soon as any player has lost his capital he is frozen out, and must retire from the game.

freezer, *n.* 2. A sheep whose mutton is intended to be frozen and exported. [Australia.]

freezing-tank (frē′zing-tangk), *n.* In *ice-making,* a large tank fitted with cold-brine circulating pipes and containing cold brine which is kept in constant circulation by means of a brine-agitator, in which distilled water is placed in cans to be frozen. It is usually fitted with a can-filler, an air-hoist, and a traveling crane for lifting the cans of ice and conveying them to the ice-dump, where the blocks are loosened and discharged, and, if too large, are sawed into convenient shapes for handling. A large tank may have a capacity of 100 tons of ice a day.

Frégier line. Same as *Frégier* ★*straight.*—**Frégier point, straight.** See ★*point*[1], ★*straight*[1].

freight, *n.* 4. Short for *freight-train.*—**Cost, freight, and insurance.** See ★*cost*[2].

freight-agent (frāt′ā″jent), *n.* The person in the employ of a transportation company who has charge of the freight-carrying department of its business, either at the head office (the *general freight-agent*), or at some particular port or station.

freight-ton (frāt′tun), *n.* Forty cubic feet of cargo: frequently used as the basis of freight charges in ocean transportation of light bulky goods irrespective of their actual weight. See *ton*[1], 2 (*k*).

freight-tonnage (frāt′tun″āj), *n.* Stowage-space for cargo on a vessel measured in freight-tons of 40 cubic feet.

Freight tonnage is simply a measure of cubical capacity. Merchants and shipowners make considerable use of this measurement, although it has no legal authority.
White, Manual of Naval Arch., p. 72.

fremitus, *n.*—**Hydatid fremitus.** Same as *hydatid thrill* (which see, under *thrill*[1]).

Fremont cottonwood. See ★*cottonwood.*

French boston, cliff, curve, decimal candle, gall, gray. See ★*boston,* etc.—**French minute,** a centesimal minute. See *centesimal division.*—**French schools of painting, schools of sculpture, seal.** See ★*painting,* ★*sculpture,* ★*seal*[1].—**French second,** a centesimal second. See *centesimal division.*—**French weed.** (*b*) The penny-cress, *Thlaspi arvense:* said to be so called, on account of its offensive qualities, in parts of Canada of anti-Gallic sentiment. See *penny-cress* and ★*stinkweed,* 3.

French (french), *v.* **I.** *trans.* [*French, a.*] **1.** To prepare according to the French mode.—**2.** To dress, as a chop, by partly freeing the bones.—**3.** In *metal.,* to carry out the last step in the refining of metallic antimony, by which 'bowl metal' is converted into 'star metal.'

II. *intrans.* [*l. c.*] In *bot.,* to appear distorted and unnatural, owing to some abnormal condition of the plant. See ★*frenching.*

French-fried (french′frīd), *a.* Said of potatoes which are cut into strips, triangular in section, and fried in hot fat.

frenching (fren′ching), *n.* The peculiar distorted and dwarfed condition of cotton, tobacco, corn, and other plants, due either to some fungus or to disturbed nutrition: often used synonymously for the mosaic disease. See *mosaic* ★*disease.*

Frenchism (french′izm), *n.* [*French* + *-ism.*] A custom, usage, or idiom peculiar to or characteristic of France or the French; a Gallicism.

frenologer, frenologic, etc. Simplified spelling of *phrenologer,* etc.

frenum, *n.*—**Frenum Morgagni,** a duplicature of tissue serving as a stay to the ileocæcal valve.

freq. An abbreviation (*b*) of *frequent.*

frequency, *n.,* 3. Specifically, the numerical measure of the rate of vibration of an oscillating body, or the rate at which the cycles of any periodic motion repeat themselves. In acoustics, frequency is synonymous with *pitch,* although the pitch of a sounding body is usually expressed in terms of the number of single vibrations per second, whereas frequency is given in double or complete vibrations. The frequency of vibration of bodies sending out waves capable of affecting the human ear lies between two fairly well-defined limits. The lower auditory limit, which corresponds in pitch to the lowest audible tone, is about 20 complete vibrations per second. The upper limit varies somewhat with the individual, but lies between 15,000 and 20,000 complete vibrations per second. The frequency of vibration to which light-waves are due is very much higher than that of sounding bodies. Since the frequency necessary to maintain a train of waves is directly proportional to the velocity of the wave-motion, and since ether-waves move with a velocity about one million times as great as that of waves in the air, the frequency of ether-waves would be a million times as great as sound-waves of the same wave-length. Sound-waves, however, have a wave-length about a million times that of light-waves, so that the frequency of light-waves is about a million million times as great as that of sound-waves. Light-waves, like sound-waves, have a considerable range of frequency, but the limits of visibility, which correspond to the limits in wave-length of the visible spectrum, lie closer together than the limits of audibility. The longest wave-length which produces an effect upon the eye is .76 μ, frequency 4×10^{14} vibrations per second; while the shortest wave-length to which the eye is sensitive is about .40 μ. These waves, which constitute the extreme violet of the system, have a frequency of 7.5×10^{14} vibrations per second. Ether-waves of frequency too great to affect the eye are also known to exist. These, which constitute the ultra-violet spectrum, are detected by means of their action upon the photographic plate or by their power of producing fluorescence. The shortest ether-waves known to exist have a wave-length of about .1 μ and a frequency of 30×10^{14} vibrations per second. Ether-waves the length of which is too great to affect the eye are also known to exist. These constitute the infra-red spectrum and are detected by means of their thermal action. The longest waves known to be due to the vibrations set up in a body by virtue of its temperature have a wave-length about 60 μ and a frequency of 5×10^{12} vibrations per second. It is possible by electrical means to produce ether-waves similar in all respects to light-waves but of much lower frequency. The range of such ether-waves, thus far produced, lies between 1×10^{12} vibrations per second and 0. The terms *high frequency* and *low frequency* are purely relative, the former being applied to comparatively rapid and the other to comparatively slow rates of vibration. Thus a musical tone having a frequency of 10,000 vibrations per second is called a tone of high frequency, corresponding to high pitch, while one lying near the lower limits is said to be of low frequency. In the same way an electric generator producing an alternating current with a periodicity of 10 alternations per second is termed a low-frequency alternator, whereas the discharge from a Tesla coil giving 1,000 electric oscillations per second is called a high-frequency discharge.

4. In *elect.,* see ★*alternating.*—**Convergence frequency.** See ★*convergence.*—**Frequency converter, curve.** See ★*converter,* 3, ★*curve.*—**Group frequency,** the frequency, with any statistical value, of the occurrence of a character in a group of organisms.—**High frequency,** a frequency greater than that commonly obtained or employed. Thus the rapid oscillatory discharge of a Tesla coil is said to be a discharge of *high frequency.* See ★*frequency,* 3.—**High-frequency wave.** See ★*wave*[1].—**Law of frequency.** See *probability curve,* under *probability,* 2, *Rule II.*—**Modal frequency,** the relative frequency in the population, considered of individuals, with the modal value of a character.

fresh, *a.* 13. Noting a cow that has recently given birth to a calf.

freshen, *v. t.* 4. In *surg.,* to denude (a part) of its tegument so as to form a raw surface which will readily unite with a similar surface when the two are brought into apposition.—**To freshen ballast,** to shift the ballast about.

Fresnel-Arago law. See ★*law*[1].—**Fresnel's biprism.** See ★*biprism.*

fret[1], *v. t.* 6. To form by fretting or corrosion.

> Let it stampe wrinkles in her brow of youth,
> With cadent Teares *fret* Channels in her cheekes.
> *Shak.,* Lear, i. 4.

fret[3], *n.*—**Curvilinear fret,** in *ornamentation,* a form developed in curved lines, as distinguished from straight lines and angles; curvilinear pattern.—**Dovetail fret,** in *arch.,* a fret which has obtuse and acute angles, being made up of diagonal lines, which gives to each section or member a wedge shape, as of a dovetail.

freta, *n.* Plural of ★*fretum.*

fret-board (fret′bōrd), *n.* In musical instruments of the lute and zither classes, a strip of hard wood, provided with frets, against which some or all of the strings can be stopped so as to alter the pitch of their tones. In the violin and similar instruments frets are now unusual, and the analogous part is called the *finger-board.*

fretum (frē′tum), *n.*; pl. *freta* (-tä). [L. *fretum,* a strait, sound, channel.] In *embryol.,* a constriction in the embryonic heart between the ventricle and the bulbus arteriosus.

F. R. G. S. An abbreviation of *Fellow of the Royal Geographical Society.*

F. R. H. S. An abbreviation (*a*) of *Fellow of the Royal Historical Society;* (*b*) of *Fellow of the Royal Horticultural Society.*

Fri. An abbreviation of *Friday.*

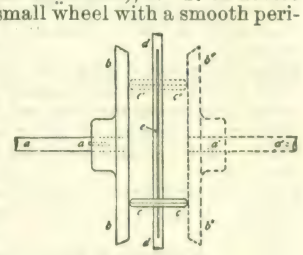
friar, *n.*—**Reformed friar,** one of the members of a reformed branch of a monastic order; specifically [*cap.*], a member of the Observantines, a branch of the Franciscans dating from 1419.

friar's-cowl, *n.* 2. Same as *friar's-cap.*

frib (frib), *n.* [Imitative: cf. *fribble.*] A short, loose piece of a fleece of wool.

F. R. I. B. A. An abbreviation of *Fellow of the Royal Institute of British Architects.*

fricadillo (fri-ka-dil′ō), *n.* [Kitchen Sp. (?), < Sp. *fricando,* < F. *fricandeau*: see *fricandeau* and *fricandelle.*] A meat-ball or roll.



Friction draft-gear. See ★*draft-gear.*—**Kinetic friction,** the resistance which has to be overcome to maintain a sliding solid in uniform motion; sliding friction or slipping friction.—**Molecular magnetic friction.** See *magnetic* ★*hysteresis.*—**Moment of friction,** the product of the frictional force which resists rotation, as of a shaft in its bearing, into the distance between the axis of rotation and the surface at which the friction occurs.—**Starting friction, static friction.** See *statical* ★*friction.*—**Statical friction.** Same as *friction of rest.* Also called *starting friction* and sometimes *static friction.*

friction-brake, *n.*—**Water friction-brake,** a testing device in which the friction of a thin layer of water contained between a revolving and a stationary disk is used to absorb the power generated by the engine. *Trans. Amer. Soc. Mech. Engin.,* XXIV. 740.

friction-calender (frik′shon-kal″en-dėr), *n.* A machine, consisting of three or more steel and paper cylinders, operated in contact with one another and at different degrees of speed, for imparting a gloss to cotton, linen, and other fabrics in the process of finishing.

friction-composition (frik′shon-kom-pō-zish″on), *n.* A mixture of substances capable of being readily ignited by moderate friction, as on the heads of ordinary matches, in artillery friction-primers, etc.

friction-disk (frik′shon-disk), *n.* 1. A device consisting of a small wheel with a smooth periphery which bears against the face of a smooth disk. The wheel can be moved axially along its shaft, to which it is fastened with a feather, and hence the angular velocity of the transmission can be varied within certain limits. By this device the motion is turned through a right angle, as the driven shaft is parallel to the face of the driving disk. When it is desired to have a reversing motion, two disks are fastened to the driving-shaft, one on each side of the driven wheel, with which either can be brought into contact. The small wheel is usually faced with leather, paper-fiber or rubber, to secure adhesion to the friction-surface.

Friction-disk.

a a, driving-shaft; *b b,* friction-disk; *c c,* driven wheel; *d d,* driven shaft; *e,* feather or key-way; $c'c'$, alternate position of *c c* when motion is to be reversed; $a'a'$, $b'b'$, second friction-disk to force *c c*, $c'c'$, to its work, or to be driven by *d d* in opposite directions to *a a,* and at variable speed, by *c c* or $c'c'$.

friction-drive (frik′shon-drīv), *n.* A device for transmitting motion which involves the use of a friction-clutch or friction-gears.

friction-hammer (frik′shon-ham″ėr), *n.* A drop-hammer which is lifted by friction-rollers acting on either a board or a strap. When the nip of the rollers is released, the hammer falls and delivers its blow.

friction-head (frik′shon-hed), *n.* In *hydraul.,* the head lost in friction by an outflowing liquid. The friction-head is usually computed by the formula $4\mu \frac{L}{D} \cdot \frac{v^2}{2g}$, where D is the diameter of the efflux pipe, L its length, v the velocity of the outflowing liquid, μ the coefficient of skin-friction, and g the acceleration due to gravity. See *head,* 7.

friction-hoist (frik′shon-hoist), *n.* A light hoist driven by the friction of the smoothly turned or grooved surfaces of pulleys or disks. If the applied load is excessive some of the friction-surfaces slip and the danger of breakng is lessened.

friction-pulley (frik′shon-pūl″i), *n.* A pulley which turns loosely on its shaft except when connected to it by a friction-clutch.

friction-ring (frik′shon-ring), *n.* A loose elastic metallic ring used in certain forms of friction-clutches or -brakes. It is divided at one point of its circumference, and either pressed outward against a female portion or clamped around a male central portion by means of a lever or cam.

friction-roller (frik′shon-rō″lėr), *n.* 1. A roller in a roller-bearing. (*a*) One of a number of small rollers which revolve in a bearing and the inner portion of whose periphery forms a bearing for a shaft. (*b*) One of a number of conical rollers which run between two conical surfaces to form a non-frictional thrust-bearing.

2. A roller of small diameter, used with others to form a wedged frictional contact between a wheel and its shaft. This takes the place of a key and is used on drawing- and printing-presses to momentarily connect the driving-wheel to the crank-shaft.

friction-socket (frik′shon-sok′et), *n.* In drilling, a fishing-tool used for taking hold of a tool lost in the hole. *Dialect Notes,* II. vi.

friction-sprocket (frik′shon-sprok″et), *n.* A chain-sprocket having a friction-clutch for connecting it to or disconnecting it from the shaft at the will of the operator.

friction-wrench (frik′shon-rench), *n.* A wrench which is so made that it will turn a round or cylindrical object by friction. This is sometimes done by having the wrench made with a taper, either inside or outside, according to whether it is to fit over or into the piece to be turned.

Friday, *n.*—**Good-Friday grass.** See ★*grass.*

Friedländer's bacillus. See ★*bacillus.*

Friedreich's disease. Same as *Friedreich's ataxia* (which see, under *ataxia*).

friend, *n.*—**Lady's friend,** an officer of the House of Commons, prior to the abolition of parliamentary divorces in 1857, whose duty it was, when a husband sued for divorce or prayed for the passage of an act to divorce him from his wife, to see that proper provision was made by the husband for the wife's support.

friendly, *a.* **II.** *n.*; pl. *friendlies* (-liz). One who is friendly or acts as a friend; specifically, a native of a naturally hostile country who is not only not hostile, but who acts as a friend to a traveler, explorer, or the like.

Fries. An abbreviation (*a*) of *Friesian;* (*b*) of *Friesic.*

Frieslander (frēz'lan-dėr), *n.* An inhabitant of Friesland.

friez, *n., v. t.,* and *a.* A simplified spelling of *frieze.*

frieze[2], *n.*—**Irish frieze,** a heavy, shaggy woolen cloth made from long, strong wool, compactly fabricated and very durable: specially identified with Irish manufacture.

frieze-cutter (frēz'kut″ėr), *n.* A machine for cutting a molded surface along the edge of a board or strip.

frigate, *n.*—**Jackass frigate,** a vessel between a sloop of war and a frigate in character, which carried a whole tier of guns and had a light spar-deck over its battery. It also carried a couple of guns on the quarter-deck and one or more on the forecastle-deck.

fright, *n.*—**Precordial fright,** extreme anxiety, attended with a peculiar and distressing sensation over the region of the heart, probably due to a functional disorder of the sympathetic nervous system.

frigotherapy (frig″ō-ther'a-pi), *n.* [Irreg. < L. *frigus* (*frigor-*), cold, + Gr. *θεραπεία,* medical treatment.] Same as ★*crymotherapeutics.*

frijolito (frē-hō-lē'tō), *n.* [Mex. Sp.] The proper form of *frigolito.*

fril, *v.* and *n.* A simplified spelling of *frill.*

frill[2], *n.* **4.** The shell of a kind of scallop.

fringe, *n.*—**Alleghany fringe,** the climbing fumitory, *Adlumia fungosa.*—**American fringe,** the fringe-tree, *Chionanthus Virginica.*—**Haversian fringes.** See *synovial folds,* under *synovial.*—**Herschel's fringes,** interference fringes observed at the line of separation between the totally reflected and the ordinarily reflected light which emerges from a prism placed upon a plane glass or mirror.—**Interference fringe.** See *interference,* 5.—**Purple fringe,** the smoke-tree, *Cotinus Cotinus.* Also called *false* and *purple fringe-tree.*—**Synovial fringes.** See *synovial folds,* under *synovial.*—**White fringe.** Same as *American* ★*fringe.*—**Wood-fringe.** Same as *Alleghany* ★*fringe.*

fringe-bush (frinj'bůsh), *n.* Same as *fringe-tree.*

fringe-cup (frinj'kup), *n.* The two-leaved bishop's-cap or miterwort, *Mitella diphylla:* so called from the fringe-like petals rising out of a cup-shaped calyx.

fringe-flower (frinj'flou″ėr), *n.* Any plant of the genus *Schizanthus,* of Chilean origin, several species of which have been introduced into cultivation for the sake of their flowers. Though belonging to the *Solanaceæ,* the corolla limb is more or less two-lipped and laciniate. *Schizanthus pinnatus* has pinnatisect leaves, and flowers variable in color, the lower lip usually violet or lilac, the upper one paler, with a yellow blotch at its base and spotted with violet or purple. Also called *butterfly-flower.* See *Salpiglossideæ.*

fringe-loom (frinj'löm), *n.* A loom so equipped as to form the weft into long loops beyond the selvage.

fringe-moss (frinj'môs), *n.* Any moss of the genus *Trichostomum.*

fringe-tree, *n.*—**False fringe-tree,** the smoke-tree, *Cotinus Cotinus.*

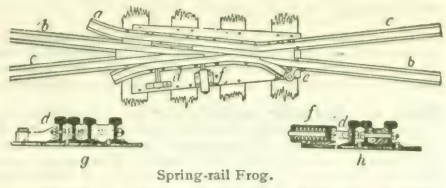
frison (fri-zôṅ'), *n.* [F.] A heavy woolen cloth with a long, thick nap, originally made in Friesland.

frit-fly (frit'flī), *n.* A European fly, *Oscinis frit,* whose larva seriously damages growing wheat and other small grains.

Fritillaria, *n.,* **1.** In California, *F. pluriflora* is the pink, *F. coccinea* the scarlet, and *F. liliacea* the white fritillary. *F. pudica,* on the eastern slopes of the Sierras, has solitary yellow flowers. The bulbs of *F. Camschatcensis* were once a staple article of food among the aborigines of Kamchatka. For other species see ★*mission-bells* and ★*stink-bells, Persian lily* (under *Persian*) and *toad-lily,* 2.

fritillary, *n.*—**Diana fritillary,** an American nymphalid butterfly, *Semnopsyche diana,* occurring in the hilly country of the southern United States, and in the larval state feeding on violets. It is remarkable for the great difference in color of the two sexes, the male having the wings brown broadly banded with orange, while the wings of the female are black bordered with metallic blue.—**Great spangled fritillary,** *Argynnis cybele,* an American species which occurs in Canada and the northeastern United States. Its larvæ feed on the leaves of the violet.—**Gulf fritillary,** *Agraulis vanillæ,* a species common in the southern United States and reaching as far north as southern New Jersey and Pennsylvania and west to California. Its larvæ feed on passion-flower plants.—**Meadow fritillary,** *Brenthis bellona,* a small American species occurring in Canada, Colorado, and the northern United States. Its larvæ feed on violet plants.—**Silver-bordered fritillary,** *Brenthis myrina,* a small American species occurring throughout Canada and the northern United States. Its larvæ feed on violet plants.—**Variegated fritillary,** *Euptoieta claudia,* occurring east of the Rocky Mountains, more abundantly in the southern United States. Its larvæ feed on the passion-flower, portulaca, violet, mandrake, stonecrop, and tick-trefoil.

frizzing (friz'ing), *n.* **1.** The act of producing a curled appearance.—**2.** A curly finish given to a heavily napped fabric.



F. R. Met. S. An abbreviation of *Fellow of the Royal Meteorological Society.*

F. R. M. S. An abbreviation of *Fellow of the Royal Microscopical Society.*

Frobenius's method. See ★*method.*

frog[1], *n.* **2.** The presence of mucus on the vocal cords, causing hoarseness and an inclination to cough or hawk: usually called *frog in the throat.*—**3.** Aphthæ in children.—**Catholic frog,** a species of toad, *Notaden bennetti,* found in eastern Australia. Its popular name is derived from the dark cross on its back. Also called *Holy-Cross toad.*—**Cohnheim's frog.** Same as *salt* ★*frog.*—**Frog in the throat.** See ★*frog*[1], 2.—**Salt frog,** a frog from whose vessels the blood has been drained away, its place being taken by a saline solution: used for physiological experiments. Also called *Cohnheim's frog.*

frog[2], *n.* **3.** An attachment to the frame of a loom, against which an iron finger strikes, stopping the machine should the shuttle fail to make timely passage through the warp.—**4.** In *lumbering:* (*a*) The junction of the two branches of a flume. (*b*) A timber placed at the mouth of a slide to direct the discharge of the logs.—**Spring-rail frog,** a railroad frog in which one of the four rails which form it is free to slide sidewise

Spring-rail Frog.

a, guide-rail; *b,* main-line service-rail; *c,* siding-rail; *d,* spring-rail frog, closed and in normal position; *e,* pivot on which it turns; *f,* spring controlling spring-rail frog; *g,* elevation showing position of rails on a line drawn between first and second tie; *h,* elevation showing position of rails on a line drawn between second and third tie.

upon bearings laid upon the ties. In its normal position the free rail is pressed by a spring against the three fixed rails of the frog, closing the opening and making the line-rail practically continuous. When a car passes to or from the siding its wheels press the free rail to one side and open the frog, the spring closing it after the last wheel has passed. See *frog*[2], 2.—**Trolley frog,** a device for fastening together trolley wires at any point where the trolley wire branches, and properly guiding the trolley wheel along the trolley wire on the movement of the car over the track. *Houston,* Dict. Elect.

frog[3], *n.* **3.** In a carriage, an ornamental piece of wood covered with silk or worsted woven to match the carriage-fringe.—**4.** In a harness, a pear-shaped ornament of patent leather, finished at the narrow end with a ring.

frog-boot (frog'böt), *n.* A piece of heavy felt shaped to fit around the frog of a horse's foot and to fill the space between the frog and the shoe.

frog-cheese (frog'chēz), *n.* The contents of any immature puffball.

frog-eye (frog'ī), *n.* A disease which affects tobacco-leaves, producing numerous small white spots. It is attributed to a fungus, *Cercospora Nicotianæ.* See ★*leaf-blight.*

frog-eyed (frog'īd), *a.* Affected by the disease called frog-eye.

frog-face (frog'fās), *n.* A deformity, caused by the presence of an intranasal tumor, in which the face assumes a fancied resemblance to that of a frog. *Buck,* Med. Handbook, IV. 155.

frog-flower (frog'flou″ėr), *n.* Any plant of the genus *Ranunculus.*

frog-grass, *n.* **2.** The toad-rush (which see, under *rush*[1]).

frog-leaf (frog'lēf), *n.* The water-shield or water-target, *Brasenia Schreberi.*

frog-lily (frog'lil″i), *n.* The yellow pond-lily or spatter-dock, *Nymphæa advena.*

frog-motion (frog'mō″shon), *n.* A cam or other device which acts on a frog or catch.

frog-mug (frog'mug), *n.* An earthenware mug containing a frog modeled in the bottom or on the side, which, as the contents were drunk, suddenly appeared, to frighten the drinker.

frog-plant (frog'plant), *n.* The orpine or live-for-ever, *Sedum Telephium.*

frog's-bladder (frogz'blad″ėr), *n.* Same as ★*frog-plant.*

frog's-mouth (frogz'mouth), *n.* **1.** Same as ★*frog-plant.*—**2.** Same as *frogmouth*

frogwort (frog'wėrt), *n.* The buttercup, *Ranunculus bulbosus.*

fromage (frō-mäzh'), *n.* [F. *fromage,* OF. *formage* = It. *formaggio,* < ML. **formaticum,* < L. *formare,* form, shape: see *form, v.*] Cheese.

fromenty, *n.* See *frumenty.*

frondigerous (fron-dij'ę-rus), *a.* [L. *frons* (*frond-*), leaf, + *gerere,* bear.] In *bot.,* bearing fronds or leaves.

Frondist (fron'dist), *n.* A member or supporter of the Fronde.

frondivorous (fron-div'ō-rus), *a.* [L. *frons* (*frond-*), leaf, + *vorare,* devour.] Devouring or feeding on leaves. *Southey.*

front. I. *n.* **10.** In *theat. language:* (*a*) That part of a theater which, from the actor's point of view, lies in front of the curtain; the auditorium or audience part; hence, the audience itself: as, to be in the *front.* (*b*) Everybody engaged to work before the curtain.—**11.** *Milit.,* the entire system of defenses constructed along one side of the polygon inclosing the site to be fortified: as, a bastion or polygonal *front.*—**12.** The forehead-piece of a bridle, generally of leather with metal trimmings.—**13.** The exterior surface of a lock mortised into a door; the portion of a lock that is visible and through which the bolt passes; in a rim-lock, the end facing the door-frame.—**14.** In *entom.,* practically the forehead; the part of the face between the eyes and between the vertex and the clypeus.—**Armored front,** a false front used with a mortised lock as a temporary protection to the lock-front.—**Astragal front,** a lock-front having a molded (astragal) surface corresponding to the same type of door-molding.—**Dry front,** noting a microscopic objective which is separated by an air-gap from the object: in contradistinction to *immersion lens.*—**Front of operations,** the imaginary line connecting the front of the different columns or detachments of an army in active campaign.—**Swing front,** a device applied to a photographic camera which enables the objective to be placed at different angles to the axis of the camera.—**To change front.** See ★*change.*

II. *a.* **3.** In *phonol.,* modified in utterance by the configuration of the central portion of the front or upper side of the tongue.

> *Front* vowels are rounded by the lips only.
> *H. Sweet,* Eng. Sounds, p. 2.

Front matter, in *printing,* all the type-work before the text of a book. Title-page, dedication, table of contents, preface, etc., are rated as front matter.—**Front office.** See ★*office.*

front, *v. t.* **5.** In *phonol.,* to pronounce with the front of the tongue, or as a 'front' sound. See ★*front,* II. *a.* 3.

frontad (fron'tad), *a.* [*front* + *-ad*[3].] In an anterior direction. *Buck,* Med. Handbook, II. 252.

frontage, *n.* **5.** Land that lies along a river or creek. [Australia.]

Frontal apron. Same as ★*apron,* 6.—**Frontal area,** the surface of the skull extending from the orbits to the coronal suture.—**Frontal index, moraine.** See ★*index,* ★*moraine.*—**Frontal point,** in *anthrop.,* the point where a line drawn inward from the higher outer part of the superciliary border of the frontal lobe intersects the mesial border of the cerebrum. *Cunningham.*—**Frontal protuberance.** Same as *frontal eminence.*—**Frontal shield.** (*a*) See *frontal.* (*b*) See ★*shield.*

frontalis (fron-tā'lis), *n.* [NL.: see *frontal.*] The anterior fleshy portion of the occipito-frontalis muscle.

front-fall (frunt'fâl), *n.* The falling of the front of a house.

> One *front-fall* of this kind in Fleet Street maimed several persons. *Southey,* Doctor, ciii.

frontispiece (fron'tis-pēs), *v. t.*; pret. and pp. *frontispieced,* ppr. *frontispiecing.* [*frontispiece, n.*] **1.** To furnish with a frontispiece.—**2.** To use as a frontispiece: as, to *frontispiece* a map.

frontlet, *n.* **6.** The skin which covers the forehead of a mammal, particularly of a ruminant.

Frontonasal hinge, shield. See ★*hinge,* ★*shield.*

fronto-orbital (fron″tō-ôr'bi-tal), *a.* Relating to the region of the forehead and orbit.—**Fronto-orbital sulcus.** See ★*sulcus.*

Frontoparietal shield. See ★*shield.*

frontopontine (fron-tō-pon'tin), *a.* Relating to the frontal bone and the pons.—**Frontopontine tract.** See ★*tract*[1].

frontotemporal (fron-tō-tem'pō-ral), *a.* [L. *frons* (*front-*), forehead, + *tempora,* temples, + *-al*[1].] Relating to both frontal and temporal bones, or to the corresponding regions of the skull.

frontozygomatic (fron″to-zī-gō-mat'ik), *a.* [L. *frons* (*front-*), forehead, + E. *zygomatic.*]

Relating to the forehead and to the zygomatic arches.—**Frontozygomatic index.** Same as *stephanozygomatic* ★*index*. *Topinard.*

frontward (frunt'wärd), *adv.* [*front* + *-ward.*] Toward the front: as, a "road that frontward leads," *S. Lanier.*

Men define a man,
The creature who stands *front-ward* to the stars,
The creature who looks inward to himself.
Mrs. Browning, Aurora Leigh, vii. 281.

frost, *n.* 6†. A spiked sole put on shoes to enable one to walk on ice without slipping.

Great Rain and very Slippery; was fain to wear *Frosts*. *Judge Sewall* (Jan. 19, 1717), in A. M. Earle's Costume [of Colonial Times, p. 111.

Degrees of frost, temperatures expressed in degrees below the freezing-point. On the Fahrenheit scale the reading of the thermometer subtracted from 32° gives the temperature in degrees of frost: thus twenty degrees of frost correspond to +12° F.; forty degrees of frost to −8° F. —**Jack Frost,** a nursery personification of frost, especially in connection with the frost traceries on the window-pane.

frost-bow (frôst'bō), *n.* A halo of white light attending the sun in cold weather. The term is applied popularly and indiscriminately (1) to the white rainbow of 18° to 41° radius, produced by the action of minute globules of water (the colored rainbow due to large drops has a radius of 40° to 42° 30′); (2) to the white halos of 22° and especially of 46° radius, due to the action of ice-crystals.

frost-crack (frôst-krak), *n.* A wound in the trunk of a tree, caused by the splitting of the bark due to unequal shrinkage during a sudden frost.

Frosted heart. Same as ★*iced heart.*

frost-figure (frôst'fig″ūr), *n.* The formation of ice-needles or arborescent figures on window-panes or other surfaces by deposition of the frozen vapor of the atmosphere.

frost-flower (frôst'flou″ėr), *n.* 1. Any plant of the genus *Aster:* so called on account of the lateness of its blooming. — 2. One of the ice-crystals of a frost-plant. See ★*frost-plant.*

frost-hardy (frôst'här″di), *a.* Capable of enduring a frost that is injurious to other plants or animals.

frost-hole (frôst'hōl), *n.* A low-lying region, as in the Thuringian forests, in which frost is especially likely to occur; an ice-cave.

frost-itch (frôst'ich), *n.* Same as *pruritus hiemalis* (which see, under *pruritus*).

frost-lamp (frôst'lamp), *n.* A lamp burned beneath the oil-chamber of a lighthouse lamp during cold weather, to prevent the oil of the latter from congealing.

frost-mark (frôst'märk), *n.* In *geol.*, the peculiar ring-like or hummocky surface produced upon loose sediments by the action of frost upon their contained water.

frost-plant (frôst' plant), *n.* Any plant on the stems of which crystals of ice are formed during the first freezing weather of autumn. The best-known plant exhibiting this phenomenon is *Helianthemum Canadense*, but it has been observed in other species of that genus. (See *frostweed.*) The next most important frost-plant is the American dittany, *Cunila origanoides.* Crystals of great beauty and perfection have been observed on this plant near Mount Vernon, Virginia. Less marked frost phenomena have been observed in a number of other plants, as *Pluchea camphorata* and *P. fœtida*, the heliotrope, and some thistles.

frost-ridge (frôst'rij), *n.* A prominent ridge on the trunk of a tree, formed by the repeated opening and healing of a frost-crack.

frost-signal (frôst'sig″nal), *n.* A flag-signal indicating the approach of a frost that is likely to prove injurious to vegetation. It is a white flag with a black center. See *cold-wave signal*, under *signal.*

frostweed-aster (frôst'wēd-as″tėr), *n.* Same as *white heath-*★*aster.*

frowzled (frou'zld), *a.* Rumpled; tousled; disheveled; frowzy.

Frozen ball, in *billiards*, the cue-ball in fixed contact with one or more object-balls.

F. R. P. S. An abbreviation of *Fellow of the Royal Photographic Society.*

frs. An abbreviation of *francs.*

Frs. An abbreviation of *Friesian* or *Friesic.*

F. R. S. C. An abbreviation of *Fellow of the Royal Society of Canada.*

F. R. S. E. An abbreviation of *Fellow of the Royal Society of Edinburgh.*

F. R. S. L. An abbreviation (*a*) of *Fellow of the Royal Society of Literature;* (*b*) of *Fellow of the Royal Society* (London).

F. R. S. S. An abbreviation of *Fellow of the Royal Statistical Society.*

F. R. S. S. A. An abbreviation of *Fellow of the Royal Scottish Society of Arts.*

fruchtschiefer (frōcht'shē″fėr), *n.* [G. *frucht*, grain, + *schiefer*, schist.] In *petrog.*, a thinly laminated fine-grained schist containing numerous concretions resembling grains of wheat. It is one form of contact-metamorphism produced in clay slates and phyllites. The concretions appear to be incipient stages in the formation of crystals of andalusite or similar minerals.

fructicultural (fruk-ti-kul'tūr-al), *a.* [**fructiculture* (L. *fructus*, fruit, + *cultura*, culture) + *-al*[1].] Of or pertaining to fruit-culture.

fructiform (fruk'ti-fôrm), *a.* [L. *fructus*, fruit, + *forma*, form.] Of the nature of or having the form of fruit: as, *fructiform* productions.

fructivorous (fruk-tiv'ō-rus), *a.* [L. *fructus*, fruit, + *vorare*, eat.] That feeds on fruit; fruit-eating: as, a *fructivorous* bird.

fructosuria (fruk-tō-sū'ri-ą), *n.* [NL. *fructus*, fruit, + *-ose* + Gr. οὖρον, urine.] The presence of fruit-sugar in the urine when voided.

fructule (fruk'-tūl), *n.* [NL. **fructulus*, dim. of *fructus*, fruit.] One of the carpels or component fruits of a compound or aggregate fruit. [Rare.]

fruendal (frō-en'dal), *a.* [L. *fruendus*, to be enjoyed (< *frui*, enjoy), + *-al*[1].] Same as ★*fruendive.*

fruendive (frō-en'div), *a.* [L. *fruendus*, to be enjoyed, + *-ive.*] Reserved for the satisfaction of desires: as, *fruendive* wealth. *C. H. Chase*, Prin. of Econ., p. 15.

frugalism (frō'gal-izm), *n.* [*frugal* + *-ism.*] A conscious cultivation, defense, and advocacy of thrift and prudence by many persons or by a class; a kind of cult, distinguished from the personal habit of frugality.

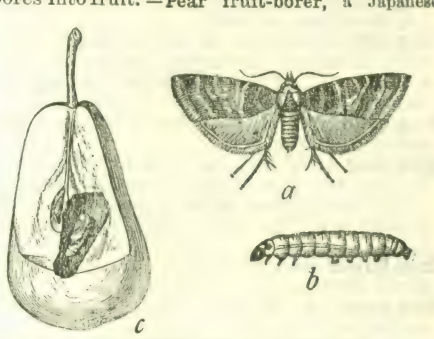
frugalist (frō'gal-ist), *n.* [*frugal* + *-ist.*] One who accepts the puritan creed and practice of ★frugalism (which see).

Given the conditions of climate, drink, and disease, the thoughtful, cool-blooded, home loving *frugalist* was bound to outlive in the industrial masses the careless, roistering sensualist. *E. Ross*, Social Control, p. 34.

fruit, *n.*—**Ballistic, catapult fruit.** See ★*ballistic*, ★*catapult.*—**Confluent fruit,** a compound fruit.—**Fruit fallen,** the produce of any possession detached therefrom and capable of being enjoyed by itself. Thus a next presentation, when a vacancy has occurred, is a fruit fallen from the advowson. *Wharton.*

fruit, *v.* **II.** *trans.* To bring into fruit under cultivation.

Trees of it, obtained under the name "Shiro Smomo," [*Sic*], were *fruited* by S——.
Yearbook U. S. Dept. Agr., 1901, p. 386.



fruitarian (frō-tā'ri-an), *a.* and *n.* [*fruit* + *-arian.* The proper type would be *fructuarian.*] **I.** *a.* Of or pertaining to fruits; consisting solely of fruits and nuts, as a diet.

One of the chief objects of the series of experiments was to furnish data as to the value of nuts as food. Fruits contain little protein, and nuts are relied on in the *fruitarian* plan of eating to balance the ration.
Sci. Amer., Oct. 10, 1903, p. 255.

II. *n.* One who holds the theory that fruits and nuts constitute the only proper food for man.

fruit-beetle (frōt'bē″tl), *n.* A beetle which infests fruit.—**Apple fruit-beetle,** *Doticus pestilens*, an Australian beetle which damages the fruit of the apple, and which is liable to be introduced into the United States.

fruit-borer (frōt'bōr″ėr), *n.* An insect which bores into fruit.—**Pear fruit-borer,** a Japanese

Pear Fruit-borer (*Nephopteryx rubrizonella*).

a, moth; *b*, larva; *c*, damaged pear with pupa. *a*, *b*, natural size; *c*, reduced.

phycitid moth, *Nephopteryx rubrizonella*, whose larvæ destroy nearly 50 per cent. of the pear crop of Japan.

fruit-bug (frōt'bug), *n.* An insect which infests fruit.—**Harlequin fruit-bug,** an Australian heteropterous insect, *Dindymus versicolor*, which sucks the sap of growing plants, and which when full-grown damages apples, causing them to spot and rot.

fruit-chafer (frōt'chā″fėr), *n.* Any one of numerous species of scarabæid beetles, especially of the cetonian group, which eat fruit, as the fig-eater, *Allorhina nitida.*—**Brown fruit-chafer,** an American cetoniid beetle, *Euphoria inda*, of modest colors and wide distribution, which feeds on ripe fruit and Indian corn.—**Pear fruit-chafer.** Same as *brown* ★*fruit-chafer.*

fruiterer, *n.* 2. Same as *fruiter.*

fruit-ether (frōt'ē″thėr), *n.* See ★*ether*[1].

fruit-fly, *n.*—**Cherry fruit-fly,** a trypetid fly, *Trypeta cingulata*, which lays its eggs on cherries, in which its larvæ develop.

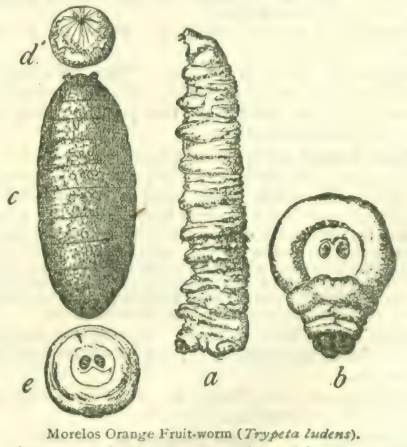
fruit-garden (frōt'gär″dn), *n.* A garden devoted to the growing of fruit.

fruit-maggot (frōt'mag″ot), *n.* A maggot which infests fruit.—**Cherry fruit-maggot,** the larva of a trypetid fly, *Rhagoletis cingulata*, which infests the fruit of the cherry.

fruit-mill (frōt'mil), *n.* A fruit-press.

fruit-separator (frōt'sep″ą-rā-tor), *n.* A machine for sorting fruits according to size.

fruit-stall (frōt'stâl), *n.* A stall in a market or public place where fruit is sold.



Fruit-tree bark-beetle. See ★*bark-beetle.*—**Fruit-tree leaf-roller.** See ★*leaf-roller.*

fruit-worm, *n.*—**Cranberry fruit-worm,** the larva of a phycitid moth, *Mineola vaccinii*, which lays its eggs on the young fruit of the cranberry: the larvæ enter the berries and eat out the seed-chambers, a single larva sometimes destroying four berries.—**Currant fruit-worm,** the larva of an American geometrid moth, *Tephroclystis interruptofasciata.* It feeds on both the fruit and the foliage of the currant, and pupates between folded leaves.—**Green-fruit worm,** the larva of any one of several American noctuid moths, notably of *Xylina antennata*, which feeds on the foliage and young fruit of the apple, pear, peach, and strawberry.—**Morelos orange fruit-worm,** the larva of a Central American trypetid fly, *Trypeta ludens.* which lays its eggs on young citrus

Morelos Orange Fruit-worm (*Trypeta ludens*).
Adult fly. Female. Enlarged. (From "Insect Life.")

fruits, its larvæ feeding on the pulp. It is common in parts of Mexico, and derives its name from the Mexican state Morelos. Its accidental introduction into the

Morelos Orange Fruit-worm (*Trypeta ludens*).

a, larva; *b*, anal segment; *c*, puparium; *d*, head; *e*, anal segment. *a* and *c* enlarged; *b*, *d*, and *e* still more enlarged. (From "Insect Life.")

southern United States, and especially into California is greatly feared.—**Peach fruit-worm,** the larva of a Japanese tineid moth allied to *Grapholitha.*—**Raspberry fruit-worm,** an American dermestid beetle, *Byturus unicolor*, whose small white larva is often found on the inside of red raspberries after they are picked.

frunt, *n.*, *a.*, and *v.* A simplified spelling of *front.*

frustrate, *a.* **II.** *n.* A weak contraction of the ventricle of the heart, the impulse of which is imperceptible at the wrist, giving the impression of intermittent pulsations. *Buck*, Med. Handbook, IV. 599.

frustulation (frus-tū-lā'shọn), *n.* [*frustule* + *-ation.*] A method of non-sexual reproduction in *Cnidaria.* It consists in the abstriction of small portions from lateral branches which bear no hydranths. These portions, except for the absence of cilia, resemble planulæ, becoming attached and giving rise to new colonies. *Allman.*

fruticetum (frō-ti-sē'tum), *n.*; pl. *fruticeta* (-tą). [NL., < L. *frutex* (*frutic-*), shrub, + *-etum.*] A collection of living shrubs, usually for scientific exhibition; a scientific shrubbery.

fry[1], *n.*—**Lamb's fries**, the testicles of the lamb, prepared for eating. Called also *mountain-oyster.*

fry[2], *n.* 4. Any small edible fishes, as those of the family *Engraulidæ*, the anchovies, and certain fishes of the family *Clupeidæ*, as the sardines, and of the family *Atherinidæ*.— 5. The roe of fishes, especially that of such fishes as are used for food.

Frying-pan brand, a large brand used by Australian cattle-stealers to cover and thus obliterate the brand of the owner of the stolen cattle.

f. s. An abbreviation of *foot-second.*

F. S. A. (*b*) An abbreviation of *Fellow of the Society of Arts.*

F. S. I. An abbreviation (*a*) of *Fellow of Sanitary Institute;* (*b*) of *Fellow of Surveyors' Institution;* (*c*) of *Free Sons of Israel.*

F. S. S. An abbreviation of *Fellow of the Statistical Society.*

F. S. Sc. A. An abbreviation of *Fellow of the Society of Science and Art* (London).

F. T. C. D. An abbreviation of *Fellow of Trinity College* (Dublin).

fth., fthm. Abbreviations of *fathom.*

fuang (Siamese pron. fē'ang), *n.* [Siamese *feua'ng* (Michell, 1892).] A current Siamese silver coin, one eighth of a tical, equivalent to 3½ United States cents.

fub[3] (fub), *n.* The lowest quality of wool taken from a fleece.

fuchi (fö'chē), *n.* [Jap.] The ring into which the base of the handle of a Japanese sword fits. The two principal parts of the hilt are the fuchi and kashira.

fuchsia, *n.*—**California fuchsia**, *Zauschneria Californica.* Called *balsamea* by the Spanish Californians, who use it as a vulnerary. See *Zauschneria.*—**Native fuchsia**, in Australasia, any one of several species of native plants. (*a*) In Australia and Tasmania, species of the genus *Mazeutoxeron*, belonging to the rue family, especially *M. speciosum.* (*b*) In Queensland, a shrub of the family *Myoporaceæ*, *Pholidia maculata.* (*c*) In New Zealand, the kotukutuku, *Fuchsia excorticata.* See ★*kotukutuku*, ★*konini*, and ★*tookytook.*

fuchsia-tree (fū'shiä-trē), *n.* The kotukutuku, *Fuchsia excorticata.* See ★*kotukutuku.*

fuchsin, *n.*—**Acid fuchsin.** See ★*acid-fuchsin.*—**Fuchsin bodies**, minute rounded hyaline bodies, staining readily in fuchsin solution, found in certain malignant tumors.—**New fuchsin.** Same as *new* ★*magenta.*

fuchsinophil (fök-sin'ō-fil), *a.* and *n.* [*fuchsin* + Gr. *φίλος*, loving.] **I.** *a.* Staining readily in the presence of fuchsin dye: said of certain cells or parts of cells.

II. *n.* A leucocyte which has a selective action for fuchsin stain.

fuchsinophilic (fök-sin-ō-fil'ik), *a.* [*fuchsinophil* + *-ic.*] Same as ★*fuchsinophil.*

fuchsinophilous (fök-si-nof'i-lus), *a.* Same as ★*fuchsinophil.*

fuchsone (fök'sōn), *n.* [G. *fuchson.*] A name suggested for diphenylquinomethane, $(C_6H_5)_2C{:}C_6H_4O$. An important group of dyes is derived from this compound, and a system of nomenclature was based on the name.

fucose (fū'kōs), *n.* [L. *fucus*, seaweed, + *-ose.*] A crystalline sugar, $C_6H_{12}O_5$, obtained by heating seaweeds with dilute sulphuric acid.

fuddah (fud'ä), *n.* Same as ★*fadda.*

fuddling-cup (fud'ling-kup), *n.* An old English earthenware cup made of several receptacles molded together and communicating one with another. To empty one it was necessary to empty all.

Fuddling-cup.

fudge, *v. i.* 2. In *printing*, to make use of improper materials or methods to produce a needed result with greater speed.

fudge, *n.* 2. In newspaper parlance, matter of supposed importance, as the latest sporting news or sensational stuff, which comes to hand too late to find a place in the plates before going to press, and is inserted in a special place by cutting the plates. See ★*fudge-box.*— 3. In *printing*, an unworkmanlike practice.—4. A kind of home-made candy composed of milk, sugar, butter, and chocolate, boiled together, flavored with vanilla, and, when nearly cool, poured into a rectangular pan and cut into squares: more fully designated *chocolate-fudge.* When chopped walnuts form an ingredient it is known as *nut-fudge.* The name alludes to the hasty amateur manufacture.

fudge-box (fuj'boks), *n.* The space on the front page of a newspaper cut out, or arranged to be cut out, if need be, to receive the matter called 'fudge,' that has come in while the forms are going through the press.

fudge-mold (fuj'mōld), *n.* In *printing*, a mold constructed to cast a taper- or wedge-shaped linotype designed to form part or the whole of a circle.

fudge-slug (fuj'slug), *n.* In *printing*, a taper- or wedge-shaped slug designed to form part or the whole of a circle.

fudgy (fuj'i), *a.* [*fudge* + *-y*[1].] Awkward; bungling, or showing the results of bungling. [U. S.]

Fuel ratio, the amount of heating-capacity in a fuel as compared with another fuel taken as a standard. Every coal has a capacity to raise a certain number of pounds of water one degree Fahrenheit for each pound burned: the ratio, experimentally determined, of this heating-capacity or calorific power to that of a pound of pure carbon is the *fuel ratio* of that coal.—**Gaseous fuel**, fuel in a gaseous state, which of late years has come to be more and more extensively used. It is chiefly represented by the 'natural gas' of petroleum regions, the waste combustible gases escaping from iron-smelting furnaces, and 'generator' gas specially made from coal or other solid forms of fuel. Among the advantages attending the use of gaseous fuel are the absence of ash, the high temperature attainable by application of the 'regenerative' principle, the easy transference for short distances through pipes or flues, and the easy control of consumption. On the other hand, limitations are placed on the use of such fuel by its bulkiness, and the consequent restriction of storage and of transport to any great distance.—**Liquid fuel**, fuel in a liquid state, as crude petroleum or the more or less purified hydrocarbon oils derived from it. Great importance attaches to its use under certain conditions. Among the chief advantages are the freedom from ash, the very high heat-producing value, the capability of storage without any waste of space and in tanks of any shape, the ready transference through pipes, and the easy control of consumption. Use of such fuel has been adopted to a greater or less extent in war-ships, pleasure-craft such as naphtha-launches, and automobiles or motor-cars. For the last-named purpose alcohol has been to some extent substituted for petroleum products.—**Patent fuel**, a trade-name for coal-dust or coke-dust incorporated with pitch or other binding-material and molded into blocks or briquets.

fuel-oil (fū'el-oil), *n.* Oil which is used as fuel either in an internal-combustion engine or in a furnace. It is derived from crude petroleum by separating out the naphtha and kerosene by distillation, and by abstracting part of the lubricating-oil.

fuel-value (fū'el-val″ū), *n.* The amount of heat which may be furnished to the body by oxidation of any given article of diet.

By *fuel-value* is here meant the total energy which a given substance can yield the body; in other words, it is the heat of combustion of that part of the food which is capable of oxidation within the body.

Encyc. Brit., XXVII. 444.

fugal[2] (fū'gal), *n.* [(*centri*)*fugal.*] A local abbreviation for *centrifugal:* applied in Australia and elsewhere to centrifugal machines.

fugato, *n.* **II.** *a.* Of the nature of a fugue; to be rendered in fugue style, but not according to strict rules. See *fugato, n.*

fuggerite (fug'ėr-īt), *n.* [Prof. E. *Fugger* of Salzburg + *-ite*[2].] A tetragonal silicate closely allied to gehlenite in composition, but differing in physical characters: found in the monzonite of the Monzoni valley in the Tyrol.

fugitate (fū'ji-tāt), *v. t.*; pret. and pp. *fugitated*, ppr. *fugitating.* In *Scots law*, to sentence to outlawry for fugitation.

fugue, *n.*—**Single fugue**, a fugue with only one subject: opposed to *double fugue* (which see, under *fugue* (*a*)).

fuji (fö'jē), *n.* [Jap.] The Japanese wisteria, *Kraunhia Japonica.* See *Wisteria*, 1.

Fukurokujiu (fū-kǭ-rō'kǭ-jyö), *n.* [Sinico-Japanese: *fuku* (< Chin. *fu*), happiness, + *roku* (< Chin. *lao*), venerable, + *jiu* (< Chin. *sheu, shou*), long life.] The Japanese god of longevity (one of the seven gods of happiness), represented with an abnormal dome-shaped head and long beard, carrying a peach in his hand, and sometimes accompanied by a deer, another of his attributes.

ful, *a., n., adv.*, and *v.* A simplified spelling of *full.*

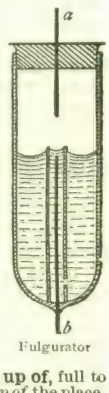
fulaari (fö-lä-ä'ri), *n.* [New Guinea.] One of several masked executive officers in each village of British New Guinea, who, in accordance with native custom, are charged with seeing that the taboo is observed when it has been placed by the taboo-chief on cocoanuts, areca-nuts, etc., when a failure of crops is threatened.

fulcral (ful'kral), *a.* Of or pertaining to a fulcrum; specifically, in *ichth.*, pertaining to the processes on the base of fin-spines and rays by which the fin is erected.

fulcrum, *n.* 7. In rotifers, the short stem of the incus, one of the parts of the mastax or pharyngeal mill.— 8. In the trilobites, the bend or the point of abrupt curvature of the thoracic pleura, which divides them into proximal and distal portions.

fulcrumage (ful'krum-āj), *n.* The turning about a point, as a fulcrum.

fulgorid (ful'gō-rid), *n.* and *a.* **I.** *n.* A member of the *Fulgoridæ.*



II. *a.* Of or belonging to the family *Fulgoridæ.*

fulgural (ful'gū-ral), *a.* [L. *fulguralis*, < *fulgur*, lightning.] Of or pertaining to lightning: as, *fulgural* superstition.—**Fulgural science**, divination by lightning.

fulgurant, *a.* 2. In *pathol.*, with lightning-like rapidity: an epithet applied to the pains of locomotor ataxia, because of the suddenness of their appearance.

fulgurating (ful'gū-rā-ting), *p. a.* Darting or shooting in the manner of lightning; lancinating: as, *fulgurating* pains.

fulgurator (ful'gū-rā-tor), *n.* In *phys.*, a device used in the study of the spark-spectra of substances. It consists of a vertical glass tube with platinum wires, *a* and *b*, which afford a spark-gap. The terminal *b* is surrounded with a capillary tube to the top of which the liquid to be vaporized by the spark rises, covering the platinum wire. The spark passes between the surface of this liquid and the upper terminal.

Fulgurator

fulgurite, *n.* 2. An explosive of the nitroglycerin class, used for blasting: similar to dynamite, but the nature of the dope has not been disclosed by the inventor.

full[1], *a.*—**Full house.** (*b*) In *poker*, same as *full*[1], *n*, 3.—**Full line.** (*b*) In *printing*, a line of composed types of letters only that fill the measure of the page or column. A line that consists partly of letters and partly of quadrats is known as a *break line.*—**Full up of**, full to satiety; 'sick and tired of': as, he was *full up of* the place. [Australia.]—**Keep full for stays!** an order to the wheelsman to keep a good full on the vessel so as to accelerate her speed a little before going in stays in order that she may come about quickly.—**Keep her full!** an order to keep the sails full of wind.

full[1], *n.* 4. A ridge of gravel formed back of a beach by storm-waves. [Local, Eng.]

The wash of the waves, owing to percolation, piles up the pebbles thrown forward by the breaker, forming a bank, or ridge, or *Full*, and this is the action proper to the sea on a shore of shingle.

Geog. Jour. (R. G. S.), XI. 536.

To hold a good full, *naut.*, to steer so as to keep the sails well bellied out by the wind; to keep the vessel off sufficiently from the wind to fill her sails.

full[1], *adv.* 5. In *organ-playing*, with all the stops drawn; with the whole power of the instrument: as, the piece was played *full.*

full-arc (fůl'ärk), *n.* An electric arc supplied with 9.5–10 amperes of current and consuming 450–480 watts.

full-blood, *n.* 2. Relationship through both parents or through a complete series of ancestors: as, brothers or cousins of the *full-blood*, or *full-bloods* of a certain tribe or race.

Fullers' board. See ★*board.*—**Fullers' chalk.** Same as *fullers' earth.*—**Fullers' earth.** (*b*) In *geol.*, specifically, the middle subdivision of the Lower Oölites of the Jurassic system in Great Britain, constituting the Fullonian group or stage. It is underlain by the Bajocian series, with the Cheltenham beds at the top, and overlain by the Bathonian, the lowest member of which is the Great or Bath Oölite.—**Fullers' grease.** Same as *Yorkshire* ★*grease*, except that the term *fullers' grease*, when used in its strictly specific sense, applies only to the fatty acids recovered from the scouring of woolen cloth, excluding the grease from raw wool.—**Fullers' scale.** See ★*scale*[3].

full-fledged (fůl'flejd), *a.* Fully developed or matured; fully organized and ready for action or use: as, a *full-fledged* town.

full-jeweled (fůl'jö″eld), *a.* Said of a watch when each of the pivot-holes contains a jewel, made of a ruby, garnet, or some other gem.

fullonian (fů-lō'-nian), *n.* [L. *fullo*(*n-*), a fuller.] Same as ★*fullers' earth* (*b*).

full-pitch (fůl'pich), *n.* In *cricket*, a ball bowled so as to reach the batsman before it touches the ground; a full-toss.

full-rigged (fůl'rigd), *a.* Fully rigged; with all the sails set that properly belong to the class of vessel named or referred to: as, a *full-rigged* ship. See *ship.*

full-toss (fůl′tos), *n.* In *cricket*, same as ★*full-pitch*.

fulminate, *n.*—**Mercuric fulminate,** a valuable explosive agent, made by the addition of alcohol to a warm solution of mercury in nitric acid. It forms small yellowish-white crystals, having the composition $HgC_2N_2O_2$, very readily exploded by slight heating, friction, or a blow. It is too violent in its effects and too expensive to be used as a principal or primary explosive, but it is largely used in detonators and percussion-caps, to bring about the explosion of other materials, such as guncotton and dynamite. Also known as *fulminating mercury* or simply as *fulminate*.

fulminuric (ful-mi-nū′rik), *a.* Derived from fulminic and uric acids.—**Fulminuric acid,** a colorless solid, $C_3H_3N_3O_3$, isomeric with cyanuric acid. It explodes at 145° C. Sometimes called *isocyanuric acid*.

fulsum, *a.* A simplified spelling of *fulsome*.

fulvo-hyaline (ful″vō-hī′a-lin), *a.* [L. *fulvus*, yellow, + Gr. *ὑάλινος*, of glass: see *hyaline*.] Transparent but dark yellowish in color.

fulvo-rufous (ful″vō-rō′fus), *a.* [L. *fulvus*, yellow, + *rufus*, red.] Dark yellowish red.

fuma (fū′ma), *n.* [A back-formation from L. *fumare*, subject to smoke or vapor, < *fumus*, smoke, vapor: see *fume*.] A trade-name for the vapor of carbon disulphid when applied to plants as an insecticide.

fumagine (fū′ma-jin), *n.* [NL. **fumago* (*fumagin-*), < L. *fumus*, smoke, + *-ago* (*-agin-*), as in *imago*, image, with a sense suggested by *ærugo*, rust.] The black or brown coating upon the leaves and stems of plants formed by the mycelium of various fungi.

fumago (fū-mā′gō), *n.* [NL. (Persoon, 1818), < L. *fumus*, smoke, + *-ago* as in *imago*, image; used in NL. in a special sense: see *imago*.] A name which has been applied to the conidial condition of species of *Capnodium*.

fumarine (fū′ma-rin), *n.* [*Fumaria* + *-ine*2.] A bitter alkaloid, $C_{21}H_{19}O_4N$, contained in *Fumaria officinalis*. It crystallizes in prisms and is optically active.

fumarole, *n.* Sainte-Claire Deville distinguishes the following: (*a*) *Dry fumaroles*, which are very hot and yield volatilized anhydrous (for example, ferric) chlorids. (*b*) *Acid fumaroles*, which yield sulphurous and hydrochloric fumes and steam. (*c*) *Alkaline fumaroles*, which yield sal ammoniac and steam at approximately 212° F. (*d*) *Cold fumaroles*, below 212° F., which yield steam, carbon dioxid, sulphureted hydrogen, etc. *Annales de Chimie et de Physique*, LII. 19.

fumarolic (fū-mā-rol′ik), *a.* Characterized by, pertaining to, or due to the action of fumaroles.

The placing of various ore deposits of many well-known districts in such classes as *fumarolic* solfataric, pneumatolytic, etc., without giving evidence for such a distribution, seemed to the speaker to be premature.
Science, April 3, 1903, p. 543.

fumatorium (fū-ma-tō′ri-um), *n.*; pl. *fumatoria* (-ä). [NL.: see ★*fumatory*2, *fumitory*2, *n.*] A fumatory; specifically, in recent use, an air-tight structure in which small trees or other plants are fumigated to destroy scale or other insects.

fumatory2 (fū′ma-tō-ri), *n.* [NL. *fumatorium* (recent use), < L. *fumare*, pp. *fumatus*, smoke: see *fume*, *v.*] Same as *fumitory*2 (which is a less correct form).

fumba (föm′bä), *n.* [Also *mfumba*; < Swahili *fumba*, with noun-prefix *mfumba*, connected with *fumba*, close, shut.] A sleeping-bag of matting used by the natives in the lower Zambesi valley.

fumble, *n.* **2.** In *base-ball*, *foot-ball*, and other games, an act of fumbling.

The world's a well strung fidle, mans tongue the quill,
That fills the world with *fumble* for want of skill.
N. Ward, Simple Cobler, p. 87.

fume, *n.*—**Lead fume.** See ★*lead*2.

fume, *v. i.*—**Fuming nitric acid,** an impure nitric acid containing other oxids of nitrogen; a reddish-yellow fluid giving off acrid fumes of the same color.—**Fuming oil of vitriol.** Same as *Nordhausen acid* or *fuming sulphuric acid* (which see, under *sulphuric acid*).

fumé (fū-mā′), *a.* [F., pp. of *fumer*, smoke.] **1.** Smoked: as, verre *fumé* ('smoked glass'). —**2.** Smoky; having a smoky tint: as, quartz *fumé*.—**3.** That has been subjected to the process of fuming, as oak, in order to obtain an antique appearance.

fume-chamber (fūm′chām″bėr), *n.* A box or chamber connected with a ventilating shaft or exhaust, used in laboratories to carry off offensive fumes.

fumerole (fū′me-rōl), *n.* See *fumarole*.

fumigant, *a.* **II.** *n.* A substance used in fumigation. *Jour. Soc. Chem. Industry*, XIII. 657.

fumigate, *v. t.* **4.** To darken the color of (wood) in imitation of the effect of age and smoke. The process is also known as *fuming*.

fumigatory, *a.* **II.** *n.* A room or apparatus used for fumigation. *Syd. Soc. Lex.*

fuming, *n.* **4.** The process of subjecting oak or other wood used in furniture to the fumes of ammonia, in order to give it an appearance of age.—**5.** In *photog.*, the process of exposing albuminized paper to the fumes of ammonia, which makes the paper print a trifle more quickly and gives it a purple tone.

fumitory1, *n.*—**Bulbous fumitory.** (*a*) The hollow-root or moschatel, *Adoxa Moschatellina*. (*b*) The hollow-wort, *Capnoides cavum*.

fumivorous (fū-miv′ō-rus), *a.* [L. *fumus*, smoke, + *vorare*, devour.] Smoke-consuming.

It [crematory apparatus] . . . is *fumivorous*, [and] emits no smell. *Buck*, Med. Handbook, III. 361.

funa (fö′nä), *n.* [Jap. *funa*.] The Japanese name of the common goldfish, *Carassius auratus*, found in the rivers of Japan.

funambulism (fū-nam′bū-lizm), *n.* [L. *funambulus*, a rope-walker, + *-ism*.] The art of tight-rope walking; rope-walking.

Funariaceæ (fū-nā-ri-ā′sē-ē), *n. pl.* [NL., < *Funaria* + *-aceæ*.] A family of mosses of the order *Bryales*, typified by the genus *Funaria*. They are characterized by the pear-shaped capsule provided with a neck and often raised on a long stalk. The family includes 12 genera, of which *Funaria* and *Physcomitrium* are the most important.

function, *n.*—**Automorphic function.** See ★*automorphic*.—**Characteristic function,** in *thermodynamics*, a function of the generalized coördinates, the generalized forces, the temperature, energy, and entropy of a system in equilibrium, in terms of which all the properties of the system can be expressed.—**Chromatic function.** See ★*chromatic*.—**Compensation of functions.** See ★*compensation*.—**Decreasing function,** a function which decreases when its independent variable is increased.—**Diaphoric function,** a function of the differences of specified arguments.—**Differential of a function.** See ★*differential*.—**Element of an analytic function.** See ★*element*.—**Empiric function,** a relation between two variable quantities, found by direct observation.—**Equipotential function,** a function by means of which equality of potential is specified.—**Fractional function,** a function in which the variable occurs in the denominator: as, a/x, or $b/x2$.—**Function of position on a Riemann's surface,** a function of a function considered as having a value for every point of the Riemann's surface that is connected with the latter function.—**Galton's function.** See *ancestral* ★*inheritance*.—**G-function.** Same as *Green's* ★*function*.—**Graph of a function, graph of the function f(*x*).** See ★*graph*.—**Green's function.** (*a*) A potential function which at all points of a contour is equal to $\log 1/r$, where r is the radius vector of the point from a fixed origin. (*b*) A function differing from that just defined by $\log 1/r$.—**Group of a function.** See ★*group*.—**Hyperbolic function.** (*c*) A function bearing a relation to a rectangular (equilateral) hyperbola similar to that of the ordinary circular functions of trigonometry to a circle. The hyperbolic functions are not so named on account of any analogy with what are termed *elliptic functions*. See the extract.

The elliptic integrals, and thence the elliptic functions, derive their name from the early attempts of mathematicians at the rectification of the ellipse. . . . To a certain extent this is a disadvantage; . . . because we employ the name *hyperbolic function* to denote cosh u, sinh u, etc., by analogy with which the elliptic functions would be merely the circular functions cos ϕ, sin ϕ, etc.
Greenhill, Elliptic Functions, p. 175.

Increasing function, a function which increases when its independent variable is increased.—**Infinity of a function.** See ★*infinity*.—**Inverse function** or **inverse of a function.** When $y=f(x)$, then x equals some function of y, say $x=\phi(y)$. These functions, f and ϕ, are then said to be *inverse functions* or *anti-functions* of one another. The sign of this inversion is minus one written as an index to the functional symbol: thus, $f=\phi-1$ and $\phi=f-1$, so that $x=f-1(y)$ and $y=\phi-1(x)$.—**Kleinian function,** an automorphic function which remains unchanged by the transformations of a Kleinian group.—**Like-branched functions,** functions of one and the same Riemann's surface.—**Monodromy of a function.** See *monodromic function*, under *monodromic*.—**Octahedron function,** a sextic function whose fourth derivative is identically zero, the canonical form being $xy(x4-y4)$.—**℘-function,** a function denoted by $\wp u$, pronounced *p, u*.

$$\wp u = \frac{1}{u^2} + \Sigma' \left[\frac{1}{(u-w)^2} - \frac{1}{w^2} \right],$$

where Σ' denotes a sum extended over all values of w except the value $w=0$.—**Singular point of a function.** See ★*point*1.—**Tesseral function,** the function called by Heine and Todhunter *associated function of the first kind*; a function converted into a tesseral harmonic by the factor $\cos s\phi$ or $\sin s\phi$.—**Verb function,** an operator containing a purely symbolic letter β to denote the base of a given operation, so that when this verb function operates on a subject x, it produces the result obtained by writing x for β in the verb function: thus, using square brackets to inclose each separate operation, $[(c+\beta)2]\,x = (c+x)2$, whereas $[c+\beta]2\,x = [c+\beta]\,(c+x) = c+(c+x) = 2c+x$.—**Zero of a function.** See ★*zero*.

Functional adaptation, hypertrophy, memory, murmur, paralysis, psychology, selection. See ★*adaptation*, etc.

function-theory (fungk′shon-thē″ō-ri), *n.* Same as *theory of functions* (which see, under *function*).

Fundal placenta. See ★*placenta*.

Fundamental body, a body which cannot rotate. The conception has been introduced by German thinkers in order to support the doctrine of Leibnitz that space and motion are purely relative, as against the doctrine of Newton that space is a thing. The difficulty in the Leibnitzian doctrine is that rotational velocity is not relative, unless some peculiar hypothesis is introduced to account for the phenomena. These hypotheses have usually consisted in supposing the existence of some motionless thing to which all motion is relative; but no good reason has ever been given for rejecting Newton's view that space itself is this motionless thing.—**Fundamental gneiss.** Same as ★*basement complex*.—**Fundamental length, plate** or **zone.** See ★*length*, ★*plate*.

Funded content. See ★*content*3.

fundicolar (fun-dik′ō-lär), *a.* [L. *fundus*, bottom, + *colere*, inhabit, +*-ar*3.] Inhabiting or living upon the sea-bottom: as, *fundicolar* mollusks.

Professor Pelseneer enumerates a few Magellanic species separately, and divides the Antarctic species into littoral, of which there are three species; *fundicolar*, of which there are twenty-nine, and pelagic, of which there are five. *Science*, April 22, 1904, p. 658.

fundiform (fun′di-fôrm), *a.* [L. *funda*, a sling, + *forma*, form.] Having the form of a sling or a loop.

funeral-director (fū′ne-ral-di-rek″tor), *n.* An undertaker. [U. S.]

Fungi, *n. pl.* Recent investigations have added much to the knowledge of the life-histories and relationships of this large group of plants. The term, as commonly used to include the slime-molds and bacteria as well as the fungi proper, does not signify a natural group. The present tendency is to restrict its use to the *Eumycetes* (true fungi). The cytological studies of Harper and others confirm the opinion that the rusts (*Uredinales*) are most closely related to the *Basidiomycetes*, while the researches of Thaxter have shown the existence of what appears to be a new order, the *Myxobacteriales*, showing characters of both *Myxomycetes* and bacteria. Various recent systematic arrangements of the fungi have been proposed, notably those of Brefeld, Schröter, Saccardo, and Engler and Prantl. These classifications differ chiefly in the terminology used, the relative rank given to different groups, and the position assigned to certain orders of more or less doubtful relationship. The sporological system of Saccardo, used in his "Sylloge Fungorum" as a basis for the division of the larger groups of the *Pyrenomycetes*, *Discomycetes*, and *Fungi Imperfecti*, is very convenient but artificial. The following arrangement is based upon that given in Engler's "Syllabus." The termination of the ordinal names is that at present adopted and has been used by Underwood. The lichens have been added to the classes of fungi to which they belong. Class I. *Myxomycetes:* orders *Acrasiales*, *Plasmodiophorales*, *Myxogastrales*, *Myxobacteriales*. Class II. *Schizomycetes:* orders *Eubacteriales*, *Thiobacteriales*. *Eumycetes* (true fungi): Class III. *Archimycetes:* order *Chytridiales*. Class IV. *Zygomycetes:* orders *Mucorales*, *Entomophthorales*. Class V. *Oömycetes:* orders *Saprolegniales*, *Peronosporales*. Class VI. *Ascomycetes:* orders *Protomycetales*, *Saccharomycetales*, *Exoascales*, *Aspergillales*, *Perisporiales*, *Hypocreales*, *Dothideales*, *Sphæriales*, *Laboulbeniales*, *Tuberales*, *Hysteriales*, *Phacidiales*, *Pezizales*, *Helvellales*. Subclass *Ascolichenes:* orders *Parmeliales*, *Lecideales*, *Graphidales*, *Caliciales*, *Verrucariales*. *Fungi Imperfecti:* orders *Sphæropsidales*, *Melanconiales*, *Moniliales*. Class VII. *Basidiomycetes:* subclass *Hemibasidii*—order *Ustilaginales*; subclass *Protobasidii*—orders *Uredinales*, *Auriculariales*, *Tremellales*, *Dacryomycetales*, *Exobasidiales*, *Agaricales*, *Phallales*, *Hymenogastrales*, *Lycoperdales*, *Nidulariales*, *Sclerodermatales*. Subclass *Hymenolichenes*.

Fungic acid, the name given to a mixture of citric, malic, and phosphoric acids, which is found in certain species of mushrooms.

fungicidal(fun-ji-sī′dal), *a.* [*fungicide* + *-al*1.] Relating to fungicides or to the killing of fungus or fungi; having the property of destroying fungous or fungoid growths.

fungivore (fun′ji-vōr), *n.* [F. **fungivore*, < L. *fungus*, fungus, + *vorare*, devour.] A trade-name for a crude preparation containing iron sulphate, used at one time in France as a fungicide application to plants, as, for example, to vines attacked by *Oïdium*.

fungose (fung′gōs), *a.* Same as *fungous*.

fungus, *n.*—**Algal fungus.** See ★*algal*.—**Black fungus,** a name applied to any member of the *Pyrenomycetales*.—**Fairy-ring fungus,** the mushroom *Marasmius Oreades*, which forms circles or parts of circles in lawns and pastures, popularly termed fairy rings. See *fairy ring*, under *fairy*.—**Fungus cancer.** Same as *fungus hematodes*.—**Fungus cerebri,** protrusion of the brain-substance through a fracture of the skull. Also called *cerebral hernia*.—**Fungus-digesting plant.** See ★*plant*1.—**Grasshopper-disease fungus,** a species of *Sporotrichum* which attacks grasshoppers and causes their death. This fungus has been distributed for the purpose of checking the ravages of grasshoppers in certain parts of the United States.—**Oak-root fungus.** Same as *oak-seedling* ★*disease*.—**Pine-cone fungus,** the fungus *Æcidium strobilinum*, occurring on the scales of the cones of pine.—**Pine-leaf fungus,** the fungus *Herpotrichia nigra*, occurring on the leaves and branches of the pine and juniper. See ★*Herpotrichia*.—**Shot-hole fungus,** any fungus which attacks the leaves of certain trees, particularly cherries and plums, causing minute purple or brown spots, which later loosen and drop out. *Cylindrosporium Padi*, *Septoria cerasina*, and other forms are responsible for this disease.—**Sore-shin fungus,** a species of *Rhizoctonia* which attacks the weak seedlings of cotton-plants, producing an ulcer just at or below the surface of the ground and often destroying the plant. See ★*damp*, 6.

fungus-body (fung′gus-bod″i), *n.* The large compound structure of the higher fungi: dis-

tinguished from the simple filamentous thallus of the lower fungi. *De Bary.*

fungus-gall (fung'gus-gâl), *n.* A peculiar gall-like growth produced upon various plants by the irritation induced by fungi.

fungus-pit (fung'gus-pit), *n.* A pit in which mushrooms and other fungi are cultivated.

fungus-trap (fung'gus-trap), *n.* That part of the root of a plant which contains a fungus the ultimate fate of which is to be absorbed by the host plant. *Frank.*

funicle, *n.* 5. The central connecting process in those colonies of graptolites which bear no thecæ.

funicular, *a.* 2. In *anat.*: (*b*) Resembling a cord or rope: a term used in describing the arrangement of muscle- or nerve-fibers.—**Funicular action,** action exerted by means of a rope or cable; specifically, in *mech.*, the pull exerted at the ends of a stretched rope or cord when a transverse force is applied to its middle.—**Funicular curve.** Same as *catenary curve.*—**Funicular railway.** See ★*railway.*

Funiculus amnii, a cord which persists for a while after the closing of the amnion and chorion, in ruminants, forming a connecting band between them.

funk[2], *v.* **II.** *intrans.* To smoke offensively, as a fire or chimney, with puffs or gusts.

> But there my triumph's straw-fire flared and *funked.*
> *Browning,* Fra Lippo Lippi, l. 172.

funk[3], *v.* **II.** *trans.* To shrink from or dread; be afraid of; back out from. [Colloq.]

> He "*funked*" the cholera, as he said, and of course he got it. Having got it, he told me that he *funked* it no longer—and he got over it.
> *Geog. Jour.* (R. G. S.), XII. 198.

funk[3], *n.* 2. One who funks, shrinks from, or avoids, or who is in a state of funk.

funnel, *n.*, 4. (*c*) In the chambered cephalopods, the extension of the septum about the siphuncle.—**Buechner funnel,** a special form of funnel made of porcelain, having a perforated bottom on which the filter-paper is laid flat.—**Meyer's funnel,** a glass funnel with its lower rim turned inward and provided with a tubulus: used to place over liquids in the process of evaporation to condense and collect vapors.—**Septal funnel,** one of the narrow funnel-like depressions in the four gastric ridges of the scyphula of certain jellyfishes, as *Aurelia;* an infundibulum.

funnel-box (fun'el-boks), *n.* One of a series of square funnels used in metallurgical works for separating metal-bearing slimes according to fineness.

funnel-breast (fun'el-brest), *n.* Same as ★*funnel-chest.*

funnel-chest (fun'el-chest), *n.* A sinking in of the sternum, forming a conical depression of the anterior wall of the chest.

funnel-draft (fun'el-drâft), *n.* The draft or current of air and products of combustion from a marine boiler caused by the difference in the weight of hot gas inside the funnel or chimney when compared with that of an equal column of external air.

funnel-tube (fun'el-tūb), *n.* A small glass funnel prolonged at the bottom into a tube of considerable length, much used in chemical laboratories. The tube is passed gas-tight through the cork of a bottle or flask. Also called *tube-funnel.*—**Safety funnel-tube,** an ordinary funnel-tube with a double bend, with or without one or more bulbs. A liquid may be poured through it into a gas-generating flask without the risk of being driven out by sudden increase of gaseous tension. It also limits access of air to the contents of the glass, a liquid seal or valve being established by the part of the introduced liquid which lodges in the bend.

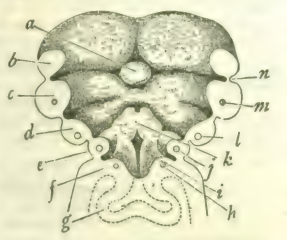
funnel-twister (fun'el-twis″tėr), *n.* A European rhynchitid beetle, *Rhynchites betulæ,* whose larvæ live in beech-leaves, which they roll into a funnel shape.

funori (fö-nō'ri), *n.* [Jap.] 1. A seaweed, *Glœopeltis intricata,* from which the Japanese prepare a fine kind of glue.—2. The glue made from this seaweed. It is used for paste, starch, and sizing, the glazing and stiffening of textile fabrics, etc. *Nat. Geog. Mag.,* May, 1905, p. 208.

funt (fönt), *n.* [Russ. *funtŭ,* < G. *pfund* = E. *pound.*] The Russian pound, equal to nine tenths of an avoirdupois pound.

fun-ting (fun'ting'), *n.* [Also *fën-ting;* Chinese *fun* (*făn*), flour; *Ting Chau,* a place noted for its pottery.] A Chinese porcelain having a white paste, resembling in appearance soft paste but in reality hard.

furca, *n.* 3. An inflected elastic anal organ ending in a fork, by which the animal is enabled to leap, as in *Podura. Kirby and Spence.*



furcal (fėr'kal), *a.* [NL. **furcalis,* < L. *furca,* fork: see *fork.*] Of a fork; also, furcate or forked: as, the *furcal* processes of crustaceans.—**Furcal orifice,** a forked opening, as the sternal slit in certain *Perlidæ.*

furciferine (fėr-sif'ė-rin), *a.* [*Furcifer* + *-ine*[2].] Relating to or characteristic of the deer of the genus *Furcifer,* frequently placed in the genus *Cariacus.*

furcilia (fėr-sil'i-ä), *n.* [NL., < L. *furca,* fork.] A late larval stage in schizopodous crustaceans, in which the paired, stalked eyes become more fully developed and the most anterior pairs of thoracic and abdominal feet begin to form in succession from before backward.

Furcimanus (fėr-sim'ä-nus), *n.* [NL., < L. *furca,* fork, + *manus,* hand.] A genus of zoarcid fishes found in the deep waters of the North Pacific.

furcula, *n.* 3. In *embryol.*, a forked median protuberance arising in the floor of the embryonic pharynx between the third and fourth pairs of visceral arches. It develops into the epiglottis of the adult.—**Furcula supra-analis,** a small forked sclerite just above the anus of a grasshopper.

h, furcula.

The floor of the pharynx of a human embryo, twenty-three days old, seen from above.

a, tuberculum impar; *b*, mandibular arch; *c*, hyoid arch; *d*, first branchial arch; *e*, second branchial arch; *f*, third branchial arch; *g*, lung; *h*, fifth aortic arch in the third branchial arch; *i*, glottis; *j*, fourth aortic arch in the second branchial arch; *k*, furcula; *l*, third aortic arch in the first branchial arch; *m*, second aortic arch in the hyoidean arch; *n*, membrane closing the hyomandibular cleft, which afterward becomes the tympanic membrane. (From Marshall's "Vertebrate Embryology.")

furculite (fėr'kū-līt), *n.* [L. *furcula,* a fork, + Gr. *λίθος,* stone.] A microlite which has a straight stem and forked extremities. *F. Rutley,* in Mineralogical Mag., IX. 266.

furevernic (fū-rē-vėr'nik), *a.* [*fur*(*furacea*) + *Evernia* (see def.) + *-ic.*] Derived from *Evernia furfuracea.*—**Furevernic acid,** an acid, incorrectly called *furevernacid,* said to occur, in traces, in *Evernia furfuracea.*

furfuracryluric (fėr″fėr-ak-ri-lū'rik), *a.* Noting an acid which appears in the urine after the ingestion of furfurol.

furfural (fėr'fėr-al), *n.* [L. *furfur,* bran, + *-al*[3].] See *furfurol.*

furfuraldehyde (fėr-fėr-al'dē-hīd), *n.* Same as *furfurol.*

furfurane (fėr'fėr-ān), *n.* [L. *furfur,* bran, + *-ane.*] A colorless liquid, $\begin{matrix} CH:CH \\ | \\ CH:CH \end{matrix}>O$, formed by the distillation of barium pyromucate with soda-lime: one of the products of the distillation of pine wood. It boils at 31.4–31.6° C., has a characteristic odor, and imparts an emerald-green color to a pine splinter moistened with hydrochloric acid. It is the parent substance of a class of compounds similar in structure to the pyridine and thiophene derivatives.

furfurine (fėr'fėr-in), *n.* [L. *furfur,* bran, + *-ine*[2].] A colorless crystalline basic compound, $C_{15}H_{12}N_2O_3$, formed by the action of a dilute potassium-hydroxid solution on furfuramide. It melts at 116° C.

furfurylamide (fėr'fėr-il-am″id), *n.* [*furfuryl* + *amide.*] Same as *furfuramide.*

furil (fū'ril), *n.* [*fur*(*oin*) + *-il.*] A yellow crystalline compound, prepared by the oxidation of furoin, melting at 162° C. It is the analogue of benzil, and has the formula $C_4H_3O.CO.CO.C_4H_3O$.

furilic (fū-ril'ik), *a.* [*furil* + *-ic.*] Of or pertaining to furil.—**Furilic acid,** a colorless, unstable, crystalline compound, $(C_4H_3O)_2COH.COOH$, prepared by the action of potassium hydroxid on finely divided furil.

furl (fėrl), *n.* [*furl, v.*] 1. A roll of what is furled.—2. The manner of furling (a sail), or the appearance presented when furled: as, a vessel is judged by the *furl* of the sails.

furld, *pp.* A simplified spelling of *furled.*

furlo, *n.* and *v. t.* A simplified spelling of *furlough.*

furnace, *n.*—**Air crucible furnace,** a furnace with crucibles for melting brass.—**Batho's furnace,** a modification of the Siemens open-hearth furnace, from which it differs in shape, being either circular or elliptical, and in that the regenerators are placed outside of the furnace and are independent of it. The advantages of the separate regenerators are that in case of a break-out there is no risk of the metal getting into the regenerators and that it is impossible for a leakage of gas to take place between the gas and the air-regenerators and destroy the brickwork.—**Belgian-Silesian furnace,** a modification of the Belgian and Silesia zinc distillation furnaces: also known as the *Rhenish furnace,* on account of its general use in Rhenish Prussia. It usually has three rows of retorts and is either direct-fired or gas-fired. The retorts are elliptical in shape and, in the modern furnaces, their number exceeds 200. Also *Belgian furnace.*—**Bicheroux's furnace,** a gas reheating-furnace (which see) in which the air for burning the gases is heated in a shallow flue under the bottom of the furnace, thus serving to cool the furnace bottom.—**Black-ash furnace,** same as ★*ball-furnace.*—**Blowpipe furnace,** a furnace fed by powdered fuel, oil, or gas, blown through a pipe with the air which serves for its combustion.—**Boliche furnace.** Same as *Spanish furnace.*—**Cast-steel furnace.** See ★*cast-steel.*—**Coltness furnace,** an early form of blast-furnace which utilized the waste gases of iron-smelting.—**Crucible furnace,** a furnace in which the material to be heated is contained in a crucible of refractory material, and thus kept out of contact with the fuel. Such furnaces are much used in the manufacture of tool steel, in brass foundries, and in chemical laboratories and assaying establishments.—**Decarbonizing-furnace,** a furnace for eliminating the carbon from a bath of fused metal, such as cast-iron or -steel, by oxidizing it, either by the character of the flame or by the constitution of the slag or the furnace-lining.—**Dental furnace,** a small furnace used in the manufacture of porcelain teeth.—**Desulphurizing-furnace,** an oxidizing furnace for sulphurets or sulphids, in which the sulphur is removed by roasting with an abundant supply of oxygen, going off as SO_2.—**Electric furnace,** an arrangement for utilizing the extraordinarily high temperature producible by the discharge of a powerful electric current between two carbon poles. These poles pass through the walls of a trough or inclosure constructed of the most infusible material available, and varied as to size and shape with the particular use intended. The temperature may be made to exceed any that can be produced by combustion, and with the advantage that air may be completely excluded. Important results of a scientific character have been obtained by means of the electric furnace, and it has opened up a new field of industrial use in the manufacture of metallic aluminum, calcium carbide, phosphorus, and other products.—**English silver-refinery furnace,** a reverberatory furnace with a movable bed known as a cupel or test and formerly made of bone ash, but now of a mixture of clay and limestone. The breast of the cupel is perforated with holes for the removal of the litharge, which flows into a pot below. The lead containing about 8 per cent. of silver is run out through a hole in the bottom of the cupel and again cupelled in the same furnace, but the cupel for this operation is provided with a concavity at the bottom for the reception of the cake of pure silver. See *cupellation.*—**Exeli's furnace,** a shaft-furnace adopted for the extraction of mercury from lump-ore. It is provided with three external fireplaces and is encased in sheet-iron to prevent the loss of mercury. The vapors escape into pipes and from these into condensing-chambers. The pipes were at first of cast-iron but these have been replaced by vertical pipes of glazed stoneware. The charging apparatus consists of a cup-and-cone with water-seal. The Exeli furnaces are largely used in India and Austria.—**German furnace,** a furnace for separating and regaining metal from cinder which has chemically absorbed it. It was first used in Germany.—**Gothic furnace,** the shaft- or blast-furnace for smelting iron from its ores: so called from a pointed arch placed over the embrasures when the base of the furnace up to the boshes was made of rubble masonry. The term is obsolete.—**Heating-furnace.** Same as *reheating-furnace,* which see, under *furnace.*—**Herreshoff's furnace,** a rectangular water-jacketed furnace for copper-smelting. Its forehearth is detachable and mounted on wheels, and the slag is removed by means of a lip in front of the forehearth. The furnace is charged from the top which is covered by a hood connected with a lateral pipe for carrying away the waste gases.—**Injector-furnace,** a form of fire-clay furnace for chemical and assay laboratories in which a special blast-lamp is used to burn a mixture of illuminating-gas or petroleum-vapor with air, and the hot flame so produced is driven by bellows into an opening at the bottom of the furnace.—**Mactear furnace,** a mechanical furnace with a circular revolving hearth, for converting black salt into soda-ash by calcination in the Leblanc process for making carbonate of soda from common salt.—**Oxidizing-furnace,** a metallurgical or other furnace in which oxidations are effected, usually by heated air.—**Reflecting-arc furnace,** an electric furnace in which the radiation from an electric arc is reflected upon the substance to be heated.—**Rhenish furnace.** Same as *Belgian-Silesian* ★*furnace.*—**Rotary furnace.** (*a*) A furnace which can be rotated or rocked to pour the metal. (*b*) A furnace which is continually rotated or revolved to secure thorough mixture or chemical reaction under heat as respects the charge.—**Rotary melting-furnace.** See *rotary* ★*melting-furnace* (with cut).—**St. Bede chemical furnace,** a furnace designed for making salt-cake by the action of sulphuric acid on common salt, brought into use at the St. Bede chemical works in England.—**Salt-cake furnace,** the furnace in which (as the first step of the Leblanc process for making carbonate of soda from common salt) salt is heated with sulphuric acid, hydrochloric-acid gas being given off and sodium sulphate left behind as salt-cake. There are various types of furnace so used, but in each there are two parts, the decomposing-pan, in which the first stage of the reaction is carried out, and the roaster or drier, in which the reaction is completed. Also known as a *sulphate furnace.*—**Sefstroem's furnace,** a small but powerful blast-furnace for use in chemical and metallurgical laboratories. The cylindrical body or fireplace is surrounded by an outer cylinder which forms a reservoir for compressed air furnished by a bellows of good size.—**Siemens furnace,** the most important and successful form of furnace in which the regenerative principle is applied. It greatly economizes fuel, produces temperatures much higher than were formerly attainable, admits of exact regulation of temperature, and controls the action of oxygen or its removal in the hearth. It was brought into use in England in 1859 or 1860, and has proved of great value in steel-making, the manufacture of glass and porcelain, and various other industries. Gaseous fuel is used, and this and the air necessary for combustion are separately heated by passage on their way to the hearth through fire-brick chambers filled with loosely stacked fire-brick at a high temperature. The products of combustion are carried from the hearth on their way to the chimney through a second pair

of similar fire-brick chambers, which are thus heated up and become ready to serve the purpose of the first pair as these cool down, the gas- and air-currents being shifted over at proper intervals from the one pair of chambers to the other. A number of other inventors have proposed modifications in detail of the original Siemens furnace.—**Stetefeldt furnace,** a shaft-furnace in which silver ores are chloridized and desulphurized by first pulverizing and mixing them with salt and then dropping them through a current of hot air. So called from its inventor.—**Sulphate furnace.** Same as *salt-cake* ★*furnace.*—**Wedding furnace,** a form of furnace used at the Royal Porcelain Manufactory at Berlin in 1861. It developed a very high temperature by the use of combustible gas along with a forced blast of air, the result being practically that of a blowpipe flame on a large scale. Furnaces of the same general character have been invented by Ekman, Fletcher, and others.

furnace-charger (fėr′nās-chär″jėr), *n.* An apparatus for weighing and feeding into a furnace the proper proportions of ore, fuel, etc.

furnace-gas (fėr′nās-gas), *n.* 1. The products of combustion from a furnace.—2. The gas given off by a blast-furnace. This is rich enough in unconsumed carbon to be useful as a fuel for internal-combustion engines, for the production of steam, and for preheating the blast.

furnace-oven (fėr′nās-uv″n), *n.* A baking-chamber built of brick, with a low arch: used in bakeries.

furnace-plate (fėr′nās-plāt), *n.* Iron or steel plate used to make the furnace or fire-box of a steam-boiler.

furnisher, *n.* 2. In *calico-printing,* the cloth-covered roller or the cylinder-brush which furnishes the color to the engraved roller on the cylinder printing-machine.

furniture, *n.,* 3. (*d*) In a harness, all of the metallic parts with the exception of the bits and rosettes.

furniture-bug (fėr′ni-tūr-bug), *n.* 1. The bed-bug.—2. Any one of several thysanurous insects of the family *Lepismatidæ,* commonly found on old furniture.—3. The silver-fish or slicker. See *silver-fish,* 6.

furoin (fū′rō-in), *n.* [*fur*(*furaldehyde*) + *-o-* + *-in*[2].] A colorless crystalline compound, $C_4H_3O.CO.CH.OH.C_4H_3O$, melting at 135° C. It is prepared by the action of potassium cyanide on furfuraldehyde in dilute aqueous-alcoholic solution, and corresponds to benzoin.

furonic (fū-ron′ik), *a.* [*fur*(*furpropi*)*on*(*ic*).] Noting an acid, a colorless crystalline compound, $C_7H_8O_3$, formed by the oxidation of furfurpropionic acid. It melts at 180° C.

furred, *a.* 3. Fitted with a kind of partition made with furring-strips, as an outer wall of masonry. The lath and plaster work are secured to the furring-strips and so are not exposed to the dampness of the wall.

Furriers' asthma. See ★*asthma.*

furrow, *n.*—**Ambulacral furrow, arm furrow.** Same as *ambulacral groove* (which see, under *ambulacral*).—**Dead furrow.** Same as *water-furrow.* [U. S.]

The plowing of a thoroughly tiled field should leave no *dead furrows* for surface-water to follow.
W. I. Chamberlain, Tile Drainage, p. 68.

Flat furrow, in *agri.,* a furrow so cut and so turned that the furrow-slice rests upon its face: opposed to *lap* ★*furrow.*—**Genital furrow,** an infolding of the integument just below the genital tubercle in the embryo: this becomes later the vulvar opening or the urethra.—**Gluteal furrow,** the crease between the nates.—**Interventricular furrow,** a longitudinal depression on the external surface of the heart, on either side, marking the course of the septum between the two ventricles.—**Jadelot's furrows,** various lines seen on the face in disease.—**Lap furrow,** in *agri.,* a furrow in which the slice is so shaped and so turned that one edge rests on the preceding slice and another supports the succeeding one: opposed to *flat* ★*furrow.*—**Lunoid furrow,** in *glaciol.,* a crescentic depression due to subglacial erosion. *Nature,* April 10, 1902, p. 541.—**Mayrian furrow,** one of the two oblique furrows which form a V-shaped figure on the mesonotum of male ants: not to be confounded with the parapsidal furrows.—**Meridian furrow,** a central furrow occurring in segmentation of the ovum.—**Nuchal furrow.** Same as ★*neck-furrow.*—**Open furrow,** any furrow not filled by a furrow-slice; either a water-furrow proper or a cross-furrow for drainage.—**Seed furrow,** the last plowing before the sowing. *Law,* Pract. Agr., p. 235.—**To strike the furrows,** in *agri.,* to mark off the center of a ridge; to feer.—**Ungual furrows,** transverse grooves in the nails, formed at the root during a severe illness or other period of lowered nutrition.—**Vitelline furrow yolk-furrow,** a linear depression on the surface of the ovum marking the beginning of segmentation.—**Winter furrow,** in bare-fallowing, the autumnal plowing. *Loudon,* Encyc. Agr., p. 802.

furrow-pan (fur′ō-pan), *n.* In *plowing,* the bottom of the furrow compacted by the weight and action of the plow and horse; also the subsurface soil of a field so compacted.

furrow-wheel (fur′ō-hwēl), *n.* In a plow, a small wheel running in the furrow. In gang sulky-plows, two are used, placed one behind the other at an angle. Instead of running vertically they are inclined outward to reduce the friction.

fürst (fürst), *n.*; pl. *fürsten.* [G., prince, sovereign, MHG. *vürste,* OHG. *furisto* (D. *vorst*), a prince, lit. the first or chief person (L. *primus* or *princeps*), < *furist* = AS. *fyrst,* E. *first, a.*] A German or Austrian title of nobility of lower rank than *herzog,* or duke, and higher than *graf,* or count. The title is usually translated 'prince': as, *Fürst* Bismarck. The feminine is *fürstin.*

furtiv, *a.* A simplified spelling of *furtive.*

furunculoid (fū-rung′kū-loid), *a.* [L. *furunculus,* a boil, + *-oid.*] Resembling a boil in appearance or sensation.

furunculose (fū-rung′kū-lōs), *a.* Same as ★*furunculous.*

furunculous (fū-rung′kū-lus), *a.* Marked by successive eruptions of boils.

fur-worker (fėr′wėrk″ėr), *n.* In *leather-manuf.,* a wheel for removing the oil from fur-skins. *Modern Amer. Tanning,* p. 204.

furz, *n.* A simplified spelling of *furze.*

furze[1], *n.*—**Native furze,** in Australia, an evergreen shrub, *Hakea ulicina,* of the family *Proteaceæ.*

furze[2] (fėrz), *v. i.*; pret. and pp. *furzed,* ppr. *furzing.* [For *fuzz, v.*] To become entangled, as silk fibers during the reeling from the cocoon.

These [weak cocoons] are separated from the other kinds, because in reeling they must be immersed in colder water in order to avoid any *furzing* or entangling in the operation.
Hannan, Textile Fibres of Commerce, p. 175.

furze-top (fėrz′top), *n.* A name of the red-top, *Agrostis alba,* and of the Rhode Island bent, *A. canina.*

fusain (fü-zañ′), *n.* [F., the spindle-tree, also charcoal made from it, <ML. *fusago* (*fusagin-*), < L. *fusus,* a spindle.] A crayon of fine charcoal; also, a charcoal sketch.

fusarial (fū-zā′ri-al), *a.* [*Fusarium* + *-al*[1].] Of or pertaining to the fungus *Fusarium.*

A *fusarial* disease of tomatoes occurs in Florida and also in England.
U. S. Dept. Agr., Div. Veg. Physiol. and Pathol., [Bulletin 17, p. 35.

Fusarium (fū-zā′ri-um), *n.* [NL. (Link, 1809), L. *fusus,* a spindle.] A large genus of hyphomycetous fungi, having more or less effused sporodochia and bearing mostly spindle-shaped or sickle-shaped light or bright colored conidia on branched conidiophores. About 300 species have been described, many of which are probably not distinct. Some are known to be the conidial forms of hypocreaceous ascomycetes and cause serious plant diseases, as *F. vasinfectum,* the conidial stage of *Neocosmospora vasinfecta,* which causes the wilt-disease of cotton and cow-peas. See *wilt-disease,* under ★*disease,* and ★*wilt.*

fuscin, *n.* 2. A black pigment found in the choroid and the epithelial layer of the retina, adjoining the choroid of the eye.

fuscohyaline (fus-kō-hī′a-lin), *a.* [L. *fuscus,* dusky, + Gr. *ὑάλινος,* of glass: see *hyaline.*] Dusky but translucent, as the wings of certain insects. *Annals and Mag. Nat. Hist.,* April, 1903, p. 399.

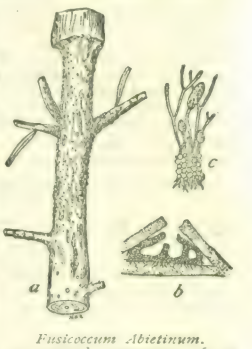
fuscopiceous (fus-kō-pish′ius), *a.* [L. *fuscus,* dusky, + *piceus,* of pitch: see *piceous.*] Dusky black; dark gray. *Annals and Mag. Nat. Hist.,* June, 1903, p. 610.

fuscopunctate (fus-kō-pungk′tāt), *a.* [L. *fuscus,* dusky, + NL. *punctatus,* punctate.] Having dark punctures, as the elytra of a light-colored beetle. *Annals and Mag. Nat. Hist.,* May, 1901, p. 423.

fuscoviolaceous (fus″kō-vī-ō-lā′shius), *a.* [L. *fuscus,* dusky, + *violaceus,* of violet color: see *violaceous.*] Dusky violet in color. *Annals and Mag. Nat. Hist.,* Aug., 1903, p. 268.

fuse[2], *n.* 2. In *elect.,* a piece of conductor, inserted into an electric circuit, which is of less current-carrying capacity than the rest of the circuit, and therefore under excess of current melts and opens the circuit. Fuses are either exposed (that is, *open* fuses) or protected by an insulating-tube which frequently is filled with some granulated insulating material. These latter are called *inclosed* or *cartridge* fuses.—**Chemical fuse,** a fuse which is fired by chemical action between substances brought into contact: used in torpedoes or submarine mines.—**Detonating-fuse,** a fulminate-fuse used for detonating high explosives.

fuse-block (fūz′blok), *n.* In *elect.,* a block of porcelain or other refractory insulating material provided with terminals between which the fuse-wire of an electric circuit is connected. Fuse-blocks are commonly made in two parts, a base on which the fuse is mounted, and a cover to prevent the escape of the molten metal when the fuse is overheated.



fuse-link (fūz′lingk), *n.* In *elect.,* a link, made of fuse-wire or cast from fusible metal, for insertion in a fuse-block.

fuse-lock (fūz′lok), *n.* A device for lighting the free end of a fuse by means of a friction-match which is set off by pulling a lanyard attached to a trigger.

fuse-wire (fūz′wīr), *n.* In *elect.,* wire made of an easily fusible metal and used to protect circuits from excessive currents. When the current passes a certain value, depending on the size of the wire, the latter melts, thus breaking the circuit.

fusibility, *n.*—**Scale of fusibility,** a series of six species proposed by Franz von Kobell, and now commonly used in designating the relative fusibility of minerals. The species are: (1) stibnite; (2) natrolite; (3) almandin garnet; (4) actinolite; (5) orthoclase; (6) bronzite.

Fusicoccum (fū-zi-kok′um), *n.* [NL. (Corda, 1829), <L. *fusus,* spindle, + Gr. *κόκκος,* berry.] A genus of sphæropsidaceous fungi in which the pycnidia form more or less irregular chambers in a black leathery pustular stroma. The spores are simple, hyaline, and usually spindle-shaped. The species occur chiefly on the branches of woody plants and some are regarded as the pycnidial condition of species of the pyrenomycetous genus *Diaporthe. F. Abietinum* causes a girdling of the silver fir by killing the bark on the small branches.

Fusicoccum Abietinum.
a, general appearance of an affected twig; *b,* cross-section of a stroma; *c,* spore-bearing mycelium (enlarged). (Drawn from Engler and Prantl's "Pflanzenfamilien.")

Fusiform gyrus. See ★*gyrus.*

fusing (fū′zing), *n.* The technical name of a process to which the harder resins, amber and copal, are subjected preparatory to using them in making varnishes. More than mere liquefaction being required, a partial destructive distillation is brought about by the continued action of heat, and volatile products are given off, after which the residue becomes soluble in turpentine and some other solvents. *Sadtler,* Handbook of Indust. Chem., p. 109.

fusion, *n.* 6. In *modern psychol.*: (*a*) A mode of intimate connection of elementary mental processes, such that the connected elements are difficult of analysis, and the resulting complex approximates the simplicity of impression characteristic of the element itself. (*b*) The product of this connection; the blend or fused complex. The term has gained currency from its use in C. Stumpf's "Tonpsychologie" (1883, 1890). It is used with varying shades of meaning by different authors, and has not as yet received final definition.

By far the great majority of odours are not elementary at all, but compound,—mental complexes or *fusions* of the same sort as the note of a musical instrument, which is in reality a combination of a number of simple tones.
E. B. Titchener, Exper. Psychol. I. i. 70.

Aqueo-igneous fusion. Same as *hydrothermal* ★*fusion.*—**Degree of fusion,** the relative simplicity or complexity of a fusion of sensations. See the quotation.

Since the fusion [of tones] presents all grades, from obvious complexity to a simplicity that counterfeits the simplicity of sensation, we may speak of a scale of *fusion degrees.* That fusion is the most perfect, which is most unitary in perception; that fusion is the least perfect, whose components fall apart most readily in perception.
E. B. Titchener, Exper. Psychol., I. i. 171.

Diffuse fusion, in Wundt's psychology, a fusion such as is presented by a noise, or a complex of noise and tone, in which the tonal elements may be referred to a certain region of the tonal scale, but cannot be separately identified as tones of definite pitch: opposed to *distinct* ★*fusion.*—**Distinct fusion,** in Wundt's psychology, a fusion such as is presented by the clang or musical note, in which, while a single tone of definite pitch dominates the complex, the other modifying tones, though less in evidence, can also be identified by specially directed attention as tones of similarly definite pitch: opposed to *diffuse* ★*fusion.*—**Extensive fusion,** in Wundt's psychology, the fundamental form of simultaneous association which gives rise to the idea of space. A *fusion,* for Wundt, is an association characterized by the intimacy of connection of the elements and the novelty of the resultant. The idea of space is termed an *extensive fusion,* in order to mark the nature of the total process which results from the association of the intensive and qualitative elements. *Baldwin,* Dict. of Philos. and Psychol., I. 398.—**Heat of fusion.** See *fusion.*—**Hydrothermal fusion,** fusion by heat in the presence of water or of water vapor; fusion by the combined action of heat and water. Also called *aqueo-igneous fusion.*—**Intensive fusion,** in Wundt's psychology, a fusion of like sensational elements: opposed to *extensive* ★*fusion.*—**Powder of fusion.** See ★*powder.*—**Primary fusion,** in *embryol.,* union or fusion of undifferentiated structures, as in the formation of double monsters by the primary fusion of the axes of two embryos developing in the same egg.—**Secondary fusion,** union or fusion of embryonic structures at a relatively late stage, after they have been clearly differentiated.—**Tonal fusion,** in *psychol.*: (*a*) The mode of connection of simultaneous sensations of tone. (*b*) The perception set up by the concurrence of a number of simple tonal stimuli. See ★*fusion,* 6.

fusion-disk (fū′zhọn-disk), *n.* Same as ★*disk-saw.*

fusion-point (fū′zhọn-point), *n.* The temperature at which a solid substance melts.

Fusoma (fū-zō′mä), *n.* [NL. (Corda, 1837), < L. *fusus*, spindle, + *-oma*.] A genus of hyphomycetous fungi, having the hyphæ but slightly spreading and bearing spindle-shaped septate conidia. *F. parasiticum* is a parasite on pine seedlings.

fuss-budget (fus′buj″et), *n.* A nervous, fidgety person. [Dialect. U. S.] *Dialect Notes*, II. vi.

fusser (fus′ėr), *n.* 1. One who fusses or makes a fuss over or about something.—2. One who 'fusses' over girls; a particularly active beau. [College slang.]

fustee (fus-tē′), *n.* [Appar. a variation of *mustee*, *mestee*.] The offspring of a mestee and a white. [West Indian.]

Fustic substitute, a trade-name for a dyestuff consisting of quercitron extract to which stannate of soda or sulphate of zinc has been added. *Sadtler*, Handbook of Indust. Chem., p. 459.—**Old fustic,** a dyewood from *Morus tinctoria*, and also from *Maclura tinctoria* and *Broussonetia tinctoria*. See *fustic*.

fustin, *n.*—**Patent fustin,** a mordant acid coal-tar color of the monoazo type, prepared by combining diazotized aniline with fustic extract. It dyes wool yellow in an acid bath. An after-chroming renders the color faster. Also called *wool yellow*.

Fusulinidæ (fū″sū-lin′i-dē), *n. pl.* [NL., < *Fusulina* + *-idæ*.] A family of extinct *Foraminifera*, having fusiform or spherical calcareous tests composed of spirally enrolled whorls which are divided into chambers by vertical septa and into chamberlets by transverse partitions.

futil, *a.* A simplified spelling of *futile*.

futtah (fut′ä), *n.* [Maori *whata* = Samoan *fata* = Tongan *fata*, a raised platform or storehouse, = Hawaiian *haka*, a ladder, a henroost.] A storehouse for grain, etc., set on four posts so beveled as to afford no hold for rats that attempt to climb them. [New Zealand.]

futu (fö′tö), *n.* [Samoan and Tongan *futu*, Fiji *vutu*.] A name given in Samoa and Tonga to *Barringtonia speciosa*, a handsome littoral tree having 4-cornered pyramidal fruit the outer portion of which is used by the natives as a fish-intoxicant. In Fiji the fruits are also used by the natives as floats for fishing-nets and in playing a certain game. The tree is of wide distribution and is characteristic of the vegetation of the inner beach on many tropical shores. See ★*botong* (with cut), and ★*Barringtonia formation*. Also called *hutu*.

Future debt. See ★*debt*.

fuye (fö′yā), *n.* [Jap.] The Japanese flute.

Fuye.

fuz, *n.* and *v.* A simplified spelling of *fuzz*.

fuze, fuzion. Simplified spellings of *fuse, fusion*.

fuzzing (fuz′ing), *n.* In shuffling cards, the act of taking one from the top and one from the bottom simultaneously, with the finger and thumb of the right hand. Also called *milking* and *snowing*.

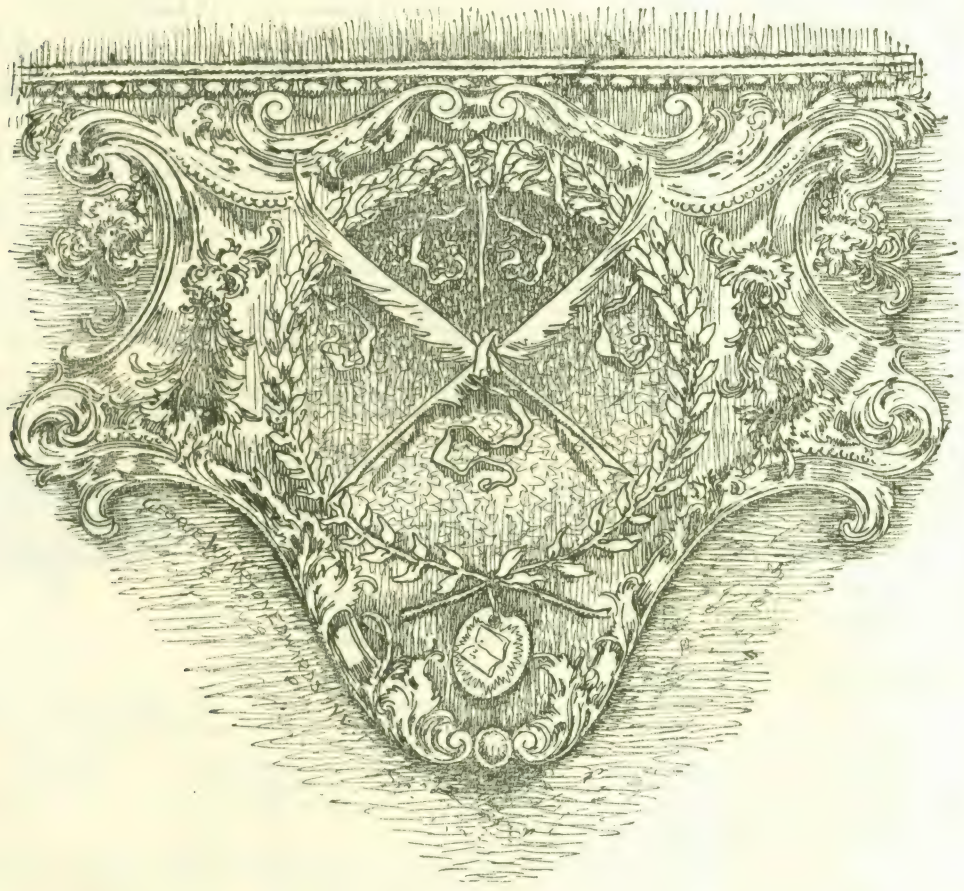
fuzzitype (fuz′i-tīp), *n.* [*fuzzy* + *-type*.] An intentionally blurred photograph. [Colloq.]

'*Fuzzitypes*' have no precise functions in illustrating geological phenomena.
Rep. Brit. Ass'n Advancement of Sci., 1901, p. 341.

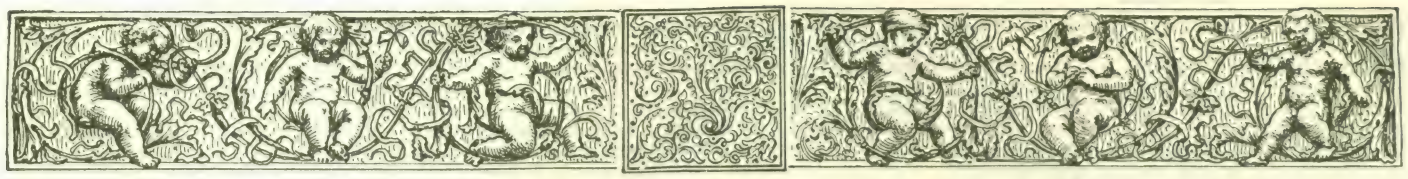
fuzzy-guzzy (fuz′i-guz″i), *n.* The common everlasting, *Gnaphalium obtusifolium*, so called from its fuzzy appearance. Also called *feather-weed*.

fyce, *n.* Same as *fice*.

fylactery, *n.* A simplified spelling of *phylactery*.



fyrk (fürk), *n.* [Sw. Dan.] A copper coin formerly current in Sweden and Denmark; 192 were equal to one rix-dollar.



fysic, fysical, fysician, etc. Simplified spellings of *physic*, etc.

fysiognomist, fysiognomy. Simplified spellings of *physiognomist, physiognomy*.

fysiologic, fysiologist, etc. Simplified spellings of *physiologic*, etc.

F. Z. S. An abbreviation of *Fellow of the Zoölogical Society*.

G

4. In *music:* (*d*) The *G* next above middle C has (at French pitch) about 388 vibrations per second. (*h*) The proper tone of the fourth or lowest string of the violin, which is therefore called the G-string. The violin or treble clef designates the degree of the staff assigned to the G next above middle C.— **6.** In *chem.*: (*b*) G α, β, γ, δ, ϵ, ζ, and η, symbols provisionally assigned by Crookes to chemical elements the presence of which in the oxids of the yttria group from gadolinite seemed to be indicated by special features in the phosphorescent spectrum.

7. In *elect.*, a symbol for *conductance*, the reciprocal of resistance. See *conductance.*— **8.** An abbreviation (*a*) [*l. c.*] of *genitive;* (*b*) of *German* and *Germany;* (*c*) [*l. c.*] of *gram;* (*d*) of *gulf;* (*e*) in a log-book, of *gloomy weather.*

Ga. **3.** An abbreviation of *Gaelic.*

G. A. An abbreviation (*a*) of *General Assembly;* (*b*) [*l. c.*] of *general average.*

gab[6] (gäb), *n.* [Hind.] Same as *gaub.*

gabare (gä-bär′), *n.* [F., < Pr. *gabarra*, = Sp. It. *gabarra;* origin unknown.] *Naut.*, a store-vessel or lighter.

gabatta[1] (ga-bat′ä), *n.* See ★*mancala.*

gabbock (gab′ok), *n.* [Also *gabbok, gabbuck, gobbock,* < Ir. *gobóg*, a dogfish, perhaps < *gob*, mouth.] A dogfish peculiar to St. George's Channel, between Wales and Ireland.

gabbro, *n.* It is proposed, in the field classification of igneous rocks in connection with the quantitative system of classification (1902), to use the term *gabbro* for all granular igneous rocks with dominant pyroxene and subordinate feldspar of any kind, with or without hornblende and mica. Such rocks would include the less feldspathic gabbros and norites, and some diorites. See ★*rock*[1].

gabbro-diorite (gab′rō-dī″ō-rīt), *n.* **1.** A rock intermediate between gabbro and diorite, having both pyroxene and hornblende in nearly equal amounts.—**2.** A rock partly altered, or completely metamorphosed, in which the hornblende is secondary. Same as ★*metadiorite.*

gabbroid (gab roid), *a.* [*gabbro* + *-oid.*] In *petrog.*, resembling or somewhat like gabbro; also suggested by Chamberlin and Salisbury (1904) as a general term applicable to any crystalline rock in which the ferromagnesian minerals predominate: thus, many diorites, gabbros, and dolerites, and all peridotites would be *gabbroids.*

gabgab (gäb′gäb), *n.* [Chamorro *gabgab*, Tagalog *dapdap.*] **1.** On the island of Guam, the coral-tree, *Erythrina Indica*, the appearance of the bright scarlet blossoms of which announces the beginning of the rainy season. Its wood is soft and is used for making troughs. —**2.** The South Sea arrow-root. See ★*gaogao.*

gabi (gä′bē), *n.* [Philippine Sp., also *gaby, gabe* (spelled also *gave*), < Tagalog and Bisaya *gabi.*] A name given in the Philippines to the taro plant, *Caladium Colocasia*, the starchy rootstock of which is a food staple of the natives. Also called *dagmai.* See *taro*[1] and *Colocasia.*

gabilan (gä-bē-län′), *n.* [Sp., a hawk: see *gavilan.*] A name, in Mexico, of one of the large rays, *Rhinoptera steindachneri.*

gabing-ouak (gä-bing-ō-wäk′), *n.* [Tagalog *gabing-ouak*, crow's-taro, < *gabi*, taro, + *ouak*, crow.] A very acrid stemless aroid, *Typhonium divaricatum*, which grows in damp places. [Phillipine Is.]

Gabion trip, wrought-iron gabion hoops so intertwined as to form an entanglement.

gabionate (gā′bi-ọn-āt), *v. t.*; pret. and pp. *gabionated*, ppr. *gabionating.* [*gabion* + *-ate*[2].] To furnish or protect with gabions. *Urquhart*, tr. of Rabelais.

gable[1], *n.* **4.** In *mech.*, the outer end or tip of the crank in a cranked axle or shaft. The finishing of this is termed *cutting the gable.*

gable[1] (gā′bl), *v. t.*; pret. and pp. *gabled*, ppr. *gabling.* To give to a roof a gable or gabled end.

gable-belfry (gā′bl-bel″fri), *n.* A small bell-tower or belfry, having a gabled roof; a bell-gable.

gable-wall (gā′bl-wâl), *n.* The wall which forms the gable-end of a house. In a simple square or rectangular house with doubled-pitched roof there are two side-walls and two gable-walls. Generally, but not always, a gable-wall rises into a pointed, triangular top.

gab-motion (gab′mō″shọn), *n.* A reversing valve-gear for slow-running steam-engines, in which a gab-hook is used to attach the eccentric-rod to the valve-stem or wrist-plate. There will be two eccentrics: one set relatively to the engine-crank for forward motion, and the other nearly 180 degrees from it for backward motion. Each will have its own rod, and will carry its gab-hook near the end. The engine, when started by hand, will continue to turn in the direction determined by the engagement of one or the other hook with the pin which drives the valve-rod.

Gaboon rubber. See ★*rubber.*

gaboric (ga-bor′ik), *a.* Same as ★*jaboric.*— **Gaboric acid.** Same as ★*jaboric acid.*

gaboridine (ga-bor′i-dēn), *n.* Same as ★*jaboridine.*

gaborine (gab′ō-rin), *n.* Same as *jaborine.*

Gackenia (ga-kē′ni-ä), *n.* [NL. (Heister, 1763), named in honor of A. C. *Gackenholz* (died 1717), professor at Helmstadt.] A genus of dicotyledonous plants of the family *Brassicaceæ.* To this genus belong the stock-gillyflowers, the most important species being *G. incana* (*Cheiranthus incanus* of Linnæus) *G. annua* (*Cheiranthus annuus* of Linnæus), and *G. tristis* (*Cheiranthus tristis* of Linnæus). See *Matthiola.*

gad[1], *n.* **8.** A measuring-rod for land; a measure of length varying, in different districts, from nine or ten to as many as twenty feet.— **9.** A division of an uninclosed pasture, said to have been usually 6½ feet wide in Lincolnshire.

gad[4] (gad), *n.* [Ir. *gad.*] A cord or rope made from the fibers of the osier. [Irish.]

gadabout, *n.* **2.** A light square box-wagon, a substitute for the democrat.

gadenium (ga-dē′ni-um), *n.* [NL.] A name given to one of several alleged new chemical elements said to have been detected in rocks of glacial origin in Scotland. There is no good reason for believing in the existence of such a substance, and it is doubtful whether the original announcement was intended to be taken seriously.

gadfly, *n.*— **American gadfly,** *Tabanus americanus.*— **Black gadfly,** *Tabanus atratus.*— **Black-striped gadfly,** *Tabanus nigrovittatus.*— **Mexican gadfly,** *Tabanus mexicanus.*

gadge (gaj), *n.* [A blunder due prob. to an imperfect memory of *ganch*, or a pseudo-archaism, *gagge*, old spelling of *gag*, erroneously supposed to have been pronounced *gadge* (gaj).] A spurious word, in the passage quoted, intended to denote some instrument of torture.

> Ah, they come! Fly you, save yourselves, you two!
> The dead back-weight of the beheading axe!
> The glowing trip-hook, thumbscrews and the *gadge!*
> *Browning,* A Soul's Tragedy, i.

gad-hook (gad′hůk), *n.* A long pole terminating in an iron hook, used by millers to clear their streams of floating logs and branches. Also *gad-crook.* *F. T. Elworthy,* Dialect of West Somerset. [Eng. Dial.]

gadimine (gad′i-min), *n.* [Origin not ascertained.] A non-poisonous ptomaïne, $C_7H_{18}O_7N$, formed during the putrefaction of herrings and of corpses.

gadolinia (gad-ō-lin′i-ä), *n.* [NL.: see *gadolinium.*] In *chem.*, oxid of gadolinium, one of the rare earths, found as a constituent of the mineral samarskite from North Carolina; also found in orthite.

gadolinic (gad-ō-lin′ik), *a.* In *chem.*: (*a*) Containing gadolinium as a chemical constituent: as, gadolinic nitrate or sulphate. (*b*) Relating to or derived from gadolinite.

gadolinium, *n.* It belongs to the same family as yttrium. Its oxid is white, and its salts are colorless: atomic weight about 156. It perhaps represents a mixture of more than a single element.

gadolinum (gad-ō-lī′num), *n.* In *chem.*, same as *gadolinium.*

gadroon, *n.* Same as *godroon.*

gaduin (gad′ū-in), *n.* [L. *gadus*, cod, + *-u-* + *-in*[2].] An organic substance obtained by De Jongh from brown cod-liver oil. It is possibly identical with the morrhuic acid, $C_9H_{13}NO_3$, described by Gautier and Mourgues.

gad-wand (gad′wond), *n.* A goad for oxen.

gæidinic (jē″i-din′ik), *a.* [See ★*gaidic.*] Same as ★*gaidic.*

Gaelicist (gā′li-sist), *n.* [*Gaelic* + *-ist.*] A student of Gaelic; one who advocates the study and use of Gaelic.

> So far as the patriotic, the national, situation is concerned, we think that Dr. Hyde and the *Gaelicists* may be reassured. *Evening Mail,* Nov. 28, 1905.

gæsum (jē′sum), *n.* [LL. or ML. *gesum, gesus,* Gr. *γαῖσον, γαῖσος*, a spear; cf. AS. *gār*, a spear: see *gar*[1], *gore*[2].] A long, heavy javelin peculiar to the ancient Gauls.

gaf, *n.* and *v.* A simplified spelling of *gaff*[1].

gaff[1], *n.*— **Fore-trysail gaff** (*naut.*), the gaff to which the head of the fore-trysail is bent.— **Standing gaff,** gaffs which are kept hoisted, or throated and peaked, and on which fore-and-aft sails are set by means of an outhaul, and furled by means of brails. These sails have no booms.

gaff[3] (gåf), *n.* [Of slang origin?] Short for *gaffer.*

gaff[4] (gåf), *n.* [Origin obscure.] Used in the following phrase.— **To blow the gaff.** See ★*blow*[1].

gaff-band (gaf′band), *n.* A split spring-band, designed to fit over a gaff, and held together by a screw-bolt which draws the ends together, binding it to the gaff.

gaffer[2], *n.* **3.** A workman in a glass-factory; a finisher.

gaff-net (gaf′net), *n.* *Naut.*, an angler's net for landing fish: used in place of a gaff-hook.

gaff-sail (gaf′sal), *n.* *Naut.*, a fore-and-aft sail which sets upon a gaff: in distinction from a staysail or a squaresail, which set respectively upon a stay and a yard. See cut under *gaff*[1].

gaff-string (gaf′string, *n.* *Naut.*, an English term for a rope for making fast a portable post or staff to the side of a lighter.

Gaff-topsail clue-line. See ★*clue-line,* ★*halyards.*

gag[2] (gag), *n.* [A particular use of *gag*[1], *n.*] A common name of *Mycteroperca microlepis*, a large serranoid fish, attaining a length of two

Gag (*Mycteroperca microlepis*).
(From Bull. 47, U. S. Nat. Museum.)

or three feet: found on the southern Atlantic and Gulf coasts of the United States.

gag-chain (gag′chān), *n.* A short chain used in place of a gag-strap.

gage[1], *n.*— **In gage,** pledged; pawned.

gage[2], *v. t.* **4.** To adjust the proper quantity of water to be used in mixing hydraulic cement.

gage[2], *n.* **5.** A pipeful of tobacco. *N. E. D.* —**Auger-bit gage.** See *auger-bit.*— **Birmingham gage,** a gage for wire and sheet-metals, which was adopted in Birmingham, England. See *wire-*★*gage* and ★*B. W. G.*— **Boiler-plate gage,** a caliber-square adapted to measuring the thickness of sheet-metals.— **Carpenter's gage,** a gage for scribing: used by carpenters to mark an incised line parallel to the edge of a board, or the like.— **Circumference gage,** a slide-rule and caliber-gage graduated to give readings of the relative circumference and diameter of a rope or other cylindrical body; an internal and external gage.— **Closed-vacuum gage,** a mercurial barometer-gage for pressures below 1,000 millimeters. The upper limb of the U-tube is sealed and a trap inserted. — **Combination gage,** a gage which indicates two measurements, as pressure and vacuum, pressure and head of water, or pressure and temperature of steam.— **Compound gage.** Same as *combination* ★*gage.*— **Cylindrical**

gage, a standard steel gage for measuring internal and external diameters.—**Glass-cutter's gage,** an instrument for measuring and marking glass. It is essentially a scratch-gage having a diamond-point at the end.—**Hook-gage,** a gage for measuring the height of water in a stream or reservoir in which the zero of the gage, or the point intended to coincide with the surface of the water, is the point of a sharp metal rod or heavy wire depending from the gage and bent in the form of a hook pointing upward and touching the water surface from beneath the surface.—**McLeod gage,** an apparatus for measuring very small pressures by taking a known volume of the gas whose pressure is to be measured and compressing it into a very small tube; its volume and pressure after compression having been observed its original pressure can then be calculated by Mariotte's or Boyle's Law.—**Railway-gage,** the distance between perpendiculars on the insides of the heads of the two rails of a track. *Standard gage* is 4 feet 8½ inches; anything less than this is *narrow gage;* anything broader is *broad gage.* The dimension was fixed for the United States by the wheels of the British locomotive imported from the Stephenson Works in 1829. The gage, in England, is probably due to the fact that the distance from center to center of wagon-wheels is five feet: the first rails were troughs or channels to receive these five-foot wheels. When the change was made to flanged wheels in place of flanged rails, the axle or center dimensions of the wheels were not changed, but the gage was made to conform to the dimension of the modified wheel-tread. Some railways in the United States have 4 feet 9 inches as their standard. The broad gage in England was seven feet; in the United States it was six feet. The narrow gage in Europe is one meter: in the United States three feet. See *gage*[2], 2, (*a*).—**Thickness-gage,** a gage for testing the thickness of thin sheet-metals. It consists of a series of steel leaves bound together in a case that can be carried in the vest-pocket. The leaves range in thickness from four thousandths to twenty-five thousandths of an inch. Sometimes called a *feeler.*—**Weighing gage,** in *meteor.,* a recording gage that shows the weight of the rainfall or snowfall and the time, or the rate of fall by weight. **Wire-gage.** (*b*) A system of numbers corresponding to certain sizes for wire. A great many such systems are in use. Some of the more common are the Birmingham wire-gage (in America often called the *Stubs wire-gage*), the American or Brown and Sharpe wire-gage, and the new British Standard of 1884. The diameters corresponding to a few numbers of these gages are here given:

Number.	Birmingham: inch.	Brown and Sharpe: inch.	New British: inch.
0	0.34	0.325	0.324
10	0.134	0.102	0.128
20	0.035	0.032	0.036
30	0.012	0.010	0.012
40		0.0031	0.0048

gage-brick (gāj′brik), *n.* See *gaged brick,* under *brick*[2].

Gaged work. See ★*work.*

gage d'amour (gäzh dä-mör′), *n.* [F.] A pledge or token of love.

gage-field (gāj′fēld), *n.* The field covered by a photograph of a restricted area of the heavens, made with a given instrument, under constant conditions, for the purpose of gaging the abundance or density of the stars in that region.

As a specimen of a photographic *gauge-field* on a small scale, we may take Prof. Pickering's catalogue, from the Harvard plates, of 947 stars within 1° of the north celestial pole. The region examined lies about 27° from the zone of the Milky Way, but is nearly reached by a faint extension from it.

A. M. Clerke, in Smithsonian Rep., 1891, p. 107.

gage-plate (gāj′plāt), *n.* An adjustable stop fitted on shearing, punching, and cutting-off machines, as a guide for cutting or punching pieces to a uniform dimension.

gage-rod (gāj′rod), *n.* An iron or steel rod, from ¼ to ½ inch in diameter, the ends of which are tapered nearly to a point, used in measuring the internal diameter or bore of a piece which must be carefully fitted. Such a rod is also used to test the shape of flues of internally fired boilers when subjected to hydraulic pressure to ascertain if there is any tendency to flatten out or assume an oval form.

gage-tube (gāj′tūb), *n.* A tube used to connect a pressure- or other gage to the cylinder or vessel the pressure in which is to be observed.

gage-weir (gāj′wēr), *n.* A dam of which the whole, or a portion, consists of movable shutters or wickets, by opening or closing which at different stages of water the height of water above the dam can be regulated.

gaging, *n.* **4.** Calcined gypsum added to plaster to regulate its rate of setting or hardening.

gaging-line (gā′jing-līn), *n.* A graduated line drawn on a gaging-rod or slide-rule which is used for measuring the contents of casks.

gag-strap (gag′strap), *n.* A short strap which passes under a horse's jaw. The ends are secured to rings or eyes in the top arms of the bit.

gaidic (gī′dik), *a.* [(*hypo*)*ge*(*ic*) + *-id* + *-ic.*] Derived from hypogeic acid.—**Gaidic acid,** a colorless crystalline compound, $C_{16}H_{30}O_2$, melting at 39° C. It belongs to the oleic series and is formed by the action of nitrous acid on hypogeic acid, with which it is isomeric. Also called *gæidinic acid.*

Gaidropsarinæ (gī″drop-sa-rī′nē), *n. pl.* [NL., ⟨ *Gaidropsarus* + *-inæ.*] A subfamily of gadoids or catfishes, including the bearded rocklings, typified by the genus *Gaidropsarus.*

Gaidropsarus (gī-drop′sa-rus), *n.* [NL. (Rafinesque).] A genus of fishes, including the three-bearded rocklings, of the family *Gadidæ,* found in the North Atlantic. The commonest European species is *G. mediterraneus.* The genus is commonly known as *Onos* or *Motella,* but the name *Gaidropsarus* is much older.

Gaillardia, *n.* **2.** [*l. c.*] A plant of the genus *Gaillardia.* Of the cultivated species, *G. aristata* is a perennial and *G. pulchella* and *G. amblyodon* are annuals. *G. lanceolata* of pine-barrens in the southern United States has the book-name of *sweet gaillardia,* from the scent of its flowers. *Rayless gaillardia* is *G. suavis,* found from Kansas to Texas. Various species are called *blanket-flower* in the West.

gain[1], *n.* **Law of greatest gain,** a phrase used to express the alleged universal tendency of human nature to try to secure a maximum amount of wealth, or satisfaction of wants, through a minimum expenditure of effort, or endurance of pain.

The fundamental *law of* human nature, and therefore of political economy, is that all men will, under all circumstances, seek their *greatest gain.*

L. F. Ward, Dynamic Sociol., I. 20.

Gainfahren marl. See ★*marl*[1].

gaining-head (gā′ning-hed), *n.* The holder for revolving cutters on the end or head of a rapidly revolving shaft, by which rectangular channels or grooves are cut across the grain of timber. Such grooves or gains are cut by chisel-edged cutters which alternate with small segments of the edge of a circular saw, and which are all held in grooves or dovetailed channels in the tool-holder called the head. The saw-segments cut the fibers at the sides of the gain and the chisel-cutters remove the wood between to the desired depth.

gaining-saw (gā′ning-sâ), *n.* A saw for cutting square grooves or gains across the surface of timber: most frequently used in connection with or as part of a ★gaining-head (which see).

gainshire (gān′shėr), *n.* [Origin obscure; perhaps a dial. var. of **gancher,* ⟨ *ganch, v.*] The barb of a fishing-hook. *Halliwell.*

gain-wheel (gān′hwēl) *n.* A pinion-gear on a spinning-mule which causes a supplementary drawing of the roving, from the fact that the spindle-carriage gains, in its speed of outward traverse, upon the delivery-rollers.

gait[1], *n.*—**Ataxic gait.** See ★*ataxic.*—**Cerebellar gait.** See ★*cerebellar.*—**Paralytic gait,** a shuffling mode of progression in which the anterior portion of the foot drags along the ground at each step.—**Spastic gait,** progression by means of short steps, the ball of the foot first striking the ground and further progress being thereby momentarily arrested: observed in lateral spinal sclerosis.—**Steppage gait.** Same as *stepping* ★*gait.*—**Stepping gait,** a disorder of progression, often noted in multiple neuritis, in which the foot is raised far from the ground at each step. Also called *steppage gait.*

gait[2] (gāt), *v. t.* [*gait*[2], *n.*] To set up (gaits of grain) to dry. See *gait*[2], 2.

gaiting-pole (gāt′ing-pōl), *n.* A short pole attached to a sulky in such a position as to keep the horse straight in the shafts. It has a wooden roller which plays against the body of the horse.

gaize (gāz), *n.* [F.] A fine-grained fragmental rock, of granular and porous texture and of silicious composition, distinguished by the fact that a considerable percentage of the silica is soluble in alkalis: found in the Cretaceous and Tertiary formations of France. *Geikie,* Text-book of Geol. (4th ed.), p. 166.

gala[1], *n.* **2.** Festal attire; one's best clothes: as, to be in *gala.* [Scotch.]

galach, *n.* See ★*galah.*

galactacrasia (ga-lak-ta-krā′zi-ä), *n.* [NL., ⟨ Gr. *γάλα* (*γαλακτ-*), milk, + *κρᾶσις,* mingling.] An abnormal condition of the milk of a nursing woman.

galactan (ga-lak′tan), *n.* [*galact*(*ose*) + *-an.*] A gummy substance, $C_6H_{10}O_5$ (*γ*-galactan), allied to manna, which is extracted from the seeds of legumes and is formed to a small extent during certain fermentations. It is oxidized to mucic acid by means of nitric acid and yields galactose on hydrolysis.

galactase (ga-lak′tās), *n.* [Gr. *γάλα* (*γαλακτ-*), milk, + *-ase.*] A proteolytic ferment, occurring in milk, and capable of digesting casein. It produces decomposition-products similar to those which normally occur in ripened cheese. It has been suggested that it may be responsible for many of the phenomena associated with cheese ripening which were formerly attributed to the action of bacteria.

Galactic acid, a yellow, syrupy, tetrabasic acid, $C_{14}H_{10}O_9$(?), formed by the gentle oxidation of lactose (milk-sugar).—**Galactic plane,** the plane of the galactic circle (which see, under *galactic*).

A most important and lucid paper by Professor Simon Newcomb has been published on the position of the *galactic* and other principal *planes* toward which the stars tend to crowd. He states the problem thus: "It is well known that the sky appears to us poorest in stars in the regions around the poles of the galaxy, and that it continually grows richer at a rate which is slow at first but more rapid afterwards, from the poles toward the galactic circle." Within the galactic girdle, the thickness of the stars in space is approximately constant, but in the Milky Way itself it is obvious that it consists of agglomerations of stars which have often fairly well defined boundaries; the stars here are much thicker than outside the girdle. *Knowledge,* Sept., 1904, p. 220.

galactin (ga-lak′tin), *n.* [Gr. *γάλα* (*γαλακτ-*), milk, + *-in*[2].] An amorphous substance, $C_6H_{10}O_5$ (*a*-galactin), which is obtained from the seeds of certain legumes. It is strongly dextrorotatory and yields galactose and a non-crystallizing sugar upon hydrolysis with dilute acids. It is possibly identical with gelose.

galactite, *n.* **2.** A glucoside, $C_9H_{18}O_7$, found in the yellow lupine. It is crystalline, optically inactive, and melts at 140–142° C. It yields galactose on hydrolysis.

galactoma (gal-ak-tō′mä), *n.*; pl. *galactomata* (-ma-tä). [NL., ⟨ Gr. *γάλα* (*γαλακτ-*), milk, + *-oma.*] Same as *galactocele.*

galactometastasis (ga-lak″tō-me-tas′ta-sis), *n.* [NL., ⟨ Gr. *γάλα* (*γαλακτ-*), milk, + *μετάστασις,* change: see *metastasis.*] Secretion of milk from some part other than the normal breasts.

galactonic (gal-ak-ton′ik), *a.* [Gr. *γάλα* (*γαλακτ-*), milk, + *-one* + *-ic.*] Derived from lactose.—**Galactonic acid,** a colorless acid, $C_6H_{12}O_7$, crystallizing in needles. It is prepared from lactose (milk-sugar) on oxidation by means of bromine, and is a racemic mixture. Also called *lactonic acid.*

galactopathy (gal-ak-top′a-thi), *n.* [Gr. *γάλα* (*γαλακτ-*), milk, + *-παθεια,* ⟨ *πάθος,* disease.] Same as *milk-cure.*

galactophore (ga-lak′tō-fōr), *n.* [Gr. *γάλα*(*κτ-*), milk, + *-φορος,* ⟨ *φέρειν,* bear.] A galactophorous duct.

Both the *galactophores,* or glands, and the supportive areolar tissue develop rapidly.

G. S. Hall, Adolescence, I. 420.

galactoplania (ga-lak-tō-plā′ni-ä), *n.* [NL., ⟨ Gr. *γάλα* (*γαλακτ-*), milk, + *πλάνη,* wandering.] Same as ★*galactometastasis.*

galactopoiesis, galactopoësis (ga-lak″tō-poi-ē′sis, -pō-ē′sis), *n.* [NL., ⟨ Gr. *γάλα* (*γαλακτ-*), milk, + *ποίησις,* making.] The secretion of milk.

galactopyra (ga-lak-tō-pī′rä), *n.* [NL., ⟨ Gr. *γάλα* (*γαλακτ-*), milk, + *πυρ*(*ετός*), fever, ⟨ *πῦρ,* fire.] Same as *milk-fever.*

galactoscope (ga-lak′tō-skōp), *n.* [Gr. *γάλα* (*γαλακτ-*), milk, + *σκοπεῖν,* view.] A device for judging of the purity of milk.

galactoside (ga-lak′tō-sid), *n.* [*galactose* + *-ide*[1].] A compound formed by the elimination of the elements of water from an alcohol and galactose. Methylgalactoside,

$$CH_3O.CH.CH.OH.CHOH.CH.CHOH.CH_2OH,$$
$$\qquad\qquad\qquad\qquad\qquad\qquad\qquad\qquad\qquad\qquad O$$

from methyl alcohol and galactose, exists in two forms called *α* and *β.* The former is resolved into its constituents by the action of maltose or emulsin; the latter is unchanged.

galactosis (gal-ak-tō′sis), *n.* [NL., ⟨ Gr. *γαλάκτωσις,* ⟨ **γαλακτοῦν,* make into milk, ⟨ *γάλα* (*γαλακτ-*), milk.] Elaboration of milk by the lacteal glands.

galactotherapy (ga-lak-tō-ther′a-pi), *n.* [Gr. *γάλα* (*γαλακτ-*), milk, + *θεραπεία,* medical treatment.] **1.** Treatment of the nursing infant by means of remedies given to the mother or wet-nurse and excreted in part in the milk. **2.** Same as *milk-cure.*

galactotoxicon (ga-lak-tō-tok′si-kon), *n.* [NL., ⟨ Gr. *γάλα* (*γαλακτ-*), milk, + *τοξικόν,* poison.] A poisonous substance which has been found in spoiled milk.

galactotoxin (ga-lak-tō-tok′sin), *n.* [Gr. *γάλα* (*γαλακτ-*), milk, + *τοξ*(*ικόν*), poison, + *-in*[2] (see *toxin*).] A poisonous substance which has been found in spoiled milk.

galafate (gä-lä-fä′te), *n.* Same as ★*calafate.*

galag (gä′läg), *n.* [Also *galak;* Chamorro name.] In Guam, the bird's-nest fern, *Neottopteris Nidus.* See ★*ekaha.*—**Galag-guaka** (cattle-fern), a name in Guam of a simple-fronded fern, *Microsorium irioides,* which grows on the ground in the forest. Also *galak-guaka.*

galagala (gä-lä-gä′lä), *n.* [Tagalog *galagala,* pitch.] A name in the Philippine Islands of *Dammara Philippinensis,* a coniferous tree

yielding dammar-resin. Also called *dammar*. See *Dammara* and *Philippine* ★*dammar*.

galah[1], **galach** (gä′lach), *n.* [Heb. *galaḫ*.] One whose hair is shaven, namely, a Roman Catholic priest. The term is now applied by Jews to all Gentile clergymen.

galah[2] (ga-lä′), *n.* [Aboriginal Australian name.] The Australian rose-breasted cockatoo, *Cacatua roseicapilla*.

A shrieking flight of *galahs*, on their final flight, before they settled to rest.
F. Adams, John Webb's End, p. 191, quoted in E. E. [Morris, Austral English.

galalith (gal′a-lith), *n.* [Gr. *γάλα*, milk, + *λίθος*, stone.] A trade-name for a plastic material, a substitute for horn or celluloid, made by heating the casein of skim-milk, to which various coloring-materials are added, with acetate of lead or other metallic salts, and hardening by a solution of formaldehyde. Out of this material combs, handles for knives and forks, chessmen, buttons, and many other articles have been made. *Sci. Amer.*, July 25, 1903, p. 59.

galamai-amo (gä-lä″mī-ä′mō), *n.* [Tagalog *galamai-amo*, < **galamai*, fingers or toes, + *amo*, monkey.] A climbing epiphytal plant, *Schellera venulosa*, which belongs to the *Araliaceæ*. It has 5-foliate digitate leaves with an amplexicaul sheath at the base, the leaflets pointed at both the base and the apex, and the flowers are arranged in terminal umbelled panicles. The wood, when inclosed in a box, exhales a fragrant odor. The leaves in the form of an infusion are used as a remedy for skin-diseases and for bathing women after childbirth. Also called *lima-lima*.

galangal, *n.*—**Edible galangal**, the rush-nut or grassnut, *Cyperus esculentus*.—**Lank galangal**, *C. strigosus*, a common polymorphous American species ranging from Maine to Texas.

Lank Galangal (*Cyperus strigosus*).

a, entire plant; *b*, a spikelet; *c*, an achenium, showing style and stigmas. (From Britton and Brown's "Illus. Flora of the Northern States and Canada.")

galang-galang (ga-läng″ga-läng′), *n.* An aboriginal Australian name for any cicada.

galangin (ga-lang′gin), *n.* [*galanga* + *-in*[2].] A light-yellow crystalline compound, $C_{15}H_{10}O_5H_2O$, melting at 214–215° C. It occurs, together with camphorid and alpinin, in galangal-root. It is possibly *a*,1,3-trihydroxyflavone.

galant (gä-loṅ′), *a.* [F.: see *gallant*.] In *music*, applied to a method of instrumental composition in which the number of parts or voices in the harmony varies freely according to the tonal effect desired, without any consistent effort to treat every tone as belonging to an independent and continuous voice-part, as in the older contrapuntal style.

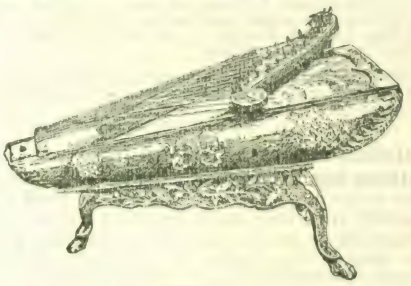
galanterie (gä-loṅ-te-rē′), *n.* [F.: see *gallantry*.] In *music*: (*a*) An embellishment or grace. (*b*) A style of composition or of performance in which embellishments abound. (*c*) In contrapuntal writing, a style which disregards strict rules. The term was most used in the eighteenth century, when the modern views of musical structure were superseding the older ones.

Galax, *n.* **2.** [*l. c.*] The plant *Galax aphylla*, known also as *galaxy* and *beetle-weed*. Because of its persistent shining leaves galax is gathered in large quantities and sold by florists for ornamental purposes.

Galaxy, *n.* **3.** [*l. c.*] Same as ★*galax*, 2: a play upon that name.

gale[2], *n.*, **1.** Gales are classified as moderate, fresh, strong, and whole gales. See *Beaufort* ★*scale*.—**Straight-line gale**, a long-continued gale from the same direction; a derecho; a gale that is due to a vertical rather than to a horizontal circulation of the wind; a gale that blows straight out, or nearly straight out, from a region and not around it.—**Tail of a gale**, the strong wind at the end of a whole gale at sea.—**Topgallant gale**, a gale in which the old-fashioned English man-of-war can carry topgallantsails, such as force 7, a moderate gale, or force 8, a fresh gale, on the Beaufort scale; a gale of about forty or fifty miles an hour.

gale[2] (gāl), *v. i.* To sail away before the wind, or to outstrip another vessel in sailing: generally with *away*. [Obsolete.]



gale[3], *n.*—**Fern** or **fern-leaved gale**, the sweet-fern, *Comptonia peregrina*.

galeage (gāl′āj), *n.* [Also *galiage*; < *gale*[4] + *-age*.] Ground-rent paid for a grant of land. [Prov. Eng.]

galeatiform (gā-lē-at′i-fôrm), *a.* [Irreg. < NL. *galeatus*, helmeted, + L. *forma*, form.] Helmet-shaped: employed specifically in reference to brachiopods having the general aspect of *Gypidula galeata*.

galeeny (ga-lē′ni), *n.* [Also *galliney*, *galiny*, *galany*; < Sp. *gallina morisca*, the guinea-fowl, < L. *gallina*, a fowl.] A guinea-fowl. [Prov. Eng.]

galempong, galempung (ga-lem′pong), *n.*

Galempong.
In the Metropolitan Museum, New York.

[Javanese ?] A Javanese musical instrument of the zither class, with from ten to twenty-five strings.

Galena black. See ★*black*.

Galenical[2], *a.* **II.** *n.* Any preparation made from vegetable substances by simple physical means, as by infusion, decoction, and percolation, as opposed to chemical methods. *Sci. Amer. Sup.*, Jan. 24, 1903, p. 22631.

galenochemist (gā-lē′nō-kem″ist), *n.* One who manufactures and uses both galenical and chemical remedies. [Obsolete.]

galenoid (gā-lē′noid), *n.* [*galena* + *-oid*.] A trigonal trisoctahedron, a form whose faces often occur on modified crystals of galena.

Galen's bandage. See ★*bandage*.

galer (gā′lėr), *n.* [Also *galor*; < *gale*[4] + *-er*[2].] A collector of gale or manorial duty; also, an agent for the letting of mining licenses. [Prov. Eng. (Gloucestershire).]

galeriid (gal-ē-rī′id), *n.* and *a.* **I.** *n.* A member of the lepidopterous family *Galeriidæ*.

II. *a.* Of or belonging to the lepidopterous family *Galeriidæ*.

Galin-Paris-Chevé system. Same as *Chevé* ★*system*.

galipedine (ga-lip′e-din), *n.* [NL. *Galipe-a*, syn. of *Cusparia*, + *-(i)d* + *-ine*[2].] A crystalline alkaloid, $C_{19}H_{19}NO_3$, found in Cusparia (Angostura) bark. It melts at 110° C.

galipeine (ga-lip′ē-in), *n.* [*Galipe-a* + *-ine*[2].] An alkaloid, $C_{20}H_{21}NO_3$, found in Cusparia (Angostura) bark, *Galipea Cusparia*. It crystallizes in white needles, melting at 115.5° C.

galipine (gal′i-pin), *n.* [*Galip-ea* + *-ine*[2].] Same as ★*galipeine*.

gall[2], *n.* **6.** A long space without weft in a piece of cloth.

gall[3], *n.*—**Aleppo gall**, an oak-gall which comes from Persia and the East Indies by way of Aleppo. It contains from 55 to 60 per cent. of tannic acid and about 4 per cent. of gallic acid. It is valued in dyeing as a mordant for light and bright shades on cotton and silk because of the comparatively small amount of coloring-matter it contains.—**Artichoke-gall**, an oak-gall of European distribution occurring in *Quercus pedunculata* and *Q. sessiliflora* and resembling a small artichoke. It is made by the cynipid *Andricus pilosus*.—**Bullet gall**, an American cynipid gall resembling a bullet, attached to the smaller twigs of oaks in the northeastern United States and produced by the gall-fly *Holcaspis globulus*.—**Eglantine gall.** Same as *bedegar*.—**French gall**, an oak-gall of inferior quality in the amount (from 20 to 30 per cent.) of tannic acid it contains.—**Indian galls**, the unripe pods of *Acacia scorpioides*. They are used for tanning.—**Multicellular gall**, a gall containing a number of cells each inhabited by a larva, as the pithy blackberry-gall which occurs on the stems of the blackberry, each gall containing many cells of the larva of the cynipid *Diastrophus nebulosus*.—**Seed-like blackberry-gall**, a very small gall occurring in belt-like clusters about the canes of the blackberry, and produced by the cynipid *Diastrophus cuscutæformis*.—**Turkish gall**, an oak-gall valued, in dyeing, for the tannin matter it contains.—**White galls**, the unripe fruit of *Phyllanthus Emblica*. See *myrobalan* and *Phyllanthus*.

gall[4] (gâl), *n.* A small silver coin of Cambodia, worth about fourpence.

gallacetophenone (gal-a-sē-tō-fē′nōn), *n.* [*gall(ic)* + *acet(ic)* + *phen(yl)* + *-one*.] A pale yellow powder, $CH_3.CO.C_6H_2(OH)_3$, known commonly as *alizarin yellow C*: employed in dermatology.

gallactucon (ga-lak′tū-kon), *n.* [*gall(ic)*[2] + L. *lactuca*, lettuce, + *-on*.] A colorless, tasteless, non-poisonous crystalline compound, $C_{14}H_{24}O$, melting at 296° C. It is extracted from French lactucarium, derived from *Lactuca altissima*.

gallamine (gal′a-min), *a.* (*gall(ic)*[2] + *amine*.] Derived from gallic acid and ammonia.—**Gallamine blue.** See ★*blue*.

gallanil (gal′a-nil), *a.* [*gall(ic)*[2] + *anil(ine)*.] Formed by the action of aniline and certain related compounds upon gallic acid. Also *gallanilic*.—**Gallanil green, indigo, violet.** See ★*green*[1], etc.

gallanilic (gal-a-nil′ik), *a.* Same as ★*gallanil*.

gallanilide (gal-an′i-lid), *n.* [*gall(ic)*[2] + *anil(ine)* + *-ide*.] A colorless crystalline compound, $C_6H_2(OH)_3.CO.NH.C_6H_5.2H_2O$, formed by the action of aniline on gallic acid. It melts at 207° C. and is used as a food-preservative. For this purpose it is superior to salicylic acid, because the toxic dose is much higher on account of its slight solubility. Also called *3,4,5-trihydroxybenzanilide*.

gallanol (gal′a-nōl), *n.* [*gallan(ilide)* + *-ol*.] Same as ★*gallanilide*.

gallazin (gal-az′in or ga-laz′in), *n.* [*gall(ic)*[2] + *azin*.] A mordant coal-car color of the oxazin type, prepared by the action of one of the β-naphthol-sulphonic acids upon gallocyanine. It dyes chromium-mordanted wool an indigo blue shade.

gall-backed (gâl′bakt), *a.* Said of a horse whose back has been galled by an improperly fitting saddle.

gallberry (gâl′ber-i), *n.*; pl. *gallberries* (-iz). The inkberry, *Ilex glabra*, of the southern United States.

Gallberry (Ilex glabra), while frequent in land that is too heavy to meet the requirements of truck-farming, is occasionally common on high-grade soils.
Kearney, Contrib. National Herb., V. 479.

Gallberry land, a local name for a type of land near the Dismal Swamp which in its natural state bears a growth of gallberry. The soil is somewhat rich in organic matter, therefore black, and is underlain by clay. *Kearney*.

galled, *p. a.* **3.** Worn away by washing; hence, sterile: said of land.

gallery, *n.*, **5.** (*b*) By extension, any company or group of interested spectators, as at a golf-match: a forced use. (*c*) Specifically, in écarté, spectators who are betting on either player and are allowed to offer suggestions.—**11.** A veranda; a piazza. [Canadian-French.]—**12.** In a lamp-burner, the ring which supports the lamp-shade.—**Infiltration gallery**, an open trench or covered tunnel constructed in such a manner as to receive percolating ground or river waters.—**To play to the gallery**, to seek popular applause or good will.

gallery-deck (gal′e-ri-dek), *n.* See ★*deck*, 2.

galley-gun (gal′i-gun), *n.* *Naut.*, an old-fashioned culverin.

galley-packet (gal′i-pak″et), *n.* *Naut.*, the mythical navy despatch-vessel which brings naval news.

galley-pepper† (gal′i-pep″ėr), *n.* *Naut.*, the ashes and soot which accidentally found their way into the food from the galley-range. [Naval slang.]

galley-press (gal′i-pres), *n.* **1.** A form of printing-press made to take proofs of composed types on brass or zinc galleys, by platen pressure. In the United States better known as a *proof-press*. [Eng.]—**2.** A galley-proof.

galley-slang (gal′i-slang), *n.* *Naut.*, the vernacular of the galley; the idioms of the cooking-quarters on a man-of-war.

galley-stoker (gal′i-stō″kėr), *n.* *Naut.*, a worthless member of the crew; a skulker.

galley-wasp (gal′i-wosp), *n.* [Also *galliwasp*; < *galley* + *wasp*. The name was prob. first applied to any large wasp that infested ships in West Indian ports. Compare *gallinipper*, a large mosquito, prop. **galley-nipper*.] **1.** In the British West Indies, any large bembecid wasp.

Then all, sitting on the sandy turf, defiant of *galliwasps* and jack-spaniards, and all the weapons of the insect host, partook of the equal banquet.
Kingsley, Westward Ho, xvii.

2. A West Indian lizard, *Celestus occiduus*.

See *galliwasp*.—**3.** The common lizard-fish, *Synodus fœtens*, of the Atlantic coast of the United States.

galley-west (gal'i-west), *adv.* A dialectal variation of *collywest, collyweston*. See ★*collyweston*.

gall-fig (gâl'fig), *n.* The fruit of the fig-tree which contains the gall-flowers. See ★*gall-flower*, 1.

gall-flower (gâl'flou″ėr), *n.* **1.** A modified and infertile female flower of the fig-tree in which the fig-insect lives.—**2.** Same as ★*gallweed*.

gall-fly, *n.*—**Cranberry gall-fly,** a cecidomyiid fly, *Cecidomyia oxycoccana*, which causes a bunching of the tip-

Cranberry Gall-fly (*Cecidomyia oxycoccana*).

a, male; *b*, larva; *c*, leaves showing work of larva; *d*, ovipositor of female; *e*, antennal structure of female. Enlarged.

leaves of the cranberry into a compact bulb-like mass in which are found several of the larvæ. The larva is known as the *tip-worm*.—**Parasitic gall-fly,** any member of the subfamily *Figitinæ* of the hymenopterous gall-fly family *Cynipidæ*.

gall-fungus (gâl'fung″gus), *n.* Any fungus which produces galls: particularly applied to the gall of cranberries and related plants, due to *Synchytrium Vaccinii*.

gall-gnat, *n.*—**Guest gall-gnat,** *Cecidomyia alboviltata*, a species which breeds in large numbers between the leaves composing the so-called pine-cone willow-gall, which itself is made by another gall-gnat, *Cecidomyia strobiloides*.

gallhuminic (gal-hū-min'ik), *a.* Same as ★*melanogallic*.

Gallian[2] (gal'i-an), *a.* [For **Gallionian*, < L. *Gallio*(*n*-) + *-ian*.] Of or pertaining to Gallio, the Roman proconsul of Achaia in the time of Paul the apostle: as, *Gallian* indifference. See Acts xviii. 14–17.

Perhaps even the official mind would be stirred to desert its attitude of *Gallian* indifference.
Lancet, April 4, 1903, p. 983.

galliard[2] (gal'yard), *n.* [Cf. *galliard*[1].] A term used in northern England for a sandstone or grit of particularly close and uniform texture.

Gallicanist (gal'i-kan-ist), *n.* One who upholds Gallicanism. See *Gallicanism*.

gallicin (gal'i-sin), *n.* [*gallic*[2] + *-in*[2].] A derivative of gallic or tannic acid used as an antiseptic dusting-powder, or in solution in conjunctivitis.

Gallico-Anglian (gal″i-kō-ang'gli-an), *n.* An Englishman who favors France or the French.

gallied (gal'id), *p. a. Naut.*, worried; harassed.—**Gallied whale,** a whale in torment from a harpoon or the attack of a swordfish; a frenzied whale.

gallin (gal'in), *n.* [*gall-ic* 2+ *-in*[2].] Same as *gallein*.

gallinivorous (gal-i-niv'ō-rus), *a.* [L. *gallina*, hen, + *vorare*, eat.] That feeds on poultry: as, a *gallinivorous* animal.

gallinuline (ga-lin'ū-lin), *a.* [*gallinule* + *-ine*[1].] Pertaining to or resembling the gallinule.

gallipeine, *n.* Erroneous spelling of ★*galipeine*.

gallisin (gal'i-sin), *n.* [*gall*(*ic*)[2] + *iso*(*maltose*) + *-in*[2].] In *chem.*, a substance analogous to dextrine, obtained by fermenting with yeast a solution of commercial glucose or starch-sugar and adding to the residual liquid absolute alcohol in excess. Gallisin is precipitated as a white powder, of faintly sweetish taste, hygroscopic, dextrogyrate, incapable of fermentation, and yielding dextrose by prolonged heating with dilute sulphuric acid. Probably identical with *isomaltose*, $C_{12}H_{22}O_{11}$. *Sadtler*, Handbook of Indust. Chem., p. 178.

gallisization (gal″i-sī-zā'shon), *n.* Same as ★*gallization*.

gallium, *n.* The discovery of this chemical element was peculiarly interesting, as furnishing striking evidence of the soundness of the theoretical views, as to the relations of the elements, which led Mendeléjeff in 1869 to predict the existence of such a substance and give a description of the properties it would be found to exhibit: his prediction required scarcely any correction when the element was actually discovered.

gallization (gal-ī-zā'shon), *n.* [*gallize* + *-ation*.] The preparation of grape-juice for fermentation by adding water and sugar, usually starch-sugar. See *gallize*. *Sadtler*, Handbook of Indust. Chem., p. 206.

gall-louse, *n.*—**Grape-leaf gall-louse,** the above-ground form of the grape-vine *Phylloxera*. See *Phylloxera* and *gall-louse*.—**Hickory gall-louse,** any one of several American species of the aphidid genus *Phylloxera*, which make galls on the hickory.

gall-maker, *n.*—**Blackberry gall-maker,** a cynipid gall-fly, *Diastrophus turgidus*, which makes a large oval gall on blackberry-stems.

Gallo-American (gal″ō-a-mer'i-kan), *a.* and *n.* **I.** *a.* French-American: as, a *Gallo-American* colony. *Jefferson*.

II. *n.* A native or descendant of a native of France who has settled in America, or has become an American (United States) citizen.

Gallo-Briton (gal-ō-brit'on), *n.* A Briton born in France or of partly French parentage; a Briton who is favorably disposed to France.

gallobromol (gal-ō-brō'mōl), *n.* [*gall*(*ic*)[2] + *brom*(*ine*) + *-ol*.] Dibromogallic acid. It is used as an antiseptic and astringent.

Gallo-Celtic (gal-ō-sel'tik), *a.* Belonging to the Celts of France. *N. E. D.*

gallocyanine, *n.*—**Brilliant gallocyanine.** Same as ★*chromocyanine*.

galloflavin (gal-ō-flav'in), *n.* [*gall*(*ic*)[2] + *flavin*.] A mordant coal-tar color prepared by the gentle oxidation of gallic acid. It dyes chromium-mordanted wool a yellow which is fast to light and soap.

galloformin (gal-ō-fôr'min), *n.* [*gall*(*ic*)[2] + *form*(*aldehyde*) + *-in*[2].] A condensation-product of gallic acid and hexamethylene tetramine, which readily decomposes with the formation of formaldehyde. It is used as an antiseptic.

gall-of-the-earth (gâl″uv-ŦHĒ-ėrth'), *n.* (*a*) Any plant of the genus *Nabalus*, especially *N. serpentarius*. See *Prenanthes*. (*b*) *Lactuca Floridana* of the eastern United States. (*c*) *Pterospora andromedea*, more properly called *pine-drops*.

Gallo-German (gal-ō-jėr'man), *a.* and *n.* **I.** *a.* Belonging to both France and Germany, or to both French and Germans.

II. *n.* **1.** One of the French race born or resident in Germany.—**2.** A descendant of parents on one side French and on the other German.

Gallo-Greciansꝟ (gal-ō-grē'shanz), *n. pl.* Same as ★*Gallo-Greeks*.

Gallo-Greeksꝟ (gal-ō-grēks'), *n. pl.* [L. *Gallogræci*.] The name of a Gallic people who settled in the larger 'Greece' of Asia Minor called from them *Gallogræcia* or *Galatia*. *Holland*, tr. of Pliny, I. 221. *N. E. D.*

gallol (gal'ōl), *n.* [*gall*(*ic*)[2] + *-ol*.] A colorless crystalline compound,

$$O(C_6H_2(OH)_2)_2CH.C_6H_4.CH_2OH,$$

formed by the vigorous reduction of pyrogallolphthallic anhydrid (gallein). It rapidly darkens in air.

Galloman (gal'ō-man), *n.* [F. **Gallomane*.] A Gallomaniac.

Gallomaniac (gal-ō-mā'ni-ak), *n.* [L. *Gallus*, a Frenchman, + Gr. *μανία*, madness.] One who is very zealous for France and French interests and ways.

gallon[2] (gal'on), *n.* [Ir. *gallán-mor*, < *gallán*, branch, + *mor*, great.] The butter-bur or butterdock, *Petasites Petasites*.

gallonage (gal'on-āj), *n.* [*gallon* + *-age*.] Amount or capacity stated or reckoned in gallons: as, the *gallonage* of a tank, or the *gallonage* of an oil-well during the period named.

gallonitrate (gal-ō-nī'trāt), *n.* [*gallonitr*(*-ic*) + *-ate*[1].] A salt of gallonitric acid.

gallop, *v. t.*—**To gallop to a standstill,** to gallop to a halt; tire out thoroughly: as, *to gallop* several horses *to a standstill* (that is, to gallop, in competition with several horses, one after the other until they could gallop no more).

gallop, *n.*—**Gallop rhythm,** rapid succession of three heart-sounds followed by an interval of silence, resembling somewhat the canter of a horse.

galloper, *n.* **5.** A mounted (or unmounted) despatch-bearer on a battle-field; an aide-de-camp.

Gallophile (gal'ō-fil), *n.* [L. *Gallus*, a Frenchman, + Gr. *φίλος*, loving.] One who is friendly to France.

Gallophobe (gal'ō-fōb), *n.* [L. *Gallus*, a Frenchman, + Gr. *φοβεῖν*, fear.] One who hates or fears France.

Gallophobia (gal-ō-fō'bi-ą), *n.* [NL., < L. *Gallus*, a Frenchman, + Gr. *-φοβια*, < *φοβεῖν*, fear.] Abhorrence or fear of France or French ways or institutions.

gallotannate (gal-ō-tan'āt), *n.* [*gallotann*(*ic*) + *-ate*[1].] A salt of gallotannic acid.

gallotannin (gal-ō-tan'in), *n.* Same as *tannic acid*.

Gallovidian (gal-ō-vid'i-an), *a.* and *n.* [NL. **Gallovidianus*, < *Gallovidia*, Galloway.] **I.** *a.* Of or pertaining to the region of southwestern Scotland known as Galloway, and corresponding to the counties of Wigton and Kirkcudbright.

II. *n.* **1.** A native or inhabitant of Galloway.—**2.** A Gallovidian horse. See *galloway*.

Galloway, *n.* **2.** A breed of hornless cattle, of great antiquity, developed in the highlands of southwestern Scotland. The skin is dark, the hair usually black, and the body deep. They are hardy and docile.

gallows, *n.*, **2.** Specifically, on the great sheep-raising stations of Australasia, a high wooden frame on which the carcasses of butchered cattle or sheep are suspended; a meat-gallows. *E. E. Morris*, Austral English.

gallows-tool (gal'ōz-tōl), *n.* A clock-maker's rest on which work is held while it is filed. [Rare.]

gall-spot (gâl'spot), *n.* A sore spot produced by rubbing or chafing; a gall.

gall-tree (gâl'trē), *n.* In the West Indies, the bitter ash or quassia, *Picrasma excelsa*.

gallweed (gâl'wēd), *n.* Same as *five-flowered* ★*gentian*.

gall-weevil (gâl'wē″vil), *n.* A beetle whose larvæ produce galls.—**Cabbage gall-weevil,** an English gardeners' name for a European curculionid beetle, *Ceuthorhynchus sulcicollis*, whose larvæ make small galls or swellings on the roots and stalks of cabbage and upon turnips.—**Turnip gall-weevil.** Same as *cabbage* ★*gall-weevil*.

gallwort (gâl'wėrt), *n.* The common toad-flax, *Linaria Linaria*: so named from its bitterness. It is used as an unofficial remedy for dropsy, jaundice, and cutaneous eruptions.

Galoisian (ga-loi'si-an), *a.* Pertaining to or named for the French mathematician Evariste Galois (died 1832).—**Galoisian corpus, equation.** See ★*corpus*, ★*equation*.

galon[2] (ga-lōn'), *n.* [Sp.: see *gallon*.] A Spanish-American measure of capacity, equal, in Porto Rico, to 3.785 liters, or one United States gallon.

galop, *v. i.* To dance the galop. See *galop*, *n.*, 2.

galpon (gäl-pōn'), *n.* [S. Amer.] The building provided on a farm in Peru, Uruguay, and other South American countries, for the accommodation of the laborers, etc. *Proc. Zool. Soc. London*, 1894, p. 305.

Galtonia (gâl-tō'ni-ą), *n.* [NL. (Decaisne, 1880), named in honor of Francis *Galton*, who in 1853 published a "Narrative of an Explorer in Tropical South Africa."] A genus of plants of the family *Liliaceæ*, closely allied to the hyacinths, and formerly referred to the same genus. *Galtonia* differs from *Hyacinthus* chiefly in having more numerous and flattened seeds. There are two species, both South African. *G. candicans* (*Hyacinthus candicans* of Baker) is a fine hardy bulbous plant bearing an ascending raceme or spike of drooping white fragrant flowers. It is also sometimes grown under glass.

Galtonian (gâl-tō'ni-an), *a.* [After F. *Galton*.] Of or pertaining to Francis Galton, an English scientist, or to his theories regarding the question of inherited characters.—**Galton's anticyclonic law.** See ★*law*[1].—**Galton's curve.** Same as *Quételet's* ★*curve*.—**Galton's law of ancestral inheritance.** See *ancestral* ★*inheritance* (*a*).—**Galton's method, weights.** See ★*method*, ★*weight*[1].

galty (gâl'ti), *a.* [Also *gaulty*; < *galt*[1] + *-y*[1].] Marked by the presence of galt: of the nature of galt or stiff blue marly clay: as, *galty* lands; a *galty* place.

galv. An abbreviation (*a*) of *galvanic*; (*b*) of *galvanism*.

Galvanic faradization. See ★*faradization*.

galvanistical (gal-va-nis'ti-kal), *a.* [*galvanist* + *-ical*.] Of or pertaining to galvanism; skilled in galvanism: as, a *galvanistical* philosopher.

galvanization, *n.* **2.** Therapeutic application of the constant electric current by means of the active electrode passed slowly to and fro over the surface.

galvanochemical (gal″va-nō-kem'i-kal), *a.* Relating to the chemical action of the galvanic current.

This treatment of stricture depends for its success chiefly upon the action of the electricity, which causes *galvano-chemical* absorption to take place—a process which is based upon the electrolytic properties of the tissues of the human body.
Buck, Med. Handbook, III. 765.

Galvanochemical change, chemical change brought about by the passage of an electric current, as in the fluids or tissues of the human body.

galvanofaradic (gal″va-nō-fa-rad′ik), *a.* Relating to both galvanic and faradic electricity.

galvanometer, *n.*— **Oscillation galvanometer,** a form of receiver or detector for electric waves, as in wireless telegraphy, invented by Ewing.— **String galvanometer,** an instrument consisting essentially of a silvered quartz thread stretched like a string in a strong magnetic field. When the current is passed through the thread the latter is deflected perpendicularly to the direction of the magnetic lines of force, and the amount of the deflection can be measured by means of a microscope with a micrometer eyepiece. Used instead of the capillary electrometer in physiological research.

galvanomotive (gal″va-nō-mō′tiv), *a.* Controlled as to motions by the action of the galvanic current: as, a *galvanomotive* needle. [Rare.]

galvanoplastically (gal″va-nō-plas′ti-kal-i), *adv.* By the galvanoplastic process. See *galvanoplastic.*

galvanoplastics (gal″va-nō-plas′tiks), *n.* Same as *galvanoplasty* or *electrotypy. Jour. Soc. Chem. Industry,* XII. 162.

galvanoplater (gal″va-nō-plā′tėr), *n.* One who makes stereotype or electrotype plates by electrodeposition of metals from a solution of a salt of the metal.

Serious poisonings, and even death, have in many instances resulted in this way [by absorption of potassium cyanid through slight abrasions] in photographers, *galvano-platers,* or by the handling of plate-polishing powders containing potassium cyanid.
Buck, Med. Handbook, IV. 785.

galvanoscopy (gal-va-nos′kō-pi), *n.* [*galvanism* + Gr. *-σκοπία,* ‹ *σκοπεῖν,* view.] **1.** Employment of galvanism for diagnostic purposes.— **2.** Determination of the direction of a galvanic current by the galvanoscope.

galvanotactic (gal″va-nō-tak′tik), *a.* [*galvanotanis* (*-tact-*) + *-ic.*] Same as ★*electrotactic.*

galvanotaxis (gal″va-nō-tak′sis), *n.* [*galvanism* + Gr. *τάξις,* disposition.] Same as ★*electrotaxis.*

They [cases of unilateral directive stimulation] have been designated, according to the direction in which they occur in relation to the source of the stimulus, as positive or negative Chemotaxis, Phototaxis, Thermotaxis, *Galvanotaxis,* and so forth. *Encyc. Brit.,* XXXI. 715.

galvanotechnics (gal″va-nō-tek′niks), *n.* [*galvan-ism* + *technics.*] The art of the electrodeposition of metals.

galvanotherapeutics (gal″va-nō-ther-a-pū′tiks), *n.* Treatment of disease by means of galvanism. Also called *galvanotherapy.*

galvanotherapy (gal″va-nō-ther′a-pi), *n.* Same as ★*galvanotherapeutics.*

galvanotonus (gal-va-not′ō-nus), *n.* [*galvan-ism* + Gr. *τόνος,* tension.] Same as *electrotonus.*

galvanotropic (gal″va-nō-trōp′ik), *a.* [*galvanism* + Gr. *τρόπος,* a turning.] Same as ★*electrotropic.*

galways (gâl′wāz), *n.* Whiskers of a style peculiar to Galwaymen.

Mr. S—— insists that it is a picture of a woman, notwithstanding that the Celtic face has an ample growth of scarlet *galways.* *Newspaper.*

galziekte (gäl′zēk-te), *n.* [D., 'gall-sickness.'] A disease of cattle in the Transvaal caused by a large species of trypanosome (*Trypanosoma theileri* Laveran, 1902) measuring 50 microns in length by 3.5 to 4 microns in diameter. The mode of transmission is unknown. Like other trypanosomes, this parasite lives in the blood.

Details are given of the mode of growth and multiplication of Tr. Theileri, the cause of the cattle disease known as *Galziekte.* *Nature,* Nov. 13, 1902, p. 46.

gam[2] (gam), *n.* [Origin obscure.] A tusk or large tooth. [Scotch.]

gam[3] (gam), *n.* [OF. *gambe,* besides *jambe,* leg: see *jamb.*] A leg. [Slang.]

gamasoid, *a.* and *n.* [NL. *Gamasoid-ea.*] **I.** *a.* Resembling a mite of the superfamily *Gamasoidea,* or belonging to this group.

II. *n.* One of the *Gamasoidea.*

gamba[2], *n.*— **Gamba bass, gamba major, bass gamba, double gamba,** in *organ-building,* a 16-feet stop with the tone of a gamba.

gambade, *n.* **3.** The leap of a horse.

gambang (gäm′bäng), *n.* [Javanese and Malay *gambang.*] A Javanese musical instrument of the xylophone class, consisting of sixteen strips of resonant wood or metal fastened loosely on strings, and mounted on a concave wooden box or frame. The wooden form is called *gambang kayu,* the metal form *gambang gongso.*

gamba-work (gam′bä-wėrk), *n.* **1.** In *organ-building,* a collective name for the string stops, of which the gamba may be taken as a type. —**2.** A form of violin-piano.

gambeer (gam-bēr′), *v. t.* [Appar. from an unrecorded noun **gambeer,* ‹ F. *gambier,* an iron hook.] To take fish with a gambeering-iron or mackerel-gaff; to gaff. See *gaff*[1].

gambeering-iron (gam-bēr′ing-ī″ėrn), *n.* A mackerel-gaff (which see, under *gaff*[1]).

gambette (gam-bet′), *n.* In *organ-building,* a 4-feet stop with the tone of a gamba.

Gambia rubber. See ★*rubber.*

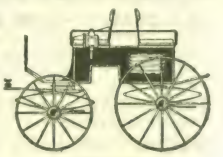
gambine (gam′bin), *n.* [*gamb*(*oge*) + *-ine*[2].] A name given to several mordant coal-tar colors of the nitroso type. They all dye chromium-mordanted wool brown and iron-mordanted wool green.— **Gambine B,** a mordant coal-tar color of the nitroso type, prepared by the action of nitrous acid upon dihydroxynaphthalene. Also called *dioxine.*— **Gambine R,** a mordant coal-tar color of the nitroso type, prepared by the action of nitrous acid upon α-naphthol.— **Gambine Y,** a mordant coal-tar color of the nitroso type, prepared by the action of nitrous acid upon β-naphthol. Also called *Alsace green J.*— **Gambine yellow.** See ★*yellow.*

gambit, *n.*— **Cochrane gambit,** one of the chief lines of defense against the Salvio gambit, namely, 6 . . . P—B 6. See *gambit.*— **Double gambit,** an attack in the King's Bishop's opening, where white sacrifices two pawns. — **Gambit pawn.** See ★*pawn*[2].— **Greco gambit,** an interesting though abandoned attack of the King's Knight's gambit.— **King's gambit declined,** a defense to the King's gambit wherein the second player tries to evade the attack by refraining from capturing the offered gambit pawn.— **King's gambit refused.** Same as *King's* ★*gambit declined.*— **King's Knight's gambit,** 1 P—K 4, P—K 4; 2 P—KB 4, PxP; 3 Kt—KB 3.— **King's Rook's Pawn's gambit,** white continuing 3 P—KR 4. Hardly ever played. — **Macdonnell's double gambit,** a continuation against an obsolete defense to the King's Bishop's opening, white sacrificing two pawns for the attack.— **Philidor's gambit,** 5 P—KR 4 in the King's Knight's gambit.— **Salvio-Cochrane gambit,** a variation of the King's Knight's gambit, in which black plays 5 . . . P—B 6 instead of Kt—KB 3 or Kt—KR 3.

gambling-hell (gam′bling-hel), *n.* A gambling-house.

gambling-tray (gam′bling-trā), *n.* A large basketry tray used for tossing dice by North American Indians.

Tulare Gambling-tray and Dice.



gamboge, *n.* — **American gamboge,** the gum-resin yielded by either of two shrubs or small trees of Guiana and Brazil, *Vismia baccifera* and *V. Guianensis.*— **False gamboge.** Same as *Mysore* ★*gamboge.*— **Mexican gamboge,** the gum-resin yielded by *Vismia Mexicana.*— **Mysore gamboge,** the gum-resin obtained from *Garcinia pictoria* of Southern India. Also called *false gamboge.*

gambogiate (gam-bō′ji-āt), *n.* [*gamboge* + *-i-* + *-ate*[1].] A salt of gambogic acid.— **Gambogic acid,** A resinous substance which is the principal component of gamboge.

game[1], *n.,* **6.** Specifically—(*a*) A part of a rubber. The victors in two games out of three win the rubber. (*b*) One of the points to be scored in all-fours, as high, low, jack, and the game.

14. The number of players necessary, or required by the rules, for playing a game; a 'set.'— **15.** In *old archery,* a meeting or public competition of archers.— **All-in game,** English billiards without restrictions as to ★spot-stroke (which see). — **Around-the-table game,** in *Amer. billiards,* a game in which the successive holding of either red is restricted to thrice off its spot.— **Bergen game,** a game of dominoes in which two points are scored by the player who makes both ends of the line the same.— **Brace game,** a conspiracy between two players to cheat another; specifically, in *faro,* an understanding between the dealer and the case-keeper. — **Call game.** See ★*call* 1.— **Cattle and game disease.** See ★*disease.*— **Consultation game.** See ★*consultation.*— **Doublet game,** in *French billiards,* a game in which caroms and pockets count, but the latter only in case the holed object-ball has first been sent to cushion. — **Drawn game.** See ★*drawn.*— **Duck-wing game,** a variety of game-fowl, usually of handsome plumage, with a conspicuous bar across the wing suggestive of the mirror of a duck. The golden duck-wing has this bar of a rich yellow, while in the silver duck-wing it is white.— **Game at odds,** in *chess,* a game in which the superior player removes one of his pieces from the board before the game is started in order to equalize the contest. The most common odds are those of the queen, of queen against rook or any other minor piece, of a rook, of a knight, of a pawn and move, and of a pawn and two moves. A player may also permit his opponent to make a stated number of moves before beginning play, upon the condition, however, that none of the pieces so moved be permitted to pass the fourth row. Other odds are to effect a mate only with a marked piece or pawn, not to check except when mating, etc.— **Indian game,** a heavy-bodied, thinly feathered breed said to have originated in southern Asia or in some of the islands of the Malay Archipelago.— **Long game,** in *golf,* full wooden shots from the tee and through the green.— **Long-handle game,** in *cricket,* aggressive or hitting play, as contrasted with defensive. *Hutchinson,* Cricket, p. 71. — **Open game,** a game of chess in which both sides play their king's pawns to their respective fourth squares. All other games, or rather openings, are called *close games.*— **Progressive games,** euchre, whist, bridge, and other four-hand partnership games which may be played progressively. The principle is the same in all. The winning lady at each table goes to the next table north, her partner going to the next table south; while the losing couple left behind separate, so that each of the two players shall get a new partner for the next round. The winners at the head table do not move. Prizes are given for the players who win the greatest number of rounds.— **Quarter game,** in *golf,* short approach-shots to a putting-green.— **Short game,** in *golf,* approaching, or that part of the game, in playing on to a putting-green, which does not involve the use of a wooden club. — **Spanish game,** a combination of the old French billiard game of allied pockets and caroms with a modified form of pin-pool. "This game is played in New Orleans, Mexico, Cuba, and California and in the South, and is played with two white balls and one red, and five pins placed similar to those in Pin Pool. The red ball is placed on the red-ball spot, and the first player strikes at it from within the balk semicircle. The game is made by winning hazards, carroms, and by knocking over the skittles or pins. It is usually played thirty-one points up." *Amer. Hoyle,* p. 491.— **Square game,** a game in which the cards are perfectly square, not having been trimmed for wedges, strippers, etc.— **To develop one's game.** See ★*develop.* —**Willing game,** a parlor game in which all members of the party save one unite in willing the performance of a certain action by this outstanding member. The latter is brought into the room, blindfolded, after the action to be performed has been agreed upon by the rest. Sometimes he is left free to act on his own initiative; sometimes two members of the party place their outstretched hands about his neck or waist. In this case, the game becomes a form of muscular suggestion or 'muscle-reading.' Otherwise, the success of the game depends upon the ability of the subject to pick up suggestions by ear as he moves about the room, or to guess at the action prescribed for him.

game-cart (gām′kärt), *n.* A light carriage originally used to carry dogs to the moors in hunting and to bring back the game: now used for driving.

Game-cart.

game-hole (gām′hōl), *n.* The sixty-first or last hole in a cribbage-board.

gamester, *n.* **6.** *pl.* In *billiards,* contestants whose scores are exactly even.

gamesum, *a.* A simplified spelling of *gamesome.*

gametange (gam′e-tanj), *n.* [NL. *gametangium.*] Same as *gametangium.*

gamete, *n.* **2.** A general term for the mature germ-cells, either male (spermatozoön) or female (ovum), which unite to form the zygote.

The term "*gamete*" is now generally used as the equivalent of "germ-cell," whether male or female, and the term "zygote" is here used for brevity to denote the organism resulting from fertilisation.
W. Bateson, Mendel's Prin. of Heredity, p. 18.

game-tenant (gām′ten″ant), *n.* One who rents the right to shoot game on an estate; a shooting-tenant.

gametic (ga-met′ik), *a.* [*gamete* + *-ic.*] Of, pertaining to, or by means of gametes or germ-cells; gametal.

The term Mendelian Principles is used in its widest sense, to include not merely the simple Mendelian phenomena of Dominance or Segregation, but the much more fundamental doctrine of *gametic* purity.
Biometrika, Jan., 1904, p. 1.

Gametic variation. See ★*variation.*

gametically (ga-met′i-kal-i), *adv.* As regards gametes; as a gamete.

They show therefore that the albino cannot be said to be *gametically* pure in respect of its whiteness, but that in order to predict the character of its young a knowledge of its ancestry is necessary. *Biometrika,* Jan., 1904, p. 8.

gametocyst (ga-met′ō-sist), *n.* [Gr. *γαμέτης, γαμετή* (see *gamete*), + *κίστις,* bladder (cyst).] A unicellular structure, found in the algæ and fungi, which produces only uninucleate gametes: distinguished from *gametangium.*

gametocyte (ga-met′ō-sīt), *n.* [Gr. *γαμέτης, γαμετή* (see *gamete*), + *κύτος,* a hollow (a cell).] A gamete. *Proc. Roy. Soc.* (London), March 6, 1902, p. 78.

gametogenesis (gam″e-tō-jen′e-sis), *n.* [Gr. *γαμέτης, γαμετή* (see *gamete*), + *γένεσις,* origin, genesis.] In *biol.,* genesis or origin from gametes, that is, from a sperm- and an egg-cell. Also *gametogeny.*

The central phenomenon in Mendelian heredity is segregation. The characters in simplest cases are treated as units in *gameto-genesis.* In more complex cases there is resolution, sometimes also disintegration and imperfect segregation, leading to the formation of fresh units. The gametes bearing these units are produced in numerical

proportions which on an average are also definite, but as yet these proportions have only been determined in the simple cases. *Proc. Zool. Soc. London*, 1903, p. 95.

gametogenic (gam″e-tō-jen′ik), *a.* Relating to gametogenesis; producing gametes or reproductive cells.

gametogenous (gam-e-toj′e-nus), *a.* Pertaining to or of the nature of gametogenesis; producing gametes: as, a *gametogenous* monont among *Coccidia*. See ★*monont*.

The cytological changes in malignant growth resemble those exhibited by sporogenous or *gametogenous* tissues in plants and animals, in the occurrence of the form of nuclear division known as heterotype, as distinguished from the more usual homotype division.
Nature, Jan. 21, 1904, p. 286.

gametogeny (gam-e-toj′e-ni), *n.* Same as ★*gametogenesis*.

gametoid (gam′e-toid), *a.* and *n.* [*gamete* + *-oid*.] **I.** *a.* Relating to reproductive cells which do not become functional gametes: opposed to ★*gametogenic*. *Nature*, Jan. 21, 1904, p. 285.

II. *n.* A sexually active cell observed in the reproduction of certain low forms of animal life.

gamma, *n.* 4. A proposed unit of magnetic intensity, equal to one hundred thousandth of a gilbert per second.

Gamma rays. See ★*ray*[1].

gammacism (gam′a-sizm), *n.* [Gr. *γάμμα*, gamma, + *-c-* + *-ism*.] Imperfect enunciation of g and other guttural sounds. *Buck*, Med. Handbook, VII. 435.

gamma-granule (gam′ä-gran-ūl), *n.* One of the basophilic granules observed in a certain form of leucocyte in cases of leucemia.

gamma-iron (gam′ä-ī″ėrn), *n.* See ★*iron*.

gammarine (gam′a-rin), *a.* [*Gammarus* + *-ine*[1].] Resembling or characteristic of amphipod crustaceans of the genus *Gammarus*.

gammaroid (gam′a-roid), *a.* [*Gammarus* + *-oid*.] Resembling or pertaining to the genus *Gammarus*, or to the family *Gammaridæ*.

gammation, *n.* 2. An element in the anatomical structure of the head of the Devonian fish *Palæospondylus*.

An important element having somewhat the form of an inverted "L" lies on each side, immediately behind the nasal capsules, and was probably related to the eye, which was situated above it. . . . In order to avoid as far as possible the introduction of hypothesis into description we propose to call it the '*gammation*' from its fancied resemblance to the Greek letter "Γ."
W. J. and *I. B. J. Sollas*, in Philos. Trans. Roy. Soc. [(London), 1904, ser. B, p. 274.

gammoning-fashion (gam′on-ing-fash″on), *n. Naut.*, a lashing, the turns of which are crossed in the style of gammoning.

gammoning-fish (gam′on-ing-fish), *n. Naut.*, formerly a batten of wood on the top of the bowsprit over which the turns forming the gammoning were passed.

gammoning-knee (gam′on-ing-nē), *n. Naut.*, a timber bolted to the stem below the bowsprit.

gamobium (ga-mō′bi-um), *n.*; pl. *gamobia* (-ä). [NL., ⟨ Gr. *γάμος*, marriage, + *βίος*, life.] The sexual or medusoid stage in the life of a hydroid jellyfish.

Gamobothridæ (gam-ō-both′ri-dē), *n. pl.* [NL.] A family of tapeworms of the order *Tetraphyllidea*. They have the four phyllidia united by their lateral margins to form a single discoid or globular mass. The family contains the genera *Lecanicephalum*, *Tylocephalum*, and *Discocephalum*, and members inhabit the spiral intestine of sharks.

gamodesmic (gam-ō-des′mik), *a.* [Gr. *γάμος*, marriage, + *δεσμός*, a band.] In *bot.*, having the component vascular elements of the stele fused together.

gamodesmy (gam-ō-des′mi), n. [*gamodesm-ic* + *-y*[3].] In *bot.*, the condition of being gamodesmic.

gamogenic (gam-ō-jen′ik), *a.* [Gr. *γάμος*, marriage, + *-γενης*, producing.] Of or pertaining to origin from a germ-cell during its maturation and fertilization.—**Gamogenic variation.** See ★*variation*.

Gamolepis (gam-ol′ē-pis), *n.* [NL. (Lessing, 1832), ⟨ Gr. *γάμος*, marriage, + *λεπίς*, scale. The allusion is to the union of the involucral bracts.] A genus of plants of the family *Asteraceæ*, related to *Senecio*. There are about 12 species, all South African. One of them, *G. Tagetes*, is now somewhat grown as a garden annual. It bears a profusion of bright-yellow heads, particularly in sunny, exposed places, having somewhat the character of the dwarf marigold.

gamomachia (gam-ō-mak′i-ä), *n.* [NL., ⟨ Gr. *γάμος*, marriage, + *μάχη*, fight.] The hypothetical struggle for existence between the paternal and maternal constituents of the fertilized egg, and the destruction of one of them: assumed as an explanation of the resemblance of the offspring to one parent only, to the exclusion of the influence of the other.

gamomania (gam-ō-mā′ni-ä), *n.* [NL., ⟨ Gr. *γάμος*, marriage, + *μανία*, madness.] 1. The condition of a pistil in which the ovaries are more or less completely united and the respective styles and stigmata remain free. *Syd. Soc. Lex.*—2. A form of insanity in which the sufferer often proposes marriage, despite impossible conditions. *Syd. Soc. Lex.*

gamophagia (gam-ō-fā′ji-ä), *n.* [NL., ⟨ Gr. *γάμος*, marriage, + *-φαγία*, *φαγεῖν*, eat.] The hypothetical destruction of one of the parental constituents of the fertilized egg by the other. See ★*gamomachia*.

gamostele (gam′ō-stēl), *n.* [Gr. *γάμος*, marriage, + *στήλη*, pillar.] In *bot.*, a polystele in which the vascular bundles are fused together in some portion of their length. See ★*stele*[4] and ★*polystele*.

gamostelic (gam-ō-stel′ik), *a.* [*gamostele* + *-ic*.] In *bot.*, having a gamostele.

gamostely (gam′ō-stē-li), *n.* [*gamostele* + *-y*[3].] In *bot.*, the condition of being gamostelic.

gamote (gä-mō′tā), *n.* [Mex. Sp. *camote*, ⟨ Nahuatl *camotli*, sweet potato.] In New Mexico, the parsnip-like root of an umbelliferous plant, *Phellopterus montanus*, which is used, when young, as an article of food by certain tribes of Indians.

gamotropic (gam-ō-trop′ik), *a.* [Gr. *γάμος*, marriage, + *τροπικός*, of or pertaining to a turn.] In *bot.*, executed for the advantage of the fertilizing process: said of certain changes in the position of flower-stalks made only once.

gamot-sa-buni (ga-mōt′sä-bö″nē), *n.* [Tagalog *gamot*, medicine; *sa*, for; *buni*, ringworm.] Same as ★*acapulco*. [Philippine Is.]

gamp[2] (gamp), *v. t.* [Vaguely imitative; cf. *champ*[1] and *gulp*.] To eat greedily; gulp down. *Scott.* [Scotch.]

gamphrel (gam′frel), *n.* Same as *gomerel*. [Scotch.]

gamsigradite (gam-si-grā′dīt), *n.* [Servian *Gamsigrad* (see def.) + *-ite*[2].] A velvet-black variety of amphibole, containing manganese in considerable amount. The original specimen was obtained from Gamsigrad, Servia.

gamut-way (gam′ut-wā), *n.* In *old music*, the writing or noting by means of notes rather than in tablature. See *tablature*, 4 (*c*).

gandi (gän′dē), *n.* [African.] A name given in parts of Africa to the tsetse-fly, *Glossina morsitans*. *Geog. Jour.* (R. G. S.), IX. 56.

gandul (gän-dōl′), *n.* [Porto Rican.] The dall or pigeon-pea, *Cajan Cajan*. See *Cajan*.

gang, *v.* **II.** *trans.* To arrange in gangs; combine (several) into one set, to be operated together: as, to *gang* saws, plows, or the like. See *gang*, *n.*, 9.

The plows are usually *ganged*, two to one frame, and are drawn by three to five yoke of oxen.
Yearbook, U. S. Dept. Agr., 1900, p. 540.

gang, *n.* 12. *Naut.*, a set of standing rigging.—**Gang drilling-machine.** See ★*drilling-machine*.

ganga[2] (gän″ gä), *n.* [Sp., = F. *gangue*: see *gangue*.] Something that can be acquired or obtained without labor. [Spanish America.]

gan-gan, *n.* Same as ★*gang-gang*.

gang-gang (gang′gang), *n.* [Native Australian name]. An Australian cockatoo, *Callocephalon galeatum*, of a gray color with a red crest. Also *gan-gan*.

gang-ladder (gang′ lad″ėr), *n.* A horsing-block.

gangliectomy (gang″gli-ek′tō-mi), *n.* [Gr. *γάγγλιον*, ganglion, + *ἐκτομή*, excision.] Excision of a ganglion.

That great operation on the nervous system, trigeminal *gangliectomy*, for which Spiller and Frazier now propose division of the sensory root within the cranium for tic doloureux.
C. H. Hughes, in Alien. and Neurol., Feb., 1903, p. 20.

gangliitis (gang-gli-ī′tis), *n.* [NL., ⟨ Gr. *γάγγλιον*, ganglion, + *-itis*.] Same as *ganglionitis* (*a*).

ganglioblast (gang′gli-ō-blāst), *n.* [Gr. *γάγγλιον*, ganglion, + *βλαστός*, germ.] An embryonic cell which gives rise to a ganglionic cell. *Baldwin*, Dict. of Philos. and Psychol., I. 404.

gangliocyte (gang′gli-ō-sīt), *n.* [Gr. *γάγγλιον*, ganglion, + *κύτος*, a hollow (a cell).] A ganglion cell or nerve-cell. *Baldwin*, Dict. of Philos. and Psychol., I. 405.

ganglioid (gang′gli-oid), *a.* [*gangli-on* + *-oid*.] Resembling a ganglion. *Syd. Soc. Lex.*

ganglioma (gang-gli-ō′mä), *n.*; pl. *gangliomata* (-ma-tä). [NL., ⟨ Gr. *γάγγλιον*, ganglion, + *-oma*.] A tumor of a lymphatic gland.

ganglion, *n.*—**Abdominal ganglion.** See ★*abdominal*.—**Auditory ganglion.** Same as *acoustic tubercle* (which see, under *acoustic*).—**Celiac ganglion.** Same as *semilunar ganglion* (*a*) (which see, under *ganglion*).—**Central ganglia of the brain,** the optic thalami and corpora striata.—**Compound ganglion,** an apparently double ganglion which results from compression of its central portion by the annular ligament of the wrist. See *ganglion*, 3 (*a*).—**Ganglia of Bidder,** two ganglia in the auricular groove of a frog's heart.—**Ganglion ectomammillare,** a small rounded eminence at the base of the brain, just in advance of the posterior perforated space. In many animals there are two of these prominences, one on either side of the median line. Also known as the *mammillary body*, or *corpus albicans*.—**Ganglion habenulæ,** a collection of nerve-cells at the dorsimesal margin of the thalamus to which pass fibers from the pineal body. Also known as *habena*, *habenula*, and *trigonum habenulæ*.—**Ganglion interpedunculare.** Same as ★*corpus interpedunculare*.—**Ganglion isthmi,** a small mass of gray matter lying between the crura of the mesencephalon. Also known as the *intercrural* or *interpeduncular ganglion*.—**Ganglion of Auerbach,** aganglionic nervous structure in the muscular coat of the intestine.—**Ganglion of Corti,** a plexus of nerve-fibers in the cochlea through which the cochlear nerves pass.—**Ganglion of Remak,** a ganglion in the wall of the auricle of the frog's heart.—**Ganglion of Scarpa.** Same as *facial ganglion*.—**Ganglion of the retina,** a layer of nerve-cells in the retina.—**Hypogastric ganglia,** two ganglia, one on either side of the cervix uteri, connected with the hypogastric and sacral plexuses.—**Intercrural ganglion.** Same as ★*ganglion isthmi*.—**Interpeduncular ganglion.** Same as ★*ganglion isthmi*.—**Meissner's ganglion,** ganglionic nervous tissue in the submucous coat of the intestine.—**Meynert's ganglion.** Same as *basal optic ganglion*.—**Pallial ganglion.** (*a*) In gastropods, one of the ganglia between the cerebral and pedal ganglia, connected with the former by the cerebropleural and with the latter by the pleuropedal connectives. (*b*) In cephalopods, same as *stellate* ★*ganglion* (*b*).—**Sensory ganglia,** the nervous structures at the base of the brain which receive the nerves of special sense.—**Stellate ganglion.** (*a*) The first dorsal sympathetic nerve-ganglion. (*b*) In cephalopods, a large flat ganglion lying on the inner surface of the mouth, in front of the gill.—**Sublingual ganglion.** Same as *submaxillary ganglion*.—**Valentin's ganglion,** an occasional rounded swelling on the superior maxillary nerve.—**Walter's ganglion.** Same as *ganglion impar*.

ganglionervous (gang″gli-ō-nėr′vus), *a.* Relat- to the sympathetic nerve. *Buck*, Med. Handbook, I. 141.

ganglioplexus (gang″gli-ō-plek′sus), *n.* [NL.] A plexus of nerve-fibers in a ganglion. *Baldwin*, Dict. of Philos. and Psychol., I. 405.

gang-loom (gang′löm), *n.* A loom which has a number of independent shuttles, as one for narrow fabrics, such as ribbons.

gang-mill (gang′mil), *n.* A milling-cutter built up of several separate cutters, either to form a long parallel mill or, more often, a mill for a complex outline. The use of gang-mills has extended rapidly, since broad pieces of work (for which it would be impossible to make solid cutters to the required profiles) can be thereby machined at one traverse.

gang-plow, *n.*—**Vineyard gang-plow,** a plow which has a frame supported by two wheels and carries three or sometimes four light plows: designed for plowing in vineyards, hop-fields, and orange and other orchards.

gang-press (gang′pres), *n.* A press which employs a gang of dies or punches, all being alike. The perforating-press is a gang-press; also, a press having a series of dies, each different from the others and used to perform a series of operations upon the same blank, each operation serving to bring the object one step nearer to its finished form.

gangrene, *n.*—**Anemic gangrene,** gangrene which results from an obstruction to the blood-supply of the part. *Therapeutic Gazette*, XXVII. 50.—**Decubital gangrene.** Same as *bed-sore*.—**Disseminated cutaneous gangrene,** multiple gangrene of the skin, of neurotic origin.—**Multiple gangrene,** gangrene of several different parts. *Jour. Exper. Med.*, Oct. 1, 1900, p. 107.—**Senile gangrene,** spontaneous gangrene occurring in the aged, due to obstruction to the blood-supply.—**Spontaneous gangrene,** gangrene occurring without injury or other apparent exciting cause. *Jour. Exper. Med.*, Oct. 1, 1900, p. 97.—**Static gangrene,** moist gangrene arising from obstruction to the venous circulation.

gang-road (gang′rōd), *n.* A road which lies along the water-front of a town. [Eng.]

There is no quay room except the *gang-road* along there.
Evidence Hull Docks Commission, p. 52, *N. E. D.*

gang-spill (gang′spil), *n.* An anchor-windlass.

gang-trimmer (gang′trim″ėr), *n.* A trimmer employing more than two saws, each saw being suspended upon a swing-frame and all being controlled by levers to enable the operator to use any number or group of saws, within the capacity of the machine, in trimming stock of different lengths. All machines are fitted with automatic feed-chains to bring the stock to the saws.

gangway, *n.* 4. In *forestry*, the inclined plane up which logs are moved from the water into a sawmill. Also called *jack-ladder*, *log-jack*, *logway*, and *slip*.

gangwayman (gang′wā-man), *n.* A man placed in charge of a ship's gangway when in port.

ganocephalan (gan-ō-sef′a-lan), *a.* and *n.* **I.** *a.* Having the characters of the *Ganocephala*.

II. *n.* One of the *Ganocephala*.

ganodentin (gan-ō-den′tin), *n.* [Gr. *γάνος*, brightness, + E. *dentin*.] The structureless enamel which coats the teeth of the selachian fishes or sharks.

ganophyllite (ga-nof′i-līt), *n.* [Gr. *γάνος*, brightness, + *φύλλον*, leaf, + *-ite*[2].] The name alludes to the luster of the cleavage folia.] A silicate of manganese, aluminium, and alkalis occurring in brown monoclinic crystals, also in foliated masses: found in Sweden.

ganpi (gäm′pē), *n.* [Jap.] A shrub of the family *Daphnaceæ*, *Capura canescens* (*Wikstræmia canescens* of Meisner), native to India, Indo-China, China, and Japan. In Japan it is considered an important fiber-plant and is sometimes cultivated for its bark. This is used—either alone or more generally mixed with the barks of the kozo and mitsumata—for the manufacture of the tough, thin paper especially valuable in letter-press copying-books.

ganta (gän′tä), *n.* [Philippine Sp., < Bisaya *gantang*.] In the Philippine Islands, a dry measure containing rather less than three quarts; also, a liquid measure containing rather more than three quarts.

Ganymede, *n.* 3. The third and largest satellite of the planet Jupiter.

gaogao (gou′gou), *n.* [Chamorro name.] In Guam and the Philippines, the starch derived from the tubers of *Tacca pinnatifida*, the arrowroot of the South Sea Islands. See *Tacca*.

gap-bed (gap′bed), *n.* A lathe-bed in which a recess is cut just in front of the head-stock to permit of turning work larger than will swing over the guides.

gap-bridge (gap′brij), *n.* The piece or bridge which closes the gap in a gap-lathe bed. See ★*gap-bed*.

gape-worm (gāp-wėrm), *n.* A nematoid worm, *Syngamus trachealis*, the cause of gapes in fowls.

gap-stick (gap′stik), *n.* A pole placed across the entrance of a sorting-jack to close it when not in use.

gar[3] (gär), *n.* [Also *garr*, *gaar;* a var. of *gor*, dial. form of *gore*[1].] 1. Mud; ooze; dirt; slime. [Shetland and Orkney, and north of Scotland.]—2. Vegetable slime found adhering to ships' bottoms.

garage (gar′äj; F. pron. gä-räzh′), *n.* [F. *garage*, keeping under cover, a place for keeping (boats, wagons, automobiles) under cover, < *garer*, keep under cover, keep, guard, var. of OF. *garir*, keep: see *garret*.] A station in which motor-cars can be sheltered, stored, repaired, cleaned, and made ready for use; also, a place of private storage for a motor-car; a stable for motor-cars. [Recent.]

> The club's stewards will take charge of the competing vehicles at the gate of the *garage*.
> *Sci. Amer.*, March 28, 1903, p. 224.

garantee, garanty. Simplified spellings of *guarantee*, *guaranty*.

garbage-furnace (gär′bāj-fer″nās), *n.* A destructor; a furnace specially constructed for burning refuse and garbage. When properly designed and managed, such a furnace should need no other fuel than the refuse to be destroyed.

garbage-grease (gär′bāj-grēs), *n.* A trade-name for mixed fatty material collected from kitchen sinks, the grease-traps of sewers, etc.

> It is not known that refineries in this country are as yet able to handle what is known as *garbage grease*, as the secret of the trade seems to be held abroad.
> *Census Bulletin* 190, June 16, 1902, p. 5.

garbanzo (gär-bän′thō), *n.* [Sp.: see ★*calavance*.] In Porto Rico and Spanish America generally, the chick-pea, *Cicer arietinum*. See *chick-pea* (with cut).

> Barley, beans, lentils, and *garbanzos* grow very well in the fields in the greatest part of the province [New California].
> *Humboldt*, quoted in Bulletin 2, U. S. Dept. Agr., Div. [Veg. Pathol., 1892, p. 30.

garblage (gär′blāj), *n.* [*garble* + *-age*.] The office or functions of a garbler.

garbling, *n.* 4. Rubbish found mixed with a cargo which has been stowed in bulk.

garboard (gär′bōrd), *n.* In *ship-building*, one of the planks or plates of the bottom next to the keel on each side; also (in the plural), the whole of the garboard-strakes on both sides, or the part of the bottom surface covered by the garboard-strakes.

> We have to go back to "Valkyrie II." to find a midship section that bears any similarity to the easy bilges and full *garboards* that distinguish "Shamrock III." so sharply from any of her immediate predecessors.
> *Sci. Amer.*, June 27, 1903, p. 480.

garboard-plate (gär′bōrd-plāt), *n.* In *iron ship-building*, one of the plates of the strake next the keel. See cuts under ★*keel*[1], 2.

gard, *v.* and *n.* A simplified spelling of *guard*.

Gardeau flags. See ★*flag*[4].

garde-du-corps (gärd-dü-kôr′), *n.* [F.] A body-guard; a member of a body-guard.

garde-meuble (gärd-mė′bl), *n.* [F., < *garder*, keep, + *meubles*, furniture, pl. of *meuble*, < L. *mobilis*, movable: see *mobile*.] A depository or museum in which valuable furniture, tapestries, and the like are kept.

garden. I. *n.*—**Formal garden,** a pleasure-ground laid out according to the principles of formal gardening. See *formal* ★*gardening*.—**Garden husbandry.** (*b*) Farming carried on with as much care and neatness as gardening.—**Rock garden,** a garden, particularly a division of a botanic garden, adapted to the growth of alpine plants, succulents, and other plants fond of dry and rocky situations; a scientific rockery.—**The Garden,** the school of Epicurus, who taught in a garden. *N. E. D.*—**Winter garden,** a conservatory or greenhouse so arranged as to serve as a place of resort, with space for tables and seats.

II. *a.* 2. Common; ordinary: as, a *garden* hen; *garden* proceedings. [Slang.]—**Garden architecture.** See ★*architecture*.

garden-apple (gär′dn-ap″l), *n.* A name rarely used for the paradise-apple; a cultural or domestic form of the common apple (*Malus Malus*, var. *paradisiaca*) of very small stature. See ★*doucin* and ★*paradise*, 7.

garden-bed (gär′dn-bed), *n.* 1. A bed of flowers or vegetables in a garden.—2. A name given to certain small areas covered by a number of low parallel, artificial ridges some six or eight inches high and from four to ten feet apart, found in certain parts of the eastern and central United States. Their significance is not known with certainty.

garden-chair (gär′dn-chār), *n.* A chair for garden use; particularly, a kind of bath-chair (on wheels) for the use of ladies and invalids.

gardencraft (gär′dn-kraft″), *n.* The art of gardening, both from the utilitarian and from the esthetic point of view.

> To enjoy and appreciate the Italian *garden-craft* one must always bear in mind that it is independent of floriculture.
> *Edith Wharton*, Italian Villas, p. 5.

gardener's-delight (gär′dn-ėrz-dē-līt″), *n.* Same as ★*gardener's-eye*.

gardener's-eye (gär′dn-ėrz-ī), *n.* The mullen-pink or rose-campion, *Lychnis Coronaria*.

garden-fly (gär′dn-flī), *n.* Any one of several species of the dipterous family *Bibionidæ* which breed commonly in the soil of gardens.

garden-ground (gär′dn-ground), *n.* A plot of ground suitable for or used as a garden.

gardenin (gär′dn-in), *n.* [*Gardenia* + *-in*[2].] A neutral substance, $C_{14}H_{12}O_6$, extracted from dikamali, the resinous exudation of *Gardenia lucida*. It crystallizes in lustrous, deep-yellow needles which melt at 163–164° C.

gardening, *n.*—**Formal gardening,** landscape-gardening of the kind adopted by the Italians of the Renaissance and later by the French in the time of Louis XIV. It is characterized by straight avenues, artificial lakes and grass-plots of geometrical outline, and many terraces, pavilions, and other architectural adornments.

gardenize (gär′dn-īz), *v. t.*; pret. and pp. *gardenized*, ppr. *gardenizing*. [*garden* + *-ize*.] To give a garden-like appearance to; improve by introducing garden features: as, to *gardenize* a public square.

garden-nail (gär′dn-nāl), *n.* A kind of nail used to fasten the branches of trees, vines, etc., to walls; a wall-nail.

garden-plague (gär′dn-plāg), *n.* The gout-wort or herb-gerard, *Ægopodium Podagraria*.

garden-plow (gär′dn-plou), *n.* A wheel-hoe.

gardenry (gär′dn-ri), *n.* [*garden* + *-ry*.] The office or work of a gardener; garden-work.

garden-seat (gär′dn-sēt), *n.* 1. A seat or bench in a garden.—2. A name jocosely applied to one of the seats for the accommodation of outside passengers which are arranged in parallel rows across the roof of some British omnibuses, facing in the direction of the journey. See *knifeboard*, 2, for another arrangement.

garden-seated (gär′dn-sē″ted), *a.* Provided on top with ★garden-seats (which see): as, *garden-seated* omnibuses.

garden-truck (gär′dn-truk), *n.* The products of a vegetable-garden, particularly when grown for market.

garden-worm (gär′dn-wėrm), *n.* An earth-worm.

gardevin, gardevine (gär′de-vin, -vīn), *n.* [F. *gardevin*, < *garder*, keep, + *vin*, wine.] 1. A large bottle for holding wine or spirits.—2. A cellaret (which see).

gardian, *n.* A simplified spelling of *guardian*.

gare[5] (gär), *n.* [F., < *garer*, keep: see *garage*.] 1. A dock, basin, or turnout on a river or canal.

> Commander Edwards, R.N., proceeded down the Canal, taking possession of the *gares* and dredgers, while Captain Fitzroy, R.N., occupied Ismailia after slight opposition.
> *Encyc. Brit.*, XXVII. 708.

2. A railway-station.

garfish, *n.* (*c*) In Australasia, (1) *Tylosurus ferox*, called in Sydney 'long Tom'; (2) *Hemiramphus intermedius*; (3) a river-fish, *H. regularis*, of the family *Hemiramphidæ*.

garg. An abbreviation of the Latin *gargarisma*, gargle.

Gargas marl. See ★*marl*[1].

gargoyled (gär′goild), *a.* Ornamented with gargoyles.

> Parvis and portal bloom like trellised bowers,
> And the vast minster seems a cross of flowers!
> But fiends and dragons on the *gargoyled* eaves
> Watch the dead Christ between the living thieves.
> *Longfellow*, in trans., Divine Comedy, I. Sonnet ii.

garial, *n.* Same as *gharrial* and *gavial*.

garigue, *n.* See ★*garrigue*.

garinding (ga-rin′ding), *n.* [Javanese and Malay *garinding*.] A Javanese oboe.

garlic, *n.*—**False garlic,** a liliaceous plant, *Nothoscordium bivalve*, found in the southern United States and Mexico. The genus is closely related to *Allium*, but is free from the alliaceous odor. Sometimes called *yellow false garlic*.

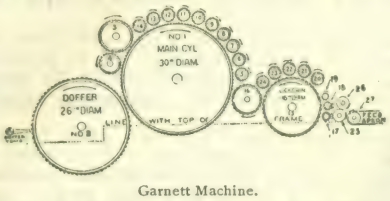
False Garlic (*Nothoscordium bivalve*), one third natural size.

garlic-mustard (gär′lik-mus″tärd), *n.* See *mustard*.

garlic-shrub, *n.* 2. The guinea-hen weed, *Petiveria alliacea*. See *Petiveria*.

garlic-snail (gär′lik-snāl), *n.* *Helix alliaria*, a snail that emits a garlic-like odor.

garlic-tree (gär′lik-trē), *n.* In the West Indies, *Cratæva Tapia*, one of the trees known as *garlic pear*. See *pear*[1] and *Cratæva*.



Garmannia (gar man′iä), *n.* [NL., named for Samuel *Garman*, an American ichthyologist.] A genus of small gobies found in the Panama region, having the anterior half of the body naked and the posterior with large scales. The species is *G. paradoxa*.

garn (gärn), *n.* A dialectic form of *yarn*. [North. Eng.]

garnet[1], *n.*—**Alizarin garnet,** a mordant dyestuff related to anthraquinone, prepared by the reduction of α-nitro-alizarin. It produces bluish reds with metallic mordants. It is used chiefly in calico-printing and wool-dyeing.—**Carminaph garnet.** Same as *alpha-naphthylamine* ★*red*.

garnet-paper (gär′net-pā″pėr), *n.* Paper coated with finely crushed garnets held by glue: used like sandpaper for polishing.

garnett (gär-net′), *v. t.* [*Garnett* (*machine*).]

Garnett Machine.

1, main cylinder; 2, doffer; 3, fancy; 4, fancy-stripper; 5–14, workers; 15, licker-in; 16, tumbler; 17–19, metallic feed-rolls; 20–24, breast-workers; 25, 26, fluted feed-rolls.

To open and card woolen yarn waste, shoddy, etc., on a Garnett machine.

garnet-tackle (gär′net-tak″l), *n.* A purchase rigged on the mainstay and used for taking in and hoisting out cargo.

garnett-tooth (gär-net′töth), *n.* A form of saw-tooth cut in a steel band designed to be wound on the cylinders or rollers of a Garnett machine, used for carding thread-waste, shoddy, etc. *Nasmith*, Cotton Spinning, p. 132.

garnetz (gär′nets), *n.* [G. *garnetz*, < Russ. *gárnetsŭ*.] A Russian dry measure equal to nearly three eighths of a United States peck. *C. Hering*, Conversion Tables, p. 55.

garnishry (gär′nish-ri), *n.* [*garnish* + *-ry*.] Ornaments; adornments; garnishing.

> Herdsmen's souls
> Of ancient times, whose eyes, calm as their flocks,
> Saw in the stars mere *garnishry* of heaven.
> *Browning*, Paracelsus, iii. 183.

garr, *n.* See ★*gar*³.

garrigue (gä-rēg′), *n.* [Southern F., < Pr. *garriga* = Cat. *garriga*, < Pr. *garrics*, OF. *jarris*, Cat. *garrig*, the holm-oak or ilex.] In the south of France, a tract of waste land covered with the holm-oak, *Quercus Ilex*, and the Aleppo pine, *Pinus hierosolymitana*, and other scrub growth, and having a calcareous soil.

> Often upon uncultivated lands, there called the *garrigues*, are seen long trains of ants forming two continuous lines hurrying in opposite directions, one going away from the nest, the other toward it.
> *Smithsonian Rep.*, 1896, p. 414.

garrison-hold (gar′i-sn-hōld), *n.* Possession of a place by garrisoning it.

garrison-town (gar′i-sn-toun), *n.* A town in which a garrison is maintained.

garrupa, *n.*—**Red garrupa**, *Sebastodes caurinus*, a scorpænoid fish found from Puget Sound to Sitka.

garter, *n.* 8. *pl.* Leg-irons or shackles. [Sailors' slang.]

gartering (gär′tėr-ing), *n.* A narrow fabric, as webbing, from which garters are made.

garter-robes (gär′tėr-rōbz), *n.* The robes proper to be worn by Knights of the Garter.

garua (gä-rō′ä), *n.* [Peruvian Sp.] The heavy fog along the coast of Peru on which plants depend for their moisture. It prevails from May to October up to a height of a hundred feet.

Garzonidæ (gär-zon′i-dē), *n. pl.* [*Garzonia*, the type genus, + *-idæ*.] A family of extinct marsupial mammals, of small size, which have no conspicuous diastema in the tooth series, and two or three of the premolars with double roots. *Ameghino*, 1891.

gas, *n.* 6. Specifically, nitrous-oxid gas when used to produce anæsthesia, most commonly by dentists.—**Clayton gas**, a mixture of sulphurous acid and other sulphur-oxid gases employed in disinfecting a ship's hold and clearing it of rats.—**Dowson gas**, combustible gas made by continuously passing steam mixed with air through red-hot anthracite or coke, the ignition of which is maintained by the supply of air: a kind of water-gas, which has been much used in gas-engines. *W. L. Dibdin*, Public Lighting, p. 323.—**Gas equation, spectrum.** See ★*equation*, ★*spectrum*.—**Generator gas**, a mixture of gases intended for use as fuel, made from small coal, lignite, peat, sawdust, or other cheap forms of solid fuel, either by partial combustion with limited supply of air (in this case consisting essentially of carbon monoxid and nitrogen), or by such combustion with admission of steam, in which case the mixture, known as water-gas, consists essentially of carbon monoxid, carbon dioxid, hydrogen, and nitrogen. See *gaseous* ★*fuel*.—**Ground gases**, gases of all kinds contained within the earth, as distinguished from the atmosphere outside its surface. *Van Hise*, U. S. Geol. Surv. Monographs, XLVII. 58.—**Hydrocarbon gas**, the mixed gases generated by the action of steam, or of steam and air, on substances which contain carbon and hydrogen, such as tar, oils, shale, etc. It contains large quantities of carbon monoxid, together with hydrogen and a number of the lower members of various hydrocarbon series.—**Ideal gas**, in *thermodynamics*, a gas which exactly conforms to Boyle's law, that is, which neither absorbs nor gives up heat during free expansion, and the internal energy of which is a function of the temperature alone. Also called a *perfect gas*. These conditions are not rigorously fulfilled in the case of any actual known gas.—**Irrespirable gas**, any gas the inhalation of which gives rise to laryngeal spasm.—**Mond gas**, generator gas prepared by one of the many special arrangements proposed for this purpose. *Nature*, Feb. 12, 1903, p. 354.—**Naphtha gas**, illuminating-gas made from or carbureted by naphtha, usually petroleum naphtha.—**Pan gas**, in the manufacture of carbonate of soda by the Leblanc process, the gas (mainly hydrochloric acid) given off from the cast-iron pans in which the first action of sulphuric acid on common salt is brought about. This gas is carried to condensers, in which it is absorbed by water, furnishing the liquid hydrochloric acid of commerce.—**Pintsch gas**, an oil-gas obtained by introducing the vapors from heated mineral oil (shale-oil or petroleum) into a retort containing loosely stacked fire-brick and kept at a cherry-red heat. The gases produced are cooled and passed through a washer containing water to separate tar, and are compressed into steel cylinders for transportation. The mixture contains a large proportion of unsaturated hydrocarbons, and hence has high illuminating power. It has been much used for lighting floating buoys, light-houses, and especially railroad-cars. Several other arrangements for making oil-gas have been patented.—**Pit gas**, a miners' name for gaseous methane (CH_4), as it occurs in bituminous coal-mines. Same as *fire-damp*.—**Power gas**, gas used as a fuel for the generation of power; particularly, gas used as a fuel in internal-combustion engines.—**Producer gas**, a gas generated in a producer by blowing a jet of steam through an incandescent bed of coals; a fuel-gas or one rich in carbonic oxid. One pound of water-gas contains about 2,200 B. T. U., and is of about the following composition: CO 27, H 12, CH_4 2, C_2H_4 1, CO_2 3, N 55.—**Roaster gas**, in the manufacture of carbonate of soda by the Leblanc process, the gaseous hydrochloric acid which is given off from the brickwork roasters in which is carried out the second stage of the decomposition of common salt by sulphuric acid: distinguished from *pan* ★*gas*, which is given off at a lower temperature in the first stage of the decomposition in pans, usually of cast-iron.

gas, *v. t.* 3. To treat with a gas or expose to the action of a gas, as is done with slaked lime in the manufacture of bleaching-powder. *G. Lunge*, Sulphuric Acid, III. 456.—4. To overcome or poison by means of the inhalation of gas.

gas-analysis (gas′a-nal″i-sis), *n.* In *chem.*, the analysis of substances in the gaseous state, in which quantitative determinations are chiefly made by volume, with the necessary attention to conditions of pressure and temperature.

gas-bacillus (gas′ba-sil″us), *n.* A species of *Bacillus* (*B. aërogenes capsulatus*) found by Welch in the blood-vessels of a patient with thoracic aneurism. It forms gas in culture-media.

gas-bath (gas′bȧth), *n.* In *chem.*, a bath for the application of regulated temperature, either by an atmosphere of heated gas or by gas-burners.

gas-blast (gas′blȧst), *n.* A gas fire which is forced by an air-blast.

gas-bottle (gas′bot″l), *n.* 1. A retort.—2. A cylindrical vessel of iron or steel for holding gases under pressure. Carbon dioxid, nitrous oxid, ammonia, chlorin, and other gases are sold in such containers. A needle-valve controls the release of the gas.

gas-box (gas′boks), *n.* The passage or chamber, in an internal-combustion engine, between the mixing-chamber and the admission-port.

gas-burette (gas′bū-ret″), *n.* In *chem.*, a graduated glass vessel in which gases may be measured before or after treatment with chemical reagents in the course of analysis.

gas-calorimeter (gas′kal-ō-rim″e-tėr), *n.* An apparatus for finding the heat-value of a known quantity of gas; an apparatus for measuring the amount of heat a quantity of gas gives off when burned. See ★*calorimeter*.

gas-cap (gas′kap), *n.* In *elect.*, the cover of the inner globe of an inclosed arc-lamp, which protects the carbons from rapid combustion by reducing the access of air.

gas-cavity (gas′kav″i-ti), *n.* Same as *gas-pore*.

gas-chamber (gas′chām″bėr), *n.* A device used in microscopy for studying organisms under the influence of gases.

gas-coke (gas′kōk), *n.* Same as *gas-carbon*.

Gascon, *n.* 3. [*l. c.*] The common saurel or horse-mackerel, *Trachurus trachurus*.

gas-conductor (gas′kon-duk″tor), *n.* Any pipe for conducting gases or vapors: used specifically for the pipe leading from the mouth of a blast-furnace to the stoves.

Gasconism (gas′kon-izm), *n.* [*Gascon* + *-ism*.] A peculiarity of speech, manner, or character of the Gascons; a spirit of boastfulness or bravado.

gas-cyst (gas′sist), *n.* A cyst containing gas, the product usually of a certain species of bacillus. *Jour. Exper. Med.*, Oct. 25, 1900, p. 139.

gas-detector (gas′dē-tek″tor), *n.* An apparatus intended to give warning of the presence of fire-damp or dangerous gases in a mine.

gas-distributer (gas′dis-trib″ū-tėr), *n.* A piece of apparatus used in chemical laboratories, consisting of a central hollow block of brass with several stop-cocks, one for the admission of common illuminating-gas employed for heating purposes, and two, three, or more by which this gas may be carried off to as many different lamps or burners.

gas-fired (gas′fīrd), *a.* Heated by combustion of gaseous fuel: as, a *gas-fired* boiler, a *gas-fired* furnace, etc. *Groves and Thorp*, Chem. Technol., I. 539.

gas-firing (gas′fīr″ing), *n.* A method of firing a furnace in which a gas or a liquid that has been vaporized is used as a fuel.

gas-fitter, *n.*—**Gas-fitter's tongs**, pipe-tongs.

gas-fitting (gas′fit″ing), *n.* 1. The occupation of a gas-fitter.—2. *pl.* The gas-fixtures and other appliances required in equipping a building for the use of illuminating-gas; also, the fittings for gas-pipes.

gas-forge (gas′fōrj), *n.* A small steel frame inclosing fire-brick, of various shapes, and arranged with either a hearth on which the flames play or a narrow slot through which the flames pass in a thin sheet. It is used in annealing rods, forging cutlery, brazing small sheets of metal, and heating lathe-tools preparatory to hardening them.

gas-furnace, *n.*, 1. The name is now applied to many different types of forges, ovens, and furnaces heated by natural gas, water-gas, or generator gas, and used in assaying, annealing, brazing, carbonizing, enameling, forging, japanning, melting, soldering, tempering, or welding metals, and also in warming buildings. Gas-furnaces are named from the work for which they are used: as the *annealing gas-furnace*, the *brazing gas-furnace*, etc. They consist commonly of a steel frame or box, lined with fire-brick or other refractory material, and one or more gas-burners which deliver the gas, mixed with air, under the pressure of an air-blast.

gas-generator (gas′gen-e-rā-tor), *n.* 1. A gas-producer; a gas-retort; an apparatus for manufacturing gas either by distillation, as in a retort, or by separation, as in a producer, or by a chemical process, as in making hydrogen by mixing zinc and sulphuric acid, thus forming zinc sulphate and liberating hydrogen gas. See ★*gas-producer*, 1.—2. An apparatus used in chemical laboratories to furnish a particular gas by the action of some liquid reagent upon a solid, so arranged that when the gas is no longer required its outflow may be cut off by a stop-cock, and its tension then serves to force the liquid out of contact with the solid material, thus arresting the generation of gas until it is again needed.—**Babo's gas-generator**, a simple instrument for intermittently generating gases, as carbon dioxid, hydrogen sulphid, etc. By inclining the apparatus, acid or other liquid contained in one bulb is allowed to flow into another bulb containing the chemical on which it is to act. When gas is no longer needed, the instrument is returned to its normal position.—**Kipp's gas-generator**, a piece of apparatus used in chemical laboratories to furnish carbon dioxid, sulphureted hydrogen, or other gas in limited quantity when needed, without waste of material when the gas is not being drawn off. It consists of three glass globes placed vertically one over another, and having a funnel-tube which runs from the uppermost to the lowest of the three. The solid material to be acted upon is placed in the middle globe, the dilute acid to act upon it in the uppermost one, and the lowest serves to collect the spent liquor to be from time to time removed.

gas-grate (gas′grāt), *n.* A gas-stove burner having branches, or bars like those of a grate, with many small burners. It is used in water-heaters, cake-griddles, etc.

gas-harmonicon (gas′här-mon″i-kon), *n.* Same as *pyrophone*.

gashgabbit (gash′gab″it), *a.* Having a projecting chin. [Scotland.]

gas-holder, *n.* 2. A vessel of metal or glass, used in chemical laboratories for the collection and storage of gases.—**Mitscherlich's gas-holder**, a glass vessel closed at top and bottom with appropriate stoppers. The mouthpiece carries an exit-tube and a funnel-tube which reaches to the bottom. When filled with water, the upper stop-cocks remaining closed, the tubulus at the bottom may be opened without the water running out. Gas when introduced displaces the water. When the gas is collected the lower tube is closed and pressure is exerted on the interior by pouring water into the funnel-tube. The gas may then be drawn as desired.

gasket (gas′ket), *v. t.* [*gasket*, *n.*] To fasten with gaskets, as a sail to a yard.

gas-kiln (gas′kil), *n.* An oven or kiln which uses gas as a fuel.

gaskin (gas′kin), *n.* [Also *gasken*, *gascoign*, *gascoigne*, ult. 'of Gascony,' < OF. *Gascoigne*: see *Gascon*.] 1. The sweet cherry, *Prunus avium*.—2. The common gooseberry. [Prov. Eng.]—3. The hinder part of a horse's thigh, extending from the stifle to the bend of the hock.

gas-lamp, *n.*—**Incandescent gas-lamp**, any form of gas- or gasolene-burner combined with a mantle from the incandescence of which light is obtained.

gas-log (gas′log), *n.* A device resembling a piece (or several pieces) of fire-wood, used in a fireplace in which gas is burned.

gas-microscope (gas′mī″krō-skōp), *n.* Same as *oxyhydrogen microscope*.

gasmobile (gas-mō′bil), *n.* A trade-name of a form of motor-car in which gasolene is used as a source of motive power in an internal-combustion motor.

gas-motor (gas′mō″tor), *n.* A motor or engine in which the piston is moved by the gas or vapor from an ammonia liquor.

gasogenous (ga-soj′e-nus), *a.* [*gas* + *-o-* + *-genous*.] Of or pertaining to a gas, or to the

vapor phase of a substance: as, a *gasogenous* molecule.

There are liquidogenous and *gasogenous* molecules, which co-exist in proportions depending upon the temperature. *Engineering*, July 24, 1903, p. 109.

gasolene, *n.* Its principal hydrocarbon constituents are hexane and heptane, C_6H_{14} and C_7H_{16}, in varying proportions. It boils between 149° and 194° F. and gives off a vapor under atmospheric tension at all temperatures. The vapor of gasolene is 3.05 times as heavy as air. The volatile elements distil off on storage, unless the containing-vessels are very tight. Its calorific power is about 18,000 B. T. U. It is much used in the internal-combustion motors of motor-cars and motor-boats.—**Gasolene engine.** Same as ★*gasolene motor.*—**Gasolene forge,** a special type of gasolene torch having two flames.—**Gasolene furnace,** a small furnace, usually portable, which burns gasolene. It is used in melting solder, lead, etc., heating rivets and core-ovens, and for other purposes. It is made with vapor-burners and on the general principle of the gasolene torch.—**Gasolene motor,** an internal-combustion motor which uses a mixture of gasolene vapor and air as a source of motive power. See cuts at *internal-combustion* ★*engine.*

gasolier (gas′ō-lēr), *n.* A chandelier in which gas is used.

gasometer, *n.*—**Bunsen's gasometer,** a graduated glass vessel for collecting, storing, and delivering gases. Mercury or water may be used to fill the vessel before the gas is introduced.

gasometrical (gas-ō-met′ri-kạl), *a.* Same as *gasometric.*

gas-oxygen (gas′ok″si-jen), *a.* Producing heat by the combustion of a mixture of illuminating-gas and oxygen: as, a *gas-oxygen flame,* a *gas-oxygen blowpipe.* Also known as *oxy-gas* and *oxy-coal-gas.*

The soapstone can be melted in a *gas-oxygen* jet, and very fine fibres are easily drawn out from the clear bead thus obtained. *Nature*, June 9, 1904, p. 132.

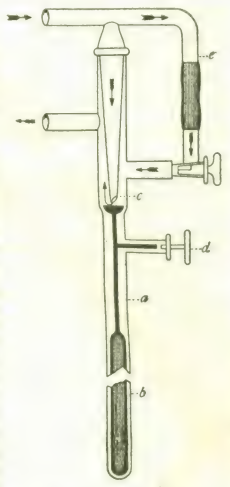
gaspereau (gas-pẹ-rō′), *n.* [Canadian F.; cf. *Gaspereau* (lakes), *Gaspereaux* (village), local names in Canada.] **1.** The common alewife, *Pomolobus pseudoharengus.* [Maine and Canada.]—**2.** A name given in New Brunswick and parts of Canada to the herring, *Clupea vernalis.*

gaspergou (gas-pėr-gö′), *n.* [Origin not ascertained.] The fresh-water drum, *Aplodinotus grunniens.* [Canada.]

Gaspé series. See ★*series.*

gas-pillar (gas′pil″ạr), *n.* The short upright part of a gas-burner to which the burner is fixed.

gas-pocket (gas′pok″et), *n.* A quantity of gas collected in a crevice or hollow. Such collections are likely to occur in the crevices in the charge of a blast-furnace, and, if composed of elements in the right proportions, will explode when ignited by the flames.



gas-producer (gas′prō-dū″sėr), *n.* **1.** A furnace in which combustible gas is produced, to be used as fuel in another furnace. Usually the gas is made by distilling carbonic oxid, which is done by heating anthracite or bituminous coal in a grate with the fuel-bed so thick that the upper or freshly charged layers are in an atmosphere of carbonic-acid gas from the lower combustion. When the carbon of these upper layers becomes hot enough for chemical reaction, it unites with CO_2, decomposing it into two parts of carbonic oxid or CO. If steam is blown into the ash-pit of such a producer, the H_2O is decomposed, the hydrogen being mechanically mixed with the carbon monoxid, and the oxygen combining with carbon, to be again broken up, as before, by reaction with more carbon. See *producer* ★*gas.*

2. Same as ★*gas-generator,* 2.

gas-pump (gas′pump), *n.* **1.** A pump used for compressing gas.—**2.** A pump for raising water, or for any other service, the motive power of which is an internal-combustion engine.

gas-radiator (gas′rā″-di-ā-tọr), *n.* A gas-heater formed of vertical sheet-metal pipes arranged in the form of a steam-radiator.

gas-regulator, *n.*—**Reichert's gas-regulator,** an apparatus for regulating the flow of gas: used in connection with an oven whose temperature is to be kept constant, such as an incubator, a drying-oven, etc.; a form of thermostat. The instrument consists of a glass tube, *a*, of narrow bore, blown into a bulb, *b*, at one end and having one or more lateral tubes sealed to it near the other end. Mercury fills the bulb and part of the stem. When expanded by heat it partly closes the orifice, *c*, through which the gas passes. The extent to which this can occur is controlled by the side adjusting-screw, *d*. A by-pass, *e*, supplies enough gas, at all times, to keep a small flame at the burner, under the oven.

Reichert's Gas-regulator.

gas-ring (gas′ring), *n.* A work-bench gasolene heating-burner in which the jets of flame are arranged in a circle; a ring burner.

gas-scale (gas′skāl), *n.* The scale of a gas-thermometer. *Nature*, April 24, 1902, p. 604.

Gassendist (ga-sen′dist), *n.* [*Gassendi* + *-ist.*] A follower or supporter of Gassendi, a French metaphysician (1592–1655) who defended Epicureanism.

gasser (gas′ėr), *n.* **1.** One who is engaged in gassing lace, cotton, yarn, etc., in order to remove the hairy filaments. See *gassing* and *gassing-frame.*—**2.** One who 'gasses,' or talks in an idle and empty manner. [Slang.]

Gasserian artery. See ★*artery.*

gassing, *n.* **3.** The fumigating of fruit-trees by means of hydrocyanic-acid gas, to destroy insects. [Colloq.]

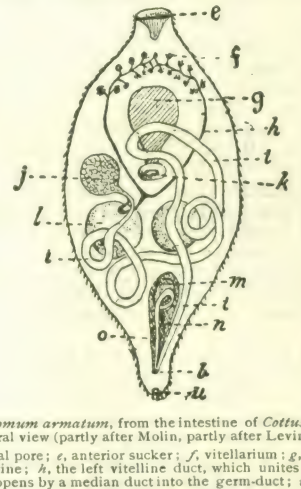
Scale insect enemies of citrus trees are controlled in two ways: either by spraying the infested plants with some liquid insecticide or by subjecting them to the fumes of hydrocyanic-acid gas, commonly designated as "*gassing.*" *Yearbook U. S. Dept. Agr.*, 1900, p. 254.

4. The evolution of gas from the plates of a storage or secondary cell.

Gassiot's wheel. See ★*wheel.*

gas-spurt (gas′spėrt), *n.* A small raised heap occurring on the surfaces of some strata. It is conjectured to be due to the escape of gas from decomposing organic matter in the original sand or mud before complete solidification. *Geikie,* Text-book of Geol. (4th ed.), p. 645.

gaster[2] (gas′tėr), *n.* **2.** In certain hymenopterous insects, such as ants (*Formicidæ*), the abdomen exclusive of the stem, or pedicel.



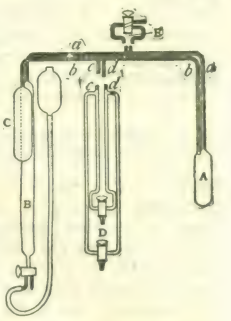
gasterasthenia (gas″tėr-as-thē′ni-ạ), *n.* [NL., < Gr. γαστήρ, stomach, + ἀσθένεια, weakness.] Muscular or functional weakness of the stomach.

gasterocomid (gas-tẹ-rok′ō-mid), *n.* A member of the family *Gasterocomidæ.*

Gasteropelecus (gas″tẹ-rō-pel′e-kus), *n.* [NL., < Gr. γαστήρ, belly, + πέλεκυς, a two-edged ax.] A generic name of certain carcinoid fishes of South America, notably *G. maculatus.*

Gasterostomatidæ (gas-tẹ-ros-tō-mat′i-dē), *n. pl.* [NL., < **Gasterostoma*(*t-*), assumed form of *Gasterostomum,* + *-idæ.*] A family of malacotylean trematodes, having the anterior sucker only, the mouth on the ventral surface but not in the sucker, and the genital opening terminal. They are parasitic in the alimentary canal of fishes, and the cercaria is known as *Bucephalus. Gasterostomum* is the typical genus.

Gasterostomum (gas-tẹ-ros′tō-mum), *n.* [NL., < Gr. γαστηρ, stomach, + στόμα, mouth.] The typical genus of the family *Gasterostomatidæ. G. fimbriatum* is parasitic in the perch *Perca fluviatilis.* Its eggs give rise to larvæ which make their way into the liver or gonad of *Unio* or *Anodonta,* destroying by their growth the reproductive gland. In the sporocysts formed in the mollusk arise the cercariæ known as *Bucephalus* (which see). *G. armatum* is parasitic in *Cottus scorpio. Von Siebold.*



Gasterostomum armatum, from the intestine of *Cottus scorpio.* Ventral view (partly after Molin, partly after Levinsen).

b, genital pore; *e*, anterior sucker; *f*, vitellarium; *g*, simple sac-like intestine; *h*, the left vitelline duct, which unites with its fellow, and opens by a median duct into the germ-duct; *i*, uterus; *j*, germarium; *k*, mouth, which has a position unique among the *Trematoda,* nearly in the middle of the ventral surface; *l*, the right testis; *m*, seminal vesicle; *n*, cirrus sac; *o*, cirrus or penis; *u*, excretory pore. (From Lankester's "Zoology.")

gasterotrichan (gas-tẹ-rot′ri-kạn), *a.* and *n.* Same as ★*gastrotrichan.*

gasterotrichous (gas-tẹ-rot′ri-kus), *a.* Same as *gastrotrichous.*

gas-thermometer (gas′thėr-mom″e-tėr), *n.* A thermometer in which the variation of volume or tension of a fixed quantity of dry gas indicates the temperature of the latter. Hydrogen, oxygen, nitrogen, and carbonic-acid gas-thermometers have been employed. The hydrogen gas-thermometer is considered as the normal, but all are reduced to the ideal gas-thermometer by theoretical formulas.—**Compensated constant-pressure gas-thermometer,** a gas-thermometer by means of which the volume of gas at different temperatures is determined under constant pressure; specifically, that devised by Callendar in 1887. "The instrument consists of two parts—B, a burette connected by the capillary tube *a* with the thermometer-bulb A; and a bulb, C, also sealed to a capillary tube, *b*, which is of the same dimensions as, and is bent similarly to, *a*. The two parts of the instrument are connected, at *c* and *d*, to the two limbs of the differential manometer D. The readings are taken by measuring the volume of the gas, introduced through E, in the burette after adjusting the mercury till the pressure in the two parts of the apparatus, as indicated by the differential manometer, is equal." *M. W. Travers,* Exper. Study of Gases, p. 151.

Compensated Constant-pressure Gas-thermometer. (From Travers's "Study of Gases.")

gas-thread (gas′thred), *n.* A standard form of thread used on iron and brass tubes. It is finer than the standard bolt-thread and has a taper of 1 in 32 to the axis of the tube.

gas-tip (gas′tip), *n.* A perforated top or cap of lava or metal fixed to a gas-burner, through which the gas escapes as it burns, the shape of the opening in the tip governing the shape of the flame.

gastliness, *n.* A simplified spelling of *ghastliness.*

gastly, *a.* and *adv.* A simplified spelling of *ghastly.*

Gastornithidæ (gas-tôr-nith′i-de), *n. pl.* [NL., < *Gastornis* (*-ornith-*) + *-idæ.*] A family of extinct gigantic birds, indicated by bones from the Eocene of France: sometimes considered as forming an order, the *Gastornithes.* The members of the group are believed to be more or less nearly related to the ducks and geese.

gastradenitis (gas″tra-de-nī′tis), *n.* [NL., < Gr. γαστήρ (γαστρ-), stomach, + ἀδήν, gland, + *-itis.*] Inflammation of the glands of the stomach, especially when caused by acute poisoning with arsenic or phosphorus.

gastræal, gastreal (gas-trē′ạl), *a.* [*gastræa* + *-al*[1].] Relating or pertaining to the gastræa stage of the embryo.

The comparative embryology of this [cœlom] cavity shows that originally in the most archaic vertebrates it was formed by the outgrowth of diverticula from the primitive *gastræal* cavity. *Encyc. Brit.*, XXV. 397.

gastralium (gas-trā′li-um), *n.*; pl. *gastralia* (*-ạ*). [NL., < *gastralis,* gastral.] Same as ★*autogastralium.*

gastrectasia (gas-trek-tā′si-ạ), *n.* [NL., < Gr. γαστήρ (γαστρ-), stomach, + ἔκτασις, extension.] Dilatation of the stomach. Also called *gastrectasis.*

gastrectasis (gas-trek′tạ-sis), *n.* [NL.] Same as ★*gastrectasia.*

gastreum, *n.* Same as *gastræum.*

gastric, *a.*—**Gastric mill,** the thickened and calcified armature of the chitinous lining of the cardiac division of the stomach in certain *Crustacea.* In the crawfish, and in most of the higher *Crustacea,* it consists of a complex chitinous framework which carries a median and two lateral projections furnished with muscles for converging them upon the food and completing its mastication. *Parker and Haswell,* Zoology, I. 547.—**Gastric neurasthenia, pouch, tetany.** See ★*neurasthenia,* etc.

gastricolous (gas-trik′ō-lus), *a.* [Gr. γαστήρ (γαστρ-), stomach, + L. *colere,* dwell in.] Inhabiting the stomach: said of parasites.

gastriloquial (gas-tri-lō′kwi-ạl), *a.* [*gastriloquy* + *-al*[1].] Of or pertaining to ventriloquism; ventriloquial.

gastritic (gas-trit′ik), *a.* [*gastrit-is* + *-ic.*] Relating to or affected with gastritis.

gastritis, *n.*—**Arthritic gastritis,** gout of the stomach.—**Atrophic gastritis,** inflammation of the stomach causing atrophy of the secreting glands.—**Catarrhal gastritis.** Same as *gastric* ★*catarrh.*—**Follicular gastritis,** inflammation affecting especially the glands of the stomach.—**Glandular gastritis.** Same as *follicular* ★*gastritis.*—**Hypertrophic gastritis,** inflammation of the stomach leading to permanent thickening of the mucous membrane.—**Mycotic gastritis,** inflammation of the stomach caused by the presence of a fungus.—**Phlegmonous gastritis,** an acute and severe form of inflammation involving chiefly the submucous coat of the stomach: often accompanied by the formation of abscesses.

gastro-adenitis (gas″trọ-ad-e-nī′tis), *n.* Same as ★*gastradenitis.*

gastro-anastomosis (gas″trō-a-nas-tō-mō′sis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *ἀναστόμωσις*, anastomosis.] The establishment of a communication between two portions of the stomach which are separated by a constriction, as in hour-glass stomach.

gastro-arthritis (gas″trō-är-thrī′tis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *ἀρθρῖτις*, gout.] Gout of the stomach.

Gastrocampyli (gas-trō-kam′pi-lī), *n. pl.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *καμπύλος*, curved.] In Hyatt's classification, that division or suborder of the ammonoid cephalopods in which the siphuncle is situated on the dorsal or concave curvature of the whorls, the shells laterally compressed, involute, and frequently ornamented with spinous processes, the septal sutures not being greatly unlike those of the simpler forms of the goniatites. The division includes only the old genus *Clymenia* and family *Clymeniдæ*, both of which have now been considerably subdivided.

gastrocentrous (gas-trō-sen′trus), *a.* [Gr. *γαστήρ*, belly, + *κέντρον*, center.] Having vertebral centra formed by the growth of the pair of ossifications, known as interventralia, which are developed on the inferior face of the notochord.

The vertebræ of the Reptilia and those of all other Amniota are *gastrocentrous*.
H. Gadow, Amphibia and Reptiles, p. 282.

Gastrocnemial ridge. See ★*ridge*.

gastrocœle (gas′trō-sēl), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *κοῖλος*, hollow.] In *embryol.*, the cavity of the archenteron in the gastrula; the primitive digestive cavity of the young embryo.

gastrocolostomy (gas″trō-ko-los′tō-mi), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *κόλον*, colon, + *στόμα*, mouth.] Establishment by operation of a communication between the colon and the stomach.

gastrodialysis (gas″trō-dī-al′i-sis), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *διάλυσις*, separation.] Sloughing of the mucous membrane of the stomach.

gastrodiaphane (gas-trō-dī′a-fān), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *διαφανής*, transparent: see *diaphanous*.] An instrument carrying an electric light, used in ★gastrodiaphany (which see).

gastrodiaphany (gas″trō-dī-af′a-ni), *n.* [As *gastrodiaphane* + *-y*³.] Examination of the stomach by means of transillumination. A tube to which an electric light is attached (called a gastrodiaphane) is passed into the stomach, and the abdominal wall is then inspected in a dark room. *Nature*, Aug. 4, 1904, p. 316.

gastrodidymus (gas-trō-did′i-mus), *n.*; pl. *gastrodidymi* (-mī). [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *δίδυμος*, twin.] In *teratol.*, a double monster joined in the abdominal region.

gastrodisc (gas′trō-disk), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *δίσκος*, a disk.] The endoderm of the vertebrate embryo in the discogastrula stage, that is, when both the ectoderm and the underlying endoderm are spread out on the yolk in the form of a disk.

gastroduodenostomy (gas″trō-dū″ō-dē-nos′tō-mi), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + NL. *duodenum* + Gr. *στόμα*, mouth.] Establishment by operation of a communication between the stomach and the duodenum elsewhere than at the pylorus. *Lancet*, Aug. 29, 1903, p. 591.

gastro-enteralgia (gas″trō-en-te-ral′ji-ą), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *ἔντερον*, intestine, + *ἄλγος*, pain.] Pain in both stomach and intestines.

gastro-enterocolitis (gas″trō-en″te-rō-kō-lī′tis), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *ἔντερον*, intestine, + *κόλον*, colon, + *-itis*.] Inflammation of both large and small intestines and of the stomach.

gastro-enterostomy (gas″trō-en-te-ros′tō-mi), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *ἔντερον*, intestine, + *στόμα*, mouth.] The establishment of a communication between the stomach and some portion of the intestine which is more or less distant from the pylorus.

Eight cases were operated on for hemorrhage; in one an ulcer was excised and the patient died on the eighth day; in one an ulcer on the posterior surface was excised and a *gastroenterostomy* performed, the patient recovering; in six *gastroenterostomy* alone was performed and all recovered. *Med. Record*, Feb. 28, 1903, p. 343.

Gastro-epiploic arteries, two arteries in the wall of the stomach, the right a branch of the hepatic artery, the left a branch of the splenic: their terminal branches anastomose.— **Gastro-epiploic glands.** See ★*gland*.

gastrogastrostomy (gas″trō-gas-tros′tō-mi), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *γαστήρ* (*γαστρ-*), stomach, + *στόμα*, mouth.] Same as ★*gastro-anastomosis*.

gastrogenital (gas-trō-jen′i-tal), *a.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + NL. *genitalis*, genital.] Having the reproductive organs on the radial canals, as in the *Leptomedusæ*. *Proc. Zool. Soc. London*, 1903, II. 173.

gastrograph (gas′trō-graf), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *γράφειν*, write.] A device for recording the movements of the stomach during digestion.

gastrohepatitis (gas″trō-hep-a-tī′tis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *ἧπαρ* (*ἥπατ-*), liver, + *-itis*.] Simultaneous inflammation of both stomach and liver.

gastrohyperneuria (gas″trō-hī-pėr-nū′ri-ą), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *ὑπέρ*, over, + *νεῦρον*, nerve.] Increased activity of the stomach due to disorder of the nerve-supply.

gastrohyponeuria (gas″trō-hī-pō-nū′ri-ą), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *ὑπό*, under, + *νεῦρον*, nerve.] Diminished activity of the stomach due to disorder of the nerve-supply.

gastrohysteropexy (gas″trō-his-tę-rop′ek-si), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *ὑστέρα*, uterus, + *πῆξις*, fastening.] Operative fixation of the fundus of the uterus to the anterior abdominal wall, in order to correct a displacement of that organ.

gastro-ileal (gas″trō-il′ē-al), *a.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + NL. *ileum* + *-al*.] Of or pertaining to both the stomach and the ileum. **Gastro-ileal folds.** See ★*fold*¹.

gastrojejunostomy (gas″trō-jē-jū-nos′tō-mi), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + NL. *jejunum* + Gr. *στόμα*, mouth.] Establishment of communication between the stomach and some portion of the jejunum.

The stomach was enormously dilated and contained a large quantity of fluid. Anterior *gastrojejunostomy* was the operation selected. *Lancet*, Aug. 29, 1903, p. 591.

Gastrolepidotidæ (gas″trō-lep-i-dot′i-dē), *n. pl.* [NL., < **Gastrolepidotus*, < Gr. *γαστήρ*, belly, + *λεπιδωτός*, scaled, scaly: see ★*Lepidotus*.] A family of stegocephalian amphibians having fully ossified vertebræ and basioccipitals, a ventral armor of elongated bony scutes, and teeth with infolded layers of dentin. The genera (*Anthracosaurus*, *Loxomma*, etc.) are of Carboniferous and Permian age.

gastrolienal (gas″trō-lī-ē′nal), *a.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + L. *lien*, spleen, + *-al*¹.] Same as *gastrosplenic*.

gastrolithiasis (gas″trō-li-thī′a-sis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *λίθος*, stone, + *-iasis*.] The formation of gastroliths and the morbid symptoms occasioned by their presence.

gastrolobin (gas-trō-lō′bin), *n.* [*Gastrolobium* + *-in*².] A dark-colored glucoside contained in the leaves and young shoots of *Gastrolobium bilobum*.

gastrologer (gas-trol′ō-jėr), *n.* [*gastrolog-y* + *-er*².] One who is versed in gastrology.

gastrological (gas-trō-loj′i-kal), *a.* Of or pertaining to the stomach or to the proper supply of its demands or needs.

gastrologist (gas-trol′ō-jist), *n.* [*gastrolog-y* + *-ist*.] 1. One who is versed in gastrology, or skilled in catering to the demands of the stomach.—2. A physician who devotes special attention to the diagnosis and treatment of diseases of the stomach.

gastrology, *n.* 2. The art of cookery or of catering to the demands of the stomach.—3. The scientific study of diseases of the stomach and of their treatment.

gastrolysis (gas-trol′i-sis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *λύσις*, loosening.] The act or process of freeing the stomach from abnormal adhesions to adjacent parts.

gastromelus (gas-trom′e-lus), *n.*; pl. *gastromeli* (*-lī*). [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *μέλος*, limb.] In *teratol.*, a monster which has one or several supernumerary limbs growing from the anterior abdominal wall; a form of epigastrius.

gastromenia (gas-trō-mē′ni-ą), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *μῆνες*, menses.] Vicarious menstruation from the mucous membrane of the stomach.

gastrometrotomy (gas″trō-mē-trot′ō-mi), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *μήτρα*, womb, + *τομή*, section.] Same as *Cæsarean section*.

Gastromycetes (gas″trō-mī-sē′tēz), *n. pl.* An incorrect form of *Gasteromycetes*.

gastromycosis (gas″trō-mī-kō′sis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *μύκης*, fungus, + *-osis*.] Same as *mycotic* ★*gastritis*.

gastronomous (gas-tron′ō-mus), *a.* Devoted to gastronomy. *N. E. D.*

gastro-œsophageal, *a.* See *gastro-esophageal*.

gastropancreatic (gas″trō-pan-krē-at′ik), *a.* Relating to both the stomach and the pancreas.— **Gastropancreatic ligament,** a fold of peritoneum which extends from the pancreas to the pyloric extremity of the stomach.

gastroperiodynia (gas″trō-per″i-ō-din′i-ą), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *περιοδος*, period, + *ὀδύνη*, pain.] Intermittent paroxysmal pain at the pit of the stomach.

gastropexy (gas′trō-pek-si), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *πῆξις*, fastening.] Operative fixation of the stomach to the abdominal wall.

gastrophile (gas′trō-fil), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *φίλος*, loving.] One who loves good eating and plenty of it.

gastrophilism (gas-trof′i-lizm), *n.* [*gastrophile* + *-ism*.] The love of good eating.

gastrophilist (gas-trof′i-list), *n.* [*gastrophile* + *-ist*.] Same as ★*gastrophile*.

gastrophilite (gas-trof′i-līt), *a.* [*gastrophile* + *-ite*².] Fond of gratifying the demands of the stomach.

Gastrophrenic ligament, a fold of peritoneum which extends from the cardiac extremity of the stomach to the diaphragm.

gastrophthisis (gas-trof′thi-sis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *φθίσις*, wasting: see *phthisis*.] A cachectic state with emaciation consequent upon disease of the stomach.

gastroplasty (gas′trō-plas-ti), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *πλαστός*, formed, + *-y*³.] In *surg.*, an operation designed to restore the normal shape of a dilated or hour-glass stomach or to supply some defect in that organ.

gastroplegia (gas-trō-plē′ji-ą), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *πληγή*, stroke.] Paralysis of the walls of the stomach.

gastroplication (gas″trō-plī-kā′shọn), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + E. *plication*.] In *surg.*, an operation for reducing the capacity of a dilated or sagging stomach by plaiting the wall and retaining the plaits by sutures. *Lancet*, July 18, 1903, p. 149.

gastropodous, *a.* See *gasteropodous*.

gastropore, *n.* 2. In the cœnosteum of the hydrocorallines like *Millepora*, one of the larger, sometimes tabulated tubes of the skeleton which lodge the nutritive polyps.

Gastropsetta (gas-trop-set′ą), *n.* [NL., < Gr. *γαστήρ*, belly, + *ψῆττα*, a flounder.] A genus of deep-sea flounders found in the Gulf Stream.

gastroptosis (gas-trop-tō′sis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *πτῶσις*, falling.] Downward displacement of the stomach.

gastroschisis (gas-tros′ki-sis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *σχίσις*, fissure.] Congenital fissure of the abdominal wall.

gastroscope (gas′trō-skōp), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *σκοπεῖν*, view.] A hollow tube provided with reflecting mirrors and an electric light, which is passed through the esophagus into the stomach in order to enable the operator to inspect the interior of that organ.

gastroscopy, *n.* 2. Inspection of the mucous membrane of the stomach by means of a gastroscope.

gastrosis (gas-trō′sis), *n.* [NL., < Gr. *γαστήρ*, stomach, + *-osis*.] Any disease of the stomach.

gastrosoph (gas′trō-sof), *n.* [Gr. *γαστήρ*, stomach, + *σοφός*, wise.] An epicure; a gourmet.

gastrosophy (gas-tros′ō-fi), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *σοφία*, wisdom.] The science of good eating.

Coffee-house, what magnificent associations of ideas do you not create! By you for generations has rolled the never-ceasing flow of wealth. . . . Yet, with the insouciance of a sublime philosophy, your cooks and waiters have never turned away from their works of *gastrosophy* to think of the neighbouring millions.
Blackwood's Mag., XV. 642.

gastrostenosis (gas″trō-stē-nō′sis), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *στένωσις*, narrowing.] Contraction of the stomach.

gastrosuccorrhœa (gas″trō-suk-o-rē′ä), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + L. *succus*, juice, + Gr. *ῥοία*, flowing.] Abnormally abundant secretion of gastric juice.

gastrotheca, *n.* [NL.] See *gasterotheca.*

gastrothoracic (gas″trō-thō-ras′ik), *a.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *θώραξ*, thorax.] Relating to the thorax and the stomach or abdomen.

gastrotoxin (gas-trō-tok′sin), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + E. *toxin.*] A cytotoxin produced by immunization with cells from the mucous membrane of the stomach.

gastrotrichan (gas-trot′ri-kan), *a.* and *n.* [*Gastrotricha* + *-an.*] **I.** *a.* Of or pertaining to the *Gastrotricha.*

II. *n.* A member of the *Gastrotricha.*

gastrotrocha (gas-trot′rō-kä), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *τροχός*, a wheel, circle.] The larva of a polychætous annelid having two rings of cilia, with incomplete rings on the ventral surface.

gastrotrochal (gas-trot′rō-kal), *a.* [*gastrotrocha* + *-al*[1].] Of or pertaining to a gastrotrocha.

gastrotympanites (gas″trō-tim-pa-nī′tēz), *n.* [NL., < Gr. *γαστήρ* (*γαστρ-*), stomach, + *τυμπανίτης*, tympanites.] Gaseous distention of the stomach.

gastrozoöid (gas-trō-zō′oid), *n.* [Gr. *γαστήρ* (*γαστρ-*), stomach, + *ζῷον*, animal, + *-oid.*] A nutritive member of a colony of *Hydrozoa*, which is provided with a mouth and stomach-sac: typically present in the sea-ginger, *Millepora alcicornis*, and correlated with *dactylozoöid.* See ★*gonodendron*, with cut.

gastrulate (gas′trǫ-lāt), *v. i.*; pret. and pp. *gastrulated*, ppr. *gastrulating.* [*gastrula* + *-ate*[2].] To undergo gastrulation; become a gastrula.

gastrulated (gas′trǫ-lā-ted), *p. a.* [*gastrulate* + *-ed*[2].] Having assumed the gastrula stage, especially when the gastrula is formed by invagination or embole.

gas-tube (gas′tūb), *n.* An instrument for the analysis of gases, particularly illuminating-gas. It has a bulb which contains from 50 to 90 per cent. of the volume of the gas, and the volume of any portion absorbed by the use of a solvent is indicated on the graduated portion.

gas-turbine (gas′tėr″bin), *n.* See ★*turbine.*

gasu-basu (gä′sö-bä′sö), *n.* [E. Indian.] An East Indian plant which possesses local anesthetic properties.

gas-valve (gas′valv), *n.* Any valve for shutting-off or regulating the flow of gas.

gas-volumeter (gas′vol″ū-mē-tėr), *n.* Same as *volumeter.* *G. Lunge*, Sulphuric Acid, I. 185.

gas-worker (gas′ wėr″kėr), *n.* One who is employed in any capacity in the manufacture of gas.

gat[3] (gat), *n.* [A dial. variant of *gate*[1]; cf. E. Fries. and D. *gat*, a hole.] **1.** An opening or passage in a sand-bank; a way from the cliffs to the sea. [Prov. Eng.] *Eng. Dial. Dict.*—**2.** *Naut.*, a channel among shoals.

gata (gä′tä), *n.* [Sp. prop. fem. of *gato*, cat: see *cat.*] A large spotted shark, *Ginglymostoma cirratum* of the West Indies.

gate[1], *n.*—**Bear-trap gate**, a mechanical device for controlling the flow of water, its general outline being similar to the bear-trap of the pioneer hunters and trappers. —**By-pass gate**, a gate or valve placed in an auxiliary by-pass pipe extending around some feature in the main pipe-line, as around a meter or valve.—**Flashing-board gate**, a device by which flashing-boards are held or controlled.

gate[1], *v. t.* **3.** To place (a warp) in a loom ready for weaving.—**4.** To put (a machine, as a loom) in order to do its work properly.

gateado (gä-tä-ä′dō), *n.* [S. Amer. Sp., appar. < Sp. *gateado*, resembling a cat, cat-like, < *gato*, cat.] A tree of the sumac family, *Astronium graveolens*, native to Colombia and Venezuela. It abounds in a glutinous sap which has a nauseating terebinthine odor. Gateado yields a hard, durable, dark-colored cabinet-wood and a bark rich in tannin. Also called *tibigaro.*

gâteau (gä-tō′), *n.* [F., a cake: see *wastel.*] A cake.—**Gâteau St. Honoré** or **de Princesse Louise**, a form of puff-paste or sponge-cake filled with Bavarian cream.

gate-box (gāt′boks), *n.* In steam- and water-fittings, a tubular casting, usually larger at the lower end, designed to fit over a buried water-pipe for convenience in reaching a gate or valve in the pipe by means of a long key; a valve-box.

gate-catch (gāt′kach), *n.* A four-pointed metal protuberance on the handle of a riding-crop, used for opening hunting-gates.

gate-faucet (gāt′fâ″set), *n.* A faucet having a gate or valve for stopping the flow of the liquid.

gate-keeper, *n.* **2.** An English collectors' name for an Old World agapetid butterfly, *Satyrus megæra*, a species which occurs throughout Europe and western Asia. Also called the *wall-brown.*

gate-motion (gāt′mō″shon), *n.* A mechanism by which skeins of yarn are easily removed from the swift or fly of a reeling-machine.

gate-night (gāt′nīt), *n.* The night before Hallowe'en, when gates, and other things, are carried off in sport by children. *Dialect Notes*, II. vi. [Local, U. S.]

gate-net (gāt′net), *n.* A poacher's net set in a gateway, for catching hares or rabbits.

gate-nut (gāt′nut), *n.* The nut on the gate or slider of a gate-valve.

gate-penny (gāt′pen″i), *n.* A tribute paid by customary tenants for leave to pass through one or more of their lord's gates.

gate-tender (gāt′ten″dėr), *n.* A gateman.

gate-wheel (gāt′hwēl), *n.* **1.** A wheel in a railroad signal-tower or signal-cabin by which the gates protecting a highway or street which cross over the railroad are operated. *Jour. Brit. Inst. Elect. Engin.*, 1902–03, p. 620.—**2.** A wheel either directly attached to, or geared to, the spindle of a large gate-valve, or to a hydraulic gate, by which the valve or the gate may be opened and closed.

gatha (gä′tä), *n.* [Avestan *gāthа* = Skt. *gāthā*, hymn, verse, meter.] One of five metrical sections of the Avesta.

gather, *v. i.* **4.** In *mech.*, to fit into; fit together: used in speaking of the teeth of gears.—**5.** *Naut.*, to overtake another vessel: a vessel is said to *gather on* another when it is overtaking it.

gather-dam (gaᴛʜ′ėr-dam), *n.* A dam erected for the purpose of collecting water; an impounding reservoir.

gathered (gaᴛʜ′ėrd), *p. a.* Suppurating; marked by the formation of pus.

gatherer, *n.* **7.** One of the median, permanent incisors of a horse used to gather or nip off grass in feeding. The four median milk-incisors, two above and two below, are shed by a colt at the age of two or two and one half years and replaced by the permanent incisors. Also called *nipper.*

gathering, *n.* **6.** In *agri.*, plowing back and forth around the crown of an existing ridge of land, thus turning all the furrow-slices inward and increasing the height of the ridge. [Great Britain.]

gathering-cry (gaᴛʜ′ėr-ing-krī), *n.* A slogan; a summons to war.

gathering-hair (gaᴛʜ′ėr-ing-hâr), *n.* One of the soft, flattened, hooked hairs on the tongue of a bee or wasp. *A. S. Packard*, Text-book of Entom., p. 45.

gathering-lime (gaᴛʜ′ėr-ing-līm), *n.* In *tanning*, lime-liquor which is used repeatedly, new lime being added for each lot of skins. *Modern Amer. Tanning*, p. 42.

gathering-machine (gaᴛʜ′ėr-ing-ma-shēn″), *n.* In *bookbinding*, a device for bringing together the signatures which make up a book. It is divided into compartments from which the signatures are taken by means of automatic fingers.

gathering-table (gaᴛʜ′ėr-ing-tā″bl), *n.* In *bookbinding*, a circular revolving gathering-board (which see).

gating (gā′ting), *n.* The college punishment of confining a student within the college gates. See *gate*[1], *v.*, 2. [Eng.]

gato (gä′tō), *n.* [Sp., a cat: see *cat.*] A small shark, *Mustelus lunulatus*, of the family *Galeidæ:* west coast of Mexico.—**Gato bonaci**, *Mycteroperca tigris*, a West Indian fish.

gatter (gat′ėr), *n.* [Origin obscure.] Beer, ale, or other drink. [Slang, Eng.]

gauchissement (gō-shēs-moṅ′), *n.* [F., < *gauche*, not straight.] In *aëronautics*, see the extract.

This can be done by *gauchissement* or lowering the trailing edge of the depressed wing, increasing its lift, and simultaneously raising the trailing edge of the other wing, thus decreasing the angle of incidence of the latter, and reducing its lifting effect.

R. W. A. Brewer, The Art of Aviation, p. 205.

Gaudarian (gow-dā′ri-an), *a.* and *n.* [Skt. *Gauḍa*, a district of central Bengal, + *-arian.*] In *geol.*, a division of the Triassic rocks in southern Asia. It constitutes the upper member of the Brahmanian or lowest stage of the Triassic.

Gaudete (gâ-dē′tē), *n.* The third Sunday in Advent: so named from the first word of the introit of the mass of that day, *Gaudete*, "Rejoice ye."

gaultherase (gâl′the-rās), *n.* [*gaulther(in)* + *-ase.*] A glucosidolytic ferment found in wintergreen. It causes the formation of oil of wintergreen from gaultherin.

gaultherilene (gâl-thē′ri-lēn), *n.* [*gaulther(in)* + *-il* + *-ene.*] A trade-name for a colorless crystalline hydrocarbon contained in oil of wintergreen. It melts at 65.5° C., and may be identical with triacontane, $C_{30}H_{62}$.

gaultherin (gâl′the-rin), *n.* [*Gaultheria* + *-in*[2].] A crystalline glucoside, $C_{14}H_{18}O_8.H_2O$, contained in the bark of *Betula lenta.* It is levorotatory and decomposes at about 120° C.

gauntree, *n.* **3.** A form of traveling crane in which two horizontal girders carry the hoisting-crab which is free to travel along them. The girders are supported at their ends by a braced vertical frame which is borne on wheels at its feet, the wheels running upon a proper track. The traverse of the gauntree as a whole along the rails, and the traverse of the crab at right angles thereto, enable it to command any point in a long rectangular area. See *gauntree* ★*crane.*

Gaurian (gou′ri-an), *a.* [Hind. *Gaur*, Beng. *Gaud*, E. *Gaur* or *Gour*, a former city and district of Bengal, < Skt. *Gauḍa*, a district of central Bengal, said to mean 'Sugar-land,' < *gauṛa*, of sugar.] Of or pertaining to Gaur, a former city and district of Bengal; hence, of Bengal and its language. Used only in an extended sense to designate the Bengali, Oriya (Uriya), Hindi, Panjabi, Sindhi, Marathi, and Gujarati languages of India, derived from or cognate with the ancient Sanskrit, to which they bear a relation analogous to that which the Romance languages bear to Latin.

The above examples from English and Assamese show that reversions may take place from inflection to agglutination, which in fact is a general tendency amongst the *Gaurian* (Neo-Sanskritic) tongues of India, and also to a less extent in Italian and other Neo-Latin tongues.

Keane, Ethnology, p. 210.

gaussage (gous′āj), *n.* The numerical value of magnetic flux density or induction expressed in gausses.

gaussivity (gou-siv′i-ti), *n.* The intensity of magnetizing force expressed in gilberts per square centimeter or in gausses.

So μ is the inductivity, and H [= intensity of magnetizing force] the *gaussivity*, C being the line integral of H. *Encyc. Brit.*, XXXIII. 214.

Gauss's equation, integral. See ★*equation*, ★*integral.*

gauteite (gâ′tē-īt), *n.* [*Gauté*, Bohemia, + *-ite*[2].] In *petrog.*, a fine-grained to aphanitic rock composed of orthoclase and lime-soda feldspars in about equal portions and subordinate amounts of ferromagnesian constituents. It is intermediate in composition between trachyte and andesite: similar to andesite-trachyte, trachydolerite, etc. *Hibsch*, 1897.

gauz, *n.* and *a.* A simplified spelling of *gauze.*

gauze. I. *n.* **3.** In *surg.*, cheese-cloth, impregnated with antiseptic material (such as boric acid, corrosive sublimate, or iodoform), or simply sterilized, employed in dressing wounds.

Cheese cloth is almost universally used at the present for a wound dressing and is known to the profession as *gauze.* *Buck*, Med. Handbook, I. 568.

Antiseptic gauze. Same as ★*gauze*, 3.—**Millers' gauze**, bolting-cloth.

II. *a.*—**Gauze silk.** See ★*silk.*

gauze-weaving (gâz′wē″ving), *n.* A form of weaving in which the warp-threads alone intersect and are bound in position by the weft-threads. Sometimes called *leno-weaving.*

gauze-wing (gâz′wing), *n.* Any insect of the old order *Neuroptera* (which see).

gave[2] (gā′vā), *n.* See ★*gabi.*

gavel[1] (gav′el), *v. t.*; pret. and pp. *gaveled*, *gavelled*, ppr. *gaveling*, *gavelling.* To partition and distribute (or redistribute) equally (the lands of one deceased) according to the practice of gavelkind. See *gavel*[1], *n.*, and *gavelkind.*

gavialoid (gā-vi-al′oid), *a.* [*gavial* + *-oid.*] Resembling or having the character of a gavial: as, a greatly elongated *gavialoid* rostrum.

gawpy (gâ′pi), *n.* [*gawp* + *-y.*] One who idly stares in silly, open-mouthed wonder; a gaping, staring simpleton.

"They are a terrible set of fellows," he [Carlyle] said, "those open-mouthed wondering *gawpies*, who lodge you for the sake of looking at you: that is horrible."

Carlyle, in Froude, Life of Carlyle, I. 261.

gayatrī (gä″ya-trē′), *n.* [Skt. *gāyatrī'*, a meter (esp. that one specified).] A certain verse of

the Rig-Veda (III. lxii. 10) which every Brahman is supposed to repeat mentally in his morning and evening devotions: it is regarded as very sacred. The verse is, in short, 'Let us consider the light of the sun.'

gaye (gä'yā), *n.* [Also *gayé, gadyé, gayí;* native name.] A name applied in Guam to certain seabeans, especially to *Stizolobium giganteum*, a woody climber with slender glabrous branches, trifoliate leaves, and pale-greenish flowers. The hard brown orbicular seeds are sometimes called *oxeye beans* or, in Spanish, *ojo-de-venado* (buckeye).

Gay-Lussac tower. See ★*tower*[1].

gayong (gä-yong' or gä'yong), *n.* [Bisaya *gayóng*, Tagalog *gáyong*, an oar: cf. Ilocan *gayáng*, a lance.] In the Philippine Islands, an oar used in the native boats.

gay-wings (gā'wingz), *n.* The fringed milkwort, *Polygala paucifolia:* so called from the pair of large, usually pink-purple petals of the aërial flowers.

gaze, *n.*—**At gaze.** (*c*) By sight: said of a dog in hunting.

gazebo, *n.* **2.** Any structure or part of a building which affords or commands an extensive prospect or outlook, as a turret or lantern on the roof of a house, a balcony, a projecting window, or the like.

gazel[1], *n.*—**Grant's gazel,** *Gazella granti*, a species common in East Africa, with longer and finer horns than any other member of the genus. It is replaced in Masailand by Thomson's gazelle.—**Soemmering's gazelle,** *G. soemmeringii*, of Somaliland. It is characterized by long ears and massive horns.—**Speke's gazelle,** *G. spekei*, a small, long-haired species, with the skin of the nose very flabby.—**Waller's gazelle.** See ★*gerenuk*.

gazet, *n.* and *v. t.* A simplified spelling of *gazette*.

gazetteer (gaz-e-tēr'), *v. t.* [*gazetteer, n.*] To describe in gazetteers: as, to *gazetteer* a country, city, or locality. *Chambers's Encyc.*

gazzettino (gäd-ze-tē'nō), *n.* [It., dim. of *gazzetta*, a small coin: see *gazette*.] A small Venetian coin struck under the Doge Leonardo Loredano (1501–21).

G. B. An abbreviation of *Great Britain*.

G. B. and I. An abbreviation of *Great Britain and Ireland*.

G. C. An abbreviation (*a*) of *Grand Chancellor;* (*b*) of *Grand Chapter;* (*c*) of *Grand Conductor*.

g. c. f. An abbreviation of *greatest common factor*.

G. C. H. An abbreviation (*a*) of *Grand Cross of the Hanoverian Guelphic Order* or *Grand Cross of Hanover;* (*b*) of *Knight of the Grand Cross of Hanover*.

G. C. I. E. An abbreviation (*a*) of *Grand Cross of the Indian Empire;* (*b*) of *Knight Grand Commander of the Indian Empire*.

G. C. L. H. An abbreviation of *Grand Cross of the Legion of Honor*.

g. c. m. An abbreviation of *greatest common measure*.

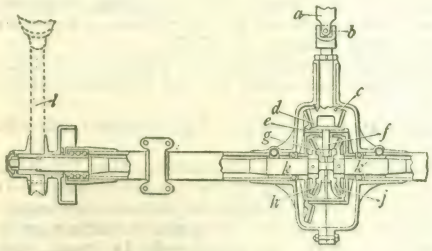
g. cm[2]. An abbreviation of *gram-centimeter square:* the c. g. s. unit of moment of inertia.

G. C. M. G. An abbreviation (*a*) of *Grand Cross of St. Michael and St. George;* (*b*) of *Knight of the Grand Cross of St. Michael and St. George*.

G. C. S. I. An abbreviation (*a*) of *Grand Commander of the Star of India;* (*b*) of *Knight Grand Commander of the Star of India*.

G. C. V. O. An abbreviation of *Grand Cross of Royal Victorian Order*.

G. C. Z. or **C. Z.** In *astron.*, abbreviations of *Gould's Cordova Zones*, a series of star-catalogues: sometimes referred to as Z. C. (*Zonæ Cordobenses*).



Gd. In *chem.*, a symbol for *gadolinium*.

G. D. An abbreviation (*a*) of *Grand Duchess;* (*b*) *Grand Duke;* (*c*) of *gravimetric density*.

G. E. An abbreviation of *Grand Encampment*.

geanticline (jē-an'ti-klīn), *n.* [Gr. *γῆ*, earth, + E. *anticline*.] In *geol.*, an anticlinal or arching fold which involves a great thickness of strata and affects a large area; a broad dome formed by the warping of the earth's crust. *Chamberlin and Salisbury*, Geol., I. 481.

gear, *n.* **5.** The diameter of an imaginary wheel whose circumference is equal to the distance traversed by a safety-bicycle during a single revolution of the pedals: as, a 72-inch *gear*. [Colloq.]—**Anchor-tripping gear.** Same as *anchor-tripper*.—**Change-speed gear.** See ★*change-speed*.—**Compensating-gear,** a combination of spur- or bevel-gears or both used on motor-vehicles, by which the inequality in length of the paths traversed by the driving-wheels on curves is compensated for, without the slipping of the tires on the ground. One gear, either spur or bevel, is on that part of the axle to which one of the wheels is attached, and another on the other half, the axle being discontinuous: if the two wheels were fastened to a continuous axle slipping would occur. Between these two gears, and meshing with both, is a third gear. The driving force is applied, through the teeth of this third gear, equally on both sides of its axis in straight running, and both wheels move through equal paths. If one wheel seeks to go through a longer or shorter

Compensating-gear.

a, shaft-drive from motor in front of vehicle; *b*, universal joint to give flexibility of alinement; *c*, driving bevel-gear on motor-shaft extension; *d*, bevel-gear driven by *c*; *e*, hollow casing bolted to *d*, turning with it and carrying stud *f*; *f*, stud forming axis for compensating-pinion *g*; *g*, compensating-pinion carried around bodily by *f*, as *e* revolves with *d*, and driving *h* and *j* without rolling on either when the driving-wheels run over equal distances in one revolution; *h*, *j*, compensating bevel-gears, turning solidly locked with *g*, except when rolling must occur because the axle-end on one side must move forward more or less than the circumference of either wheel in one revolution, by reason of the rolling of the wheels round a curve; *k*, *k'*, axle of driving-wheels, not continuous, but forming two halves meeting between *h* and *j*; *i*, one of the driving-wheels fast on the half-axle *k*; the other wheel is similarly fast on *k'*.

path than the other, the inequality is taken up by a rolling of the third gear upon the toothed surfaces of the other two, and compensated for. If either wheel is of less diameter than the other by reason of wear or the deflation of the pneumatic tire, the compensating effect is continuous, while the propelling effect is equal on each wheel.—**Full gear,** such an arrangement of the valve-gear mechanism as will give the longest period for the admission of steam.—**Half-speed gear,** such an arrangement of the controlling mechanism or of the driving mechanism as will permit a machine to run at about half its full speed.—**Herring-bone gear.** See *spiral* ★*gear* (*b*).—**Joy's gear,** an engine valve-gear for cut-off and reversing in which no eccentric (or only one) is used. The motion for operating the valve is derived from a link, one end of which is attached to the connecting-rod. This link moves a secondary or intermediate link carrying, at one end, a block to which is attached the valve-rod and which slides up and down a slot. This slot is hung on a pin and, by turning it about that pin, the motion of the valve-rod can be varied to give different cut-offs and to make the engine run in either direction. The principal use of this gear has been on marine engines, a few pumping-engines, and fewer locomotives.—**Sliding gear,** a gear which is free to slide axially along a shaft and can hence be engaged or disengaged at will. Such gears, arranged in pairs, are frequently used for changing the speed of automobiles.—**Spiral gear.** (*a*) A toothed wheel in which the axis of each tooth is not a straight line, either parallel to the axis of the wheel, as in spur-gearing, or inclined to and intersecting the axis, as in bevel-gear, but is a helical line, inclined to the axis and not intersecting it. The surfaces of the teeth are made up of helical elements (incorrectly called spirals). Such spiral gears in pairs run very smoothly and quietly, since any one tooth is in contact with its fellow on the other wheel for a considerable angle before passing the line joining the axes, and also after passing it. The two shafts may make any angle with each other up to a right angle. (*b*) A toothed wheel in which the axial lines of any one tooth are made up of two helical lines of equal pitch, one right-handed and one left-handed, which meet at the center of the face or breadth of the toothed surface. Such gears are called *herring-bone gears*, from the V-shape which each tooth receives. In this latter form they can only be used when the shafts are parallel.—**Throw-out gear,** a device for disengaging one piece of mechanism from another; a disengaging gear; specifically, the combination of levers and rods by which, in some forms of marine engine with a single eccentric, the motion of the valve from that eccentric can be reversed and the engine run backward.—**Train of gears,** a set of gear-wheels having at least three gears. See *train of* ★*gearing*.—**Trip-valve gear.** See ★*valve-gear*.—**Variable-speed gear,** a gear in which the ratio of the number of turns can be varied within a wide range of speeds.

gear-block (gēr'blok), *n.* A block or pulley used in rigging the running-gear of a vessel.

gear-case (gēr'kās), *n.* A cover or casing placed around gears to keep out dirt and grit, and also to protect the workmen from being caught by the gears and injured.

gearing, *n.*—**Humpage gearing,** a compound bevel-gear drive for effecting a change of angular velocity or of speed of rotation.—**Train of gearing,** a transmission mechanism of toothed wheels in which each wheel is related to that which precedes it and follows it, as a follower and a driver respectively. If the gears are in the same plane, it is a *simple train;* if the driven wheels are not drivers, but are on the shaft of a second wheel which is the driver of the next shaft in the train, it is a *compound train*. Trains of gearing may be used to increase power and reduce speeds, as in cranes, crabs, winches, and motor-cars; or they may increase speed and reduce power, as in clocks and watches. Reversing motions or disengagement devices may be introduced into trains. A transmission from a factory engine to the individual tools is a train of mechanism, but, as gears are seldom used, it is not properly a train of gearing.

gear-plate (gēr'plāt), *n.* In engines, a wrist-plate; a motion-plate.

gear-pump (gēr'pump), *n.* A pump made by using a pair of gears surrounded by a case which just touches the tips of the teeth. The liquid is carried forward in the spaces between the teeth and outside casing. The pump works backward or forward equally well.

gear-train (gēr'trān), *n.* A set of three or more gears used for transmitting motion. See *train of* ★*gearing*.

gear-work (gēr'wėrk), *n.* A gear-train; a set of gears for transmitting power.

gedda (ged'ä), *n.* A term applied to certain gums. See ★*geddic*.

geddic (ged'ik), *a.* [*gedda* + *-ic*.] Derived from the gedda gums.—**Geddic acid,** an acid derived from Arabian gedda gums, which consist of a mixture of the calcium, magnesium, and potassium salts of this acid.

Gedinnian (je-din'i-an), *a.* [F. *Gedinne*, a district in Belgium.] In *geol.*, a subdivision of the Devonian system in Belgium, northern France, and the Rhineland. It forms the base of the Devonian system and lies uncomformably upon Cambrian rocks. In the Eifel it includes the Taunus and Hundsrück beds with a conglomerate at the bottom.

geebung (jē'bung), *n.* [Also *geebong, gibong, jibbong;* native Australian name.] The fruit of several Australian proteaceous trees of the genus *Linkia*, particularly *L. falcata;* also, the trees themselves. It is tasteless, and seldom eaten by any but children.

gee-throw (jē'thrō), *n.* In *lumbering*, a heavy wooden lever with a curved iron point, used to break out logging-sleds.

gegenschein (gā'gen-shīn), *n.* [G., < *gegen*, opposite, + *schein*, shining.] The large, faintly luminous patch on the ecliptic opposite to the sun, supposed to be a part of the zodiacal light. Its explanation is still uncertain, though it is generally believed to be due to reflection from minute meteoric particles at a distance greater than the length of the earth's shadow. See ★*counter-glow*.

gegg (geg), *n.* The Scotch pronunciation of *gag*, *n.*, 6.

gehydrophilous (jē-hī-drof'i-lus), *a.* Resembling or having the characters of the *Gehydrophila*.

geic (gē'ik), *a.* [Gr. *γῆ*, the earth, + *-ic*.] Pertaining to the earth.—**Geic acid.** Same as *humic acid*.

geikielite (gē'kē-līt), *n.* [Named for Sir Archibald *Geikie*, a Scottish geologist.] Magnesium titanate ($MgTiO_3$), found in the form of nearly black rolled pebbles in the gem-mines of Rakwana, Ceylon.

geira (gā'rä), *n.* [Pg.] A Portuguese and Brazilian land-measure, equal to 1.44 acres.

geisha (gā'shä), *n.* [Jap. *gei-sha*, < *gei*, polite accomplishments (< Chin., *i*, (orig. *ki*, an art, a profession) + *sha* (< Chin. *chê*), one who.] One of a class of accomplished and specially trained young Japanese women (commonly called singing- or dancing-girls by foreigners) who are employed at banquets, and on social, convivial, and other occasions, to entertain the company with Japanese dancing, music, etc.

geison (gī'son), *n.*; pl. *geisa* (-sä). [Gr. *γείσον*, often *γείσσον*.] The Greek name for the cornice of a building: used in treatises on Greek architecture.

> A special peculiarity of the horizontal *geisa* lies in the fact that their mutules are of different size, varying between six and four guttae in front.
>
> *C. Smith*, in Jour. Hellenic Studies, XVI. 338.

geisotherm (jē-ī'sō-thėrm), *n.* [Gr. *γῆ*, the earth, + E. *isotherm*.] An imaginary surface supposed to pass through all points within the earth's crust which have the same temperature.

geisothermal (jē-ī-sō-thėr'mal), *a.* and *n.* [As *geisotherm* + *-al*[1].] **I.** *a.* Same as *isogeothermal*.

II. *n.* A geisothermal surface; a geisotherm.

Geissler's mercury air-pump, tubes, vacuum. See ★*air-pump, tube*, ★*vacuum*.

geissospermine (gī-sō-spėr'min), *n.* [*Geissospermum* + *-ine*[2].] A crystalline alkaloid, $C_{19}H_{24}O_2N_2 + H_2O$ or $C_{23}H_{28}O_4N_2$, contained in pereira bark. It is levorotatory, and melts or decomposes at 189° C.

geite (jē'īt), *n.* [Gr. *γῆ*, earth, + *-ite*[2].] A name proposed by John Milne for the matter which constitutes the nucleus of the earth. *Nature*, April 9, 1903, p. 539.

gel (jel), *n.* [Appar. detached from *hydrogel* and similar recent formations, where the second element is made to represent the crude stem of L. *gelare*, freeze, congeal: see *congeal*.] A gelatinous or albuminous protoplasmic substance, especially the protoplasm of nerve-cells.

If, however, the colloidal particles become fused, and thus lose their condition of fine suspension, the colloid becomes relatively solid, or passes into the "*gel*" phase.
Biol. Bulletin, June, 1904, p. 4.

gelasin (jel'a-sin), *n.* [*gel(atin)* + *-ase* + *-in*2.] A variety of agar-agar. *Buck*, Med. Handbook, I. 138.

gelatification (je-lat″i-fi-kā'shon), *n.* [**gelatify* (*-fic-*) (< *gelat(in)* + *-fy*) + *-ation*.] Conversion into gelatin; the process of transforming a substance into a jelly-like state.

gelatin, *n.*—**Chromatized gelatin.** See *chromatize.*—**Fluid gelatin,** aluminium oleate, a soft white putty-like substance of great tenacity, insoluble in water. It is used as a thickener for lubricating-oils.—**Formaldehyde gelatin,** a pale-brown coarse odorless powder obtained by treating a solution of gelatin with a small but definite amount of formalin and evaporating to dryness. It is said to liberate formaldehyde when applied to denuded surfaces. Also called *formacoll.*—**Gelatin emulsion.** See ★*emulsion.*—**Gelatin of Piorkowsky,** a nutrient medium suggested for the cultivation of the typhoid bacillus. It contains 5 grams of peptone and 33 grams of gelatin to the liter of normal urine of 1020 specific gravity.—**Gelatin paper, relief.** See ★*paper,* ★*relief.*—**Glycerin gelatin,** a culture medium for bacteria: nutrient gelatin with a certain amount of glycerin added.—**Nutrient gelatin,** a bacteriological culture medium composed of nutrient bouillon and an amount of gelatin sufficient to solidify the medium.—**Wort gelatin,** nutrient gelatin prepared with beer-wort.

gelatinase (je-lat'i-nās), *n.* [*gelatin* + *-ase.*] A ferment which liquefies gelatin but which does not digest coagulated egg-albumin or fibrin in either acid, neutral, or alkaline solutions. It occurs widely distributed among bacteria, yeasts, molds, and in various phanerogams. According to recent research trypsin is not a unity, and a gelatinase has been demonstrated as one of its possible components.

gelatiniferous (jel″a-tin-if'e-rus), *a.* [*gelatin* + L. *ferre,* bear, + *-ous.*] Producing or yielding gelatin.

gelatinize, *v. t.* 2. To coat with gelatin: as, *gelatinized* paper.

gelatinobromide, gelatinochlorid emulsion. See ★*emulsion.*

gelatinography (jel″a-ti-nog'ra-fi), *n.* [*gelatin* + Gr. *-γραφια,* < *γράφειν,* write.] In *photog.,* a rapid process for making newspaper blocks.

gelatinotype (jel-a-tin'ō-tīp), *n.* [*gelatin* + Gr. *τύπος,* type.] In *photog.,* a photomechanical process in which a gelatin film in semi-relief, properly backed, is used in printing instead of wood or metal.

gelation (jē-lā'shon), *n.* [L. *gelatio(n-),* freezing, < *gelare,* freeze.] The assumption of the solid state by cooling below common atmospheric temperature; freezing.

I do not doubt but that wonderful phenomena of congelation, regelation, degelation, and *gelation* pure without preposition, take place whenever a schoolboy makes a snowball; and that miraculously rapid changes in the structure and temperature of the particles accompany the experiment of producing a star with it on an old gentleman's back. *Ruskin*, Deucalion, I. 44.

gelatose (jel'a-tōs), *n.* [*gelat(in)* + *-ose.*] An albumose derived from gelatin. Also called *glutose* or *glutinose.*

gelechiid (jē-lē'ki-id), *n.* and *a.* **I.** *n.* One of the *Gelechiidæ.*

II. *a.* Of or belonging to the lepidopterous family *Gelechiidæ.*

gelignite (jel'ig-nīt), *n.* [*ge(latin)* + L. *lignum,* wood, + *-ite*2.] A trade-name for an explosive of the dynamite class, consisting of 65 parts of gelatin (96 per cent. nitroglycerin and 4 per cent. nitrocotton) and 35 parts of dope (75 per cent. sodium nitrate, 1 per cent. sodium carbonate, and 24 per cent. wood-pulp).

gelinotte (jel-i-not'), *n.* [F. *gelinotte,* dim. of *geline,* a hen, < L. *gallina,* a hen: see *gallinaceous.*] The hazel-hen, *Tetrastes bonasia,* a species of grouse common in the pine-forests and birch woods of the mountain districts of Europe and central and northern Asia.

gelogenic (jel-ō-jen'ik), *a.* [Irreg. < Gr. *γέλως,* laughter, + *-γενης,* -producing, + *-ic.*] Productive or provocative of laughter. *G. S. Hall,* Adolescence, II. 95.

gelong (ge-lông'), *n.* [Tibetan *gelóng.*] In Tibet, a monk.

gelsemic (jel-sem'ik), *a.* [*gelsem(ium)* + *-ic.*] Derived from yellow jasmine.—**Gelsemic acid,** a colorless crystalline compound, $C_{15}H_{16}O_9$, obtained from the roots of *Gelsemium sempervirens.* It forms fluorescent solutions and is possibly identical with esculin.

gelseminine (jel-sem'i-nin), *n.* [*gelsemine* + *-ine*2.] An amorphous, very poisonous alkaloid, $C_{24}H_{28}O_4N_2$ or $C_{22}H_{26}O_3N_2$. It is found with gelsemine in *Gelsemium sempervirens.*

gem, *n.* 5. The name given by English type-founders to a body of type that is intermediate between brilliant and diamond.—**6.** A cake made with flour or corn meal, sometimes sweetened, and usually baked in a sheet of small, shallow pans.—**Island gems,** a large and clearly defined class of engraved gems, first noted in excavations in the islands of the Ægean sea. They have since been found in great numbers elsewhere in Greece and Crete. The island gems are extremely archaic, but vigorous in style. In the representation of animals they are often especially interesting.

gem, *v. t.* 4. To exploit in searching for gems; search for gems in: as, the right to *gem* a river or a tract of land. *N. E. D.*

Gemarist (ge-mä'rist), *n.* [*Gemara* + *-ist.*] One who is learned in the Gemara (which see).

gem-fruit (jem'frōt), *n.* The coolwort, *Tiarella cordifolia.*

gemination, *n.* 4. In *astron.,* the frequent apparent doubling of the canals of Mars. It is still debated whether the phenomenon represents a real fact on the planet's surface or is merely optical or visual.—**5.** In *anat.,* the union or fusion of two contiguous teeth caused by the uniting of two tooth-pulps.—**Dissimilated gemination,** a gemination, actual or assumed, of a consonant, followed by a dissimilation of the second consonant to a mute of the same class, as L. *numeru-s,* > **num'ru-,* > **num-mru-,* > **num-bru-,* > F. *nombre,* > E. *number*; AS. *spinl,* > **spinnl,* > E. *spindle,* etc.

geminid (jem'i-nid), *n.* [*Gemin-i* + *-id*2.] A member of the meteoric swarm which usually gives a shower about December 8 from a radiant in the constellation Gemini.—**Geminid variable,** a variable star which in its behavior resembles ζ Geminorum. Its period ranges from 7 hours to 13 days, its change of luster is continuous, and the maxima recur punctually.

geminipolar (jem″i-ni-pō'lar), *a.* [L. *geminus,* twin, + *polus,* pole: see *polar.*] Having two like poles, side by side: said of certain nerve-cells.

gemma, *n.* 3. In *biol.,* one of the hypothetical units of living matter: similar to *biogen, idioblast,* ★*pangen,* ★*plasome,* etc.—**4.** A knob-like protuberance or nodule.

gemmate (jem'āt), *v. i.*; pret. and pp. *gemmated,* ppr. *gemmating.* [L. *gemmare,* put forth buds, < *gemma,* a bud: see *gem, n.*] To put forth buds or to propagate by buds, as a polyp.

gemmated (jem'ā-ted), *a.* [*gemmate* + *-ed*2.] Set with gems; bedecked with precious stones.

gemmation, *n.,* 1. (*b*) The arrangement or phyllotaxy of leaf-buds.—**Calycinal gemmation.** See ★*calycinal.*—**Cœnenchymal gemmation,** in the *Anthozoa,* the reproduction of new corallites by budding from the cœnenchymal tissue between the old corallites.—**Costal gemmation.** Same as *cœnenchymal* ★*gemmation.*—**Extracalycinal gemmation.** See ★*extracalycinal.*—**Septal gemmation,** in the asexual reproduction of the corals, the development of a new corallite from one of the septa which becomes enlarged and produced so as to inclose a new calycinal disk.—**Stolonal gemmation.** Same as *basal gemmation* (which see, under *gemmation*).—**Tabular gemmation,** in the *Anthozoa,* a mode of calycinal gemmation observed in certain tabulate corals in which the tabulæ are produced upward to form pockets from which the new corallites are developed.

gemmative (jem'a-tiv), *a.* [*gemmate* + *-ive.*] Relating to reproduction by gemmation.

gemmer (jem'ėr), *n.* One who searches or digs for gems.

gemmipore (jem'i-pōr), *n.* [NL. *Gemmipora.*] A madreporarian coral of the genus *Gemmipora.*

The *gemmipores* resemble these in general form, and in their fringe of short tentacles, but the disk is not striated. *Dana*, Zooph., p. 47.

gemmology (jem-ol'ō-ji), *n.* [L. *gemma,* gem, + Gr. *-λογια,* < *λέγειν,* speak.] The science of gems.

gemmular (jem'ū-lăr), *a.* [*gemmule* + *-ar*3.] Of or relating to gemmules.

That while still in this *gemmular* condition, these cell seeds have for one another a mutual affinity, which leads to their being collected from all parts of the system by the reproductive glands of the organism.
Smithsonian Rep., 1890, p. 433.

gemmule, *n.* 3. In *biol.,* one of the hypothetical living units conceived by Darwin as the bearers of the hereditary attributes of animals and plants.

gemmuled (jem'ūld), *a.* [*gemmule* + *-ed*2.] Bearing or ornamented by small protuberances or nodules.

The remainder [of the whorls in Gasteropoda]... being uniformly adorned by two keeled spiral rows of close-set and conspicuously noduled gemmæ,... below the two *gemmuled* carinæ is a strong spiral plain keel.
Proc. Zool. Soc. London, 1901, II. 372.

gem-pan (jem'pan), *n.* A connected series of small shallow pans, usually circular, in which the cakes called gems are baked.

Gempylidæ (jem-pil'i-dē), *n. pl.* [NL., < *Gempylus* + *-idæ.*] A family of mackerel-like fishes, elongate and having very strong teeth, containing species known as the *escolars* and *snake-mackerels.*

gempyloid (jem'pi-loid), *a.* Pertaining to or resembling the *Gempylidæ.*

Gempylus (jem'pi-lus), *n.* [NL. (Cuvier), formation not clear: cf. *Gemylus* (1865), *Gempylodes* (1864), genera of *Coleoptera.*] A genus of snake-mackerels, elongate mackerel-like fishes with strong teeth found in the open seas. The commonest species is *G. serpens.*

gem-salt (jem'sâlt), *n.* Rock-salt, the mineral halite.

Gen. An abbreviation (*c*) of *Geneva* or *Genevan.*

gen. An abbreviation (*c*) of *gender;* (*d*) of *genera;* (*e*) of *generally;* (*f*) of *generic;* (*g*) of *genus.*

gender2 (gen'dėr), *n.* [Jav. and Malayan *gender.*] A Javanese musical instrument of the xylophone class. It consists of a graduated series of eleven strips of metal strung together by two cords tied about them at their nodal points, and each provided beneath with a piece of bamboo for a resonator.

geneal. An abbreviation of *genealogy.*

Genealogical individual. See ★*individual.*

geneclexis (jen-e-klek'sis), *n.* [NL., < Gr. *γένος,* kind (nature), + *ἐκλεξις,* selection.] Unconscious, automatic natural selection, in distinction from *teleclexis,* an intentional or artificial selection brought about by man. *L. F. Ward*, Pure Sociol., p. 361.

genepistasis (jen-e-pis'ta-sis), *n.* [NL., < Gr. *γεν-,* produce, + *ἐπίστασις,* cessation: see *epistasis.*] Cessation of development in the history of a species or race. [Rare.]

Once a condition of stable equilibrium has been reached ... we may have ... *Genepistasis,* resulting in the fixity or stability of an organic species, under stable conditions. *J. A. Ryder*, Biol. Lectures, 1895, p. 50.

genepistasy (jen-e-pis'ta-si), *n.* Same as ★*genepistasis.*

genepistatic (jen-ep-i-stat'ik), *a.* Of or pertaining to genepistasis.

generalization, *n.* 4. In *pathol.,* the involvement of the entire system in a morbid process which was at first local.

generalizational (gen″e-ral-i-zā'shon-al), *a.* Of the nature of a generalization; used in generalization.—**Generalizational demonstration.** See ★*demonstration.*

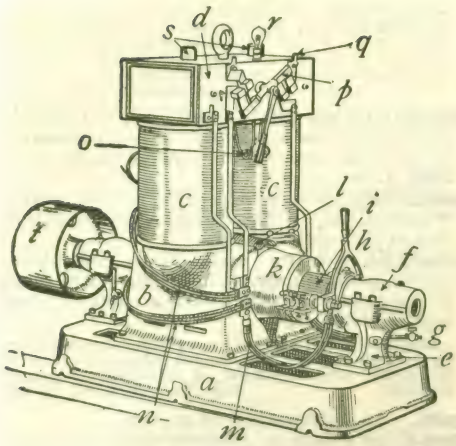
generalize, *v. i.* 3. In *painting,* to render large and typical characteristics rather than details.

generate, *v. t.* 5. To produce; evolve; as electricity, force, friction, gas, heat, light, velocity, etc.

The two distinct and independent electromotive forces *generated* by such a machine are used to supply two distinct and independent currents to two distinct and independent circuits.
Franklin and Williamson, Alternating Currents, viii.

The steam *generated* from the sea-water, if used for drinking, ... is condensed and filtered.
R. H. Thurston, Manual of the Steam Engine, II. 141.

6. In *music,* of a tone fundamental to a chord, to suggest or fix (the remaining tones of the harmony).

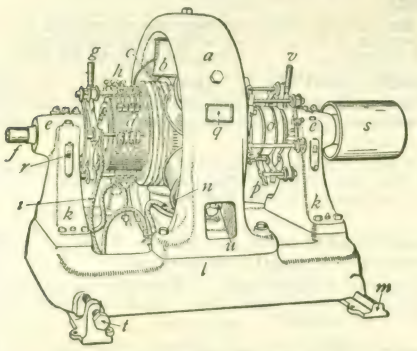


generation, *n.* 10. The individuals of a given mineral species which have been formed at the same time and under similar conditions, as in the solidification of an igneous rock, or the deposits in a mineral vein. *Amer. Geol.*, June, 1904, p. 338.

generational (jen-e-rā'shon-al), *a.* [*generation* + *-al*1.] Of or pertaining to generation.

It is stated that 'these generating elements define the group completely,' whereas the generating elements with a complete set of *generational* relations are necessary for the definition of the group; also as alternative for 'equations' should be given '*generational* relations.'
Science, June 5, 1903, p. 905.

Generative rupture. See ★*rupture.*



generator, *n.*—**Asynchronous generator,** in *elect.,* an alternating-current dynamo in which speed and frequency of alternation are not in fixed relation to each other.—**Bipolar generator,** in *elect.,* a dynamo having two pole-pieces between which the armature revolves. The essential features of a bipolar generator for direct currents are shown in the figure. See cut on next page.—**Closed-coil generator,** a generator the successive coils in the armature of which are connected in series. The dynamos of Gramme and Siemens are examples of closed-coil generators.—**Differential generator,** an electric machine with a differentially compounded field winding. See *electric* ★*motor.*—**Double-current generator,** a dynamo-electric machine built to supply direct as well as alternating (usually polyphase) currents. It consists of a magnetic field in which revolves an armature which is connected to collector-rings for the alternating and to a commutator for the direct current. See cut on next page.—**Generator gas.** See ★*gas.*—**Induction generator,** in *elect.,* any alternating-current generator having an alternating field and two sets of windings (primary and secondary) which rotate with

Bipolar Generator.

a, base; *b*, pole-piece; *c*, protective roping; *d*, field-yoke; *e*, pillow-block; *f*, bearing-cap; *g*, pet-cock; *h*, brush-holder stud and handle; *i*, commutator; *k*, armature; *l*, wire screen; *m*, armature-lead; *n*, series field-lead; *o*, shunt field-lead; *p*, load-switch; *q*, terminal; *r*, pilot-lamp; *s*, pole-piece bolts; *t*, driving-pulley.

respect to one another.—**Monocyclic generator,** an alternating-current machine producing polyphase electro-

Double-current Generator.

a, magnet-frame; *b*, pole-piece; *c*, armature; *d*, commutator; *e*, bearing; *f*, shaft; *g*, direct-current brush-adjusting handle; *h*, direct-current brushes; *i*, direct-current leads; *k*, pillow-block; *l*, base; *m*, belt-tightener track; *n*, field-leads; *o*, collector-ring; *p*, alternating-current brush; *q*, name-plate; *r*, oil-gage; *s*, pulley; *t*, belt-tightener bolt; *u*, keeper-bolt; *v*, alternating-current brush-adjusting handle.

motive forces with a single-phase flow of energy. The currents from such generators are particularly adapted to the starting and operation of induction motors.—**Motor-generator,** in *elect.*, a combination of two machines consisting of a motor and generator mounted on a common shaft. The usual arrangement consists of an alternating-current motor, thus driving a direct-current generator.—**Open-coil generator,** a generator the ends of the armature windings of which are not joined, each to the following, but are connected separately to the commutator-bars or collector-rings.—**Polyphase generator,** in *elect.*, a machine which produces two or more alternating currents that differ in phase.—**Pulsating-current generator,** in *elect.*, a generator producing direct currents that vary periodically in intensity. The open-coil arc-lighting dynamos of Thomson and of Brush are examples of pulsating-current generators.—**Single-phase generator,** in *elect.*, an alternating-current machine which produces only one current, or produces currents all of which are in the same phase.—**Three-phase generator.** See *tri-phase* ★*generator*.—**Tri-phase generator,** in *elect.*, an alternating-current dynamo from which, by suitable connections with the armature, three currents, in separate circuits and differing from one another in phase by 60°, are produced.

generator-unit (jen′e-rā-tor-ū″nit), *n.* A part of a plant for generating electric power (as a single engine and the dynamos supplied by it) which is designed to be operated as a unit, and which can be thus operated without reference to the remainder of the plant or can be stopped without influencing the operation of the remainder.

Generic image. See ★*image*.—**Generic whole,** the whole of a logical genus.

Genesee shale. See ★*shale*[2].

Genesial cycle. See ★*cycle*[1].

genesic (je-nes′ik), *a.* [Irreg. < *genes(is)* + *-ic.* The normal adjective from *genesis* is *genetic.*] Pertaining to genesis or reproduction; genetic.

Attention should be directed [to] . . . the evidences of awakening *genesic* tendency.
Med. Record, July 11, 1903, p. 66.

genesis, *n.*—**Social genesis,** a division of social science treating of the natural origin and development of society. *L. F. Ward,* Outlines of Sociol., p. 190.

genethliacally (jen-eth-lī′a-kal-i), *adv.* Astrologically; by horoscopy.

He was not only a bold adventurous practitioner in physic, but also . . . an adept, who read the stars, and expounded the fortunes of mankind, *genethliacally,* as he called it, or otherwise. *Scott,* Kenilworth, xi.

genethlialogic (jē-neth″li-a-loj′ik), *a.* Of or pertaining to genethlialogy, or the casting of nativities.

genethlialogical (jē-neth″li-a-loj′i-kal), *a.* Same as ★*genethlialogic*.

Genetic aggregation. See ★*aggregation*.—**Genetic method.** (*b*) That method of philosophical inquiry which endeavors to avoid assumptions antecedent to the examination of facts, and so far as it is unable to free itself from first principles regards them as subject to modification in the light of experience, proceeding, as far as possible, by the method of taking up verifiable hypotheses suggested by observation and of thoroughly testing them experimentally.—**Genetic pit, progress, psychology, selection.** See ★*pit*[1], ★*progress*, ★*psychology*, ★*selection*.

-genetic. An element in recent adjectives which correspond to nouns in *-genesis* (see *genesis*) and *-geny* (see *-geny*). See *genetic*.

genetics (jē-net′iks), *n.* [See *genetic.*] The science of genesis or of the processes by which (something) is produced; specifically, in *biol.*, that portion of evolutionary science which deals with natural development uncomplicated by artificial process.

genetopathy (jen-e-top′a-thi), *n.* [Irreg. < Gr. *γένεσις* (*γενετι-*), reproduction, + *πάθος*, suffering.] Disease connected with the reproductive functions.

The source of this as of all the other *genetopathies* may be congenital or even hereditary, but very often its origin is in the nervous system.
G. S. Hall, Adolescence, I. 498.

genetophobia (jen″e-tō-fō′bi-a), *n.* [Irreg. < Gr. *γένεσις* (*γενετι-*), origin, + *-φοβια*, < *φοβεῖν*, fear.] A morbid fear of, or aversion to, the study of origins.

This *genetophobia* pervades . . . much of the best ancient and contemporary philosophical and theological thought. *G. S. Hall,* Adolescence, II. 41.

Genial apophysis, the group of four genial tubercles.

genicular (jē-nik′ū-lar), *a.* [*geniculum* + *-ar*[3].] In *bot.*, growing on or at a node; occurring in the tissue of the node: as, *genicular* cells.

geniculum (jē-nik′ū-lum), *n.*; pl. *genicula* (-la). [NL., < L. *geniculum,* a little knee, a joint of a stem, dim. of *genu,* knee.] 1. In *bot.*, a node or joint of a stem.—2. In *anat.*, a sharp bend in any small organ, such as that in the facial nerve where it passes through the temporal bone.

geniolatry (jē-ni-ol′a-tri), *n.* [L. *genius,* a genius, + Gr. *λατρεία,* worship.] The worship of genii.

genion (jē-nī′on), *n.*; pl. *genia* (-a). [NL., < Gr. *γένειον,* the chin, < *γένυς,* chin: see *genial*[2].] In *craniom.*, the point of the spina mentalis interna. *Von Török.*

genioplasty, *n.* 2. Operative restoration of a portion of the cheek which is lacking.

genip (jen′ip), *n.* Same as *genip-tree*.

genistein (jē-nis′tē-in), *n.* [*Genista* + *-in*[2].] A crystalline coloring-matter, $C_{14}H_{10}O_5$, obtained from the flowers of *Genista tinctoria* (dyer's-broom): trihydroxyphenylketocoumarin,

$$(\overset{3,5}{\mathrm{HO}})_2C_6H_2 < \begin{matrix}\overset{1}{\mathrm{O}}\\ \mathrm{CO}\\ \overset{2}{\ }\end{matrix} > \overset{4}{\mathrm{CH}}.C_6H_4.\overset{1}{\mathrm{OH}}.$$

genit. An abbreviation of *genitive*.

Genital band, in *Gephyrea,* one of the ridges or bands of cells attached to the interior of the body-wall which give rise to the ova and spermatozoa.

Stretching across the ventral aspect of the cœlom, at the point where the ventral retractors are attached to the body-wall, is a band of cells with relatively large nuclei. These cells constitute the *genital band* and are derived from the peritoneal epithelium.
Proc. Zool. Soc. London, 1903, I. 37.

genitivally (jen-i-tī′val-i), *adv.* As regards the genitive case; with reference to the genitive.

genitive, *a.* 2. Connected with or relating to generation.

These powers are at their best at the time of strongest *genitive* impulses and greatest conceptive power.
G. S. Hall, Adolescence, I. 490.

genitocœle (jen′i-tō-sēl), *n.* [*genit(al)* + Gr. *κοῖλος,* hollow.] In *zoöl.*, a brood-cavity, or storage-chamber for eggs.

genitospinal (jen″i-tō-spī′nal), *n.* Noting a nerve-center in the spinal cord which controls the organs of generation and also in part the bladder and lower bowel.

genizah (ge-nē′zä), *n.*; pl. *genizoth* (ge-nē′zōt). [Aram., < *ganaz,* set aside, hide, save.] Among Jews, a sacred object, such as a defective scroll of the law, which has been rendered unfit for liturgical use. Such objects are

preserved because, although damaged, they still possess a certain sacredness from the fact that the name of Jehovah is contained in them. Some genizoth in the Holy Land and Egypt, especially those of Cairo, have furnished valuable matter to archæological and theological students.

genizara (hā-nē′thä-rä), *n.* [Cuban Sp. use of Sp. *genizara,* fem. of *genizaro,* a janizary.] A small labroid fish, *Clepticus parræ.* [Cuba.]

Gen'l. An abbreviation of *General* (as a title).

genoholotype (jen-ō-hol′ō-tīp), *n.* [Irreg. < Gr. *γένος,* kind, genus, + *ὅλος,* whole, + *τύπος,* type.] The one species on which a genus is founded, or a series of species on which a genus is founded one of which is stated by the author to be the 'type.' *Schuchert and Buckman,* in Science, June 9, 1905, p. 900.

genolectotype (jen-ō-lek′tō-tīp), *n.* [Irreg. < Gr. *γένος,* kind, genus, + *λεκτός,* chosen, + *τύπος,* type.] One of a series of species selected to be the type of a genus subsequent to the description of that genus. *Schuchert and Buckman,* in Science, June 9, 1905, p. 901.

Genosiris (jen-o-sī′ris), *n.* [NL. (Labillardière, 1804), incorrectly formed < Gr. *γένος,* kind, genus, + *Iris,* a genus of plants.] A genus of monocotyledonous plants. See *Patersonia*.

genosyntype (jen-ō-sin′tīp), *n.* [Irreg. < Gr. *γένος,* kind, genus, + *σύν,* with, + *τύπος,* type.] One of a series of species upon which a genus is founded, no one species being the genoholotype, or species on which the genus is based. *Schuchert and Buckman,* in Science, June 9, 1905, p. 901.

genotype (jen′ō-tīp), *n.* [Irreg. < Gr. *γένος,* kind, genus, + *τύπος,* type.] The type specimen or original description or illustration of a genus. See *type specimen,* under *type*.

Eight species have at various times been referred to *Romingeria,* mostly upon very insufficient grounds; hence the original conception of the genus has become obscured and is without much present significance. If the original description and figure of Billings be taken as a starting-point, the subsequent vicissitudes of this *genotype* will be appreciated.
Amer. Jour. Sci., July, 1903, p. 1.

genson (jen′son), *n.* [A dial. form of *gentian.*] The horse-gentian, or feverroot, *Triosteum perfoliatum*.

gentian, *n.*—**American gentian,** in *phar.*, *Gentiana Saponaria,* the soapwort-gentian, used as a substitute for the officinal gentian, probably including other species. Also (improperly) the American columbo, *Frasera Carolinensis.*—**Autumn gentian,** *Gentiana Amarella,* a low Old World species, used medicinally.—**Barrel-gentian,** the closed gentian, *G. Andrewsii,* so called from the barrel-shaped flowers. The soapwort-gentian, *G. Saponaria,* has been called *barrel-flowered gentian* for the same reason.—**Bastard gentian.** (*a*) *Gentiana acuta.* See *northern* ★*gentian*. (*b*) The pineweed or orange-grass, *Sarothra gentianoides.*—**Blind gentian,** the closed gentian, *Gentiana Andrewsii.*—**Blue gentian,** in *phar.*, same as *American* ★*gentian* (excluding *Frasera*); also the five-flowered gentian, and generally any blue-flowered gentian.—**Bottle gentian,** the closed gentian, *Gentiana Andrewsii.*—**Elliott's gentian,** a blue-flowered species, *Gentiana Elliottii,* of the southeastern United States of the same general type as the soapwort-gentian.—**Five-flowered gentian,** the ague-weed, *Gentiana quinquefolia* of eastern North America, also called *stiff gentian* and *gall-weed.* It is an attractive plant with rather slender tubular flowers in clusters of about five. Its root is said to be much used in domestic practice.—**Gentian aniline water.** See *gentian violet*.—**Gentian blue, violet.** See ★*blue*, etc.—**Larger fringed gentian,** the ordinary fringed gentian, *Gentiana crinita.* Compare *smaller fringed* ★*gentian*.—**Marsh gentian.** (*a*) *Gentiana Pneumonanthe* of moist grounds in Europe. See *harvest-bells.* (*b*) The soapwort-gentian. (*c*) Same as *striped* ★*gentian*.—**Northern gentian,** *Gentiana acuta,* a plant of wide distribution in the northern regions of both hemispheres and in the mountains as far south as Mexico. It is a small blue-flowered species, often with purple stems and foliage, and is closely related to, and by some identified with, the autumn gentian or common European felwort.—**One-flowered gentian,** a pine-land species, *Gentiana Porphyrio,* of the lower Atlantic coast, bearing a single funnel-shaped flower of blue mixed with some green and yellow.—**Smaller fringed gentian,** *Gentiana detonsa,* resembling the fringed gentian, but smaller: native both in Europe and in northern North America.—**Snake gentian,** the rattlesnake-root, *Nabalus serpentarius.*—**Soapwort-gentian.**

Five-flowered Gentian (*Gentiana quinquefolia*).

a, plant, one fourth natural size; *b*, corolla, expanded to show the stamens and pistil, about natural size. (From Britton and Brown's "Illustrated Flora of the Northern States and Canada.")

See *gentian*. This and the closed gentian, striped gentian, and other related species differ greatly in habit from the officinal gentian, being lower, more slender, and less erect plants with oblong leaves narrowed at the base and bearing their club-shaped flowers at or near the summit of the stem, while their nearly closed flowers separate them widely from the fringed gentians and the five-flowered gentian. In the Southern mountains the species of this group are called *Samson's snakeroot*. See *American* ★*gentian*.—**Southern gentian,** the soapwort-gentian, *Gentiana Saponaria*. See *American* ★*gentian*.—**Stiff gentian.** Same as *five-flowered* ★*gentian*.—**Striped gentian,** *Gentiana villosa*, of the eastern United States, especially southward: a plant of the habit and property of the soapwort-gentian (see above), but with flowers more open, and greenish-white striped within.—**White gentian,** the laserwort or herb frankincense, *Laserpitium latifolium*. See *Laserpitium*. Also same as *horse-gentian* (which see, under *gentian*). These are gentians only medicinally.—**Yellow gentian.** (*a*) The officinal species, *Gentiana lutea*. See *gentian* and *yellow*. The root possesses in a high degree the medicinal property of a bitter tonic. (*b*) The American columbo, *Frasera Carolinensis*.

Gentianales (jen-shia-nā′lēz), *n. pl.* [NL. (Lindley, 1833), ⟨*Gentiana* + *-ales*.] An order of dicotyledonous, chiefly sympetalous plants characterized by regular flowers, mostly 5-merous, the stamens borne on the base of the corolla and as many as its lobes, and 2 distinct ovaries. It embraces 7 families, of which the *Gentianaceæ*, *Oleaceæ*, *Apocynaceæ*, and *Asclepiadaceæ* are the most important.

gentianic (jen-shi-an′ik), *a.* Pertaining to or derived from gentianin.—**Gentianic acid,** an incorrect name for ★*gentianin*.

gentianin (jen′shia-nin), *n.* The pale-yellow crystalline coloring-matter of the root of *Gentiana lutea*. It is used as a tonic, melts at 267° C., and is dihydroxymethoxyxanthone, $HO.C_6H_3{<}^{O}_{CO}{>}C_6H_2OH.OCH_3$. Also called *gentisin* and *gentianic acid*.

gentianose (jen′shia-nōs), *n.* [*gentian* + *-ose*.] A colorless, dextrorotatory compound, $C_{18}H_{32}O_{16}$, crystallizing in plates which melt at 210° C. It is found in the root of *Gentiana lutea*. It ferments directly and yields a mixture of gentiobiose and l-fructose when hydrolyzed. It is a hexotriose.

gentiobiase (jen″ti-ō-bī′ās), *n.* [*gentiobi(ose)* + *-ase*.] A ferment which inverts gentiobiose to the corresponding disaccharides.

gentiobiose (jen″ti-ō-bī′ōs), *n.* [*genti(an)* + (*hex*)*obiose*.] A hexobiose derived from dextrose.

gentiogenin (jen-ti-oj′e-nin), *n.* [*genti(an)* + *-gen* + *-in*^{2}.] An amorphous cleavage-product, $C_{14}H_{16}O_5$, of the glucoside gentiopicrin, obtained from the root of *Gentiana lutea*.

gentiol (jen′ti-ōl), *n.* [*genti(an)* + *-ol*.] An amorphous compound, $C_{30}H_{45}(OH)_3$, obtained from the flowers of *Gentiana verna*. It melts at 215°–219° C.

gentisate (jen′ti-sāt), *n.* [*gentis-ic* + *-ate*^{1}.] A salt of gentisic acid.

gentisein (jen-tis′ē-in), *n.* [*gent(ian)* + Gr. *ἴσος*, equal (?), + *-e-* + *-in*^{2}.] A straw-colored compound, $HO{\overset{4}{C}}_6H_3{<}^{O}_{CO}{>}C_6H_2{(\overset{1\cdot3}{OH})}_2$, which crystallizes in needles and melts at 315° C. It is a dye and is also called 1, 3, 7, trihydroxyxanthone.

gentisic acid. Same as ★*gentianic acid*.

gentisin (jen′ti-sin), *n.* Same as ★*gentianin*.

gentleman's-cane (jen′tl-manz-kān), *n.* The prince's-feather, *Polygonum orientale*.

Genu arcuatum, eversum, excurvatum, or **extrorsum.** Same as ★*genu varum*.—**Genu introrsum** or **inversum.** Same as ★*genu valgum*.—**Genu recurvatum,** hyperextension of the knee, forming a projecting angle backward.—**Genu valgum,** knock-knee.—**Genu varum,** outward bending of the legs; bow legs.

genual, *a.* 2. Pertaining to or resembling a genu (in any sense).—**Genual sulcus.** See ★*sulcus*.

genuin, *a.* A simplified spelling of *genuine*.

genus, *n.*—**Form genus,** a genus or group consisting of form species.—**Proximate genus,** in *logic*, the next higher genus; the genus next above a given species.—**Summum genus,** same as *highest genus*; a genus that is not included in any other genus.

Genyatremus (jen-i-at′rē-mus), *n.* [NL., ⟨Gr. *γένυς*, chin (see *chin*), + *ἀ-* priv. + *τρῆμα*, hole.] A genus of fishes of the family *Hæmulidæ*, commonly known as the grunts. They are similar to fishes of the genus *Anisotremus*, but have a curved tail. *G. luteus* is found in the West Indies.

Genyonemus (jen″i-ō-nē′mus), *n.* [NL., ⟨Gr. *γένυς*, chin, + *νῆμα*, thread.] A genus of small cyanoid fishes known as kingfishes, found on the coast of California, where *G. lineatus* is valued as food.

Genyophrynidæ (jen″i-ō-frin′i-dē), *n. pl.* [NL. *Genyophryne*, the type genus, + *-idæ*.] A family of tailless *Amphibia* which contains species with dilated sacral vertebræ and very small teeth on the front portion of the under jaw. The few species are found in the Australian region.

Genyornis (jen-i-ôr′nis), *n.* [NL., ⟨Gr. *γένυς*, chin, + *ὄρνις*, bird.] A genus of large struthious birds, apparently related to the emu, known from remains in the Pleistocene deposits about Lake Callabonna, Australia. The type of the genus is *G. newtoni*.

genyplasty (jen′i-plas-ti), *n.* [Gr. *γένυς*, chin, + *πλαστός*, formed, + *-y*^{3}.] See ★*genioplasty*.

geobiologic (jē″ō-bī-ō-loj′ik), *a.* Of or pertaining to geobiology.

A forest soil, such as we find in western North Carolina, is an expression, therefore, not only of the physico-geographic, geographic, and geophysic forces which have been brought to bear in its formation, but also of the *geobiologic* forces which have been at play.
Bot. Gazette, Oct., 1903, p. 256.

geobios (jē-ō-bī′os), *n.* [Gr. *γῆ* (*γεω-*), earth, land, + *βίος*, life.] The animals and plants of the land, considered collectively and in contrast with the animals and plants of the water.

The term halibios seems to be suitable to designate the totality of the marine fauna and flora, as contrasted with limnobios, or the organic world of fresh water, and with *geobios* or the totality of the land-dwelling or terrestrial plant and animal world.
Haeckel (trans.), Planktonic Studies, p. 578.

geobotanic (jē″ō-bō-tan′ik), *a.* [Gr. *γῆ* (*γεω-*), earth, + E. *botanic*.] Same as *geobotanical*. *Pop. Sci. Mo.*, May, 1904, p. 71.

geobotanist (jē-ō-bot′a-nist), *n.* [*geobotan(y)* + *-ist*.] A student of geobotany.

The most thorough investigations have been given to the chernozem soils by Russian *geo-botanists*.
U. S. Dept. Agr., Bur. Plant Industry, Bulletin 3, p. 18.

geobotany (jē-ō-bot′a-ni), *n.* [Gr. *γῆ* (*γεω-*), earth, + E. *botany*.] Geographical botany or phytogeography, including its œcological aspect.

The geology and *geo-botany* of Asia.
Pop. Sci. Mo., May, 1904, p. 68.

geocarpy (jē′ō-kär-pi), *n.* [Gr. *γῆ* (*γεω-*), earth, ground, + *καρπός*, fruit, + *-y*^{3}.] The habit of certain plants of burying their fruit in the ground for protection. The peanut is the most familiar example. *Jour. Roy. Micros. Soc.*, Aug., 1904, p. 427.

geocentric. I. *a.*—**Geocentric system,** the ancient theory of the solar system which placed the earth at its center.—**Geocentric zenith.** See ★*zenith*.

II. *n.* An adherent of the theory that the earth is the center of the universe.

geocentricism (jē-ō-sen′tri-sizm), *n.* [*geocentric* + *-ism*.] The geocentric theory.

We have moreover, in approaching these questions to clear our minds entirely of *geocentricism*, theological and philosophical as well as physical, of our notions of this earth as the center of the universe and the grand scene of providential action.
Goldwin Smith, in The Forum, July, 1896, p. 608.

geochemical (jē-ō-kem′i-kal), *a.* [Gr. *γῆ* (*γεω-*), earth, + E. *chemical*.] Presenting both geological and chemical relations. *Jour. Soc. Chem. Industry*, VII. 338.

geochemism (jē-ō-kem′ism), *n.* [Gr. *γῆ* (*γεω-*), earth, + *chemism*.] Chemical energy as the cause of changes in, and as determining the condition of, the materials of which the earth's crust is composed.

All of these processes are the work of gravity, heat, light, electricity and magnetism, and combined they produce a set of chemical changes which, as a mode of motion, we call chemism, which must be distinguished from affinity, for affinity means choice, while chemism means energy, and valency expresses numerical proportions. Heat produces expansion, gravity produces contraction in the materials of the rocky crust, and, conjoined, they produce chemism. This *geochemism* is the fundamental energy. *J. W. Powell*, Truth and Error, p. 59.

geochemistry (jē-ō-kem′is-tri), *n.* [Gr. *γῆ* (*γεω-*), earth, + E. *chemistry*.] The chemical study of the earth, that is, the science of its chemical composition and of the chemical causes and effects of terrestrial processes.

The problems of geophysics and *geochemistry* involve the applications of pure physics and pure chemistry from the minutest parts of the earth to the mass of the earth as a whole. *Rep. Carnegie Inst.*, 1902, p. 27.

geochrone (jē′ō-krōn), *n.* [Gr. *γῆ* (*γεω-*), earth, + *χρόνος*, time.] A name proposed for the standard time unit used in measuring geologic time and comparing different eras.

The time ratio adopted by Prof. James D. Dana for the Paleozoic, Mesozoic, and Cenozoic periods is, 12, 3, and 1, respectively. Prof. Henry S. Williams applies the term geochronology, giving the standard time unit used the name *geochrone*. The *geochrone* used by him in obtaining a standard scale of geochronology is the period represented by the Eocene. His time scale gives 15 for the Paleozoic, 3 for the Mesozoic, and 1 for the Cenozoic, including the Quaternary and the Recent.
Smithsonian Rep., 1893, p. 331.

geochronology (jē″ō-krō-nol′ō-ji), *n.* Geologic chronology; the application of time measures to geologic succession. *Smithsonian Rep.*, 1893, p. 331.

geochrony (jē-ok′rō-ni), *n.* [Gr. *γῆ* (*γεω-*), earth, + *χρόνος*, time.] The chronological classification of the earth's history.

geocratic (jē-ō-krat′ik), *a.* [Gr. *γῆ* (*γεω-*), land, *κρατεῖν*, predominate, + *-ic*.] Relating to times or conditions in which land predominates or continents enlarge.

Hydrocratic and *geocratic* movements alternated during Jurassic times, with a decided balance in favour of the former, and a recession of the coast-line towards the north. *Geog. Jour.* (R. G. S.), XI. 133.

geod. An abbreviation of *geodesy*.

geodal (jē′ō-dal), *a.* Characteristic of or pertaining to a geode or formed by the same processes which give rise to geodes.

Geodesic geometry. See ★*geometry*.

geodetic, *a.*—**Geodetic latitude.** See ★*latitude*.—**Geodetic leveling.** See ★*leveling*.

II. *n.* A geodetic line.

geodetician (jē″ō-de-tish′iạn), *n.* [*geodetic* + *-ian*.] One who is skilled in geodesy; a geodesist.

He estimates that to complete the undertaking the cooperation of five *geodeticians* for four complete years will be necessary. *Geog. Jour.* (R. G. S.), XVI. 356.

geodic (jē-od′ik), *a.* [*geode* + *-ic*.] Of, pertaining to, resembling, containing, or that has contained a geode: as, *geodic* cavities; *geodic* masses.

"Man, like this star, is *geodic*." "Passing wonderful! I have been straining after the stars, how much there is in the stones! *Geodic* Androids!"
S. Judd, Margaret, II. iii.

geodist (jē′ō-dist), *n.* [*geode* + *-ist*.] A student or investigator of geodes.

Fairburn's experiments . . . illustrate this tetrahedral collapse for short tubes; and . . . it is considered probable by some *geodists*. *Geog. Jour.* (R. G. S.), XIII. 239.

geodromican (jē-ō-drom′i-kạn), *a.* and *n.* I. *a.* Of or belonging to the heteropterous series *Geodromica*.

II. *n.* One of the *Geodromica*.

geoduck (jē′ō-duk), *n.* Same as ★*goeduck*.

geodynamic (jē″ō-dī-nam′ik), *a.* [Gr. *γῆ* (*γεω-*), earth, + E. *dynamics*.] 1. Relating to the dynamics of the earth, or the forces manifested in the formation and subsequent history of the earth.—2. Specifically, of the solid earth as distinguished from the ocean and atmosphere.—**Geodynamic observatory,** an observatory established for the recording and investigation of the phenomena proper to the solid earth, specifically the phenomena of seismology and vulcanology.

Cavaliere de Rossi, of Rome, has established a "*geodynamic*" *observatory* in a cave 700 metres above the sea at Rocca di Papa, on the external slope of an extinct volcano. *G. H. Darwin*, The Tides, p. 127.

geodynamical (jē-ō-dī-nam′i-kạl), *a.* Same as ★*geodynamic*.

geodynamics (jē-ō-dī-nam′iks), *n.* The study of the dynamics and physics of the processes and phenomena attending the gradual evolution of the earth and the changes that are still going on.

geo-ethnic (jē-ō-eth′nik), *n.* [*geo*(*graphic*) + *ethnic*]. Of or pertaining to the geographical relations of tribes and peoples.

geoform (jē-ō-fôrm), *n.* Same as ★*creoform*.

Geoglossaceæ (jē″ō-glo-sā′sē-ē), *n. pl.* [NL., ⟨*Geoglossum* + *-aceæ*.] A family of fleshy ascomycetous fungi named from the genus *Geoglossum*. The ascomata are club-shaped or capitate and bear asci opening by a terminal pore. See *Geoglossum*.

geoglyphic (jē-ō-glif′ik), *a.* [Gr. *γῆ* (*γεω-*), earth, + *γλυφή*, a carving, + *-ic*.] In *geol.*, noting those characters marked on the rocks from which may be read former conditions of the earth and its life, as a fossil bird-track or rain-print. *Dana*, Manual of Geol., p. 95.

geognosist (jē-og′nō-sist), *n.* [*geognos-y* + *-ist*.] One versed in geognosy; a geognost.

Leopold von Buch, the first *geognosist* of the century, and hardly less famous than Humboldt.
Pop. Sci. Mo., May, 1904, p. 85.

geografer, geografic, geografy. Simplified spellings of *geographer, geographic, geography*.

geogram (jē′ō-gram), *n.* [Gr. *γῆ* (*γεω-*), earth, + *γράμμα*, a writing.] In *geol.*, a special

name suggested for those continuous sections of sedimentary strata which furnish a time-scale for the geologic past.

Further, the meteorologist had his chronometer whereas the geologist must construct his time-scale from the records on what might, for purposes of comparison, be referred to as the "*geograms*," or strips of the geological sediments. *Nature*, March 16, 1905, p. 477.

Geographic œcology. See ★*œcology*.

Geographical biology. Same as ★*biogeography*.—**Geographical climatology, latitude, tongue, variation.** See ★*climatology*, ★*latitude*, ★*tongue*, ★*variation*.—**International geographical mile.** See ★*mile*.

geographize, *v.* **II.** *intrans.* To study geography; carry on more or less systematic observations and researches in geography.

geography, *n.* 3. The main features of a locality as regards its geographical position and general character; the knowledge derived from geographical research.—**Applied geography,** geography considered in relation to commerce and trade; commercial geography.

The term "*applied geography*" has been employed to designate commercial geography, the fact being that every aspect of scientific geography may be applied to practical purposes, including the purposes of trade.
Encyc. Brit., XXVIII. 628.

Astronomical geography, that branch of geography which treats of the astronomical relations of the earth's surface, such as latitudes and longitudes, and the consequent peculiarities of day and night, climates, and seasons in different regions.—**Commercial geography,** the geographical study of the production, distribution, and exchange of commodities.—**Mathematical geography,** those departments of geographical science which need mathematics, and are concerned with the determination of the position of the earth in the solar system, its form, size, motions, etc., the determination of the position of places on the surface of the earth by means of latitude and longitude, the charting of those positions, the delineation of surface features, etc.—**Organic geography,** the science which treats of the responses of organisms to their environment; biography.

Thus defined, geography has two chief divisions. Everything about the earth or any inorganic part of it, considered as an element of the environment by which the organic inhabitants are conditioned, belongs under physical geography or physiography. Every item in which the organic inhabitants of the earth—plant, animal, or man—show a response to the elements of environment, belongs under *organic geography*. Geography proper involves a consideration of relations in which the things that belong under its two divisions are involved.
Amer. Geol., March, 1904, p. 168.

Plant geography. Same as *phytogeography*.

geoid, *n.* 2. See *geode*.

geoidal (jē′oid-al), *a.* [*geoid* + *-al*.] Relating or pertaining to a geoid.

geoisotherm (jē-ō-ī′sō-thėrm), *n.* [Gr. *γῆ* (*γεω-*), earth, + E. *isotherm*.] An imaginary surface passing through all points within the crust of the earth which have the same temperature.

geologic, *a.* 2. Interested in geology or given to geologizing: as, *geologic* tourists.

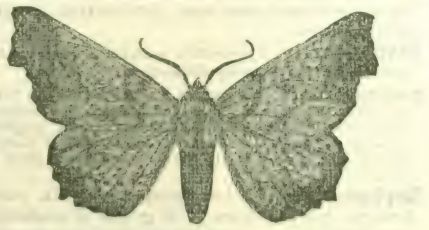
geologize, *v.* **II.** *trans.* To study or investigate geologically: as, to *geologize* a district.

geology, *n.* 1. It is usually subdivided into (*a*) *Geognosy*, or the description of the materials of the earth (sometimes called *lithologic* or *petrographic geology*); (*b*) *dynamic geology*; (*c*) *structural, geotectonic*, or *architectonic geology*; (*d*) *physiographic geology*; (*e*) *paleontologic geology*; (*f*) *historical* or *stratigraphic geology*; (*g*) *cosmic geology*. It is also customary to subdivide it according to its applications, as *economic geology*, or the treatment of its relations to the useful rocks and minerals and mining or quarrying; *practical* or *applied geology*, etc.

2. The geological conditions or features of a place: as, the *geology* of a district.

Æolian geology, the study of geological phenomena due to the winds.—**Anthropic geology,** that branch of the science which is specially concerned with the effects produced by the presence of man on the earth.—**Areal geology,** that branch of the science under which the local formations in a particular area are described and discussed.

Under "*Areal geology*" will be discussed the stratigraphy, igneous rocks, and structure; and under "Economic geology" will be treated the character and occurrence of ore and present mining activity.
Contrib. to Econ. Geol., U. S. Geol. Surv., 1902, p. 32.



Biotic or biologic geology, geology considered with reference to biologic phenomena; paleontology.—**Diastrophic geology.** See ★*diastrophic*.—**Economic geology,** that branch of geology which treats of the origin, occurrence, and applications of the useful ores and nonmetallic minerals and rocks.—**Experimental geology,** that method of geological investigation which seeks to reproduce natural phenomena by artificial or experimental processes.—**Formational geology,** that branch of geology under which is included the study of the successive geological formations: practically synonymous with stratigraphic geology.

geomagnetic (jē″ō-mag-net′ik), *a.* [Gr. *γῆ* (*γεω-*), the earth, + E. *magnetic*.] Of or pertaining to terrestrial magnetism. *Nature*, April 21, 1904, p. 581.

geomagnetist (jē-ō-mag′ne-tist), *n.* A specialist in the magnetic phenomena of the earth.

The *geomagnetist* Paulins.
Sci. Amer. Sup., Sept. 19, 1903, 23176.

geometer, *n.*—**Chain-dotted geometer,** an American geometrid moth, *Cingilia catenaria*, having snow-white wings marked with zigzag lines and dots of black. Its larvæ feed on a variety of shrubs and trees.—**Chickweed-geometer,** an American geometrid moth, *Hæmatopsis grataria*, reddish yellow in color with pink transverse bands on the wings. It occurs from Maine to Texas, and its larvæ feed on the chickweed.—**First-born geometer,** an American geometrid moth, *Brephos infans*, having a blackish-brown form with pinkish-white markings on the fore wings and the hind wings marked with orange. It is found in the northeastern United States and in Canada, extending to Labrador. Its larvæ probably feed on birch or poplar. It is the most primitive geometrid found in the North American fauna: hence the book-name.—**Notched-wing geometer,** an American geometrid moth, *Ennomos magnarius*, one of the largest

Notched-wing Geometer (*Ennomos magnarius*).
(From Comstock's "Manual.")

species in the North American fauna. Its larvæ feed on the maple, birch, and chestnut. The moth is ocher-yellow in color with brown spots.—**Raspberry geometer,** an American geometrid moth, *Synchlora aërata*, of a delicate pale-green color, whose larva feeds on the fruit and foliage of the raspberry, covering itself with bits of vegetable matter.

Geometric decoration, tracery, zenith. See ★*decoration*, ★*tracery*, ★*zenith*.

geometrical, *a.*—**At a geometrical ratio.** See ★*ratio*.—**Geometrical ratio, solution.** See ★*ratio*, ★*solution*.

geometricize (gē-ō-met′ri-sīz), *v. i.*; pret. and pp. *geometricized*, ppr. *geometricizing*. To apply the principles of geometry; become geometrical. *H. C. Butler*, Architecture and Other Arts, p. 31.

geometrid, *n.*—**Green geometrid,** any member of the geometrid subfamily *Geometrinæ*, nearly all of whose species are bright green in color. *Comstock*.

geometrideous (jē-om-e-trid′ē-us), *a.* Same as *geometrid*, *a*.

geometrize, *v.* **II.** *trans.* To form geometrically or according to geometrical principles.

geometroid (jē-om′e-troid), *a.* and *n.* **I.** *a.* Of or belonging to the superfamily *Geometroidea*.

II. *n.* One of the ★*Geometroidea* (which see).

Geometroidea (jē-om-e-troi′de-ạ), *n. pl.* [NL., ⟨ *geometer* + *oidea*.] The geometrid moths considered as a group of superfamily rank.

geometry, *n.* The oldest classification of geometry is (*a*), that in which it is divided according to the method of logical procedure, namely into *synthetic* and *analytic*, the method of geometrical analysis having been invented or taught by Plato. In modern times this classification intertwines with another, namely (*b*), that which is based on the mental instrument or equipment used, giving: (1) *pure* or *synthetic geometry*; (2) *rational*; (3) *descriptive*; (4) *projective*; (5) *algebraic, algorithmic, analytical, Cartesian*, or *coördinate*; (6) *differential, infinitesimal, natural*, or *intrinsic*; (7) *enumerative* or *denumerative*. Some of these are subdivided on the same principle, as: (1) (*α*) *geometry of the ruler* or *straight-edge*; (*β*) *of the ruler and sect-carrier*; (*γ*) *of the ruler and unitsect-carrier*; (*δ*) *of the compasses*; (*ε*) *of the ruler and compasses*; (*ζ*) *of linkages*. Further divisions are: (*c*) By dimensionality: (1) *geometry on the straight* or *on the line*; (2) *two-dimensional geometry*; (*α*) *plane geometry*; (*β*) *spherics*; (*γ*) *pseudo-spherics*; (3) *tri-dimensional geometry*: (*α*) *geometry of planes*; (*β*) *solid geometry*; (*γ*) *spherics*; (4) *four-dimensional geometry*: (*α*) *geometry of straights*; (*β*) *of hyperspace*; (5) *n-dimensional geometry*. (*d*) By elements: (1) *point geometry*; (2) *straight* or *line*; (3) *plane*; (4) *point, straight*, and *plane*; (5) *straightest* or *geodesic*; (6) *geometry of the sphere*; (7) *of other elements*. (*e*) By subject-matter: (1) *pure descriptive, pure projective*, or *pure positional geometry*, or *geometry of position*; (2) *topologic geometry*; (3) *metric geometry*; (4) *geometry of curves*; (5) *of surfaces*; (6) *of solids*; (7) *of hyper-solids*; (8) *of numbers*; (9) *of motion* or *kinematic*. (*f*) By assumptions made, omitted, or denied: (1) *Euclidean geometry*; (2) *non-Euclidean*; (*a*) *metageometry*, or *pan-geometry*; (*b*) *finite geometry*; (3) *semi-Euclidean*; (4) *non-Legendrian*; (5) *Archimedean*; (6) *non-Archimedean*; (7) *non-Arguesian*; (8) *non-Pascalian*. (*g*) By the kind of space or universe of the geometry: (1) *Euclidean* or *parabolic geometry*; (2) *Bolyaian, Lobachevskian, Bolyai-Lobachevskian, absolute*, or *hyperbolic*; (3) *Riemannian, spherical*, or *double elliptic*; (4) *Killing's, single elliptic*, or *simple elliptic*; (5) *Clifford's* or *Clifford-Kleinian*. (*h*) By the complexity or difficulty of the part treated: (1) *elementary geometry*; (2) *higher*. (*i*) By the period of its development: (1) *ancient* or *the antique geometry*; (2) *modern*; (3) *recent, of the triangle*, or *the Lemoine-Brocard*.—**Absolute geometry,** the non-Euclidean geometry of John Bolyai, containing Euclid's geometry as a special case.—**Bolyai** or **Bolyaian geometry,** the geometry of Bolyaian space.—**Characteristic geometry,** that geometry of a surface in which the geodesic line plays the rôle taken by the straight line in the ordinary geometry.—**Differential geometry,** infinitesimal geometry; applications of the differential and integral calculus to curves and surfaces.—**Geodesic geometry,** geometry in which for straight on the plane, straightest on the surface is substituted.—**Geometry on a point,** the dual of pure projective geometry on a plane, obtained by interchanging point with plane.—**Kinematic geometry,** geometry which treats of the properties of curves and surfaces regarded as functions of the spacial and angular velocities of lines which move in accordance with fixed laws.—**Lemoine-Brocard geometry,** the geometry of the triangle, inaugurated by Lemoine in 1873, and by Brocard in 1875.—**Lobachevskian geometry,** the geometry of a Lobachevskian space or universe.—**Non-Euclidean geometry,** a geometry in which Euclid's postulate with regard to parallel straight lines is not assumed. See ★*non-Euclidean*.—**Rational geometry,** geometry founded and developed without the use of irrational numbers, and without ratio: in it four magnitudes by definition form a proportion if the product of two equals the product of the other two.—**Riemannian geometry,** the geometry in which Euclid's tacit assumption that the straight line is infinite is denied.—**Straight geometry.** Same as *line geometry*.—**Symbolic geometry,** geometry developed by the use of a symbolic language or calculus of symbols.

geomorphic (jē′ō-môr-fik), *a.* [Gr. *γῆ*, the earth, + *μορφή*, form.] Of or relating to the figure of the earth or to the study of land-forms.

I doubt if any careful *geomorphic* geologist familiar with all the phenomena involved would seriously consider an estimate that made it much more than one half at the most; so that it would apparently not be straining the evidence to take 40,000 years as a rude measure of the time since the beginning of the retreat [of the Wisconsin ice-sheet] from the outermost moraine of the Wisconsin stage.
T. C. Chamberlin, in Jour. of Geol., Oct.–Nov., 1899, p. 680.

geomorphist (jē′ō-môr-fist), *n.* [Gr. *γῆ*, the earth, + *μορφή*, form, + *-ist*.] Same as ★*geomorphogenist*.

The climatologist who studies the physical conditions of the atmosphere for their own sake . . . the *geomorphist* who is satisfied with the study of land forms as a finality . . . these specialists may all be eminent in their own lines, but they fall short of being geographers.
Amer. Geol., March, 1904, p. 174.

geomorphogenic (jē″ō-môr-fō-jen′ik), *a.* Of or pertaining to geomorphogeny or the study of the development of land forms.

geomorphogenist (jē″ō-môr-foj′e-nist), *n.* A specialist in the investigation of the development of earth-forms; a physiographer.

The survey reports have not, as a rule, been prepared by persons whose training and interests were primarily geographical, and very few of the *geomorphogenists* have carried their new science forward into a geographical relation; they have usually stopped with the physical aspects of the subject, and left the organic aspects with scanty consideration. *Amer. Geol.*, March, 1904, p. 159.

geomorphogeny (jē″ō-môr-foj′e-ni), *n.* [Gr. *γῆ*, the earth, + *μορφή*, form, + *-γενεια*, ⟨ *-γενης*, -produced.] In *geol.*, the study of the origin of the surface features of the earth.

The French geologist Élie de Beaumont, whose theory of *geomorphogeny* was stated at length in his 'Notice sur les systèmes de montagnes' (3 vols.: Paris, 1852). This famous theory was based on a correlation of the mountain chains by means of their orientation.
Geog. Jour. (R. G. S.), XIII. 235.

geomorphological (jē″ō-môr-fō-loj′i-kal), *a.* Of or relating to geomorphology. See ★*geomorphology*. *Geog. Jour.* (R. G. S.), IX. 666.

geomorphology (jē″ō-môr-fol′ō-ji), *n.* [Gr. *γῆ*, the earth, + E. *morphology*.] The morphology of the earth; the study of the form of the earth's surface features and of their origin.

The first volume of Suess' great work on *Geomorphology* was published in 1885, and at once took the leading place as the greatest contribution ever offered by geology to geography. *Geog. Jour.* (R. G. S.), XI. 440.

geomorphy, *n.* 2. The science of land forms.

The survey reports of our various states and territories contain a great fund of geographical mattter, and some of the members of these surveys have carried the physical geography of the lands so far forward as to develop it into a new science, to which a name, *geomorphy* or geomorphogeny, has been given. *Science*, Jan. 22, 1904, p. 123.

geonomic, *n.* 2. Pertaining to the earth: contrasted with *astronomical* or pertaining to the heavenly bodies.

geonomical (jē-ō-nom′i-kal), *a.* Same as *geonomic*. *Smithsonian Rep.*, 1903, p. 375.

Geophagus (jē-of′a-gus), *n.* [NL., ⟨ Gr. *γῆ*, earth, + *φαγειν*, eat.] A genus of cichlid fishes found in the rivers of Brazil.

geophilous, *a.* 2. In *bot.* (*a*) Terrestrial; growing or rooting in the ground. (*b*) In *phytogeog.*, growing on the ground or on decaying vegetable matter: applied by Pound and Clements to a class of fungi. (*c*) Fruiting underground.

Geophysical laboratory, an institution devoted to the observation and study of the physical relations of the earth, especially its meteorology, tides, magnetism, gravitation, temperature, earthquakes, and volcanoes.

geophysicist (jē-ō-fiz′i-sist), *n.* [*geophysics* + *-ist*.] A student of geophysics; one who

studies the relations between the features of the earth and the laws of physics. *Amer. Jour. Sci.*, Dec., 1903, p. 402.

geophysiognomy (jē″ō-fiz-i-og′nō-mi), *n.* The physical features of the face of the earth.

geophyte (jē′ō-fīt), *n.* **1.** A plant which produces underground buds that do not develop there. *Areschoug.*—**2.** A terrestrial plant.

geopolar (jē-ō-pō′lär), *a.* [Gr. *γῆ*, the earth, + E. *polar*.] Related to the pole of the earth: opposed to *heliopolar*, which refers to the pole of the sun's rotation.

In discussing the direction of the variation, two systems of coordinates are used: First, the '*geopolar*,' given by the hour-angle and latitude of the point where the direction at any hour cuts the Earth's surface; and second, the 'heliopolar,' in terms of the angle with the Sun's direction (heliopolar distance), and the angle which the plane through the direction at any hour and the Sun makes with the equator. *Science*, Feb. 7, 1902, p. 223.

geopolitical (jē″ō-pō-lit′i-kal), *a.* [Gr. *γῆ*, earth, + E. *political*.] Relating to politics as affected by geographical relations.

The border-nations . . . the Hebrews, Phœnicians, Hellenes. . . . Had Geography not aided them by *geo-political* advantages of situation, they would at once have been swallowed up by the empires. Had they not developed Intellect, their *geo-political* situation could not have availed them very long.

Emil Reich, in Contemporary Rev., April, 1905, p. 505.

geopony (jē-op′ō-ni), *n.* [Gr. *γεωπονία*, ⟨ *γεωπόνος*, a tiller of the earth: see *geoponic*.] Agriculture; geoponics; farming.

georetic (jē-ō-ret′ik), *a.* [Gr. *γῆ*, earth, + *ῥητ(ίνη)*, resin, + *-ic*.] Noting a colorless crystalline waxy acid, $C_{12}H_{22}O_4$, obtained from lignite from the neighborhood of Weissenfels in Saxony.

Georgian architecture. See ★*architecture*.

georgical (jôr′ji-kal), *a.* Same as *georgic*.

georgino (jôr-jē′nō), *n.* [It.] A silver Genoese coin of the eighteenth century bearing the device of St. George on horseback.

georyssid (jē-ō-ris′id), *n.* and *a.* **I.** *n.* A member of the coleopterous family *Georyssidæ*.

II. *a.* Of or belonging to the family *Georyssidæ*.

Geoscolecidæ (jē-ō-skō-les′i-dē), *n. pl.* [NL., ⟨ *Geoscolex* (*-lec-*) + *-idæ*.] A family of terricolous annelids, mainly tropical. There are eight setæ in a segment; the clitellum is usually saddle-shaped and is often furnished with modified setæ; the nephridia are paired with rarely more than one pair in a segment; the male pores are generally within the clitellum; and the spermathecæ are without diverticula. The typical genus is *Geoscolex*.

Geoscolex (jē-ō-skō′leks), *n.* [NL., ⟨ Gr. *γῆ*, earth, + *σκώληξ*, a worm.] The typical genus of the family *Geoscolecidæ*. *Leuckart*.

geosote (jē′ō-sōt), *n.* The valeric acid ester of guaiacol, $C_6H_4 \langle \begin{matrix} O.CH_3 \\ O.C_5H_9O \end{matrix}$, an oily liquid used internally in tuberculosis. *Buck*, Med. Handbook, IV. 425.

geosphere (jē′ō-sfēr), *n.* [Gr. *γῆ*, earth, + *σφαῖρα*, sphere.] **1.** The atmosphere of the earth as distinguished from that of other planets.—**2.** One of the concentric, spheroidal shells of which the earth may be conceived to consist. Four are usually postulated, from without inward, the atmosphere, the hydrosphere, the lithosphere, and the centrosphere or barysphere. The sphere capable of supporting life and embracing portions of the outer three is called the *biosphere*.

When we regard our globe with the mind's eye, it appears to be formed of concentric spheres, very like, still very unlike, the successive coats of an onion. Within is situated the vast nucleus or centrosphere; surrounding this is what may be called the tektosphere [*τηκτος*, molten], a shell of materials in a state bordering on fusion, upon which rests and creeps the lithosphere. Then follow hydrosphere and atmosphere, with the included biosphere. To the interaction of these six *geospheres* through energy derived from internal and external sources, may be referred all the existing superficial phenomena of the planet.

Sir John Murray, in Geog. Jour. (R. G. S.), XIV. 435.

geosynclinal, *n.* **II.** *a.* Having the characters of a geosyncline.

geosyncline (jē-ō-sin′klīn), *n.* [As *geosynclin(al)*.] In *geol.*, a considerable tract in which the strata are bent into a great trough with many minor undulations on the flanks. *Dana*, Manual of Geol., p. 106.

geotactic (jē-ō-tak′tik), *a.* [*geotaxis* (*-tact-*) + *-ic*.] Of or pertaining to the locomotion of organisms or of cells in relation to the direction of the earth; exhibiting geotaxis.

geotaxis (jē-ō-tak′sis), *n.* [NL., ⟨ Gr. *γῆ*, earth, + *τάξις*, disposition.] The orientation or locomotion of cells or of organisms in relation to the direction of the earth (or to gravity). For example, "cockroaches seem to be stimulated by gravity when this acts perpendicularly to their ventral surface, so that they tend to move off from a horizontal surface and do not come to rest until they are on a more or less nearly vertical one." *C. B. Davenport*, Exper. Morphol., p. 118.

geotherm (jē′ō-thėrm), *n.* Same as ★*geothermal*, II.

geothermal (jē-ō-thėr′mal), *a.* and *n.* **I.** *a.* Geothermic.

II. *n.* A line connecting places having the same temperature at a given depth below the earth's surface.

Geothermic degree. See ★*degree*.

geothermometric (jē″ō-thėr-mō-met′rik), *a.* [Gr. *γῆ*, earth, + E. *thermometric*.] Pertaining to the measurement and distribution of earth-temperature.

geotropically (jē-ō-trop′i-kal-i), *adv.* In a geotropic manner or direction.

geotropism, *n.*—**Negative geotropism,** the reverse of *positive geotropism*; most stems show this tendency. Also *apogeotropism*.—**Positive geotropism,** growth, in response to the action of gravity, in a vertical direction toward the center of the earth; most roots show this tendency.

Gephyroceras (jef-i-ros′e-ras), *n.* [Gr. *γέφυρα*, bridge, + *κέρας*, horn.] A genus of ammonoid cephalopods or goniatites, with compressed whorls and but slightly progressed sutures: characteristic of the later Devonian faunas.

Gerablattina (ger″a-bla-tī′nä), *n.* [NL., ⟨ Gr. *γῆρας*, old age, + NL. *Blattina*, a genus of cockroaches.] A genus of Paleozoic cockroaches.

geranial[2] (jē-rā′ni-al), *n.* [*geranium* + *-al*[3].] A colorless, oily aldehyde, $(CH_3)_2C:CH.CH_2.CH_2.C(CH_3):CH.CHO$, one of the chief constituents of lemon-grass oil and of the oil of citrus fruits. It is formed by the oxidation of geraniol and is employed to adulterate rose-oil. It is used in the preparation of ionone, the artificial oil of violets. Also called *citral* and 2,6-*dimethyl*- 2,6-*octadienal*-8.

Geraniales (jē-rā-ni-ā′lēz), *n. pl.* [NL. (Lindley, 1833), ⟨ *Geranium* + *-ales*.] A large order of dicotyledonous, chiefly choripetalous, plants, characterized by flowers with distinct petals and sepals, the stamens usually as many as the sepals and opposite them, and a superior compound ovary. The order embraces 20 families, of which the most important are the *Geraniaceæ*, *Oxalidaceæ*, *Linaceæ*, *Rutaceæ*, *Balsameaceæ*, and *Euphorbiaceæ*.

geranic (jē-ran′ik), *a.* [*geran-ial* + *-ic*.] Derived from geranial.—**Geranic acid,** a colorless, liquid acid, $C_{10}H_{16}O_2$, formed by the oxidation of geranial.

geraniene (jē-rā′ni-ēn), *n.* [*gerani-ol* + *-ene*.] A colorless liquid, $C_{10}H_{16}$, prepared by the dehydration of geraniol. It boils at 162–164° C. and has an odor of fresh carrot.

geraniin (jē-rā′ni-in), *n.* [*Geranium* + *-in*[2].] An amorphous bitter principle of undetermined composition contained in the rhizome of *Geranium maculatum*. Also *geranin*.

geranine (jer′a-nin), *n.* [*geran-ium* + *-ine*[2].] A direct coal-tar color. It dyes unmordanted cotton red in a salt bath.

geraniol (jē-rā′ni-ōl), *n.* [*gerani-um* + *-ol*.] A colorless liquid, $(CH_3)_2.C:CH.CH_2.CH_2C(CH_3):CH.CH_2OH$, with an odor of roses. It is isomeric with borneol camphor, and is found in German and Turkish oil of roses, in geranium oils, and in various citronella and eucalyptus oils. It boils at 115–120° C. under 15 mm. pressure, is the alcohol of geranial, and is also called *rhodinol* and 2,6-*dimethyl*-2,6-*octadienol*-8.

geranium, *n.* **5.** An impure magenta which contains phosphene.—**Geranium-oil.** See ★*oil*.—**Ivy-leaved geranium,** *Pelargonium peltatum*, an old-fashioned window and conservatory plant with three-lobed ivy-like leaves, mostly pinkish or purplish flowers, and a decumbent or trailing habit of growth. It is much used for hanging-baskets and lawn-vases. The cultivated forms are mostly much varied by domestication and perhaps by hybridization.—**Rock geranium,** a plant of the genus *Heuchera*; alum-root. The species are rock-loving plants with geranium-like leaves and with an astringent root like that of *Geranium maculatum*. See *alum-root* and *Heuchera*, with cut.—**Spotted geranium,** the spotted crane's-bill, *Geranium maculatum*: the name refers, as does also the specific name, to the spotted or blotched mature leaves.—**Wild geranium,** any uncultivated species of *Geranium* or crane's-bill. In the eastern United States most often the spotted geranium, *G. maculatum*. Very widely diffused and common is the rather weedy *G. Carolinianum*, Carolina crane's-bill, with inconspicuous whitish flowers. Another wild geranium is *G. viscosissimum*, ranging from Saskatchewan to California, wrongly suspected of poisoning stock.

geranyl-acetate (jer′a-nil-as″e-tāt), *n.* [*geran(ium)* + *-yl*.] A liquid, $C_{10}H_{17}C_2H_3O_2$, derived from geraniol by the action of acetic anhydrid and also obtained from certain eucalyptus oils. It boils at 242–245° C.

geratic (ge-rat′ik), *a.* [Gr. *γῆρας* (later stem *γηρατ-*), age, + *-ic*.] Relating to old age; decadent.

gerenuk (ge-re-nök′), *n.* [E. African.] The native name, adopted as a book-name, for Waller's gazelle, *Lithocranius walleri*, an excessively long-necked species found in East Africa.

Gergonne point of a triangle. See ★*triangle*.

Germ variation. See ★*variation*.

German chest, furnace. See ★*chest*[1], ★*furnace*.—**German horizontal plane, Protestant, sesame-oil, standard candle.** See ★*plane*[1], ★*Protestant*, etc.

germander, *n.*—**American germander,** *Teucrium Canadense*. See *Teucrium* (with cut).—**Garlic germander,** the water-germander, *Teucrium Scordium*. Called also *English treacle*. See *Teucrium*.—**Germander chickweed, speedwell.** See ★*chickweed, speedwell*.—**Madeira germander,** *Teucrium betonicum*, native in Madeira. Called also *Madeira betony*. See *Teucrium*.—**Poly germander.** Same as *poly*.—**Tree-germander,** *Teucrium fruticans*. See *tree-germander* and *Teucrium*.—**Wall germander,** *Teucrium Chamædrys*. See *germander* and *Teucrium*.—**Wild germander.** (*b*) The wall germander. (*c*) Same as *wood* ★*germander*.—**Wood germander,** *Teucrium Scorodonia*, also known as *wood-sage* (which see, under *sage*[2]). See also *Teucrium*.

Germania[1] (jer-mā′ni-ä), *n.* [L.] Germany personified.

germania[2] (her-mā-nē′ä), *n.* [Sp. *germanía*, *hermanía*, lit. 'fraternity,' ⟨ *germano*, *hermano*, brother: see *german*[1].] Gipsy-language; thieves' cant; jargon; gibberish.

germanium, *n.* The discovery of this chemical element in 1885 constituted the third verification of Mendelejeff's prediction that elements, unknown when his periodic law was pointed out, would later be discovered having approximately certain atomic weights and certain properties which he indicated. Germanium has been found in argyrodite from Saxony and also in minerals from Bolivia.

Germanize, *v.* **II.** *intrans.* To become German in habits, feelings, sympathies, tastes, etc.

Germanomania (jėr″ma-nō-mā′ni-ä), *n.* [L. *Germanus*, German, + Gr. *μανία*, madness.] A mania or marked predilection for things German; a pronounced fondness for Germans and German ways.

Germanomaniac (jėr″ma-nō-mā′ni-ak), *n.* One who carries to excess his fondness for German things and ways.

Germanophilist (jėr-ma-nof′il-ist), *n.* [L. *Germanus*, German, + Gr. *φίλος*, loving, + *-ist*.] One, not a German, who is friendly to Germany and the Germans, their institutions, aims, ways, etc.

Whether you believe in Diez as an oracle, as some *Germanophilists* do, or doubt him, . . . everyone dealing with Romance etymologies, must at least see what he says. *The Reader*, June 11, 1864, p. 744.

Germanophobe (jėr′ma-nō-fōb), *n.* [L. *Germanus*, German, + Gr. *φόβος*, ⟨ *φοβεῖν*, fear.] One who fears, distrusts, or dislikes Germany and the Germans.

"About this time," as the old almanacs used to say, "look out for storms." These will be raised by the extreme *Germanophobes* of England over the news given in "The Standard" of London on Monday and reported by our London correspondent in his cable dispatches of the same day. *N. Y. Tribune*, April 15, 1903.

Germanophobia (jėr″ma-nō-fō′bi-ä), *n.* [NL., ⟨ L. *Germanus*, German, + Gr. *-φόβια*, ⟨ *φοβεῖν*, fear.] Morbid dread or distrust of Germany and her policy; unreasonable dislike of German ways or things.

Germanophobic (jėr″ma-nō-fō′bik), *a.* Of, pertaining to, or characteristic of Germanophobists or Germanophobia.

Germanophobist (jėr″ma-nō-fō′bist), *n.* One who hates or distrusts Germany.

germantown (jėr′man-toun), *n.* [*Germantown*, a suburb of Philadelphia.] A carryall with a standing top, first built at Germantown, Pennsylvania, in 1816: the first vehicle of the class known as a *rockaway*.

germ-ball (jėrm′bâl), *n.* In trematodes, as a larval *Distomum*, one of the more or less spherical masses of cells of different sizes out of which a redia is formed, the latter in its turn containing a new generation of germ-balls. See *cercaria* and *redia*.

germ-band (jerm′band), *n.* See ★*band*[2].

germ-case (jėrm′kās), *n.* A case or sac inclosing germs or reproductive cells.

germ-cell, *n.* **3.** In *biol.*, a reproductive cell; an ovum or spermatozoön: opposed to *body cell*, or *somatic cell*.

germigene (jėr′mi-jēn), *n.* [L. *germen*, a germ, + Gr. *-γενής*, -producing.] A germarium, especially of cestode and trematode worms. *Syd. Soc. Lex.*

germigenous (jėr-mij′e-nus), *a.* [L. *germen*, germ, + Gr. *-γενής*, -producing, + *-ous*.] Producing germs: as, a *germigenous* gland.

germin, *v.* See *germine, v.*

germinability (jėr″mi-nạ-bil′i̱-ti), *n.* Capacity of germinating; viability.

The experiments were too limited in number to warrant any conclusion concerning the difference, if any, in the *germinability* of the heavy and light seed, either as to the time the sprouts appeared or the number produced.
Yearbook, U. S. Dept. Agr., 1896, p. 322.

germinable (jėr′mi-nạ-bl), *a.* Capable of germinating or proliferating; viable.

It being taken for granted that the selection shall be made only from sound, pure, and *germinable* stock.
Yearbook, U. S. Dept. Agr., 1896, p. 306.

Germinal area, a part of a germ-cell supposed to be set apart, before development begins, for the formation of a specific part of the future organism. See ★*germinal localization.*—**Germinal cell.** See ★*cell.*—**Germinal continuity.** (*a*) The established fact that since a germ-cell arises by a process of division which multiplies but does not interrupt the continuity of the preëxisting cell, and since the new organism arises in the same way, there is not and has not been any break in the continuity of the organic world. (*b*) The doctrine that the fertilized egg, when it begins its development, soon divides into a somatic portion (destined to produce the cells of the body, which are supposed to be out of the line of descent to later generations and unable to produce germ-cells) and a germinal portion which gives rise to cells, some of which, sooner or later, give rise to the sexual cells in the body of the organism which arises from the egg, so that inheritance is always from germ-cell to germ-cell, without the intervention of somatic cells. See ★*somatic cell,* ★*germ-cell.* (*c*) The doctrine that the line of connection between the fertilized egg and the germ-cells of the organism that is produced from the egg is not through the continuity of cells, but through continuity of the hereditary substance or germ-plasm which is transmitted from the egg along certain lines of somatic cells, or germinal paths, to the place or places where the reproductive organs or germ-cells of the new organism are to be formed. According to this opinion the somatic cells are, as such, out of line of descent to future generations, and the germ-plasm which some of them are supposed to contain and transmit is of the nature of a foreign body. See *substance of* ★*heredity,* ★*germ-plasm.*—**Germinal groove.** See ★*groove.*—**Germinal layer.** Same as *germ-layer;* one of the three layers, ectoderm, mesoderm, or entoderm, from which the embryo develops.—**Germinal localization,** the supposed localization in an egg, either after or before fertilization, of the regions that are to give rise to the parts of the body of the organism that is to arise from the egg.

On one view it is supposed that the germ-cell has an architectural organization predetermined before development begins, and that development is in part a "histogenetic sundering" of the pre-existing *germinal localization.*
Encyc. Brit., XXXII. 212.

Germinal matter, actively living matter. Same as *protoplasm.* Beale, 1861.—**Germinal path,** the series of cells which intervenes between the fertilized egg and the germ-cells of the organism that arises from the egg. See ★*germinal continuity.*—**Germinal selection.** See ★*selection.*

germinater (jėr′mi-nā-tėr), *n.* That which causes or induces germination; specifically, an appliance for testing the vitality of seeds. See ★*germinating-chamber.*

germinating-chamber (jėr′mi-nā-ting-chām″bėr), *n.* A box devised to furnish, artificially, conditions of temperature, moisture, and light which are favorable to the germination of seeds for the purpose of testing their vitality by samples. A 'standard germinating-chamber,' adopted by the American experiment stations and the United States Department of Agriculture, is made with double copper walls forming a water-jacket, a side door, trays for the seeds, etc.

germiparity (jėr-mi-par′i̱-ti), *n.* [*germipar-ous* + *-ity.*] Reproduction by means of germs or germ-cells.

germiparous (jer-mip′ạ-rus), *a.* [Irreg. < L. *germ(en),* a germ, + *parere,* bring forth, bear. The formation would prop. mean 'producing germs.'] 1. Bearing or producing germs.—2. Reproducing by means of germ-cells or germs.

germ-mass (jėrm′mȧs), *n.* A mass or aggregation of cells which will develop into the whole or some portion of the embryo.

Germo (jėr′mō), *n.* [NL., < F. *germon,* a popular name of the dolphin and the albacore.] A genus of scombroid fishes, including the long-finned albacore, *Germo alalunga,* a large fish with remarkably long ribbon-shaped pectoral fin, widely distributed in the open seas in warm regions.

germogen (jėr′mō-jen), *n.* [L. *germ(en),* germ, + Gr. *-γενης,* producing.] A syncytium or nucleated mass of protoplasm from which the reproductive or germ-cells arise. The germogen is clearly seen in the ovaries of insects.

germ-plasm (jėrm′plazm), *n.* Same as *germ-plasma.*—**Accessory germ-plasm,** the germ-plasm to which, according to Weismann, the formation of new organisms by budding is due. In order to account for the origin from a bud (which at first is part of the body of the organism which produces it) of a new organism which may come, in time, to exhibit the characteristics of the species, to produce germ-cells, and to propagate its kind, Weismann propounds a supplementary hypothesis according to which somatic cells that are predestined to produce new beings from buds receive germ-plasm from the egg in addition to their proper idioplasm. Since begonias and sea-anemones and many other plants and animals may produce new and perfect representatives of their species from any part of their bodies, it has seemed to many naturalists that this subsidiary hypothesis is, in effect, the abandonment by Weismann of the whole doctrine of germ-plasm (see below), which is based upon the opinion that germ-cells and body-cells are fundamentally and completely different.—**Blastogenic germ-plasm,** the germ-plasm by means of which a new organism is held, by Weismann, to be produced from a bud.—**Doctrine of germ-plasm,** the theory of Weismann concerning the intimate structure of germ-plasm (or ancestral idioplasm, or the substance of inheritance), according to which it is regarded as made up of innumerable biophores, each of which is the bearer of one of the hereditary qualities of the species; these are joined in groups, or determinants, each of which is the bearer of the hereditary qualities of a cell; the determinants are again compounded into ids, which are the bearers of the hereditary qualities of an organism and are identified by Weismann with the chromatin granules or microsomata; the ids are again compounded into idants, each of which is the bearer of a number of possibilities of individual development. The idants are identified with the chromosomes or rods or loops of chromatin. The germ-plasm or ancestral idioplasm alone is supposed to contain all the biophores and determinants of the species, while each somatic cell contains those only that pertain to it and to the cells that it is destined to produce during the development and growth of the individual organism. Individual development is held to be accompanied by, and to consist in, the disintegration of an id by differential cell-division, until finally only one determinant remains to each cell, there breaking up into the biophores which give to the cell its inherited characteristics. While development is going on, the series of cells which are to give rise to new germ-cells is formed and endowed, in addition to its own idioplasm, with ancestral germ-plasm which it transports to the place where the new germ-cells are to arise. This attempt to account for inheritance by the hypothetic architecture of an ideal substance of inheritance has a conspicuous place in biologic literature and many disciples, although it rests, like many similar attempts, upon the uncritical acceptance of the notion of a substance, or thing in itself, as a bearer of qualities. We cannot account for the dog's head by saying that it is supported by a dog, nor can we hope to account for the origin of the dog piecemeal, because dogs have no piecemeal existence. See *substance of* ★*heredity* and ★*Weismannism.*—**Reserve germ-plasm.** See *accessory* ★*germ-plasm.*—**Sporogenic germ-plasm,** the germ-plasm to which the development of a new organism from a spore, as contrasted with an egg, is due, according to Weismann.

germ-polyp (jėrm′pol″ip), *n.* A polyp produced by budding.

germ-region (jėrm′rē″jọn), *n.* A region of the fertilized egg definitely set apart for the construction of a specific part of the future organism.

But, from the standpoint of casual morphology, it must be asked what determines the arrangement of the different *germ-regions* in the ovum.
J. Loeb, Biol. Lectures, 1894, p. 49.

germ-sac (jėrm′sak), *n.* Same as ★*germ-case.*

germ-spot (jėrm′spot), *n.* The nucleolus of the germinal vesicle, or nucleus of the unfertilized egg; the germinal spot.

germ-stage (jėrm′stāj), *n.* A stage in the early development of an organism; the state of being a germ.

germ-tract (jėrm′trakt), *n.* The series of cells which constitute the direct line of descent or cell-lineage from the original egg through the developing germ-cells of the embryo to the mature germ-cell that will give rise to another organism. *Weismann.*

germ-yolk (jėrm′yōk), *n.* In *embryol.,* the portion of the yolk which is assimilated by the cells that go to form the ★germ-mass (which see): opposed to the *food-yolk,* which is absorbed by the older embryo or young animal. *Owen,* 1855.

geromarasmus (ger″ọ-ma-raz′mus), *n.* [NL., < Gr. *γῆρας,* old age, + *μαρασμός,* wasting.] Atrophy of all the tissues due to old age.

geromorphism (ger-ọ-môr′fizm), *n.* [Gr. *γῆρας,* old age, + *μορφή,* form, + *-ism.*] Presence in a young or middle-aged person of the characteristics of old age; premature senility.

Geronomite (je-ron′ọ-mīt), *n.* [Sp. It. *geronomita* (ML. *Hieronymita*), < *Geronomo,* < LL. *Hieronymus,* Jerome.] A member of the monastic community which took St. Jerome as its patron saint.

gerontarchical (ger-on-tär′ki-kạl), *a.* [**gerontarchy* (< Gr. *γέρων* (*γεροντ-*), an old man, + *ἀρχή,* rule) + *-ical.*] Of or pertaining to government by old men; establishing or setting up government by old men. See *gerontocracy.*

gerontastic (ger-on-tas′tik), *a.* [*gerontast-y* + *-ic.*] In *paleon.,* having the properties of or belonging to senile age in the development of a colony.

gerontasty (ger-on-tas′ti), *n.* [Gr. *γέρων* (*γεροντ-*), an old man, + *ἅστυ,* a city.] In *paleon.,* a senile colony (as of corals or graptolites).

gerontatrophy (ger-on-tat′rọ-fi), *n.* [Gr. *γέρων* (*γεροντ-*), an old man, + *ἀτροφία,* atrophy.] Same as ★*geromarasmus.*

gerontic (ge-ron′tik), *a.* [Gr. *γεροντικός,* < *γέρων* (*γέροντ-*), an old man.] Having the characters of old age or senility: specially applied to one of the stages in the growth and decline of the individual, bearing characteristics peculiar to itself, but reproducing in part those of the infantile stage.

There are in some groups, especially among parasites, adaptive stages of a retrogressive nature that are not in any sense *gerontic. A. Hyatt,* Biol. Lectures, 1899, p. 135.

gerontine (ge-ron′tin), *n.* [Gr. *γέρων* (*γεροντ-*), an old man, + *-ine*[2].] A colorless, crystalline base, $C_5H_{14}N_2$, obtained from the liver and kidneys, especially from those of old dogs. It is isomeric with cadaverine, which it resembles.

gerontism (ge-ron′tizm), *n.* [*geront(ic)* + *-ism.*] Senility or old age considered as a stage in the normal life-history of organisms.

Gerontism, or old age, is marked in its earlier stages in gastropod shells by the disappearance of features characterizing the adult. *Amer. Nat.,* Dec., 1902, p. 937.

gerousia (ge-rō′si-ạ), *n.* [Gr. *γερουσία,* < *γέρων* (*γεροντ-*) an old man; connected with *γῆρας,* old age.] In *Gr. antiq.,* a council of old men; a senate: especially applied to the senate of Sparta, which was composed of 28 members, to which the two kings were added. Its functions were similar to those of the Athenian boule. See *boule*[2].

gerundial, *a.*—**Gerundial infinitive,** an infinitive which has the nature of a gerund or verbal noun.

Gervillia (jėr-vil′i-ạ), *n.* [NL., < *Gerville,* a commune in France.] A genus of prionodesmaceous pelecypods allied to *Perna* and bearing a multivincular ligament and elongated shell: very generally distributed through rocks of Mesozoic age and continuing into the lower Tertiary.

gess, *v.* and *n.* A simplified spelling of *guess.*

gest, *n.* and *v.* A simplified spelling of *guest.*

gestate (jes′tāt), *v. t.*; pret. and pp. *gestated,* ppr. *gestating.* [L. *gestare* (pp. *gestatus*): see *gestation.*] To carry in the womb during the natural period of fetal development; hence, figuratively, to form and gradually mature (some project) in the mind, to be brought forth in due time.

gestation, *n.*—**Abdominal gestation.** See ★*abdominal.*—**Ectopic gestation.** Same as *extra-uterine pregnancy* (which see, under *pregnancy*).—**Mural gestation** or **pregnancy,** a condition in which the ovum has been arrested and its development is taking place in the part of the Fallopian tube which passes through the wall of the uterus.—**Tubal gestation.** Same as *tubal pregnancy.*

gestative (jes′tā-tiv), *a.* [NL. **gestativus,* < L. *gestare,* gestate.] Of or pertaining to gestation: as, the *gestative* process.

gesticulant (jes-tik′ū-lạnt), *a.* [L. *gesticulans,* ppr. of *gesticulari,* gesticulate.] Gesticulating. *Ruskin.*

gesticulative (jes-tik′ū-lā-tiv), *a.* [*gesticulate* + *-ive.*] Characterized by or accompanied with gesticulations.

Diodorus Siculus says that they [the Gauls] . . . drank with such violent eagerness as either to stupefy themselves to sleep or enrage themselves to madness. He also calls them "extravagantly avaricious" and testifies to their disorderly and *gesticulative* fits of rage.
Farrar, St. Paul, I. 474, note.

gesundheit (ge-sönt′hīt), *n.* [G., < *gesund,* sound in health, + *-heit,* E. *-hood.*] Health.—**Zur gesundheit,** 'to your health,' a good wish addressed by Germans to one who has just sneezed.

get[1], *v.* **I.** *trans.*—**To get a pair of spectacles,** in *cricket,* to fail to score in both innings of a match.—**To get it,** to 'catch it'; come in for: as, he *got it* when he was caught. [Colloq.]

II. *intrans.* **To get about.** (*a*) To become known; leak out. (*b*) To be about again as after an illness or period of confinement to the house.—**To get away with,** to succeed in carrying off; make away with.—**To get back,** to return.—**To get clear,** to regain one's freedom; become free from entanglements; be absolved.—**To get forward,** to make progress; advance.—**To get left,** to be disappointed; fail. [Slang.]—**To get loose,** to become disentangled; succeed in freeing one's self.—**To get on.** (*c*) In *racing,* to stake money on (a horse).—**To get on to,** to become aware of; 'catch on'; understand. [Slang.]—**To get out.** (*c*) In *racing,* to escape loss by backing the horse against which one had already bet.—**To get up.** (*d*) In *cricket,* of the ball or the bowler, to rise off the pitch higher than usual; to bump.

get[1], *n.* **3.** In *coal-mining,* the output of a mine during a stated season or period.—**4.** Gain; wages; specifically, a blacksmith's wages under the Crowley system. [Prov.]

get[4] (get), *n.* [Aram. *get.*] A bill of divorce among the Jews. Like the ketuba, or marriage contract, this document is drawn up in the Aramaic language, uniformly worded and carefully written by a proper scribe. The orthodox form must contain twelve full and equal lines (neither more nor less) to agree with the nu-

merical value, in Hebrew of the letters G T. After certain preliminary ceremonies and questionings by the rabbi, particularly as to whether both parties agree to the divorce, the husband hands the get to his wife in the presence of ten witnesses. In the get is contained the date, the names and surnames of husband and wife and of their fathers, and also the name of the city, and its location (whether near a river or sea). After the first lines containing the date, it runs: . . . "I, N, son of N, of the city of N, situated on the river N, set thee free, my wife N, daughter of N, of the city of N, et cetera. Thou art set free and art at liberty to marry any man whom thou mayst choose. This document from me is a letter of divorcement and liberty according to the law of Moses and Israel."

geta (gā′tä), *n.* [Jap.] Wooden clogs worn out of doors by the Japanese.

getatability (get-at″a-bil′i-ti), *n.* The quality of being getatable or attainable; accessibility. [Colloq.]

getatable (get-at′a-bl), *a.* Accessible; that may be reached or attained; attainable. [Colloq.]

gey, *a.* See *gay*[1], 7.

geyser, *n.* 2. A gas-burning apparatus attached to a bath for the purpose of heating water for the bath.

The victim in this case, a young man, was asphyxiated in his bath by the CO-containing fumes escaping from a badly constructed and unventilated "*geyser.*"

Nature, June 2, 1904, p. 119.

geyserine (gī′sėr-in), *a.* [*geyser* + *-ine*[1].] Of or pertaining to geysers; originating through the agency of heated waters, as geyserite. *Smithsonian Rep.*, 1899, p. 359.

Geyserite terrace. See ★ *terrace*[1].

g. gr. An abbreviation of *great gross.*

ghaffir (ghä-fēr′), *n.* [Ar. *ghafīr* or *hafīr.*] A native Egyptian policeman. [Anglo-Egyptian.]

gharial, *n.* See *gharrial.*

ghazi (gä′zē″), *n.* [Ar. *ghāzī.*] Among Mohammedans, a warrior, especially one who has been victorious over infidels; a popular 'hero.'

ghee, *n.* 2. The solid fat obtained from the seeds of *Madhuca butyracea*, a tree found in northern India. It is used as a food, and also for an ointment, and in making soap and candles.

gherkin, *n.*—**Bur gherkin,** the small, oval, spiny fruit of *Cucumis Anguria*, an annual cucurbitaceous vine distributed from the southern United States to the West Indies and Central and South America. It is used as a substitute for the common cucumber, especially in pickles. Called also *West Indian gherkin, Jamaica cucumber,* and *gooseberry-gourd.*—**West Indian gherkin.** Same as *bur* ★*gherkin.*

ghoom (göm), *v. i.* To search for big game by wandering alone after dark in a haunt of the animal. [India.]

Then Capt. G. tells about "*ghooming*" for bears. "*Ghooming*" (expressive word!) is, it appears, wandering around alone in the dark, and must be a queerish sport. However, after a night spent in this fashion, (and a bear slain,) you read how the Captain trailed back to his camp and fell asleep.

N. Y. Times, Sat. Rev., Aug. 12, 1905, p. 527.

ghost, *n.* 9. One who does literary, legal, or artistic work for another, who gets all the credit; one who 'devils' for another.—**10.** A false line in a diffraction-spectrum caused by certain periodic irregularities in the ruling of the grating which produces the spectrum. Ghosts usually occur in pairs accompanying a conspicuous line on each side of it and near it. See *grating.*

11. A red blood-corpuscle from which the red coloring-matter or hemoglobin has escaped.

Whether this increase of permeability persists when the corpuscles have been reduced to *ghosts* by the escape of the hæmoglobin I am unable to say.

Jour. Exper. Med., March 17, 1902, p. 267.

Ghost ophthalmoscope. See ★*ophthalmoscope.*

ghost-candle (gōst′kan″dl), *n.* A candle which is kept burning in a death-chamber for the purpose of frightening away ghosts.

ghost-dance (gōst′dans), *n.* A ceremonial of a number of North American tribes, of recent origin, and developed from the Messianic doctrines of Indian prophets who prophesied the return of the dead and the extinction of the whites. These religious ideas and the related rites originated in Utah and spread as far east as the Mississippi river. They were most potent about the year 1890.

ghost-demon (gōst′dē″mon), *n.* In folk-lore, a ghost that has become a demon.

We may trace up from the psychology of the lower races the familiar ancient and modern European tales of baleful *ghost-demons.*

E. B. Tylor, Primitive Culture, II. 113.

ghost-flower (gōst′flou′ėr), *n.* The Indian-pipe: so called with reference to the whiteness of the whole plant. Also called *corpse-plant* and *ice-plant.* See *Monotropa.*

ghost-food (gōst′fōd), *n.* Food offered to the ghosts of the dead.

ghost-god (gōst′god), *n.* A ghost-demon that is worshiped as a god.

ghosthood (gōst′hud), *n.* The state of being a ghost.

ghosty (gōs′ti), *a.* [*ghost* + *-y*[1].] Like or of the nature of a ghost: as, a *ghosty* story; a *ghosty* moon.

ghoulishly (gö′lish-li), *adv.* In a ghoulish manner; with ghoulish eagerness.

giallolino (jäl-lō-lē′nō), *n.* [It., later *giallorino*, < *giallo*, yellow.] A yellow pigment the nature of which is doubtful; perhaps a light yellow ocher or possibly a sulphid of antimony. Naples yellow, which is assumed by some to be the same as giallolino, is a mixture of white lead and chrome yellow.

giant, *n.* 4. In *gold-mining*, a large nozle used to direct the powerful streams employed in hydraulic work. See cut under *hydraulic.*—**Waltzing giant,** a whirling column of sand gliding along over the ground; a sand-whirl.

giantism, *n.* 2. Abnormal growth or development, especially as regards height.

Lancaster shows how many organisms slide down the phyletic scale and react to an ever less complex environment. . . . In *giantism* the human skeleton may revert to a state that suggests that of the gorilla.

G. S. Hall, Adolescence, I. 337.

giantize (jī′an-tīz), *v. i.* and *t.*; pret. and pp. *giantized*, ppr. *giantizing.* [*giant* + *-ize.*] To play the giant; make as big as a giant.

gib[1], *n.* 4. (*b*) The wedge or adjusting-shoe by which wear is taken up at a sliding contact, such as a cross-head moving on guides.—**6.** A prism.—**7.** The hooked mandible of the male salmon or trout which is formed during the breeding-season.

gibbed (jibd), *a.* [*gib*[1] + *-ed*[2].] In *mech.*, provided with gibs; having lips, or hooks, which hold a piece in place, while permitting it to slide. The gibs are usually so arranged as to provide for taking up wear in the bearings.

gibber[4] (gib′ėr), *n.* [Native Australian.] A big stone or boulder; an overhanging rock. [Australia.]

gibber[5] (jib′ėr), *n.* A balky horse; a jibber.

Gibbera (jib′e-rä), *n.* [NL. (Fries, 1825), < L. *gibber*, humpbacked.] A genus of pyrenomycetous fungi of the family *Cucurbitariaceæ*, having black perithecia seated upon a stroma and beset with stiff bristles. The spores are brown and uniseptate. *G. Vaccinii* is parasitic upon twigs of the cowberry, *Vaccinium Vitis-Idæa.*

Gibberella (jib-e-rel′ä), *n.* [NL. (Saccardo 1877), < *Gibberæ* + dim. *-ella.*] A genus of pyrenomycetous fungi of the family *Hypocreaceæ*, having somewhat dark-colored fleshy perithecia seated either on a stroma or on the surface of the host. The spores are hyaline or yellowish and 2- or more-celled. *G. pulicaris* is common on branches of various trees.

gibber-gunyah (jib″ėr-gun′yä), *n.* [Native Australian.] A rock-shelter or aboriginal cave-dwelling. [Australia.]

gibbet[1], *n.*—**Halifax gibbet,** an instrument resembling the guillotine, and taking its name from Halifax, England, for use in beheading criminals.—**The year of the three gibbets,** the year 1777, in allusion to the three (gibbet-like) 7's.

Gibbonsia (gi-bon′si-ä), *n.* [NL., named after Dr. Wm. P. *Gibbons*, a California naturalist.] A genus of small blennies found among the seaweed-covered rocks along the coast of California. *G. elegans* is the common species.

Gibb's vector method. See ★*vector.*

gib-plate (jib′plāt), *n.* A plate or strap which holds in place the piece to which it is fastened and yet leaves it free to move in a prescribed direction.

Gid bladder-worm. See ★*bladder-worm.*

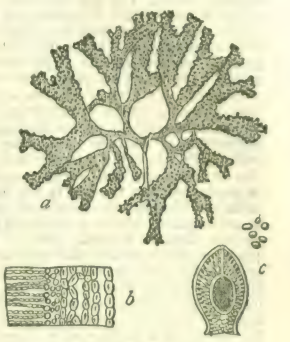
gidjee (gid′jē), *n.* A colonial form of ★*gidya.*

gidya (gid′yä), *n.* [Austral. aboriginal name.] The Victorian myall, *Acacia homalophylla.* Also called *gidjee.* See *myall.*

Gien pottery. See ★*pottery.*

gift, *n.*—**Indian gift,** a gift that may be reclaimed; a gift 'with a string.'—**Onerous gift,** in *law*, a gift conditioned upon the performance of something by the donee.

gig[1], *n.* **3.** (*e*) In machine-shop practice, a portable appliance for holding a piece of metal upon a machine and presenting it, successively, in two or more positions, to the cutting-tools: also used to assist in guiding the tools to the work. It is made in many forms and is used upon a great variety of machines. It is commonly employed in making standard parts of machines, tools, or motors.— **5.** In policy, a special combination of three numbers. See *policy*[2], 3.



gigantize (jī-gan′tīz), *v. t.*; pret. and pp. *gigantized*, ppr. *gigantizing.* [Gr. *γίγας* (*γιγαντ-*), giant, + *-ize.*] To cause to appear of giant proportions.

gigantoblast (jī-gan′tō-blȧst), *n.* [Gr. *γίγας* (*γιγαντ-*), giant, + *βλαστός*, germ.] A specially large nucleated red blood-corpuscle of the megaloblastic type.

gigantocyte (jī-gan′tō-sīt), *n.* [Gr. *γίγας* (*γιγαντ-*), giant, + *κύτος*, a hollow (a cell).] A non-nucleated red blood-corpuscle of large size.

Gigantotermes (jī-gan-tō-tėr′mēz), *n.* [NL., < Gr. *γίγας* (*γιγαντ-*), a giant, + NL. *termes*, a white ant.] An extinct genus of white ants from the Jurassic lithographic slates of Bavaria.

Gigartina (jig-ärt-ī′nä), *n.* [NL. (Stackhouse, 1809), < Gr. *γίγαρτον*, a grape-stone.] A red seaweed, related to *Chondrus* or Irish moss. It occurs commonly on both the Atlantic and Pacific coasts and is abundant in the temperate and colder waters of Europe. It is used with other algæ for the manufacture of agar-agar.

Gigartina mamillosa.

a, plant, one third natural size; *b*, cross-section of a small portion of fertile frond, enlarged; *c*, vertical section of a tubercle and spores from the same, highly magnified.

gig-back (gig′bak), *n.* A quick-return motion; specifically, a mechanism for returning a saw-mill-carriage after the cut has been made, the return travel being at a higher speed than the cutting.

gig-bit (gig′bit), *n.* A straight cheek-bit with rein-rings at the ends of the mouthpiece and side-loops for the reins when using it as a curb.

gig-flock (gig′flok), *n.* The short fibers which are torn from the fabric during the process of gigging, or napping.

gigglement (gig′l-ment), *n.* [*giggle* + *-ment.*] Giggling.

gigglesome (gig′l-sum), *a.* [*giggle* + *-some.*] Inclined to giggle.

Gigli saw. See ★*saw.*

gigliato (jēl-yä′tō), *n.* [It., < *giglio*, < L. *lilium*, lily.] **1.** A silver coin of Sicily, of the Knights of St. John of Jerusalem at Rhodes, and of the kings of Cyprus of the Lusignan line. It is named from the terminal embellishment of a cross on the reverse.—**2.** A Tuscan gold coin, the sequin, also called the *ruspo.*

gil, *n.* and *v.* A simplified spelling of *gill.*

Gila (hē′lä), *n.* [NL., < *Gila* (river).] A genus of cyprinoid fishes or chubs, found in the Gila river in Arizona, known as *hardtails.* The flesh is very dry and flat in flavor; the bones of the tail are long and slender, with a large caudal fin. *G. elegans* is the common species.—**Gila trout,** a name sometimes applied to *Gila elegans*, a cyprinoid fish found in the Gila river: unlike and unrelated to the trout.

gilbert (gil′bėrt), *n.* [Named for William *Gilbert* (1540–1603).] A proposed unit of magnetomotive force having the value $\frac{10}{4\pi} = .7958$ ampere-turn.

gilbertage (gil′bėr-tāj), *n.* A name proposed for the magnetomotive force, in gilberts, of a magnetic circuit: suggested by the term voltage for electromotive force. [Rare.]

Gilbertia (gil-bėr′ti-ä), *n.* A genus of serranoid fishes of the South Pacific Ocean.

Gilbertina (gil-bėr-tī′nä), *n.* [NL., named from Dr. Charles H. *Gilbert.*] A genus of small soft-bodied sculpins, extremely degenerate in structure, found in the deep waters of the channels of southern Alaska. *G. sigolutes* is the known species.

gil-cup, *n.* See ★*gill-cup.*

gild[1], *v. t.* **7.** To electroplate by depositing a layer of gold from an electric bath.—**8.** To eat the alloy out of (a low-grade gold) by means of an acid, leaving the fine gold on the surface.

gild[2], *n.* **3.** (*a*) In *phytogeog.*, one of several groups of plants which depend for their existence on other plants. The gilds (*G. genossenschaften*), according to Schimper, are four in number:

lianes, epiphytes, saprophytes, and parasites. See *epiphyte*, 1, ★*liana*, *parasite*, 2 (*c*), and *saprophyte*. (*b*) A group of species which, owing to their like adaptations under fit conditions, invade a new region together and in mass. *Pound and Clements.*

gilding, *n.*—**Chemical gilding**, gilding by immersion in a solution of a chemical compound of gold, without using an electric current.

gilding-metal (gil'ding-met″al), *n.* Rolled sheet-brass from which cartridge-shells are drawn.

gildo (gil'dō), *n.* [ML. (also *congildo*), < AS. *gegylda*, < *gyld*, a gild.] In Anglo-Saxon law, a member of a gild.

gilfish (gil'fish), *n.* The male salmon during the breeding-season.

gil-guy, *n.*—**To make a gil-guy**, to perform an unseamanlike piece of work.

Gilia, *n.* 2. [*l. c.*] Any plant of the genus *Gilia*. For species known by other names see ★*bird's-eye*, 1 (*d*), ★*skunkweed*, and *standing-cypress*. —**Blue gilia**, the Californian *Gilia Chamissonis* and the related *G. capitata* and *G. achilleæfolia*. *G. Chamissonis* forms masses of bright deep blue in the fields near San Francisco; *G. capitata* (from which the former is not always distinguished) is a similar, more delicate plant known in cultivation, as is also *G. achilleæfolia*, a species with the leaves dissected like milfoil. All three have the flowers in heads, those of the last-named larger and less compact.—**Fringed gilia**. See ★*ground-pink*.—**Scarlet gilia**, *Gilia aggregata*, a species diffused from Nebraska to the Sierra Nevada of California and south to Texas and Mexico. It is a viscid plant, a biennial with stems 2 to 4 feet high, the leaves pinnately divided, the flowers in small clusters, standing out horizontally, the delicate corolla tubular with spreading border, 1 to 1½ inches long, predominantly scarlet.—**Tricolored gilia**. Same as ★*bird's-eye*, 1 (*d*).

Blue Gilia (*Gilia Chamissonis*).

a, plant, one fourth natural size; *b*, flower, natural size; *c*, fruiting calyx, natural size; *d*, seed, enlarged.

gilingan (gē-ling'gän), *n.* [Tagalog *gilingan* (*gilinggan*), < *giling*, grind in a mill.] In the Philippine Islands, a hand-mill for husking rice.

The grain is separated from the straw by thrashing, or by use of wind whenever possible, and is finally separated from the husk by pounding two or three times in a wooden mortar, called a "lusong," or by making use of a sort of handmill, called *guilingan*.
Gaz. Philippine Is., 1902, p. 71.

gill[1], *n.*—**Extrapulmonary gill**, in some snails, as *Ancylus*, a gill-like organ situated within the pulmonary sac and thought to be used for aqueous respiration.—**Pericardial gill**, in nudibranch mollusks, one of the folds on the dorsal wall of the pedicardium.—**Rectal gills**, a remarkable arrangement of tracheal gills in the rectum of the nymph of the dragon-fly. The rectum is lined with six double longitudinal ridges of either very delicate papillæ or lamellæ, both papillæ and lamellæ being provided with very numerous tracheal branches.—**Tracheal gills**. They are tubular or leaf-like expansions of the body integument, richly supplied with tracheal branches and with a very delicate integument through which the oxygenation of the blood or tracheal air is effected. These gills are common among the aquatic larvæ of certain groups of insects.

gill[4], *n.* 3. An English penny or quarter bit. [British Guiana.]

gill[6] (gil), *n.* [Compare *gillie*.] A fellow or 'cove': as, a queer *gill*. [Slang.]

gill-ale (jil'āl), *n.* [Compare *gill*[5] and *ale-hoof*.] The ground-ivy, *Glecoma hederacea*.

gill-basket (gil'bas″ket), *n.* A basket-like framework of cartilage which surrounds the branchial region in the cyclostomes or lampreys.

gill-books (gil'bůks), *n. pl.* The lamellate branchiæ of the king-crab. They are borne on appendages two to six of the abdomen and are protected by the enlarged first pair, which are united in the middle line.

gill-cup (gil' kup), *n.* A buttercup: usually in the plural. Also *gil-cup*, *gilt-cup*, and *gilty-cup*.

Gillellus (gi-lel' us), *n.* [NL., named from T. N. *Gill*, an American ichthyologist.] A genus of small fishes of the family *Dactyloscopidæ*, found among the reefs of Florida.

gillenin (gi-lē'nin), *n.* [*Gillen* + *-in*[2].] A substance said to be the active principle of American ipecac, *Porteranthus trifoliatus* (*Gillenia trifoliata* of Mœnch), and other species of *Porteranthus*. It is emetic.

gill-filter (gil'fil″tėr), *n.* In *ichth.*, one of the slender appendages attached to the inner sides of the gill-arches and serving to separate food from the water and to keep various small substances from the gills. *Nature*, Nov. 19, 1903, p. 64.

gill-fissure (gil'fish″ůr), *n.* Same as *gill-opening*.

gill-footed (gil'fůt″ed), *a.* Branchiopodous.

gill-fringe (gil'frinj), *n.* The branchial membrane or gill-filaments of fishes, on the outside of the gill-arches, and covered by the operculum.

gill-head (gil'hed), *n.* A machine for preparing flax for spinning. The stricks are combed out into slivers, which are then combined and combed into rovings.

gillingite (gil'ing-īt), *n.* [*Gillinge* (see def.) + *-ite*[2].] A hydrous ferric silicate, occuring in black masses with earthy fracture, from the Gillinge mine, Södermanland, Sweden.

gilling-thread (gil'ing-thred), *n.* A two or more ply twisted linen or cotton thread, used for making gilling nets.

gill-intestine (gil'in-tes″tin), *n.* The anterior, respiratory portion of the alimentary tract in primitive vertebrates, as opposed to the stomach-intestine, or digestive region. *Haeckel*, 1879.

gill-lamella (gil'lā-mel″ä), *n.* A flat, plate-shaped respiratory organ, as distinguished from a gill-filament; a gill-leaf or gill-leaflet.

gill-leaf (gil'lēf), *n.* Same as ★*gill-lamella*.

gill-leaflet (gil'lēf″let), *n.* Same as ★*gill-lamella*.

The ctenidium is made up of two rows of gill-plates or *gill-leaflets*, attached to a ctenidial axis. *Philos. Trans. Roy. Soc.* (London), 1903, ser. B, p. 189.

gill-pore (gil'pōr), *n.* In *Balanoglossus*, a minute opening which places the cavity of a gill-pouch in communication with the exterior.

This [gill-pouch] in its turn opens to the exterior by a minute *gill-pore*. *Encyc. Brit.*, XXVI. 85.

gill-pouch (gil'pouch), *n.* In *Balanoglossus*, one of a series of pouch-like cavities arranged in two longitudinal rows posterior to the collar, each communicating with the alimentary canal through a gill-slit and with the exterior through a gill-pore.

In most species of Balanoglossus each gill-slit may be said to open into its own atrial chamber or *gill-pouch*. *Encyc. Brit.*, XXVI. 85.

gill-run (gil'run), *n.* Same as *gill*[5], 2.

gill-sheet (gil'shēt), *n.* The layer or sheet formed by the slivers of flax in a gilling-machine.

gill-spreader (gil'spred″ėr), *n.* Same as *gilling-machine*.

gill-teeth (gil'tēth), *n.* The spikes or teeth which project from the fallers in a gilling-machine.

gill-tuft (gil'tuft), *n.* A group of gill-filaments or of arborescent branchiæ, as in certain annelids.

gillyflower, *n.*—**Dame's-gillyflower**. Same as *dame's-violet*.—**Mock gillyflower**, the soapwort or bouncing-bet, *Saponaria officinalis*.—**Night-scented gillyflower**. Same as *dame's-violet*.—**Turkey gillyflower**, the African marigold, *Tagetes erecta*. See *marigold*, 1.

gilly-gaupus (gil″i-gâ'pus), *n.* A tall, awkward, foolish person. [Scotch.]

gilsonite (gil'son-īt), *n.* [From S. H. *Gilson* of Salt Lake City.] A very pure form of asphaltum obtained in considerable quantity in the Uinta valley, near Fort Duchesne, Utah.

gilt, *n.* and *v.* A simplified spelling of *guilt*.

gilt[1], *n.* 2. In *archery*, the innermost circle of the target; the gold.

gilt-cup (gilt'kup), *n.* Same as ★*gill-cup*.

gilty, *a.* A simplified spelling of *guilty*.

gimbal-joint (gim'bal-joint), *n.* A method of suspension which permits of motion about two axes in the same plane, at right angles to each other; a gimbal.

gimbal-ring (gim'bal-ring), *n.* A rynd; the piece on which the upper millstone rests and in the center of which is the cockeye, which rests on the spindle.

gimel (gim'el), *n.* [Heb. *gîmel*: see *gamma*.] The third letter of the Hebrew alphabet (ג), corresponding to the English *g* in *go*. Its numerical value is 3.

gimlet, *v. t.*—**To gimlet the anchor**, to turn the anchor around when it is hanging from the cat-head or hawse-pipe.

gimlet-bit (gim'let-bit), *n.* An auger-bit in which the cutting edges are drawn into the wood to be bored by a gimlet-point which pierces in advance of the paring-edges.

gimlet-wood (gim'let-wůd), *n.* The fluted gum or gimlet-gum, *Eucalyptus salubris*, so called from the twisted, fluted structure of the stem.

gimp[1], *n.* 3. In *angling*, a line in which fine wire is woven, or which is bound or wound with wire to increase its strength.—**Gimp lace**. See ★*lace*.

gimp[1], *v. t.* 2. To weave or bind wire into a fabric or cord to stiffen it.

gin-cut (jin'kut), *a.* Noting cotton that has been damaged or cut by the saw-gin.

ginfuku (gin-fō'kō), *n.* [Jap., < *gin*, silver, + *fuku*, belly.] One of the gymnodont fishes of Japan, *Spheroides sceleratus*.

ginger[1]. **I.** *n.*—**Amada ginger**. Same as *mango ginger* (which see, under *ginger*[1]).—**Broad-leaved ginger**, *Zinziber Zerumbet*. See ★*awapuhi*, 1.—**Chinese ginger**, the rhizomes of *Languas zingiberina* (*Alpinia zingiberina* of Baker), which when boiled and preserved in syrup, or candied, form a well-known sweetmeat.—**Egyptian ginger**, *Caladium Colocasia*. See *taro*[1].—**Native ginger**, in Queensland, *Languas cærulea* (*Hellenia cærulea* of Robert Brown), so named because the whole plant, as well as the rhizome, has the scent and pungency of ginger.—**Wild ginger**. (*b*) Any American species of *Asarum*. (*c*) In the West Indies, any one of several species belonging to the genera *Costus* and *Alpinia* (*Renealmia* of many authors).

II. *a.*—**Ginger brandy**, a cordial made of brandy strongly impregnated with ginger.

ginger[1] (jin'jėr), *v. t.* [*ginger*, *n.*] To put some 'ginger' into (a person); shake up; revive.

gingerbread, *n.* **II.** *a.* Having a fanciful shape, such as is often given to gingerbread; showy but unsubstantial or inartistic: (see *gingerbread-work*); as, *gingerbread* fittings on a yacht.

ginger-grass, *n.*—**Oil of ginger-grass**. See ★*oil*.

ginger-leaf (jin'jėr-lēf), *n.* Same as *turkey* ★*mullen*.

gingerline (jin'jėr-līn), *a.* and *n.* [Also *gingelline*, *gingeline*. ★*gingioline*; altered (by assimilation to *ginger*), from It. *giuggiolino*, of same meaning, another use of *giuggiolino*, an East Indian plant, gingili, < Hindi and Marathi *jinjāli*, Ar. *juljulān*, Sp. *aljonjoli*, etc.: see *gingili* and ★*aljonjoli*.] **I.** *a.* Of a reddish-yellow color; ginger-colored. [Seventeenth century.]

II. *n.* The color itself; also a cloth of this color. It was among the stuffs supplied to the North American Indians "for breeches and jackets" by the traders. *A. M. Earle*, Costume of Colonial Times, p. 114.

gingerol (jin'jėr-ōl), *n.* [*ginger* + *-ol*.] A colorless liquid, C_5H_8O(?), with the characteristic pungent taste of *Zinziber Zingiber*, from the root of which it is extracted.

ginger-plant (jin'jėr-plant), *n.* The tansy, *Tanacetum vulgare*.

ginger-roll (jin'jėr-rōl), *n.* A whalemen's term for the folds under the throat and belly of the humpback, finback, and sulphur-bottom whales.

ginger-root (jin'jėr-röt), *n.* The coltsfoot, *Tussilago Farfara*.

gingery (jin'jėr-i), *a.* Ginger-like in properties or appearance: hence, hot; pungent in taste; spicy.

gingivolabial (jin-jī-vō-lā'bi-al), *a.* [L. *gingiva*, gum, + *labium*, lip, + *-al*.] Relating to both gums and lips. *Buck*, Med. Handbook, VI. 124.

gingkoic (ging-kō'ik), *a.* [*gingko* + *-ic*.] Derived from gingko.—**Gingkoic acid**, a colorless, crystalline compound, $C_{24}H_{48}O_2$, melting at 35° C. It occurs in the fruit of *Ginkgo biloba*.

gingko-nut (ging'kō-nut), *n.* A nut or fruit of the gingko-tree, *Ginkgo biloba*.

ginglymoarthrodia (jing″- or ging″li-mō-ärthrō'di-ä), *n.*; pl. *ginglymoarthrodiæ* (-ē). [NL., < *ginglymus* + *arthrodia*.] An articulation which has both a sliding and a hinge motion.

Ginkgoaceæ (ging-gō-ā'sē-ē), *n. pl.* [NL. (Engler, 1897), < *Ginkgo* + *-aceæ*.] A family of gymnospermous plants constituting the order *Ginkgoales* and typified by the genus *Ginkgo*: the maidenhair-tree family. It is very anomalous and archaic in most of its characters, and is remarkable in having reproduction effected through the medium of motile spermatozoids, as in the *Cycadaceæ*. *Ginkgo* is the only living genus, but a number of extinct genera, as *Jeanpaulia*, *Czekanowskia*, *Rhipidopsis*, and *Whittleseya*, carry it back to the Paleozoic and connect it with the *Cordaitaceæ*.

ginkgoaceous (ging-gō-ā'shius), *a.* Belonging to the plant family *Ginkgoaceæ*.

Ginkgoales (ging-gō-ā'lēz), *n. pl.* [NL. (Engler, 1897), < *Ginkgo* + *-ales*.] An order

of gymnospermous plants containing the family ★*Ginkgoaceæ* only (which see). See also *Ginkgo*, *Jeanpaulia*, *Whittleseya*, and ★*Cordaitales*.

gin-mill[2] (jin′mil), *n.* A cotton-gin.

ginner[2] (jin′ėr), *n.* One who gins cotton or clears it from the seed.

The crop, according to the *ginners*, is 9,996,300 bales, and, according to the canvassing agents, 9,954,106 bales, of an average gross weight of 500 pounds.
N. Y. Tribune, Jan. 6, 1903.

ginnery (jin′ę-ri), *n.* [*gin*[4] + *-ery*.] An establishment for the ginning of cotton.

The location of the steam-plant for both *ginnery* and oil-mill at the latter place removes a potent source of danger from the *ginnery*.
L. L. Lamborn, Cottonseed Products, p. 31.

ginny-carriage, *n.* 2. A low two-wheeled basket-phaeton, hung on coil-springs.

gin-pole (jin′pōl), *n.* A pole, secured by guy-ropes, to the top of which tackle for lifting heavy weights is fastened.

gin-pulley (jin′půl″i), *n.* The sheave or wheel of a gin-block; also, the block itself.

gin-race (jin′rās), *n.* The circular track made by a gin-horse.

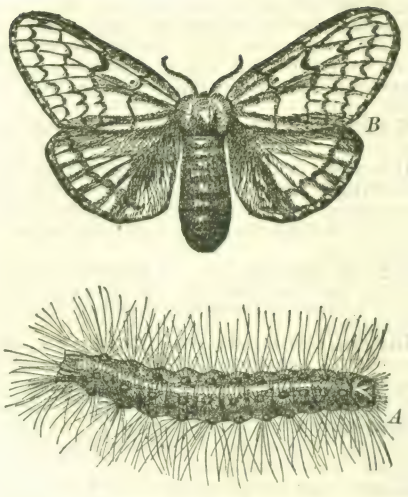
gin-roller (jin′rō″lėr), *n.* One of the rollers between which cotton is drawn when it is ginned.

gin-saw (jin′sâ), *n.* One of a set of circular saws used in a cotton-gin.

ginseng, *n.* Several plants not botanically related to the ginseng have been so named as possessing similar medical properties, as, in Georgia, the sunflower-like composite *Tetragonotheca helianthoides*. — **American ginseng**, *Panax quinquefolius* (see *ginseng*), native in the wooded country from Maine through Canada to Minnesota, Iowa, and Missouri, and southward, but in the South Atlantic and Gulf states only in the mountains. In many parts of this area it is nearly extinct. The root has long been exported (mostly to China) from Canada and the United States, the export from the latter from 1858 to 1896 exceeding a total value of $20,000,000, the amount decreasing, but the price rising during the period. In recent times it

American Ginseng (*Panax quinque folius*).
One fourth natural size.

has been successfully cultivated in the United States. It requires partial shade, which may be afforded either by trees or by lath sheds. The seeds will not germinate till the second season, and not at all if they once become dry. The roots most in demand are large and heavy, with the fewest possible branches except when, by forking, the human form is imitated. According to Korean authority the American ginseng is inert as compared with the Chinese. In China it is graded below the Korean, apparently about with the 'native.' It is little esteemed in medicine in America. — **Blue ginseng**, the blue cohosh, *Caulophyllum thalictroides*. — **Horse-ginseng**, the horse-gentian, *Triosteum perfoliatum*. — **Japanese ginseng**, that produced in Japan: graded lowest in China, and regarded as comparatively inert. It is said to be frequently adulterated with the root of *Campanula glauca*, etc. — **Korean ginseng**, that produced in Korea, chiefly under cultivation: it is graded next to the Manchurian and is similar in its properties. The cultivated root is said to be smaller than the san-sam or wild ginseng. — **Native ginseng**, in China, a third grade grown near the borders of Korea, said to be used mainly to adulterate the Korean ginseng. — **White ginseng**. Same as *horse-*★*ginseng*. — **Yellow ginseng**. Same as *blue* ★*ginseng*, referring probably to the color of the root.



Giottesque (jot-tēs′), *a.* [*Giotto* di Bondone (1276–1337).] Of or pertaining to Giotto, or resembling his work.

Giottesque frescoes of the Franciscan legends.
N. and Q., 10th ser., I. 220.

gipsy-combs (jip′si-kōmz), *n.* The wild teazel, *Dipsacus sylvestris*.

gipsy-flower (jip′si-flou″ėr), *n.* The hound's-tongue, *Cynoglossum officinale*.

gipsy-moth, *n.* Its larva is very destructive to the foliage of orchard, shade, and forest trees. A naturalist,

Gipsy-moth (*Porthetria dispar*).
A, larva; *B*, female moth. Slightly reduced. (After Ratzeburg.)

experimenting with this insect at Medford, Mass., in 1869, accidentally allowed it to escape, and it has become thoroughly established in the country around Boston, where it has done much damage.

gipsy-rose (jip′si-rōz), *n.* Same as *Egyptian rose* (which see under *rose*[1]).

gipsy-weed (jip′si-wēd), *n.* 1. Same as *bugle-weed*. — 2. The speedwell, *Veronica officinalis*.

giraffe, *n.* 5. Same as ★*giraffe-fever*. *Buck*, Med. Handbook, III. 400.

Giraffe camel, giraffe-necked camel. See ★*camel*.

giraffe-fever (ji-raf′fē″vėr), *n.* Same as *dengue*.

giraffesque (ji-raf-esk′), *a.* [*giraffe* + *-esque*.] Giraffe-like in coloration or height.

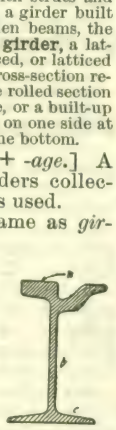
Protective coloration in large animals is illustrated by the Somali giraffe (well shown by one of Lord Delamere's photographs of a *giraffesque* thicket).
Nature, April 14, 1904, p. 555.

giraffine (ji-raf′in), *a.* and *n.* **I.** *a.* Resembling a giraffe; giraffe-like.

Professor Ray Lankester has diagnosed it [the Okapi] as a *giraffine* animal. *Pop. Sci. Mo.*, March, 1902, p. 429.

II. *n.* A giraffe-like animal. [Rare.]

It [the Okapi] is a *giraffine*, horned in the male.
Rep. Brit. Ass'n Advancement of Sci., 1902, p. 625.



gird[1], *n.* 2. Twist, used for binding together the fibers of yarn in the process of spinning. *C. Vickerman*, Woollen Spinning, p. 296.

girder[1], *n.* — **Equivalent girder**, in *naval arch.*, a hypothetical girder whose flanges are equal to the decks and bottom of a ship and whose web is equal to the sides and other vertical parts: used in calculating the longitudinal strength of a vessel. *White*, Manual of Naval Arch., p. 348. — **Half-lattice girder.** See ★*lattice-girder*. — **Open-web girder**, a built girder in which the web is composed of a framework like a truss with struts and ties. See *web*, 5 (*d*). — **Sandwich girder**, a girder built up with an iron web-plate between wooden beams, the whole being bolted together. — **Skeleton girder**, a latticed girder; a girder having an open, braced, or latticed web. — **Z-girder**, a girder of which the cross-section resembles the capital letter Z; either a single rolled section having a web and one flange on each side, or a built-up section made of a web-plate and an angle on one side at the top and an angle on the other side at the bottom.

girderage (gėr′dėr-āj), *n.* [*girder* + *-age*.] A group or system of girders; girders collectively; the total number of girders used.

girder-beam (gėr′dėr-bēm), *n.* Same as *girder*[1], 2. Also called *girth-beam*.

girder-rail (gėr′dėr-rāl), *n.* A railway-rail having a deep web, flat base, and wide and shallow top, adapted to wheels with small flanges. It is used in electric railroads where the rails must be laid in a paved street or asphalted or macadamized road.

Girder-rail.
a, tread; *b*, web, *c*, base.

girdle[1], *n.* 10. A ring made round the trunk of a tree by the removal of the bark either purposely or accidentally. — 11. In earthworms, the cingulum or clitellum. — **Neptune's girdle**, in *med.*, a form of wet-pack applied to the upper part of the abdomen. — **Pin and girdle.** See ★*pin*[1].

girdle-pain (gėr′dl′pain), *n.* A painful girdle-sensation.

girdle-sensation (gėr′dl-sen-sā″shọn), *n.* A feeling of constriction as if a belt were drawn closely round the body: a symptom common in certain diseases of the spinal cord.

girdle-worm (gėr′dl-wėrm), *n.* Same as ★*cranberry-girdler*.

Girella (ji-rel′ą), *n.* [NL., for **Gyrella* (?), < L. *gyrus*, gyre, + *-ella*.] A genus of perch-like fishes of the family *Kyphosidæ*, found on both shores of the Pacific. The species are herbivorous, feeding on plants by means of their movable incisors. *G. nigricans* is the greenfish of the coast of California.

Girellinæ (jir-e-lī′nē), *n. pl.* [NL., < *Girella* + *-inæ*.] A subfamily of fishes typified by the genus *Girella*.

girl, *n.* — **One's best girl**, one's sweetheart. [Colloq., U. S.] — **Hired girl**, a domestic maid-servant. — **Second girl**, a domestic servant whose duties are chiefly housework and waiting at table, the cook being considered 'first girl.' [Colloq., U. S.] — **Summer girl**, one of the young ladies who congregate at the summer resorts. [Colloq., U. S.]

girling (gėr′ling), *n.* Same as *gilling*[2].

girn[2] (gėrn), *n.* [A metathesis of *grin*[2].] A trap or snare for catching animals, birds, etc.: also used figuratively. [Scotch.]

girn[2] (gėrn), *v. t.* [*girn*[2], *n.*] To entrap or ensnare by, or as if by, a girn. [Scotch.]

giro (jē′rō), *n.* [It., < L. *gyrus:* see *gyre*.] A round; a turn; a short tour.

Our days here are passed quite deliciously. We see a few beautiful pictures or other objects of interest, . . . and afterwards we have a *giro* in our gondola, enjoying the air and the sight of marvellous Venice.
George Eliot, in Cross, Life of George Eliot, III. 329.

girofle (zhē-rō′fl), *n.* [F.: see *gillyflower*.] The French for *clove*[4]. — **Essence of girofle**, oil of cloves.

girofléе (zhē-rō-flā′), *n.* [F. *giroflée*, gillyflower.] 1. The clove-pink, a species of *Dianthus*.

Out of the rich red soil underneath the trees are springing violets and narcissus and *giroflés*.
The Outlook, Sept. 2, 1899, p. 65.

2. A basic coal-tar color of the azonium-chlorid type. It dyes tannin-mordanted cotton a reddish violet. Also called *methylene-violet* and *fuchsia*.

girouette (jir-ö-et′), *n.* [F. *girouette*, earlier *gyrouette*, *gyrouet*, prob. < It. *giro* (< L. *gyrus*), a turning, + *-ouette* as in *pirouette*, a top.] A weathercock; hence, one who is given to frequent change, as in opinions, purpose, etc.; an inconstant person.

girt[1] (gėrt), *n.* A beam; a small girder; a crosspiece in a frame. [Colloq.]

girt[2] (gėrt), *v. t.* [*girt*[2], *n.*] 1. To measure or have a girth of: as, the tree *girts* eight feet. — 2. To measure by a girding-line.

girth, *n.* — **Combination girth**, a harness girth fitted with loops and buckles at each end: a substitute for the two girths. — **Fitzwilliam girth**, a riding-saddle girth composed of one broad piece of web, with two buckles at each end.

girth, *v. t.* 2. To encircle or surround with a measuring-line, as in measuring moldings, etc.

girth-beam (gėrth′bēm), *n.* A girder.

girth-stretcher (gėrth′strech″ėr), *n.* A device for stretching saddle-girths.

girth-web (gėrth′web), *n.* The strong webbing of which girths are made.

girt-line, *n.* 2. A boundary or bounding line. — **Hammock girt-lines** (*naut.*), lines on which scrubbed hammocks are stopped up to dry.

girt-wheel (gėrt′hwēl), *n.* The narrow drum under a hand-press which winds and unwinds the leather bands which move alternately in and out the bed of the press which upholds the form of type.

gisement[1] (jīz′ment), *n.* Same as ★*gistment* or *agistage* (which see).

gisement[2] (zhēz-moṅ′), *n.* [F., < *giser*, lie.] The way in which a thing lies; position; bearing.

gisernet†, *n.* See *guisarme*.

Gisortia (ji-sôr′ti-ą), *n.* [NL., < (?) F. *Gisors*, a town in France.] A genus of platypodous gastropods from the Eocene Tertiary rocks, belonging to the family *Ovulidæ* and characterized by large, thick shells with short convolute spire.

Gissocrinus (ji-sok′ri-nus), *n.* [NL., < Gr. *γείσσον*, *γείσον*, eaves, cornice, + *κρίνον*, lily (see *crinoid*).] A Paleozoic genus of fistulate crinoids belonging to the family *Cyathocrinidæ*. They have a short calyx with a long, laterally folded ventral sac and regularly bifurcating arms.

gist[3] (jist), *v. t.* An aphetic form of *agist* (which see).

gistment† (gist′ment), *n.* An aphetic form of *agistment*.

gitana (hē-tä′nä), *n.* [Sp., fem. of *gitano*.] A Gipsy woman.

gitano (hē-tä′nō), *n.* [Sp., < L. **Ægyptanus*, equiv. to *Ægyptianus*, Egyptian, whence ult. E. *Gipsy*.] In Spain, a Gipsy (man).

githagism (gith′ą-jizm), *n.* A disease supposed to be caused by eating the seeds of the corncockle, *Lychnis* (*Agrostemma*) *Githago*.

These seeds contain a poisonous sapotoxine-like substance, and are regarded in Europe as the cause of the chronic poisoning or disease of man and animals which is known as *githagism*.
Yearbook U. S. Dept. Agr., 1900, p. 307.

Gitocrangon (git-ō-kran′gon), *n.* [NL., < Gr. *γείτων*, akin to, like, + *καραγγών*, a shrimp or prawn.] A problematical fossil described as a genus of decapod crustaceans from the Upper Devonian rocks of Thuringia.

Giton (gī′ton), *n.* [NL., < Gr. *γείτων*, a neighbor, neighboring; prob. (like *γείος*, adj., indigenous) < *γῆ*, earth, land.] A genus of freshwater eel-like fishes found in the waters of Brazil. They belong to the family *Gymnotidæ*.

giulio (jō′lyō), *n.* [It., < L. *Julius*.] A papal silver coin, one tenth of a scudo: apparently so called from Pope Julius II.

giustina (jös-tē′nä), *n.* [It., < L. *Justina*.] A Venetian silver coin of the value of 11 lire. —**Giustina maggiore,** a Venetian silver coin equal to 160 soldi: first struck in 1571, and named from St. Giustina, on whose name-day (Oct. 7) the battle of Lepanto was fought in that year.—**Giustina minore,** a Venetian silver coin also imitated by Cesare d'Este, Duke of Modena (1597–1628).

giv, *n.* and *v.* A simplified spelling of *give*.

give[1], *v.* **I.** *trans.*—**Give way together!** (*naut.*), an order for all the oarsmen in a boat to pull in unison.—**To give it hot,** to chastise severely. [Slang.]—**To give time,** to extend the time, as for the paymentof a debt or the fulfilment of a contract.—**To give umbrage,** to offend.

II. *intrans.*—**To give and take,** to be as ready to give as to receive; even up by fair exchange, as of courtesies, hard knocks, etc.; give tit for tat.—**To give best,** to give in; give up the contest; acknowledge superiority. [Australia.]

give-ale (giv′āl), *n.* [*give* (AS. *gifu*), gift, + *ale*.] A memorial festival formerly observed annually in some parts of Kent, England, the cost being defrayed from funds which had been bequeathed for the purpose.

The *giveales* . . . were the legacies of individuals, and . . . entirely gratuitous; though some of them might be in addition to a common *giveale* before established in the parish . . . . "I will that my heires shall have five yards of land lying in Longfield, and five yards in Pettefield, upon condition that they make a yearly *geveail* on Trinity Sunday of 5 bushels of wheat, and 1 seame of barley. . . ."
Archæologia, XII. 13, 14.

give-and-take (giv′and-tak′), *n.* and *a.* **I.** *n.* The practice of giving and taking on equal or fair terms; a mutual making of concessions or allowances; exchange, as of ideas, civilities, repartee, jests, banter, etc.; a giving of tit-for-tat.

II. *a.* Characterized by a spirit of giving and taking on fair terms, as in evening up advantages and disadvantages; marked by mutual concession: as, a give-and-take policy. —**Give-and-take plate,** in *horse-racing*, a prize for a race in which the horses carry weight according to their height, those above a certain standard carrying more than those below that standard.

give-away (giv′a-wā″), *n.* **1.** An inadvertent or unconscious betrayal of one's self or one's secrets. [Slang, U. S.]—**2.** A game of drafts or checkers in which the players endeavor to give away their men, the moves being such as to force the adversary to take them; the losing game of checkers.

Givetian (ji-vē′shian), *a.* In *geol.*, noting a subdivision of the Devonian system in Belgium and the north of France, named from Givet. It constitutes the upper part of the Middle Devonian, and is equivalent to the *Stringocephalus* limestone of the Eifel, and the Torquay and Plymouth limestones of Devonshire.

gizzard-fish (giz′ärd-fish), *n.* A whitefish, *Coregonus clupeiformis*, found in the Great Lakes.

G. L. An abbreviation of *Grand Lodge*.

glabellad (glā-bel′ad), *adv.* [*glabella* + *-ad*[3].] Toward the glabella.

glabello-inial (glā-bel″ō-in′i-al), *a.* In *anthrop.*, pertaining to both the glabella and the inion: as, the *glabello-inial* length, the distance between the glabella and the inion.

glabello-occipital (glā-bel″ō-ok-sip′i-tal), *a.* In *anthrop.*, pertaining to both the glabella and the occiput; as, the *glabello-occipital* length, the maximum length of the head measured from the glabella to the occiput.

glabreity (glā-brē′i-ti), *n.* See *glabrity*.

glabrescent (glā-bres′ent), *a.* [*glabr-ous* + *-escent*.] In *bot.*, becoming glabrous, as organs that are hairy in the bud or young state and glabrous with age.

glacial, *a.* **3.** Of or relating to a glacier or an ice-sheet.—**4.** In *chem.*, assuming the solid state as a result of concentration: used chiefly of certain acids (as acetic, sulphuric, and phosphoric acids) which are commonly seen as liquids but solidify at low temperatures when concentrated by removal of water. In the case of phosphoric acid, water is not only removed by evaporation but is also evolved by the chemical decomposition of orthophosphoric acid, which is thus converted into metaphosphoric acid, the epithet *glacial* being applied to the latter.—**Croll's glacial theory,** an attempt by Croll to account for the existence of a glacial period by the known changes in the eccentricity of the earth's orbit. The maxima occur once in 100,000 to 200,000 years. At such periods there is an increased difference in the relative lengths of winter and summer. At the extreme the winters are 33 days longer than the summers and the sun's distance from the earth is 99,300,000 miles. It is argued that the extreme cold of such long winters might not be neutralized by the summer temperatures sufficiently to melt away the accumulated snow and ice.—**Glacial boundary,** the line which separates the intraglacial from the extraglacial field.—**Glacial climate, deposit, erosion.** See ★*climate*, etc.—**Glacial humor,** vitreous humor.—**Glacial hypothesis, glacial theory,** in *geol.*, the theory which accounts for the distribution of drifts and erratic boulders and for the scoring of the underlying rock-surface by the former extension of glaciers and ice-sheets: opposed to the ★*iceberg theory*.—**Glacial lake.** See ★*lake*[1].—**Glacial meal,** rock-flour formed by the grinding action of a glacier or coming from a glacier.—**Glacial mill.** Same as *moulin*.—**Glacial period.** Same as *glacial epoch* (which see, under *glacial*).—**Glacial planing,** the reduction of a rocky mass to a comparatively smooth surface by glacial erosion.—**Glacial scoring,** the scratching and grooving of a rock-surface by glacial erosion.—**Glacial scratches,** lines scored upon a rock-surface by sand and gravel which are dragged over it by a glacier. See *striation*, 2.—**Glacial terrace.** See ★*terrace*[1].—**Glacial theory.** See ★*glacial hypothesis*.

glacialism (glā′shial-izm), *n.* [*glacial* + *-ism*.] The scientific theory of the occurrence and action of glaciers.

glacialized (glā′shial-īzd), *a.* Having been affected by glaciers.

glaciate, *v. t.* **4.** To act upon by a glacier.

glacic (glā′sik), *a.* [L. *glacies*, ice, + *-ic*.] Same as *glacial*.

glacier, *n.* **2.** A vessel for holding ice and cooling wine.—**Alpine glacier,** a glacier of the type now characteristic of the Alps; a glacier which is fed by snow and névé gathered in an amphitheater and moving down a valley; a valley glacier.—**Cliff glacier,** a glacier which occupies a relatively small depression in the side of a mountain or in the escarpment of a plateau and rarely descends much below the snow-line. *Chamberlin and Salisbury*, Geol., I. 242. — **Continental glacier,** a sheet of ice which covers a large part of a continent, such as that which now covers Greenland, or that which covered northeastern North America in the glacial period; an ice-sheet.—**Dead glacier,** a stagnant glacier; a fossil glacier. *J. Geikie*, The Great Ice Age, p. 705.—**Fossil glacier,** in *geol.*, a term which has been applied by Toll and other Russian geologists to the remains of the Pleistocene ice-sheet on the coastal plains of northern Siberia. These ice-beds lie under a thin layer of soil which bears a vegetation, rest upon a ground moraine, and may be interbedded with frozen clays. From the frozen soil above this old ice carcasses of the mammoth and the hairy rhinoceros have been obtained, retaining flesh, skin, and hair. Also called *stone-ice, rock-ice,* and *dead-ice*.—**Hanging glacier,** a glacier of small size on so steep a slope that the ice breaks off and falls from its lower end. *Geikie*, Text-book of Geol., p. 540.—**Laurentide glacier,** a glacier originating in the Laurentian highland of Canada.—**Malaspina glacier,** a piedmont glacier in Alaska, between Mount St. Elias and the sea, extending over an area of 1,500 square miles; hence, any piedmont glacier.—**Piedmont glacier,** the lower outspreading part of a large glacier on low land, fed by alpine glaciers from neighboring mountain valleys. The Malaspina glacier of Alaska, near Mount St. Elias, is of this type.—**Plateau glacier,** a glacier or ice-sheet which covers a plateau, is fed by the snowfall on its own surface (not from higher névé reservoirs), and is usually bordered or fringed by one or more descending valley glaciers. *Geikie*, Text-book of Geol., p. 536.—**Recemented glacier,** a glacier formed of recompacted ice which has fallen down a cliff (as at the mouth of a hanging valley) from a higher glacier. Also called *regenerated glacier*.—**Reconstructed glacier,** a glacier formed by regelation of the snow and ice of avalanches. *Dana*, Manual of Geol., p. 242.—**Regenerated glacier.** Same as *recemented* ★*glacier*.—**Tidal glacier.** Same as *tide-water* ★*glacier*.—**Tide-water glacier,** a glacier which reaches down to tide-water and is capable of producing icebergs. —**Valley glacier,** a glacier which occupies a valley and is fed from a névé reservoir, in distinction from a plateau or a piedmont glacier; an alpine glacier.

glacier-bed (glā′shiėr-bed), *n.* The surface over which a glacier moves. *J. Geikie*, The Great Ice Age, p. 64.

glacier-burst (glā′shiėr-bėrst), *n.* The sudden release of a reservoir of water which has been impounded within or by a glacier. The melting of the ice may set free vast and destructive floods. *Nature*, Sept. 29, 1904, p. 541.

glacier-face (glā′shiėr-fās), *n.* The ice-cliff at the front or lower end of a tide-water glacier.

Nothing but *glacier-face* lined the coast, and the ice flowed down in curving lines as far as the eye could reach. *Geog. Jour.* (R. G. S.), XI. 122.

glacier-grain (glā′shiėr-grān), *n.* **1.** The granular texture of glacier-ice.—**2.** One of the grains of ice in a glacier. *J. Geikie*, The Great Ice Age, p. 32.

glacier-ice (glā′shiėr-īs), *n.* The ice of a glacier. It is peculiar in having a granular crystalline structure unlike that of pond-ice.

glacierist (glā′shiėr-ist), *n.* [*glacier* + *-ist*.] One who is specially versed in the knowledge of glaciers.

glacier-lake (glā′shiėr-lāk), *n.* A lake formed between the margin of a glacier and an encircling rim of land. A glacier-lake may be produced by the advance of an ice-front against the course of natural drainage.

The former occurrence of a number of *glacier-lakes* or "extra-morainic" lakes, such as are produced whenever a glacier or ice-sheet advances against or across the general slope of a country and impounds the natural drainage.
Nature, Aug. 28, 1902, p. 424.

glacier-milk (glā′shiėr-milk), *n.* The whitish water of a stream which issues from a glacier and is colored by suspended silt or rock-flour.

glacier-mill (glā′shiėr-mil), *n.* Same as *moulin*. *J. Geikie*, The Great Ice Age, p. 310.

glacier-silt (glā′shiėr-silt), *n.* Extremely fine rock-waste or rock-flour ground by a glacier from its bed, washed out by a glacial stream, and deposited in quiet water beyond.

glacification (glas″i-fi-kā′shọn), *n.* [L. *glacies*, ice, + *-fication*.] **1.** The process of changing water or snow into ice.—**2.** The formation of glaciers. *Tyndall*.

glaciofluvial (glā-shiọ̄-flö′vi-al), *a.* [L. *glacies*, ice, + *fluvius*, river: see *fluvial*.] Of or relating to processes or deposits which involve the action of glacial streams or of streams heading glaciers. *Amer. Geol.*, May, 1903, p. 285.

glaciofluviatile (glā-shiọ̄-flö′vi-ạ-til), *a.* Same as ★*glaciofluvial*.

glaciomarine (glā-shiọ̄-ma-rēn′), *a.* [L. *glacies*, ice, + *marinus*, of the sea.] Of or relating to processes or deposits which involve the joint action of glaciers and the sea, or the action of glaciers in the sea.

glaciometer (glā-shi-om′e-tėr), *n.* [L. *glacies*, ice, + Gr. *μέτρον*, meter.] Any device or object which serves to measure the movement of a glacier.

glade[1], *n.*—**Cedar glades.** See ★*cedar brakes*.

gladiolar (glā-dī′ọ̄-lär), *a.* [*gladiolus* + *-ar*[3].] Relating to the gladiolus, or the portion of the breast-bone lying between the manubrium and the xiphoid cartilage. [Rare.]

gladkaite (glad′kạ̈-īt), *n.* An eruptive rock forming dikes in the Gladkaia-Sopka ridge of dunite at the head-waters of the Travianta river, in the northern Urals. It consists of plagioclase (oligoclase-albite) in largest amount, together with biotite, muscovite, hornblende, epidote, magnetite, and apatite. *Duparc and Pearce*, cited in Nature, June 22, 1905, p. 192.

Gladstonianism (glad-stō′ni-ạn-izm), *n.* The policy or policies of W. E. Gladstone (1809–98), a Liberal statesman of Great Britain.

gladsum, *a.* A simplified spelling of *gladsome*.

glady (glā′di), *a.* [*glade* + *-y*[1].] Having glades; abounding in glades.

glairigenous (glār-ij′e-nus), *a.* [*glair* + *-i-* + *-genous*.] Giving rise to glairin or mucus.

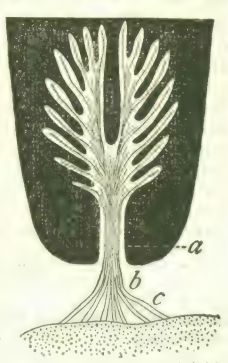
glam[2], *n.* **2.** A clamp used in the old method of castrating horses.

glamourous (glam′ọ̄-rus), *a.* Full of glamour or alluring charm.

glance, *n.* **6.** In *railroading*, an incline or shoot made of timber, erected on a mountain-side and designed to cause snow which slides down the mountain to glance or turn aside from the track. [Northwestern U. S.]—**7.** In *cricket*, a stroke by which, instead of being hit, the ball is allowed to strike the bat and to be deflected from it, usually to the leg side; a glide.—**Northern glance.** A sailors' name for the aurora borealis.

glance, *v. t.* **4.** In *metal-working*, to polish very highly; burnish; planish.—**5.** In *cricket*, to allow (the ball) to meet the bat and to be deflected from it, usually to the leg side.

glance-cobalt (glans′kō″bâlt), *n.* Same as *cobalt-glance* or *cobaltite*.



glance-fish (glans′fish), *n.* A common name of *Lampris luna*, a cosmopolitan fish found in open waters of the Atlantic and Pacific; the opah.

glance-pitch (glans′pich), *n.* A lustrous bituminous mineral allied to asphaltum and bitumen.

glancer (glan′sėr), *n.* Same as ★*fender-skid*.

glance-stroke (glans′strōk), *n.* In *cricket*, a stroke by which the ball is turned in its course, usually to the leg side, by playing it with the surface of the bat held slantwise. See ★*glance*, *n.*, 7.

gland, *n.*, 4. (*c*) The sliding member of an engine stuffing-box, by which the packing is compressed against the rod by endwise pressure from the bolts or nut.—5. In *founding:* (*a*) A clamp; a hooked bar used for clamping together the parts of a molder's flask. (*b*) A plate through which the ends of a binding-band or clevis pass; a clip.—**Accessory glands of the vasa deferentia,** in *entom.*, certain glands, differing greatly in shape and number with the different orders of insects, whose secretions mix with the semen or form spermatophores. In many insects there is only a single pair; in others there are many; in some they are branched.—**Adhesive glands,** in *entom.*, certain glands, occurring in bees and ants, connected with the poison-glands and corresponding to the tubular glands of the *Orthoptera* which secrete the glue with which the eggs are fastened together. — **Adrenal gland.** Same as *adrenal, n.*—**Albumin glands,** glandular developments in the ventral body-wall in the generative segments of some earthworms. They probably secrete the albuminous matter found in the cocoon. Also called *capsulogenous glands.*—**Alkaline glands,** in *entom.*, those glands which in the aculeate *Hymenoptera*, as the bees, secrete a feebly alkaline substance which, with the acid product of other glands, makes the poison of the sting.—**Alluring glands,** in *entom.*, scent-glands, occurring in the males of certain insects, the odor from which is supposed to attract or excite the females. They are more abundant in the *Lepidoptera*, but have also been found in certain *Trichoptera* and *Orthoptera*. The androconia may be alluring, and alluring glands may occur in various parts of the abdomen or in the front or hind legs. In the *Lepidoptera* they are usually connected with tufts or pencils of hair, concealed or unconcealed, which serve to distribute the odor.—**Anal glands.** (*a*) and (*b*). See *anal.* (*c*) In *entom.*, paired or single glands situated near the rectum and usually connected with it. The secretion of these glands is frequently fetid in odor, and they then function as repugnatorial organs.—**Antennal gland,** the gland upon the basal joint of the second antenna in most *Crustacea*. It seems to be wanting only in the *Isopoda*. —**Antennary gland,** in *Arthropoda*, the green-gland, an organ at the base of each antenna by which the function of renal excretion is performed.—**Blandin's glands.** Same as *Nuhn's* ★*glands.*—**Bulbocavernous glands.** Same as *Cowperian glands* (which see, under *Cowperian*). —**Byssus gland,** the gland, situated in or on the foot, which secretes the silky byssus by means of which *Mytilus, Lima, Pinna,* and other lamellibranchs are anchored to foreign bodies. —**Caudal gland,** a gland situated near the base of the tail; in mammals, same as *perineal* ★*gland.* —**Cervical glands.** (*a*) The lymphatic glands in the neck. (*b*) In *Uncinaria*, a pair of pear-shaped bodies of unknown function, which lie one on each side of the pharynx and probably open externally near the mouth. —**Conglobate gland.** (*b*) In *entom.*, a gland, the function of which is not known, connected with the male genitalia of the cockroach and opening separately from the ejaculatory duct.—**Corrosive glands,** in *entom.*, certain anal glands possessed by the adults of some beetles, particularly certain *Carabidæ*, from which a corrosive fluid is expelled as a means of defense. *Brachinus, Agonum, Pherosophus, Galerita, Helluo, Paussus, Ozæna, Cerapterus, Staphylinus, Stenus, Ocypus, Lacon,* and other genera possess these glands, and *Mormolyce phyllodes*, a species of Java, is said to secrete a fluid so corrosive that it paralyzes the fingers for twenty-four hours.—**Coxal glands.** (*a*) In *Peripatus*, a series of pairs of glands lying in the lateral compartments of the body-cavity, their ducts opening on the lower surfaces of the legs. They vary in the two sexes and in different species. (*b*) Eversible repugnatorial glands situated in the coxa of certain of the lower insects, as the *Symphyla* and *Synaptera*. See *defensive* ★*glands.*—**Defensive glands,** certain eversible glands often found among the *Insecta*, which are also called repugnatorial glands. They are situated in many different parts of the body and are usually simple evaginable hypodermic pouches which when everted give forth a disagreeable odor which is supposed to be protective. See *repugnatorial pores*, under *repugnatorial.*—**Dermal glands,** the skin-glands of insects. The function of some of them is unknown; others secrete hairs, spines, wax, honey-dew, or other substances. —**Eversible glands.** See *defensive* ★*glands.*—**Fetid glands,** certain glands, occurring in several groups of insects in varying parts of the body, which secrete a liquid having a disagreeable odor. See *defensive* ★*glands.*—**Filippi's gland,** a paired gland in the labium of silkworms the secretion of which enters the common duct where the silken fluid is formed.—**Frontal gland.** Same as ★*head-gland.* —**Gastro-epiploic glands,** lymphatic glands in the great omentum near the greater curvature of the stomach.—**Gland of Dufour,** the alkaline glandular organ of the poison-apparatus of bees and other aculeate *Hymenoptera*, and of some *Ichneumonidæ* and *Tenthredinidæ*.—**Gland of Leiblein,** in some gastropods, as *Murex*, a glandular structure situated near the middle of the length of the esophagus and communicating with the latter.—**Glands of Asellius.** Same as *pancreas Aselli.*—**Glands of Duverney,** vulvovaginal glands.—**Granular gland.** Same as ★*granule-gland.*

Byssus of a Lamellibranch with its Cavity and Duct.

a, diagrammatic transverse section through the foot; *b*, main stem; *c*, terminal threads attaching the byssus to a foreign object. The fibers of the byssus are formed in the cavities of the byssus gland, whence they issue through the duct to the exterior.

(From Lang's "Comparative Anatomy.")

—**Harderian gland,** a gland which lies in advance of the orbit of the eye and whose function is to lubricate the eyelids and, particularly, the nictitating membrane when this is present.—**Hemclymph glands,** glandular structures intermediate between the spleen and the lymphatic glands, believed to be concerned in hematopoiesis.—**Hibernating gland,** a gland, possessed by the hedgehog, in which fat is stored for consumption during the winter sleep.—**Humeral gland,** a gland opening on the upper surface of the antebrachial, or humeral membrane, of the bats of the genus *Saccopteryx*. It is characteristic of the males, being rudimentary or absent in the females.—**Krohn's gland,** in the *Phalangidæ*, a gland which opens on the dorsal side of the cephalothorax.—**Méry's glands.** Same as *glands of Bartholin* (which see, under *gland*).—**Muciparous glands.** Same as *mucous glands* (which see, under *gland*).—**Multicellular gland,** a gland in which the excretory cells discharge their excretion into a common duct, where it accumulates before it escapes.—**Mushroom gland,** in *entom.*, the combined accessory glands of the vasa deferentia of the cockroach. See *mushroom-shaped gland*, under *gland.*—**Nabothian glands,** small mucous follicles in the mucous membrane which lines the neck of the womb.—**Nephridial gland,** in some gastropods, a differentiated part of the kidney consisting of canals with ciliated epithelium and of connective tissue, muscles, and blood-lacunæ.—**Nuhn's glands,** two glands near the tip of the tongue the ducts of which open on the inferior surface. Also called *Blandin's glands.*—**Odoriferous glands.** (*b*) In *entom.*, various hypodermal glands, giving forth an odor, which occur in many insects and in different parts of the body.—**Optic gland,** in cephalopods, an organ, of unknown function, consisting of a large soft body which lies in immediate contact with the eye. Also called the *white-body.*—**Oral gland,** any one of the salivary glands which lie about the mouth.

The classification of the mammalian *oral glands*, their occurrence and structure in the different animals.

Science, June 28, 1901, p. 1025.

Ovoid gland, in echinoderms. Same as ★*axial organ.*—**Parapodial gland,** in polychætous annelids, one of the collections of gland-cells found on the lobes of the parapodia.—**Pedal gland,** in gastropods, one of the mucus-secreting glands of the foot.—**Pedipalpal gland,** in many *Arachnoidea*, certain glands in the second pair of appendages. They are regarded as poison-glands in some genera, in others as salivary glands, and in others as spinning-glands; but little is known about their function. —**Pericardial gland,** in most mollusks, a glandular differentiation of the endothelial wall of the pericardium, having perhaps an excretory function. Also known as *Keber's organ.*—**Perineal gland,** a gland opening in the perineum. It is from such a gland, lying just beneath the tail of various species of civet cats, that the civet of commerce is obtained. See *civet*[1], 1.—**Rectal glands.** (*b*) In gephyreans, the glands near the anal opening.—**Repugnatorial glands.** Same as *defensive* ★*glands.* **Serous gland,** a salivary gland which produces a thin serous secretion.—**Setiparous glands,** in annelids, glands which produce the setæ, or which may be modified into spinning-glands or other structures.—**Skene's glands,** two minute tubular glands in the floor of the female urethra.—**Spermiducal gland,** in earthworms, a glandular appendage attached to and opening into the vas deferens or sometimes opening independently to the exterior. Also known as *prostate.* —**Splenolymph glands,** the more common variety of hemolymph glands, of rounded form, found in many parts of the body.—**Unicellular gland,** a gland which consists of a single cell, or one in which the ducts through which the excretion escapes are parts of the bodies of the excretory cells: contrasted with a gland in which the excretory cells pour their excretion into a common duct.—**Uterine** or **utricular glands,** follicles of the mucous membrane of the uterus.—**Venomous glands,** in *entom.*, same as *poison-gland.* See cut under *Hymenoptera.*—**Vitelline gland,** in platyhelminths, one of the glands which supply egg-cells with the nutritive yolk necessary for their nourishment; a vitellarium.

gland-cell (gland′sel), *n.* A secreting cell.

On either side of the animal, and lying partly in the longitudinal muscle-layer, partly in the gelatinous connective tissue within the body of the animal, is a well-marked layer of *gland-cells.*

Proc. Zool. Soc. London, 1901, II. 93.

Glanders bacillus. See ★*bacillus.*

gland-packer (gland′pak″ėr), *n.* A workman who packs the gland-box of an engine or machine. See *gland*, 4.

glandula, *n.*—**Glandulæ concatenatæ,** a chain of lymphatic glands situated in the deeper structures of the neck and extending from the skull to the clavicle. *Jour. Trop. Med.*, July 1, 1903, p. 208.

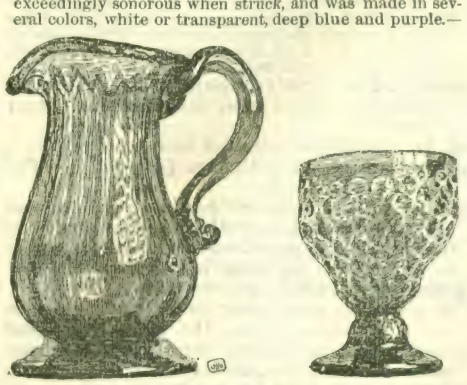
Glandular cancer. Same as *adenocarcinoma* and *adenosarcoma.*—**Glandular epithelium.** See ★*epithelium.* —**Glandular organ,** in echinoderms. Same as ★*axial organ.*

glanduliform (glan′dū-li-fôrm), *a.* Like a gland in appearance or function. *Syd. Soc. Lex.*

glanduligerous (glan-dū-lij′ę-rus), *n.* [NL. *glandula*, gland, + L. *gerere*, bear.] Gland-bearing; glandular: as, the *glanduligerous* edge of the mantle of a mollusk.

glanz-gold (glänts′gōlt), *n.* [G.] A cheap style of ceramic gilding; it comes from the kiln in a bright state and requires no further treatment.

glare-wormt (glār′wėrm), *n.* Same as *glow-worm.*



glass. I. *n.*, 1. In *petrog.*, glass is the natural product of the rapid cooling of igneous magmas, and in large masses is known as *obsidian, pitchstone,* and *pumice.* It may be colorless or of various colors, as white, yellow, orange, red, green, and black. It forms the ground-mass of many volcanic rocks, being sometimes recognizable by the unaided eye, but often only microscopically. *Glass base* is the

name given to it when it forms the matrix for microscopic crystals in the ground-mass of a rock.—**Appert glass.** See the extract.

"*Appert*" *glass*, which, by reason of its composition and method of manufacture, can be made into vessels of any symmetrical shape possessing unusual strength and resisting perfectly the action of acids, electricity and climatic changes.

Electrochem. Industry, April, 1904, p. 165.

Blown glass, glass which is shaped by the blowing process.—**Chipped glass,** a variety of rough sheet-glass used for partitions or screens. The sheets are first depolished by subjecting them to the sand-blast. The ground side is then covered with a coating of the best grade of liquid glue. When dry the sheets are placed on edge in frames in the chipping-room, where the temperature is raised to the proper degree by coils of steam-pipe beneath. As the glue is cracked by the heat it curls up in small pieces, drawing with it surface chips from the glass, to which it firmly adheres, leaving a beautiful pattern of fern-like tracery. About thirty-six hours are required to complete the peeling process.—**Continuating glasses,** in *photog.*, glasses tinged with red or yellow, which possess the power of continuing the darkening of the photograph after it has been removed from the camera and placed under them. This action was discovered by A. E. Becquerel.—**Copper glass.** Same as *Alexandria blue* (which see, under *blue*).—**Corrugated glass,** unpolished plate-glass with a corrugated pattern, for use in floors, roofs, and partitions. See *figured rolled* ★*glass.*—**Fichtel glass,** a large drinking-glass painted with enamel colors, first produced in the Fichtel Mountains in Upper Franconia, Bavaria; specifically, a drinking-glass bearing a representation of one of the peaks of this range, the Ochsenkopf, surmounted by the head of an ox, a characteristic decoration in the seventeenth and eighteenth centuries.—**Figured rolled glass,** unpolished plate-glass, formed by casting on a casting-table the surface of which is engraved with an ornamental pattern which is impressed upon the surface of the glass. Figured glass is used for roofs, floors, and partitions. See *plate-glass.* —**Half-crystal glass,** glass which contains lime instead of lead.—**Hard glass,** glass which can be rendered plastic only by a comparatively high temperature. Such glass is often mechanically hard also at ordinary temperatures.—**High glass,** a barometer the standing of which is above 30 inches, the normal standing of the barometer at sea-level.—**Jena glass,** glass made in Jena, Germany; specifically, certain varieties especially adapted to the manufacture of scientific apparatus, such as lenses, thermometers, etc., and of chemical ware. —**La Bastic glass.** See *tempered, toughened,* or *hardened glass*, under *glass.*—**Lead glass.** Same as *flint-glass.*—**Lime glass,** glass containing lime; crown- or window-glass.—**Low glass,** a barometer when its standing is less than 30 inches.—**Moniconostereoscopic glasses,** in *photog.*, a pair of glasses so mounted that a single picture viewed through them has a stereoscopic effect. The glasses have one surface plane and the other concave, with a curvature such as would be formed by a straight line which moves parallel to itself, guided by a parabolic curve. The glasses are so set that the straight line, which forms the cylindroparabolic surface, shall be vertical when the glasses are held before the eyes.—**Onyx glass,** glass made to imitate onyx in coloring.—**Quartz glass,** a variety of glass which contains quartz. *Amer. Jour. Sci.*, Dec., 1903, p. 469.—**Sandwich glass,** glassware made at Sandwich, Massachusetts, where the first pressed glass was produced in 1827. Tea-cups, plates, salt-cellars, and other articles, with historical and political devices, such as busts of eminent Americans, representations of famous ships, forts, and monuments, etc., were extensively manufactured for twenty years or more.—**Siemens's toughened glass.** See *tempered, toughened,* or *hardened glass*, under *glass.*—**Singing glass,** a thin glass vessel having resonating qualities.—**Slag glass,** glass which contains slag from an iron-furnace.—**Soft glass,** glass which is readily fused, or which becomes plastic at a comparatively low temperature. Such glass is often mechanically soft also at ordinary temperatures.—**Spread glass.** Same as *broad glass* or *cylinder-glass* (which see, under *broad*).—**Stiegel glass,** glassware made by Baron Henry William Stiegel, at Manheim, Lancaster Co., Pennsylvania, between 1768 and 1774: supposed to be the first flint-glass made in America. This glass is very characteristic, having been blown in iron molds with surface patterns; it is exceedingly sonorous when struck, and was made in several colors, white or transparent, deep blue and purple.—

Cream-jug and Salt-cellar of Stiegel Glass.
In the Pennsylvania Museum, Philadelphia.

White glass, brilliant clear glass which contains no lead, as distinguished from *flint* or *crystal glass.*

II. *a.*—**Glass sand, silk, wool.** See ★*sand*[1], ★*silk, wool.*

Glass-blowers' cramp or **mouth.** See ★*mouth.*

glass-cloth, *n.* 3. An abrasive cloth made by sifting finely powdered glass on cloth covered with glue. *Stand. Dict.*

Glass-cutter's gage. See ★*gage*[2].

glass-eel (glȧs′ēl), *n.* A young conger-eel. The young do not resemble the adults: they are elongate, thin, and have very small heads.

glassen (glȧs′n), *v. t.* [*glass* + *-en*[1] (3).] To coat or cover (pottery or the like) with glaze; glaze.

glass-mold (glȧs′mōld), *n.* **1.** A hinged mold in which glass is blown into form. Intaglio designs are usually cut in it which are reproduced in relief on the molded object. See cut at ★*blowing-mold*.—**2.** A mold in which glass is pressed to imitate cut-glass.

glasspox (glȧs′poks), *n.* Chickenpox in which the vesicles are for the most part cone-shaped and glittering.

glass-printing (glȧs′prin″ting), *n.* In *photog.*, the art of printing on glass by the transfer process. *Stand. Dict.*

glass-wave (glȧs′wāv), *n.* A sound-wave in glass.

When standing sound-waves are produced in a glass tube two distinct systems of waves are sometimes observed, the air-waves within the tube, and waves which traverse the walls of the tube. The latter are called *glass-waves*. *M. W. Travers*, Exper. Study of Gases, p. 275.

glass-wing (glȧs′wing), *n.* A butterfly which has transparent wings or wings that are transparent in spots.—**Little glass-wing,** an American hesperiid butterfly, *Euphyes verna*, brown in color, with a row of white or translucent spots on the fore wing. It occurs from New York to Kansas and southward along the Alleghanies.

glass-work, *n.* **3.** In *card-games*, cheating with the aid of a glass or reflector, usually concealed in some article on the table, by means of which the sharper can read the cards he deals to his adversary.

glasswort, *n.* About 6 species of glasswort (*Salicornia*) are now said to be found in North America, inhabiting mainly the salt-marshes of the coast, but sometimes (the same or different species) growing on saline ground inland. *S. herbacea*, the *slender* or *jointed glasswort* or marsh-samphire (also called *pickle-plant*), together with *S. Bigelovii*, turns a vivid red in autumn, becoming very showy on the Atlantic coast, while *S. ambigua*, the *woody glasswort* (also called *pickle-weed*), presents a diversity of brilliant color in the Pacific salt-marshes.—**White glasswort,** the common sea-blite, *Dondia maritima*. See *blite*[2].

Glassy humor of the eye. Same as *vitreous body of the eye*.

glastum (glȧs′tum), *n.* [L. *glastum*, < OCelt. **glaston*, whence W. and Bret. *glas*, green, OIr. glass, Ir. *glas*, green, pale, Gael. *glas*, gray.] A plant otherwise known as *woad* (*Isatis tinctoria*).

glaucine, *a.* **II.** *n.* A colorless bitter alkaloid contained in the leaves of the horn-poppy, *Glaucium Glaucium*. It forms crystalline nacreous scales when deposited from water.

glaucochroite (glâ-kō-krō′īt), *n.* [Gr. *γλαυκός*, bluish green or gray, + *χρόα*, color, + *-ite*[2].] A silicate of calcium and manganese occurring in bluish-green prismatic crystals at Franklin Furnace, New Jersey. It is analogous in formula to the species of the chrysolite group.

glaucodymium (glâ-kō-dim′i-um), *n.* [NL., < Gr. *γλαυκός*, bluish green or gray, + NL. (*di*)*dymium*.] In *chem.*, a supposed new element announced by Chronstschoff in 1897 as present in salts of didymium as previously known. No confirmation of its existence has since then been published.

glaucomatic (glâ-kō-mat′ik), *a.* [*glaucoma*(*t-*) + *-ic*.] Pertaining to or characteristic of glaucoma.

Glauconiidæ (glâ-kō-nī′i-dē), *n. pl.* [NL. *Glauconia*, the type genus, + *-idæ*.] A family of harmless snakes with teeth in the short and stout lower jaw only. The pelvic girdle is more complete than in any other existing snakes; the ilium, ischium and pubis may be made out; and there is a vestigial femur. There are about 30 species, which inhabit parts of western Asia, Africa, and South America.

glauconitization (glâ″kō-nit-ī-zā′shon), *n.* The process of introducing glauconite into a rock. This may be by precipitation in spaces of the rock or by actual replacement of other constituents. *Geikie*, Text-book of Geol. (4th ed.), p. 177.

Glauconome, *n.* **4.** A genus of Paleozoic cryptostomatous bryozoans, now regarded as synonymous with *Pinnatopora*.

glaucosuria (glâ-kō-sū′ri-ą), *n.* [Gr. *γλαυκός*, bluish green, + *οὖρον*, urine.] Same as ★*indicanuria*.

glaury (glâ′ri), *a.* [*glaur* + *-y*[1].] Muddy; soiled with glaur: as, *glaury* boots. [Scotch.]

glaze, *n.* **4.** Stock evaporated to a thin paste by boiling, and applied to meats to give them a polished surface.—**5.** A surface coating or sheet of ice. [Local, U. S.]—**Coral glaze,** a coral-red glaze found on Chinese porcelain.—**Crystalline glaze,** a glaze which shows crystalline effects, produced by special treatment in the kiln.—**Flashed glaze,** a dexterous manipulation of glazes perfected by the Chinese, such as blues splashed over with spots of red and lilac, at first sight appearing to be the result of accident, but really the result of careful manipulation. *W. P. Jervis*, Encyc. Ceram., p. 213.—**Flint glaze,** in *ceram.*, a glaze of which powdered flint is the principal ingredient.—**Fluid glaze,** in *ceram.*, a glazing composition, prepared in liquid form, in which the ware is dipped or which is applied to the surface of the ware with a brush, as distinguished from *dry glaze* (such as powdered galena) or *vapor-glaze* (salt).—**Fritted glaze,** a glaze which contains ingredients which have been melted into a glass and ground before being applied to the ware. Compare *raw* ★*glaze*.—**Galena glaze.** Same as *lead-glaze*. See also ★*dusting*.—**Kaolinic glaze,** a glaze for porcelain, of which kaolin is the principal ingredient.—**Lang yao glaze,** Chinese sang-de-bœuf ('ox-blood') glaze, said to have been invented by Lang T'ing-tso, superintendent of the Imperial Porcelain Works at Kingteh-Tsin, early in the reign of K'ang-hsi (1662–1722).—**Liver glaze,** a variety of sang-de-bœuf glaze, of a dull, dark, or purplish-red color, usually without the iridescence which characterizes the true ox-blood glaze; a glaze or enamel having the color of liver.—**Raw glaze,** a glaze composed of raw materials which are melted into a glass for the first time when fired on the ware in the glost-kiln. Compare *fritted* ★*glaze*.—**Silicious glaze,** a glaze produced by fusing an alkali, such as potash or soda, with sand; a coating of glass.—**Slow-flowing glaze,** in *ceram.*, a thick viscous enamel or glaze which trickles in heavy drops down the outer surface of the vessel, during the firing, as in some of the old Japanese pottery and the recent stoneware reproductions of the Dedham (Massachusetts) pottery.—**Stanniferous glaze,** an opaque glaze of a white color containing oxid of tin: same as *stanniferous* ★*enamel*. See ★*tin-glazed*.—**Tea-dust glaze,** a variety of soufflé glaze of a greenish tone seen on Oriental porcelain, produced by blowing a green enamel through gauze upon a yellowish-brown ground. See *soufflé decoration*, under *soufflé*.

glaze-kiln (glāz′kil), *n.* Same as ★*glost-kiln*.

Glaziers' salt. See ★*salt*[1].

glaziery (glā′zhėr-i), *n.* The work of a glazier; glass-work.

glazing, *n.* **7.** In *leather-manuf.*, the process of rolling leather with a glass roller in order to give it a bright finish; also, less commonly, the light application with a sponge of a solution which when dry gives to the leather its final luster. *C. T. Davis*, Manuf. of Leather, p. 612.

glazing-roll (glā′zing-rōl), *n.* One of the two smooth rolls between which leather is passed under pressure to give it a high gloss and uniform thickness. *C. T. Davis*, Manuf. of Leather, p. 615.

glebal (glē′bal), *a.* In *bot.*, of or pertaining to the gleba. See *Gleba*, 3.

gled-wing (gled′wing), *n.* An artificial fly. Also called *redwing*. *N. E. D.*

gleicheniaceous (glī-ke-ni-ā′shius), *a.* Of or pertaining to the *Gleicheniaceæ*, a family of ferns.

glendoveer (glen-dō-vēr′), *n.* [An arbitrary alteration by Southey of a French-spelled term in Sonnerat's "Voyage aux Indes" (1782), *grandouver*, which is appar. an imperfect transcription (simulating F. *grand*, great) of the Sanskrit *gandharvá* (Hind. *gandharb*), one of a class of minor deities, demons, or 'jinn' of whose origin and functions the usual contradictory accounts are given.] In Southey's poem, "The Curse of Kehama" (1810), one of a race of beautiful sprites.

Glenoid notch. See ★*notch*.

glen-pepper (glen′pep″ėr), *n.* [Also *glenn pepper*; < *glen* + *pepper*.] A wild cress, *Lepidium campestre*, also called *poor-man's-pepper*, and more properly *field-cress*.

glen-weed (glen′wēd), *n.* Same as ★*glen-pepper*.

glia (glī′ą), *n.* [NL., < Gr. *γλία*, glue.] The glia-cells collectively of the central nervous system in vertebrates; neuroglia.

gliabacteria (glī″ą-bak-tē′ri-ą), *n. pl.* [Gr. *γλία*, glue, + *bacteria*, pl. of *bacterium*.] In *bacteriol.*, the members of the family *Bacteriaceæ* which form gelatinous zoöglœa. *Billroth*.

glia-cell (glī′ą-sel), *n.* One of the stellate sustentacular cells found in the central nervous system; a component element of the neuroglia.

gliacoccus (glī-ą-kok′us), *n.*; pl. *gliacocci*(*-sī*). [Gr. *γλία*, glue, + *κόκκος*, berry (spore).] In *bacteriol.*, any member of the family *Coccaceæ* which forms gelatinous zoöglœa. Incorrectly spelled *gliacoccos*. *Billroth*.

glial (glī′al), *a.* [*glia* + *-al*[1].] Of or pertaining to the glia or neuroglia. *Buck*, Med. Handbook, II. 263.

glia-tissue (glī′ą-tish″ō), *n.* A reticulum of fine fibers which forms the framework of the glia or neuroglia. *Jour. Exper. Med.*, Nov. 29, 1901, p. 72.

glidder, *a.* **II.** *n.* A loose, rolling stone on a hillside. [Local, Eng.]

glide, *v.* **II.** *trans.* In *cricket*, to glance; allow the ball to meet the bat and be deflected from it, usually to the leg side.

glide, *n.* **4.** In *phonetics*, a fleeting sound produced in passing from one position of the organs of speech to another, as in pronouncing the sound-combination *ki* in the word 'kind' designated the *off-glide* of the first letter (*k*) and the *on-glide* of the second (*i*). *H. Sweet*, Eng. Sounds, § 23.—**5.** In *cricket*, a glance; a stroke by which, instead of being hit, the ball is allowed to strike the bat and to be deflected from it, usually to the leg side.—**Glide consonant,** a consonant formed without any fixed configuration of the organs of speech.—**Glide vowel,** a vowel which cannot form a syllable by itself; a diphthongic vowel. *H. Sweet*, Eng. Sounds, § 22.

glideless (glīd′les), *a.* [*glide* + *-less*.] In *phonetics*, passing from one position of the organs of speech to another without producing a glide or transition sound, as in the case of *nd* in *and*. *H. Sweet*.

glideness (glīd′nes), *n.* In *phonetics*, gliding quality.

Glideness and syllabicness generally go together. *H. Sweet*, Eng. Sounds, § 23.

glide-plane (glīd′plān), *n.* Same as *gliding-plane*.

glider[1], *n.* **2.** In *aëronaut.*, a gliding-machine.

Photographs of the paths of *gliders* taken by Mr. Williams some time ago with magnesium light distinctly showed the two oscillations, and in several cases the final overturning in a manner perfectly consistent with theory. *Nature*, March 16, 1905, p. 464.

glide-wort (glīd′wėrt), *n.* The hemp-nettle, *Galeopsis Tetrahit*.

gliding-machine (glī′ding-mą-shēn″), *n.* A machine for gliding through the air from a higher to a lower level, propelled by the force of gravity, like a flying-squirrel.

On account of the internal irregularities which all winds possessed, it was a great deal more difficult to control any *gliding machine* on the ground than when the operator was in the air, and . . . this was especially true of the machines that had been provided with the automatic regulating devices. *Sci. Amer. Sup.*, Jan. 22, 1898, p. 18390.

glimmerous (glim′ėr-us), *a.* [*glimmer* + *-ous*.] Glimmering.

Thou mirror of Purity, when shall the elfin-lamp of my *glimmerous* understanding, purified from . . . gross desires, shine like the constellation of thy intellectual powers! *Burns*, Letter to W. Nicol, Feb. 20, 1793, in Prose Works, VI. 56.

glimps, *v.* and *n.* A simplified spelling of *glimpse*.

glinkite (glingk′īt), *n.* [Named after *Glinka*, a Russian general.] A pale-green variety of chrysolite, or olivin, occurring in talcose schist in the Urals.

gliomatosis (glī″ō-mą-tō′sis), *n.* [NL., < *glioma*(*t-*) + *-osis*.] A morbid condition marked by a tendency to the formation of gliomatous tumors.

gliomyoma (glī″ō-mī-ō′mą), *n.*; pl. *gliomyomata* (*-mą-tą*). [NL., < *glio*(*ma*) + *myoma*.] A tumor having the characters of both a glioma and a myoma.

gliomyxoma (glī″ō-mik-sō′mą), *n.*; pl. *gliomyxomata* (*-mą-tą*). [NL., < Gr. *γλία*, glue, + *μύξα*, mucus, + *-oma*.] A glioma which has undergone partial myxomatous degeneration.

gliosis (glī-ō′sis), *n.* [NL., < Gr. *γλία*, glue, + *-osis*.] Circumscribed hypertrophy of glia-tissue or neuroglia which causes partial destruction of the brain-substance.

glischrin (glis′krin), *n.* [Gr. *γλίσχρος*, glutinous, + *-in*[2].] A mucinous substance produced in urine by *Bacterium glischrogenes*.

glissade, *n.* **3.** In *music*, same as *glissando*.

glissaune (gli-sȧn′), *n.* [Of Ir. origin; not traced.] The coalfish, *Gadus virens*, one of the cods common in the Baltic and other northern seas, reaching a weight of 20 pounds.

On the Irish coast the fishermen catch large numbers of medium-sized coal-fish, called, locally, "*glissaunes*," by trailing flies, the lines being attached to long bamboo poles projecting from the stern of sailing boats. *Encyc. Brit.*, XXXII. 486.

glistener (glis′n-ėr), *n.* A gold coin. *Moore*, Fudge Family, vi. 45. *N. E. D.* [Slang.]

glitter[2] (glit′ėr), *n.* A talus slope. [Local, Eng.]

Such slopes [of talus] are known as *glitters* in Northumberland, [and] glyders in North Wales. *Sir J. Lubbock*, Scenery of England, vi.

glittery (glit'ėr-i), *a.* [*glitter* + *-y*[1].] Full of glitter; glittering.

gloat (glōt), *n.* A local English name for a variety of eel, of medium size and dark color.

global (glō'bal), *a.* [*globe* + *-al*[1].] 1. Spherical; globe-shaped: as, the *global* earth.—2. Relating to the round world; world-wide.

With the faculties and tastes of a historian, M. de Vogüé directs his thoughts by preference to man. . . . His ambition, to use a word of his own, is to be '*global*.'
T. Child, in Harper's Mag., Sept., 1892, pp. 492, 493.

globate, *a.* **II.** *n.* A globular sponge-spicule such as occurs in the tetractinellid genera *Geodites* and *Geodia*.

globe, *n.* 7. In *golf*, the ball.—**Counterpoise globe.** See ★*counterpoise.*—**Dioptric globe.** Same as ★*holophane.*—**Epidermic globes.** Same as *epithelial pearls* (which see, under *pearl*).—**Ferdinand's globes,** a crude thermometer described by Ferdinand II. of Florence about 1630, consisting of closed empty glass globes resting in equilibrium in the midst of a tall glass of water. The globes descend when the water is warmed and rise when it cools. Compare *Cartesian devil*, under *Cartesian.*—**Globe aspect.** See ★*aspect.*—**Spiral globe,** a globe for inclosing an artificial light, made of spiral or twisted glass. *W. L. Dibdin*, Public Lighting, p. 409.

globe-animalcule (glōb'an-i-mal″kūl), *n.* Same as *globe-animal*.

globe-artichoke (glōb'är″ti-chōk), *n.* The common garden-artichoke, *Cynara Scolymus*, so called from its globular heads.

globe-berry (glōb'ber″i), *n.* The yew, *Taxus baccata*.

globe-flower, *n.*—**American globe-flower.** Same as *spreading globe-flower* (which see, under *spread, v. i.*).

globostellate (glō-bō-stel'āt), *a.* and *n.* [L. *globus*, ball, + *stellatus*, starred: see *stellate*.] **I.** *a.* Having rays departing from a globular center, as in certain tetractinellid sponge-spicules.

II. *n.* A globostellate sponge-spicule.

Globular projection. See ★*projection.*—**Globular texture,** in *petrog.*, a texture produced in aphanitic and glassy rocks by the presence of globules or spherulites.

globularetin (glob″ū-la-rē'tin), *n.* [*globular*(*in*) + *-et-* + *-in*[2].] A compound, C_7H_6O, produced by the action of dilute acids on globularin.

Globulariaceæ (glob-ū-lā-ri-ā'sē-ē), *n. pl.* [NL. (Link, 1829), ‹ *Globularia* + *-aceæ*.] A small family of dicotyledonous sympetalous plants of the order *Polemoniales*, typified by the genus *Globularia* (which see). It is characterized by flowers with 5-lobed calyx and corolla, four or only two stamens, and two 1-seeded carpels. There are three genera and about 20 species, natives of Europe, the Canary Islands, the Azores, and Sokotra perennial herbs with obovate entire, often radical leaves, and flowers in dense heads, usually globular.

globularin (glob'ū-lār-in), *n.* [*Globularia* + *-in*[2].] An amorphous bitter glucoside, $C_{15}H_{20}O_8$, contained in the leaves of *Globularia Alypum*.

globule, *n.*—**Morgagni's globules,** glassy droplets seen between a cataractous lens and its capsule. Also called *Morgagni's spheres*.

globulicidal (glob″ū-li-sī'dal), *a.* [L. *globulus*, globule, + *-cida*, ‹ *cædere*, kill, + *-al*[1].] Destructive to the corpuscles of the blood, especially the red corpuscles: noting the ability of the blood-serum of one animal to destroy the red blood-corpuscles of another animal.

These extensive deposits of pigment which were found in nearly all parts of the general circulation seem, without doubt, to be referable to a greatly increased *globulicidal* action of the plasma.
Jour. Exper. Med., Feb. 5, 1902, p. 145.

globuliferous (glob-ū-lif'ė-rus), *a.* [L. *globulus*, globule, + *ferre*, bear.] Bearing or containing globules; in *geol.*, containing concretions or segregations which consist of mica or of feldspar and mica: called *spherophyric* by J. D. Dana: equivalent to the more common terms *spheroidal* or *orbicular*, used of spheroidal aggregates in granitoid rock.

globuliform (glob'ū-li-fôrm), *a.* [L. *globulus*, globule, + *forma*, form.] Having a globular form; shaped like a globule.

globuligenic (glob″ū-li-jen'ik), *a.* [L. *globulus*, globule, + *-genus*, -producing, + *-ic*.] Producing blood-corpuscles. *W. D. Halliburton*, Chem. Physiol. and Pathol., p. 265.

globulimeter (glob-ū-lim'e-tėr), *n.* [L. *globulus*, a globule, + Gr. *μέτρον*, measure.] A device for determining the number of globules in a definite amount of blood.

globulinose (glob'ū-li-nōs), *n.* [*globulin* + *-ose*.] Same as ★*globulose*.

globulist (glob'ū-list), *n.* [*globule* + *-ist*.] A homeopathist: so called from the homeopathic practice of administering remedies in the form of globules. *Dunglison*.

globulose, *a.* **II.** *n.* An albumose derived from a globulin.

globulus (glob'ū-lus), *n.*; pl. *globuli* (-lī). [NL. use of L. *globulus*, a little ball: see *globule*.] In polyzoans, a zoœcium or an internode.

globulysis (glo-bū'li-sis), *n.* [L. *globu*(*lus*), globule, + Gr. *λύσις*, dissolution.] The dissolution of blood-corpuscles by hemolysins. *Buck*, Med. Handbook, VIII. 467.

Globus pallidus, the inner portion of the nucleus lenticularis, a mass of light-colored gray matter at the base of the brain.

Glochiceras (glo-kis'ė-ras), *n.* [NL., ‹ Gr. *γλωχίς*, a point, + *κέρας*, horn.] A genus of ammonoid cephalopods or ammonites with smooth discoid shells having a relatively simple suture and bearing long lateral lappets at the aperture. It is of Jurassic age.

glochideous (glō-kid'ē-us), *n.* Same as *glochidiate*.

glochidian (glō-kid'i-an), *a.* [*glochidi*(*um*) + *-an*.] Relating to or characteristic of a glochidium.

glochinate (glok'i-nāt), *a.* [Gr. *γλωχίν*, var. of *γλωχίς*, a point, + *-ate*[1].] Same as *glochidiate*.

glockenspiel (glok'en-shpēl″), *n.* [G., ‹ *glocke*, bell (see *clock*[2]), + *spiel*, play.] **1.** A musical instrument consisting of a series of small bells or metal rods or tubes, mounted in a frame and struck by hammers; sometimes the latter are manipulated from a keyboard. In the form used in military bands, sometimes improperly called a *lyre*, from the shape of the frame.—**2.** In *organ-building*, a stop consisting of a set of bells, bars, or tubes sounded by hammers.

glockenthaler (glok'en-tä″lėr), *n.* [G., ‹ *glocke*, bell, + *thaler*, dollar.] A silver coin of Brunswick having on one side a bell.

glockerite (glok'ėr-it), *n.* [Named after E. F. *Glocker*, a mineralogist.] A hydrated ferric sulphate occurring in from yellow to brown and black stalactitic forms. It results from the alteration of iron pyrites.

glœospore (glē'ō-spōr), *n.* [Gr. *γλοιός*, sticky substance, + *σπορά*, seed.] In *phytogeog.*, a plant the dissemination of whose seeds is assisted by a viscid infloresence or by glandular hairs on the containing fruit. *F. E. Clements*.

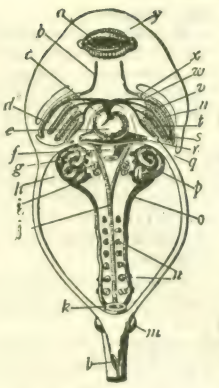
Glœosporium (glē-ō-spō'ri-um), *n.* [NL. (Desmazières and Montagne, 1849), ‹ Gr. *γλοιός*, sticky substance, + *σπορά*, seed.] A large genus of the *Fungi Imperfecti* of the order *Melanconiales*. The spore-bearing hyphæ form a dense mass beneath the surface of the host, breaking forth at maturity and forming pustules. The spores are simple and hyaline or light-colored. Over 200 species have been described, many of which cause the serious disease of cultivated plants called anthracnose. Some have been shown to be the conidial forms of pyrenomycetous fungi. See ★*anthracnose*.

glome[2], *n.* 3. One of the branches or rounded portions of the frog of a horse's foot, on either side of the cleft.—**Glome of the heel,** that part of the wall of a horse's hoof where it curves around the heel to form the bar, the prominence of the heel.

glomeroporphyritic (glom″ė-rō-pōr-fi-rit'ik), *a.* [*glomerous* + *porphyritic*.] In *petrog.*, noting a texture in igneous rocks in which a porphyritic appearance is produced by the aggregation of numerous small crystals of one mineral, as pyroxene or feldspar. *Judd*, 1886.

glomerular (glō-mer'ū-lār), *a.* [*glomerulus* + *-ar*[3].] Of or pertaining to a glomerulus, especially to a glomerulus of the kidney.

When acted upon by venom the vessels show irregular bulging of the walls, by ricin a localized dilatation or congestion of the vessels, which give rise to a *glomerular* appearance. *Science*, July 3, 1903, p. 7.



Glomerular nephritis. Same as *glomerulonephritis*.

glomerulitis (glō-mer-ū-lī'tis), *n.* [NL., ‹ *glomerulus* + *-itis*.] Same as *glomerulonephritis*. *Jour. Exper. Med.*, Feb. 5, 1902, p. 166.

glomus (glō'mus), *n.*; pl. *glomera* (glom'ė-rä). [L. *glomus* (*glomer-*), a ball or clue of yarn, thread, etc.: see *glome*[2].] **1.** A coil of choroid plexus extending into either lateral ventricle of the brain.—**2.** A coil of blood-vessels projecting into the body-cavity, or cœloma, in the region of the pronephros in the embryos of the lower vertebrates. (See cut in next column.)

gloom-stove (glöm'stōv), *n.* A stove or oven in which formerly gunpowder was dried after granulation by cautiously regulated radiation from surfaces of heated iron: a process now replaced by the use of steam-pipes. Also, by ellipsis, *gloom*.

gloria, *n.* 5. A fabric with a silk warp and a

h, glomus.

Diagrammatic figure of a tadpole, dissected from the ventral surface to show the glomus, the heart and branchial vessels, and the head-kidneys and commencing Wolffian bodies. The alimentary canal, from the œsophagus to the rectum, has been removed.

a, lower lip; *b*, lingual artery; *c*, truncus arteriosus; *d*, opercular cavity; *e*, ventricle; *f*, œsophagus; *g*, first nephrostome; *h*, glomus; *i*, third nephrostome; *j*, aorta; *k*, cloaca; *l*, aperture of rectal spout; *m*, commencing hind limb; *n*, Wolffian or mesonephric tubules; *o*, segmental duct; *p*, head-kidney; *q*, spout-like aperture of opercular cavity; *r*, sinus venosus; *s*, *u*, afferent branchial vessels of first and third branchial arches; *t*, *v*, efferent branchial vessels of first and third branchial arches; *w*, communication between the afferent and efferent vessels of the first branchial arch, by further elaboration of which the carotid gland will be formed; *x*, dilatation at the base of the lingual artery; *y*, upper lip. (From Marshall "Vertebrate Embryology.")

wool or cotton weft, so woven as to throw the silk on the face: used for umbrellas and women's dress-goods.

gloriette (glō-ri-et'), *n.* [Also *gloriet*; ‹ F. *gloriette*, Sp. *glorieta*; appar. based on L. *gloria*, glory.] In *arch.*: (*a*) a small pavilion in a park. (*b*) An elaborately ornamented apartment in a medieval castle or château.

glory, *n.*—**Diffraction glory.** See ★*diffraction.*—**Glory of angels,** the ranks of attendant spirits, arranged in concentric circles, by which in medieval Christian art the glorification of the Trinity, Christ, or the Virgin is accompanied. According to the scheme of St. Dionysius, the glory consists of three hierarchies and each hierarchy of three orders. These are from inner circle to outer as follows: first hierarchy, cherubim, seraphim, thrones; second hierarchy, dominions, princedoms, powers; third hierarchy, virtues, archangels and angels. The cherubim and seraphim are often represented simply as heads with two, fouror six wings. The glory is rarely shown complete. *Jameson*, Sacred and Legendary Art, p. 46.—**Glory of the snow.** See ★*Chionodoxa*.

glory-bush (glō'ri-bůsh), *n.* *Tibouchina laxa*, a thorny shrub of Peru and Ecuador growing to the height of twometers: so named in English greenhouses, from its profusion of handsome flowers. See *Tibouchina*.

glory-flower (glō'ri-flou″ėr), *n.* [A translation of the NL. name *Clianthus*.] **1.** Same as *glory-pea*. See *Clianthus*.—**2.** A plant of Chilean origin, *Eccremocarpus scaber*, with racemes of orange-colored flowers and twice-pinnate leaves, at the end of which there are branching tendrils by which it climbs. The corolla is tubular with a joint just a short distance above the calyx, after which it swells out on the under side and then constricts into a neck before reaching the small circular mouth, surrounded by five short, rounded lobes.

glory-hole, *n.* 3. A small furnace for reheating glass.—**4.** *Naut.*, the lazaret or lazaretto, a low space below the main-deck in the after part of a vessel where provisions and spare gear are stowed.

gloryless (glō'ri-les), *n.* [A translation of NL. *Adoxa*.] The moschatel or musk-root, *Adoxa Moschatellina*.

glory-tree (glō'ri-trē), *n.* A garden name for several species of ornamental, shrubby, or climbing verbenaceous plants of the genus *Clerodendrum*, especially *C. fragrans*.

glory-vine (glō'ri-vīn), *n.* Same as *glory-pea*. See *Clianthus*.

gloss[1], *n.* 3. In *leather-manuf.*, a preparation which gives leather its final polish or finish. *Modern Amer. Tanning*, p. 148.—**Egg-shell gloss,** in *painting*, a subdued gloss like that upon an egg-shell.

gloss. An abbreviation of *glossary*.

glossal (glos'al), *a.* [Gr. *γλῶσσα*, tongue, + *-al*[1].] Of or pertaining to the tongue.

glossarize (glos'a-rīz), *v. t.*; pret. and pp. *glossarized*, ppr. *glossarizing*. [*glossar-y* + *-ize*.] To enter and explain in a glossary.

All the words occurring in the formulas thus far translated have been *glossarized*.
Smithsonian Rep., 1890, p. 51.

glossatorial (glos-a-tō'ri-al), *a.* [*glossator* + *-ial*.] Pertaining to, of the nature of, or consisting of glosses: as, *glossatorial* literature.

glossing, *n.* 2. In *leather-manuf.*, the rubbing of virtually finished leather with a solution which gives it a final luster. *C. T. Davis*, Manuf. of Leather, pp. 612, 614.

gloss-kiln (glos'kil), *n.* Same as ★*glost-kiln*.

Glossodus (glos'ō-dus), *n.* [NL., ‹ Gr. *γλῶσσα*, tongue, + *ὀδούς*, tooth.] A genus of Carboniferous selachian fishes known only from their teeth.

glossodynia (glos-ō-dī'ni-ą), *n.* [NL., ‹ Gr. *γλῶσσα*, tongue, + *ὀδύνη*, pain.] Same as *glossalgia*.

glossohyal, *n.* 2. In *ichth.*, the bone of the tongue. It lies between the superior hypohyals and is of the basibranchial series of bones. The 'glossohyal' of Geoffroy is the 'branchiostegal' of Parker. *Starks,* Synonymy of the Fish Skeleton, p. 517.

glossoid (glos'oid), *a.* [Gr. *γλωσσοειδής,* < *γλῶσσα,* tongue, + *εἶδος,* form.] Tongue-like; resembling a tongue in form.

glossolabial (glos-ō-lā'bi-al), *a.* [Gr. *γλῶσσα,* tongue, + L. *labium,* lip, + *-al.*] Relating to both the tongue and the lips.

glossolabiolaryngeal (glos″ō-lā″bi-ō-lā-rin'-jē-al), *a.* [Gr. *γλῶσσα,* tongue, + L. *labium,* lip, + Gr. *λάρυγξ* (*λαρυγγ-*), larynx, + *-e-al.*] Relating to the tongue, lips, and larynx.—**Glossolabiolaryngeal paralysis.** Same as *chronic bulbar paralysis* (which see, under *bulbar*).

glossolabiopharyngeal (glos″ō-lā″bi-ō-fā-rin'-jē-al), *a.* [Gr. *γλῶσσα,* tongue, + L. *labium,* lip, + Gr. *φάρυγξ* (*φαρυγγ-*), pharynx, + *-e-al.*] Relating to the tongue, lips, and pharynx.—**Glossolabiopharyngeal paralysis.** Same as *chronic bulbar paralysis* (which see, under *bulbar*).

glossolalist (glos'ō-lā-list), *n.* [Gr. *γλῶσσα,* tongue, + *λαλεῖν,* speak, + *-ist.*] One who has the faculty or gift of speaking with tongues; one who is supposed to be miraculously endowed with the gift of tongues.

glossology, *n.* 3. The scientific study of the tongue and its diseases.

glossopalatine (glos-ō-pal'a-tin), *a.* [Gr. *γλῶσσα,* tongue, + L. *palatum,* palate, + *-ine*1.] Same as *palatoglossal.*

glossopathy (glo-sop'a-thi), *n.* [Gr. *γλῶσσα,* tongue, + *πάθος,* disease.] Any disease of the tongue.

glossopetræ (glos-ō-pet'rē), *n. pl.* [NL., < Gr. *γλῶσσα,* tongue, + *πέτρα,* rock.] Certain fossil sharks' teeth: a word used by early writers on geology and fossils.

glossophytia (glos-ō-fit'i-ä), *n.* [NL., < Gr. *γλῶσα,* tongue, + *φυτόν,* a growth, a plant.] Same as *black-tongue.*

glossophyton (glo-sof'i-ton), *n.*; pl. *glossophyta* (-tä). [NL., < Gr. *γλῶσσα,* tongue, + *φυτόν,* a growth, a plant.] A fungus found in certain cases of black-tongue.

glossosteresis (glo-sos-te-rē'sis), *n.* [NL., < Gr. *γλῶσσα,* tongue, + *στέρησις,* deprivation, < *στερεῖν,* deprive.] Exsection of the tongue.

glossware (glos'wãr), *n.* Same as ★*glostware.*

glost (glost), *n.* [A dial. form of *gloss*1.] In *ceram.,* glaze applied to pottery or porcelain biscuit.

glost-kiln (glost'kil), *n.* In *ceram.,* a kiln in which biscuit ware is glazed. Also called *gloss-kiln* and *glaze-kiln.*

glost-oven (glost'uv″en), *n.* Same as ★*glost-kiln.*

glost-placer (glost'plā″sėr), *n.* In *ceram.,* the operative who applies the glost.

glostware (glost'wãr), *n.* Glazed ware; baked pottery which has been covered with a glazing preparation and is fired a second time. Also called *glossware.*

The business was started in a small way by Isaac W. Knowles and Isaac A. Harvey, who made yellow ware in a single kiln, which was used alternately for bisque and *glost-ware.*

E. A. Barber, Pottery and Porcelain of The U. S., p. 201.

glottagra (glo-tag'rä), *n.* [NL., < Gr. *γλῶττα,* tongue, + *ἄγρα,* a catching. Cf. *podagra.*] Same as *glossalgia.*

glottalgia (glo-tal'ji-ä), *n.* [NL., < Gr. *γλῶττα,* tongue, + *ἄλγος,* pain.] Same as *glossalgia.*

Glottic race. See ★*race*3.

glove, *n.*—**To go for the gloves,** in *racing,* to bet recklessly. *N. E. D.*

glove-grain (gluv'grān), *n.* A trade-name for light leather made from grain split. *Modern Amer. Tanning,* p. 114.

Glover's scale. See ★*scale*1.

glove-tighten (gluv'tī″tn), *n.* A glove-tightener: an eighteenth-century device for holding up the long gloves worn by women. Glove-tightens were made of plaited horsehair, ribbons, etc., and fastened the glove above the elbow. Also called *glove-band* and *glove-top. A. M. Earle,* Costume of Colonial Times, p. 118.

glow-beetle (glō'bē″tl), *n.* A European beetle, *Meligethes aëneus.*

glow-discharge (glō'dis-chärj), *n.* A discharge between the terminals of an electrical machine under conditions such that the dielectric is rendered luminous although no sparks appear. The term is sometimes used to designate the luminous discharge in vacuum-tubes as well as the discharge in air.

glower2 (glō'ėr), *n.* In *elect.,* the light-giving body of a Nernst lamp. See *Nernst* ★*lamp.*

glowfly (glō'flī), *n.* The firefly.

glow-light (glō'līt), *n.* In *elect.,* an incandescent lamp; a glow-lamp.

glow-lighting (glō'lī″ting), *n.* The use of glow-lamps for lighting purposes.

glucase (glö'kās), *n.* [*gluc-ose* + *-ase.*] A form of diastase developed by steeping maize for two or three days in cold water.

glucemia, glucæmia (glö-sē'mi-ä), *n.* Same as *glucohemia.*

glucide (glö'sīd), *n.* [Gr. *γλυκύς,* sweet, + *-ide*1.] Same as *saccharin.*

glucin (glö'sin), *n.* [Gr. *γλυκύς,* sweet, + *-in*2.] The sodium salt of amido-triazin-sulphonic acid. It is used like saccharin as a sweetening agent in diabetes.

glucinic (glö-sin'ik), *a.* [*glucin* + *-ic.*] Of or derived from glucinum.

glucite (glö'sīt), *n.* [Gr. *γλυκύς,* sweet, + *-ite*2.] Same as *sorbite.*

glucoalbumin (glö″kō-al-bū'min), *n.* One of a class of albumins which are characterized by the presence of a carbohydrate complex, in the molecule, in especially large amount. See *albumin.*

glucoalbumose (glö″kō-al'bū-mōs), *n.* One of the primary albumoses (products of proteolytic digestion) which contains the entire carbohydrate group of the original albuminous molecule.

glucobiose (glö-kō-bī'ōs), *n.* [*gluco(se)* + *biose.*] A biose consisting of two glucose molecules.

glucocyamidin (glö″kō-sī-am'i-din), *n.* [Also *glycocyamidin;* < *glucocyam(in)* + *-id* + *-in*2.] A carbonic-acid derivative, $C_3H_5ON_3$, belonging to the guanidin group. It is formed from glucocyamin through loss of water.

glucocyamin (glö-kō-sī'a-min), *n.* [Also *glycocyamin;* < Gr. *γλυκύς,* sweet, + *cyam(ide)* + *-in*2.] A carbonic-acid derivative belonging to the guanidin group. It is formed through the union of cyanamide and glycocoll, $C_3H_7N_3O_2$. Through loss of water it becomes glucocyamidin.

glucolignose (glö-kō-lig'nōs), *n.* [*gluco(se)* + *lignose.*] A compound, $C_{30}H_{46}O_{21}$, obtained by the successive treatment of fir-wood with dilute acetic acid, water, alcohol and ether. Dilute acids hydrolyze it to glucose and lignose.

glucolysis, glucolytic, etc. See ★*glycolysis,* etc.

gluconic (glö-kon'ik), *a.* [*gluc(ose)* + *-on* + *-ic.*] Derived from glucose.—**Gluconic acid,** a colorless syrupy compound, $CH_2OH(CHOH)_4.COOH$, obtained by the oxidation of starch, glucose, cane-sugar, maltose, and similar substances, with chlorin or bromine water and silver oxid. Also called *dextronic acid.*

glucoproteid (glö-kō-prō'tē-id), *n.* [Also *glycoproteid;* < Gr. *γλυκύς,* sweet, + E. *proteid.*] An albumin in which a carbohydrate group is present in especially large amount, as the mucins and mucoids. On decomposition the carbohydrate group is, in most cases, obtained in the form of glucosamine.

glucosamin (glö-kō-sam'in), *n.* [Also *glycosamin;* < Gr. *γλυκύς,* sweet, + E. *amin(e).*] A colorless compound, $CHO.CH(NH_2)(CHOH)_3CH_2OH$, crystallizing in needles. It is formed, together with acetic acid, by the hydrolysis of cartilage or chitin by means of dilute mineral acids. It is dextrorotatory and closely allied to glucose.

glucosan (glö'kō-san″), *n.* [*glucose* + *-an.*] A colorless compound formed by heating glucose at 170° C., and also by heating esculin, from horse-chestnut bark, at 230° C. It has a very slightly sweet taste, is not fermentable, and is reconverted into glucose by the action of dilute acids.

glucosazone (glö-kōs-az'ōn), *n.* [*glucose* + *az(ote)* + *-one.*] The osazone of glucose, $CH_2OH(CHOH)_3.C(N_2HC_6H_5).CHN_2HC_6H_5$. It is prepared by warming d-glucose, l-fructose, or d-mannose with phenylhydrazin and acetic acid. It melts at 206° C. The compound is more correctly called *phenyl glucosazone.*

glucose, *n.*—**Dried glucose,** one of several trade-names for a material sold as food for cattle, obtained by grinding and bolting maize and pressing the residue after the addition of water and salt.

glucosidal (glö-kō-sī'dal), *a.* [*glucoside* + *-al*1.] Relating to or containing a glucoside.

glucosidic (glö-kō-sid'ik), *a.* [*glucoside* + *-ic.*] Of or pertaining to a glucoside.

glucosidolytic (glö″kō-sid-ō-lit'ik), *a.* [*glucoside* + Gr. *λυτός,* < *λύειν,* dissolve.] Causing the cleavage of glucosides: noting a class of ferments. Also *glycosidolytic.*

The *glucosidolytic* enzyme of Sorghum vulgare therefore performs the same functions as the enzyme emulsin which occurs in sweet almonds.

Philos. Trans. Roy. Soc. (London), 1902, ser. A, p. 409.

glucosone (glö'kō-sōn), *n.* [*glucose* + *-one.*] A non-fermentable syrup having the composition $C_6H_{10}O_6$, formed by the action of concentrated hydrochloric acid on glucosazone.

glucosuria, *n.*—**Digestive glucosuria,** glucosuria following the ingestion of unusually large amounts of sugar or starchy food, irrespective of the existence of diabetes.

glucosuric (glö-kō-sū'rik), *a.* Relating to or affected with glucosuria.—**Glucosuric acid,** an organic acid which was isolated by J. Marshall from an alkapton urine: probably identical with homogentisinic acid.

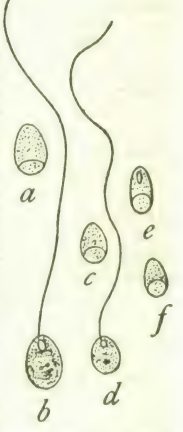
glucovanillic (glö″kō-vā-nil'ik), *a.* [*gluco(se)* + *vanill(in)* + *-ic.*] Pertaining to glucose and vanillin.—**Glucovanillic acid,** a colorless compound, $CHO(CH.OH)_4.CH_2\overset{4}{O}.C_6H_3(\overset{3}{O}CH_3)\overset{1}{C}O_2H + H_2O$, prepared by the oxidation of coniferin by means of potassium permanganate. It forms prismatic crystals which, when dehydrated, melt at 210–212° C. It is converted by emulsin into glucose and vanillic acid, and is also called *p-glucoxy-m-methoxybenzoïc acid.*

glucovanillin (glö″kō-vā-nil'in), *n.* [*gluco(se)* + *vanilla* + *-in*2.] A colorless compound, $CHO(CH.OH)_4.CH_2\overset{4}{O}.C_6H_3(\overset{3}{O}CH_3)\overset{1}{C}OH + 2H_2O$, prepared by the oxidation of coniferin by means of chromic acid. It is levorotatory, crystallizes in needles, and melts at 192° C. Emulsin resolves it into vanillin and glucose. It is the aldehyde of glucovanillic acid, and is termed *p-glucoxy-m-methoxybenzaldehyde.*

glucuron (glö-kū'ron), *n.* [Gr. *γλυκύς,* sweet, + *οὖρον,* urine, + *-on, -one.*] The anhydrid of glucuronic acid, having the formula $C_6H_8O_6$.

glucuronate (glö-kū'rō-nāt), *n.* [*glucuron-ic* + *-ate*1.] A salt of glucuronic acid.

glucuronic (glö-kū-ron'ik), *a.* Same as ★*glycuronic.*



glue, *n.* 2. [Short for *glue-stock.*] A very low grade of hide, practically worthless for tanning, but used in the manufacture of glue: commonly called *glue-stock. Flemming,* Practical Tanning, p. 265.—**Dutch** or **Flanders glue.** Same as *Cologne glue.*—**Hide glue,** glue made from the trimmings of hides, as distinguished from glue of inferior value made from bones.—**Isinglass glue,** a pure glue made from fish-sounds.—**Parchment glue,** a fine glue prepared by carefully boiling with water scraps of parchment or similarly cleansed animal skins.—**Patent glue,** a trade-name for a superior kind of glue of dark color, made from bones.—**Russian glue,** a trade-name for a variety of carpenters' glue to which mineral matter, such as lead or calcium carbonate, zinc oxid, or barium sulphate has been added to the extent of 5 or 6 per cent.: it is of whitish appearance in consequence.—**Size glue,** a trade-name for glue of superior quality, carefully prepared from scraps of animal skin. See *size*2, 1.

glue-plant (glö'plant), *n.* One of the red algæ, *Gracilaria,* occasionally used for food and also in the manufacture of agar-agar.

glue-pot, *n.* 2. A part of a road so bad that the wheels of a carriage would stick in it. [Australia.]

Glugea (glö-jē'ä), *n.* [NL.] The typical genus of the family *Glugeidæ. G. bombycis* is very destructive to silkworms, causing the disease known in France as *la pébrine. Thélohan,* 1891.

Glugeidæ (glö-jē'i-dē), *n. pl.* [NL., < *Glugea* + *-idæ.*] A family of sporozoans, of the order *Myxosporidia,* having the spores minute and pear-shaped, with one polar capsule which is only visible after treatment with reagents. More than two spores are formed in each pansporoblast. The family consists of cell-parasites found mostly in arthropods and fishes. The typical genus is *Glugea;* others are *Gurleya, Thelohania,* and *Pleistophora.*

Spores of various *Glugeidæ,* highly magnified, after Thélohan.

a and *b, Pleistophora typicalis* Gurley—*a,* in the fresh condition, *b,* after treatment with iodine water, causing extrusion of the filament; *c* and *d, Thelohania octospora* Henneguy—*c,* fresh, *d,* treated with ether; *e, Glugea depressa* Thélohan, fresh; *f, G. acuta,* Thélohan. (From Lankester's "Zoology.")

glump (glump), *n.* 1. A sullen, sulky fellow.—2. *pl.* The sulks.

glut, *v. t.* 4. To choke or partially fill up, as an engine-cylinder or condenser-tube by a carbonaceous deposit from inferior oils used in lubrication. Animal oils, including tallow, suet, and lard, are found to produce both glutting and corrosion, the latter being due to the decomposition of the fats and the formation of fatty acids and the deposition of carbon. Mineral oils are free from these defects.

glut, *n.* 10. A block, usually of bronze, in one face of which is a recess to receive the upset end of the valve-

rod in a knuckle-joint. The glut is tightened by a wedge and screw, or by a key.

glutaconate (glō-tak'ō-nāt), *n.* [*glutacon(ic)* + *-ate*[1].] A salt of glutaconic acid.

The methylation and condensation of ethyl *glutaconate*. *Nature*, March 26, 1903, p. 504.

glutaconic (glö-ta-kon'ik), *a.* [*glut(en)* + *aconic*.] Noting a colorless compound, HOCO.CH_2.CH:CH.COOH, which crystallizes in prisms and melts at 152° C. It is isomeric with itaconic, citraconic, and mesaconic acids. Also called *pentenediacid* or *a-γ-propylenedicarboxylic acid*.

glutamic (glō-tam'ik), *a.* [*glut(en)* + *am(ine)* + *-ic*.] Derived from gluten and amine.—**Glutamic acid,** a crystalline compound, HOCO.CH(NH_2).CH_2.CH_2COOH, extracted from pumpkin and vetch seeds and from beet-root juice. It is also produced by boiling vegetable proteids with dilute sulphuric acid. It is deposited in lustrous rhombohedra and melts at 140° C. Also called *a-aminoglutaric acid* and, incorrectly, *glutaminic acid*.

glutamine (glō-tam'in), *n.* [*glut(en)* + *amine*.] A colorless crystalline compound, H_2N.CO.CH(NH_2).CH_2.CH_2COOH, found, together with asparagin, widely distributed in the vegetable kingdom. It is deposited in slender needles. Also called *a-glutamamide* and, incorrectly, *glutamin*.

glutaminic (glö-ta-min'ik), *a.* [*glutamine* + *-ic*.] Of or pertaining to glutamine.—**Glutaminic acid,** an incorrect term for ★*glutamic acid*.

glutaric (glō-tar'ik), *a.* [*glut(en)* + *-ar* + *-ic*.] Derived from gluten.—**Glutaric acid,** a colorless compound, HO.COCH_2.CH_2.CH_2.COOH, which crystallizes in large, monoclinic prisms melting at 97.5° C., and boils at 302–304° C. It is found in the washings from sheep's wool and can be prepared artificially in a variety of ways. Also called *normal pyrotartaric acid* or *pentanediacid*.

glutazin (glö-taz'in), *n.* [*glut(en)* + *az(ote)* + *-in*[2].] A colorless compound, $C_5H_6O_2N_2$, which crystallizes in rectangular plates. It melts and decomposes at 300° C., and is probably 4-*imido*, 2-6, *diketohexahydropyridine*.

Gluteal aponeurosis, the combination of the femoral fascia over the nates.—**Gluteal furrow.** See ★*furrow*.

gluten, *n.* 2. A glue-like animal secretion: for example, the sticky material secreted by swallows in nest-building.—**Gluten feed,** a mixture of gluten-meal and corn bran: used as feed for cattle.—**Gluten flour,** wheat flour from which a part of the starch has been removed, thus increasing the proportion of gluten. See *gluten*.—**Gluten meal,** a by-product of the manufacture of glucose and starch from Indian corn. It consists largely of the germ of the grain, with more or less of the hulls and starch: valued as a feed, especially for milch cattle.

glutenin (glö'te-nin), *n.* [*gluten* + *-in*[2].] That portion of vegetable gluten which is insoluble in alcohol. Also termed *gluten-fibrin*. See *gluten*.

glutenoid (glö'te-noid), *a.* [*gluten* + *-oid*.] Similar to gluten.

gluteoperineal (glö″tē-ō-per-i-nē'al), *a.* Relating to the gluteal region and the perineum: noting a furrow on the external surface and a group of muscular fibers.

glutimic (glō-tim'ik), *a.* [*glut(en)* + *im(ine)* + *-ic*.] Derived from gluten and imine.—**Glutimic acid,** a compound, $C_5H_7O_3N$, formed, together with glutamic acid, by boiling albumen with a solution of barium hydroxid. It melts at 180° C.

glutin, *n.* 2. Same as *gelatin*. It forms the chief part of carpenters' glue. Not to be confounded with gluten or any of its components.

glutinize (glö'ti-nīz), *v. t.*; pret. and pp. *glutinized*, ppr. *glutinizing*. [*gluten* (*-tin-*) + *-ize*.] To render glutinous or gluey.

glutinoid (glö'ti-noid), *n.* [*gluten* (*-tin-*) + *-oid*.] Same as ★*albuminoid*.

glutoform (glö'tō-fôrm), *n.* Same as ★*glutol*.

glutoid (glö'toid), *n.* [*glut(in)* + *-oid*.] Gelatin hardened with formaldehyde: used in making capsules. *Buck*, Med. Handbook, IV. 374.

glutokyrin (glö-tō-kī'rin), *n.* A peptone body obtained by Siegfried on hydrolysis of glutin.

glutol (glö'tōl), *n.* [*glut(en)* + *-ol*.] Same as *formaldehyde* ★*gelatin*.

glutose (glö'tōs), *n.* [*glut(en)* + *-ose*.] Same as ★*gelatose*.

glutter (glut'ėr), *n.* [Imitative.] A splutter. *N. E. D.*

glutton, *n.* 4. In *pugilism*, one who takes a great deal of punishment before he is beaten. [Sporting slang.]

glycemia, glycæmia (gli-sē'mi-ą), *n.* [NL. *glycæmia*, < Gr. *γλυκύς*, sweet, + *αἷμα*, blood.] Same as *glucohemia*.

glyceral (glis'ė-ral), *n.* [Gr. *γλυκερός*, sweet, + *-al*[3].] One of certain compounds obtained by the action of glycerol on an aldehyde.

glycerin, *n.* 2†. Formerly a general designation for compounds similar to glycerol in that they contain three hydroxyl groups.—**Glycerin agar,** a bacterial culture-medium, of the composition of ordinary nutrient agar, to which 6–8 per cent. of glycerin has been added: especially serviceable in growing the tubercle bacillus.—**Glycerin jelly,** a mixture of gelatin and glycerin employed in the manufacture of soluble bougies, and used also as a mount for microscopical specimens.

glycerinate (glis'ė-ri-nāt), *v. t.*; pret. and pp. *glycerinated*, ppr. *glycerinating*. Same as *glycerize*.—**Glycerinated lymph** or **vaccine,** vaccine virus mixed with glycerin in order to destroy any bacteria with which the lymph may have been accidentally contaminated.

glycerination (glis″ė-ri-nā'shọn), *n.* [*glycerin* + *-ation*.] Treatment or dilution with glycerol. Thus calf's lymph is mixed with glycerol, which, after a time, kills bacterial organisms that are often present in ordinary lymph.

glycerinize (glis'ė-rin-īz), *v. t.*; pret. and pp. *glycerinized*, ppr. *glycerinizing*. [*glycerin* + *-ize*.] To treat with glycerin; glycerinate; glycerize.

glycerinophosphoric (glis-ė-rī″nō-fos-for'ik), *a.* Same as ★*glycerophosphoric*.

glycerinum (gli-se-rī'num), *n.* [NL.] A pharmaceutical Latin name for glycerol.

glycerodegras (glis'ė-rō-de-grä″), *n.* [*glycerin* + *degras*.] A mixture of glycerin, fish-oil, and beef-tallow, applied to leather to soften the finished product. *C. T. Davis*, Manuf. of Leather, p. 239.

glyceroformol (glis″ė-rō-fōr'mōl), *n.* [*glycerin* + *form(aldehyde)* + *-ol*.] A substance formed by the action of formaldehyde upon glycerin: used as an antiseptic.

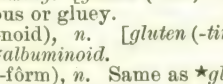
glycerogelatin (glis″ė-rō-jel'a-tin), *n.* A stiff jelly consisting of gelatin 1 part, water 6 parts, and glycerin 7 parts: used in microscopy as a mounting and embedding medium. Also *glycerin gelatin*, *glycerin jelly*, *glycerin gum*.

glycerolate (glis'ė-rō-lāt), *n.* [*glycerol* + *-ate*[1].] Same as *glycerite*.

glycerophosphate (glis″ė-rō-fos'fāt), *n.* A salt of glycerophosphoric acid with a base (iron, quinine, calcium, etc.): employed in medicine as a nerve tonic.

glycerophosphoric (glis″ė-rō-fos-for'ik), *a.* Noting an acid, $C_3H_9O_6P$, a decomposition-product of lecithin in which it is present in combination with choline, two of its hydroxyl groups being replaced by fatty-acid radicals.

glycerose (glis'ė-rōs), *n.* [*glycer(ol)* + *-ose*.] A substance formed by the oxidation of glycerol by dilute nitric acid or bromine. It was thought to be a triose, $C_3H_6O_3$, but is now known to be a mixture of glycerol aldehyde and glycerol ketone.



glycic (glis'ik), *a.* [Gr. *γλυκύς*, sweet, + *-ic*.] Derived from glycerol.—**Glycic acid.** Same as *glucic acid*.

glycid (glis'id), *n.* [*glyc(erol)* + *-id*[1].] A colorless liquid,

the anhydrid of glycerol, into which it is rapidly converted by the action of water. It boils at 160° C. Also called *hydroxypropyleneoxid*.

glycidic (gli-sid'ik), *a.* [*glycid* + *-ic*.] Derived from glycerol.—**Glycidic acid,** a colorless liquid,

with an irritating odor. It rapidly attacks the mucous membrane and is slowly converted, by water, into glyceric acid. Also called *oxyacrylic acid*.—**Glycidic ester,** an ester of glycidic acid: usually applied, loosely, to the ethyl salt, and often written, incorrectly, *glycidic ether*.

Glycin blue, corinth, red. See ★*blue*, *n.*, etc.

Glycine (glī-sī'ne), *n.* [NL. (Linnæus, 1753; first used in his Genera Plantarum, 1737), < Gr. *γλυκύς*, sweet, + *-inē*, a form of *-ina*[1]. The name alludes to the substitution of Indian licorice, *Abrus Abrus* (called *Glycine Abrus* by Linnæus), for true licorice, *Glycyrrhiza glabra*.] 1. A genus of plants of the family *Fabaceæ*. See *Apios*.—2. A name incorrectly applied to *Soia*, a genus of plants belonging to the family *Fabaceæ* and including the soy-bean. See ★*Soia*.

glycinin (glis'i-nin), *n.* [*Glycine* + *-in*[2].] A globulin found in the soy-bean.

glycium (glis'i-um), *n.* In *chem.*, same as *glucinum* or *beryllium*.

glycocholate (glī-kō-kol'āt), *n.* A salt of glycocholic acid.—**Sodium glycocholate,** the sodium salt of glycocholic acid. It is administered in cases of wasting diseases, as it materially aids the digestion of fats.

glycocholonic (glī-kō-kō-lon'ik), *a.* [*glycochol(ic)* + *-one* + *-ic*.] Derived from glycocholic acid.—**Glycocholonic acid,** a crystalline monobasic acid, $C_{26}H_{41}NO_5$, formed by the action of concentrated hydrochloric acid on glycocholic acid.

glycocyamidin, glycoproteid, etc. See ★*glucocyamidin*, etc.

glycoformal (glī-kō-fōr'mal), *n.* [*glyc(erol)* + *formal(in)*.] A mixture of formalin and glycerol: used, in the form of vapor, as a disinfecting agent.

glycogelatin (glī-kō-jel'a-tin), *n.* A jelly-like mixture of glycerin and gelatin, used in the manufacture of lozenges and pastils and also as a vehicle for exhibiting external remedies.

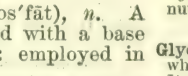
glycogenic, *a.* 2. Derived from glycogen.—**Glycogenic acid,** a syrupy compound, $C_6H_{12}O_7$, formed by the oxidation of glycogen with bromine and silver oxid. It is possibly identical with dextronic acid.

glycogeny (glī-koj'e-ni), *n.* [Gr. *γλυκύς*, sweet, + *-γενεια*, < *-γενης*, -born.] Same as *glycogenesis*.

glycol, *n.*—**Diethene glycol,** a compound, CH_2OH.CH_2.O.CH_2CH_2OH, formed by the union of ethylene oxid with glycol. It is a liquid which boils at 250°.

glycolaldehyde (glī-kol-al'dē-hīd), *n.* [Gr. *γλυκύς*, sweet, + E. *aldehyde*.] A syrupy compound, $HOCH_2$.CHO, obtained by the action of barium hydroxid on bromacetaldehyde. It readily gives rise to sugars. Also called *hydroxyacetaldehyde*.

glycolate (glī'kō-lāt), *n.* [*glycol(ic)* + *-ate*[1].] A salt of glycolic acid.

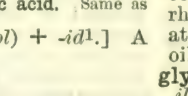


glycoleucyte (glī-kō-lū'sīt), *n.* [*glyco(gen)* + *leu(co)cyte*.] A large leucocyte, especially adapted to storing nutritive substances such as glycogen, found in the blood of certain worms (for example, *Sipunculus nudus*).

F. Ladreyt finds that there are two very distinct types of leucocytes in this worm [*Sipunculus nudus*]. There are minute plastids, with very active fine pseudopodia, and central or slightly excentric nucleus (amœbocytes or phagocytes), which have an important rôle in excretion and phagocytosis; and there are large elements, including numerous transparent spherules, without pseudopodia, with a lateral nucleus (vesicular leucocytes or "*glycoleucytes*"), which are especially devoted to storing nutritive substances, like glycogen.

Jour. Roy. Micros. Soc., April, 1904, p. 183.

Glycolic acid, a colorless compound, HO.CH_2.COOH, which crystallizes in plates or needles and melts at 80° C. Its potassium salt is contained in the grease of sheep's wool. Also called *hydroxyacetic acid*.



glycolid (glī'kō-lid), *n.* [*glycol* + *-id*[1].] A colorless compound,

which crystallizes in large lustrous plates and melts at 86–87° C.: formed by treating glycolic acid in a current of carbon dioxid. It is a cyclic, double ester of glycolic acid. The name was formerly applied to an anhydrid of glycolic acid ($C_2H_2O_2$) which is now called *polyglycolid*.

glycoline (glī'kō-lin), *n.* [*glycol* + *-ine*[2].] A colorless compound, which crystallizes in rhombohedra or in lustrous plates and melts at 15° C. It is contained in commercial fusel-oil.

glycoluril (glī-kol'ū-ril), *n.* [*glycol* + *urea* + *-il*.] A colorless compound,

which crystallizes in white needles: formed by the action of hydrochloric acid on a mixture of glyoxal and urea. Also called *acetylene urea*.

glycolyl (glī'kō-lil), *n.* [*glycol* + *-yl*.] A bivalent organic radical, CH_2CO.

glycolylurea (glī″kō-li-lū'rē-ą), *n.* See ★*hydantoin*.

glycolysis (glī-kol'i-sis), *n.* [Gr. *γλυκύς*, sweet, + *λύσις*, dissolution.] The destruction of sugar in the animal body. This (in part, at least) is supposedly effected through a ferment which in itself is inactive, but is activated by a substance formed in the pancreas which plays the rôle of a kinase. Also *glucolysis*.

In the liver and in the blood, their first action is to increase *glycolysis*, but this effect is diminished, or even arrested, by their prolonged action.

Nature, Jan. 21, 1904, p. 287.

glycolytic (glī-kō-lit'ik), *a.* [*glycolysis* (*-lyt-*) + *-ic*.] Of or relating to glycolysis; causing glycolysis.—**Glycolytic ferment.** See ★*ferment*.

glyconucleoproteid (glī″kō-nū'klē-ō-prō'tē-id), *n.* A nucleoproteid in which the carbohydrate group is prominently developed.

glycosecretory (glī″kō-sē-krē'tō-ri), *a.* [*glyco(gen)* + *secretory*.] Causing the secretion of glycogen: as, *glycosecretory* nerve-fibers.

glycosine (glī'kō-sin), *n.* [Gr. *γλυκύς*, sweet, + *-ose* + *-ine*[2].] A colorless compound, , crystallizing in needles

which sublime without melting. It is prepared by the interaction of ammonia and glyoxal. Also called *diglyoxaline*.

glycosolvol (glī′kō-sol-vōl), *n.* [*glyco(se)* + L. *solvere*, dissolve, + *-ol.*] A diabetic remedy of indefinite composition and action.

glycosometer (glī-kō-som′e-tėr), *n.* [*glycose*, + Gr. *μέτρον*, measure.] An apparatus for estimating the amount of sugar present in the urine.

glycuronic (glī-kū-ron′ik), *a.* [Gr. *γλυκύς*, sweet, + *οὖρον*, urine, + *-one* + *-ic.*] Derived from glucose.—**Glycuronic acid,** a syrupy compound, COH(CHOH)COOH, obtained by boiling euxanthic acid with dilute sulphuric acid. It is closely related to glucose; occurs in the blood; and compounds of it with camphor, chloral, phenol, etc., are found in the urine after the administration of these substances. Also *glucuronic acid.*

glycyphillin (glī-si-fil′in), *n.* [NL. *glycyphylla* + *-in*2.] A crystalline sweet glucoside, $C_{21}H_{44}O_9$, extracted from the leaves of *Smilax glycyphylla.* It is deposited in lustrous prisms with 3½ or $4H_2O$ (depending on the solvent used), and melts at 175–180° C. When hydrolyzed it yields phloretin and isodulcitose, and is closely allied to phlorizin if not identical with it.

glycyrretin (glis-i-ret′in), *n.* [*glycyrrh(iza)* + *-et-* + *-in*2.] A crystalline compound, $C_{32}H_{47}O_4N$, formed by the action of dilute acids on glycyrrhizic acid, which occurs, in the form of salts, in licorice-root. It melts at 200° C.

glycyrrhizic (glis-i-rī′zik), *a.* [*glycyrrhiza* + *-ic.*] Pertaining to or derived from licorice.—**Glycyrrhizic acid,** a colorless tribasic acid, $C_{44}H_{62}O_{18}N$, resembling albumen in appearance. It gelatinizes with cold water, has a sweet taste, and occurs, as the ammonium or calcium salt, in licorice-root.

glyf, *n.* A simplified spelling of *glyph.*

glykemia, glykæmia (glī-kē′mi-ą), *n.* See ★*glycemia, glycæmia.*

Glyoxalic acid, a colorless syrupy compound, HCO.COOH, found in the leaves and unripe fruits of many plants, including the gooseberry. It is prepared by the oxidation of alcohol, glycol, or glycerol, by means of nitric acid. With water it forms a crystalline derivative, $CH(OH)_2COOH$. The syrup and the solid are, therefore, the aldehyde and the dihydroxid respectively of oxalic acid. Also called *glyoxylic acid.*

glyoxaline (glī-ok′sa-lin), *n.* [*glyoxal* + *-ine*2.] CH : CH

A colorless compound, NH < | , formed, CH : N

together with glycosine, by the action of concentrated ammonia on glyoxal. It occurs in thick nacreous prisms which melt at 89° C., boil at 255° C., and have an alkaline reaction. It is also called *imidazol* or *methylene acetylenazin.* The name *glyoxaline* is also given to certain compounds which are derived from glyoxaline itself by replacement of its hydrogen atoms by radicals.

glyoxiline, glyoxyline (glī-ok′si-lin), *n.* [As *glyox(al)* + *-il, -yl,* + *-ine*2.] An explosive consisting of guncotton treated with a solution of saltpeter, dried, and soaked with nitroglycerin. It closely resembles explosive gelatin, but its constituents are less intimately blended. Not to be confounded with the compound glyoxaline ($C_3H_4N_2$).

glyoxime (glī-ok′sim), *n.* [As *glyox(al)* + *-ime.*] A colorless compound, HON:CHCH:NOH, prepared by the action of hydroxylamine on glyoxal. It crystallizes in trimetric plates and melts at 178° C.

glyoxylic (glī-ok-sil′ik), *a.* Same as *glyoxalic.*—**Glyoxylic acid.** Same as ★*glyoxalic acid.*

glyph, *n.* 2. A written or pictured character, sign, or symbol representing a word or an idea; an ideograph: as, the Mexican or Mayan *glyphs.*

Now, when a *glyph* is read as a word, the interesting phenomenon of which we have spoken is this: Words have different meanings, the same word may express different concepts, and the *glyph* may be read by speaking the word and attaching to it any meaning which the spoken word represents. In this early society words are mysterious things supposed to be properties or qualities of things, rather than signs of things. When such *glyphs* become signs of spoken words they are signs of sounds. They become signs of word-sounds, then signs of syllabic sounds, and ultimately signs of alphabetic sounds; and thus picture-writing is developed into alphabetic writing.
J. W. Powell, in Rep. Bur. Amer. Ethnol., 1898–99, p. [clxviii.

Glyphæa (gli-fē′ą), *n.* [NL., < Gr. *γλυφή*, an engraving, < *γλύφειν*, engrave: see *glyph.*] A genus of extinct macrurous crustaceans from the Jurassic and Cretaceous rocks.

glyphic, *a.* 2. Of the nature of a glyph or ideograph: as, *glyphic* words.

The written languages produced in primitive time have distinct words as ideographs; they also have a distinct grammar for the arrangement of these *glyphic* words unlike that of highly developed written language.
J. W. Powell, in Rep. Bur. Amer. Ethnol., 1898–99, [p. clxix.

Glyphioceras (glif-i-os′e-ras), *n.* [NL., irreg. < Gr. *γλύφειν*, engrave, + *κέρας*, horn.] The typical genus of the family *Glyphioceratidæ.* As the type species of this genus, *G. sphæricus,* is the same as that specified by De Haan as typical of his genus *Goniatites, Glyphioceras* is a synonym of that term in its restricted meaning.

Glyphioceratidæ (glif″i-ō-se-rat′i-dē), *n. pl.* [NL., < *Glyphioceras* (*-at-*) + *-idæ.*] A family of ammonoid cephalopods or goniatites, in typical forms being rotund and involute with the lateral sutural lobes and saddles relatively simple. It is of Carboniferous age and is strictly synonymous with the division *Goniatitidæ.*

Glyptic period, in *geol.,* a division of the Human period based on the character of the paleolithic relics found in the caves of Périgord, France.

The Magdalenian period or *Glyptic* of Piette has been further divided by him into two great epochs, the Eburnean or time of the mammoth, going back into glacial times, when the men lived who carved the likeness of that animal on its tusks, and the Tarandean or reindeer epoch, when the climate had ameliorated, but when reindeer still lived in the south of France and were hunted by a more advanced type of mankind.
Geikie, Text-book of Geol. (4th ed.), II. vi. 1349, note.

glyptician (glip-tish′an), *n.* [*glyptic* + *-ian.*] A gem-cutter, gem-engraver, or lapidary.

Glyptocardia (glip-tō-kär′di-ą), *n.* [NL., < Gr. *γλυπτός*, carved, + *καρδία*, heart.] A synonym of ★*Buchiola* (which see).

Glyptocephalus (glip-tō-sef′a-lus), *n.* [NL., < Gr. *γλυπτός*, carved, + *κεφαλή*, head.] A genus of slender flounders, characterized by the great number of their vertebræ, found in deep waters of the North Atlantic and North Pacific oceans. *G. cynoglossus* is the Craig flounder of North Europe; *G. zachirus,* with long pectoral fins, is a species of the North Pacific: excellent for food.

Glyptocrinus (glip-tok′ri-nus), *n.* [NL., < Gr. *γλυπτός*, carved, + *κρίνον*, lily (see *crinoid*).] A genus of camerate crinoids of the family *Melocrinidæ,* with a deep obconical calyx ornamented by ridges and radiating striæ. It is of Lower Silurian age.

glyptodontoid (glip-tō-don′toid), *a.* [*glyptodon(t-)* + *-oid.*] Related to or having the characters of *Glyptodon.*

Glyptolepis (glip-tol′ē-pis), *n.* [NL., < Gr. *γλυπτός*, carved, + *λεπίς*, a scale.] A genus of extinct ganoid fishes from the Old Red Sandstone of Britain, commonly regarded as synonymous with *Holoptychius* (which see).

glyptologist (glip-tol′ō-jist), *n.* [*glyptolog-y* + *-ist.*] A student or collector of engraved gems.

glyptology (glip-tol′ō-ji), *n.* [Gr. *γλυπτός*, carved, engraved, + *-λογια*, < *λέγειν*, speak.] The study of engraved gems and other small sculpture. *N. Y. Sun,* Feb. 23, 1904.

Glyptopomus (glip-tō-pō′mus), *n.* [NL., < Gr. *γλυπτός*, carved, + *πῶμα*, a lid.] A genus of ganoid fishes from the Old Red Sandstone of Scotland. The scales and external bones are ornamented with irregular wrinkles.

Glyptoscorpius (glip-tō-skôr′pi-us), *n.* [NL., < Gr. *γλυπτός*, carved, + *σκορπίος*, a scorpion.] A genus of merostome *Crustacea* of the order *Eurypteridæ,* with decided arachnid affinities in the clawed limbs and the comb-like structures similar to the pectines of scorpions. It is found in the coal-measures of Scotland.

glyptothek (glüp″tō-tāk′), *n.* [G.] Same as *glyptotheca.*

gm. An abbreviation of *gram.*

G. M. B. An abbreviation of *Great Master of the Bath.*

G. M. I. E. An abbreviation of *Grand Master of the Indian Empire.*

G. M. K. P. An abbreviation of *Grand Master of the Knights of St. Patrick.*

G. M. M. G. An abbreviation of *Grand Master of St. Michael and St. George.*

G. M. P. An abbreviation of *Grand Master of St. Patrick.*

G. M. S. I. An abbreviation of *Grand Master of the Star of India.*

G. M. T. An abbreviation of *Greenwich meridian time.*

gnat1, *n.*—**Potato-scab gnat,** a mycetophilid fly, *Epidapus scabiei,* which breeds in scabby potatoes and transmits the disease to healthy tubers.

gnathion (nath′i-on), *n.* [NL., dim. < Gr. *γνάθος*, jaw.] Same as *mental point* (which see). See also cut under *craniometry.*

gnathism (nath′izm), *n.* [Gr. *γνάθος*, jaw, + *-ism.*] The angle of projection of the upper jaw measured by the angle between the horizontal and one of the facial lines. See *prognathism, orthognathism.*

gnathobase (nath′ō-bās), *n.* [Gr. *γνάθος*, jaw, + *βάσις*, base.] The proximal or coxal extremity of the leg in many *Crustacea* when modified for the purpose of crushing food by the development of a series of short hard spines, as in *Limulus.*

gnathobasic (nath-ō-bā′sik), *a.* [*gnathobase* + *-ic.*] Pertaining to or of the nature of a gnathobase. *Annals and Mag. Nat. Hist.,* Feb., 1904, p. 155.

Gnathobdellidæ (nath-ob-del′i-dē), *n. pl.* [NL., < *Gnathobdella* + *-idæ.*] A family of fresh-water and land leeches. They have jaws; no protrusible proboscis; red blood; five rings to a complete segment; and botryoidal tissue. The family includes several important genera, among them *Nephelis, Hirudo, Aulostoma, Hæmopsis,* and *Hæmadipsa. Hirudo medicinalis* is the apothecary's leech. It is cultivated in special ponds and is not sexually mature until it is three years old. In the young stage it feeds upon the blood of insects, and then on that of frogs; but when it becomes mature a diet of warm blood is required. *Aulostoma,* often called the horse-leech, feeds upon worms and mollusks. *Hæmopsis vorax,* the horse-leech of Europe and North Africa, attaches itself to the inside of the throat of horses, cattle, and men. *Hæmadipsa,* the land-leech, is found in forests or damp districts in the tropics. See *Hirudinidæ* and *leech*2.

gnathochilarium (nath″ō-ki-lā′ri-um), *n.*; pl. *gnathochilaria* (*-ą*). [NL., < Gr. *γνάθος*, jaw, + *χεῖλος*, lip, + *-arium.*] In myriapods, a plate-like under lip constituting the floor of the mouth and formed of the second pair of jaws, as in the *Diplopoda.*

gnathometer (na-thom′e-tėr), *n.* [Gr. *γνάθος*, jaw, + *μέτρον*, measure.] An instrument used for measuring the angles of the lower jaw.

gnathonism (nā′thō-nizm), *n.* [L. *Gnatho(n-)*, name of a parasite in Plautus and Terence, < Gr. *Γνάθων*, a nickname ('one who is all jaw'), < *γνάθος*, jaw.] Sycophancy.

"Could the light of such a Gospel as we profess be eclipsed with the interposition of a single marriage?"
And yet Hacket must have lived to see the practical confutation of this shallow *Gnathonism* in the result of the marriage with the Papist Henrietta of France!
Coleridge, Notes on Hacket, in Lit. Remains, III. 187.

gnathophorous (nā-thof′ō-rus), *a.* [Gr. *γνάθος*, jaw, + *-φορος*, < *φέρειν*, bear.] Bearing jaws: noting the jaw-bearing sclerites of arthropods.

gnathopod, *n.* 2. A gnathopodite.

Gnathostomata, *n.* 3. A tribe of irregular echinoids having a central peristome surrounded by a perignathic girdle, the ambulacra all similar, and the jaws present but sometimes rudimentary. It includes both living and extinct genera.—4. A name given by Haeckel to a superclass of vertebrates containing the forms with true jaws, (normally) two pairs of limbs, and double nostrils. Same as *Gnathostomi* and synonomous with *Amphirhina.*

gnathostomate (nā-thos′tō-māt), *a.* [Gr. *γνάθος*, jaw, + *στόμα*, mouth, + *-ate*1.] Having a masticatory apparatus, as in echinoids.

gnathostome (nath′ō-stōm), *n.* A member of the *Gnathostomata,* or vertebrates having true jaws.

The *gnathostomes* embrace the great majority of vertebrates. *J. T. Kingsley,* Vert. Zool., p. 225.

gnatoo (ngä′tö), *n.* [Tonga *gnatoo,* more prop. spelled **ngatu,* or, as now, *gatu* (pron. ngä′tö).] A paper-cloth (*kapa* or *tapa*) made from the bark of the paper-mulberry (*Broussonetia papyrifera*), and printed with a pattern.

gnaur, *n.* Same as *gnar*1 and *knar*1.

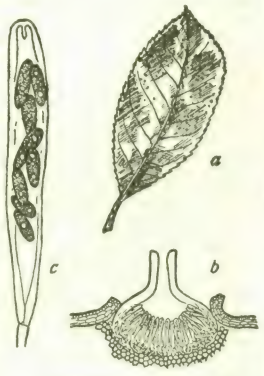
gneiss, *n.*—**Bojan gneiss,** a red gneiss found on the border of Bavaria and Bohemia.—**Fundamental gneiss.** Same as ★*basement complex.*—**Hercynian gneiss.** See ★*Hercynian,* 2.—**Lewisian gneiss,** massive gneisses of the Hebrides and northern Scotland: named after the island of Lewis by Murchison in 1858. See *Lewisian* ★*group.*

gneissitic (nī-sit′ik), *a.* Same as *gneissic.*

gneissosity (nī-sos′i-ti), *n.* [*gneissose* + *-ity.*] In *petrog.,* the character or structure of gneiss.

Gnetales (nē-tā′lēz), *n. pl.* [NL. (Engler, 1887), < *Gnetum* + *-ales.*] An order of gymnospermous plants containing the family *Gnetaceæ* only (which see).

gnomish (nō′mish), *a.* [*gnome* + *-ish*1.] Gnome-like: as, *gnomish* faces.



gnomist (nō′mist), *n.* [*gnome* + *-ist.*] A gnomic poet; a writer of proverbs and apothegms.

gnomium (nō′mi-um), *n.* [NL., alluding to the etymological meaning of the associated cobalt; < *gnome*2.] In *chem.,* a supposed new metal having a high atomic weight, which Krüss announced in 1892 as associated with

nickel and cobalt, and the presence of which he believed to be the cause of the assignment of too high a value to the atomic weight of cobalt. It has been shown that the supposed discovery was an error.

gnomologist (nō-mol′ō-jist), *n.* [*gnomolog-y* + *-ist.*] Same as *gnomonist.*

Gnomonia (nō-mō′ni-ä), *n.* [NL. (Cesati and de Notaris, 1863), < Gr. *γνώμων*, the index of a dial, a pillar, rod: see *gnomon.*] A genus of pyrenomycetous fungi, type of the family *Gnomoniaceæ*, having the perithecia embedded in the tissue of the host, with only the elongated necks projecting. The spores are elongate, hyaline, and 2- or 4-celled. About 60 species have been described, many of which are parasitic. *G. erythrostoma* attacks the leaves of the cherry, producing ★leaf-scorch (which see).

Gnomonia erythrostoma.
a, diseased leaf of cherry showing the habit of the fungus (reduced); *b*, section through a perithecium (enlarged); *c*, an ascus, containing eight spores (highly magnified).

Gnomoniaceæ (nō-mon-i-ā′sē-ē), *n.* [NL., < *Gnomonia* + *-aceæ.*] A family of pyrenomycetous fungi of the order *Sphæriales* named from the genus *Gnomonia.* They have membranous perithecia embedded in the tissue of the host and usually with an elongate projecting neck. The spores are hyaline. See ★*Gnomonia.*

Gnomonic net. See ★*net*[1].

gnomonological (nō″mō-nō-loj′i-kal), *a.* [*gnomonology-y* + *-ic-al*[1].] Pertaining to the art of dialing. *Bailey.*

gnoscopine (nos′kō-pin), *n.* [Appar. < Gr. (*γι*)*γνώσκειν*, know, + *ὄπιον*, opium, + *-ine*[2].] A colorless alkaloid, $C_{22}H_{23}O_4N$, which crystallizes in lustrous prisms and melts at 228° C. It is contained in opium and is closely related to narcotine.

gnostid (nos′tid), *n.* and *a.* **I.** *n.* A member of the family *Gnostidæ.*

II. *a.* Of or belonging to the coleopterous family *Gnostidæ.*

go, *v. i.*—**Going through the fleet** (*naut.*), a form of punishment at one time used in the navy in which the culprit received a portion of the flogging to which he had been sentenced alongside of each of the various vessels which made up the fleet. It was punishment of the most degrading character.—**Going to Boston,** a game of poker-dice with three dice only, the winner being the player with the highest number of pips up. Sometimes called *Yankee grab.* See ★*poker-dice.*—**Going witness.** See ★*witness.*—**Let her go off** (*naut.*), an order to the man at the wheel to put the tiller to the weather side so that the vessel's head may pay off to leeward.—**To go free** (*naut.*), to sail so that the yards may be braced in and the sheets slacked. See *free, adv.*—**To go in.** (*b*) In *poker,* to put up the ante for drawing cards; to go into a jack-pot which is already opened.—**To go large** (*naut.*), to sail with the wind well abaft the beam.—**To go over.** (*a*) (2) In *bridge,* to double the value of the trump. See ★*bridge.*

go, *n.* **8.** As much as is or can be fetched at one going or trip: as, to fetch a *go* of water from the well; hence, as much as is supplied at one time; a dram: as, a *go* of gin. [Colloq.] —**9.** A bargain; a compact; a thing fully agreed upon: as, "Well! is it a *go?*" [Colloq.]—**On the go,** restlessly or busily active: as, he's *on the go* all the time.

go[2] (gō), *n.* [Jap.] A Japanese measure of capacity equal to 11.01 cubic inches.

Go. An abbreviation of *Gothic.*

G. O. An abbreviation (*a*) of *General Order;* (*b*) [*l. c.*] of *great organ.*

goaf-burned (gōf′bėrnd), *a.* [*goaf,* 2, + *burned.*] Heated in the mow or goaf. *N. E. D.* [Obsolete or prov. Eng.]

goaf-horse (gōf′hôrs), *n.* [*goaf,* 2, + *horse.*] A horse ridden upon grain stored in a barn to compress it. *N. E. D.* [Obsolete or prov. Eng.]

goai (gō′ī), *n.* [A colonial form of Maori *kowhai* (see def.) = Hawaiian *ohai,* Mangarevan *koai,* Paumotan *kofai,* applied to different plants.] In the southern island of New Zealand, the timber of the native locust or yellow kowhai, *Sophora tetraptera,* a member of the bean family. The timber is red in color and very durable, and is used for fencing and for piles in bridges and wharves.

goal[1], *n.* **7.** In *astron.,* the point on the celestial sphere toward which the motion of a body is directed; thus, the earth's goal at any moment is a point on the ecliptic about 90 degrees west of the sun.

goal-cage (gōl′kāj), *n.* In *roller-polo,* the wire netting which stops the ball in the goal after its entrance.

goal-line (gōl′līn), *n.* In *foot-ball, hockey, lacrosse,* and similar games, a line at the end of the field which passes through the goals.

goal-striker (gōl′strī″kėr), *n.* In certain games, the player who stands nearest his opponent's goal and endeavors to strike the ball through it.

goanna (gō-an′ä), *n.* A popular variant of *guana* (an abbreviated form of *iguana*) in common use in Australia for any large lizard; specifically, the lace-lizard, *Varanus varius.* Also *gohanna.*

go-ashore (gō′a-shōr″), *n.* [Said to be a fanciful perversion of the Maori name *kōhua.* This could be heard as **gowa,* which, understood as an incomplete phrase *go a-,* could be neatly completed, in a nautical fashion, as *go-ashore.*] A three-legged iron pot with two ears to which was attached a wire handle for suspension on a crane over a fire. [New Zealand.]—**Go-ashores** (*naut.*), a seaman's best suit of clothes.

goat[1], *n.*—**Cashmere goat,** a small, strongly built variety of the domesticated goat, *Capra hircus,* which has a thick undercoat of wool beneath the long outer hair. The wool is combed out in summer and used for making cashmere shawls and fine cloth. The variety is found most abundantly in Tibet.—**Nubian goat,** a long-legged, coarse-haired breed of goat, found in Nubia, Upper Egypt, and Abyssinia, which has the face strongly curved, the horns lying close to the neck, and the ears long and pendulous.—**To ride the goat.** See ★*ride.*

goat-bush (gōt′bůsh), *n.* A prickly shrub, *Castela Nicholsoni,* of the quassia family, growing in the southwestern United States and northern Mexico. Also called *chaparro-amargoso,* on account of its bitter bark. See *amargoso-bark.*

goat-fig (gōt′fig), *n.* Same as *caprifig.*

goat-fish, *n.*—**Yellow goat-fish,** *Upeneus martinicus,* a fish of the family *Mullidæ,* found in West Indian waters and north to Key West.

goat-horn (gōt′hôrn), *n.* A form of lightning-arrester consisting of two metal rods, bent in the form of horns facing each other, one of which is connected with the ground and the other to the transmission-line which is to be protected.

goat-jug (gōt′jug), *n.* A cream-jug having a base modeled in the form of a recumbent goat and the figure of a bee modeled in relief. Jugs of this design were made in the eighteenth century at both Bow and Chelsea, England.

goatling (gōt′ling), *n.* A young goat; specifically, a goat between one and two years old.

> [At] the half-yearly meeting of the British Goat Society . . . held yesterday . . . the newly coined word *'goatling'* was adopted, to distinguish goats above 12 months and under two years old. *Times* (London), Dec. 7, 1883.

goat-moth, *n.*—**Poplar goat-moth,** a North American cossid moth, *Cossus centerensis,* whose larva bores in the trunks of *Populus tremuloides.*

goat's-beard, *n.*—**Dwarf goat's-beard,** the dwarf dandelion, *Krigia Dandelion.*—**Virginia goat's-beard,** *Krigia Virginica,* a plant with a scape one to two feet high and handsome orange-yellow flowers, found throughout most of eastern North America. Also called *cynthia.*

Goatweed emperor. See ★*emperor.*

gob[1] (gob), *v. i.*; pret. and pp. *gobbed,* ppr. *gobbing.* To brag; boast. [Prov. Eng.]

gobble[1] (gob′l), *n.* In *golf,* a putt played with such force that it would be carried some distance past the hole if it did not go in, but which does go in.

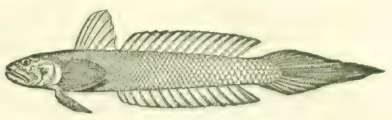
gobbler[1], *n.* **2.** An automatic bucket the halves of which separate at the bottom when lowered and close when a strain is put upon the hoisting-chain, digging into the material to be loaded. When the strain is removed the weight of the load causes the bucket to open.

gobbo (gob′o), *n.* [Prob. W. African.] The okra or bandakai, *Abelmoschus esculentus.*

gobemouche (gōb-mösh′), *n.* [F., < *gober,* gulp, + *mouche* (< L. *musca*), fly.] A gaping simpleton who believes everything that he hears; a credulous person.

gobernadora (gō″ber-nä-dō′rä), *n.* [Span., fem. of *gobernador,* governor.] In Mexico, *Covillea tridentata,* the creosote-bush, an ill-smelling evergreen bush of the family *Zygophyllaceæ.* An infusion or tincture of the leaves is used as a remedy for gout and rheumatism.

gobernadorcillo (gō-ber-nä-dōr-thēl′yō), *n.* [Philippine Sp., dim. of *gobernador,* governor.] The governor or head-man of a village or small town in the Philippines.



Gobiesocinæ (gō″bi-ē-sō-sī′nē), *n. pl.* [NL., < *Gobiesox* (*-esoc-*) + *-inæ.*] A subfamily of fishes typified by the genus *Gobiesox.*

Gobioidei (gō-bi-ō-id′ī), *n. pl.* [NL., < *Gobius* + *-oidei.*] A name applied to the group of gobies as a whole.

Gobioidinæ (gō″bi-ō-i-dī′nē), *n. pl.* [NL., < *Gobioides* + *-inæ.*] A subfamily of gobies typified by the genus *Gobioides.*

Gobiomorus (gō″bi-ō-mō′rus), *n.* [NL., < L. *gobius,* goby, + Gr. *μωρός,* dull, stupid.] A genus of small fishes. The name originally covered species of different groups, but is properly restricted to the Portuguese man-of-war fish, *G. gronovii,* a small fish found in the tentacles of the Portuguese man-of-war. The genus is often called *Nomeus.*

Gobionellus (gō″bi-ō-nel′us), *n.* [NL., < L. *gobio*(*n-*), goby, + *-ellus.*] A genus of gobies

Gobionellus oceanicus.
(From Bull. 47, U. S. Nat. Museum.)

characterized by the elongate body and pointed caudal fin. *G. oceanicus* is the commonest American species.

Gobiosoma (gō″bi-ō-sō′mä), *n.* [NL., < L. *gobius,* goby, + Gr. *σῶμα,* body.] A genus of small gobies characterized by the naked body and blunt head. *G. bosci* is common along the Virginia and Carolina coasts.

goblinic (gob-lin′ik), *a.* [*goblin* + *-ic.*] Goblin-like; of the nature of a goblin; of or pertaining to a goblin.

gobo (gō′bō), *n.* [Jap. *go-bō.*] The common burdock, *Arctium Lappa.* It is much cultivated in Japan for its root, which is there a popular garden vegetable.

goborro (gō-bor′ō), *n.* [Aboriginal Australian name.] The Australian dwarf-box, *Eucalyptus microtheca.* See ★*coolibah.*

goburra (gō-bůr′ä), *n.* A variant of *kookaburra,* the aboriginal Australian name for the laughing-jackass, *Dacelo gigas.* Also *gobera.*

goby, *n.*—**Blind goby,** a small goby, *Typhlogobius californiensis,* without eyes in the adult stage, found on the coast of California.—**Crested goby,** a fish of the genus *Lophogobius,* characterized by a short body and a crested head, found in the waters of Cuba.—**Half-naked goby,** a fish of the genus *Garmannia,* found on the shores of Panama.—**Long-jawed goby,** a name given to fishes of the species *Gilichthys mirabilis,* a small goby found burrowing in the mud on the coast of California, remarkable for the backward extension of its upper jaw.—**Naked goby,** a fish of the genus *Gobiosoma,* found in the south Atlantic and Gulf coasts of the United States.

god[1], *n.*—**Little tin god** or **little tin god on wheels,** a slang name for a man who assumes an air of importance and authority ludicrously out of proportion to his actual position and attainments; a man who makes a fetish of himself.

> Wherefore the *Little Tin Gods* harried their little tin souls,
> Seeing he came not from Chatham, jingled no spurs at his heels,
> Knowing that, nevertheless, was he first on the Government rolls
> For the billet of "Railway Instructor to *Little Tin Gods on Wheels.*"
> *R. Kipling,* Departmental Ditties, Public Waste, st. 5.

The dusk of the gods. See *the* ★*twilight of the gods.*—**The twilight of the gods.** See ★*twilight.*

Goddess of Liberty [L. *Libertas*], liberty personified by the Romans as a goddess: occasionally used as an emblem.

godfather (god′fä″ᵺėr), *v. t.* [*godfather, n.*] To act as godfather to; be sponsor for. *Burke.*

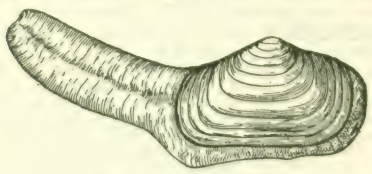
godhed, *n.* A simplified spelling of *godhead.*

goditcha (gō-dī′chä), *n.* Same as ★*kurda-itcha,* 2.

godparent (god′pâr-ent), *n.* A godfather or a godmother.

godron (gō-drôn′), *n.* [F.] Same as *godroon.*

godroonage (go-drön′āj), *n.* [*godroon* + *-age.*] In *decorated art,* godroons collectively.



godrooned (go-drönd), *p. a.* [*godroon* + *-ed*[2], after F. *godronné.*] Ornamented with godroons.

god-shelf (god′shelf), *n.* In Japan, a shelf in a household on which are placed the objects of household worship, forming a kind of domestic altar: the Japanese name is *kami-dana,* and among Buddhists *Butsu-dana.* See ★*Kami-dana.*

> "Wanted a religion" is the title of a missionary's description of Japan. This, Gulick denies and cites the countless gods, pious pilgrimages to eighty-eight sacred places, the *god-shelves* in every home, the 71,831 Buddhist temples and 190,803 officially registered shrines.
> *Amer. Jour. Relig. Psychol. and Education,* May, 1904, [p. 98.

goeduck (gō′ē-duk), *n.* [Also *geoduck;* from a native name.] A large edible clam, *Panopea*

generosa, of the northwest coast of the United States. With siphons extended it sometimes reaches a length of from 3 to 4 feet and weighs from 6 to 10 pounds. It lives buried deep in sand or clay near low-tide mark.

Goeduck (*Panopea generosa*).

In Alaskan waters is found a monster clam, the "*geoduck*," one of which would afford a meal for several persons; not so large, however, as the great tridacna and its species, which weighs, with its two valves, five hundred pounds, the animal alone weighing thirty.
Sci. Amer. Sup., April 11, 1903, p. 22,805.

goelism (gō′e-lizm), *n.* [Heb. *goel* (redeemer, avenger), + *-ism*.] The custom which recognizes an authorized 'avenger of blood' and makes blood-revenge obligatory.

goemin (gō′e-min), *n.* [F. *goém*(*on*) (< Bret. *gwemon*, seaweed) + *-in*[2].] A compound obtained from Irish moss, obtained by boiling carrageen.

gofer-iron (gō′fėr-ī″ėrn), *n.* A double mold with long handles in which gofers, or waffles are baked; a gofering-iron. Also called *gofer-tongs*.

gofer-tongs (gō′fėr-tôngz), *n. pl.* Same as ★*gofer-iron*.

Goffered schist. See ★*schist*.

goffering-frame (gof′ėr-ing-frām), *n.* A frame with a series of small rods between which the fabric to be goffered or ruffled is worked.

goffering-machine (gof′ėr-ing-ma-shēn″), *n.* An apparatus for plaiting or ruffling textile fabrics.

goffering-tongs (gof′ėr-ing-tôngs), *n. pl.* An iron tool which is heated and used for goffering or ruffling fabrics.

goggle[1], *n.* **3.** *pl.* A parasitic disease of sheep, caused by the presence of a bladder-worm in the brain which causes dizziness, staggering gait, walking in a circle, spasms, and convulsions. Also called *staggers*, *gid*, and *turnsick*.—**4.** [*pl.*] The garden gooseberry, *Ribes Grossularia*.

Goggle-eyed scad. Same as *goggle-eyed jack*.

goggle-goy (gog′l-goi), *n.* The hellgrammite fly, *Corydalus cornutus*. [Local, New Eng.]

goggly (gog′li), *a.* Affected with the goggles: as, *goggly* sheep.

gogo (gō′gō), *n.* [Tagalog name.] In the Philippine Islands, a giant climber, *Lens phaseoloides*, of the mimosa family, usually growing near the sea, the stems of which are pounded and used as a detergent by the natives. See *sea-bean*, 1, *similar-pod*, *match-box* ★*bean*, and ★*bayogo*, with cut.

gohanna (gō-han′ä), *n.* See ★*goanna*.

gohei (gō-hā′), *n.* [Chino-Jap. *gō*, (Chin. *yü*), august, imperial; + *hei*, (Chin. *pi*), a present or presents.] In the Shinto shrines of Japan, a slender wand of unpainted and unvarnished wood, originally a branch of *Cleyera japonica*, from which hang two long strips of white Japanese paper, notched alternately on opposite sides, representing offerings of rough and fine white cloth. There is but one gohei to each deity worshiped at any particular temple. *M. Satow*.

Goidel (goi′del), *n.* [OIr. *Góidel*, pl. *Góidil*, a Gael: see *Gael*. and cf. *Gadhel*.] A member of the 'Gaelic' branch of the Celtic race, namely, the branch represented by the Irish and the Gaels of Scotland. See *Gadhels*, in The Century Cyclopedia of Names.

goidelic (goi-del′ik), *a.* and *n.* **I.** *a.* Of or pertaining to the Goidels.

II. *n.* The language of the Goidels: ancient Celtic of the branch represented by Old Irish, and by modern Irish and Gaelic.

going, *n.* **7.** In *stair-building*, the width of the stairway or length of a tread. [Local Eng.]

going-train (gō′ing-trān), *n.* An operating train; that part of the gear-train in a timepiece which drives the hands.

goke[2] (gōk), *n.* [A var. of *colk*[1].] *Naut.*, the heart of a rope; the core in the center of a rope.

gola (gō′lä), *n.* [Also *golah*; < Hind. *golā*, a warehouse, esp. for grain, a curb, a pier, a ball, etc., a cannon-ball, etc., < *gol*, round.] A warehouse for storing grain, salt, etc. [Anglo-Indian.]

Golconda (gol-kon′dä), *n.* The name of a city of India noted in the sixteenth century for its great diamond-cutting industry; hence, allusively, a mine of wealth.

gold. **I.** *n.*—**Abyssinian gold.** Same as *talmi-gold*.—**Alluvial gold,** placer-gold.—**Best gold,** the bit in the gold which is nearest the central point of the target. In archery competitions a prize is often given for the best gold.—**Burmese gold,** gold to which a yellow or red color has been imparted by treatment with acids and the subsequent application of rouge and other reddish colorations to the depressed parts of the ornamentation.—**Burnished gold,** in *ceram.*, porcelain gilding which has been brightly burnished by means of a bloodstone burnishing-tool.—**Chased gold,** in *ceram.*, gilding on porcelain glaze which has been brightened in places by means of a pointed agate burnishing-tool. The lines are formed by working the point to and fro over the dull gold and are widened by repetition. At Sèvres and some other French factories intricate patterns and elaborate pictures were drawn on the dull gold ground and executed in this manner, the result being a beautiful contrasting effect of bright and dead or mat gold, exhibiting the accuracy of a fine engraving. This process has also been employed to some extent in England and other European countries, but is particularly characteristic of fine French porcelains made about 1830.—**Diamine gold,** a direct cotton coal-tar color of the disazo type, derived from diamidonaphthalene. It dyes unmordanted cotton a golden yellow in an alkaline salt bath.—**Glass-brushed gold,** in *ceram.*, porcelain gilding which is rubbed with a brush of glass fibers to produce a semi-bright effect. This method is an improvement upon the gold-sanding process, and was quicker in its results. See *sanded* ★*gold*.—**Gold brick,** a brick-shaped mass of gilded metal of no intrinsic value, which plausible swindlers, of a certain class, sometimes pass off as genuine, at a tempting price, on unwary purchasers; hence, any similar swindle. Frequently used attributively: as, another *gold-brick* swindle. [Slang, U. S.]—**Jeweler's gold,** an alloy containing three parts of gold to one of copper: known as 18 *karat gold*, that is, gold of which 18 parts out of 24 are pure metal. No gold of a less purity is admitted into France.—**Lump gold,** gold found in placer-mining in the form of lumps or nuggets.—**Rusty gold,** free gold which does not easily amalgamate, the particles being coated, as is supposed, with oxid of iron.—**Sanded gold,** porcelain-gilding which has been rubbed with fine sand to produce a semi-bright effect.—**To measure golds,** in *archery*, to measure the distance from the center of each arrow in the gold, in order to determine the best gold.

II. *a.*—**Gold brown.** Same as *phenylene brown* (which see, under *brown*).—**Gold luster, penny.** See ★*luster*[2], etc.—**Gold reserve.** See *reserve*.

gold-balls (gōld′bâlz), *n. pl.* Buttercups; applied more especially to the creeping buttercup, *Ranunculus repens*.

gold-beetle (gōld′bē″tl), *n.* Any one of several leaf-beetles and tortoise-beetles, as *Chrysochus auratus* and *Coptocycla aurichalcea*.

gold-boat (gōld′bōt), *n.* A boat used in dredging for gold.

gold-bug (gōld′bug), *n.* **1.** A beetle of a golden color.

> The *Gold Bug*. *Poe* (title).

2. An advocate of the single gold standard in finance; a 'gold man.' [Opprobrious and slang.]

gold-chain (gōld′chān), *n.* The wall-pepper, *Sedum acre*.

gold-cure (gōld′kūr), *n.* A secret method of treatment of the drink habit in which the chief remedy employed is said to be chlorid of gold.

gold-diggings (gōld′dig″ingz), *n. pl.* Any region where gold-bearing sands and gravel abound and where gold is being exploited by digging and washing: sometimes also applied to the mining of gold-bearing quartz.

gold-dropper (gōld′drop″ėr), *n.* A sharper; one of a pair who, having dropped a gold coin, picks it up in the presence of a stranger, and pretending to have just found it, engages his attention while the confederate robs him.

Golden aster, any plant of the genus *Chrysopsis*, aster-like composites of North America with bright golden-yellow flowers. *C. Mariana*, the Maryland golden aster, is very abundant in the eastern United States and one of the handsomest wild flowers, blooming from July to September.—**Golden ball,** in *bot.*, the globe-flower, *Trollius Europeus*, applied also to the American or spreading globe-flower, *T. laxus*.—**Golden book,** the official list of the nobility of Venice.—**Golden calf, earth, grease, syrup, text, type.** See ★*calf*[1], etc.—**Golden cup, golden guineas,** the pilewort or lesser celandine, *Ficaria Ficaria*.

goldeneye, *n.* **4.** *Melithreptus lunulatus*, a small species of honey-eater. [Australia.]

goldenglow (gōl′dn-glō), *n.* The tall cone-flower, *Rudbeckia laciniata*, which has a profusion of yellow flowers, the conical disk being also yellow. It ranges from Canada to New Mexico.

golden-Jerusalem (gōl″dn-jē-rö′sa-lem), *n.* The common cone-flower, *Rudbeckia hirta*.

goldenknop, *n.* **2.** *pl.* Same as ★*goldknops*.

goldenlocks (gōl′dn-loks), *n.* **1.** The common polypody, *Polypodium vulgare*.—**2.** The golden cudweed, *Pterocaulon virgatum*.

goldenoak (gōl′dn-ōk), *n.* The smooth false foxglove, *Dasistoma Virginicum*, the leaves of which resemble those of the oak.

goldenrod, *n.*—**Alpine goldenrod,** *Solidago alpestris*, of alpine summits in Europe and of the White and Green Mountains in America. It belongs to the type of *S. Virgaurea*, but is dwarf with very few large heads and spatulate radical leaves.—**Anise-scented goldenrod.** Same as *sweet* ★*goldenrod*.—**Beach-goldenrod.** Same as *seaside*-★*goldenrod*.—**Blue-stemmed goldenrod,** *Solidago cæsia*, a low, partially prostrate or reclining species with usually bluish or purple stems, lanceolate, sharply serrate leaves, and bright-yellow heads mostly in clusters in the axils of the reduced upper leaves: common in eastern North America.—**Bog-goldenrod,** *Solidago uliginosa*, a stout thyrsiform species growing in bogs and swamps, chiefly in the region of the Great Lakes and extending east to Newfoundland and south to New Jersey: it blooms in July.—**Boott's goldenrod,** *Solidago Boottii*, a slender and graceful species with few one-sided racemes and long lanceolate serrate leaves narrowed into winged petioles: found rather sparingly in dry woods from Virginia to Florida and Texas.—**Broad-leaved goldenrod.** Same as *zigzag* ★*goldenrod*.—**Bushy goldenrod,** *Euthamia graminifolia* and *E. leptocephala*, the latter distinguished as *Western bushy goldenrod*. They resemble true goldenrods of the cymose type, but have the receptacle fimbrillate instead of alveolate, the rays more numerous than the disk-flowers, and linear entire leaves. They are also more or less fragrant, and hence are called *fragrant goldenrod*, at least the eastern United States species, which, however, is widely distributed, ranging from New Brunswick to Florida and west to Nebraska and the Northwest Territory. The other species is more slender, and is found from Missouri to Louisiana and Texas.—**Canada** or **Canadian goldenrod,** *Solidago Canadensis*, the most abundant, widely distributed, and typical of American goldenrods. It has large pyramidal panicles of recurved, one-sided racemes, and lanceolate, coarsely toothed, triple-nerved leaves. It sometimes attains a height of 8 feet, and often grows in dense masses, monopolizing the soil and becoming a noxious weed. The color of the flowers is a rather dull yellow, and the species is in many respects less ornamental than several other smaller and less abundant ones. It occurs from New Brunswick to British Columbia and south to Florida and Arizona. A common name in some districts is *yellow-weed*.—**Canary Islands goldenrod.** Same as *goldenrod-tree*. See also *tree-goldenrod*.—**Curtis's goldenrod,** *Solidago Curtisii*, a mountain species of the southeastern United States with abundant flowers in short clustered racemes in the axils of the upper leaves.—**Cut-leaved goldenrod,** *Solidago arguta*, a tall, slender, handsome species of the Adirondacks, where it ascends to an altitude of 2,700 feet, ranging to New England, Ontario, Ohio, and Virginia. It has recurved racemes and large ovate, coarsely and sharply serrate leaves.—**Double goldenrod.** Same as *Canada* or *Canadian* ★*goldenrod*.—**Drummond's goldenrod,** *Solidago Drummondii*, of the Mississippi valley, a pubescent plant with broad ovate leaves and short, rather loose, partially one-sided racemes or clusters of flowers in the axils of reduced upper leaves, or terminal, the rays large and conspicuous.—**Dwarf goldenrod.** (*a*) A dwarf form of the European goldenrod. (*b*) Same as *gray* ★*goldenrod*.—**Early goldenrod,** *Solidago juncea*, one of the most beautiful of goldenrods, very abundant throughout eastern North America. It bears a profusion of long and graceful recurved, one-sided racemes of flowers of the richest golden yellow, and as it blooms in most latitudes by the first of August and lasts through that month, it inaugurates the series of goldenrods which continues the display throughout the season. Also called *yellow-top*.—**Elliott's goldenrod,** *Solidago Elliottii*, a swamp species found near the coast from Massachusetts to Georgia, sometimes 3 feet high, bearing a long terminal recurved raceme and shorter axillary ones below.—**Elm-leaved goldenrod,** *Solidago ulmifolia*, having the lower leaves broadly ovate and strongly nerved, suggesting those of the elm, and few short recurved mostly terminal racemes of deep-yellow flowers: widely distributed throughout the eastern United States.—**European goldenrod,** the common old-world goldenrod, *Solidago Virgaurea*. See *goldenrod* and *Solidago*.—**Field goldenrod.** Same as *gray* ★*goldenrod*.—**Flat-top goldenrod,** *Euthamia graminifolia*. See *bushy* ★*goldenrod* and *fragrant* ★*goldenrod*.—**Fragrant goldenrod,** any of the species of *Euthamia*, but especially *E. graminifolia* and *E. Caroliniana*. The latter is distinguished as *slender fragrant goldenrod* on account of its very narrow leaves and slender habit. Its range is more southern than *E. graminifolia*. See *bushy* ★*goldenrod*.—**Gray goldenrod,** *Solidago nemoralis*, so called on account of its ashy-gray color. The flowers, however, are of the liveliest glittering yellow, and occur in dense, curving, one-sided racemes, often very compact and massive, rendering it one of the most showy and attractive goldenrods. It is short, rarely over a foot and a half high, whence it is called *dwarf goldenrod*. It is very abundant throughout the eastern United States, and ranges from Quebec to Arizona, preferring poor soil and open country. See cut under *Solidago*.—**Late goldenrod,** *Solidago serotina*, a late-flowering species which

Canada Goldenrod (*Solidago Canadensis*).
a, summit of stem and inflorescence; *b*, middle portion of stem; *c*, a ray flower; *d*, a disk flower; *a* and *b*, one sixth natural size, *c* and *d*, enlarged.

ranges from Newfoundland to British Columbia and south to Georgia and Texas.—**Missouri goldenrod,** *Solidago Missouriensis,* a widely distributed species of the western prairies of North America, ranging from Tennessee to Washington and from Texas to Manitoba. It sometimes grows 3 feet high and has linear-lanceolate triple-nerved leaves and terminal panicles of secund recurved branches.—**Noble goldenrod,** *Solidago speciosa,* a stout, tall species with broad ovate leaves, bearing a large terminal thyrse, ranging from Nova Scotia to North Carolina and west to Minnesota and Nebraska.—**Northern goldenrod,** *Solidago multiradiata,* a small, somewhat aberrant species with spatulate leaves, mostly near the ground, and a small terminal corymbose cyme of large heads sometimes having as many as 15 rays. It is found far north from Labrador and Hudson Bay to British Columbia, and south in the Rocky Mountains to Colorado.—**Pale goldenrod.** Same as *white* ★*goldenrod.*—**Pine-barren goldenrod,** *Solidago fistulosa,* a tall hirsute species of the pine-barrens of New Jersey, extending southward to Florida and Louisiana. It has ovate or lanceolate leaves and an open terminal panicle of recurved secund branches.—**Plume-goldenrod.** Same as *early* ★*goldenrod.*—**Ragged goldenrod,** *Solidago squarrosa* and *S. petiolaris,* two anomalous species with elongate heads in which the conspicuous green recurved tips of the involucral bracts give them a squarrose or ragged appearance. The former ranges from New Brunswick and Ontario to Virginia and Ohio, and the latter from North Carolina to Florida and westward to Kansas and Texas.—**Rayless goldenrod,** *Chondrophora nudata,* a plant resembling the cymose type of goldenrod, but destitute of ray-flowers. It has a slender stem with linear-spatulate root-leaves much reduced above, and open corymbose cymes of yellow flowers. It occurs in the pine-barrens of New Jersey and thence south to Florida and west to Texas.

The rabbit-brush, *Chrysothamnus nauseosus,* is called *fetid rayless goldenrod* (see *rabbit-brush,* with cut), and *C. Howardi* is distinguished as *Howard's rayless goldenrod.* The latter grows on the plains from Nebraska and Colorado to Utah and New Mexico.—**Riverbank goldenrod,** *Solidago Purshii,* a small species confined to rocky riverbanks, found from Newfoundland to Virginia. It has oblanceolate, obtuse, crenate root-leaves and linear stem-leaves, and a small loose terminal thyrse of large heads.—**Rock-goldenrod,** *Solidago rupestris,* a handsome species growing on rocky banks of streams from Pennsylvania to Indiana and Tennessee. It has a slender stem 2–3 feet high, leafless below, the leaves linear-lanceolate, triple-nerved, and distantly sharply toothed, and a terminal pyramidal thyrse of dense, recurved, one-sided branches, symmetrically disposed.—**Rough-leaved goldenrod.** Same as *spreading* ★*goldenrod.*—**Salt-marsh goldenrod.** Same as *seaside-*★*goldenrod.*—**Seaside-goldenrod,** *Solidago sempervirens,* a stout, leafy species inhabiting sea-beaches and salt-marshes from New Brunswick to Florida, and found also in Bermuda. It has thick, fleshy, entire leaves densely crowded on the stem, and a large terminal leafy panicle of compact heads on short recurved branches.—**Sharp-toothed goldenrod.** Same as *early* ★*goldenrod:* so called from the sharply serrate leaves, which, however, is not a constant character, the leaves being sometimes entire.—**Showy goldenrod.** Same as *noble* ★*goldenrod.*—**Spreading goldenrod,** *Solidago patula,* remarkable for the widely spreading, secund, recurved branches of the loose panicle. It is a stout, rigid plant, sometimes 6 feet high, with broad elliptical, sharply serrate leaves on long winged petioles, and often angled stems. It grows in swamps from Maine to Minnesota and south to Georgia and Texas.—**Stiff goldenrod,** *Solidago rigida,* a very stout, tall species with thick and rigid ovate or oblong, long-petioled leaves and dense terminal corymbose cymes of clustered heads on slightly secund branches. It is found from Canada to Georgia and west to the Northwest Territory and Texas.—**Swamp-goldenrod,** *Solidago neglecta,* a rather large and showy plant growing in swamps from New Brunswick to Maryland and west to Wisconsin and Illinois. It has long, lanceolate, serrate leaves on margined petioles, and a terminal thyrsoid panicle of flowers on one-sided, much-recurved branches. The name is sometimes applied to the *bog-goldenrod.*—**Sweet goldenrod,** *Solidago odora.* The whole plant has a strong odor of anise, and is hence also called *anise-scented goldenrod.* It is a slender plant 2–4 feet high with lanceloate, punctate leaves and axillary and terminal spreading recurved racemes of bright-yellow flowers. For uses, etc., see *Solidago.*—**True goldenrod,** the sweet goldenrod.—**Wand-like goldenrod,** *Solidago stricta,* a native of pine-barrens from New Jersey to Florida and Louisiana. It has a wand-like stem bearing numerous very small appressed leaves, the principal leaves borne at or near the base, entire spatulate, and long-petioled. The flowers are arranged in a narrow terminal thyrsus.—**White goldenrod,** *Solidago bicolor,* the only species the flowers of which are not yellow, the rays at least, and to a less extent the disk-flowers, being nearly white or about cream-colored. It is a hirsute pubescent plant of the virgate type, very variable in size, usually about a foot high, the lower leaves spatulate, crenate-dentate, and petioled, the heads in clusters forming an interrupted thyrse. It grows in dry places from New Brunswick to Georgia and west to Minnesota and Missouri. Sometimes called *silver-rod.*—**Willow-leaf goldenrod.** Same as *wand-like* ★*goldenrod.*—**Woodland goldenrod, wreath-goldenrod.** Same as *blue-stemmed* ★*goldenrod.*—**Zigzag goldenrod,** *Solidago flexicaulis,* which has a zigzag or crooked slender stem, weak and more or less reclining, and very broad, thin, ovate, acuminate, and finely serrate leaves, the flowers disposed in short axillary racemose clusters forming a narrow, loose terminal thyrse. It grows in rich woods from New Brunswick to Georgia and west to Minnesota and Missouri. Also called *broad-leaved goldenrod.*

Rayless Goldenrod (*Chondrophora nudata*).
a, entire plant; *b*, a head; *c*, a floret. (From Britton and Brown's "Illus. Flora of the Northern States and Canada.")

goldenrod-gall (gōl′dn-rod-gâl″), *n.* A gall or blight on the goldenrod caused by the maggot of a fly, *Trypeta solidaginis,* or of a tineid moth, *Gelechia gallæosolidaginis.*

goldenseal, *n.* 2. The false or wild spikenard, *Vagnera racemosa.*

golden-shower (gōl′dn-shou″ėr), *n.* The laburnum.—**Golden-shower tree,** the purging cassia, *Cassia fistula.*

golden-slipper (gōl′dn-slip″ėr), *n.* The larger yellow lady's-slipper, *Cypripedium hirsutum.*

goldenstar (gōl′dn-stär), *n.* Same as ★*golden aster.*

goldenstars (gōl′dn-stärz), *n.* A Californian liliaceous plant, *Bloomeria crocea,* nearly related to *Hookera.* The yellow flowers, an inch across, are borne in umbels of 50 to 60 each, appearing in great profusion at the close of spring.

goldentop (gōl′dn-top), *n.* An ornamental grass, *Achyrodes aureum,* which grows in low tufts and bears elegant one-sided panicles. It has been introduced from the Mediterranean region into southern California, where it has become spontaneous.

goldentuft (gōl′dn-tuft), *n.* See *Pterocaulon.*

goldenwing (gōl′dn-wing), *n.* A shortened form of *golden-winged woodpecker;* the flicker.

gold-fever (gōld′fē″vėr), *n.* A feverish desire to search for gold.

The height of the Klondike *gold-fever* in 1897.
Geog. Jour. (R. G. S.), XIII. 305.

gold-field, *n.* 2. *pl.* In California, a plant of the composite genus *Bæria* and to some extent of the related genus *Lasthenia:* so named from the fact that these plants cover the ground with their yellow bloom. The species are low herbs, some of which endure saline or alkaline soil.

goldfinch, *n.* 6. In *angling,* the name of an artificial salmon-fly.

gold-founded (gōld′foun″ded), *p. a.* Founded in connection with the discovery or exploitation of gold: as, a *gold-founded* city or town.

I rode up the narrow street, serpentine in construction, as in all *gold-founded* townships.
Rolf Boldrewood, Miner's Right, ix.

gold-fringe (gōld′frinj), *n.* An English collectors' name for a pyralid moth common to Europe and the United States, *Hypsopygia costalis,* the adult of the clover hay-worm.

goldknops (gōld′nops), *n.* Either the tall buttercup, *Ranunculus acris,* or the creeping buttercup, *R. repens.* Also *goldenknops.*

gold-opal (gōld′ō″pal), *n.* An opal of which the flames are of a rich golden-yellow color; also, an opal which is without a play of color and is cut with facets, forming a brilliant red or yellow-red stone.

gold-print (gōld′print), *n.* A print in gold-leaf. Incorrectly applied to a print in gold ink or bronze, which lacks the full brilliancy of gold-leaf.

gold-printing (gōld′prin-ting), *n.* Printing in gold-leaf. The type or design, rolled over with a size or glair, is strongly impressed on the surface to be printed. On this surface gold-leaf or gold bronze is laid. When fairly dry the surplus leaf or bronze is rubbed off with a pad of cotton or fur. To bring out a proper metallic luster, the print should be pressed or burnished. In bookbinding, the gold-leaf is applied to a glairy surface, and is impressed with a hot stamp or finishing-tool.

gold-purple (gōld′pėr″pl), *n.* Same as *purple of Cassius.*

gold-rain (gōld′rān), *n.* A shower of small sparkling stars discharged from a rocket or pyrotechnic bomb.

gold-rush (gōld′rush), *n.* A feverish rush to some newly discovered gold-field with the hope of amassing wealth.

goldschmidtite (gōld-shmit-īt′), *n.* [Named after Professor V. *Goldschmidt* of Heidelberg.] A variety of the gold-silver telluride, sylvanite, rich in gold and occurring in complex crystals of peculiar habit: found at Cripple Creek, Colorado.

gold-shrub (gōld′shrub), *n.* Any one of several shrubs belonging to the genus *Palicourea* of the madder family, especially *P. speciosa:* so named from the golden color of the dried flower-clusters and the yellow-green color of the leaves.

gold-solder (gōld′sod″ėr or -sol″dėr), *n.* A solder suitable for gold or high-grade alloys. It consists of gold 12 parts, silver 2 parts, and copper 4 parts.

gold-spangle (gōld′spang″gl), *n.* A British collectors' name for a noctuid moth, *Plusia bractea.*

gold-spot (gōld′spot), *n.* A British collectors' name for a noctuid moth, *Plusia festucæ.*

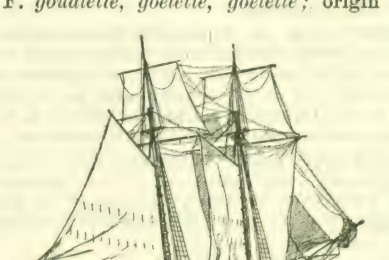
gold-standard (gōld′stan-dārd), *a.* Using gold alone as full legal tender. In the United States both gold and silver are legal tender (see *silver*); but since the demonetization of silver in 1873 the country has been on a gold basis, the purchasing-power of the depreciated silver dollar having been maintained by the policy of the government which has preserved its parity with gold. The situation in other double-standard countries is similar. The gold standard prevails in Great Britain, Germany, Sweden, Norway, Denmark, Austria-Hungary, Turkey, Portugal, Brazil, Canada, Newfoundland, Egypt, Chile, Peru, Japan, Russia, Mexico, Bolivia, British India, and various other countries.

goldstone, *n.* 2. In *ceram.,* an aventurin glaze containing particles which have the appearance of specks of gold.

gold-swift (gōld′swift), *n.* A British collectors' name for a moth, *Hepialus hectus.*

goldtail, *n.* 2. A British collectors' name for a liparid moth, *Euproctis auriflua,* closely related to the brown-tail moth.

gold-wash (gōld′wosh), *n.* 1. A thin plating of gold.—2. A stream where gold is obtained by washing: generally used in the plural.



gold-water (gōld′wâ-tėr), *n.* A liquid distilled from a mixture of spices, spirits of wine, and water, and mixed with pulverized gold-leaf. Also called *Dantzic brandy.*

gold-weed (gōld′wēd), *n.* The corn crowfoot, *Ranunculus arvensis.* Also called *horse-gold.*

gold-work (gōld′wėrk), *n.* An article made of or decorated with gold; goldsmiths' work; also, the stopping or filling of teeth with gold.

golem (gō′lem), *n.* [Heb.] In Jewish use, a shapeless mass; an unfinished vessel or a lifeless bulk; in modern Jewish parlance, a blockhead; a stupid. The Talmud, as well as modern Jewish folk-lore, tells of rabbis who constructed golems and endowed them with life.

goleta (gō-lā′tä), *n.* [Sp. *goleta* = It. *goletta* = F. *goualette, goëlette, goélette;* origin unknown.] A Spanish two-masted vessel, rigged fore and aft, with high peak and low gunwales: formerly much used by pirates in the Gulf of Mexico.

Goleta.

golf, *n.*—**Amateur golf championship,** an event in which amateurs only may participate.—**Clock-golf,** a variety of golf in which metallic numerals, from 1 to 12 inclusive, are placed at equal distances in a circle, the object of the game being to putt the ball from each of these points into a hole placed anywhere within the circle.—**Open golf championship,** an event in which both professionals and amateurs may participate.

golf-ball (golf′bâl), *n.* A ball with which the game of golf is played. See *golf.*

golf-cart (golf′kärt), *n.* Same as *golf-gig.*

golf-croquet (golf′krō-kā″), *n.* A form of lawn game which combines the strokes of golf with the wickets of croquet.

golf-gig (golf′gig), *n.* A light carriage, without top, having a gig-body and sidebar gear.

Golf-gig.

golf-links (golf′-lingkz), *n. pl.* The links or course over which golf is played.

Golgi method. See ★*method.*

Golgotha (gol′gō-thä), *n.* [LL. *Golgotha,* < Gr. Γολγοθά, < Aram. *gogoltha,* Heb. *gulgōleth,* a skull.] 1. The Hebrew (Aramaic) name of the place of Christ's crucifixion, somewhere near Jerusalem.—2. A graveyard or place of interment.

Presumptuous Churchmen, in most Parts of the Kingdom of Europe, have . . . burnt whole Towns, Male and

Female, Children and old Men, . . . dy'd the White Fields in Blood, turned them into a *Golgotha*.
Drummond of Hawthornden, Skiamachia, Works, p. 204.

goliardy (gō'li-är-di), *n.* The ribald jesting and satirical poetry of the goliards.

goliathize (gō-lī'ath-īz), *v. i.*; pret. and pp. *goliathized*, ppr. *goliathizing*. [*Goliath* + *-ize*.] To talk after the manner of Goliath, that is, vauntingly; boast.

Walter Map. The banquet, from whence there puffed out such an incense of unctuosity into the nostrils of our Gods of Church and State, that Lucullus or Apicius might have sniffed it in their Hades of heathenism— . . . As to the fish, they de-miracled the miraculous draught, and might have sunk a navy—
Herbert. There again, Goliasing and *Goliathising*.
Tennyson, Becket, iii. 3.

goller (gol'ėr), *v. i.* [Also *gollar*, *guller*; vaguely imitative; compare *guggle*, *gulp*, etc., *yell*, and '*holler*' for *hollow*.] 1. To emit a gurgling sound. *Jamieson.*—2. To utter loud, thick sounds, as when choking with rage; to scold in a loud voice; bawl. [Scotch.]

golok (gō'lok), *n.* Same as ★*guloc*.

goluptious, galuptious (gō-lup'shus, gā-lup'-shus), *a.* [A made word; a kind of fusion of *gl(orious)* and *(vol)uptuous*.] Delicious. [Slang.]

G. O. M. An abbreviation of *Grand Old Man*, a favorite epithet applied to William Ewart Gladstone, the British statesman, in his later years.

Goma brea. See ★*brea*.

Gomarian (gō-mā'ri-an), *n.* A Gomarist.

gomart (gō-märt'), *n.* [F. *gomart*, *gommart*, < *gomme*, gum.] The Jamaican birch, *Terebinthus Simaruba*. It yields a gum-resin known as *cachibou* (which see).

gomashta (gō-mash'tä), *n.* [Hind. *gumāshta*, < Pers. *gamāshta*, appointed.] In India, a native factor or agent.

gombay (gom'bā), *n.* [Supposed to be of African origin.] A festal performance among the negroes of Bermuda, usually held on Christmas eve: probably a survival, much modified, of an ancient African rite. Groups of masked men and boys go about the country from house to house, singing, dancing, and playing on musical instruments.

Gombei pottery. See ★*pottery*.

Gombroon ware. See ★*ware*[2].

Gomphoceras (gom-fos'e-ras), *n.* [NL., < Gr. *γόμφος*, a nail, + *κέρας*, a horn.] A genus of extinct nautiloid cephalopods of Paleozoic age, characterized by curved shells swollen in later stages and contracted near the aperture.

gomphoceratite (gom-fō-ser'a-tīt), *n.* [*gomphoceras* (*-cerat-*) + *-ite*[2].] In *paleon.*, a member of the ammonoid genus *Gomphoceras*.

Gonactinia (gon-ak-tin'i-ä), *n.* [NL., < Gr. *γόνος*, generation (?), + *ἀκτις* (*ἀκτιν-*), a ray.] The typical genus of the family *Gonactinidæ*. *Sars.*

Gonactinidæ (gon-ak-tin'i-dē), *n. pl.* [NL., < *Gonactinia* + *-idæ*.] A family of *Zoantharia*, of the order *Proactiniæ*. They have a sulcus and a sulculus, eight Edwardsian macromesenteries, and eight micromesenteries. The sulcar and sulcular macromesenteries are sterile: the four remaining macromesenteries are fertile and form couples with four micromesenteries. The family contains the genus *Gonactinia*. *G. prolifera* reproduces itself asexually by strobilation.

gonadial (gō-nad'i-al), *a.* [*gonad* (NL. **gonadium*) + *al*[1].] Of or pertaining to a gonad, or reproductive organ, either male or female.

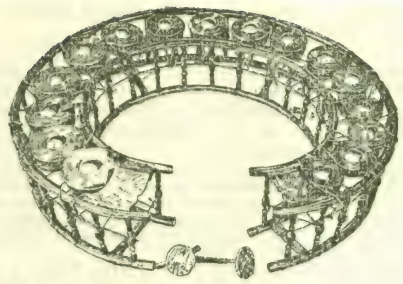
Many segmented worms in which important developmental processes occur, *e. g.*, formation of new gill slits, of *gonadial* sacs, or even of whole segments of the body, long after the power of reproduction has been acquired.
Encyc. Brit., XXVIII. 138.

gonadic (gō-nad'ik), *a.* [*gonad* + *-ic*.] Same as ★*gonadial*.

gonarthrotomy (gon-är-throt'ō-mi), *n.* [Gr. *γόνυ*, knee, + *ἄρθρον*, joint, + *-τομια*, < *ταμεῖν*, cut.] Operation on the knee-joint.

gondola, *n.* 7. A coach of unusual size with a boat-shaped bottom and seats for eight or more persons.

Gondwana system. See ★*system*.



gonecium (gō-nē'si-um), *n.* Same as ★*gonœcium*.

gonecyst (gon'e-sist), *n.* [Gr. *γονή*, seed, + *κύστις*, bag (cyst).] Same as *seminal vesicle* (which see, under *vesicle*).

gonecystitis (gon″e-sis-tī'tis), *n.* [NL., as *gonecyst* + *-itis*.] Inflammation of the vesiculæ seminales.

gong-drum (gong'drum), *n.* A bass drum made unusually thin or shallow, like a very large tambourine, so as to economize space.

gong-piano (gong'pi-an″ō), *n.* A musical instrument, common in several countries in

Gong-piano.
In the Stearns Collection, University of Michigan.

southeastern Asia, consisting of a graduated series of gongs set in a circular bamboo frame, within which the player sits.

goniac (gō'ni-ak), *a.* [*goni-on* + *-ac*.] In *anthrop.*, relating or pertaining to the gonion. —**Goniac angle**, in *craniom.*, same as ★*angle of mandibles*.

Goniatites, *n.* Originally (as introduced by de Haan) a genus of Paleozoic ammonoid cephalopods with closely coiled shells, simple septal sutures, and mostly broad lateral saddles and lobes. The genus was later subdivided into other genera of more restricted scope, so that the name, which originally had a value parallel to that of *Ammonites*, has now, like the latter, disappeared from classification.

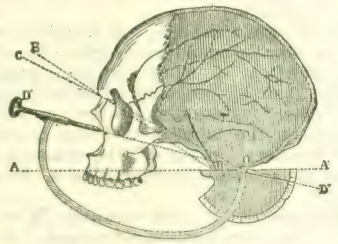
gonid (gon'id), *n.* [NL. *gonidium*.] Same as *gonidium*.

gonidangium, *n.* 2. Specifically, the asexual reproductive organ, borne upon the gametophyte, in distinction from the sporangium, which is borne upon the sporophyte.

gonidiferous (gō-ni-dif'e-rus), *a.* [NL. *gonidium* + L. *-fer*, < *ferre*, bear.] Bearing gonidia.

gonidiophyl, gonidiophyll (gō-nid'i-ō-fil), *n.* [NL. *gonidium* + Gr. *φύλλον*, leaf.] Same as ★*sporophyl*, 2.

gonimoblast (gō-nim'ō-blast), *n.* [Gr. *γόνιμος*, productive, + *βλαστός*, a germ.] The filament which arises from the fertilized cell of some of the red algæ. It bears the carpospores either directly or upon ★gonimolobes (which see).

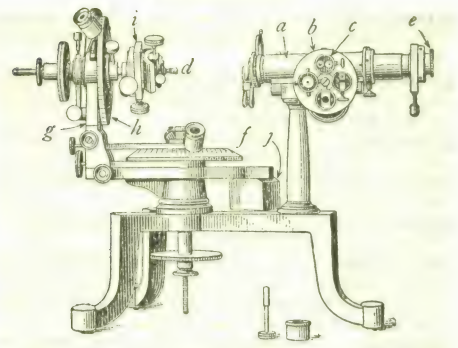


gonimolobe (gō-nim'ō-lōb), *n.* [Gr. *γόνιμος*, productive, + *λοβός*, a lobe.] The terminal lobe into which the gonimoblast of certain red algæ is divided. It penetrates the surrounding tissue of the plant, and from its terminal cells the carpospores are formed.

Gonioclymenia (gō″ni-ō-klī-mē'ni-ä), *n.* [NL., < Gr. *γωνία*, angle, + *Clymenia*, a genus of cephalopods.] A genus of Devonian ammonoid cephalopods or clymenias, with discoid shells and acute lateral lobes and saddles.

goniograph (gō'ni-ō-graf), *n.* [Gr. *γωνία*, an angle, + *γράφειν*, write.] An instrument for describing angles.

gonioid (gō'ni-oid), *a.* [Gr. *γωνιοειδής*, angular, < *γωνία*, angle, + *εἶδος*, form.] See ★*clinohedral*.



goniometer, *n.*—**Mandibular goniometer**, an instrument for measuring the angle formed by the lower rim of the body of the jaw and the ascending ramus. —**Occipital goniometer**, in *craniom.*, an instrument devised for measuring the angle between the level of the

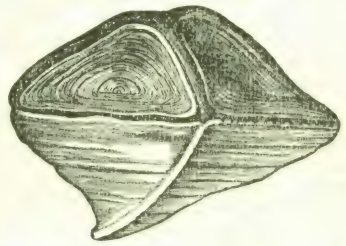
Broca's Occipital Goniometer.

A'OBA, plane of foramen magnum; *D'OD''*, plane passing through the opisthion and the lower rims of the orbits; *OC*, line passing through the opisthion and nasion; *BE*, line passing through basion and nasion. The instrument is in position for measuring the occipital angle. (From Schmidt's "Anthropologische Methoden.")

foramen magnum and the line drawn from the medial point of the posterior part of the foramen magnum and the projection of the lower rim of the orbit on the medial plane.—**Two-circle goniometer**, an instrument for measuring the angles of crystals, provided with two graduated circles, one of which is horizontal, the other vertical. To the latter the crystal-holder and the devices for centering and adjusting are attached. With this form of goniometer the position of a face of a crystal can be determined relative to a reference-face by two angles in planes at right angles to each other, in a manner analogous to the use of the latitude and longitude to fix the position of a point on the earth's surface. Also called a *theodolite-goniometer*.—**Three-circle goniometer**, a modification of the two-circle or theodolite-goniometer. It

Two-circle Goniometer.

a, telescope; *b*, disk with four signals, any one of which (as *c*) can be brought by revolution into position. The signal (illuminated by lamp at side) is then, after reflection by small prism within tube, thrown upon a face of the crystal supported at *d*, and again reflected back to the observing eye-piece *e*; *f*, horizontal graduated circle; *g*, support, carrying vertical graduated circle *h*, with centering- and adjusting-apparatus *i*; *j*, balancing-weight.



has a third graduated circle and is arranged so that each zone of faces can be adjusted by two of the circles and measured by the third without removing the crystal.

goniometry, *n.* 2. That branch of trigonometry which treats of circular functions in general, and of their relations.

goniopholidid (gō″ni-ō-fol'i-did), *n.* One of the *Goniopholididæ*.

Goniophora (gō-ni-of'ō-rä), *n.* [Gr. *γωνία*, angle, + *φορος*, < *φέρειν*, bear.] A genus of prionodesmaceous pelecypods having the form of *Modiola*, but sharply angulated on the crescence-line. It occurs in Silurian and Devonian rocks.

Goniophyllum (gō″ni-ō-fil'um), *n.* [NL., < Gr. *γωνία*, angle, + *φύλλον*, leaf.] A genus of

Goniophyllum pyramidale, from the Silurian of Gotland; showing the operculum in place, twice the natural size. (From Nicholson and Lydekker's "Palæontology." After Lindstroem.)

extinct tetracorals, the corallum having the form of a four-sided pyramid and bearing an operculum composed of four plates. It is from the Silurian rocks.

Gonioplectrus (gō″ ni-ō-plek'trus), *n.* [NL., < Gr. *γωνία*, angle, + *πλῆκτρον*, a striker, spear-point, spur.] A genus of small bass-like fishes of the family *Serranidæ*, found in the West Indies. *G. hispanus*, the known species, is called the *Spanish flag*, the body being banded alternately with red and golden stripes.

Goniopteris (gō-ni-op'te-ris), *n.* [NL. (Presl, 1836), < Gr. *γωνία*, an angle, + *πτερίς*, a fern. The veinlets are connivent in successive angles.] A genus of mostly pinnate or bipinnatifid polypodiaceous ferns, closely allied to *Dryopteris*. It is distinguished, in typical species, by having the lowermost branches from adjacent veins connivent in pairs, the resulting veinlet excurrent within the arch of the next anterior pair, the sori punctiform, normally non-indusiate and medial on the branches. The genus is mainly tropical: its systematic limits are ill defined. Two species, *G. reptans* and *G. tetragona* occur in peninsular Florida.

goniosymphyseal (gō″ ni-ō-sim-fiz'ē-al), *a.* [*gonion* + *symphysis* + *-al*[1].] In *craniom.*, relating to the gonia and the symphysis of the lower jaw. *Amer. Anthropologist*, Jan.–March, 1901, p. 39.

gonnardite (gon'ar-dīt), *n.* [Named after M. *Gonnard*, a mineralogist, of Lyons, France.] A zeolitic mineral allied to mesolite. It forms white, fibrous masses which fill cavities in the basalt of the Puy-de-Dôme region.

gonoblastid (gon-ō-blas'tid), *n.* [Gr. *γόνος*, generation, + *βλαστός*, germ, + *-id*[2].] In cœlenterates, a gonophore.

gonocace (go-nok'a-sē), *n.* [Gr. *γόνυ*, knee, + *κάκη*, bad condition.] Chronic disease of the knee-joint.

gonochorism (gon-ō-kō'rizm), *n.* [Gr. *γόνος*, sex, + *χωρισμός*, separation.] The bisexual or diœcious condition. *Arnold Lang* (trans.), Comp. Anat., p. 24.

gonochorist (gon-ō-kō′rist), *n.* An organism that exhibits gonochorism or the separation of the sexes. [Rare.]

gonochoristic (gon″ō-kō-ris′tik), *a.* Pertaining to or characterized by gonochorism; dicœcious; with separate sexes.

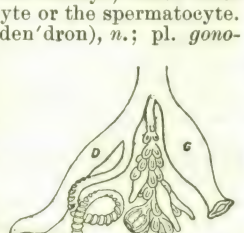
gonococcal (gon-ō-kok′al), *a.* [*gonococc-us* + *-al*[1].] Of or relating to gonococci.

gonococcic (gon-ō-kok′sik), *a.* [*gonococc-us* + *-ic.*] Same as ★*gonococcal.*

gonococcoid (gon-ō-kok′oid), *a.* [*gonococc-us* + *-oid.*] Resembling gonococci.

gonococcus, *n.* 2. *pl.* Micrococci which occur in pairs, flattened at their points of contact; the cause of gonorrheal inflammation of the mucous and serous membranes.

gonocœle (gon′ō-sēl), *n.* [Gr. *γόνος*, seed, + *κοῖλος*, hollow.] The cavity of the gonad, or reproductive organ.



The *gonocœl* or cavity enclosed by the gonadial wall.
Jour. Roy. Micros. Soc., Oct., 1903, p. 594.

gonocyst (gon′ō-sist), *n.* [Gr. *γόνος*, generation, + *κίστις*, bladder (cyst).] In certain polyzoans, a marsupial cavity, formed by the inflation of the surface of the zoarium, containing the developing embryos.

gonocyte (gon′ō-sīt), *n.* [Gr. *γόνος*, generation, + *κύτος*, a hollow (a cell).] The primordial reproductive cell in the embryo, which later develops into the oöcyte or the spermatocyte.

gonodendron (gon-ō-den′dron), *n.*; pl. *gonodendra* (-drä). [NL., ⟨ Gr. *γόνος*, generation, + *δένδρον*, tree.] A branching blastostyle, as in *Physalia.*

gonoduct, *n.* Same as *gonaduct.*

Cormidium of Physalia, with a gonodendron (modified from Haeckel).
D, dactylozoöid; *G*, gastrozoöid; GP, gonopalpon or dactylozoöid on the gonodendron; Mσ, female medusoid, ultimately freed; Mφ, male sporosac; *T*, tentacle (palpacle) of dactylozoöid or palpon. (From Lankester's "Zoology.")

gonœcium (gō-nē′si-um), *n.*: pl. *gonœcia* (-ä). [NL., ⟨ Gr. *γόνος*, generation, + *οἶκος*, house.] In polyzoans, a zoœcium transformed into a marsupial cavity. *Zittel* (trans.), Textbook of Palæon., I. 259.

gonogenic (gon-ō-jen′ik), *a.* [Gr. *γόνος*, birth, + *-γενης*, -producing, + *-ic.*] Of or pertaining to origin from germ-cells. [Rare.]—**Gonogenic variation.** See ★*variation.*

gonomere (gon′ō-mēr), *n.* [Gr. *γόνος*, generation, + *μέρος*, part.] Either the male or the female pronucleus considered as an autonomous and persisting portion of the cleavage nucleus and the nuclei of the cells which arise by division from the fertilized egg. *Amer. Nat.*, July, 1903, p. 503.

gononephrotome (gon-ō-nef′rō-tōm), *n.* [Gr. *γόνος*, seed, + *νεφρός*, a kidney, + *τομή*, a section.] In *embryol.*, that portion of the mesoderm which gives rise to the reproductive and excretory organs in the vertebrate embryo.

gonopalpon (gon-ō-pal′pon), *n.*; pl. *gonopalpa* (-pä). [Gr. *γόνος*, generation, + NL. *palpon.*] In siphonophorans, a palpon borne upon a gonostyle.

gonophorous (gō-nof′ō-rus), *a.* [*gonophore* + *-ous.*] Bearing or producing gonophores.

gonopore (gon′ō-pōr), *n.* [Gr. *γόνος*, generation, + *πόρος*, passage.] The reproductive orifice of the female, in nemathelminths. *Parker and Haswell*, Zoology, I. 276.

gonosphere (gon′ō-sfēr), *n.* [Gr. *γόνος*, generation, + *σφαῖρα*, a sphere.] Same as *oösphere.*

Gonostoma (gō-nos′tō-mä), *n.* [NL. (Rafinesque), erroneously for **Goniostoma*, ⟨ Gr. *γωνία*, angle, + *στόμα*, mouth.] A genus of small lantern-fishes of the family *Chauliodontidæ*, found in the deep seas. *G. denudatum* is the common species.

Gonostominæ (gon-os-tō-mī′nē), *n. pl.* [NL., ⟨ *Gonostoma* + *-inæ.*] A subfamily of fishes typified by the genus *Gonostoma.*

gonostyle (gon′ō-stīl), *n.* [Gr. *γόνος*, generation, + *στῦλος*, a pillar.] A blastostyle or reproductive zoöid of a hydroid or siphonophore colony.

gonotome (gon′ō-tōm), *n.* [Gr. *γόνος*, generation, + *τομή*, section.] In *embryol.*, the portion of the segmented mesoderm which gives rise to the reproductive organs or gonads of the vertebrate embryo.

Whether we have metamerically repeated *gonotomes*, is as yet a disputed question.
J. S. Kingsley, Vert. Zool., p. 103.

gonotoxin (gon-ō-tok′sin), *n.* [Gr. *γόνος*, generation, + *τοξ(ικόν)*, poison, + *-in*[2].] A poisonous substance produced by the gonocoecus.

gonozoöid, *n.* 2. In *Hydromedusæ*, same as *medusoid* or *gonophore.*

gony, *n.*, 2. (*c*) The name seems to have been applied originally to southern albatrosses of medium size, with white bodies and black wings, such as *Diomedea chlororhyncha.* It was thus used by 'deep-water' sailors about 1860, and its application to the black-footed albatross, *D. nigripes*, of the North Pacific is of later date.

gonyagra (gō-ni-ag′rä), *n.* [NL., ⟨ Gr. *γόνυ*, knee, + *ἄγρα*, a catching. Cf. *podagra.*] Gout in the knee-joint.

gonytheca (gon-i-thē′kä), *n.*; pl. *gonythecæ* (-sē). [NL., ⟨ Gr. *γόνυ*, knee, + *θήκη*, receptacle.] In *entom.*, the concavity at the apex of the femur which receives the base of the tibia.

good. I. *a.*—**Good title.** See ★*title.*—**To make good.** (*g*) In *poker*, to make a blind or a straddle equal the ante.

II. *n.*—**Confusion of goods.** See ★*confusion.*—**Lawful goods,** in *international law*, goods which a neutral ship may carry in time of war, including contraband of war, which is carried at the neutral's risk.

good-daughter (gůd′dâ″tėr), *n.* A daughter-in-law. [Scotch.]

Goodea (gůd′ē-ä), *n.* [NL., named after G. B. *Goode*, an American naturalist.] A genus of small viviparous fresh-water fishes, belonging to the family *Pœciliidæ*, found in the lakes of Mexico. *G. atripinnis* is the earliest known species.

Goodeinæ (gůd-ē-ī′nē), *n. pl.* [NL., ⟨ *Goodea* + *-inæ.*] A subfamily of fishes typified by the genus *Goodea.*

goodeniaceous (gů-dē-ni-ā′shius), *a.* In *bot.*, belonging to or having the characters of the *Goodeniaceæ.*

good-father (gůd′fä″ŦHėr), *n.* A father-in-law. [Scotch.]

good-fors (gůd′fôrz), *n. pl.* A local name for private notes, bills of exchange, drafts, etc., circulated as money, 'good for' an amount indicated, at the Cape of Good Hope, in the first quarter of the nineteenth century.

good-full (gůd′fůl), *a.* Of sails, a little more nearly full than in full-and-by; allowing the vessel to go off sufficiently from the wind to round out her sails.

goodletite (gůd′let-īt), *n.* A local name in Australia for the rock forming the matrix of the ruby.

good-like (gůd′līk), *a.* Of respectable or pleasing appearance: as, a couple of *good-like* men. [Prov. Eng.]

goodliking (gůd′lī′king), *n.* 1. Kindly feeling; friendly relations. — 2. Good-will; personal liking or approval. *Sydney Smith.*

good-mother (gůd′muŦH″ėr), *n.* A mother-in-law. [Scotch.]

good-shoaling (gůd′shō″ling), *n.* *Naut.*, soundings that change gradually; progressive depths of water.

goodsire (gůd′sīr), *n.* [Also (Sc.) *gudesire;* ⟨ *good* + *sire.* Cf. *belsire.*] A grandfather. *Scott.* [Scotch.]

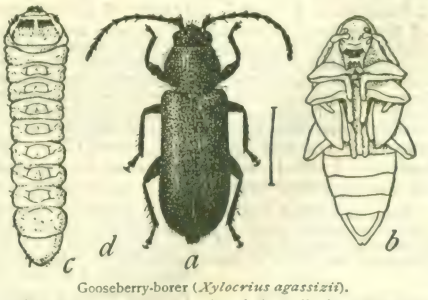
goods-lift (gůdz′lift), *n.* A freight-elevator; a device for raising or lowering freight. [Eng.]

go-off (gō′ôf), *n.* 1. Start; outset; beginning or attempt: usually preceded by *at* and *first:* as, at first *go-off* (at once, at the very outset).—2. In *banking*, the amount of loans falling due (and therefore 'going off' the amount in the books) in a certain period. *Lord Aldenham. N. E. D.*

goondie (gön′di), *n.* [Australian (Wiradhuri) *gúndai*, a shelter. Compare ★*gunyah.*] A native Australian hut; a gunyah. [Australian.]

There were a dozen "*goondies*" to be visited, and the inmates started to their work.
Rolf Boldrewood, Colonial Reformer, xvii.

goorgoora (gör-gö′rä), *n.* [Punjab *gurgura.*] In Afghanistan, a large evergreen shrub or small tree, *Reptonia buxifolia*, of the family *Sapotaceæ*, bearing insipid, globular, drupaceous, fleshy fruits which are much esteemed by the Afghans.



goose, *n.* 6. In *keno*, the globe from which the numbered balls are withdrawn.—**Bay-goose,** the common or Canada goose, *Branta canadensis.* [Local, U. S.]—**Cape Barren goose,** *Cereopsis novæ-hollandiæ*, a species once common on the uplands of New South Wales, but now much reduced in numbers.—**Gray goose,** the common European species, *Anser cinereus.* Also known as the *graylag.*—**Gray-goose shaft,** an arrow: arrows were formerly feathered with the feathers of

geese.—**Knobbed goose,** the male of the domesticated form of the Chinese goose, *Cygnopsis cygnoides*, which has an excrescence at the base of the bill, lacking in the wild bird.—**Pygmy goose,** any one of the goose-teals, or goslets, which belong to the genus *Nettapus.*—**Roadgoose,** a local English name for the brant, *Bernicla brenta.* Also called *clatter-goose* and *wilk-bob.*—**Shooting at the goose,** in *old archery*, a shooting-match in which the mark was the head of a living goose, the body being buried to the neck in the earth.

goose-barnacle (gös′bär″nȧ-kl), *n.* A stalked barnacle, as *Lepas anatifera:* in allusion to the fable that it gave origin to geese. See *barnacle*[1], 2.

gooseberry, *n.* 3. The farkleberry, *Batodendron arboreum:* doubtless so called from its somewhat similar fruit. See *farkleberry.*—**Black-knot of the gooseberry.** See ★*black-knot.*—**Cañon gooseberry,** *Ribes Menziesii*, of the outer coast ranges of middle California, a species with flowers more fuchsia-like than those of the fuchsia-flowered gooseberry, but small and less showy.—**Coromandel gooseberry,** the carambola, *Averrhoa Carambola.* Also called *country gooseberry.*—**Country gooseberry,** in India: (*a*) The Otaheite gooseberry, *Phyllanthus distichus.* (*b*) The Coromandel ★gooseberry (which see).—**Drooping gooseberry,** *Ribes curvatum*, a recently described species growing on rocky ground in Georgia and Alabama, the name referring to the recurved branchlets.—**Dwarf cape gooseberry,** a species of ground-cherry, *Physalis pubescens*, lower than the cape gooseberry, *P. Peruviana*, grown in vegetable gardens under the name of *strawberry-tomato.* In cultivation it spreads over the ground two feet in all directions. It is found as a wild plant over a large part of the United States and in Mexico, and also grows in South America and India.—**Fuchsia-flowered gooseberry.** See *Ribes*[2].—**Gooseberry family,** the plant family *Grossulariaceæ*, typified by the genus *Ribes*, to which the gooseberry belongs.—**Gooseberry span-worm.** See ★*span-worm.*—**Hawthorn-gooseberry,** *Ribes oxyacanthoides*, having leaves closely resembling those of the hawthorn, bristly and prickly stems, and smooth, globose fruit: found from Hudson Bay to Alaska.—**Hill gooseberry,** a shrub of the myrtle family, *Rhodomyrtus tomentosa*, native to India. It bears a fruit about the size of a cherry, dark purple, with a sweet and aromatic pulp. The fruit is eaten raw or made into jam, and also makes excellent jelly.—**Illinois gooseberry.** Same as *Missouri* ★*gooseberry.*—**Malabar gooseberry,** *Melastoma Malabathricum*, an Indian shrub bearing an oval, truncate fruit having an edible pulp, which resembles the blackberry in flavor. See *Melastoma.*—**Missouri gooseberry,** *Ribes Missouriense*, of the Mississippi valley and Texas, having white drooping flowers on slender peduncles, and reddish-purple berries.—**Northern gooseberry.** Same as *hawthorn-* ★*gooseberry.*—**Swamp gooseberry,** *Ribes lacustre*, the stems bristly with weak spines and prickles, and the fruit glandular-hairy: growing in swamps, and extending across the North American continent in the higher latitudes.—**Wild gooseberry.** (*a*) Any uncultivated species of true gooseberry; in the eastern United States, most often *Ribes Cynosbati*, a species with few prickles on the stem, but with the fruit thickly beset with spine-like prickles. The *eastern wild gooseberry, R. rotundifolium*, is found from Massachusetts and New York to North Carolina. This, like the hawthorn-gooseberry, which it much resembles, has the fruit smooth, but differs in having the stem less spiny, the fruit a little smaller, etc. In California, *R. Menziesii* (see *cañon* ★*gooseberry*) and *R. amarum* have been placed under this name, and there are other wild species. (*b*) One of several species of *Polycodium.* See *squaw-huckleberry.*

gooseberry-borer (gös′ber-i-bōr″ėr), *n.* The larva of a cerambycid beetle, *Xylocrius agassizii*, occurring in the northwestern United States and British Columbia. Also called *black gooseberry-borer.*

Gooseberry-borer (*Xylocrius agassizii*).
a, beetle; *b*, pupa; *c*, larva, dorsal view, all about three times natural size. (Chittenden, U. S. D. A.)

gooseberry-gourd (gös′ber-i-gōrd″), *n.* The bur or West Indian gherkin, *Cucumis Anguria.* See *bur* ★*gherkin.*

gooseberry-louse (gös′ber-i-lous″), *n.* pl. *gooseberry-lice* (-līs″). A red-bug or harvest-bug, a larval *Trombidium.* [Great Britain.]

gooseberry-midge (gös′ber-i-mij″), *n.* A cecidomycid fly, *Cecidomyia grossulariæ*, which lays its eggs beneath the skin of young gooseberries in which its larvæ feed.

gooseberry-mildew (gös′ber-i-mil″dū), *n.* A fungus disease of gooseberries which attacks the foliage and young fruit: due to *Sphærotheca mors-uvæ.*

gooseberry-season (gös′ber-i-sē″zn), *n.* The season when gooseberries are ripe.—**Big-goose-**

berry season, the time of year when news is scarce, and the newspapers have plenty of space to devote to the chronicling of wonderful, fictitious, or trifling matters.

gooseberry-shrub (gös'ber-i-shrub″), *n.* In the West Indies, same as *Barbados gooseberry, Pereskia Pereskia.* See *gooseberry.*

gooseberry-tomato (gös'ber-i-tō-mä″tō), *n.* The cape gooseberry, *Physalis Peruviana.* See *gooseberry.*

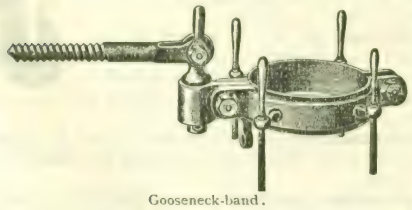
gooseberry-tree (gös'ber-i-trē″), *n.* In the Bahamas, the cultivated Otaheite gooseberry, *Phyllanthus distichus.*—**Little gooseberry-tree,** in Queensland, a tree, *Buchanania Muelleri,* of the sumac family, bearing sweet, pulpy drupes about one-half of an inch long, somewhat resembling gooseberries.

goosebill, *n.* 2. *Naut.,* an old-fashioned sail, in shape something like the bill of a goose or duck. It was used before the wind.

Goose-egg moth. See ★*moth*[1].

goose-file (gös'fīl), *n.* Single file; Indian file.

goosefoot, *n.*—**Maple-leaved goosefoot,** *Chenopodium hybridum,* which has leaves lobed as in the maple: native in both Europe and America.—**Nettle-leaved goosefoot,** *C. murale,* the leaves of which somewhat resemble those of the nettle. It is an Old World plant, thoroughly naturalized as a weed in waste places in the United States.



goose-grass, *n.* 5. Same as ★*crowfoot-grass,* 2, and *wire-grass,* 2.—6. The Texas millet, *Panicum Texanum.* See ★*millet.*—7. The low spear-grass, *Poa annua.*—8. The sea spear-grass, *Puccinellia maritima.*

goose-grease (gös'grēs), *n.* The melted fat of the goose: much used in domestic medicine as an ointment.

gooseland (gös'land), *n.* In California, flat land in the Sacramento valley which is partly flooded by rain in winter and then becomes the feeding-ground of large flocks of wild geese from the north. In large portions of the gooselands the soil is strongly alkaline.

goose-mouth (gös'mouth), *n.* A horse's mouth in which the upper lip overhangs the lower.

gooseneck, *n.* 4. In *lumbering:* (*a*) A wooden bar used to couple two logging-trucks. Also called *rooster.* (*b*) The point of draft on a logging-sled: it consists of a curved iron hook bolted to the roll. Also called *draw-hook.* (*c*) A curved iron hook driven into the bottom of a slide to check the speed of descending logs.—**Gooseneck-band,** a band made in two parts, designed to be fitted round a mast and held in place by screw-bolts:

Gooseneck-band.

used to support a screw- or socket-gooseneck for the boom. Sockets are also provided for belaying-pins.

goose-necked (gös'nekt), *p. a.* Shaped like or supplied with a gooseneck.

goose-pen (gös'pen), *n.* 1. A pen or yard for geese.—2. In *forestry,* a large hole burned in a standing tree.

goose-rump (gös'rump), *n.* A horse's rump or hind quarters which drop suddenly to the tail, giving the animal a somewhat angular appearance from behind. Also *short-rump.*

goose-rumped (gös'rumpt), *p. a.* Noting a defect in the conformation of a horse in which the hind quarters have an excessive slant downward and backward from the croup, and the tail is set low.

goose-skin, *n.* 4. The pitted surface exhibited by copal, caused by contact with the sand in which it is embedded.

goose-step, *n.* 2. An exercise in military gymnastics in which the body is balanced on one foot while the other is swung forward and backward as if on the march, but without advancing, the object being to give the soldier an upright carriage in marching.—3. A marching step in which the feet are raised high above the ground, as when on review.

goose-teal (gös'tēl), *n.* See ★*teal*[1].

goosetongue, *n.* 2. The lemon-balm, *Melissa officinalis.*

goose-wing (gös'wing), *n.* *Naut.*: (*a*) The clue of a squaresail that is kept hauled out by its sheet when the other clue is hauled up to the yard and furled. (*b*) A studdingsail.

goosy (gö'si), *a.* [*goose* + *-y*[1].] 1. Goose-like, especially in stupidity; foolish; silly. *Carlyle.*—2. In a condition resembling that of the flesh of a plucked goose; hence, 'creepy': as, a *goosy* sensation.

G. O. P. An abbreviation of *Grand Old Party,* a rhetorical designation, by some Republicans, of the Republican party in the United States.

gopher-apple (gō'fėr-ap″l), *n.* Same as *gopher-root:* so called from the often edible fruit, which, however, is a drupe and not like an apple.

gopher-plant (gō'fėr-plant), *n.* The caper-spurge, *Euphorbia Lathyris.* See *spurge.* For the origin of the name see *mole-tree.*

gopher-plum (gō'fėr-plum), *n.* 1. See *plum*[1].—2. Same as *cocoa-plum.* See *Chrysobalanus* and *plum*[1].

gor (gôr), *n.* [Origin unknown; cf. ★*gorb* and ★*gorbel.*] An unfledged bird.

gora (gō'rä), *n.* [Also *gorah, gorrah, goura, gurah;* from a S. African native name.] A

Gora.

Original in National Museum, Washington, D. C.

South African musical instrument, consisting of a bent piece of wood or bow with a single gut string attached, which is sounded by the player's breath directed through or against a quill that is fastened to one end of the bow. Sometimes a small gourd is attached to the bow as a resonator.

The *gorah* was formed by stretching a piece of the twisted entrails of a sheep along a thin hollow stick about three feet in length in the manner of a bow and string. At one end there was a piece of quill fixed into the stick, to which the mouth was applied, and the tones were produced by inspiration and respiration.

Encyc. Brit., XII. 311.

Several years ago, Mr. Henry Balfour published an important memoir on the musical bow, and in the current Journal of the Anthropological Institute (vol. xxxii. p. 150) he describes a superficially similar instrument, the *goura,* which Frobenius and Ankermann have confused with the musical bow proper. The *goura* is a bow-like instrument; one end of its string is fastened to a flattened quill, the other end of which is fastened to the bow, and the string is thrown into vibration through the medium of the quill, which is caused to oscillate by being blown upon. Those musical bows which have no resonator are held to the mouth when playing in order to increase the sound. *Nature,* Nov. 13, 1902, p. 37.

gorb (gôrb), *n.* [Connected with *gorbel* and other forms, *gorbet, gorbre, gorbin, gorbling,* based on the simple *gor,* in sense of 'an unfledged bird': see ★*gor.*] 1. A greedy person; a glutton. [Prov. Scotch and Irish.]—2. An unfledged bird. [Scotch.]

gorbel (gôr'bel), *n.* [Also *gorbal:* see ★*gorb.*] An unfledged bird. [Scotch.]

Children . . . often take the bare *gorbals,* or unfledged young, of this bird [the yeldring or yellow hammer], and suspend them by a thread tied round the neck.

Jamieson, Scottish Dict. (s. v. *yeldring*).

Gordiichthys (gor-di-ik'this), *n.* [NL., < *Gordius,* a genus of hairworms or hair-eels, + Gr. *ἰχθύς,* fish.] A genus of small eels of the West Indies, of the family *Moringuidæ.* They are characterized by the extraordinary slenderness of the body and the great number of vertebræ. *G. irretitus* is the known species.

Gordon River group. See ★*group*[1].

gore-blood† (gōr'blud), *n.* Clotted blood; gore.

Thus they travelled from morning till night several days, through bushes and thorns, which made their arms and shoulders, which were naked, all of a *gore* blood.

Defoe, Captain Singleton, xviii.

gore-fish (gōr'fish), *n.* Same as *garfish.*

gorge, *n.* 12. In *angling,* a bait intended to be swallowed by the fish to effect its capture: usually a minnow in which a double-barbed leaded fish-hook is embedded.—13. A fish-hook consisting of a straight or crescent-shaped piece of stone or bone sharpened at the ends and grooved or perforated in the center: used by primitive tribes.

I believe that, . . . starting with the crude fish-*gorge,* I can show, step by step, the complete sequence of the fish-hook, until it ends with the perfected hook of to-day.

B. Phillips, in Sport with Gun and Rod, p. 340.

Circle of the gorge. See ★*circle.*

gorge-bait (gōrj'bāt), *n.* Same as ★*gorge,* 12.

gorge-baiting (gôrj'bā″ting), *n.* In *angling,* fishing with a gorge.

gorge-circle (gôrj'sėr″kl), *n.* The smallest circle formed by a plane perpendicular to the axis cutting a hyperboloid of revolution; the circle generated by the shortest line from the generating line to the axis. See ★*circle of the gorge.*

gorge-line (gôrj'līn), *n.* The rear line of a fortification through which the entrance is made. Also *gorge.*

gorget, *n.* 6. In *archæol.,* an object of stone or shell, flat, or convex on one side and concave on the other, and sometimes provided with perforations. Stone gorgets may have been used for a variety of purposes—as bracers, as supports for ornaments, as badges, etc.

gorgio (gôr'ji-ō), *n.* [G. *gadze, gatscho,* Sp. *gacho,* from a Romany word.] One who is not a Gipsy; an outsider. [Gipsy lingo.] *Borrow.*

gorgonin (gôr'gō-nin), *n.* [*Gorgonia* + *-in*[2].] A dark-brown, horn-like, albuminoid compound comprising the axial skeleton of the coral *Gorgonia Cavolinii.*

gorgon-plant (gôr'gon-plant), *n.* The prickly water-lily, *Euryale ferox.* See *Euryale,* 2, and *prickly water-lily,* under *water-lily.*

Gorgonzola cheese. See ★*cheese*[1].

gormandizer, *n.* 2. A young, upright branch or sucker growing from the main stem or from an old branch of a cultivated tree: so called from the rapidity of its growth. See *sucker,* 5 (*b*). Also called *chupon.* [West Indies.]

goroon-shell (gō-rön'shel), *n.* [Appar. an error for ★*godroon-shell.*] A tritonoid shell, *Lampusia femoralis.*

gorse-kid (gôrs'kid), *n.* A bundle of gorse. *N. E. D.*

gosain (go-sīn'), *n.* [Also *gossein, goussain;* < Hind. *gusāīn.*] A Hindu priest, devotee, monk, or religious mendicant.

gosling, *n.* 3. The American pasque-flower, *Pulsatilla hirsutissima:* so called from its dense, soft hairs.

gosling-grass (goz'ling-gras), *n.* Same as *goose-grass,* 1.

gosling-weed (goz'ling-wēd), *n.* Same as *goose-grass,* 1.

gosmore (gos'môr), *n.* [Origin obscure; possibly a perversion of *gossamer.*] A plant of the genus *Hypochœris,* especially *H. radicata,* now naturalized in New Jersey and California. See *cat's-ear* and *Hypochœris.*

gospodar (gos'pō-dăr), *n.* [Russ. *gospodarŭ,* Bulg. *gospodar,* etc.] Same as *hospodar.*

Gosseletia (goz-let'i-ä), *n.* [NL.] A genus of prionodesmaceous pelecypods, including triangular thick-shelled Devonian species belonging to the superfamily *Pteriacea.*

gossypein (go-sip'ē-in), *n.* [L. *gossyp(ium)* + *-e-* + *-in*[2].] A phenol-like substance contained, in small quantity, in cotton-seed oil and cotton-seed meal. Also called *gossypol.*

gossypol (gos'i-pōl), *n.* [*gossyp(ium)* + *-ol.*] Same as ★*gossypein.*

gossypose (gos'i-pōs), *n.* [*gossyp(ium)* + *-ose.*] Same as ★*raffinose.*

Goth, *n.* 3. A 'barbarian' in matters of literature or art.

To call a man a *Goth* [in the eighteenth century] conveyed a vague sense of superiority on the part of him who uttered it, and a general sense of disreputability of him about whom it was uttered; and it was made the harder to endure and the more potent to crush because the man who applied it did not usually understand what was meant by it any more than did the man to whom it was applied. *Lounsbury,* Studies in Chaucer, III. 250.

Gothic. **I.** *a.* 5. Belonging to or characteristic of 'Goths' or 'barbarians' in matters of literature or art.

The constant use of the words Goth and *Gothic* [by Warton] demands perhaps a word of explanation. In the literature of the eighteenth century these epithets played about the same rôle that the word Philistine, plays or has begun to play, in this. They expressed a general disapprobation without putting the one who employed them under the necessity of substantiating what he meant by any precise definition.

Lounsbury, Studies in Chaucer, III. 250.

Gothic armor, fully developed plate-armor made in the latter part of the fifteenth century: a collectors' term. This armor appears to have been made chiefly in Italy, the leading armorers being the Missaglia family in Milan. Fine suits were also manufactured at Nuremberg and elsewhere in Germany. It is the type usually represented in the works of the early Renaissance painters both in Italy and in Germany.

II. *n.*—**Churchwarden Gothic** a term ironically applied to additions made to English Gothic buildings during the eighteenth and early nineteenth centuries by local authorities having only imperfect knowledge of the style.

What he did in this way laid itself open to the derisive epithet applied to it of *Churchwarden Gothic.*

R. S. Clouston, in Burlington Mag., V. 495.

Gothicist (goth'i-sist), *n.* [*Gothic* + *-ist.*] One who favors or affects the Gothic style, especially in architecture.

Gothicity (go-this′i-ti), *n.* [*Gothic* + *-ity.*] Gothic style or quality; a distinctively Gothic character.

Gothique (gō-tēk′), *a.* [F.] An epithet applied to a style of bookbinding in which the design is blind-tooled or blind-stumped upon the cover in medieval or monastic style. See *tooling.*

göthite, *n.* Same as *goethite.*

Gothlandian (goth-lan′di-an), *a.* and *n.* In *geol.*, noting the uppermost division of the Silurian system of Murchison, taking its name from the island of Gothland. Quantivalent therewith is the name Ordovician, applied to the lower division of the Silurian system. *De Lapparent.*

gotten (got′n), *p. a.* Obtained or acquired: usually with a qualifying adverb; won: as, ill-*gotten* gains; new-*gotten* territory; *gotten* battles.

> Give me then health, Apollo; give
> Sound mind; on *gotten* goods to live
> Contented; and let song engage
> An honoured, not a base, old age.
> *Gladstone*, tr. of Horace, Odes, xxxi. 5.

Gouda cheese. See ★*cheese*[1].

gouger, *n.* 5. A snow-plow formerly used on railroads in the western United States. It consisted of a strongly built box-car which carried a plow at its head set low enough to run under a drift and throw it over. *Sci. Amer.*, Jan. 3, 1903, p. 8.

gouge-shell (gouj′shel), *n.* A gimlet-shaped shell, such as that of *Vermetus;* also, a kind of pinna.

goujat (gö-zhä′), *n.* [F.] A camp-follower; a soldier's servant; also, a blackguard.

> Boys, or rather fags, [employed to carry the men's weapons or harness on the march] were called in French *goujats*, and are a curious feature in the armies of the time. *J. W. Fortescue*, Hist. Brit. Army, I. ii. 1.

goulash, *n.* See ★*gulash.*

goundou (gön′dö), *n.* [W. African.] A disease which attacks the natives on the west coast of Africa. It is marked by the growth of a smooth rounded swelling on either side of the bridge of the nose. *Jour. Trop. Med.*, Feb. 16, 1903, p. 62.

goup, gowp (goup), *v. i.* [Perhaps imitative.] To throb violently or painfully, as a boil before it bursts or is lanced. [Scotch.]

goura, *n.* See ★*gora.*

gourd, *n.*, 1. (*c*) Same as *calabazilla.*—**Bonnet-gourd,** the fruit of species of *Luffa.* It is sometimes split lengthwise, turned inside out, and fashioned into a bonnet or cut into strips and used for trimming: whence the name.—**Gourd family,** the plant family *Cucurbitaceæ.*—**Missouri gourd.** Same as *calabazilla.* It extends east to the Missouri river.—**Scarlet-fruited gourd,** any one of several species of the genus *Coccinia*, especially *C. Indica*, a native of India and often cultivated. It is one of the commonest vegetables of the natives, the oblong scarlet fruit being eaten fresh when ripe and cooked in curries when green.—**Wild gourd.** (*a*) Same as *calabazilla.* (*b*) The bigroot of Oregon, *Micrampelis Oregona.*

gourdhead (gōrd′hed), *n.* Same as *big-mouthed* ★*buffalo.*

gourdworm, *n.* 2. One of the segments of a tapeworm: in allusion to its resemblance to the seed of a gourd; a cucurbitinus.

gout[1], *n.*—**Abarticular gout,** gouty inflammation of the stomach or other of the viscera, without involvement of the joints.—**Poor man's gout,** gout occurring in consequence of lead-poisoning, exposure, insufficient nourishment, or the abuse of malt liquors, in laborers or others to whom luxury is unknown.—**Tophaceous gout,** chronic gout accompanied by deposits of sodium urate in the joints.

gout-fly (gout′flī), *n.* Same as *corn-fly.*

goutte d'eau (göt dō). [F., 'drop of water.'] A limpid rolled pebble of topaz found in Brazil, Ceylon, and New South Wales.

goutte de suif (göt dę swēf). [F., 'drop of tallow.'] Tallow-drop: noting a style of pottery decoration with enamel colors. See *Cluny* ★*enamel.*

gouty-stem (gou′ti-stem), *n.* In Queensland, the bottle-tree (which see). Both names refer to the shape of the trunk. The tissues of the stem abound in a clear, jelly-like, mucilaginous substance resembling tragacanth, which is used as food by the natives in times of extreme drought.

gouty-stool (gou′ti-stöl), *n.* In old English furniture, a stool designed by Hepplewhite for the use of persons afflicted with gout. It was fitted with mechanism for raising and lowering the foot.

Gov. An abbreviation (*b*) of *government.*

Governess car. See ★*car*[1].

governing-motion (guv′ėr-ning-mō″shon), *n.* The action on a spinning-mule of a certain mechanism for regulating the velocity of the spindles during the winding of the yarn on the cop. Also called *strapping-motion. Nasmith*, Cotton Spinning, p. 300.

government, *n.*—**Charter government.** See ★*charter.*—**Constitutive government,** that phase of constitutional law and practice which relates to the manner in which officers of government are chosen.

> A modern government may have a written constitution which sets forth the plan of government. Other nations have a system of habitual practice, modified from time to time as circumstances seem to demand, which is observed as the common law of the government. I wish to use the term *constitutive government* for one of its departments coordinate with the others which I will set forth. I desire a term which will signify the manner in which the officers of the government in all its departments are selected, chosen, or appointed.
> *J. W. Powell*, An. Rep. Bur. Amer. Ethnol., [1898-99, p. lxxxv.

Government man[†], an assigned servant; a convict. [Australia.]—**Government stroke,** a stroke that lacks vigor; a lazy way of doing work such as is supposed to characterize government employees. [Australia.]

> Like the poor the unemployed are always with us, but they have a penchant for public works in Melbourne, with a good daily pay and the *government stroke* combined. *Melbourne Argus*, Feb. 22, 1897.

governmentalism (guv-ėrn-men′tal-izm), *n.* [*governmental* + *-ism.*] The theory that the authority of the general government should not only be exercised to the full but extended.

governmentalist (guv-ėrn-men′tal-ist), *n.* [*governmental* + *-ist.*] One who favors governmentalism.

governmentally (guv-ėrn-men′tal-i), *adv.* As regards the government, its views, policy, or regulations: by the government.

government-house (guv′ėrn-ment-hous), *n.* 1. The building which contains the government offices.—2. The official residence of a governor.

governor, *n.*—**Differential governor,** a governor which runs at a constant speed and is so constructed that when the engine runs at an improper speed the difference in the speeds produces an action on the regulating-valve which tends to bring the engine back to a correct rate of motion.—**Emergency governor,** a device which serves to check the speed of an engine when the usual regulating mechanism fails.—**Fly-weight governor,** a device for regulating the speed of a steam- or gas-engine in which a pair of weights, which fly out by centrifugal force as they are revolved, control the amount of steam or gas admitted to the cylinder.—**Governor cut-off.** See ★*cut-off.*—**Inertia governor,** an engine governor in which the inertia of a weight revolving with the shaft is utilized to open or close the admission-valve or change the point of cut-off whenever the speed of the engine changes.—**Loaded governor,** a governor to which a weight is attached for the purpose of increasing the strength of its action, thus giving it a prompter control of the engine, making it more sensitive to variations of load, and securing a closer approach to isochronism in the engine.

governor-rod (guv′ėr-nor-rod), *n.* The rod by which the motion of the governor is communicated to the valve-gear of an engine.

Gov.-Gen. An abbreviation of *governor-general.*

gowan, *n.*—**Ling-gowan,** the mouse-ear hawkweed, *Hieracium Pilosella:* usually in the plural.—**May-gowan.** Same as *ewe-gowan.*—**Milk-gowan,** the dandelion.—**Water-gowan.** Same as *meadow-gowan* (which see, under *gowan*).—**Witch-gowan.** Same as *milk-*★*gowan.*—**Yellow gowan.** (*a*) See *yellow.* (*b*) The dandelion.

gown, *n.*—**Cap and gown.** See ★*cap*[1].

gowp, *v. i.* See ★*goup.*

goy (gō′i), *n.*; pl. *goyim* (gō′yēm). [Heb.] In Jewish use, a nation. Used in the singular for any nation, Jewish as well as Gentile. Where the plural *goyim* is used, however (save in particular cases, for example Gen. xxv. 23), it specially refers to non-Jewish nations, the Gentiles. In Yiddish this distinction is not fully recognized, and *goy* is used, somewhat like 'heathen' in English use, to imply inferiority, and is often employed among the Jews themselves as a term of contempt implying ignorance or stupidity.

goyim, *n.* Plural of ★*goy.*

gozell (gō′zel), *n.* [Also *gozelle;* dial. variant, beside *gazel, gazle,* etc., of *grozle, grozzle,* a gooseberry: see *groser.*] The garden gooseberry, *Ribes Grossularia.*

G. P. An abbreviation (*a*) of the Latin *Gloria Patri,* Glory be to the Father; (*b*) of *Graduate in Pharmacy.*

G. P. M. An abbreviation of *Grand Passed Master.*

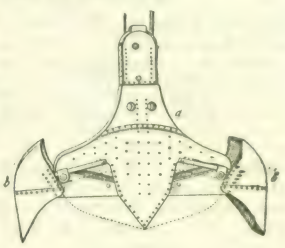
Gr. An abbreviation (*b*) of *Greece.*

gr. An abbreviation (*d*) of *grammar;* (*e*) of *great;* (*f*) of *gross.*

G. R. An abbreviation (*a*) of *Georgius Rex* (King George); (*b*) of *Grand Recorder.*

grab[1], *v.* **II.** *intrans.* To strike the heel of the front foot with the toe of the hind foot: said of a horse.

grab[1], *n.*, **3.** (*c*) A form of dredger-bucket used for digging soft materials; a clam-shell bucket. (*d*) *pl.* Same as ★*skidding-tongs.* (*e*) In *forestry,* the stem of an alder, or other small tree, which is bent over and plugged into a hole bored in a boom-stick, or secured in some other way, to hold a boom or logs inshore. [U. S.]



4. A children's game at cards, in which, when two or more cards of equal value are on the table together, the player who is quickest to recognize and grab them adds them to his own hand. *N. E. D.*

grab-all (grab′âl), *n.* A catch-all; specifically, a kind of fishing-net with meshes not less than 2¼ inches in size, used in sea-fishing along the shores of Tasmania between sunrise and sunset.

> Put a *graball* down where you will in "bell-rope" kelp, more silver trumpeter will get in than any other fish.
> *E. O. Cotton*, in Evidence before Roy. Com. on Fisheries of Tasmania, 1883, p. 82, quoted in E. E. Morris, Austral English.

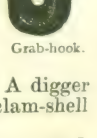
grabbing (grab′ing), *n.* 1. The act of grasping or seizing.—2. A condition, seen principally in the horse, in which the hind foot strikes the heel of the fore foot in traveling.

grab-bucket (grab′buk″et), *n.* A bucket which can pick up its own load; a self-loading bucket; a gobbler or clam-shell bucket.

Grab-bucket.

a, bucket; *b*, *b* wings in open position, or when bucket drops upon material to be lifted. Dotted lines show position of wings when closed and forming bottom of bucket, inclosing load.

grab-crane (grab′krān), *n.* A portable crane or derrick with which a grab or crab is used for winding in the hoisting-rope, there being no winding-drum on the crane.



graben (grä′ben), *n.* [G. *graben,* a ditch.] In *geol.*, a trough-like area caused by the downthrow of a crustal fault-block.

> The main valley occupied by Georgetown is a depressed fault-block or *graben. Science*, Feb. 6, 1903, p. 227.

graben-block (grä′bn-blok), *n.* [G. *graben* + E. *block, n.*] A depressed segment of the earth's crust bounded on all sides by faults.

> The imagined intersecting faults of the "bysmalith" or of the submerged *graben-block* have been generally sought for in vain about those greatest of all granitic massifs.
> *R. A. Daly*, in Amer. Jour. Sci., April, 1903, p. 270.

grab-hook, *n.* **2.** A hook having a narrow throat, adapted to grasp any link of a chain.

Grab-hook.

grab-iron, *n.* 2. A grappling-iron used for recovering broken boring or well-drilling tools from a well.

grab-link (grab′lingk), *n.* Same as ★*slip-grab.*

grab-machine (grab′ma-shēn″), *n.* A digger or dredger which uses a grab or clam-shell bucket.

grabouche (gra-bösh′), *n.* [Origin unknown.] A card-game in which each player starts with an ace and builds up in sequence until he gets rid of twenty cards originally dealt to him. When one can go no further, another takes it up.

grab-rod (grab′rod), *n.* In *ship-building,* a rod or bar, fastened to a bulkhead or in the end of a hatchway, which may be grasped in the hand to steady the body when the vessel is rolling; also, a horizontal rod fastened to the side of a war vessel a few feet above the water-line in the vicinity of the gangway-ladders, into which boat-hooks are hooked when holding a boat alongside the ladder.

grab-service (grab′sėr″vis), *n.* *Naut.*, vessels of two or more masts originally fitted out by the Bombay government to cruise against the pirates of the Malabar coast. *Admiral Smyth.*

grab-skipper (grab′skip″ėr), *n.* In *lumbering,* a short iron pry or hammer used to remove the skidding-tongs from a log.

grab-snow (grab′snō), *n.* *Naut.*, a two-masted vessel having a boom-mainsail and belonging to the Bombay marine. See ★*grab-service.* [Obsolete.] *N. E. D.*

grab-vessel (grab′ves″el), *n.* See ★*grab-service.*

grace, *n.* 19. A bow or courtesy.

> All take your places and make your *graces,*
> And let the dance begin.
> *Stedman*, Country Sleighing, st. 6.

Congruous grace, grace suited or adapted to the effect intended under the conditions in which it is bestowed. See ★*congruism.*

grace-wife (grās′wif), *n.* A midwife. *Halliwell.* [Prov. Eng.]

gracilariid (gras-i-lā′ri-id), *n.* and *a.* **I.** *n.* A member of the family *Gracilariidæ.*

II. *a.* Of or belonging to the lepidopterous family *Gracilariidæ*.

graciosity (grā-si-os′i-ti), *n.* [In ME. *graciousete*, < OF. *gracieuselé;* later newly taken from L. *gratiositas*, < *gratiosus*, gracious.] The quality of being gracious; a gracious act. *Carlyle.*

grackle, *n.* **3.** In *angling*, the name of an artificial fly used in bass-fishing.—**Bronzed grackle,** *Quiscalus quiscula aëneus*, a subspecies of the purple grackle, found in the northern and western United States, especially in the Mississippi valley. It is characterized by the bronze or brassy reflections of the plumage.

grad[1] (grad), *n.* [A modern technical application of AS. *grad*, a step, < L. *gradus*, a step: see *grade*.] In *petrog.*, in the quantitative system of classification (1902) (see ★*rock*[1]), a division of igneous rocks lower than the subrang. A grad is based on the proportion of minerals of the subordinate group of standard minerals, when they are present in notable amount, that is, when they are more than one seventh as much as the preponderant group.

grad (grad), *n.* A graduate. [College slang.]

grad. An abbreviation of the Latin *gradatim*, by degrees.

gradate, *v. t.* **2.** In *chem.*, to bring (a solution) to a desired degree of concentration. [Rare.]

gradate (grā′dāt), *a.* [L. *gradatus* (parallel to NL. *graduatus*, whence E. *graduate, a.*), < L. *gradus*, step, grade: see *grade, n.*] Arranged serially according to size, as the whorls of a gastropod shell.

These [five whorls] being uniformly vitreous, shining, smooth, *gradate*. *Proc. Zool. Soc. London*, 1901, II. 417.

gradation, *n.* **7.** In *geol.*, the process of producing an even slope, by agencies of erosion and transportation, on which the supply and removal of rock-waste or detrital material are about balanced.—**Gradation plain.** See ★*plain*[1].

grade[1], *n.* **5.** In *trigon.*, in the centesimal system, the hundredth part of a right angle; also, the hundredth part of a quadrant.—**6.** A small difference between the brightness of two stars: substantially the same as a *step:* a term used by observers of variable stars. *Astrophysical Jour.*, Dec., 1903, p. 377.—**7.** In *philol.*, one of the positions or forms assumed by a vowel or root in a series of phonetic changes caused primarily by change of stress and other factors, as the vowels in English *sing, sang, sung, ride, rode, ridden*, etc., Latin *capio, cepi, -cipio*, etc., Greek √λειπ, √λιπ, √λοιπ, leave, √τευ, √ταμ, √τομ, cut, etc.—**Grade of repose,** in railroad construction, properly, a grade upon which a train will remain at rest under ordinary conditions of wind or other pressure tending to set it in motion; more loosely, and inaccurately, an incline or slope in a track which is just sufficient to overcome the rolling friction of a train at rest and cause it to move downward.—**Grade resistance.** See ★*resistance.*—**Momentum grade,** in railroad construction, a grade on a road which employs locomotives of a given power for a given train resistance on a level track, and which the trains are unable to surmount unless assisted by the train momentum acquired by approaching the grade at full speed. See *pusher* ★*grade, train* ★*resistance*, and *grade* ★*resistance.*—**Percentile grades,** in the study of variations, the values obtained by measurements taken at different points in the scale of frequencies.—**Pusher grade,** in railroad construction, a grade too steep for a single engine hauling an ordinary train, and requiring the use of a pusher or assistant engine. It is used wherever the cost of construction and maintenance of longer and easier grades would be more expensive than the employment of pusher engines upon a shorter grade. See ★*pusher*, 4.—**Ruling grade,** in railroad construction, a grade on any given road or division which, by reason of its grade resistance and sometimes also of its curve resistance, sets the limit to the train service; the most difficult grade the locomotives with a fixed number of cars can overcome without the aid of a pusher. In order of grade resistance it is next to a pusher grade. See *grade* ★*resistance, curve* ★*resistance*, and *pusher* ★*grade.*—**To be at grade,** in *phys. geog.*, said of an eroding and transporting agency, such as a stream, when, by its own action in eroding or filling, it does not actively build up or wear down its course. See ★*regimen.*

grade[1], *v.* **I.** *trans.* **4.** In *phys. geog.*, to develop by eroding or filling (degrading or aggrading) into an even slope on which an eroding and transporting agent (such as a stream) will not actively build up or wear down its course.—**5.** In *philol.*, to alter or be altered by gradation or ablaut. *Skeat*, Prin. Eng. Etymol., p. 170.

II. *intrans.* To prove to be of a certain grade or quality.

In Nelson County [North Dakota] . . . some of it [the wheat] is frosted, that of others *grading* No. 1 hard and No. 2 Northern. . . . In Pierce County . . . they have had no frost and the wheat is *grading* nearly all No. 1 hard. *N. Y. Tribune*, Oct. 30, 1891, p. 7.

grade-bred (grād′bred), *a.* Noting cattle, sheep, or hogs bred by mating a pure-blooded animal with one of no pedigree. See *grade*[1], 4.

graded (grā′ded), *p. a.* **1.** Arranged in series of grades; existing in a series of grades: as, *graded* schools; *graded* forms.—**2.** Reduced to a (specified) grade; specifically, in *phys. geog.*, possessing such a slope or form that the agencies of erosion and transportation which act upon it are essentially occupied in carrying forward the detritus which they receive: said of stream-courses, hillsides, beaches, etc.—**Graded plain.** See ★*plain*[1].

grade-peg (grād′peg), *n.* A small stake or peg driven into the ground to serve as a point of reference for heights or elevations. *F. A. King*, Irrig. and Drainage, p. 476.

grade-post (grād′pōst), *n.* **1.** A stake set upon a right of way to indicate the grade to which the proposed road must be made to conform.—**2.** A guide-post placed beside a railway-track to indicate a change in the grade of the road.

gradient, *n.* **3.** In *math.*, a rational integral homogeneous and isobaric function. *Sylvester.*—**4.** In *geom.*, slope.

If from any point P on the curve, we draw the tangent-line, to the right, the *gradient* is the tangent of the angle which this line makes with the positive direction of the axis of x. *H. Lamb*, Calculus, p. 67.

Adiabatic gradient. See *vertical* ★*gradient.*—**Anticyclonal gradient.** See ★*anticyclonal.*—**Barometric-gradient,** in *meteor.*, the rate of change of barometric pressure with distance; specifically, the rate of change of pressure along the earth's surface. According to international agreement, the gradient is expressed in millimeters, or in inches, per unit of horizontal distance, namely, one degree of the great circle, or 60 nautical miles. Unless the contrary is specified, the gradient is measured on the daily map perpendicular to the isobars at any point.—**Critical barometrical gradient,** the gradient that would be maintained under the influence of a steady wind or a steady system of winds.—**Cyclonal gradient,** the barometric gradient directed toward the center of a cyclone.—**Electric gradient,** the rate at which the electric potential varies. The great variations of horizontal gradient become explicable by the determination of the vertical gradient in the atmosphere. A spherical cumulus cloud of one kilometer radius, with its center three kilometers from the earth's surface, will, by its own charge, by induction cause a decrease of potential toward the earth's surface of about 11,000 volts per meter of altitude.—**Ferrel's gradient formula,** the analytical expression of the relation between barometric gradient and attending winds. This formula was first deduced and published by Ferrel in 1858.—**Gradient of refraction,** the rather sudden change in the vertical temperature gradient that occurs at considerable altitudes, such as 10,000 feet, in the atmosphere, corresponding to the abrupt change in gradients at the surface of a plateau.—**Hydraulic gradient,** the gradient of pressure between the free surface of a liquid in a reservoir and any orifice of efflux connected with the same.—**Initial gradient,** the very slight gradient of pressure at sea-level due to differences of density in the atmosphere or to general or local disturbances, tides, etc., in consequence of which a general movement of air is set up, producing the larger observed barometric gradients that are the result rather than the cause of the wind.—**Isopycnal gradient,** the gradient of density in different parts of a fluid mass; the difference between successive isopycnals divided by the distance between them.—**Neutral gradient of pressure.** See *vertical* ★*gradient.*—**Pressure gradient,** the rate of change of pressure in terms of that of any other quantity of which the pressure is a function; also, a line or curve which expresses such change.—**Temperature gradient,** the rate of change of temperature in terms of that of any other quantity of which the temperature is a function; also, a line or curve which expresses such change.—**Velocity gradient,** the rate of change of velocity in terms of that of any other quantity of which the velocity is a function; also, a line or curve which expresses such change.—**Vertical gradient,** the rate of variation of any atmospheric condition with altitude, above-ground. A change of temperature of one degree centigrade per 100 meters is called the *adiabatic gradient.* A corresponding vertical pressure gradient, maintaining neutral dynamic equilibrium in the atmosphere, is the *neutral gradient of pressure.*

Gradienter screw, the screw, with graduated head, which elevates or depresses the telescope of a gradienter and accurately measures the changes in the vertical angles.

gradometer (grā-dom′e-tėr), *n.* [L. *gradus*, step, + Gr. *μέτρον*, measure.] An instrument for measuring the amount of slope in any grade.

graduated (graḍ′ū-ā-ted), *p. a.* Specifically, in *ornith.*, having the tail moderately pointed, the tail-feathers regularly decreasing in length from the center pair outward.

graf, *n.* and *v. t.* A simplified spelling of *graff.*

graft[2], *n.*—**Animal graft,** a graft made with bone or other tissue removed from one of the lower animals.—**Autoplastic graft,** a graft made with skin or other tissue taken from another part of the subject's own body.—**Heteroplastic graft,** a graft made with skin or other tissue taken from another individual.—**Sponge graft,** a very small piece of aseptic sponge applied to a granulating surface to serve as a center for the formation of new epithelium.—**Thiersch's graft,** a graft made with a piece of skin of appreciable size to which a certain thickness of the subcutaneous tissue is attached.

graft[3] (gråft), *n.* [ME. **graft*, AS. **græft* (not recorded) = Icel. *gröftr* (gen. *graftar*), digging, < AS. *grafan*, Icel. *grafa*, dig: see *grave*[1], *v.*] **1.** The depth of a spade in digging; the amount of earth turned up in one turn of the spade. *Markham.*

The . . . relics . . . were discovered in 1827, . . . at a depth of about a 'spade's-*graft*' beneath the surface. *Proc. Soc. of Antiquaries*, March 7, 1844, p. 30.

2. A narrow crescent-shaped spade, used in cutting drains. *Eng. Dial. Dict.*

graft[4] (gråft), *n.* [Prob. a generalized use of *graft*[3], digging. Compare the figurative use of *diggings* for a location or region where work is carried on.] **1.** Work; labor. [Prov. Eng.]

'Well, I've got some *graft* to do now.' Often heard in and about Sheffield.
S. O. Addy, Gloss. of Words Used in the Neighborhood [of Sheffield, 1888–90, Sup., p. 25.

The story ["The Autobiography of a Thief"] has been told in the thief's own words. But this feature is not without interest to the student of philology. For example, in Australia the slang word for work of every sort and kind, from that of the head of a State to that of a crossing-sweeper, is "*graft.*" All sorts and conditions of people use the word in this connexion.
Athenæum, April 30, 1904, p. 560.

2. A job or a trade.

The roadster proper is distinguished from the tramp by having a '*graft*,' or in other words a visible means of support. *Pop. Sci. Jour.*, IV. 255 (1896). *N. E. D.*

graft[4] (gråft), *v. i.* [*graft*[4], *n.*] To work. [Prov. Eng.]

Graft, to work; "where are you *grafting?*" i. e., where do you live or work? *Hotten*, Slang. Dict. (1869), p. 146.

To *graft* . . . (2) to work, but the work in this case was stealing, i. e., picking pockets. Grafting is also used in the sense of helping another to steal.
Farmer, Americanisms—Old and New (1889), p. 273.

graft[5] (gråft), *n.* [An extension of *graft*[4], *n.*, 2. Compare the like development of *job*, 'a piece of work,' to *job*, 'a piece of corruption.'] **1.** Dishonest gain acquired by private or secret practices or corrupt agreement or connivance, especially in positions of trust, as by offering or accepting bribes (directly or in the veiled form of commissions, fees, gifts, or philanthropic contributions), or by promising or using, directly or indirectly, one's official influence or power to assist or protect wrongdoing, or by levying blackmail—all in a private way and often disguised so as to seem the customary and proper course of business. The word *graft*, with its derivates, came suddenly into extensive use in the political and journalistic language of the United States about 1901, as a new term more convenient in some respects than the equivalent terms bribery, corruption, dishonesty, blackmail, 'boodling,' all of which it connotes, and of which it is a succinct synonym. [Colloq. or slang.]

The World of *Graft*. *Josiah Flynt* (title of a book, [1901).

2. A business, process, place of concourse, or office, in or at which dishonest gain, by corruption or direct thieving, may be acquired. [Colloq. or slang.]

graft[5] (gråft), *v. i.* To engage in graft; live by graft. See ★*graft*[5], *n.*, and compare quotation from Farmer under ★*graft*[4], *v. i.* [Colloq. or slang.]

I'd like to see this town run by thieves once. Course they'd *graft*—couldn't help it, but not any more 'n the police do.
Josiah Flynt, in McClure's Mag., April, 1901, p. 572.

graftage (gråf′tāj), *n.* [*graft*[2] + *-age.*] The process and the operation of grafting, or the state or condition of being grafted: a comprehensive term comprising the act of grafting and all the questions of science, practice, and description that grow out of the operation. *L. H. Bailey.*

grafter[2] (gråf′tėr), *n.* [*graft*[5], *v.*, + *-er*[1].] One who 'grafts' (see ★*graft*[5], *v.*); one who takes or makes 'graft' or dishonest private gain, especially in positions of trust, and in ways peculiarly secret and corrupt.

When the purchasing agent of a corporation or a firm accepts a fee or a commission from the seller of goods to that corporation or firm he is a *grafter.*
Hartford Times, quoted in Boston Transcript, July 31, [1903.

grafting[1], *n.* **3.** Joining; splicing; specifically, splicing a rope by unlaying and relaying the strands of the ends to be joined, or, in knitting, adding one piece to another.—**4.** In *beeculture*, the substitution of eggs or larvæ in queen-cells for the original occupants.—**Bark-grafting.** Same as *rind-grafting* (which see, under *grafting*).

grafting[2] (gråf′ting), *n.* [*graft*[5], *v.*, + *-ing*[1].] The practice of taking or making 'graft'; the practice of stealing money or its equivalent, especially in positions of trust, in ways not easily detected or punishable. *N. Y. Tribune*, Oct. 24, 1901.

Everybody who has studied public life has been appalled at its corruption. There is a general belief that every State Legislature and the national Legislature are

given to "*grafting*." It is felt that they are actuated by other than pure motives. Why should public life be so debauched? I have come to the conclusion that it is only a reflection of private life. There is "*grafting*" everywhere.

W. T. Jerome, quoted in Boston Transcript (from Hartford [Times), July 31, 1903.

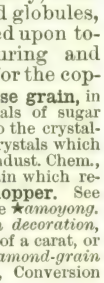
grafting-saw (gräf'ting-sâ), *n.* A saw with a wide kerf and coarse teeth adapted for the sawing of green wood: used for cutting off shoots and making the groove for a graft.

Graham flour. See ★*flour*.

grahamite[2], *n.* 2. See ★*meteorite*.

Grahamize (grā'am-īz), *v. t.*; pret. and pp. *Grahamized*, ppr. *Grahamizing*. [*Graham* (see def.) + *-ize*.] To treat, that is, to open (letters) or cause (letters) to be opened while they are passing through the post-office, as Sir James Graham, a British Home Secretary, was supposed to have done with the letters of Mazzini and his friends. [Rare.]

To *grahamize*.—On 14 June, 1840, Mr. T. Duncombe, M.P., presented a petition to the House of Commons from W. J. Linton, Giuseppe Mazzini, and others, complaining that their letters had been opened when passing through the Post Office. Sir James Graham, the then Home Secretary, acknowledged that he had given instructions for this being done, and incurred great obloquy in consequence; but it appeared subsequently that it had been done by the Foreign Secretary, Byron's "travelled thane, Athenian Aberdeen," at the instance of the Neapolitan Government and with the concurrence of the Cabinet.



N. and Q., 9th ser., May 18, 1901, p. 394.

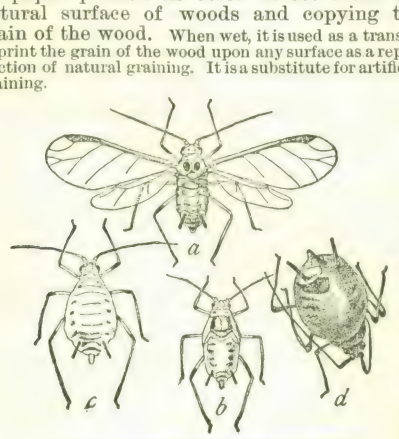
Graian (grā'yan), *a.* [L. *Graius*, Greek, + *-an*.] Pertaining to the Graii, or Greeks.

grain[1], *n.* **15.** In the tobacco industry, a deposit of calcium oxalate, in scattered globules, often at the base of the hairs, formed upon tobacco-leaves in the process of curing and sweating.—**16.** The English name for the copper coin called *grano* at Malta.—**False grain,** in *sugar-manuf.*, a new crop of small crystals of sugar formed when fresh syrup is introduced into the crystallizing-pan in order to increase the size of crystals which have already formed. *Sadtler*, Handbook of Indust. Chem., p. 132.—**Fish-skin grain,** in *leather*, a grain which resembles the skin of a fish.—**Grain leaf-hopper.** See ★*leaf-hopper*.—**Grains of paradise.** (*b*) See ★*amoyong*.—**Grains of rice,** in *ceram.* See *rice-grain decoration*, under *rice*[1].—**Jeweler's grain,** one fourth of a carat, or about four fifths of a troy grain: same as *diamond-grain* (which see, under *carat*, 4). *C. Hering*, Conversion Tables, p. 59.

grain[1], *v. t.*, **5.** (*b*) To scrape, as with a slicker, on the grain side. *C. T. Davis*, Manuf. of Leather, p. 380.

grain-beetle (grān'bē″tl), *n.* A beetle which breeds in stored grain. Among these beetles are the flat grain-beetle, *Læmophlæus pusillus*, the foreign grain-beetle, *Cathartus advena*, the merchant grain-beetle, *Silvanus mercator*, the red-necked grain-beetle, *Cathartus gemellatus*, and the saw-toothed grain-beetle, *Silvanus surinamensis*.

Red-necked Grain-beetle (*Cathartus gemellatus*), enlarged. (Chittenden, U. S. D. A.)



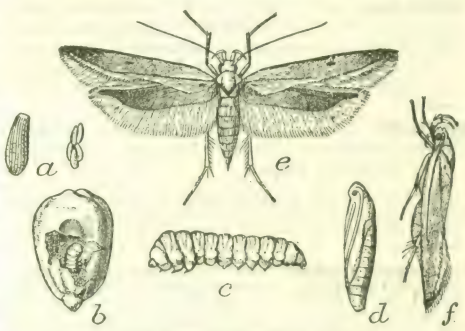
grain-borer (grān'bōr″ėr), *n.* An insect which bores into grain.—**Larger grain-borer,** a bostrychid beetle, *Dinoderus truncatus*, of uncertain origin, but probably Central American, which bores into stored grain and edible tubers and the boxes in which they may be stored.

Grained negative. See ★*negative*.

grainer[1], *n.* **5.** In *salt-making*, a pan in which granulated salt is formed by rapid crystallization under the action of solar heat.

grain-gold (grān'gōld), *n.* **1.** Gold which develops a granular structure while being heated.—**2.** Gold-dust.

graining-paper (grā'ning-pā″pėr), *n.* A transfer-paper printed in color direct from the natural surface of woods and copying the grain of the wood. When wet, it is used as a transfer to print the grain of the wood upon any surface as a reproduction of natural graining. It is a substitute for artificial graining.



German Grain-louse (*Macrosiphum cerealis*).

a, winged migrant; *b*, nymph of same; *c*, wingless parthenogenetic female; *d*, same, showing exit hole of parasite. All enlarged. (After Riley.)

grain-lac (grān'lak), *n.* Same as *seed-lac*, (which see, under *lac*[2]).

grain-louse (grān'lous), *n.*; pl. *grain-lice* (-līs). A plant-louse common to both North America and Europe, and which attacks growing grain and grasses as well as other plants. Among these lice are the English grain-louse, *Macrosiphum granaria*, the European grain-louse, *Siphocoryne avenæ*, and the German grain-louse, *Macrosiphum cerealis*. See cut in previous column.

grain-moth, *n.*—**Angoumois grain-moth,** a moth, *Sitotroga cerealella*, the larva of which infests stored grain. It is now a cosmopolitan species, but is supposed

Angoumois Grain-moth (*Sitotroga cerealella*).

a, egg and egg mass; *b*, larva in grain of corn; *c*, larva; *d*, pupa; *e*, *f*, moth. About two and a half times natural size. (Chittenden, U. S. D. A.)

to have been introduced originally into the United States from the province in France (Angoumois) from which its popular name is derived. Also called *fly-weevil*.

grain-process (grān'pros″es), *n.* In *photog.*, a process of photomechanical printing in which the proof is given a granulated appearance. See *grained* ★*negative*.

grain-sick (grān'sik), *n.* Impaction or overdistention of the rumen or first stomach of the ox due to eating excessive quantities of food. Also called *grain-sickness* and *plenalvia*.

grain-split (grān'split), *n.* In *leather-manuf.*, the outer split, which has the grain on it, as distinguished from the flesh-split. *C. T. Davis*, Manuf. of Leather, p. 188.

grain-tester (grān'tes″tėr), *n.* A small weighing-scale adapted to ascertaining the number of pounds in a bushel of any given kind of grain. A small quantity of the grain is weighed on the scales and the scale-weight indicates on the beam the exact weight of a bushel of that particular kind of grain.

grain-trier (grān'trī″ėr), *n.* A contrivance for sampling grain. See the extract.

Cereals and other large seeds are sampled with a *grain trier*. This consists of two hollow cylinders of metal, one inside of the other, about 1 meter long and 12 mm. in diameter. They are pointed at the bottom and provided with a handle at the upper end. A corresponding series of oblong openings extends at regular intervals along one side of both cylinders, which may be turned at will so as to open or close the holes. The sampler, with the holes open, is thrust into the top of a bag of grain for its entire length. When filled with seeds the inner cylinder is turned, so as to close the holes, and the sampler removed.

Yearbook U. S. Dept. Agr., 1894, p. 406.

grain-whisky (grān'hwis″ki), *n.* Whisky made principally from raw barley, with only a small proportion of malted barley to assist the change of starch into sugar. The bulk of the Irish whisky of commerce is grain-whisky. *Encyc. Brit.*, XXIV. 542.

grain-worm (grān'wėrm), *n.* The larva of a grain-beetle or of a grain-moth.

grallous (gral'us), *a.* Pertaining to or having the characters of the *Grallæ*, an order of wading birds; gralline.

gram[2], *n.*—**Gram-centigrade heat-unit.** See ★*heat-unit*.—**Gram atom.** See ★*gram-atom*.

gram[3], *n.*—**Black gram,** a black-seeded variety of the green gram, *Phaseolus Mungo*.—**Red gram,** the cow-pea, *Vigna Sinensis*. See *Vigna* and *cow-pea*, under *pea*[1].—**Turkish gram,** a dwarf East Indian bean, *Phaseolus aconitifolius*. Called *moth* in India.—**White gram,** the soy-bean, *Soia Soja*. See *soy*, 2, and *sahuca beans*, under *bean*[1].

gram[4] (gram), *n.* [Gr. γραμμή, a line, ⟨ γράφειν, draw, write: see *gram*[2].] In *kinematics*, the curve described by a point of a link-motion.

The point of a link-motion which describes any curve is called a graph, the curve being called a *gram*.

A. B. Kempe, How to Draw a Straight Line, p. 6.

grama (grä'mä), *n.* [See *grama-grass*.] A name for various grasses: always used with a qualifying word.—**Black grama.** (*a*) In New Mexico, *Hilaria mutica*, a perennial grass with running rootstocks which forms dense patches on hillsides. It makes excellent pasturage when abundant, and is gathered for hay by uprooting with a hoe. Also called *black bunch-grass*. (*b*) The bristly mesquit, *Bouteloua hirsuta*, and the woolly-foot, *B. eriopoda*. (*c*) One of the blow-out grasses, *Muhlenbergia pungens*. See ★*blow-out*. Also called *grama china*.—**Blue grama,** the common grama-grass, *Bouteloua oligostachya*, which ranges from Wisconsin to California and from Texas and Mexico to Manitoba and Alberta. It is one of the best grazing-grasses, withstanding the trampling of stock and curing in the turf. In the eastern Rocky Mountain region it serves for pasture all winter.—**Crowfoot grama.** Same as *blue* ★*grama*.—**Grama china.** See *black* ★*grama* (*c*).—**Jointed grama.** Same as ★*side-oats*.—**Low grama.** See *six-weeks* ★*grama*.—**One-flowered grama,** a slender species, *Bouteloua uniflora*, of southwestern Texas. It bears numerous one-flowered spikes near together along the axis.—**Side-oats grama.** Same as ★*side-oats*.—**Six-weeks grama,** *Bouteloua polystachya*, a slender much-branched annual grass, which ranges from Utah to Texas and southern California. It occurs only in scattered tufts and is seldom more than 6 inches high. Also called *low grama*.—**Tall grama.** Same as ★*side-oats*.—**Texas grama.** Same as *seed*-★*mesquit*.—**White grama.** Same as *blue* ★*grama*.—**Wire-grama.** (*a*) A much-branched straggling grass, *Muhlenbergia Porteri*, of dry mesas and table-lands in the southwestern United States and in Mexico. It is of good quality as feed, but will not bear trampling; in rich soil, however, it affords hay. (*b*) Same as *curly* ★*mesquit*.—**Woolly-foot** or **woolly-jointed grama.** Same as ★*woolly-foot*.

gram-atom (gram'at″o̤m), *n.* In *chem.*, a quantity of an element whose weight in grams is numerically equal to the atomic weight of the element.

One *gram-atom* of radium gives off per hour an amount of heat comparable with the heat produced by the combustion of a *gram-atom* of hydrogen.

Jour. Franklin Inst., Nov., 1903, p. 329.

gram-calory (gram'kal″ō-ri), *n.* The quantity of heat necessary to raise one gram of water from 0° to 1° C.; the thousandth of a greater calory.

gramenite (gram'e-nīt), *n.* Same as *graminite*.

gram-equivalent (gram'ē-kwiv″a-lent), *n.* That weight of an element or compound which is equivalent to one gram of hydrogen; that quantity of an element or compound whose weight in grams is numerically equal to its equivalent weight.

graminicolous (gram-i-nik'ō-lus), *a.* [L. *gramen* (*gramin-*), grass, + *colere*, inhabit.] Living upon grasses: said of fungi and other parasites.

graminiferous (gram-i-nif'e̤-rus), *a.* [NL. **graminifer*, ⟨ L. *gramen* (*gramin-*), grass, + *ferre*, bear, + *-ous*.] Grass-producing; grass-bearing: as, the *graminiferous* plains of South America. *Mrs. Somerville*, Connect. Phys. Sci., xxvi.

graminin (gram'in-in), *n.* A carbohydrate, $(C_6H_{10}O_5)_6H_2O$, found in the roots of *Trisetum alpestre* and other plants. It melts at 209° C.

graminous (gram'i-nus), *a.* [L. *graminosus*, grassy, ⟨ *gramen* (*gramin-*), grass.] Grassy; covered with grass; also, erroneously, grass-like; gramineous.

gram-ion (gram'ī″o̤n), *n.* In *phys. chem.*, a quantity of an ion whose weight in grams is numerically equal to the atomic weight of the ion, or, in the case of a complex ion, to the sum of the atomic weights of the atoms of the ion.

One *gram-ion* of chlorine signifies 35.45 grams of chlorine in the ionic condition (Cl'); a *gram-ion* of (SO_4'') weighs 96 grams (96 being the sum of the atomic weights).

Arrhenius (trans.), Text-book of Electrochem., p. 9.

Gramma (gram'ä), *n.* [NL., ⟨ Gr. γραμμή, a line: see ★*gram*[4].] A genus of very small bass-like fishes, with the lateral line broken, belonging to the family *Serranidæ*: found in the coast waters of Cuba. *G. loreto* is the known species.

Grammaria (gra-mā'ri-ä), *n.* [NL. (Stimpson, 1854), ⟨ Gr. γραμμή, a line (?).] The typical genus of the family *Grammaridæ*.

Grammaridæ (gra-mar'i-dē), *n. pl.* [NL., ⟨ *Grammaria* + *-idæ*.] A family of sertularian hydroids in which the hydrocaulus consists of an axial tube which carries the hydrothecæ and is surrounded by and inseparably coalesced with peripheral tubes without hydrothecæ. The hydrothecæ are adnate to the axial tube. The typical genus is *Grammaria*.

Grammatophyllum (gram″a-tō-fil'um), *n.* [NL. (Blume, 1829), ⟨ Gr. γράμμα (γραμματ-), letter, + φύλλον, leaf. The allusion is appar. to the irregular spots and markings on the leaves of the perianth.] A genus of plants of the family *Orchidaceæ*. They are large epiphytes, with long leafy stems, narrow leaves, and basal, long-stalked, loose racemes of large yellow or green flowers, spotted and mottled with purple or brown. There are 4 species, natives of the Malay region, often cultivated by orchid-fanciers. *G. speciosum*, sometimes called the *queen of orchids*, is one of the largest and most showy plants of the family, its stems sometimes attaining a length of 12 feet in a single year, and the racemes reaching a length of 6 feet.

Gramme ring. See ★*ring*.

gram-meter (gram′mē″tėr), *n.* A gravitational unit of work, the work required to lift one gram one meter vertically against the earth's attractive force. It is one thousandth of a kilogram-meter, or about 98,000 ergs.

Grammicolepididæ (gram″i-kō-le-pid′i-dē), *n. pl.* [NL., ‹ *Grammicolepis* (*-id-*) + *-idæ*.] A family of deep-water fishes, allied to the pomfrets or *Bramidæ:* distinguished by large scales and other characters. A single genus, *Grammicolepis*, is known.

Grammicolepis (gram″i-kol′e-pis), *n.* [NL., ‹ Gr. γραμμικός, linear (‹ γραμμή, line), + λεπίς, scale.] The typical genus of the family *Grammicolepididæ*, containing a single species, *G. brachiusculus*, a very rare fish of the deep waters of Cuba.

Gramminæ (gra-mī′nē), *n. pl.* [NL., ‹ *Gramma* + *-inæ*.] A subfamily of the family *Serranidæ*, or bass-like fishes, typified by the genus *Gramma*.

Grammistes (gra-mis′tēz), *n.* [NL., ‹ Gr. γραμμή, a line, + *-istes*.] A genus of bass-like fishes of the family *Serranidæ*, found in the South Seas. The species are dark brown in color, with stripes of golden yellow. *G. sexlineatus* is common in the mid-Pacific.

Grammistinæ (gram-is-tī′nē), *n. pl.* A subfamily of widely distributed serranoid fishes.

gram-molecular (gram″mō-lek′ū-lăr), *a.* Pertaining to or containing a gram-molecule. *Physical Review*, March, 1904, p. 155.

gram-molecule (gram′mol″e-kūl), *n.* A weight of a substance such that the number of grams taken is equal to its molecular weight or to the sum of the combining weights of the elements of which it is made up. One gram-molecule of water, for example, is 18 grams ($H_2O = 1 + 1 + 16 = 18$).

Grammysia (gra-mis′i-ą), *n.* [NL., said to be (irreg.) ‹ Gr. γράμμα, a letter, + μῦς, a muscle. If so the right form would be **Grammatomya*.] A genus of prionodesmaceous pelecypods, typical of the family *Grammysiidæ*, with large oval integropallial valves and very simple, wholly edentulous hinge. It is of Devonian age.

Gram-negative (gram′neg″ą-tiv), *a.* Negative (that is, resistant) to Gram's stain. See ★*stain*.

Gram-positive (gram′poz″i-tiv), *a.* Positive (that is, receptive) to Gram's stain.

grampus, *n.*—**To blow the grampus.** See ★*blow*[1], *v. t.*

Gram's method, stain. See *Gram's* ★*method*, ★*stain*.

granadino (grä-nä-dē′nō), *n.* [Colonial Sp., ‹ *Granada*, (New) Grenada.] A silver coin of Venezuela (the republic of New Grenada), of the value of 8 reals.

granary-beetle (gran′ą-ri-bē″tl), *n.* Same as ★*grain-beetle* (which see).

granary-weevil (gran′ą-ri-wē″vl), *n.* Same as *grain-weevil*.

granatine (gran′ą-tin), *n.* [*(pome)granate* + *-ine*[2].] A colorless alkaloid found in the bark of pomegranate root.

granatoline (gran-ą-tō′lin), *n.* [L. *granatus*, grained, + *-ol* + *-ine*[2].] An alkaloid, $C_8H_{14}OH.NH$, obtained by the oxidation of n-methyl-granatoline. It crystallizes in prisms which melt at 134° C.

Granby token. See ★*token*.

grand. **I.** *a.* [In some of the following phrases *grand* is French, but often treated as the English word.]—**Grand feu** (F., 'great fire'), the highest temperature in the porcelain kiln, which by some is supposed to be about 4,717° F. Also called *sharp fire, fierce fire*, etc.—**Grand guard,** the guard detailed for the outpost duty of an army in the field. A grand guard is usually furnished by each brigade.—**Grand jeu,** in the harmonium, a stop which makes the full power of the instrument available.—**Grand misère** (grąn me-zār′), in *boston*, the loss of every trick, the hand being played as it was originally dealt, without discarding. *Amer. Hoyle*, p. 244.—**Grand misère ouverte,** in *boston*, the loss of every trick, the cards being exposed on the table: sometimes called a *spread*.—**Grand ouvert,** in *skat*, a grand played with the cards exposed on the table but not liable to be called. See ★*skat*.—**Grand tourné,** in *skat*, if the card shown for a tourné is a jack, the player may change his bid to grand tourné, that is, to play without a trump. See ★*skat*.

II. *n.* 2. Any announcement to play without a trump suit, in such games as *skat, cayenne*, etc.—**Gucky grand,** in *skat*, a bid to play a grando after having taken in both the skat cards. See ★*skat*.

grandmaternal (grand′mą-tėr″nąl), *a.* Of, pertaining to, or befitting a grandmother. *Biometrika*, Nov., 1903, p. 99.

grandparental (grand′pą-ren″tąl), *a.* Of, pertaining to, derived from, or befitting a grandparent or grandparents: as, a *grandparental* inheritance.

Cases in which the taint was *grandparental* or farther removed still, 16. *Lancet*, April 18, 1903, p. 1081.

grandpa's-beard (grand′päz-bērd″), *n.* In Texas, a species of virgin's-bower, *Clematis Drummondii:* so named from the fruiting panicle made showy by the feathery tails of the fruit.

grandrills (gran′drilz), *n. pl.* [Orig. *grand drills*, appar. a factory name.] A kind of coarse corset-jean, or cotton-drilling.

granilite (gran′i-līt), *n.* [L. *granum*, grain, + Gr. λίθος, stone.] A name given by Kirwan to complex granitic rocks composed of more than three minerals. *Kirwan*, Elem. Min., I. 346. [Rare.]

granit, *n.* A simplified spelling of *granite*.

granite, *n.* In the quantitative system of classification (1902), it is proposed to apply the term *granite* for field purposes to all phanerocrystalline rocks composed of quartz and feldspar of any kind, with mica, hornblende, or other ferromagnesian mineral, if present in subordinate amounts. See ★*rock*[1].—**Alkali granite,** in *petrog.*, a granite rich in alkali feldspars, of which the dark constituent is also alkalic, as riebeckite, ægirite, etc. Similarly, certain syenites may be called *alkali syenite*. *Rosenbusch.*—**Binary granite.** (*a*) Granite consisting of the two minerals quartz and feldspar, mica and other common silicates being absent: in this nearly obsolete sense granite is almost synonymous with *haplite*. (*b*) A granite containing two micas: the *granite proper* of some authors.—**Concretionary granite,** orbicular granite.—**Paris granite.** Same as ★*semi-porcelain*.—**Prune-granite,** an orbicular granite in which nodules or lumpy aggregates of the dark minerals, chiefly biotite, form the characteristic feature. The fancied resemblance of these nodules to prunes arranged throughout the rock is the basis of the name. Sometimes also called *pudding-granite*.

A nodular granite from Ontario has been described. . . . This differs from other orbicular granites in that there is no pronounced radial or concentric structure. The same is true of the "pudding" or "*prune*" *granite* of Vermont. *Amer. Geol.*, Sept., 1904, p. 139.

White granite, in *ceram.*, a variety of hard white pottery of a bluish tint; a grade below semi-porcelain. It is more extensively produced in the United States than any other grade of crockery, being used principally for table and toilet services. Also called *stone china* and *ironstone china*.

granitization (gran″i-tī-zā′shọn), *n.* [*granite* + *-ize* + *-ation*.] In *geol.*, an extreme phase of metamorphism leading to the transformation of sediments into rock which resembles igneous granite.

granitize (gran′it-īz″), *v. t.*; pret. and pp. *granitized*, ppr. *granitizing*. [*granite* + *-ize*.] In *geol.*: (*a*) To impregnate (a rock) with granitic material or minerals. Certain fissile schists are supposed to have been filled with thin seams and layers of granite magma, intruded in a molten condition, producing gneiss-like rocks. Other rocks are in some cases impregnated with minerals derived from bodies of molten granite through processes of contact metamorphism. (*b*) To change into granite; convert into granite.

granitoidal (gran-i-toi′dąl), *a.* Same as *granitoid*.

granivore (gran′i-vōr), *n.* [NL. *granivorus*, grain-eating: see *granivorous*.] Any animal, but more particularly a bird, that feeds upon grain.

Our poultry are chiefly *granivores*. *Lancet*, Aug. 22, 1903 (advt.).

granjeno (grän-hā′nō), *n.* [Mex. Sp.] In the southwestern United States and in northern Mexico, a shrub, *Momisia pallida*, of the elm family, which bears small orange-colored or red berries having an acid pulp. The plant is suitable for hedges, and the fruit is edible, though not much esteemed by the natives.

grannom (gran′ọm), *n.* A British anglers' name for a caddis-fly, *Brachycentrus subnubilis*, or an imitation of it.

granny, *n.* 3. A nurse or midwife. [Southern U. S.]

granny (gran′i), *v. t.*; pret. and pp. *grannied*, ppr. *grannying*. [*granny, n.*] To serve as a nurse or midwife.

She *grannied* yore mother when you was born. *R. McE. Stuart*, In Simpkinsville, p. 85.

granny-bush (gran′i-bůsh), *n.* Either of two shrubs, *Cordia Lima* of the borage family, or *Croton linearis* of the spurge family; both are covered with an ashy-gray tomentum. [Bahama Is.]

grano, *n.* 2. A subsidiary coin of Naples and the two Sicilies, the hundredth part of a ducat, equal to eighty hundredths of a United States cent.

grano-alaskose (gran″ō′ą-las′kōz), *n.* [L. *granum*, grain, + *-o*, signifying megascopic, + *alask(ite)* + *-ose*.] In *petrog.*, in the quantitative system (see *rock*[1]), a granitic rock having quartz and alkalic feldspar in nearly equal proportions, the feldspars being nearly equally sodic and potassic.

granodiorite (gran-ō-dī′ō-rīt), *n.* [*gran(ite)* + *diorite*.] A phanerocrystalline rock intermediate in composition between granite and quartz-diorite: nearly the same as quartz-monzonite. The feldspars which it contains are orthoclase and lime-soda feldspar in nearly equal amounts; quartz and subordinate amounts of mica, hornblende, or other ferromagnesian minerals also are present. *Becker*.

granoliparose (gran-ō-lip′ą-rōs), *n.* [*gran*, granular, + *-o-* + *liparose*.] In *petrog.*, in the quantitative system of classification (see ★*rock*[1]), an igneous rock belonging to the sodipotassic subrang of the peralkalic rang of the quardofelic order of persalane, Class I, having a megascopic granular texture. The term is applicable to certain kinds of granites.

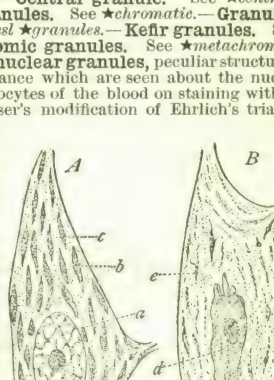
granolite (gran′ō-līt), *n.* [L. *granum*, a grain, + Gr. λίθος, stone.] An evenly granular igneous rock, in distinction from a porphyritic rock. *Turner*, 1900.

granolithic (gran-ō-lith′ik), *a.* [L. *granum*, grain, + Gr. λίθος, stone, + *-ic*.] Made of crushed stone, sand, and cement: noting a special form of concrete. When pavements or buildings are so made they are usually covered with a coating of neat cement.

granoplasma (gran-ō-plaz′mą), *n.* [NL., ‹ L. *granum*, grain, + Gr. πλάσμα, anything formed.] Finely granular protoplasm.

granospherite (gran′ō-sfē-rīt), *n.* [L. *granum*, grain, + *spher(ule)* + *-ite*[2].] In *petrog.*, a spherulite composed of grains arranged radially or concentrically. *Vogelsang*, 1872.

granth (grunt), *n.* [Hind. *granth*, a knot, book, code, ‹ Skt. *grantha*, a knot, composition, verse, book, text, ‹ √*granth*, √*grath*, tie, connect, compose.] The Book, that is, the Scriptures, of the Sikhs, containing the hymns composed or compiled by their leaders from Nanak (1469–1538) onward.



Granular gland. See ★*granule-gland*.—**Granular hypothesis,** the doctrine or opinion that the granules seen in protoplasm are the fundamental units of structure for all living things.

granularity, *n.* 2. In *petrog.*, the magnitude of the grain of a rock: a factor in the texture.

Granulated steel. See ★*steel*[1].

granulation, *n.*—**Exuberant granulations,** large succulent granulations which rise above the level of the skin surrounding an ulcer: also called *proud flesh*.—**Granulation tumor.** Same as *granuloma*.

granule, *n.*—**Altman's granules.** Same as *Altman's* ★*bioblasts*.—**Babes-Ernst granules,** small granules which occur in the bodies of diphtheria bacilli and are demonstrable by staining with a methylene-blue solution of the composition: 1 gram of the dye, 20 cubic centimeters of absolute alcohol, 50 cubic centimeters of glacial acetic acid, and water enough to make one liter. The preparations are then counterstained with Bismarck brown. The pseudo-diphtheria bacilli, when thus stained, show no granules.—**Central granule.** See ★*central*.—**Chromatic granules.** See ★*chromatic*.—**Granules of Nissl.** See *Nissl* ★*granules*.—**Kefir granules.** See ★*kefir*—**Metachromic granules.** See ★*metachromic*.—**Neusser's perinuclear granules,** peculiar structures of granular appearance which are seen about the nuclei of the various leucocytes of the blood on staining with a certain dye (Neusser's modification of Ehrlich's triacid stain): regarded by some as artifacts.—**Nissl granules,** small, deeply staining bodies found by Nissl in the cytoplasm of nerve-cells. These bodies are said to consist of Nissl substance and are sometimes spindle-shaped, when they are called *Nissl spindles*. Also called *Nissl's bodies* and *tigroid*.—**Plastin granule.** See ★*plastin*.—**Solar granule,** one of the little bright spots, resembling rice-grains, with which the face of the sun appears to be covered when viewed telescopically.

Nissl Granules.

Two motor cells from lumbar region of spinal cord of dog fixed in sublimate and stained in toluidin blue.

A, from the fresh dog; *a*, pale nucleus; *b*, dark Nissl spindles; *c*, bundles of nerve fibrils; B, from the fatigued dog; *d*, dark shriveled nucleus; *e*, pale spindles. (After Mann.)

granule-ball (gran′ūl-bâl), *n.* One of the roundish granules which fill the body of the pupa of an insect in its later stages of development, and which consist of leucocytes which have ab-

sorbed fragments of the tissue of the larval body.

granule-gland (gran'ūl-gland), *n.* In various platyhelminths, one of the unicellular glands whose secretion, consisting of refringent granules, mixes with the spermatozoa. *Parker and Haswell*, Zoology, I. 255.

granulitic[2] (gran-ū-lit'ik), *a.* [*granule* + *-ite*[2] + *-ic.*] In *petrog.*, having a granular texture made up of nearly equidimensional grains or crystals.

granulitize (gran'ū-li-tīz), *v. t.*; pret. and pp. *granulitized*, ppr. *granulitizing*. [*granulite* + *-ize.*] In *petrog.*, to make granular, as by crushing.

granulize (gran'ū-līz), *v. t.*; pret. and pp. *granulized*, ppr. *granulizing*. To convert into granules, as a fine powder into a coarser one by wetting, sieving, then drying and resieving, preparatory to making compressed tablets. The product is termed a *granulation*.

granulo-adipose (gran″ū-lō-ad'i-pōs), *a.* Containing or consisting of granules and fatty substance: said of certain cells or tissues: same as *granulo-fatty*.

granulo-crystalline (gran″ū-lō-kris'ta-lin or -līn), *a.* **1.** Containing or consisting of granules and crystals: said of certain cells or tissues.—**2.** In *petrog.*, crystalline with nearly equidimensional grains.

granuloma, *n.*—**Granuloma tropicum.** Same as *yaws*.

granulo-pulpy (gran″ū-lō-pul'pi), *a.* Consisting of or containing granules and pulp: said of certain tissues or cells.

grape[1], *n.*, **4.** *pl.* (*b*) A specific affection of the heel of horses, accompanied by an offensive discharge and the formation of red, raw excrescences (grapes) on the surface. Also called *varrucose dermatitis*. (*c*) Tuberculosis of the serous membranes (pleura and peritoneum) in which conglomerate clusters of tubercles are found. Also called *pearly disease*.—**Arroyo grape,** the riverside grape, *Vitis vulpina*: so called in the western U. S.—**Ashy grape.** Same as *downy* ★*grape*.—**Bear's-grape.** See *bearberry*, 1.—**Bitter-rot of grape.** See ★*bitter-rot*.—**Blue grape,** *Vitis bicolor*, a high-climbing vine of the eastern United States, having the leaves bluish-glaucous, especially on the under surface, and the berries bluish-black with a bloom.—**Chytridiose of grape.** See ★*chytridiose*.—**Downy grape,** *Vitis cinerea*, having downy or floccose pubescent leaves and young shoots, and small, pleasantly acid berries. It is found along streams from Nebraska to Texas, and also in Florida.—**Gippsland grape,** in Victoria, same as *native* ★*grape*.—**Grape family,** the plant-family *Vitaceæ*.—**Grape seed-worm.** See ★*seed-worm*.—**Leaf-blight of grape.** See ★*leaf-blight*.—**Macquarie Harbor grape,** in Tasmania, a climbing shrub of the buckwheat family, *Calicinum adpressum* (*Muehlenbeckia adpressa* of Meisner), which bears small pink flowers in panicled spikes, followed by currant-like subacid fruits which are used for tarts, puddings, and preserves. Also called *Macquarie Harbor vine* and, in Australia, *native ivy*.—**Native grape,** in Australia, an evergreen climber, *Cissus hypoglauca*, which bears black edible fruits the size of cherries. Called *Gippsland grape* in Victoria.—**Oil of grapes.** See ★*oil*.—**Oregon grape.** See *Berberis*.—**Peruvian wild grape,** *Chondrodendron tomentosum*, a climbing plant belonging to the moonseed family, with leaves 5-nerved at the base, and clusters of flowers which grow from the leaf-axils or from the old wood of the stem. The fruit resembles bunches of grapes, from which are derived the Spanish name *uva del monte* (used in Peru) and the Portuguese *pareira brava* (of the Brazilians), both of which signify 'wild grape.' The root of this plant is the true *radix pareiræ bravæ* used in medicine. See *pareira*.—**Port Jackson grape.** Same as *kangaroo-vine* or *kangaroo-grape*. It is a tall woody climber of eastern Australia which bears globular black berries.—**Possum-grape,** the frost grape, *Vitis cordifolia*.—**Rocky Mountain grape.** Same as *Oregon* ★*grape*.—**Salt-grape,** the saltwort, *Salsola Kali*.—**Scald of grape.** See ★*scald*[1].—**Sea-grape.** (*c*) Same as *salt* ★*grape*. (*d*) See *sea-grape*, 2, 3.—**Small grape,** the summer grape, *Vitis æstivalis*.—**Sweet-scented grape,** the riverside grape, *V. vulpina*.—**Tail-grape.** See *tail-grape*.—**Winter grape,** a name sometimes given to the frost grape, the riverside grape, and the blue grape.

grape-cake (grāp'kāk), *n.* In *wine-manuf.*, the solid mass of grape-skins which remains after the juice is expressed; the marc.

grape-caterpillar (grāp'kat″ėr-pil-ăr), *n.* A caterpillar which feeds on the leaves of the grape-vine.—**Social grape-caterpillar,** the larva of an American pyromorphid moth, *Harrisina Americana*, which feeds gregariously on the leaves of the grape.

grape-curculio (grāp'kėr-kū″li-ō), *n.* A small curculionid beetle, *Craponius inæqualis*, which lays its eggs on young grape-berries in which its larvæ feed. Same as *grape-weevil* (*a*) (which see, under *weevil*).

grape-eater (grāp'ē″tėr), *n.* Same as ★*fig-eater*.

grape-essence (grāp'es″ens), *n.* An artificial fruit-essence composed of chloroform, various ethers, tartaric acid, and other components: used as a flavoring agent.

grape-fleck (grāp'flek), *n.* See ★*scald of grape*.

grape-fly (grāp'flī), *n.* One of the fruit-flies, *Drosophila ampelophila*, which breeds in grape pomace and also in preserved fruits and wine.

grape-fungus (grāp'fung″gus), *n.* One of the molds, *Oïdium Tuckeri*, which attack grape-vines. Also called *vine-mildew*. See *mildew*, 1, and *grape-mildew*.

grape-hopper (grāp'hop″ėr), *n.* The grape-vine leaf-hopper, *Erythroneura vitis*.

Grape-leaf blight, gall-louse. See ★*blight*, ★*gall-louse*.

grape-scale (grāp'skāl), *n.* A diaspine scale-insect, *Aspidiotus uvæ*, which feeds on grape-canes in the United States, Jamaica, and parts of Europe.

grape-slug (grāp'slug), *n.* The larva of the grape-vine saw-fly.

grape-stone, *n.* **2.** Same as *botryolite*.

Grape-trellis cup. See ★*cup*.

grape-vine, *n.* **2.** In *wrestling*, a lock in which the arm or leg is twined around that of the opponent.—**Grape-vine aphis,** *Siphonophora viticola*, an aphis destructive to the leaves and young shoots of the grape-vine in the middle and southern United States.—**Grape-vine apple-gall, bark-louse, filbert-gall, leaf-roller, root-borer, root-worm, saw-fly.** See ★*apple-gall*, etc.—**Grape-vine grass.** See *vine-*★*mesquit*.—**Green grape-vine sphinx.** See ★*sphinx*.

grape-worm (grāp'wėrm), *n.* Same as *grape seed-worm* (which see, under ★*seed-worm*).

graph[1], *n.* **2.** A curve as representing an equation or function.—**3.** A line drawn through a series of points whose position has been already determined.—**4.** A representation by points on or in a lattice. *Sylvester.*—**5.** The point of a link-motion which describes any curve. *Kempe.*—**Essential graphs,** a system of graphs for logical analysis of which the chief characteristic is that if two assertions are written at once on the sheet the effect is the assertion that one or the other is true.—**Graph of an equation,** the line obtained by making a diagrammatic representation of an equation with the aid of a system of coördinates; the geometric picture or map of an equation.—**Graph of a function,** the line plotted when a function is considered as the ordinate of its argument as abscissa.—**Graph of the function f (x),** the curve whose equation is $y = f(x)$.

graph[1] (gråf), *v.* **I.** *trans.* To draw a curve representing (a given equation or function).

II. *intrans.* To trace graphs.

graph[2] (gråf), *n.* [Detached from compounds ending in *-graph*.] Any apparatus for duplicating drawings or writings by printing from a gelatinous surface. [Colloq.]

graphic, *a.* **7.** Concerned with or using graphs.—**Graphic intergrowth, texture.** See ★*texture*.

Graphiola (gra-fī'ō-lä), *n.* [NL. (Poiteau, 1824), < Gr. γραφεῖα, writing, + dim. *-ola*. The leaves affected by it have the appearance of being written upon.] A genus of fungi of doubtful relationship, but usually referred to the *Ustilagnales*, having the spore-mass surrounded by a black outer and an inner thin peridium. The spores are produced upon lateral cells of the fertile hyphæ. The species are few and occur as parasites on palm-leaves. *G. Phœnicis* is a common species on *Phœnix dactylifera* in hothouses.

graphiological (graf″i-ō-loj'i-kal), *a.* Relating or pertaining to graphiology.

graphite[1], *n.*—**Acheson graphite,** graphite artificially made from coke or other amorphous carbon, by the Acheson process, in an electric furnace in the presence of a small quantity of silicon.—**Artificial graphite,** graphite produced artificially, on an industrial scale, by heating intensely in an electric furnace coke or some other form of amorphous carbon along with a small proportion of silicon or silicon carbide, this addition apparently being necessary to bring about the crystallization of the carbon.—**Baraga graphite,** the graphitic or carbonaceous schist produced in Baraga county, in the northern peninsula of Michigan.—**Graphite black.** See ★*black*.

Graphitic acid, a bright yellow compound, $C_{11}H_4O_5$, obtained by the oxidation of Ceylon graphite with potassium chlorate and nitric acid. It crystallizes in lustrous needles which become incandescent and explode when heated. It is formed, in small quantity, by the electrolysis of mineral acids when the positive electrode is graphite.—**Graphitic carbon.** See ★*carbon*.

graphitite (graf'i-tīt), *n.* [*graphite* + *-ite*[2].] In *min.*, a name proposed for such specimens of graphite as do not intumesce on being moistened with concentrated nitric acid and then strongly heated. This peculiarity is probably explained by the small, compact character of the crystals and is hence not essential. It is very doubtful whether graphite and graphitite really represent, as has been supposed, two distinct forms of carbon.

graphitization (graf″i-tī-zā'shọn), *n.* [*graphitize* + *-ation.*] **1.** Conversion of amorphous carbon or of the diamond into graphite by exposure to a very high temperature. See *artificial* ★*graphite*. *Electrochem. Industry*, March, 1904, p. 108.—**2.** The operation of covering the surface of an object with graphite. See ★*graphitize*, 2.

graphitize (graf'i-tīz), *v. t.*; pret. and pp. *graphitized*, ppr. *graphitizing*. [*graphite* + *-ize.*] **1.** To convert into graphite (either of the two other forms of carbon) by exposure to a very high temperature. Industrially the process is applied to amorphous carbon. See *artificial* ★*graphite*. *Electrochem. Industry*, June, 1904, p. 237.—**2.** To cover (the surface of an object) with graphite. This may be done by the direct application of graphite or, in the case of organic substances, by heating them in absence of air until the outer surface is converted into graphite, as is done with the filaments of incandescent lamps.

graphitoid, *a.* **II.** *n.* A form of graphite, occurring in certain schists, supposed to be peculiar in its readier combustibility. This, however, is probably due to the minute size and purity of the scales.

Graphium[2] (graf'i-um), *n.* [NL. (Corda, 1837), < Gr. γραφεῖον, a painter's brush or pencil.] A genus of hyphomycetous fungi having the fertile hyphæ closely united into an elongate stipe-like fascicle and bearing at the summit simple hyaline conidia. Over 60 species have been described, occurring mostly on decaying vegetable matter.

graphokinesthetic (graf″ō-kin-es-thet'ik), *a.* In *psychol.*, pertaining to the sensations aroused by the movements of writing. *Psychol. Rev. Mon. Sup.*, xiv. 26.

graphologic (graf-ō-loj'ik), *a.* [*graphology* + *-ic.*] Of or pertaining to graphology.

graphomania (graf-ō-mā'ni-ạ), *n.* [Gr. γραφή, writing, + μανία, madness.] A morbid impulse to write or compose.

graphomaniac (graf-ō-mā'ni-ak), *n.* [*graphomania* + *-ac.*] One who is constantly writing, either letters to friends or to the newspapers, or stories and works of fiction, driven thereto either by an exaggerated idea of the importance of what he writes or by an insane impulse.

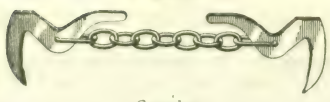
> We have just been considering, in madmen, the substantial character of genius under the appearance of insanity. There is, however, a variety of these, which permits the appearance of genius and the substantial character of the average man; and this variety forms the link between madmen of genius, the sane, and the insane properly so called. These are what I call semi-insane persons or mattoids. . . . The *graphomaniac*, representing the commonest variety, has true negative characteristics—that is to say, the features and cranial form are nearly always normal.
>
> *C. Lombroso* (trans.), Man of Genius, p. 209.

graphon (graf'on), *n.* [*graph(ite)* + (*carb*)*on.*] In *chem.*, a name given by Brodie to carbon in the form of graphite, which he assumed to represent a peculiar radical, capable of producing graphitic acid, while amorphous carbon and diamond do not yield a similar product.

graphostatical (graf-ō-stat'i-kạl), *a.* [*graph*(*ic*) + *statical.*] Pertaining to or using graphical statics.

> Great care was taken by experts in making the most correct mechanical and *graphostatical* calculations and investigations in order to settle the exact numerical value in length of the greatest permissible deflections at different parts, points, and cross-sections of the bridge.
>
> *Sci. Amer. Sup.*, June 4, 1904, p. 23758.

graphotone (graf'ō-tōn), *n.* [Gr. γράφειν, write, + E. *tone.*] A photo-engraved plate in high relief, usually of zinc but sometimes of copper, prepared for printing with type on a type-printing press; also the print taken from a plate so made.



> The collotype process is worked universally, and is known by a variety of names; the Germans call it "Lichtdruck," the French "Phototypie," the Americans "Phototype," and we English have given it the titles of "Photoprint," "Heliotype," "Autotype," "Photophane," "Photo-mezzo-type," "*Graphotone*," etc.
>
> *Jour. Soc. Arts*, quoted in Sci. Amer. Sup., March 28, [1903, p. 22767.

graphotype, *n.* **2.** A type-writer for embossing letters upon thin sheets of metal to form type for use in an addressing-machine.—**3.** A form of type-casting and -setting machine.

> The Goodson *graphotype* machine . . . depends upon electricity for its successful operation. It is composed of two parts: a small table about the size of a type-writer desk, containing an ordinary typewriter, a perforating machine, and a dial similar to a clock; and a caster and setter.
>
> *Census Bulletin* 216, June 28, 1902, p. 59.

grapnel-hook (grap'nel-hůk), *n.* Same as *grapnel*, 1.

grapple, *n.* **7.** *pl.* (*a*) Small iron dogs, joined by a short chain, which are driven into logs near the end when skidding on mountains, so that several logs may be skidded by one

Grapples.

horse at the same time. Also called *chain-grapples*, *coupling-grab*. (*b*) See ★*skidding-tongs*.

grapple-hook (grap′l-hůk), *n.* Same as *grapnel*, 1.

Grapta (grap′tä), *n.* [NL. (Kirby, 1837), ‹ Gr. γραπτός, marked, painted, written, ‹ γράφειν, mark, write. The reference is to the markings on the under side of the hind wings, which resemble letters or punctuation-marks.] A genus of butterflies of the family *Nymphalidæ*, well represented in the United States by the comma butterfly, *G. comma*, the semicolon butterfly, *G. interrogationis*, *G. j.-album*, and others. Synonymous with *Polygonia*. *Huebner*, 1816.

Graptolitoidea (grap″tō-li-toi′dē-ä), *n. pl.* [NL., ‹ *graptolite* + Gr. εἶδος, form.] An organic division including the graptolites, an extinct group of *Hydrozoa*.

graptoloid (grap′tō-loid), *a.* [*graptol(ite)* + *-oid*.] Related to, characteristic of, or resembling the graptolites.

Graptoloidea (grap-tō-loi′dē-ä), *n. pl.* [NL. irreg. ‹ **graptoli(thus)*, graptolite + Gr. εἶδος, form.] A suborder of the graptolites, comprising the graptolites proper, characterized by the symmetric structure of the rhabdosomes, the lack of differentiation of the thecæ, and the solid periderm. They appear at the end of Cambrian time, attain their first culmination in the middle Lower Silurian with axonolipous forms, and a second such period in the Upper Silurian with axonophorous forms. Their rapid development and variation at succeeding geological horizons and their wide horizontal distribution make them important index-fossils.

graptomancy (grap′tō-man-si), *n.* [Gr. γραπτός, written, + μαντεία, divination.] Divination by handwriting.

graptotheca (grap-tō-thē′kä), *n.*; pl. *graptothecæ* (-sē). [Gr. γραπτός, marked (see *graptolite*) + θήκη, a box.] One of the thecæ or zoöid receptacles of the graptolites.

grass, *n.* **7.** In *printing*, temporary employment. [Eng.]—**Aleppo grass.** Same as *Johnson* ★*grass*.—**Angola grass,** *Panicum spectabile*, a stout species somewhat resembling the barn-yard grass, introduced from Africa into the lowlands of Brazil. It is represented as a productive and nutritious fodder grass.—**Aparejo-grass,** *Sporobolus utilis*, a slender, wiry, much-branched species which grows in Mexico and adjacent parts of the United States, in swampy places along streams. The name refers to its use in stuffing the aparejo (which see).—**Arctic grass.** Same as *rescue-grass*.—**Arrow-grass.** (*a*) See *arrow-grass*. (*b*) The esparto, *Stipa tenacissima*.—**Artificial grass,** a leguminous plant grown for forage. [Great Britain.]

> The term *artificial grasses* is usually applied to clovers and their allies. *Fream*, Complete Grazier, p. 930.

Austin grass. Same as *Texas* ★*millet*.—**Barcoo grass,** *Iseilema Mitchellii*, an excellent pasture grass of western and southern Australia, New South Wales, and Queensland: named from a river in the last-named colony.—**Bear-grass.** (*a*) See *bear-grass*. (*b*) See ★*bear-grass*, 2. (*c*) In the northwesern United States, *Xerophyllum tenax*. Its very slender and tough leaves, 2 or 3 feet long, were used by the Indians in making water-tight baskets. This is the bear-grass of Lewis and Clark. Also called *squaw-grass* and *squaw-lily*, and, in Idaho, *pine-lily*. See *Xerophyllum*.—**Bermuda grass.** See *grass*. This grass produces seed freely in warm countries, but in the United States only at the extreme south. By the use of imported seed it is found practicable to set aside the laborious method of propagating by cuttings, provided the seed is sown in the cool and moist season. See *St. Lucie's* ★*grass*.—**Bhabur grass,** *Ischæmum angustifolium*, an Indian grass which possesses valuable technical qualities similar to those of esparto. It forms the chief raw material for paper-making in India, and is also used for ropes, strings, and mats.—**Blow-out grass.** See ★*blow-out*.—**Bluejoint-grass.** See *bluejoint-grass*. The common bluejoint-grass, *Calamagrostis Canadensis*, ranges across northern North America, extending south to North Carolina, New Mexico, and California. It inhabits moist meadows and, when abundant, is highly prized for hay. It succeeds well in cultivation. In the northern Rocky Mountains it is replaced by the subspecies *acuminata*, the mountain bluejoint-grass. The name (often simply *bluejoint*) extends to the other species of the genus, several of which, in Wyoming, etc., are also valuable for forage. Northern bluejoint, *C. Langsdorffii* (also called *Langsdorff's reed-bent* and by stockmen *purpletop*), is highly prized where plentiful. The bluejoints are also called *reed-grass*. See *pine-*★*grass*.—**Bottom-grass.** (*a*) See *bottom-grass*. (*b*) Same as *Texas* ★*millet*.—**Bull-grass.** (*a*) Same as *gama-grass*. (*b*) The freshwater cord-grass, *Spartina cynosuroides*.—**Candy-grass.** Same as ★*stink-grass*.—**Catch-fly grass,** a marsh-grass, *Homalocenchrus lenticularis*, which ranges along the coast from Virginia to Texas and up the Mississippi valley to Illinois. According to Pursh, this grass catches flies by means of its ciliate glumes in the same manner as *Dionæa*.—**Charleston lawn-grass.** See *St. Augustine* ★*grass*.—**Colorado grass.** Same as *Texas* ★*millet*.—**Crested dog's-tail grass.** Same as *dog's-tail grass* (*a*) (which see, under *grass*). See also *Cynosurus*. This is, at least in Europe, a standard grass in mixtures for permanent pasture, and is also sown alone for lawns, forming an even and compact sod and bearing shade. The ripened straw is one of the best used in the manufacture of Leghorn hats.—**Crop-grass,** the yard-grass or wire-grass, *Eleusine Indica*: perhaps a corruption of *crab-grass*.—**Cuba grass.** See *sorghum*, 2.—**Dennett grass,** one of the wild ryes, *Elymus striatus*, of some value as forage. It is diffused over the eastern half of the United States, growing along the borders of woods, etc.—**Dog-town grass,** the needle-grass, *Aristida fasciculata* (also *A. longiseta*). The name alludes to the presence of this grass in prairie-dog colonies.—**Duck-grass,** the false redtop, *Poa flava*.—**Dutch grass.** (*a*) The couch-grass, *Agropyron repens*. (*b*) The wire-grass or yard-grass, *Eleusine Indica*.—**Egyptian grass.** Same as ★*crow-foot-grass*, 1.—**Elm-grass,** in Texas, the low panic-grass, *Panicum prostratum*, which affords forage in wooded bottom-lands. It is found in the tropics of both hemispheres and, in the United States, along the Gulf coast from Alabama westward.—**Evergreen grass.** See *oat-grass*, 2.—**Everlasting grass,** *Monachne punctata* (*Eriochloa punctata* of Hamilton), a tropical grass which extends, in low rich land and on prairies, into the southwestern United States. It is a smooth and somewhat succulent perennial, from 2 to 4 feet high, enduring drought well: a valuable pasture and hay grass. The Mexican everlasting grass, *Monachne aristata* (*Eriochloa aristata* of Vasey), has been tested in the southern United States, where it is found to yield two good crops of hay annually.—**Floating grass,** *Hydrochloa fluitans*, a slender aquatic grass of the Gulf States. In shallow water the summits emerge; in deeper water the upper leaves are floating. The tender herbage is eaten by stock.—**Fly-away grass,** one of the hair-grasses, *Agrostis hyemalis*. The name alludes to the breaking off and blowing away of the ripe panicle. Also called *tickle-grass*.—**French grass.** (*b*) The sainfoin psoralea, *Psoralea Onobrychis*, an American plant somewhat resembling the sainfoin, found from Ontario to South Carolina and westward to Missouri. It has trifoliolate leaves, long racemes of purplish flowers, and transversely wrinkled pods.—**Gilbert's relief-grass.** Same as *southern* ★*canary-grass*.—**Good-Friday grass,** the wood-rush, *Juncoides campestre*.—**Grape-vine grass.** See *vine-*★*mesquit*.—**Grass saw-fly.** See ★*saw-fly*.—**Green grass,** the Kentucky blue-grass, *Poa pratensis*. [Pennsylvania, U. S.]—**Green valley-grass.** Same as *Johnson* ★*grass*.—**Guatemala grass.** Same as *teosinte*.—**Gumbo grass,** the Western wheat-grass. See ★*wheat-grass*. The name doubtless alludes to 'gumbo soil.'—**Hard-grass.** (*a*) See *hard-grass*. (*b*) See *St. Augustine* ★*grass*.—**Hassock-grass.** See *tufted* ★*hair-grass*.—**Horseshoe-grass.** See ★*side-oats*.—**Indian grass.** (*a*) A tall grass with yellow-brown nodding panicles, *Sorghastrum avenaceum*: diffused over the United States east of the Rocky Mountains, and also found in Ontario, Mexico, and South America. It is little valued eastward, but in the western United States (there called *bushy blue-stem*) it makes an excellent hay, especially by virtue of its abundant long rootleaves. Also called *reed-grass*. (*b*) A brown-sedge a foot or two high, *Andropogon scoparius*, valued for grazing in the mountains of the southern United States. In the West (where it is called *little blue-stem*) it is less valued than the former for hay.—**Japanese grass.** Same as *Japanese* ★*wheat-grass*.—**Johnson grass.** See *sorghum*, 2.—**Knot-root grass,** *Muhlenbergia Mexicana*, a species serving to bind the soil of river-banks by its rootstocks, and affording in low ground considerable hay, good if cut before the stems become woody. It is widely diffused northward and eastward in North America.—**Lace-grass,** *Eragrostis capillaris*, a species of no economic value which bears a large panicle with hair-like branches and pedicels. It is widely diffused in dry, sandy places east of the Mississippi.—**Lawn grass.** See ★*lawn-grass*.—**Lizard-tail grass,** a much-branched leafy annual, *Hackelochloa granularis*, which bears numerous slender spikes. It is found as a weed in all tropical countries, and extends into the warmer parts of the southern and southwestern United States.—**Louisiana grass,** the carpet-grass, *Paspalum compressum*.—**Means grass.** See *sorghum*, 2.—**Mission-grass.** See *St. Augustine* ★*grass*.—**Mitchell grass,** any one of several species of Australian grasses of the genus *Astrebla*, especially *A. elymoides* and *A. triticoides*. The flowering spikes resemble ears of wheat and are said to have highly fattening qualities. This grass is drought-resistant and is considered one of the most valuable for fodder. It is also used for food by the natives.—**Molasses-grass,** a sweet and highly nutritious grass, *Melinis minutiflora*, native in Brazil and occurring also on Ascension Island and in Natal and Madagascar. It is the most esteemed grass of central Brazil and is regarded as excellent for dairy-cows. It has been introduced for trial in the warmer and drier parts of the United States.—**Moss-grass,** a tufted grass, *Coleanthus subtilis*, found in wet places in the northern parts of the Old World and in northwestern North America, reaching into Washington and Oregon. It grows only from ¾ to 2½ inches high.—**Munro grass,** a panic-grass, *Panicum agrostoides*, common in wet ground throughout the eastern half of the United States. It is a rather stout grass with clustered stems and lateral as well as terminal panicles, somewhat resembling those of the redtop, *Agrostis alba*. It grows best on land too wet for mowing, but is valuable for pasture. Also called *panic-bent*.—**Palm-leafed grass,** a broad-leafed perennial grass, *Panicum plicatum*, 3 or 4 feet high, native in India. On account of its elegantly striate, usually plaited leaves, it is a favorite greenhouse ornamental plant. Also, the larger South American *P. sulcatum*, with palm-like leaves from 1 to 2 inches broad and from 16 to 20 inches long, cultivated in greenhouses and on lawns.—**Pimento-grass.** See *St. Augustine* ★*grass*.—**Pine-grass,** one of the bluejoint-grasses, *Calamagrostis Sukedorfii*, common in the extreme northwestern United States in low pine woods and on moist mountain slopes. It presents the qualities of a good hay or pasture grass.—**Quivering grass.** Same as *Indian* ★*millet*.—**Range-grass.** Same as *vine-*★*mesquit*.—**Rat-tail grass,** any of the American species of the genus *Manisuris*: so called from their slender cylindrical spikes. They are of little agricultural value, except perhaps *M. fasciculata*, of the lower Rio Grande in Texas, which is closely related to the mat-grass of Australia. See ★*mat-grass*.—**Redfield's grass.** See ★*Redfieldia*.—**River-grass.** Same as *Texas* ★*millet*.—**St. Augustine grass.** See *Stenotaphrum* and *saint*[1]. This grass, widely distributed in South America and on the Pacific islands, grows along the Atlantic coast from Florida to South Carolina. It quickly covers sandy yards with a dense, carpet-like growth, where the usual lawn-grasses will not grow. From its extensive use in Charleston for this purpose it has the name *Charleston lawn-grass*. Also called *mission-grass*, *shore-grass*, in Jamaica *pimento-grass*, and in Australia *buffalo-grass*. In South America its creeping stems are employed as a diuretic.—**St. Lucie's grass,** in Florida, a variety of the Bermuda grass, preferred to the ordinary plant for lawns as resisting less deeply and being less liable to invade neighboring fields.—**St. Mary's grass.** (*a*) Same as *Johnson* ★*grass*. (*b*) Same as *guinea-grass*.—**Salem grass.** The velvet-grass. See *Holcus*.—**Salt-marsh grass,** *Spartina stricta* and *S. patens*. The latter is also called *salt-meadow grass* and *fox-grass*. Sometimes simply *marsh-grass*.—**Schrader's grass, Schrader's brome-grass.** Same as *rescue-grass*.—**Shore-grass.** Same as *St. Augustine* ★*grass*.—**Simpson's grass.** Same as *maiden-*★*cane*.—**Six-weeks grass,** in the southwestern United States, the low spear-grass, *Poa annua*; also, any low quick-growing annual grass, as the six-weeks grama. See ★*grama*.—**Slough grass.** See ★*slough-grass*.—**Spring grass.** Same as *vernal grass* (which see, under *vernal*).—**Spur-grass,** the bur-grass, *Cenchrus echinatus*. See *hedgehog-grass*.—**Squaw-grass.** Same as *bear-*★*grass* (*c*).—**Summer grass,** the low, annual spear-grass, *Poa annua*.—**Sweet-scented grass.** Same as *vernal grass* (which see, under *vernal*).—**Syrian grass.** Same as *Johnson* ★*grass*.—**Three-awned** or **triple-awned grass,** any species of the genus *Aristidia*. See ★*needle-grass*, 1, and *poverty-grass*.—**To bring to grass.** See ★*bring*.—**Yellow grass.** Same as *bog-asphodel* (which see, under *asphodel*).—**Yellow-eyed grass.** See *yellow-eyed*.

grass, *v.* **I.** *trans.* **5.** In *printing*, to discharge (a workman). [Eng.]

II. *intrans.* **2.** In *printing*, to seek or give temporary employment. [Eng.]

grass-bug (grȧs′bug), *n.* Any one of many species of leaf-hoppers which occur in pastures or meadows, *Diedrocephala mollipes*.

grass-cold (grȧs′kōld), *n.* Inflammation of the lining-membrane of the nose of horses, an affection readily amenable to treatment. Also called *nasal catarrh* and *coryza*.

grass-comber (grȧs′kō″mėr), *n.* A landsman who is making his first voyage at sea; a novice who enters naval service from rural life.

grass-crab (grȧs′krab), *n.* A Jamaican and South American crab, *Pseudocrystes armatus*.

grassed (grȧst), *a.* Said of a golf-club of which the face is slightly spooned or sloped backward.

grasserie (grȧs′ė-ri), *n.* [F.] A disease of the silkworm of commerce. The diseased worms become restless, bloated, and yellow in color, and when punctured exude a pus full of granular polyhedral crystals. *U. S. Dept. Agr.*, Div. Entom., Bulletin 39, N. S., p. 31.

grass-fern (grȧs′fėrn), *n.* See ★*fern*[1].

grassfinch, *n.* **3.** In Australia, any of the small finches of the genus *Poephila*.

grass-flower (grȧs′flou″ėr), *n.* **1.** A plant of the genus *Sisyrinchium*, especially *S. angustifolium*, with narrow grass-like leaves; blue-eyed grass.—**2.** The spring-beauty, *Claytonia Virginica*.

grass-hand, *n.* **2.** A newly engaged type-setter. [Printers' slang, Eng.]

grasshopper, *n.* **4.** A chaise of which the body is suspended by braces to the rear ends of wooden springs.—**5.** A mechanical arrangement for connecting the sucker-rods of several contiguous petroleum wells with a single steam-engine or other source of motive power. *Groves and Thorp*, Chem. Technol., II. 163.—**Cone-nosed grasshopper,** any one of the wingless locustids of the genus *Conocephalus*.—**Grasshopper-disease fungus.** See ★*fungus*.—**Meadow-grasshopper,** any one of the common field-inhabiting, long-horned grasshoppers of the family *Locustidæ*, as distinguished from the katydids, the cricket-like grasshoppers, and the shield-backed grasshoppers.

grasshopper-elevator (grȧs′hop″ėr-el″ē-vā-tor), *n.* See *derrick-*★*elevator*.

grasshopper-mouse (grȧs′hop″ėr-mous), *n.* Any one of several species of small mice of the genus *Onychomys*, common in the northwestern United States, especially *O. leucogaster*. The food of these mice consists largely of grasshoppers: hence the name.

grasshopper-spring (grȧs′hop″ėr-spring), *n.* See ★*spring*.

grass-house (grȧs′hous), *n.* **1.** The cottage of a cotter or grass-man.—**2.** Same as ★*grass-hut*.

grass-hut (grȧs′hut), *n.* A hut the roof and sides of which are made of thatch, bundles, or mats of grass, common in tropical regions.

grass-ill (grȧs′il), *n.* An intestinal disease of lambs arising from the malassimilation of food at a time when they first make grass a part of their diet.

grassing, *n.* 2. The act or practice of working for a second employer elsewhere, after working the regular time for one's principal employer: so called by trade-unions, which rule out the practice in order to increase the opportunities for men who are out of work. Also called *smooting* and *foxing*. *Webb*, Indust. Democracy, I. 439.

grass-land, *n.* 2. In *phytogeog.*, land naturally covered with grass, viewed œcologically. Grass-land is regarded by Schimper as one of three great types of climatic formation. He subdivides it into *meadow*, hygrophilous or tropophilous grass-land; *steppe*, xerophilous, treeless grass-land; and *savanna*, xerophilous grass-land with isolated trees.

grass-lawn (gràs'lân), *n.* A light, fine cotton or linen fabric of open texture for women's dresses.

grass-man (gràs'man), *n.* 1. A peasant living in a cottage. [Scotch.]—2. The person in charge of the common lands of the parish. [Scotch.]

grass-moth, *n.*—**Knot-grass moth**, a British collectors' name for a European and Asiatic noctuid moth, *Apatela rumicis*, whose larvæ live on many low herbaceous plants.

grassnut, *n.* 2. In California, one of the brodiæas, *Triteleia laxa*, common on adobe soils. It bears an umbel of 10 to 25 beautiful violet-purple flowers. The stem rises from a deep-seated edible corm, to which the name, usually in the plural, applies. Also called *Ithuriel's-spear* (which see).

grass-oil, *n.* Much has been learned of late years in regard to the chemical composition of the fragrant grass-oils which hold a prominent place in modern perfumery. The most important constituents are an alcohol, geraniol ($C_{10}H_{18}O$), in Indian grass-oil or palmarosa oil, from *Andropogon Schœnanthus;* an aldehyde, geranial or citral ($C_{10}H_{16}O$), in lemon-grass oil, from *Andropogon citratus;* and another aldehyde, citronellal ($C_{10}H_{18}O$), in citronella-oil, from *Andropogon Nardus*.

grass-pink (gràs'pink), *n.* 1. See under *pink*[2]. 2. The *Deptford* pink, *Dianthus Armeria*.

grass-staggers (gràs'stag″ėrz), *n.* 1. See *stagger*.—2. A frequently fatal disease of sheep and cattle, due to impaction of food in the third stomach. Animals suffering from it are said to be *fardel-bound*. See *fardel-bound*.—3. Cerebro-spinal meningitis or forage-poisoning of horses. [Eng.]

grass-tree, *n.* 2. In Australia, a tree of the lily family, *Kingia australis*, resembling species of *Xanthorrhœa*.—3. In Tasmania, either of two trees of the family *Epacridaceæ*, *Cystanthe dracophylla* and *C. pandanifolia*, the latter usually called *giant grass-tree*, and often raising its long, slender, naked stems, which bear one or several huge crowns of long waving leaves, far above the surrounding vegetation.—4. In New Zealand: (*a*) A tree of the family *Araliaceæ*, *Pseudopanax crassifolius*, with very variable leaves, those of the young plants being from one to three feet long and but half an inch wide. It is then usually called *umbrella-tree*, from the way in which the rib-like leaves stand out. (*b*) A name formerly given to the ti, *Tætsia australis*.

grass-walk (gràs'wâk), *n.* A garden-path covered with grass, instead of gravel.

> The *grass-walk* with its semicircular end forms the whole extent of the Cetinale garden.
> *E. Wharton*, Italian Villas, p. 66.

grass-weed (gràs'wēd), *n.* Same as *grass-wrack*.

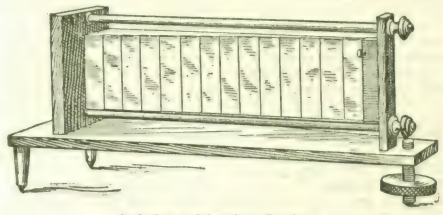
grass-work (gràs'wėrk), *n.* In *mining*, any operation which is performed above ground.

grass-worker (gràs'wėr″kėr), *n.* In *mining*, one who works above ground.

grass-worm, *n.*—**Northern grass-worm**, the larva of an American noctuid moth, *Drasteria erechtea*. It somewhat resembles a geometrid larva in its looping method of progression, and feeds by night on the leaves of grass and clover.

grate[2], *n.*—**Bodner's screw grate**, a valuable contrivance for economizing fuel and effecting the consumption of smoke in burning bituminous coal, especially under steam-boilers. Screws are used to keep the grate-bars in motion, regulating their distance apart, and rocking them in such a way as to prevent coking of the fuel and keep it free from ash and clinker. *Groves and Thorp*, Chem. Technol., I. 516.—**Inclined grate**, a grate in which the bars are inclined at a slight angle so that the fuel, when fed to the furnace, slides downward into the back or hottest part of the fire, giving up its more volatile gases first, then coking and sliding down the grate until consumed.—**Sectional grate**, a grate in which the bars are arranged in groups or sections, for convenience in stoking and in making repairs.

grate-ring (grāt'ring), *n.* A circular casting which in the fire-box of a house-furnace forms the support for a round-, rocking-, dump-, or shaking-grate.



graticulate (grā-tik″ū-lāt), *v. t.*; pret. and pp. *graticulated*, ppr. *graticulating*. [See *graticulation*.] To divide (a drawing or design) into squares.

gratification, *n.* 4. Any reward in money given to soldiers for good conduct in a battle or campaign; an allowance made to prisoners of war; a voluntary contribution made by soldiers to the widows of comrades.

gratin (gra-tañ'), *n.* [F., < *gratter*, scrape, grate: see *grate*[2].] 1. A browned crust.—2. Food served in a rich sauce and covered with browned crumbs.

gratinate (grat'i-nāt), *v. t.*; pret. and pp. *gratinated*, ppr. *gratinating*. [*gratin* + *-ate*[2].] To cook in a rich sauce and cover with a crust of browned crumbs.

grating[2], *n.*—**Concave grating**, a diffraction grating the lines of which are ruled upon the surface of a concave mirror so that the spectra may be focused without the interposition of a lens. This important type of grating was introduced by Rowland in 1882, and is commonly known as the *Rowland concave grating*.—**Diffraction grating.** See *diffraction*.—**Echelon diffraction**

Echelon Diffraction Grating.

grating, an apparatus devised by Michelson to replace the ruled grating in a spectroscope, particularly in that form known as the constant deviation spectroscope, where the collimator and the telescope remain stationary and the grating is rotated. The echelon consists of a series of plane-parallel glass plates, each 10 millimeters thick, overlapping in such a way as to form a series of steps, each 1 millimeter wide. The plates, fourteen or more in number, all optically worked and in perfect optical contact, are mounted in a frame. The parallel rays of a beam of transmitted light emerge, because of their retardation, in a condition to interfere.—**Nobert grating**, a diffraction grating ruled by Nobert.—**Rutherford grating**, in *optics*, a plane-diffraction grating ruled upon metal. The term is commonly used to designate gratings ruled by means of Rutherford's dividing-engine, as distinguished from those later produced with the engines devised by Rowland.—**Transmission grating**, a finely ruled piece of glass or other transparent material, such as celluloid, showing a spectrum by transmitted light, in contradistinction to a ruled metal surface which gives a spectrum by reflected light. *Astrophysical Jour.*, Sept., 1903, p. 101.

Gratiolet's radiations. See ★*radiation*.

gratiolin (grā-tī'ō-lin), *n.* [*Gratiola* + *-in*[2].] A bitter glucoside, $C_{40}H_{68}O_{14}$ (?), extracted from hedge-hyssop, *Gratiola officinalis*. It crystallizes in silky lustrous needles melting at 200° C.

grattage (gra-täzh'), *n.* [F., < *gratter*, grate: see *grate*[1].] The process of scraping out the interior of the uterus with a brush having short, stiff bristles: resorted to as a substitute for curettage.

gratuity, *n.* 2. In the British service, money paid to soldiers on reënlistment and to good-conduct soldiers on discharge.

graupel (grou'pel), *n.* [G.] A form of soft hail or half-melted snow or sleet.

grave[2], *n.*—**Passage grave**, in *prehistoric archæol.*, a prehistoric grave in Europe, consisting of a dolmen or a stone burial chamber to which a covered passage leads.—**Stone grave**, in *prehistoric archæol.*, a grave the sides of which are lined with stones and which is covered with a slab, or slabs, of stone.

gravel, *n.*—**Buchanan gravels**, a subdivision of the Pleistocene deposits of Iowa. They are weathered gravels deposited during the melting and retreat of the Kansan ice, and are underlain by Kansan drift and overlain by Iowan drift or by loess.—**Cannon-shot gravel**, accumulations of glacial gravel, chiefly of rounded flints which occur in Norfolk and adjacent tracts in southeastern England.—**Plateau-gravel**, a glacial deposit resting on boulder-clay and accumulated in sheets over the plains and plateaus of northern Europe.

gravel-car (grav'el-kär), *n.* A tip-car or flat-car used to transport loose gravel. Such cars are sometimes fitted with a double mold-board plow, on a guide-rail, which, when the train is at rest, can be drawn, by means of a steel rope wound by the engine, over the cars, thus discharging the gravel on each side. See ★*car-unloader*.

gravel-weed (grav'el-wēd), *n.* 1. The false gromwell, *Onosmodium Virginianum*.—2. The bush-honeysuckle, *Diervilla Diervilla*.

grave-wax (grāv'waks), *n.* Same as *adipocere*.

gravicembalo (grä-vi-chem'bä-lō), *n.* [An alteration simulating It. *grave*, grave, of *clavicembalo*, q. v.] A harpsichord.

gravied (grā'vid), *a.* [*gravy* + *-ed*[2].] Served in or with gravy.

gravific (gra-vif'ik), *a.* [L. *gravis*, heavy, + *-ficus*, < *facere*, make.] Weight-producing. *Edinburgh Rev.*, X. 147.

gravimeter, *n.* 3. Specifically, a copper vessel of one cubic foot capacity, with a heavy plate-glass cover, used in determining the density of large-grained gunpowder inclusive of the vacant spaces between its grains. See *gravimetric density of gunpowder*, under *density*.

gravimetric, *a.*—**Dupont gravimetric balance**, a balance specially constructed for convenient use in determining the gravimetric density of fine-grained gunpowder.

gravimetry (grā-vim'e-tri), *n.* [L. *gravis*, heavy, + Gr. *-μετρια*, < *μέτρον*, a measure.] The measurement of weight or the determination of the specific gravity of bodies.

graviperceptive (grav″i-pėr-sep'tiv), *n.* [L. *gravis*, heavy, + ML. **perceptivus*, perceptive.] Perceiving the attraction of gravity: a term noting the awareness or sense of verticality in animals, a quality analogous to geotropism and geotaxis in plants. *Jour. Roy. Micros. Soc.*, Oct., 1904, p. 545.

gravisensitive (grav-i-sen'si-tiv), *n.* [L. *gravis*, heavy, + NL. *sensitivus*, sensitive.] Sensitive to the attraction of gravity; geotropic.

> In a seedling, Phalaris canariensis, the apical part has only falling starch-grains, while lower down both forms occur, and correspondingly, we find that the seedling is *gravi-sensitive* throughout, but especially so at the apex.
> *Jour. Roy. Micros. Soc.*, Oct., 1904, p. 545.

gravitant (grav'i-tant), *a.* [NL. **gravitans*, ppr. of *gravitare*, gravitate: see *gravitate*.] Attractive: said of forces of the same type as that of gravity: opposed to *repulsive*.

gravitate, *v.* **II.** *trans.* To allow to fall or move downward under the action of gravitation; manipulate (as gravel, in diamond-mining) so that the heavier portions sink to the bottom.

Gravity chronoscope. See ★*chronoscope*.—**Gravity correction**, the correction of the observed reading of a mercurial barometer for the fact that for the same height of the mercurial column the variation in the force of gravity produces a variation in the pressure. The gravity correction reduces the observed height of the barometric column to what it would have been if the force of gravity had retained the standard value that it has at sea-level and latitude 45°. The aneroid barometer and the boiling-point hypsometer do not require correction for variation of gravity, but the table of vapor-tensions expressed in barometric heights does require such correction.—**Specific-gravity balance.** See ★*balance*.—**Standard gravity**, the value of the acceleration of gravity at some selected latitude and level which is taken as a standard in comparing the measurements of gravity made on different parts of the earth's surface. The latitude taken is frequently 45° and the level that of the surface of the sea.

gravity-return (grav'i-ti-rē-tėrn″), *a.* In *mech.*, noting an arrangement of parts such that the force of gravity returns them to their normal relations after displacement: as, a *gravity-return* gun-carriage—one in which the upper part is on inclined guides and returns to the outward firing-position by gravity after recoil from firing the gun.

gravity-valve (grav'i-ti-valv), *n.* A valve which is closed against a pressure by the force of gravity. *Elect. World and Engin.*, Dec. 12, 1903, p. 979.

gravivolumeter (grav-i-vol'ū-mē-tėr), *n.* [L. *gravis*, heavy, + E. *volumeter*.] A simple piece of apparatus by means of which the quantity or weight of a specimen of a gas may be determined with a fair degree of accuracy by a measurement of its volume under fixed conditions of temperature and pressure.

gravure (gra-vūr'), *n.* [F. *gravure*, < *graver*, engrave: see *grave*[1], *v.*] 1. Same as *photogravure*.—2. A print or plate produced by photogravure.

gray. **I.** *a.*—**Gray atrophy.** See ★*atrophy*.—**Gray matter** or **substance**, the cellular as distinguished from the fibrillar (white) portions of the central nervous system: same as *cinerea*.

II. *n.* 5. Unbleached cotton fabric; a piece of cotton or worsted cloth, in the natural color of the raw material, as it comes from the loom, before it is dyed or finished.—**Alsace gray.** Same as *methylene* ★*gray*.—**Benzo fast gray**, a direct coal-tar color, of unpublished constitution, which dyes unmordanted cotton bluish-gray shades from a slightly alkaline salt bath.—**Chicago gray**, a direct coal-tar color prepared by combining diazotized Chicago orange with one of the amido-naphthol-sulphonic acids.—**Direct gray.** (*a*) A direct coal-tar color of the disazo type, derived from tolidine. It dyes unmordanted cotton gray in a salt bath. (*b*) Same as *methylene* ★*gray*.—**French gray** a dull-gray mat finish of silver, first introduced by the French silversmiths.—**Malta gray.** Same as *methylene* ★*gray*.—**Methylene gray** a basic coal-tar color of unknown constitution, prepared by the oxidation of dimethyl-paraphenylene-diamine, or by boiling nitroso-dimethyl-aniline-hydrochlorid with water or alcohol. It dyes tannin-mordanted cotton gray, but also possesses

the property of dyeing unmordanted cotton. Also called *Alsace gray, direct gray, Malta gray, new* and *new fast gray*, and *nigrisine*.—**New** or **new fast gray.** Same as *methylene* ★*gray*.—**Oxford gray,** a mixed black-and-white (⅔ black, ⅓ white) woolen cloth.—**Payne's gray.** (*a*) An oil-color consisting of carbon-black, ocher, and French blue. (*b*) A water-color consisting of carbon-black, lake, and indigo.—**Pearl gray.** See *pearl-gray*.

gray-band (grā′band), *n.* A gray laminated quartzose sandstone of the Medina formation of western New York: used for flagstones.

graybeard-tree (grā′bērd-trē″), *n.* The fringe-tree, *Chionanthus Virginica*. Also called *old-man's-beard*.

grayish (grā′ish), *a.* [*gray* + *-ish*[1].] Somewhat gray; tending to gray.

grayling, *n.* **4.** In Australia, *Prototroctes mu-ræna*, of the family *Hoplochitonidæ*, a fish which remotely resembles the English grayling. Also called *cucumber-fish, cucumber-mullet, fresh-water herring*, and *Yarra herring*.—**5.** An American agapetid butterfly, *Cercyonis alope*, which occurs in several well-marked varieties. See below.—**Arctic grayling.** Same as *Alaskan grayling*.—**Blue-eyed grayling,** an American butterfly, *Cercyonis alope alope*, dark brown in color, with a yellowish band on the outer half of the fore wings and two black spots with bluish centers. Its larvæ feed on grass.—**Dull-eyed grayling,** an American butterfly, *Cercyonis alope nephele*, of northern distribution, resembling the blue-eyed grayling, but lacking the yellow band on the fore wings.—**Hybrid graylings,** intergradations between *Cercyonis alope alope* and *C. alope nephele*.—**Montana grayling,** a species of grayling, *Thymallus montanus*, found in the head waters of the Missouri river.

gray-nurse (grā-nėrs′), *n.* A species of small sand-shark, *Odontaspis littoralis*, of the family *Odontaspididæ*, widely distributed. [New South Wales.]

grayumo (grä-yö′mō), *n.* [A Porto Rican form (also *yagrumo*) of a native name, answering to Central Amer. *guarumo*, Mex. *guarumbo*, the *Cecropia*.] In Porto Rico, a name applied to several trees of palm-like aspect having a straight, slender trunk and a crown of large leaves, especially to *Didymopanax Morototoni*, of the ginseng family, and to *Cecropia peltata*, of the mulberry family. See ★*yagrumo*.

graziery (grā′zhėr-i), *n.* [*grazier* + *-y*[3].] The grazing business; the occupation of a grazier.

grease, *n.*—**Distilled grease,** a partially purified grease obtained by distilling with superheated steam 'Yorkshire grease' from wool and fatty materials which have been recovered from other sources.—**Engine-waste grease,** fatty or other lubricating material recovered (generally by the use of solvents) from cotton-waste or rags used to wipe the spindles, shafts, and other moving parts of machinery. Such material now consists so largely of mineral oils that in its recovered form it has little value for soap-making; but it is applied to making cart-axle grease and similar coarse lubricants.—**Foot grease.** (*b*) The sediment which is often deposited from an expressed fatty oil on standing. It consists mainly of impurities which have been in suspension, but necessarily retains along with these some of the oil.—**Fullers' grease.** See ★*fullers' grease*.—**Golden grease,** a bribe. [Slang. U. S.]—**Yorkshire grease,** a mixture of fatty acids recovered from the soap-liquors used in wool-scouring, with wool-grease from the raw material, and, sometimes, lubricating-oils from the spinning and weaving machinery: used in soap-making and for lubricating purposes.

grease-heels (grēs′hēlz), *n.* A specific affection of the heels of horses. Usually associated with the growth of a parasitic fungus, an offensive discharge from the numerous sebaceous glands, and the formation of red, raw excrescences (grapes) on the surface.

grease-mold (grēs′mōld), *n.* A fungus, *Phycomyces nitans*, which frequently occurs upon tallow and other grease. See *mold*[2] and *Phycomyces*.

grease-moth (grēs′môth), *n.* A European pyralid moth, *Aglossa pinguinalis*, which also occurs in India, South Africa, and Australia. Its larvæ live in silken tubes in barns, stables, and outhouses among accumulations of vegetable rubbish. Although long supposed to be a grease-feeder, this is now doubted. Also known to British collectors as the *tabby-moth*.

grease-nut (grēs′nut), *n.* Same as ★*cudgerie*, 2.

grease-paint (grēs′pānt), *n.* Tallow or some hard grease, melted and colored by stirring into it various pigments, used by actors in painting their faces. While hot it is run into conveniently formed molds, sticks variously colored being thus made to meet the needs of the make-up.

grease-pox (grēs′poks), *n.* Grease (see def. 3) produced in other animals or in man by inoculation from the horse.

grease-trap (grēs′trap), *n.* Same as *trap*[1], 4.

great, *a.*—**The great ice.** See ★*ice*.

greatwort (grāt′wėrt), *n.* See *Triumfetta*.

Greco-Asiatic (grē″kō-ā-shi-at′ik), *a.* Pertaining to the ancient Hellenic inhabitants of Asia, especially of the coast of Asia Minor.

Greco-Latin (grē″kō-lat′in), *a.* Of or pertaining to both the Greeks and the Latins, or to their languages, literatures, etc.; Greco-Roman.—**Greco-Latin square.** See ★*square*[1].

Grecomania (grē-kō-mā′ni-ạ), *n.* [L. *Græcus*, Greek, + Gr. *μανία*, madness.] A furor or mania for everything that is Greek.

Grecomaniac (grē-kō-mā′ni-ak), *n.* One who has a mania for things Greek.

Greco-Phenician (grē″kō-fē-nish′an), *a.* Of or pertaining to both Greece and Phenicia: applied especially to Greek art developed under Phenician influences, as in northern Africa and Spain.

Grecophile (grē′kō-fil), *n.* [L. *Græcus*, Greek, + Gr. *φιλεῖν*, love.] One who is friendly to or is an admirer of Greece and the Greeks, their language, literature, etc.

grecostasis (grē-kos′ta-sis), *n.* [L. *Græcostasis*, < Roman Gr. **Γραικόστασις*, < *Γραικός*, Greek, + *στάσις*, station.] In *Rom. archæol.*, a platform in the forum which was a post of honor for Greek and other foreign ambassadors.

Greek orders. See ★*order*.

green[1]. **I.** *a.*—**Green fish.** (*c*) A fish cured simply by drying without salt or smoke.—**Green manuring.** See ★*manuring*.—**Green soiling.** See ★*soiling*.

II. *n.* **4.** In *golf:* (*a*) The whole links or golf-course. (*b*) The putting-green, or portion of the links, devoid of hazards, within twenty yards of a hole.—**Acid alizarin green,** a mordant-acid dyestuff derived from anthracene. It is rendered extremely fast when subjected to an after-chroming.—**Acid green.** See ★*acid-green*, 2.—**African green.** (*a*) Hydrated chromium sesquioxid, a green pigment: same as *emerald-green*. (*b*) A name sometimes given to *Schweinfurt green*.—**Alizarin green,** a name of several mordant coal-tar colors. One is an anthracene derivative and therefore one of the true alizarin colors; another belongs to the oxazin-group; while still another belongs to the xanthene-group and is the same as cerulein or anthracene green.—**Alsace green.** Same as *dark* ★*green*.—**Aniline green.** Same as *aldehyde green* (which see, under *green*[1]).—**Azin green.** (*a*) A basic coal-tar color of the azonium type, designated as *azin green G B*. (*b*) An acid dyestuff made by sulphonating the foregoing and designated as *azin green S*.—**Benzal green.** Same as *benzaldehyde green* (which see, under *green*[1]).—**Benzo dark green,** a direct coal-tar color which dyes unmordanted cotton an olive-green from a salt bath.—**Bindschedler's green,** one of the modern artificial dyeing materials made from coal-tar products. It belongs to the chinonimide class of such materials.—**Bitter-almond oil green,** a basic coal-tar color: same as *benzaldehyde green* (which see, under *green*[1]).—**Brilliant green,** a basic coal-tar color: same as *ethyl green* (which see, under *green*[1]).—**Capri green,** a basic coal-tar color: similar to *Capri* ★*blue*.—**Chloramine green,** a direct coal-tar color of the trisazo type, derived from benzidine and dichloraniline. It dyes unmordanted cotton green in a salt bath, and is exceptionally bright for a green of this class.—**Chrome emerald-green,** a pigment consisting of chromium oxyhydroxid.—**Columbia green,** a direct coal-tar color of the trisazo type, derived from benzidine and sulphanilic acid. It dyes unmordanted cotton bluish green from a salt bath. Also called *direct green C O*.—**Dark green,** a mordant coal-tar color of the nitroso type. It produces an olive-green color with an iron mordant and brown with a chromium mordant.—**Diamine green,** a direct coal-tar color of the trisazo type, derived from benzidine and paranitraniline. It dyes unmordanted cotton green in a neutral salt bath.—**Diamond green,** a mordant-acid coal-tar color of the disazo type, derived from amino-salicylic-acid-azo-α-naphthylamine. It dyes chromium-mordanted wool a dark bluish green in an acid bath, or may be dyed upon unmordanted wool and after-chromed.—**Diamond green B,** a basic coal-tar color: same as *benzaldehyde green* (which see, under *green*[1]).—**Diamond green G,** a basic coal-tar color: same as *ethyl green* (which see, under *green*[1]).—**Diazin green,** a Janus coal-tar color of the monoazo type, prepared by combining diazotized safranine with dimethyl-aniline. It dyes tannin-mordanted cotton in a neutral bath and unmordanted cotton in an acid bath. Also called *Janus green*.—**Diphenyl green,** a direct coal-tar color of the trisazo type which dyes unmordanted cotton green in a salt bath.—**Direct green C O.** Same as *Columbia* ★*green*.—**Double green,** a basic coal-tar color: same as *methyl green* (which see, under *green*[1]).—**English green,** a green pigment: same as *chrome-green*.—**Fast green J,** a basic coal-tar color: same as *ethyl green* (which see, under *green*[1]).—**Gallanil green,** a mordant coal-tar color of the oxazin type, prepared by the nitration of gallanil indigo. It dyes chromium-mordanted wool green.—**Guinea green B,** an acid coal-tar color of the triphenyl-methane type which dyes wool and silk green from an acid bath.—**Guinea green B V,** a nitro-derivative of Guinea green B which dyes wool and silk green in an acid bath.—**Imperial green,** a basic coal-tar color: same as ★*malachite-green*, 3.—**Iodine green.** (*b*) A basic coal-tar color of the triphenyl-methane type. It is used to some extent in silk-dyeing. Also called *night green, pomona green*, and *light green*.—**Italian green,** a coal-tar color of the sulphid type, allied to cachou de Laval, obtained by heating a mixture of caustic soda, copper sulphate, sulphur, and paranitrophenol. It dyes unmordanted cotton a dark green in a salt bath, and is very fast.—**Janus green.** Same as *diazin* ★*green*.—**Keen green,** in *golf*, a putting-green which is very fast, that is, on which the ball runs freely.—**Kirchberger green,** a form of copper arsenite used as a pigment: essentially the same as *Scheele's green*.—**Light green.** (*b*) Same as *iodine* ★*green*. (*c*) Same as *methyl green* (which see, under *green*[1]).—**Methylene green,** a basic coal-tar color of the thiazin type, prepared by the nitration of methylene blue. It dyes tannin-mordanted cotton green, and is used chiefly in calico-printing.—**Milling green,** an acid coal-tar color of unpublished composition which gives a very fast green upon wool.—**Naphthalene green,** an acid coal-tar color which dyes wool green in an acid bath.—**Neüwieder green,** a green pigment which consists of Schweinfurt green or the acetoarsenite of copper mixed with calcium or barium sulphate.—**New fast green,** a basic coal-tar color of the triphenyl-methane type which dyes tannin-mordanted cotton green. Also called *Victoria green*.—**New green.** (*a*) Same as ★*malachite-green*, 3, and *benzaldehyde green*. (*b*) A basic coal-tar color of the diphenyl-naphthyl-methane type.—**Night green.** Same as *iodine* ★*green* (*b*).—**Oxamine green,** a direct coal-tar color which dyes unmordanted cotton green in a salt bath.—**Russian green.** Same as *dark* ★*green*.—**Snake-skin green,** in *ceram.*, a peculiar tint of green glaze, with iridescent sheen, found on old Chinese porcelain.—**Through the green,** in *golf*, a term applied to all that part of the course, excepting hazards, between the tees and putting-greens.

green[1], *v. t.* **2.** In *oyster-culture*, to give (oysters) a green tinge about the gills by putting them in pits.

greenalite (grē′na-līt), *n.* [Erroneously formed from *green* + *-a-* + *-lite*.] In *petrog.*, metamorphosed rock composed largely of minute granules of green hydrous ferrous silicate. *Leith*, 1903.

> The iron-bearing formation occurs in the Upper Huronian, and in what is known as the Biwabik division. This comprises a variety of rocks, including slates, cherts, and "*greenalite*." This last-named substance consists largely of minute granules of green ferrous silicate, without potash, and is named *greenalite* for convenience. *Nature*, Dec. 3, 1903, p. 116.

greenback, *n.* **6.** *Salmo stomias*, the trout of the Arkansas river.

green-bag (grēn′bag), *n.* A lawyer: so called from the green bag in which barristers carry their books and papers.

green-blind (grēn′blīnd), *a.* Color-blind as regards the green rays. *Stud. Yale Psychol. Lab.*, VIII. 1.

green-blindness (grēn′blīnd″nes), *n.* Inability to distinguish the color green: a form of partial color-blindness.

green-bottle (grēn′bot″l), *n.* Same as *green-bottle* ★*fly*.

green-brier, *n.*—**Bristly** or **fiddle-shaped green-brier,** *Smilax Bona-nox* of the eastern and southern United States: so named from its bristly stems and fiddle-shaped leaves. See ★*bamboo-brier* and ★*stretchberry*.

green-coat (grēn′kōt), *n.* One who wears a green coat, as a servant, a scholar at certain charity-schools in England, etc.

greener (grē′nėr), *n.* [*green*[1] + *-er*[1].] An unskilled or inexperienced person; specifically, a person without previous experience who takes the place of another who is on strike, or who takes employment simply to get experience. *Scribner's Mag.*, Sept., 1902, p. 304.

green-felt (grēn′felt), *n.* A dense, felt-like growth of the alga *Vaucheria*.

greenfish, *n.* **3.** *Girella nigricans*, a fish of the family *Kyphosidæ*, abundant in rocky places from Monterey bay, California, south to Cape San Lucas.—**Alaska greenfish,** *Hexagrammos octogrammus*, a food-fish of the coast of Alaska.

green-groin (grēn′groin), *n.* Gangrenous inflammation of the vermiform appendix and surrounding parts.

greenhead[1], *n.* **2.** Any one of several species of American gadflies which have green heads, as the common greenhead, *Tabanus costalis*, and the gray-striped greenhead, *Tabanus lineola*.

greenheart, *n.* **3.** In Jamaica, *Zizyphus Chloroxylon*, one of the trees called *cog-wood*.

greenhew (grēn′hū), *n.* [Also *green-hue*; < *green*[1], *a.*, + **hew*[1], *n.*, from *hew*[1], *v.*] **1.** In *Eng. forest law*, the green parts of trees or shrubs: same as *vert*[1], 1 (which see).—**2.** The right to cut the green parts of trees or shrubs for fodder; the payment for such right.

greenhide (grēn′hīd), *n.* A whip made of untanned hide; a rawhide. [Australia.]

Greenhouse bug. See ★*bug*[2].

green-jack (grēn′jak), *n.* A carangoid fish, *Caranx ruber*, which inhabits West Indian waters.

green-keeper (grēn′kē″pėr), *n.* The person who keeps the putting-greens of a golf-course in order. Also *greens-keeper*.

Greenlandman (grēn′land-man), *n.* A vessel engaged in whaling near Greenland.

green-leek (grēn′lēk), *n.* A small Australian parrakeet, *Polytelis barrabandi*.

greenling, *n.* **2.** Any fish belonging to the family *Hexagrammidæ*, carnivorous fishes living in kelp and about rocks in the North Pacific.

green-oyster (grēn′ois″tėr), *n.* The green seaweed *Ulva Lactuca*, found in frequent association with the oyster. [Australia.]

greenroom, *n.* 4. An apartment for drying damp or 'green' pottery before it is burned.

greensand, *n.* 2. [*cap.*] In geological classification, one of certain subdivisions of the Cretaceous system. In England the Lower Greensand overlies the Wealden formation and is characteristically developed on the Isle of Wight, where it includes the Atherfield clay, Hythe, Sandgate, and Folkestone beds in ascending order. The Upper Greensand is the sandy or chloritic facies of which the Galt is the clay equivalent (see *galt*[1]). The Lower Greensand is generally equivalent on the Continent and elsewhere to the Aptian, the Upper Greensand to the Albian stage.—**Cambridge Greensand,** in *geol.*, a bed of Cretaceous Greensand lying beneath the chalk at Cambridge, England, largely worked for phosphate of lime and phosphated fossils which are chiefly reptilian remains.

green-shaving (grēn′shā″ving), *n.* In *currying*, the process of shaving a hide or skin which is in a green or untanned state.

green-sighted (grēn′sī″ted), *a.* In *psychol. optics*, seeing as if through green glasses. If the eye is kept for some little time in a reddish illumination (in certain kinds of artificial light, or in a photographic dark room with a ruby window), it becomes adapted to red; on passing to a normal white-light illumination it is green-sighted, that is, it sees everything as if tinged with a certain amount of the complementary green. Since the light which in ordinary daylight leaks into the eye through the sclerotic is tinged with red, the organ is (within certain limits) permanently adapted to red, and in so far permanently green-sighted. *E. B. Titchener*, Exper. Psychol., I. i. 23.

greenstone, *n.* 3. A name in New Zealand for several varieties of jade, specifically for pounamu or nephrite, found chiefly on the west coast of the Middle Island: formerly much used by the Maoris for weapons, implements, and ornaments.

green-tail (grēn′tāl), *n.* 1. Same as ★*grannom*.—2. A diarrhea of deer: named from the profuse green-colored evacuations. It is often fatal, sometimes within twenty-four hours.

Greenwich stars. See ★*star*[1].

greenwood, *n.* 3. Same as *green-broom*.

Greenwood bit. See ★*bit*[1].

greenyard (grēn′yärd), *n.* Formerly, in England, a village pound for the reception of stray animals; also, a grass-yard in which hounds may exercise.

gregale (grā-gä′lā), *n.* [It. **gregale*, Sp. *gregal*, It. also *greco*, the northeast wind, prop. the 'Greek' wind, ‹ L. *Græcus*, It. *Greco*, Sp. *Griego*, Greek.] The cold northeast wind of the Mediterranean Sea. See *levanter*[1].

gregarinosis (greg″a-ri-nō′sis), *n.* [NL., ‹ *gregarina* + *-osis*.] A disease caused by the presence of parasitic gregarines.

gregarious, *a.* 2. By Drude and subsequent writers gregarious plants are further determined as growing in patches among other vegetation, thus contrasting with *social* species, which dominate the whole ground.

grège (grāzh), *n.* [F., ‹ It. *greggia;* origin unknown.] The raw silk of the domestic silkworm before the gum is removed: a trade or manufacturers' name which has been generally adopted.

Gregorian, *n.* 3. In *music*, a melody written in one of the church modes; a piece of plainsong.

greillade (grāl-yäd′), *n.* [F.] Iron ore which has been sufficiently crushed for reduction in a Catalan forge.

grelifuge (grel′i-fūj), *a.* [F. **grélifuge*, ‹ *grêle* (OF. *gresle*), hail, + *-fuge*, ‹ L. *fugere*, flee.] Driving away or preventing hail.—**Grelifuge cannon,** the cannon from which vortex-rings are fired for the prevention or dissipation of hail-storms. Many thousands of these have been used in southern Europe. See ★*hail-cannon*. *Sci. Amer. Sup.*, Dec. 13, 1902, p. 22536.

grenadine, *n.* 2. (*a*) In *cookery*, a larded fillet, especially one of veal or poultry, glazed with its own concentrated liquor. *Larousse.* (*b*) A sweet drink; a syrup: used for colds, etc. *Larousse.*

grenat, *n.*—**Carminnaph grenat.** Same as *alpha-naphthylamine* ★*red*.—**Soluble grenat,** isopurpurate of potassium or ammonium, produced by the interaction of picric acid and an alkaline cyanide: used as a brownish-red dye on wool and silk.—**Syriam grenat,** the rich red or purple-red garnets found in Syriam Pegu, India.

grès, *n.* 2. The gum of the fiber of the domestic silkworm.—**Grès bigarré,** in *geol.*, a subdivision of the Triassic system in the Vosges in Germany and France. It is correlated with the Upper Bunter sandstone, which is the lower division of the Trias.—**Grès cérame** [F., 'potters'-earth stoneware']. See *grès de Flandres*, under *grès*.—**Grès des Vosges,** in *geol.*, a subdivision of the Triassic system in Germany and France, correlated with the Lower Bunter sandstone and overlain by the Grès bigarré. It is unfossiliferous, and is characterized by the crystalline condition of the quartz-grains.

Gressigrada (gre-sig′rā-dä), *n. pl.* [NL., ‹ L. *gressus*, walking, + *gradi*, go, walk.] A division of *Pinnipedia* containing those forms in which the hind legs can be turned forward and used in walking. It includes the walruses, *Odobænidæ*, and eared seals, *Otariidæ*. Correlated with ★*Reptigrada*. *J. A. Allen*, Hist. North Amer. Pinnipeds, p. 3.

Gressyla (gres′i-lä), *n.* [NL.] A genus of anomalodesmaceous pelecypods with the right margin projecting over the left, ligament parivincular attached to an internal nymph-like callosity in the right valve: abundant in Jurassic rocks.

gribane (grē-bän′), *n.* [F.] A small two-masted vessel of Normandy.

grid, *n.* 4. A name applied to a particular arrangement of members in which a number of narrow, parallel members lying in one plane are fastened at their ends to two heavier parallel members perpendicular to the others.

grid-bar (grid′bär), *n.* Part of a grating of parallel bars through which dirt and other extraneous matter pass in the scutching or picking of cotton.

gridiron, *n.* 3. In *Amer. foot-ball*, a trivial term applied to the field of play, in allusion to the fact that it is crossed by transverse white lines every five yards. It is also sometimes called a *checker-board*, because recent rules provide for longitudinal lines as well.—4. A structure of planks erected above the stage of a theater to support the mechanism by which the drop-scenes, etc., are worked.—**Gridiron floor,** the staging of planks near the roof of a theater, and directly over the stage, where the drop-scenes are manipulated; the gridiron.—**Gridiron manœuver.** See ★*manœuver*.

gridiron-tail (grid′ī-ėrn-tāl″), *n.* A small iguanoid lizard, *Callisaurus ventralis*, from the desert regions of southern Utah: named from the dark bars on its tail.

grid-valve (grid′valv), *n.* Same as *gridiron valve*.

Griess's test. See ★*test*[1].

griev, *v.* A simplified spelling of *grieve*.

griffaun (gri-fân′), *n.* [Also *griffawn*, more correctly *graffane*, ‹ Ir. *grafán*, ‹ *grafaim*, I scrape: see *grave*[1], *v.*] An Anglo-Irish agricultural implement used for cutting turf to be dried and burned.

> The last pale whitey-brown section had been earthed over, and Larry was dealing a few superfluous final pats with the flat of his broad *griffawn*, . . . when Peg came halting out of doors and up to the field-dyke.
> *Jane Barlow*, Irish Idylls, p. 62.

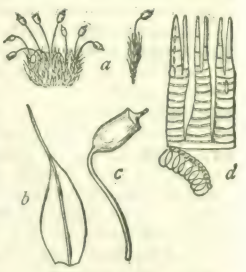
griffe[1], *n.* 3. The part of a Jacquard loom which raises the warp-threads. Also called *knife-box*. *R. Marsden*, Cotton Weaving, p. 191.

griffe-bar (grif′bar), *n.* A blade or knife of the griffe, or lifting-frame in a Jacquard loom, upon which the warp-thread hooks catch. *T. W. Fox*, Mechanism of Weaving, p. 87.

griffelschiefer (grif′el-shē″fėr), *n. pl.* [G., ‹ *griffel*, a pencil, + *schiefer*, slate.] Pencil-slate: used by German geologists to designate certain Lower Silurian slates of Thuringia in Germany which, being intersected by cleavage-planes in two directions, are broken for slate-pencils. They contain some radiolarians (*Sphæroidea*).

griffin-dog (grif′in-dog), *n.* A breed of large hunting-dogs. They combine the qualities of the setter and the pointer, and have a harsh coat which specially adapts them for work in thick covert. The color is a reddish gray. The breed, which is of modern origin, originated in Germany. Also *bassett-griffon*.

gri-gri[2], *n.* 2. In West Africa, the sassy-bark: see *Erythrophleum*. The name is probably due to the fact that the tree enters into the fetish worship and ordeals of the natives.



grike (grīk), *n.* [A variant of *crike* (ME. *crike*), dial. form of *crick*[2].] 1. A crevice; a chink; a widened joint in rock. [Prov. Eng.]—2. A ravine on the side of a hill. [Prov. Eng.]

grill[2], *n.* 2. Faint and short white lines or cross-bars on some flat surfaces of engraving.—3. In *elect.*, the grid of a storage cell.—4. A dish of grilled meat or the like.—5. A grill-room.

grill[2], *v. t.* 2. To mark or stamp with a series of parallel lines like a grill; specifically, in *line-engraving*, to break up (a too flat surface) with short bars of faint white lines sometimes crossed at right angles, as may be seen in some forms of postage-stamps.

grilled (grild), *p. a.* 1. Cross-barred; made in the form of a grill; specifically, said of the flat surface of an engraved plate which shows short bars or cross-bars of white lines.—2. Roasted on a gridiron.

Grimmia (grim′i-ä), *n.* [NL. (Friedrich Ehrhart, 1782), named for Johann Friedrich Karl *Grimm* (1737–1821), a German botanist.] A large genus of true mosses, type of the family *Grimmiaceæ*. It consists of more or less compactly tufted plants, rooting at the base with lanceolate, mostly entire leaves, spherical or ellipsoidal capsules, and a peristome of 16 teeth (rarely absent). There have been described 241 species, distributed over all the earth, mainly intemperate, frigid, or alpine regions, growing chiefly on rocks: 104 are found in America.

Grimmia pulvinata.
a, plants, about two thirds natural size; *b*, leaf, magnified; *c*, sporangium, magnified; *d*, portion of peristome with ring, magnified.

Grimmiaceæ (grim-i-ā′sē-ē), *n. pl.* [NL., ‹ *Grimmia* + *-aceæ*.] A family of acrocarpous mosses of the order *Bryales*, typified by the genus *Grimmia*, and characterized chiefly by the fact that the teeth of the peristome are perforated or split up into several strands. It contains 7 genera, of which *Grimmia* and *Rhacomitrium* are the most important, widely distributed over the globe, but rare in the tropics. They are leafy, tufted mosses growing chiefly on rocks and stones, rarely on trees or on the ground.

Grimm's attack. See ★*attack*.

grimthorpe (grim′thôrp), *v. t.*; pret. and pp. *grimthorped*, ppr. *grimthorping*. To treat in the manner of Lord Grimthorpe, that is, to 'restore' (an old piece of architecture) with the effect of spoiling it, as Lord Grimthorpe is said to have done when he undertook to restore the west front of St. Albans Abbey in England.

> Why should any one who finds it stated that a book has been bowdlerized or grangerized, that a man has been boycotted, that a church has been *grimthorped*, or that a writer shows a Zolaizing tendency, be denied the explanation of these words because they have been formed from personal names?
> *J. Randall*, in N. and Q., March 18, 1893.

grind, *n.* 7. *Naut.*, a kink, half-turn, or twist in a rope.

Grindelia, *n.* 2. [*l.c.*] A plant of the genus *Grindelia*.—3. [*l.c.*] In *pharm.*, an official drug which consists of the leaves and flowering tops of *Grindelia robusta* and *G. squarrosa*. The name 'California gum-weed' has been used of the official grindelia in general, but only the former species is Californian, the latter being distributed only over the great interior region. *G. robusta* is somewhat preferred, and, though collected in large quantities in California, is said to be scarcer than *G. squarrosa*. The virtue of grindelia resides in the gum which exudes from the heads and upper leaves.

grinder, *n.*, 1. (*f*) A cylinder covered with emery for sharpening the wire teeth in card-clothing.—**Grinders' lung.** See ★*lung*.

grinder-head (grīn′dėr-hed), *n.* A bench grinding-machine which carries an arbor for two emery- or carborundum-wheels.

grinding, *n.*—**High grinding, low grinding.** Same as *high* and *low milling* (which see, under *milling*).

grinding-machine, *n.*—**Skin-grinding-machine,** a machine for reducing leather or *skins* to a uniform thickness: especially valuable for treating the skins used in covering the drawing-rolls of cotton-spinning machines.

grip[1], *n.* 10. In *track athletics*, a piece of cork, shaped to fit the hollow of the hand, which a runner grips when running.

grip-block (grip′blok), *n.* A pulley-block attached to the grip or hoisting-tongs on a log-handling machine.

gripe[1], *n.*—**Watery gripes,** cholera infantum.

Griphopithecus (grif″ō-pi-thē′kus), *n.* [Gr. γρίφος, a riddle, + πίθηκος, an ape.] A genus of anthropoid mammals known by isolated molars from the Miocene Tertiary of Austria.

grip-knot (grip′not), *n.* A clamp; a contrivance for holding an article while it is being turned in a lathe.

gripment (grip′ment), *n.* [*grip*[2] + *-ment*.] Seizing; holding; gripping.

> Generally speaking, the harder the surfaces in contact, the lower the coefficient of friction, and the higher the pressure under which *gripment* takes place.
> *Jour. Franklin Inst.*, July, 1903, p. 51.

grip-pedal (grip′ped″al), *n.* In a bicycle, a pedal fitted with a spring or other device for holding the foot to the pedal. Also called *grip-treadle*.

gripping-rolls (grip′ing-rolz), *n. pl.* Feeding-rolls; a pair of rotating rolls between which a board or other piece of material is gripped and drawn or pushed along into a planing or other machine.

grisaille, *n.* **2.** A fancy fabric with a cotton warp and a wool weft for women's wear.

gris de perle (grē-dę-pārl′). [F., 'pearl-gray.'] A peculiar shade of gray, sometimes seen in the glaze of Chinese porcelain; pearl-gray.

Grison liquid. See ★*liquid.*

grisonnite (grē′son-īt), *n.* [F., ‹ *grison* (*grisonn-*), gray, + *-ite*, E. *-ite*[2].] A name given to certain of the explosives of Favier. (See *Favier* ★*explosives.*) One of these consists of 95.5 parts ammonium nitrate with 4.5 parts trinitronaphthalene; another of 92 parts ammonium nitrate with 8 parts dinitronaphthalene.

grit[2], *n.*—**Altamaha grits,** a division of the older Miocene of Georgia.—**Berea grit,** Same as *Berea sandstone.*—**Calcareous grit,** a division of the Middle Oxford Oölites or Corallian.—**Cocktail grit.**—See *Esopus* ★*grit.*—**Denbighshire grits,** a division of the Upper Silurian in North Wales, equivalent in part to the Wenlock group.—**Esopus grit** [*Esopus,* a village in Ulster county, New York], a subdivision of the Lower Devonian in eastern New York, New Jersey, and Pennsylvania. It attains a thickness of 400 feet, is underlain by the Oriskany limestone, and is overlain by the Schoharie grit. It was originally termed the Caudagalli or Cocktail grit, from the presence of a supposed organism which has been termed *Fucoides cauda-galli.* Otherwise it is nearly barren of fossils.—**Foreland grits,** a division commonly regarded as the lowest of the typical marine Devonian series in Devonshire.—**Glengariff grits,** a subdivision of the Old Red Sandstone in the south of Ireland, passing down into Upper Silurian strata and in some regions overlain by the Kiltorcan beds.—**Gryphite grit,** a name given to some of the strata of the Inferior Oölite in Britain on account of the prevalence of the bivalve *Gryphæa.* The term *Gryphite limestone* is applied to some of the strata of the same age.—**Hangman grits,** the uppermost division of the Lower Devonian in North Devon, lying between the Lynton group beneath and the Ilfracombe slates above.—**Harlech grit,** a division of the Lower Cambrian rocks in Wales.—**Moor grit,** a local name of the uppermost member of the Inferior Oölite in Yorkshire.—**Pennant grit,** the middle member of the Upper Carboniferous coal measures of England, separating the upper and lower coal-bearing series, and consisting of a succession of plant-bearing grits and sandstones 1,500–2,000 feet thick.—**Rensselaer grit,** a deposit of grit, regarded as of the age of the Oneida conglomerate, which overlies the Lower Silurian rocks in Rensselaer county, New York.—**Shawangunk grit,** a heavy deposit of grit and conglomerate which constitutes the upper part of the Shawangunk Mountains in eastern New York. It has commonly been regarded as of the age of the Oneida conglomerate of central New York, though present evidence indicates that it is of somewhat later date.—**Yorkshire grits,** certain grits which occur in the Coralline Oölite of the Middle Jurassic system in Yorkshire, England: employed as abrasives.

Gritti's amputation. See ★*amputation.*

grivenink (grē′vi-ningk), *n.* [Russ. *grivininkŭ,* ‹ *grivna,* ten copecks.] A Russian coin; a ten-copeck piece.

grivna (grēv′nä), *n.* [Russ. *grivna.*] A Russian silver coin, equal to 10 copecks, and weighing 31.992 grains troy. Copper coins of this name were also struck.

grizzle[1], *n.* **4.** In *brickmaking,* a badly burned second-quality brick of a grayish color.

grizzle[2] (griz′l), *v. i.* [Also *grizzel, grizle, grisle;* origin obscure.] **1.** To laugh or grin; show the teeth like a dog; snarl.—**2.** To grumble; complain; whine; fret. [Prov. Eng. or Australian.]

grizzly, *n.* **3.** A machine used for breaking coal or other material to a moderately small size.

Next a set of *grizzlies* consisting of ¾-inch round iron bars is passed, when finally comes a double screen of heavy galvanized iron wire with a 1-inch mesh.
Elect. Rev., Sept. 17, 1904, p. 455.

grizzly-king (griz′li-king), *n.* In *angling,* an artificial fly having a green body, a dark-gray hackle, a scarlet tail, and mottled wings.

grizzly-queen (griz′li-kwēn), *n.* In *angling,* an artificial fly.

G. R. jug. See ★*jug*[1].

gro. An abbreviation of *gross.*

groat, *n.*—**Borage groat,** a Scottish silver coin of 1467, of the value of 12 pence.—**Spurred groat,** a Scottish silver coin of the value of 16 pence.—**Tournay groat,** an Anglo-Gallic silver coin of the time of Henry VIII.: so called from being struck at Tournay in France.

groining, *n.*—**Fan groining.** Same as *fan* ★*vaulting.*

Grolier binding. Same as *Grolier design.*

Grolieresque (grō″li-ėr-esk′), *a.* In the style of binding or ornament used by Grolier, which was a pleasing combination of curved lines about a geometrical framework.

gromatics (grō-mat′iks), *n.* [LL. *gromaticus, grumaticus,* of land-surveying (*gromatica,* the art of land-surveying), ‹ *groma, gruma,* a surveyor's measuring-rod, ‹ Gr. *γνώμων,* the index of a dial, a carpenter's square, etc.: see *gnomon.*] The art of land-surveying, as the laying out of camps.

He [Frontinus] also left records of his varied experience and studies. We possess excerpts from a work on *gromatics.* *W. S. Teuffel* (trans.), Hist. Roman Lit., II. 147.

gromet-set (grom′et-set), *n.* A hand-tool for making gromets.

grondwet (grond′vet), *n.* [D., ‹ *grond,* ground, + *wet,* law.] A fundamental law or constitution in lands settled by the Dutch or under Dutch influences.

Being the principal Dutch colony in the Malay Archipelago, Java was the first to benefit from the material change which resulted from the introduction of the *Grondwet* or Fundamental Law of 1848 in Holland.
Encyc. Brit., XXIX. 738.

Gronovius's dodder. See ★*dodder*[1].

groo-groo (grō′grō), *n.* Same as *gru-gru.*

groove, *n.*—**Dental groove,** a slight furrow along the edge of the jaw in mammals which marks the base of the ingrowing dental lamina.—**Genital groove,** in *embryol.,* a furrow or groove which in course of development becomes the rima pudendi or the urethra, according to the sex.—**Germinal groove,** in *embryol.,* a median longitudinal groove in the germ-band of insects which gives rise to the mesoderm throughout the greater portion of its length and, in the region of the mouth and anus, to the cell-masses that spread over the yolk to form the entoderm.—**Gothic groove,** in *mech.,* a groove having a Gothic arch section in a roll.—**Groove of Hatschek,** a peculiar sense-organ, supposed to have a gustatory function, which lies against the right side of the notochord in the wall of the buccal hood of the lancelet (*Branchiostoma* [*Amphioxus*] *lanceolatum*).—**Harrison's groove,** a sinking in of the chest-wall along the line of insertion of the diaphragm, noted occasionally in cases of extreme shortness of breath, especially in children.—**Lacrymal groove,** a depression in the bony wall of the orbit which lodges the lacrymal sac.—**Leakage groove,** a groove turned in an engine-piston to prevent steam from leaking past the piston. The steam forms eddies in such a groove instead of going right by it.—**Nasobuccal groove,** a groove which connects each nostril with the mouth, as in the sharks.—**Parapodial groove,** in certain gastropods, as the *Endodontidæ* and the *Zonitidæ,* a deep longitudinal furrow running along each side of the body a short distance above and parallel to the edge of the foot.—**Pedal groove.** Same as *parapodial* ★*groove.*—**Vertebral groove.** (*b*) The depression or gutter on either side of the spine.

groove-bit (gröv′bit), *n.* A boring instrument of which the shaft is grooved at one side so that the chips from the point may pass up the shaft and escape at the entrance to the hole.

groove-board (gröv′bōrd), *n.* In *organ-building,* that part of a wind-chest in which or on which are the grooves. Also called *channel-board.* See *groove,* 3 (*c*).

groover-head (grö′vėr-hed), *n.* A cutter made of one or of several pieces, used in a wood-planing or -sawing machine to make grooves in boards or lumber.

grooving, *n.* **2.** The forming of grooves in boilers at places where very rapid deterioration of the metal takes place, particularly at the laps of the riveted joints.

grooving-hook (grö′ving-hůk″), *n.* A hook-shaped tool for making a groove in wood.

grooving-machine (grö′ving-ma-shēn″), *n.* In sheet-metal work, a hand-power machine for forming a groove in the seam in tin and sheet-iron pipe. It consists of a bench-pedestal with a long horn for supporting the pipe or other hollow sheet-metal form, and a traveling roll which, by means of simple ratchet-gearing, can be made to travel over the joint or seam of the pipe as it rests on the horn. By the use of different rolls, grooves can be formed, seams pressed flat, and other work done in forming a joint in the pipe. The end of the horn can be released from its support to allow for the removal of the finished pipe.

grooving-plane (grö′ving-plān), *n.* **1.** A plane which has a narrow iron for cutting a groove.—**2.** A plane having an iron that reaches from side to side, so that the frame of the plane will not interfere when planing a groove; a rabbet-plane.

grooving-saw (grö′ving-sâ), *n.* A single circular saw used for the same purpose as the groover-head.

grooving-tool (grö′ving-töl), *n.* Any tool used for cutting grooves; a gouge; specifically, a round-pointed tool used by wood-engravers.

groper[2] (grō′pėr), *n.* Same as *grouper.*—**Blue groper,** a large sea-fish of New South Wales and Tasmania, *Achærodus gouldii,* of the family *Labridæ.* Often called *parrot-fish* in Australia and *bluehead* in Tasmania.

grorudite (grō′rö-dīt), *n.* [*Grorud,* near Christiania, Norway, + *-ite*[2].] *n.* In *petrog.,* a fine-grained green porphyry composed of alkali-feldspars rich in soda, with quartz and ægirite and occasionally hornblende and mica. *Brögger,* 1894.

grosbeak, *n.*—**Sociable grosbeak,** the sociable weaver-bird, *Philæterus socius,* many of which nest together, building a huge, dome-shaped structure of grass, resembling a haystack. See cut under *hive-nest.*

gross, I. *a.* **10.** Relatively large; specifically, visible to the naked eye; megascopic; not microscopic.

Operation was performed, and the kidney in its general contour and *gross* substance gave no satisfactory evidence of the cause of the trouble.
Med. Record, Feb. 14, 1903, p. 268.

The tumor presented the *gross* appearance of a sarcoma. . . . There was no *gross* disease, except in the prefrontal region. *Phil. Med. Jour.,* Jan. 31, 1903, p. 221.

Gross efficiency. See ★*efficiency of a source of light.*

II. *n.*—**Power in gross.** See *power*[1], 7 (*c*).

grossetto (grō-set′ō), *n.* [It., dim. of *grosso,* a coin, ‹ *grosso,* big, thick: see *gross.*] A Venetian money of account, one twelfth of the grosso.

gross-flute (grōs′flöt), *n.* [G. *grosse flöte.*] In *organ-building,* an 8-feet flute-stop of large scale and rich tone.

grossone (grō-sō′ne), *n.* [It., ‹ *grosso,* big, thick: see *gross.*] A silver coin of Venice and of other states of Italy, equal to 8 grossi.

grossulariaceous (gros″ū-lar-i-ā′shius), *a.* Belonging to or having the characters of the gooseberry family, *Grossulariaceæ.*

grossulin (gros′ū-lin), *n.* Same as *pectin.*

grote (grō′te), *n.* [LG.: see *groat.*] **1.** A current subsidiary coin of Bremen, one seventy-second of a reichsthaler, equal to one United States cent.—**2.** A Flemish coin, one twelfth of a shilling.

grothite (grōt′īt), *n.* [Named for Professor Paul *Groth,* a German mineralogist.] A light-brown variety of titanite containing a small amount of yttrium

grouch (grouch), *n.* [*grouch, v.*] A fit of sulkiness. [Colloq.]

grouch (grouch), *v. i.* [A variant of *grutch, grudge, v.*] To be sullen or morose.

grouchy (grou′chi), *a.* Sullen; morose; peevish; grouty. [Colloq.]

ground[1]. **I.** *n.*—**Blue ground.** See *blue.* The local name at the Kimberley diamond mines, South Africa, for the matrix of the gem. While embracing a number of rocks, it is in largest part a variety of peridotite, called *kimberlite.* Near the surface it has weathered yellow, the 'yellow ground' of the miners. Below this it is the typical blue. Even when hard in the depths of the mine, it softens on exposure and may be washed for the gems without crushing.—**Pitted ground,** in *ceram.* Same as ★*thimble-surface.*—**Tom Tiddler's ground.** Same as *king's* ★*land.*—**To take ground,** in *milit.,* to extend the front of a line.—**Yellow ground,** the uppermost portion, about 100 feet in thickness, of the diamond-bearing rock at the Kimberley mines, South Africa. Compare *blue* ★*ground.*

II. *a.*—**Ground note, stroke, tissue, tone.** See ★*note*[1], etc.

ground[1], *v. t.* **8.** To set (a color); to make (a color) fast. *C. T. Davis,* Manuf. of Leather, p. 399.—**To ground the bat.** See ★*bat*[1].

groundberry, *n.* **2.** In Australia, either of two species of dwarf shrubs of the family *Epacridaceæ, Staphelia humifusa* and *S. pinifolia.* Both bear small fruits with a viscid, sweetish, edible pulp.

ground-bread (ground′bred), *n.* Same as *sow-bread.*

ground-bridge (ground′brij), *n.* That portion of a corduroy road which crosses a stream or other body of water: a system of rough paving for a ford through a stream having a bad bottom, or through a quagmire or quicksand, formed by laying small logs or poles parallel and close together across the roadway and loading them down with stones.

ground-bundle (ground′bun″dl), *n.* In *neurol.,* a bundle of nerve-fibers adjacent to the central gray matter in the ventral portion of the spinal cord; the fasciculus ventralis proprius, which is continuous with the fasciculus longitudinalis medialis in the medulla oblongata.

ground-burnut (ground′bėr″nut), *n.* The land-caltrop. See *caltrop,* 3, and *Tribulus.*

ground-cable (ground′kā″bl), *n.* *Naut.,* the anchor-cable; a section of mooring-cable which is intended to lie on the bottom.

ground-cedar (ground′sē″dăr), *n.* **1.** The Christmas green, *Lycopodium complanatum.*—**2.** The false heather, *Hudsonia tomentosa.* Also called *poverty-plant.*

ground-cover (ground′kuv″ėr), *n.* In *forestry,* all the small plants growing in a forest, except young trees: such as ferns, mosses, grasses, and weeds.

ground-cured (ground′kūrd), *p. a.* Cured upon the ground, that is, without cutting; cured in the turf: said of several Western grasses, as the Buffalo grass (*Bulbilis*), blue and black grama (*Bouteloua*), which furnish winter grazing.

Live stock subsisted largely on the *ground-cured* range grasses, etc. *U. S. Mo. Weather Rev.,* Jan., 1902, p. 6.

ground-cypress (ground′sī″pres), *n.* See ★*cypress*[1].

ground-detector (ground′dē-tek″tọr), *n.* In *elect.*, a device for indicating when the insulated conductors of an electric system become grounded. It consists of a wire running from the insulated lines to earth and having an incandescent lamp, or sometimes a voltmeter or galvanometer, in circuit. Current will flow in this wire only when the insulated system is connected with the earth at some other point. *Trans. Am. Inst. of Elect. Eng.*, Jan.–July, 1902, p. 598.

ground-drummer (ground′drum″ėr), *n.* Same as *croaker*, 4 (*b*).

ground-elder (ground′el″dėr), *n.* See ★*elder*[2].

ground-feeding (ground′fē″ding), *a.* Feeding on the bottom of the water, as certain fishes: an anglers' term.

ground-festoon (ground′fes-tön″), *n.* Same as ★*ground-cedar*, 1.

ground-fielding (ground′fēl″ding), *n.* In *cricket*, fielding or stopping the ball upon the ground, in contradistinction to catching it in the air.

ground-flea (ground′flē), *n.* Any one of many species of leaping thysanurous insects which inhabit rich earth.

ground-holly (ground′hol″i), *n.* See ★*holly*[1].

ground-hornet (ground′hôr″net), *n.* Any hornet that nests in the ground, as *Vespa germanica*.

ground-house (ground′hous), *n.* A house with a peaked roof the eaves of which come down to the ground.

Macgregor describes and figures small *ground-houses*, with the gable roof coming right down to the ground, at Neneba, on Mount Scratchley.

Geog. Jour. (R. G. S.), XVI. 422.

ground-itch (ground′ich), *n.* An inflammation of the skin of the feet which affects coolies who work in rice-fields in the East. *Buck*, Med. Handbook, VI. 221.

ground-joint (ground′joint), *n.* In *masonry*, the meeting of an upper and lower course of stone in a wall.

ground-laurel (ground′lâ″rel), *n.* The trailing arbutus, *Epigæa repens*.

ground-lemon (ground′lem″ọn), *n.* The wild mandrake or May-apple, *Podophyllum peltatum*. Also called *wild lemon*.

ground-lily (ground′lil″i), *n.* The nodding wake-robin, *Trillium cernuum*.

groundman (ground′man), *n.* In *cricket*, a man whose duty it is to keep a cricket-ground in condition for play. Also *groundsman*.

ground-mine (ground′mīn), *n.* See ★*mine*[2].

ground-mite (ground′mīt), *n.* Any acarid of the family *Trombidiidæ*.

ground-moraine (ground′mọ̄-rān″), *n.* In *geol.*, a compact, unstratified deposit formed beneath glaciers; till; boulder-clay.

The first division of the former [moraines]—*ground-moraines*—take various forms, from nearly level plains to drumlins and regularly undulating country, with no level spaces, such as the Baltic lake plateau.

Geog. Jour. (R. G. S.), XIII. 299.

ground-moss (ground′môs), *n.* Same as ★*ground-cedar*, 2.

ground-needle (ground′nē″dl), *n.* Same as *musky* ★*alfilerilla*.

ground-parrot (ground′par″ọt), *n.* 1. The flightless owl-parrot or kakapo, *Stringops habroptilus*, of New Zealand.—2. A small farmer in Australia, otherwise known as a *cockatoo*. See ★*cockatoo*, 2. [Australia.]

ground-pea, *n.* 2. Same as *groundnut*, 3.

ground-pine, *n.* 3. The pineweed or orange-grass, *Sarothra gentianoides*.—4. The American germander, *Teucrium Canadense*.

ground-pink (ground′pingk), *n.* An annual herb of southern California, *Linanthus dianthiflorus*, from 1 to 6 inches high, which carpets meadows and slopes with its bloom in March. The funnel-shaped corollas are nearly an inch broad, pink in color, and fringed. The plant is grown in gardens for edgings and rockwork under a former name, *Fenzlia*. The genus *Linanthus* was long included in *Gilia*, whence this species is sometimes called *fringed gilia*.

Ground-pink (*Linanthus dianthiflorus*).

ground-plasm (ground′plazm), *n.* The more generally distributed and fundamental portion of the protoplasm, either in the nucleus or the cytoplasm.

ground-provisions (ground′prọ̄-vizh″ọnz), *n. pl.* In the West Indies, a collective name for all kinds of roots used as food.

They trust more to plantain-groves, corn and other vegetables than to what are called *ground-provisions*; such as yams, eddoes, potatoes, cassada and other esculent roots.

Bryan Edwards, A Hist. of the Brit. W. Indies, II. 162.

ground-raspberry (ground′raz″ber-i), *n.* The goldenseal, *Hydrastis Canadensis*.

ground-rattler (ground′rat″lėr), *n.* A small rattlesnake, *Sistrurus miliarius*, found along the Atlantic and Gulf coasts south of Fort Macon, Ga., up the Mississippi Valley, and west to Oklahoma. It is of a dark ashen-color, marked along the back with rounded brown blotches, and is one of several rattlesnakes to which the name *Massasauga* is given.

groundsel-bush (ground′sel-bụsh), *n.* Same as *groundsel-tree*.

ground-shield (ground′shēld), *n.* In *elect.*, a conducting-plate, between the primary and secondary windings of a transformer, which is connected to earth and serves to prevent the high-tension currents of the primary coil from entering the secondary circuit. *Trans. Amer. Inst. Elect. Engin.*, 1904, p. 681.

groundsman (groundz′man), *n.* Same as ★*groundman*.

ground-spearing (ground′spē″ring), *n.* A fish, *Trachinocephalus myops*, of the family *Synodontidæ*, common in the West Indies and Brazil.

ground-spider (ground′spī″dėr), *n.* Any ground-inhabiting spider, especially any member of the families *Lycosidæ* and *Attidæ*.

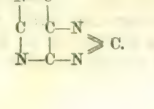
ground-substance (ground′sub″stans), *n.* 1. In *histol.*, the structureless substance which lies between cells or in which cells are embedded.—2. The fundamental or basic substance of a cell or tissue.

ground-thermometer (ground′thėr-mom″e-tėr), *n.* See ★*soil-thermometer*.

ground-timbers (ground′tim″bėrz), *n. pl.* *Naut.*, the timbers of the lower course in the making up of the frame of a wooden vessel.

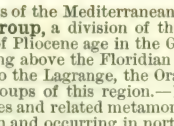
ground-vine (ground′vīn), *n.* The twin-flower, *Linnæa borealis*.

ground-wasp (ground′wosp), *n.* Same as ★*ground-hornet*.



ground-weave (ground′wēv), *n.* The foundation weave in the structure of figured fabrics.

ground-worm (ground′wėrm), *n.* An earthworm.



group[1], *n.*, 3. (*b*) In the recommendations of the International Geological Congress this term is applied, in geological classification, to stratigraphic divisions of the highest order comprising several terrains. Its equivalent term in the time scale is *era*.

5. (*b*) In *combinatorial analysis*, one of the classes into which the objects are distributed when the order of the objects in a particular class is material. (*c*) In *group-theory*, a set of definite operations containing the operation compounded of any two of the set, and also the inverse of every operation of the set.—6. In *crystal.*, a class of crystals characterized by the same degree of symmetry. Each crystalline system embraces several such groups or classes. See ★*symmetry*, where the names commonly employed in designating the more important of these groups are given.—7. In *ethnol.*, a number of people united together by common habits and usages. *Brinton*, Basis of Social Relations, p. 33.—**Albirupean group.** See ★*albirupean*.—**Alternating group.** (*b*) A group composed of all those substitutions which are equivalent to an even number of transpositions: as, for example, *abcd*, *acdb*, *adbc*, *cbda*, *dbac*, *bdca*, *dacb*, *bcad*, *cabd*, *badc*, *cdab*, *dcba*.—**Anor group** [*Anor*, a commune in France], a Lower Devonian formation in Belgium and northern France.—**Anticosti group,** a name given by the Canadian geologists to the Silurian strata which compose the island of Anticosti and range in age from Middle Silurian to the upper part of the marine Silurian represented in New York by the Niagaran formation. The rocks are soft calcareous shales and limestones, and abound in finely preserved invertebrate fossils.—**Applecross group,** a subordinate member of the Torridonian strata of northern Scotland.—**Aquia Creek group,** certain Eocene Tertiary deposits of the United States in the region traversed by the Potomac river. They are largely composed of greensand, some of them indurated, and abound in fossils.—**Arapahoe group,** a stratigraphic division of the Laramie group of formations developed in the vicinity of Denver, Colorado. The Arapahoe beds constitute, according to Cross and Eldridge, the lower division of the upper Laramie or Denver group and are mostly conglomerates. They attain a thickness of 800 feet.—**Arenig group,** the lowest division of the Lower Silurian rocks in Great Britain. These rocks consist of dark slates, shales, flags, and bands of sandstone which pass down conformably into the Tremadoc group of the Cambrian series. They are typically developed in Arenig Mountain, Wales, where they were originally described by Sedgwick, and composed part of his Cambrian system. The group is divided into two or three parts and a number of zones based on the predominance of certain species of graptolites.—**Ariyalur group,** in the Cretaceous series of India, the uppermost and most highly fossiliferous division.—**Arundel group,** one of the divisions of the so-called Potomac formation in the Atlantic coast States, regarded as appertaining to the Jurassic formation together with the Patuxent group. Its strata contain a considerable number of vertebrate remains having Jurassic affinities.—**Aubrey group** [*Aubrey City* on the Colorado river], a heavy series of beds exposed in the Grand Cañon of the Colorado and belonging to the Carboniferous system. It is divided into an upper limestone division, estimated by Gilbert to have a thickness of 835 feet, and a lower sandstone series, 1,455 feet thick: below this is the Red Wall limestone, 970 feet thick, which in part contains fossils of Lower Carboniferous age.—**Aultbea group,** a subdivision of the Torridonian strata of northern Scotland.—**Auxochromous group.** See ★*auxochromous*.—**Azoxy group.** See ★*azoxy*.—**Baggy group** [*Baggy Point*, a cape on the northwest coast of Devonshire], a group of sandstones and shales in North Devon constituting a division of the Upper Devonian, lying below the Pilton shales and grits and above the Pickwell-Down grit. These rocks contain a fauna of marine invertebrates unlike those at a corresponding horizon in South Devon, but widely represented in other countries.—**Bahian group,** a division of the rock series in Brazil, regarded as of Lower Cretaceous age.—**Bajocian group,** a division of the Jurassic system, recognized in Great Britain as equivalent to the Inferior Oölite, including the Northampton sands at the base and the Cheltenham beds of Yorkshire, and attaining in France and the Jura a thickness of 600 feet, in which the rocks are in considerable part coral-reef limestones, but contain an abundance of other fossils, especially ammonites.—**Bala group,** a name introduced by Sedgwick for a series of shales, grits, and sandstones occurring about Bala in Merionethshire and regarded as a part of the Cambrian system. Murchison subsequently interpreted these as equivalent to the sandstones of Caer Caradoc in Shropshire, and the formation is now generally known as the Caradoc or Bala group. In the Bala district there are more than 1,400 feet of strata separated by limestones. The formation abounds in fossils, and on the basis of some of these, especially the graptolites, has been divided into zones. In a general way the fauna shows relation with the later stages of the Lower Silurian of New York and presents even later affinities.—**Balatonian group** [*Balaton*, a lake in Hungary], a division of the pelagic Triassic rocks of the Mediterranean province as recognized by the Austrian geologists. It constitutes the lower division of the Anisian stage and is equivalent to the Lower Muschelkalk or Wellenkalk of the northern Alps and Germany.—**Bartonian group,** in the geology of France, Belgium, and southern Europe, deposits of Upper Eocene age regarded as equivalent in age to the Barton clay of the Hampshire basin in England.—**Bathonian group,** the name now generally adopted, in harmony with uniform terminology, for the Great or Bath Oölite group, which includes, in Great Britain, all the formations of Jurassic age which constitute the upper division of the Lower Oölites—namely, from the bottom, the Great or Bath Oölite, the Stonesfield slate, the Forest marble, the Bradford clay, and the Cornbrash. The term is also in use on the continent of Europe, especially in the geology of France and the Jura, where the succession of Jurassic deposits is similar.—**Bernician group,** a name given to the thick series of sandstones and conglomerates in Northumberland, England, which represent the Carboniferous deposits.—**Blanco group,** lacustrine beds of Pliocene age occurring at Blanco Cañon, Texas, and extending northward.—**Bosnian group,** a division of the Triassic rocks of the Mediterranean province regarded by the Austrian geologists as equivalent to the Upper Muschelkalk. It lies above the Balatonian and constitutes the uppermost member of the Lower Jurassic.—**Bridger group,** a subdivision of the Eocene formation, extending north of the Uintah Mountains in Wyoming. It is underlain by the Wahsatch beds and overlain by alluvium, and consists of lacustrine beds which are regarded by paleontologists as equivalent to the Parisian or Calcaire grossier. It has afforded large snakes, 20 feet long, tillodonts, *Quadrumana*, and creodonts, and is remarkable for the remains of *Dinocerata* (*Dinoceras ingens*).—**Burdiehouse group** [*Burdiehouse*, a hamlet in Midlothian], a division of the Carboniferous system of rocks as developed in central Scotland, consisting chiefly of sandstones and limestones, the former widely used for construction purposes.—**Burlington group,** a division of the Lower Carboniferous beds of the Mississippi valley, typically developed about Burlington, Iowa. It lies above the Choteau limestone and beneath the Warsaw shales and limestones. The formation abounds in fossils, especially crinoids.—**Calceola group.** See ★*calceola*.—**Caloosahatchee group,** a division of the Pliocene Tertiary rocks of Florida, constituting the lower part of the Floridian series.—**Caradoc group.** See *Bala* ★*group*.—**Carbonaceous group,** a division of the Carboniferous Limestone series in Northumberland, England, lying between the Fell sandstone beneath and the Redesdale limestone above, and having a thickness of from 800 to 2,500 feet.—**Catskill group,** a name introduced by the New York geologists for a division originally regarded as equivalent to the Old Red Sandstone formation of Great Britain, but subsequently construed as a distinct element in the succession of marine Devonian deposits, and more recently demonstrated to be a lacustrine or lagoon formation contemporaneous with marine deposits of late Devonian time—a conception implying their equivalence to the typical Old Red Sandstone and fortifying the original interpretation.—**Chari group,** a division of the Jurassic system corresponding to the Callovian and Oxfordian, and highly developed in the Cutch region of India.—**Chase group,** a division of the Permian formation in Kansas.—**Cherry Ridge group,** a division of the Catskill formation in eastern Pennsylvania.—**Chico group,** a subdivision of the Cretaceous formation of the Pacific border, extending from

Lower California northward beyond the Queen Charlotte Islands. It is regarded by Californian geologists as equivalent to the Upper Cretaceous and as forming an unbroken series with the Tertiary. It attains a thickness of nearly 4,000 feet. It is underlain near the coast by the Horsetown beds of the Shasta series, and farther east by Jura-Trias and Carboniferous deposits, and overlain in California and Oregon by the Tejon beds. Its fauna is characterized by the blending of Cretaceous with Tertiary types.—**Chidra group,** a division of the Permian system in the Salt Range of India.—**Colorado group,** a series of Cretaceous beds in the continental interior of America, lying above the Dakota and below the Fort Pierre group. It is divided into a lower (Fort Benton) division and an upper (Niobrara) division, which together attain a maximum thickness of about 3,000 feet.—**Croatan group,** an upper member of the Floridian series of marine Pliocene beds in the peninsula of Florida.—**Cuchara group,** a division of the Lower Eocene Tertiary in Colorado.—**Dagshai group** [*Dagshai* in India], a division of the Eocene Tertiary in the Simla district of India.—**Denver group,** the upper member of the so-called Laramie formation of the Denver basin in Colorado, regarded by some writers as of Lower Tertiary age, by others as belonging to the late Cretaceous.—**Derived group,** in *math.*, the self-conjugate subgroup generated by the combinants of the r infinitesimal generating operations of any given continuous group, if the number of them that are linearly independent is less than r.—**De Soto group,** an upper division of the Floridian series of Pliocene Tertiary age in the South Atlantic States.—**Diabeg group,** the lowest member of the Torridonian series of Precambrian rocks in the north of Scotland, consisting of sandstones, shales, and limestones.—**Diestian group** [*Diest,* a place in Belgium], a division of the Lower Pliocene Tertiary in Holland and Belgium, equivalent to the Lenham beds of Great Britain.—**Dominant group.** See *subdominant* ★*group.*—**Factor group.** See ★*factor.*—**Famennian group** [*Famenne* (*Famène,* Ritter), a district in the western part of Luxemburg, a province of Belgium], the uppermost division of the Devonian in Belgium and northern France, consisting of sandstones and shales, and divisible into the Condroz psammites above and the Famenne shales below. The beds carry many fossils closely allied to those of the Chemung beds of New York and Pennsylvania.—**Farrington group,** a division of the Upper Coal-measures in the Bristol coal-basin, England.—**Fort Pierre group,** a division of the Cretaceous system in the interior of the United States, lying below the Fox Hills group and above the Colorado formation. It consists largely of bituminous shales and clays carrying an abundance of molluscan fossils.—**Fox Hills group,** a division of the Cretaceous system in the interior region of the United States, lying below the Montana formation and above the Fort Pierre group. The rocks are chiefly sandstones with interbedded coal deposits.—**Gordon River group,** an upper division of the Lower Silurian system in Tasmania, consisting of limestones and conglomerates, and containing a considerable and varied fauna.—**Group method,** in *forestry,* a method of conservative lumbering in which groups of young trees which have sprung up in openings caused by logging, damage by insects, windfall, snow-break, or other agency, are taken as starting-points for the future forest, or if these are insufficient, small openings are purposely made. Reproduction by self-sown seed from the mature stand at the edges of these groups is secured by careful cuttings, which extend the groups until they join.—**Group mixture,** in *forestry,* a mixed forest in which trees of the same species occur in groups not large enough to be considered pure stands.—**Group of a function,** in *math.*, the group of substitutions on the variables, which leave the function unaltered.—**Group of substitutions.** See ★*substitution.*—**Group seed method,** in *forestry,* a method of conservative lumbering in which the forest is reproduced after a single cutting by leaving seed-trees of the kind desired in groups.—**Group selection, velocity.** See ★*selection,* ★*velocity.*—**Heisenstein group,** a subdivision of the Permian system in the Vosges Mountains, lying near the base of the series, underlain by the arkose and shale containing *Callipteris conferta,* and overlain by the tuffs and marls of Meisenbuckel.—**Helderberg group,** a term loosely applied, in New York geology, to formations of the Helderberg Mountains in eastern New York, embracing a lower (Lower Helderberg) and an upper (Upper Helderberg) division, the two being separated by the Oriskany sandstone. The term is no longer used in this sense, but is restricted to the lower division (Helderberg or Helderbergian), to which it was originally applied.—**Huerfano group,** a subdivision of the Tertiary system in southern Colorado. It is correlated with the beds of the Bridger basin of Middle Eocene age.—**Improperly discontinuous group,** in *math.*, a group such that its substitutions are generally finite but in certain special cases are infinitesimal.—**Integrable group,** in *math.* When G is a given continuous group, G_1 the derived group of G, G_2 that of G_1, and so on, if the series G, G_1, G_2, . . . terminates with the identical operation, G is an *integrable group.*—**Kaskaskia group,** a subdivision of the Subcarboniferous or Mississippian rocks in the Mississippi basin, forming the top of that series and underlain by the St. Louis group. It attains a thickness of 600 feet and contains beds of limestone full of fossil remains, as the Pentremital and Archimedes limestones.—**Keokuk group,** a subdivision of the Subcarboniferous or Mississippian series in the Mississippi basin. It follows the Burlington limestone and is overlain by the Warsaw shales and limestone, which are frequently united with it. It consists mostly of limestone, but also contains a well-known geode-bed, bearing geodes of large size with many minerals. Its fauna is noted for its coarse and large crinoids of massive construction and its hexactinellid sponges of the genera *Hydnoceras, Physospongia,* and *Phragmodictya.*—**Kinderhook group,** the lowest division of the Subcarboniferous or Mississippian group in the Mississippi basin. It is underlain by Devonian rocks and overlain by the Burlington limestone, and comprises various subdivisions, the most persistent of which are the lithographic limestone, the vermicular sandstone and shales, and the Choteau limestone. Its rocks are sandstones, shales, and limestones, and its fauna is marine.—**Kleinian group,** in *math.*, a group of linear substitutions, $x_1 = (\alpha x + \beta) \div (\gamma x + \delta)$, where $\alpha, \beta, \gamma, \delta$ are imaginaries, and $\alpha\delta - \beta\gamma = 1$.—**Lacian group,** the lower division of Juvavian stage in the pelagic Triassic series of the Mediterranean basin and of India.—**Lafayette group,** a division of the Tertiary rocks, now regarded as of Pliocene age in the Gulf region of the United States, lying above the Floridian series and regarded as equivalent to the Lagrange, the Orange sand, and the Appomattox groups of this region.—**Lewisian group,** a group of gneisses and related metamorphic rocks belonging to the archæan and occurring in northern Scotland and the Hebrides: named by Murchison (1858) from the island of Lewis.—**Little River group,** a series of strata in Nova Scotia referred to the Middle Devonian.—**Lower Helderberg group,** a term introduced by the New York geologists and equivalent in present usage to the Helderberg group or Helderbergian. Its rocks are of earliest Devonian age. See *Helderberg* ★*group.*—**Lynton group,** the middle division of the Lower Devonian rocks of North Devon, consisting of grits and calcareous slates, lying between the Foreland grits beneath and the Hangman grits above.—**Marion group,** an upper division of the Permian rocks in Kansas.—**Marshall group,** the lowest division of the Lower Carboniferous or Mississippian series in Michigan.—**Menevian group,** a name proposed by Salter and Hicks for a series of Middle Cambrian sandstones, shales, slates, flags, and grits which are seen near St. Davids (Menevia) in Wales, where they attain a thickness of about 600 feet and lie conformable to both Upper and Lower Cambrian. They abound in marine fossils.—**Midway group,** the lowest member of the Eocene Tertiary in the States of Alabama and Georgia, and extending westward into Arkansas and Texas.—**Monodromy group** of a linear equation or system of linear equations, a set of transformations, not depending on arbitrary variable parameters, arising for one particular fundamental set of solutions of the linear equation or system of linear equations.—**Nashville group,** a series of shale beds in eastern Tennessee, lying above the horizon of the Trenton limestone and regarded as equivalent to the Lorraine shales of New York or the Richmond beds of Indiana.—**Navesink group,** a subdivision of the Cretaceous rocks in New Jersey equivalent to the Lower Greensand, lying above the Raritan clays and below the Upper Greensand.—**Niobrara group,** a division of the Cretaceous system in the interior region of the United States. It is regarded as the upper subdivision of the Colorado formation, which lies below the Montana and above the Dakota formation, the latter constituting the base of the Cretaceous series. It consists largely of chalk and chalky marls, and contains an abundance of organic remains, the most conspicuous of which are the vertebrates, which are represented by several species of mosasaurs, pterodactyls, plesiosaurs, turtles, and the toothed birds *Hesperornis* and *Ichthyornis.*—**Non-integrable group,** in *math.* When G is a given continuous group, G_1 the derived group of G, G_2 that of G_1, and so on, if the series G, G_1, G_2, . . . terminates with a perfect group, G is a *non-integrable group.*—**Oil-creek group,** the lowest division of the Subcarboniferous or Mississippian series in northwestern Pennsylvania. It is regarded as the equivalent of the Pocono group of eastern Pennsylvania.—**Olenellus group,** the lowest division of the Cambrian system, characterized by the presence and culmination of the trilobite genus *Olenellus.*—**Olenidian group,** the uppermost division of the Cambrian system, characterized by the presence and culmination of the trilobite genus *Olenus.*—**Osage group,** a division of the Subcarboniferous or Mississippian rocks in the interior basin of the United States, embracing the Burlington, Keokuk, and Warsaw limestones, and lying above the Kinderhook and below the St. Louis groups.—**Panchet group,** the uppermost member of the middle Gondwana beds in the Triassic of India, consisting of about 1,800 feet of sandstones and red clays containing an abundant flora of ferns, cycads, and conifers, and some vertebrates. Traces of the Panchet fauna and flora have also been found in North Russian (Dwina beds) and in the Beaufort beds of Cape Colony, Africa. The Panchet beds overlie the Damuda beds of Lower Triassic age and are overlain by sandstones of Jurassic age.—**Paradoxidian group,** the Middle Cambrian formations of shales, sandstones, and limestones, characterized by the presence of various species of the trilobitic genus *Paradoxides.* The group underlies the Upper Cambrian or Olenidian series, and overlies the Lower Cambrian, Georgian, or Olenellus group. It is well developed in New Brunswick, Canada, and Newfoundland, where it constitutes the middle or Acadian division of the St. John group. It includes the Braintree argillites of eastern Massachusetts, and is represented in Europe by the Menevian of Great Britain and the Paradoxides shales of Scandinavia, Russia, Bohemia, and Spain. The contained fauna consists of numerous trilobites, with some brachiopods, worm-tubes (hyolithids), rare gastropods, echinoderms, and spongespicules. Also called *Paradoxidian series.*—**Patapsco group,** the basal member of the Cretaceous series of Maryland, consisting of party-colored clays and sands lying unconformably upon the Arundel beds, and overlain by the Raritan groups. The beds have furnished a considerable flora comprising ferns, cycads, conifers, monocotyledons, and some primitive dicotyledons.—**Perfect group,** in *math.*, one which coincides with its derived group.—**Pogonip group,** a series of limestone and shale beds, of Silurian age, in the Eureka district of Nevada. It is about 3,000 feet thick and contains faunas of mixed Cambrian and Silurian expression in its lower portions, and of Lower Silurian expression in successively higher zones.—**Potomac group.** See *Potomac* ★*formation.*—**Predominant group.** See *subdominant* ★*group.*—**Puerco group,** the basal member of the terrestrial Eocene Tertiary, developed in the San Juan basin of northwestern New Mexico, lying upon the marine and brackish-water Laramie beds of the Upper Cretaceous and beneath the Torrejon formation. This formation has furnished a large number of multituberculate mammals (*Polymastodon, Neoplagiaulax, Tritisodon, Protochriacus*) and some condylarths and edentates.—**Purin group,** in *chem.*, a group consisting of an alloxan group, $C_4H_2O_4N_2$, joined to a urea radical, as shown in the diagram:

A group of this order enters into the structure of the purin bases and of uric acid. The group suggests the existence of a common mother-substance of the composition

which has been termed *purin.*—**Random group,** a division of the Precambrian rocks of Newfoundland, consisting of sandstones, shales, and conglomerates, and lying immediately below beds of Precambrian age believed to contain organic remains. See *Momable* ★*slates.*—**Raritan group,** the uppermost division of the Potomac series or Lower Cretaceous of the coastal belt in the eastern United States, equivalent in part to the ★Albirupean group (which see).—**Rationality group,** in *math.*, a linear homogeneous group of transformations every operation of which corresponds to a rational transformation of the solution of a resolvent equation.—**Red Wall group,** a name given by Powell to the Lower Carboniferous beds in the Grand Cañon of the Colorado.—**Regular group,** in *math.*, a transitive group of the order n, on n letters.—**St. Louis group,** a division of the Lower Carboniferous or Mississippian series in the interior basin of the United States. See *St. Louis limestone.*—**Shenango group,** the uppermost division of the Subcarboniferous or Mississippian series in northwestern Pennsylvania.—**Sub-dominant group,** in *entom.*, in Kirby's system, those groups of insects which either never enter the tropics or those tropical insects whose range does not exceed 50° in the Old World or 43° in the New: in contradistinction to his *predominant groups* and *dominant groups,* in the first of which he includes groups extending from the arctic region, where vegetation ceases, to the equator, and in the second those which reach to the tropics but fall short of the polar circles.—**Symmetric group,** in *math.*, a group containing all the $n!$ substitutions on n elements.—**Theory of groups,** in *math.*, a branch of mathematics which expounds the properties of mathematical groups of operations or substitutions or transformations.—**Tonto group,** a series of sandstones of Cambrian age exposed in the Colorado cañon of Arizona, lying unconformably between the highly tilted Algonkian beds below and the massive Red Wall limestone of Lower Carboniferous age above. The series has a lower division, 300 feet thick, of red sandstones, containing *Scolithus,* and an upper division, 475 feet thick, of greenish shales and sandstones with impure limestones, containing *Obolella, Lingulella,* and *Ptychoparia.*—**Torbay group,** a series of green, purple, and red slates aggregating about 3,000 feet in thickness, and forming, according to Walcott, the second formation above the Precambrian series of Newfoundland. The only fossil reported is a supposed species of the calcareous alga *Oldhamia.*—**Torrejon group,** the upper member of the basal Eocene terrestrial series, typically developed in the vicinity of Torrejon, in the San Juan basin of northwestern New Mexico. It is intermediate in age between the Puerco formation below and the Wahsatch above. It contains a large mammalian fauna with multituberculates, creodonts, condylarths, amblypods, and some edentates, rodents, and primates.—**Torridonian group,** the upper member of the Precambrian series of Great Britain, consisting of red sandstones, shales, and conglomerates, aggregating from 8,000 to 10,000 feet in thickness in northern Scotland, lying unconformably upon the older Lewisian gneiss and, likewise unconformably, below the basal Cambrian beds. The sandstones and conglomerates have the appearance of being terrestrial deposits, are largely metamorphosed, and have furnished a few traces of animal life in the form of trails or tracks on the surfaces of the beds.—**Uintah group,** the uppermost subdivision of the Eocene Tertiary in the Rocky Mountain region, developed to the south of the Uintah Mountains in Utah. It includes three fossiliferous horizons: the upper or Uintah beds proper, the lower or *Telmatotherium* beds, and at the base an equivalent of the upper part of the Bridger group of the Fort Bridger basin. Its thickness is about 800 feet, and its rocks are chiefly fresh-water deposits with a great abundance of terrestrial mammalian remains.—**Wahsatch group,** the lower division of the Lower Eocene Tertiary in the Wahsatch Mountains of Utah, lying below the Wind River group and above the Torrejon group. These strata have also been named the *Coryphodon beds.* They carry an extensive series of mammalian remains, among which are *Phenacodus,* the primitive type of the equine stock, several species of *Coryphodon, Hyracotherium,* etc.—**Wichita group,** the lower division of the Permian beds in Texas, carrying a flora of ferns and *Walchia,* and a fauna of cephalopods, fish, amphibia, and reptiles.—**Wind River group,** a division of the Lower Eocene, in the vicinity of the Wind River of Wyoming, lying above the Wahsatch group and below the Bridger beds: also called the *Bathyopsis beds.* This division abounds in mammalian remains—the primitive horses, *Phenacodus* and *Proterohippus,* together with *Coryphodon, Hyracotherium, Bathyopsis,* and others.—**Woodstock group,** the uppermost division of the Eocene Tertiary beds in the region of Maryland and Virginia, bordering the Potomac river, and regarded as representing in part the middle division of the Eocene of the Gulf States.

groupage (grö′pāj), *n.* [*group* + *-age.*] Grouping; arrangement in groups. *B. Taylor.*

group-breaker (gröp′brā″kėr), *n.* In *elect.*, a switch or circuit-breaker, in a power-station, so arranged as to break simultaneously a group of circuits.

grouper, *n.* 2. Any one of many different fishes in different countries. The name is applied to different species of serranoid fishes resembling or supposed to resemble the serranoid fishes properly so named.—**Black grouper.** (*a*) See *grouper.* (*b*) The black jewfish, *Garrupa nigrita.* (*c*) *Mycteroperca bonaci.*—**Mangrove grouper,** a large fish of the family *Serranidæ, Mycteroperca boulengeri.* [Gulf of California.]—**Poison grouper,** *Scorpæna plumieri,* a fish found from Florida to Brazil.—**Yellow grouper,** a name given in the Galapagos Islands to the large grouper *Mycteroperca olfax.*—**Yellow-finned grouper,** a large fish, *Mycteroperca venenosa,* of the family *Serranidæ.* [Florida.]

group-flashing (grōp′flash″ing), *n.* The flashing of a light with varying periods between the flashes, as in lighthouses. The flashes of a group, two or three in number, are separated by very short intervals and each group is divided from the next group by a much longer period of darkness.

group-marriage (grōp′mar″āj), *n.* A form of marriage in which a group of men are considered the husbands of a group of women. *Keane*, Man Past and Present, p. 153.

group-mind (grōp′mīnd), *n.* In *social psychol.*, the collective mind of a group, class, or society; the stock of beliefs, customs, attitudes; etc., common to the members of such a group.

Some have maintained that the promptings of the *group-mind* as felt by the individual belong in the unconscious or involuntary part of his nature, and partake of the character of mechanical necessity.

Brinton, Basis of Social Relations, p. 24.

group-type (grōp′tīp″), *n.* The common mental and moral type, and the prevailing manner of a social group. *E. A. Ross*, in Amer. Jour. Sociol., VIII. 762.

group-wife (grōp′wīf), *n.* A woman who is one of a group considered to be the wives of a group of men. See ★*group-marriage*.

Dr. Howitt says, "the germ of individual marriage may be seen in the Dieri practice; for as I shall show later on, a woman becomes a Tippa-malku wife before she becomes a Pirrauru or *group-wife*."

Nature, Jan. 5, 1905, p. 226.

group-will (grōp′wil), *n.* An agreement or concert of individual wills; the common purpose and determination of a social group. *E. A. Ross*, in Amer. Jour. Sociol., VIII. 762.

group-wise (grōp′wīz), *a.* Directed upon the group rather than the individual; pertaining to the interest of the group. *E. A. Ross*, Social Control, p. 28.

grous, *n.* Same as *grouse*.

grouseberry (grous′ber″i), *n.* The American wintergreen or checkerberry, *Gaultheria procumbens*. See *wintergreen*, 2.

grouse-locust (grous′lō″kust), *n.* A locust or grasshopper of the subfamily *Tettiginæ*. *J. B. Smith*, Econ. Entom., p. 92.

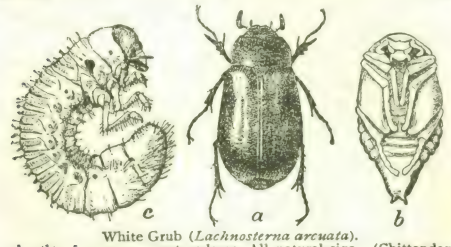
grove-snail (grōv′snāl), *n.* A snail, *Helix nemoralis*.

grow, *v. i.* 6. Of a crystal, to develop or enlarge by the addition of molecules arranged in accordance with the laws of molecular attraction.—**Growing pottery,** earthenware or crockery which exhibits the phenomenon of a crystalline growth on its surface, caused by the chemical action of some of its constituents.

growing-pains (grō-ing-pānz″), *n. pl.* Various indefinite pains about the joints, especially of the lower extremities, in children and adolescents.

growing-point (grō′ing-point), *n.* In *bot.*, the cone of growth at the tip of the stem, at which the apical cell is located and which is the seat of vegetative activity.

growth, *n.*—**Apical growth.** See ★*apical*.—**Basal growth.** See ★*basal*.—**Cone of growth.** See ★*cone*.—**Determinate growth,** growth which ends with a bud at the conclusion of the season.—**Line of growth,** in mollusks, especially bivalves, one of the concentric lines that mark the external surfaces of the shell and run parallel to the free margin. Each line represents a period of rest in the process of the formation of the shell.—**Old field growth.** See *volunteer* ★*growth*.—**Second growth,** forest growth which comes up naturally after cutting, fire, or other disturbing cause.—**Volume growth.** See ★*increment*, 6.—**Volunteer growth,** in *forestry*, young trees which have sprung up in the open, as white pine in old fields, or cherry or aspen in burned tracts.



growth-line (grōth′līn), *n.* Any line which marks a stage of growth in an organism: as, the *growth-lines* of a plant or of a shell.

growth-ring (grōth′ring), *n.* A line of growth. See ★*growth*.

growthy (grō′thi), *a.* [*growth* + *-y*[1].] Somewhat overgrown; of rather more than the usual size. [Colloq.]

She was easily third and Mr. Clough's *growthy* imported Merlin heifer Dorcas had to stand scaling down to fourth. *Rep. Kan. State Board Agr.*, 1901–02, p. 194.

grub, *n.* 4. In *cricket*, a ball bowled along the ground. Also called, in the slang of cricket, *sneaker* and *daisy-cutter*.—**Jug-handle grub,** the chrysalis of any one of several large sphingid moths, as the tobacco-sphinx, or the tomato-sphinx. [Local., U. S.]—**White grub,** the larva of any scarabæid beetle; especially of the *Melolonthini*, and the genus *Lachnosterna*. The white grubs of *Lachnosterna* and *Cyclocephala* or May-beetles do great damage to grass-land and to strawberry, potato, and other crops planted in old sod. Other well-known forms belong to the genera *Allorhina* or June-beetles, *Ligyrus*, and *Cotalpa*.

White Grub (*Lachnosterna arcuata*).
a, beetle; *b*, pupa; *c*, mature larva. All natural size. (Chittenden, U. S. D. A.)

Grubbia (grub′i-ä), *n.* [NL. (Bergius, 1767), named in honor of Michael *Grubb*, director of the Swedish East India Company and a patron of science.] A genus of plants, constituting the family *Grubbiaceæ*. They are heather-like shrubs, with opposite, entire, linear or lanceolate, coriaceous leaves having revolute margins, and small flowers in clusters of three, the clusters borne singly in the axils of the leaves or congested in axillary cones. There are three species, all South African.

Grubbiaceæ (grub-i-ā′sē-ē), *n. pl.* [NL. (Endlicher, 1838), ⟨ *Grubbia* + *-aceæ*.] A family of dicotyledonous apetalous plants of the order *Santalales*, containing the single genus ★*Grubbia* (which see).

grub-fungus (grub′fung″gus), *n.* A fungus which attacks the grubs of buried insects and replaces the body of the larva with mycelium. The fruiting bodies of the fungus often develop from the head, giving a peculiar horned effect. The common American species is *Cordyceps Ravenelii*. *C. Sinensis* is used medicinally in China. See *Cordyceps*, with cut.

grub-prairie (grub′prā″ri), *n.* Land full of roots requiring to be grubbed out. See the extract. [Upper Mississippi region.]

In *grub-prairies* in the Northwestern states, the soil is full of the roots of trees and bushes, often of the jack-oak, hazel, etc., that have been killed back to the roots by annual fires.

F. B. Hough, Elements of Forestry, p. 52.

grub-screw (grub′skrō), *n.* A set-screw having no head but simply a slot for receiving the screw-driver by means of which it is turned. *Jour. Brit. Inst. of Elect. Engin.*, 1902–03, p. 384.

grubstake (grub′stāk), *v. t.*; pret. and pp. *grubstaked*, ppr. *grubstaking*. [*grub-stake, n.*] To fit out or supply with appliances, etc., for some operation or undertaking, on condition of sharing in the profits. See *grub-stake, n. Electrochem. Industry*, March, 1904, p. 103.

gruenerite, *n.* See ★*grünerite*.

gruff[1], *n.* 2. Crude or impure saltpeter, as imported from India.

Gru-gru worm. Same as *gru-gru*, 1.

grünauite (grü′nou-īt), *n.* [G. *Grünau* + *-ite*[2].] A complex metallic mineral containing sulphur, bismuth, nickel, etc.: perhaps only a mixture of the nickel sulphid polydymite with bismuthinite and other species: from Grünau, Germany.

grundy-swallow (grun′di-swol″ō), *n.* [A popular perversion of the original (AS. *grundeswelge*, properly *gundeswelge*) of *groundsel*[1], q. v.] The golden ragwort, *Senecio aureus*.

grünerite (grü′ner-īt), *n.* [Named after E. L. *Grüner*, who analyzed it.] An iron amphibole ($FeSiO_3$) occurring in brown fibrous forms.

grüneritization (grü″ner-ī-ti-zā′shọn), *n.* [*grünerite* + *-ize* + *-ation*.] In *petrog.*, the alteration of the minerals in a rock to grünerite or iron metasilicate in the form of amphibole.

grünlingite (grün′ling-īt), *n.* [Named after Herr *Grünling*, a German mineralogist.] A compound of bismuth, tellurium, and sulphur, perhaps Bi_4TeS_3. It resembles tetradymite.

grunt, *n.* 3. Among the various fishes of the genus *Hæmulon* and family *Hæmulidæ*, so named, are the following: Black grunt, *Hæmulon bonariense*; boar-grunt, *H. sciurus*; French grunt, *H. flavolineatum*; gray grunt, *H. macrostomum*; grunt blackfish, *H. bonariense* (see ★*blackfish*); Margaret grunt, *H. album*; open-mouthed grunt (same as *French* ★*grunt*); red-mouthed grunt, *Bathystoma rimator*; striped grunt, *Hæmulon macrostomum*; white grunt, *Bathystoma striatus* (see also *capeuna*); yellow grunt (same as *boar-*★*grunt*).

grunter, *n.*, 1. (c) A horse which has the habit of emitting a sound during expiration, when suddenly moved or startled.

Grusian (grö′zi-ạn), *a.* and *n.* [Russ. *Gruziya*, Georgia, + *-an*.] Same as *Georgian*[2].

gryllid (gril′id), *n.* and *a.* **I.** *n.* A member of the family *Gryllidæ*.

II. *a.* Of or belonging to the orthopterous family *Gryllidæ*.

gryochrome (grī′ō-krōm), *n.* [Said to be formed (by Nissl) from Gr. *γρῦ*, taken in the sense of 'the dirt under the nail,' + *χρῶμα*, color.] In *neurol.*, a nerve-cell in which the chromatic substance exists in the form of minute basophil granules which give the stained protoplasm a dusty appearance.

There is also a considerable number of cells in which the basophile substance is present as fine granules giving a blue dusty appearance to the cell body. These cells Nissl describes as "*gryochromes*."

F. R. Bailey, in Jour. Exper. Med., Oct. 1, 1901, p. 579.

gryphosis (gri-fō′sis), *n.* An incorrect form of *gryposis*.

Grypocera (gri-pos′ẹ-rä), *n.* See ★*Netrocera*, 2.

Grypoceras (grip-os′ẹ-ras), *n.* [Gr. *γρυπός*, curved, + *κέρας*, horn.] A genus of ammonoid cephalopods or ammonites from the Triassic rocks.

Grypotherium (grip-ō-thē′ri-um), *n.* [NL., ⟨ Gr. *γρυπός*, curved, + *θηρίον*, beast, in allusion to the claws.] A genus of extinct ground-sloths, related to and closely resembling *Mylodon* and *Megatherium*. Some members of the genus were contemporary with early man in southern South America, and one species, *G. listai*, remains of which were found in a cave in Patagonia, is supposed to have been kept in a state of domestication.

G. S. An abbreviation (*a*) of *Grand Scribe*; (*b*) of *Grand Secretary*; (*c*) of *Grand Sentinel*; (*d*) of *Grand Sentry*.

Gshelian (gshel′i-ạn), *n.* [Russ. *Gshel('sk)* a district in Russia, + *-ian*.] In *geol.*, one of the divisions of the Carboniferous system on the continent of Europe which constitutes the marine type of the uppermost part of the system. The term 'Stephanian' is applied to the lagoon type of the same period. The Gshelian is better known as the *Uralian* from the high development of the formation in the Ural Mountains.

G-string, *n.* 2. A narrow strip of cloth worn as a breech-clout. *J. Mooney*, Child life: in Cyc. of Indian Tribes.

G. T. An abbreviation (*a*) of *Good Templar*; (*b*) of *Grand Tiler*.

Gt. Br., Gt. Brit. Abbreviations of *Great Britain*.

gu. An abbreviation (*a*) of *guinea*; (*b*) of *gule*.

guaba (gwä′bä), *n.* [Porto Rican.] Same as ★*guava*, 2.

guacamaia (gwä-kä-mī′ä), *n.* [NL., ⟨ Central American and W. Ind. *guacamaya*, a parrot.] A large parrot-fish, *Scarus Callyodon guacamaia*. It is characterized by deep-blue teeth and is found in the West Indies.

guacamphol (gwä-kam′fōl), *n.* [*gua(iacol)* + *camph(or)* + *-ol*.] An ester of guaiacol and camphoric acid. It is suggested as a remedy for the night-sweats of phthisis; also as an intestinal antiseptic.

guacima (gwä′sē-mä), *n.* [Haytian name.] In Porto Rico, *Guazuma guazuma*, a handsome tree of the order *Sterculiaceæ*, which has elm-like leaves and axillary clusters of small yellowish-white flowers. The fruit is an oval hard nut having blunt projecting tubercles all over its surface. On the Pacific coast of Mexico the nuts are made into a drink called *orchata de gudcima*, to which sugar and lemon are usually added. They contain mucilage and are sometimes administered as a remedy for gonorrhea. The inner bark is also used medicinally. It is mucilaginous and is adapted for poultices. It is quite tough and has been used for cordage. The tree is admirably adapted for avenues. It may be repeatedly trimmed and soon sends forth a luxuriant growth of small branches which form a dense head. The young branches and fruit are much relished by cattle. The wood, sometimes called *bastard cedar*, is used for tubs, furniture, and interior woodwork.

Guacima (*Guazuma Guazuma*). One fourth natural size.

guacin (gwä′sin), *n.* [*guaco* + *-in*[2].] An amorphous bitter principle obtained from the leaves of guaco.

guaco, *n.* 3. Same as ★*huaco*.

guacocoa (gwä-kō-kō′ä), *n.* [Cuban.] A tree of the family *Daphnaceæ*, *Daphnopsis Guacacoa*, which yields a very strong, white bast-fiber.

guadalcazarite (gwä-däl-kaz′a-rīt), *n.* [*Guadalcazar*, in Mexico, + *-ite*[2].] Sulphid of mercury (metacinnabarite) containing a small amount of zinc.

guadil (gwä-dēl′), *n.* [Guanche name in the Canary Islands.] One of the shrubs which produce rhodium-wood, *Convolvulus floridus*. It is an ornamental shrub, from 4 to 6 feet high, the branches and linear leaves of which are covered with a white powder. The flowers are pure white, so that when the plant is in bloom it has the appearance of being covered with snowflakes.

guaethol (gwä-eth'ōl), *n.* [*gua(iacum)* + *eth(er)* + *-ol.*] Same as ★*ajacol.*

guaguanche (gwä-gwän'che), *n.* [Cuban.] A small barracuda, *Sphyræna guachancho*, found in the waters of Cuba.

guaiacal (gwī'a-kal), *n.* [*guaiac(um)* + *-al*[3].] A little used name for crotonaldehyde, $CH_3CH:CHCHO$, which is also called *2-butenal.*

guaiacene (gwī'a-sēn), *n.* [*guaiac(um)* + *-ene.*] Same as ★*guaiol*, the incorrect name for ★*tiglic aldehyde.*

guaiacetin (gwī-as'e-tin), *n.* [*guai(acum)* + *acet(ic)* + *-in*[2].] Pyrocatechin-monoacetic acid: used in medicine in about the same way as guaiacol.

guaiacol (gwī'a-kōl), *n.* Same as *guiacol.*

guaiacolate (gwī'a-kō-lāt), *n.* [*guaiacol* + *-ate*[1].] A salt of guaiacol.

guaiaconic (gwī-a-kon'ik), *a.* [*guaiacum* + *-one* + *-ic.*] Derived from guaiacum resin.—**Guaiaconic acid**, a resinous, levorotatory compound, $C_{38}H_{40}O_{10}$, which is obtained from guaiacum resin. It melts at 100° C., constitutes 70 per cent. of the crude guaiacum resin, and turns blue in the presence of oxidizing agents. Also called *a-resin.*

guaiacyl (gwī'a-sil), *n.* [*guaiac-um* + *-yl.*] A whitish amorphous compound, $(C_6H_3.O.CH_3)_2(O_2Ca)(HSO_3)_2$, the calcium salt of guaiacol sulphonic acid: used as a local anesthetic.

guaiakinol (gwī'a-kin-ōl), *n.* [*guaia(cum)* + *kina* + *-ol.*] A guaiacolate of quinine.

guaiamar (gwī'a-mär), *n.* [*guai(acol)* + L. *amarus*, bitter.] The glycerol ester of guaicol: used in medicine in about the same way as guaiacol.

guaiaperol (gwī-ap'e-rōl), *n.* [*guaia(col)* + *(pi)per(idine)* + *-ol.*] A crystalline compound, $C_5H_{11}N.(C_7H_8O_2)_2$, obtained by the action of piperidine upon guaiacol: used in tuberculosis.

guaiaquin (gwī'a-kwin), *n.* [*guaia(col)* + *quin(ine).*] A yellowish solid of bitter taste consisting of quinine-guaiacol sulphonate, $C_6H_3O_2.CH_3.HSO_3.C_{20}H_{24}N_2O_2$: an odorless substitute for guaiacol.

guaiaquinol (gwī'a-kin-ōl), *n.* [*guaia(cum)* + *quina* + *-ol.*] Quinine bromguaiacolate. It is used in medicine.

guaiasanol (gwī'a-sa-nōl), *n.* [*guaia(cum)* + L. (†) *sanus*, sound, + *-ol.*] Diethyl-glycocoll-guaiacol hydrochlorid. It is soluble in water, and is used in the same way as guaiacol.

Guaiasanol . . was introduced by E. Einhorn and Hütz as a soluble form of guaiacol. It crystallizes in white prisms, having a faint odor and a saline, bitter taste.
Buck, Med. Handbook, IV. 425.

guaiene (gwī'ēn), *n.* [*guai(acum)* + *-ene.*] A pale blue fluorescent hydrocarbon, $C_{12}H_{12}$, prepared by the distillation of guaiacum resin with zinc dust. It sublimes and forms brilliant plates, which melt at 97–98° C.

guaiol (gwī'ōl), *n.* [*guai(acum)* + *-ol.*] 1. Same as ★*tiglic aldehyde.*—2. Same as ★*champacol.*

guajica (gwä-hē'kä), *n.* [Cuban.] *Pœcilia vittata*, one of the killifishes inhabiting streams in Cuba.

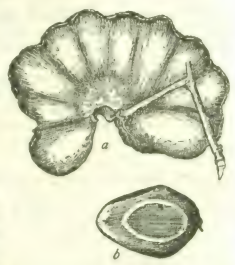
guajilote[1] (gwä-hē-lō'tā), *n.* A variant of ★*cuajilote.*

guajilote[2] (guä-hē-lō'tā), *n.* A corruption of *cuajiote.*

guako (gwä'kō), *n.* [From one of the pueblo languages of New Mexico, prob. Tehua.] A vegetable dye used by the Pueblo Indians to paint their pottery black. It is probably obtained from the root and stalks of a species of *Artemisia.*

guama (gwä-mä'), *n.* [Porto Rican and Venezuelan.] A tree of the mimosa family, *Inga laurina*, extensively used in the West Indies and in Venezuela and Colombia as a coffee shade-tree. It bears broad, bean-like pods, with an edible, sweet, fluffy pulp.

guamacho (gwä-mä'chō), *n.* [Native name in Venezuela.] A tree, *Pereskia Guamacho* of the cactus family, 12 to 15 feet high, which bears yellow flowers and branches covered with long, straight spines. When planted in rows it forms impenetrable hedges. It yields quantities of a pale brown gum, which dissolves completely in water. [Venezuela.]



guamo (gwä-mō'), *n.* [Venezuelan.] Same as ★*guama.*

guamuchil (gwä-mö-chēl'), *n.* [Mexican *guamuchil, huamuchil, guamachil*, < Aztec *quamochitl.*] A tree, *Pithecolobium dulce*, which bears abruptly pinnate leaves and pods which contain a sweet edible aril surrounding the seeds. [Mexican.] See ★*kamachiles.*

guana[2], *n.* [Cuban.] 2. The name in Cuba for the lace-like inner bark of the blue or mountain mahoe, *Pariti elatum*, a malvaceous tree 50 to 60 feet high. The fiber is obtainable in broad bands up to 12 or 15 inches wide. Formerly it was much used for tying up bundles of cigars; its place for this purpose, however, has been taken by specially woven silk bands. It is extensively used in the United States and Europe for making women's hats and millinery trimmings. Commercially known as *Cuba bast.*

guanacaste (gwä-nä-käs'tā), *n.* [Costa Rican.] Same as ★*guanacaztli.*

guanacaztli (gwä-nä-käs'tlē), *n.* [Mex. *guanacaztli*, < Nahuatl *quauhnacaztli*, 'ear-tree,' < *quauitl*, tree, + *nacaztli*, ear.] The ear-drop tree or ear-pad tree, *Enterolobium cyclocarpum*, a large, handsome tree of the mimosa family. It has wide-spreading symmetrical branches, twice-pinnate leaves, globular heads of flowers, and peculiar pods shaped like a human ear, the inner suture of the legume being very much contracted and the outer forming the periphery of a circle, so that the rounded top of the pod meets the rounded base. The pods contain a sweetish pulp surrounding the hard seeds and are eaten by cattle, by means of which the undigested seeds are dispersed without losing their vitality. At Colima, Mexico, the natives use the seeds in times of scarcity as a substitute for maize. The wood is used for troughs, canoes, and in house-building, and the pods and bark are rich in tannin and are used as a substitute for soap in washing. Also called *conacaste* and *guanacaste.*

Guanacaztli (*Enterolobium cyclocarpum*).
a, fruit, one fourth natural size; *b*, seed, three fourths natural size.

guanase (gwä'nās), *n.* [*guan(ine)* + *-ase.*] An autolytic ferment which causes the transformation of guanine to xanthin.

guanazole (gwä'na-zōl), *n.* [*guan(ine)* + *az(ote)* + *-ol.*] A colorless compound, $NH—C(NH)$ / $NH<$ | , $C(NH)NH$ which crystallizes in monoclinic prisms, and melts at 206° C. It is a feeble base, gives a deep red color with ferric chlorid, and is also called 3, 5-*diamino*-1, 2, 4-*triazin.*

guandee (gwän-dē'), *n.* Same as ★*gandul.*

guanidin (gwä'ni-din), *n.* [*guan(ine)* + *-id* + *-ine*[2].] A strong crystallizable base, CH_5N_3, which results on oxidation from guanine. In combination with ornithin, as arginin, it represents one of the most constant decomposition-products of the albuminous molecule.

guanimin (gwä'ni-min), *n.* [*guan(ine)* + *imine.*] A basic substance which is formed by the action of heat upon a guanidin salt of a fatty acid.

guano, *n.*—**Phospho-Peruvian guano**, a trade-name for a mixture of superphosphate of lime and Peruvian guano: used as a fertilizer.

guanobiliary (gwä"nō-bil'i-ā-ri), *a.* [*guano* + *biliary.*] Noting a biliary acid, which probably belongs to the glycocholic-acid group, found in Peruvian guano.

guano-horn (gwä'nō-hôrn), *n.* A tin tube about 3 feet long and 2 inches in diameter, used in applying guano and similar fertilizers to plowed land. *U. S. Dept. Ag.*, Bulletin 33, 1896, p. 194.

guanoline (gwä'nō-lin), *n.* [*guano* + *-ol* + *-ine*[2].] A colorless compound, $HN:C(NH_2)NHCOOC_2H_5$, formed from guanidin and ethyl-chlorcarbonate. It crystallizes with $\frac{1}{2}H_2O$ in trimetric laminæ, melting at 100° C. Also called *guanolene* and *ethyl guanadinecarboxylate.*

guanylic (gwä-nil'ik), *a.* [*guan(ine)* + *-yl* + *-ic.*] Noting a nucleinic acid, $C_{44}H_{66}N_{20}P_4O_{34}$, obtained from the pancreas.

guao (gwä'ō), *n.* [Cuban Sp., of native origin.] A West Indian tree of the cashew family, *Comocladia dentata.* Its edible fruit is known as *maiden-plum* (which see). In Mexico the name is applied to several plants with acrid juice which causes eruptions of the skin, especially to the poison-oak (*Rhus Toxicodendron*) and *Comocladia Engleriana*, which are also called *tetlatia.*

guaparanga (gwä-pä-räng'gä), *n.* [Braz.] See *Marlieria.*

guapena (gwä-pā'nä), *n.* [W. Ind.?] Same as *ribbon-fish.*

guaperva (gwä-per'vä), *n.* [Pg. (Lacerda).] A trigger-fish of the genus *Balistes.*

guapinol (gwä-pē-nōl'), *n.* [Mex. Sp., < Nahuatl *quauitl*, tree, + *pinolli*, a kind of flour.

There is a dry mealy pulp surrounding the seeds.] The courbaril, *Hymenæa Courbaril.* See *Hymenæa.*

guar (gwär), *n.* Same as *gouaree.*

guara[3] (gwä'rä), *n.* [Cuban Sp., from a native name.] In tropical America, several species of *Cupania*, trees of the family *Sapindaceæ*, having pinnate leaves and racemes or panicles of small flowers. In Porto Rico *C. Americana* furnishes a wood which, though soft, is susceptible of a high polish. Its fruit is a three-celled capsule which opens on ripening and displays its black seeds with yellow aril about their base. Guara blanca, or guara de costa, is *C. glabra*, a species common in the West Indies, and guara colorado, or guara macho, is *C. macrophylla*, a Cuban species. In Jamaica the timber of these trees is called *loblolly-wood.*

guarabu, *n.* 2. A large tree of the family *Cæsalpiniaceæ*, *Peltogyne confertiflora*, which yields a useful wood and from the bark of which a fine red dye is obtained.

guaracha (gwä-rä'chä), *n.* [Mex. Sp., also *guarache, huaracho, huarache.*] 1. A kind of sandal used by the Mexicans and the Indians of Mexico.—2. A graceful Spanish dance, or the music for it.

guaraguao (gwä-rä-gwä'ō), *n.* [Porto Rican.] In Porto Rico, a name of several trees of the genera *Trichilia* and *Samyda*, of the mahogany family. The most important is *S. Guidonia*, the hard, red wood of which resembles mahogany but is cross-grained and has larger pores. It is used in construction and for furniture. The tree has abruptly pinnate leaves and axillary clusters of white flowers followed by reddish-brown, capsular fruit. *T. spondioides*, known as *white bitter-wood* in Jamaica, furnishes timber for construction, and for making carts, boats, and farm implements. See *Trichilia* and *Samyda.*

guard, *n.*, 3. (*g*) In *foot-ball*, *basket-ball*, and similar games, a player occupying a certain position. In foot-ball there are two guards, who play on either side of the center rush: in basket-ball the guard prevents the opposing forward from throwing goals.—**Guards** or **guardians of the pole**, the two stars β (Kochab) and γ in the constellation of Ursa minor.—**Main guard.** (*a*) *Milit.*: (1) See *guard.* (2) The guard from which all the other guards are detached. (3) A guard chosen from the troops of a garrison under which all drunkards, etc., are placed. (4) See *main*[2]. (*b*) In *fort.*, the keep of a castle; the lodging of the main guard.—**To give guard**, in *cricket*, of the umpire, to inform the batsman, when he holds his bat upright before the wickets, which of the three stumps the bat is covering.—**To run the guard.** See ★*run*[1].—**To take guard**, in *cricket*, of the batsman, to ask the umpire, as the bat is held upright before the wickets, which of the three stumps it is defending.

guarda-costa (gär"dä-kōs'tä), *n.* *Naut.*, a Spanish gunboat mostly employed against smugglers; a coast-guard vessel.

guard-bolt (gärd'bōlt), *n.* In a mowing-machine, the screw-bolt used to fasten the finger-guards in place. See *mowing-machine.*

guard-book, *n.* 2. *Naval*, a book in which are entered the orders and official information received by the boarding-officer of the guard-ship of a fleet or squadron.

guard-detail (gärd'dē-tāl'), *n.* The squad detailed from a company for guard-duty.

Guardians of the pole. See ★*guard.*

guard-iron (gärd'ī"èrn), *n.* 1. *pl.* See *guard-irons.*—2. An iron strap placed along the outside edge of the wheel-guard of a paddle-steamer.—3. A guard or fender attached to the front end of an English locomotive.

guard-lamp (gärd'lamp), *n.* In *telephony*, an incandescent lamp in a central station so connected as to serve as a signal or indicator to prevent mistakes on the part of an operator. *Elect. World and Engin.*, Dec. 12, 1903, p. 966.

guard-leaf (gärd'lēf), *n.* A leaf that grows between the clusters of a blossom of a double hollyhock. *Stand. Dict.*

guard-lock (gärd'lok), *n.* 1. A lock placed at the junction of an artificial canal with the sea or other natural body of water whose level is subject to an extent of fluctuation undesirable for the canal. When boats are required to enter or leave the canal while a difference of level prevails between the water in the canal and outside, a pair of locks is necessary; otherwise a single lock is sufficient.—2. Any lock used to guard a keyhole or to guard another lock, as in the locks of the boxes of a safe-deposit vault, where the key to the guard-lock may be held by the attendant of the vault and the key of the box by the renter, both keys being used to open the box. See *duplex* ★*lock.*

guardo (gär'dō), *n.* A receiving-ship or -vessel on which enlisted men are temporarily quartered until drafted to sea-going vessels. [Naval sailors' slang.]

guardo-move (gär'dō-möv), *n.* *Naut.*, a trick played upon a landsman on a receiving-ship.

guard-pile (gärd′pīl), *n.* A pile driven in a waterway near and in front of a dock, pier, abutment, or other structure, for the purpose of protecting the latter from injury by shipping or heavy floating bodies.

guard-pin (gärd′pin), *n.* In a small firearm, a pin used to fasten the trigger-guard.

guard-plate, *n.* 2. A curved plate used to prevent a flexible disk-valve from opening or lifting beyond the distance limited by the plate.

guard-polyp (gärd′pol″ip), *n.* In some hydroid polyps, as *Plumularia,* a tentacle-like projection of the cœnosarc, bearing thread-cells, or adhesive globules, and surrounded by a hydrotheca. It has, probably, a nutritive function, serving to catch food. Also *nematophore, sarcotheca,* and *machopolyp.*

guard-rail, *n.* 2. *Naut.,* a fore-and-aft timber bolted on the outside of the covering-board or plank-sheer on steam-vessels navigating harbors, lakes, and rivers, to act as a fender when lying alongside of other vessels, or when made fast to a dock. Sometimes a second guard-rail is carried along the sides just above the water, and is then called a *bilge guard-rail.*

guard-ring, *n.* 2. In *elect.,* an annular metal plate which surrounds the attracted disk of an electrometer and is maintained at the same potential as the disk.

guard-strap (gärd′strap), *n.* A strip of sheet-iron arched above the top of a driving-wheel of a locomotive.

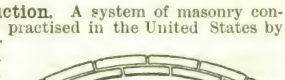
guard-wire (gärd′wīr), *n.* In electric railway construction, a wire stretched above the trolley-wire to prevent its coming in contact with other and still higher wires. *Jour. Brit. Inst. of Elect. Engin.,* 1901–02, p. 91.

Guareschi and Mosso's base. See ★*base*[2].

guarinite (gwä′ri-nīt), *n.* A calcium titanosilicate which occurs in yellow tabular crystals at Monte Somma, near Naples.

Guarnieri body. See ★*body* and ★*Cytoryctes.*

guarri (gwä′ri), *n.* [Hottentot name.] In South Africa, the fruits of any one of several shrubs belonging to the genus *Euclea* of the ebony family, especially of *E. undulata,* the edible red fruits of which are esteemed by the Hottentots. See ★*Euclea*[2].

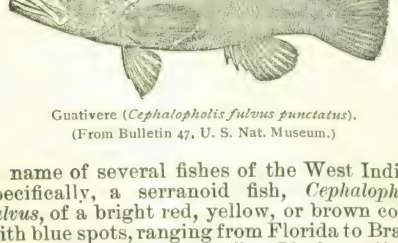


guarumo (gwä-rö′mō), *n.* [Also *guarumbo;* from a native name.] In tropical America, several trees of palm-like aspect with slender trunks surmounted by a crest of large leaves, especially various species of *Cecropia.* In Mexico the name is applied to *C. peltata* and *C. Mexicana.*

guasa (gwä′sä), *n.* [Cuban.] The great jewfish of the West Indies, *Promicrops itaiara.*

guaseta (gwä-sā′tä), *n.* [Cuban Sp.; dim. of *guasa.*] A small sea-bass, *Alphestes afer,* of the family *Serranidæ.* [Cuba.]

Guastalline (gwä′sta-līn), *n.* [It. *Guastalla,* name of the foundress.] A member of a female religious order founded in 1534 by Countess Guastalla, and known as *Angelicals* (which see).



Guastavino construction. A system of masonry construction extensively practised in the United States by a Spanish builder named Rafael Guastavino. The Guastavino arch is the timbrel arch composed of two or three layers of thin tiles laid in the most perfect cement. It is practically homogeneous like an egg-shell and capable of resisting great pressure.

Guastavino Construction.

Guate. An abbreviation of *Guatemala.*

guativere (gwä-tē′ve-rā), *n.* [Cuban *guatíbere,* from a native West Indian name (Pichardo).]

Guativere (*Cephalopholis fulvus punctatus*).
(From Bulletin 47, U. S. Nat. Museum.)

A name of several fishes of the West Indies; specifically, a serranoid fish, *Cephalopholis fulvus,* of a bright red, yellow, or brown color, with blue spots, ranging from Florida to Brazil. Also called *guativere amarilla.*—**Black guativere,** Same as *nigger-fish.*—**Red guativere,** *Cephalopholis fulvus ruber,* a serranoid fish found in West Indian waters. It is scarlet in color and inhabits shallow water.

guatucupa (gwä-tö-kö′pä), *n.* [Pg., from a native name.] The pork-fish of the West Indies, *Anisotremus virginicus.*

guava, *n.* 2. In Porto Rico, *Inga vera,* a tree of the family *Mimosaceæ,* used as a shade-tree in coffee-plantations. See *Inga* and *coco-wood.* 2.—**Cattley guava,** *Psidium Cattleyanum,* a shrub or small tree, from 10 to 20 feet high, native to Brazil. It has leathery, glossy, evergreen leaves and round, claret-red, acid fruits an inch in diameter, with a strawberry-like fragrance and flavor. It is cultivated in California and Florida for its fruit, which makes fine jelly. Called also *strawberry-guava, purple guava,* and in Brazil *araça de Praya.* A dwarf variety, with larger, yellow, sweeter fruits, is called *yellow Cattley guava, yellow strawberry-guava* or *Chinese guava.*—**Chinese guava,** the yellow Cattley guava.—**French guava.** (*a*) The pear-shaped variety of the common guava. (*b*) In Barbados, the ring-worm-shrub, *Herpetica alata.*—**Hill-guava,** the hill-gooseberry, *Rhodomyrtus tomentosa.* See *hill* ★*gooseberry.*—**Mountain-guava.** See *spice-*★*guava.*—**Purple guava.** Same as *Cattley* ★*guava.*—**Spice-guava,** a West Indian tree, *Psidium montanum,* bearing globose, aromatic berries about half an inch in diameter. Called *mountain-guava* in Jamaica.—**Strawberry-guava.** Same as *Cattley* ★*guava.*

guava-berry (gwä′vä-ber″i), *n.* In the West Indies, a small tree of the myrtle family, *Eugenia lineata,* which bears juicy red fruits of the size of cherries, which are eaten raw, preserved, or made into cordial.

Guavina (gwä-vē′nä), *n.* [Cuban.] **1.** A genus of gobioid fishes found in fresh waters of the West Indies and Brazil: typified by *G. guavina,* of the rivers of Cuba.—**2.** [*l. c.*] A name applied in Cuba to the elongate, flat-headed gobies.—**Guavina hoyera,** *Awaous banana,* a gobioid fish found in fresh waters on both coasts of tropical America.—**Guavina mapo,** *Dormitator maculatus,* a gobioid fish found on both coasts of tropical America.—**Guavina tétard,** *Eleotris pisonis,* a gobioid fish found in streams in the West Indies and south to Rio Janeiro.

guaviyu (gwä-vē-yö′), *n.* [Braz.] In southern Brazil and northern Argentina, either of two trees belonging to the myrtle family, *Eugenia Guabiju* and *E. pungens.* Both yield edible fruits.

guaxima (guä-shē′mä), *n.* [Tupi *guaxima, guajima.*] The name in Brazil of a malvaceous plant, *Urena lobata,* yielding a useful fiber. See ★*aramina,* ★*Cæsar-weed* and *Urena.*

guayaba (gwä-yä′bä), *n.* [Sp.] Same as *guava.* Also *guayava.*

guayacan (gwä-yä-kän′), *n.* [S. Amer.?] **1.** The lignum-vitæ, *Guaiacum officinale* and *G. sanctum.*—**2.** In the southwestern United States and Mexico, a shrub or small tree, *Porlieria angustifolia,* closely related to the lignum-vitæ.—**3.** In Argentina, a large leguminous tree, *Cæsalpinia melanocarpa.*—**4.** In Panama, a bignoniaceous tree, *Tecoma Guayacan.*

guayava (gwä-yä′vä), *n.* Same as *guava.*

guayavi (gwä-yä′vē), *n.* [Native name.] In Argentina, a large tree of the borage family, *Patagonula Americana.* It yields a soft and easily worked useful wood.

guayavita (gwä-yä-vē′tä), *n.* [Sp. dimin. of *guayava.*] In Porto Rico, the bayberry, *Pimenta racemosa* (*Caryophyllus racemosus* of Miller), the leaves of which yield bay-oil, the source of bay-rum. See *bayberry,* 3, and *Pimenta*[2].

guayrote (gwī-rō′tā), *n.* [Porto Rican.] A tree of the family *Sabiaceæ, Meliosma obtusifolia,* native to Porto Rico. It is generally distributed throughout the island and is valued for its wood, which is much used locally. Called also *aguacatillo.*

guayule (gwä-yö′lā), *n.* A substance, obtained from a plant, *Parthenium argentatum,* of Mexico and southern Texas, used as a substitute for rubber; the plant itself.

guazu (gwä-sö′), *n.* [Guarani *guaçú,* 'deer.'] The marsh-deer of South America, *Odocoileus* or *Blastocerus campestris.*

guazuti (gwä-sö-tē′), *n.* [Guarani *guaçutí,* 'deer of the field.'] The pampas-deer of South America, *Odocoileus* or *Blastocerus campestris.*

gubat (gö′bät), *n.* [Tagalog.] A forest.

gubbin, *n.* 3. *pl.* [*cap.*] The almost wild inhabitants of Dartmoor, England.

Gubbio pottery. See ★*pottery.*

Gubernacular cord. See ★*cord*[1].—**Gubernacular sac.** Same as *gubernaculum,* 2.

gudgeon[1], *n.* 4. *Eleotris coxii,* a gobioid fish of New South Wales.

gudok (gö-dōk′), *n.* [Russ. *gudókŭ.*] A simple form of viol, used in Russia, having three strings, two of which serve only as drones.

guelder-rose, *n.*—**Maple** or **maple-leaved guelder-rose,** the maple-leaved arrow-wood, *Viburnum acerifolium.*—**Virginian guelder-rose,** the ninebark, *Opulaster opulifolius.*

guembelite, *n.* See ★*gümbelite.*

guemul (gā-möl′), *n.* [Sp. *guemul,* from a S. Amer. native name.] A species of South American deer of medium size, usually placed in the genus *Furcifer.* There are two species, *F. chilensis* and *F. antisiensis,* which range along the Andes from Peru to Patagonia. They are characterized by the antlers, which have a single fork, the front prong of which is the longer; by the presence of tusks in the upper jaw of both male and female; and by the unspotted coat of the fawn.

guenon (gwe-noṅ′), *n.* [F.] A French name, very generally adopted as a book-name, for the old-world monkeys of the genus *Cercopithecus.*

guerepo (ge-rā′pō), *n.* [Mex.] An atherinoid fish, *Chirostoma grandocule,* found in Lake Pátzcuaro, Mexico.

guéridon (gā-rē-doṅ′), *n.* [F., from the name of a character in a farce.] A small round table used for mounting vases or objects of art. Sometimes made in bronze or silver: usually with a single stem and tripod base.

Guernsey, *n.* **3.** A breed of dairy cattle, named from the island of Guernsey in the English Channel. It is slightly larger than the Jersey, lacks the black markings about the face, and has the inside of the ear yellow.

guerre de course (gãr de körs′). [F. 'war of roving' (privateering).] Commerce-destroying.

guest-ant (gest′ant), *n.* An ant which lives as a guest in the colony of another species, as the European *Formicoxenus nitidulus,* which lives as a guest in the colonies of *Formica rufa. Cambridge Nat. Hist.,* VI. 159.

guest-bee (gest′bē), *n.* A bee which lives as a guest or inquiline in the nests of another bee: thus the bees of the genus *Psithyrus* are guests in the nests of bumble-bees.

guestling (gest′ling), *n.* [A perversion of *guesting,* with substitution of *-ling* for *-ing*[1].] Formerly an annual assembly of the representatives of the corporation of the Cinque Ports.

guest-wasp (gest′wosp), *n.* A wasp of the family *Masaridæ:* so named by Comstock because it is supposed that all of the species of this family are inquilines.

guevarism (gā-vär′izm), *n.* The euphuistic literary style which originated in imitation of that of the Spanish writer Antonio de Guevara (1490–1545).

> At the close of Berner's 'Golden Boke' is a passage applauding the "swete style" of "the sentences of this booke." . . . Most probably this "envoy" in praise of *Guevarism* was written by Sir Francis Bryan.
> *S. L. Lee,* in Athenæum, July 14, 1883, p. 50.

guevarist (gā-vär′ist), *n.* An imitator of the literary style of Antonio de Guevara.

guglia (gö′lyä), *n.* [It. *guglia,* orig. *aguglia,* a needle, an obelisk, etc., < ML. *acucula,* L. *acicula,* a needle: see *acicula, aiguille, aglet.*] In *Ital. arch.,* a decorative obelisk, or upright shaft, used as a monument.

Guiana chestnut. See ★*chestnut.*

Guiano-Brazilian (gē-ä″nō-bra-zil′ian), *n.* In *zoögeog.,* a subregion proposed by Sclater which includes the greater part of South America, east of the forests of the Andes, between the Isthmus of Panama and lat. 30° S., as well as Trinidad.

guib (gwib), *n.* [See *guiba.*] The harnessed antelope, *Tragelaphus pictus.*

Guichen shales. See ★*shale*[2].

guide, *n.,* **6.** (*e*) *pl.* In an engine, the rods on which, or the surfaces between which, the cross-head of the piston slides: usually called *cross-head guides.*

8. In *surg.*: (*a*) A filiform bougie passed through a stricture of the urethra or other canal, over which a tunneled sound of larger size is passed. See *tunneled.* (*b*) A sound, grooved in its convexity, which is passed through the urethra into the bladder and against which the point of the knife is directed in operations upon the prostatic urethra.

guide-blade (gīd′blād), *n.* A vane or blade, usually thin, placed in the path of a fluid to guide it in a certain direction. Such guide-blades are used in steam and water turbines properly to direct the current of steam or water against the moving blades.

guide-board (gīd′bōrd), *n.* A board containing directions to travelers, set up at points on the highway or in the woods where paths diverge.

guide-curve (gīd′kėrv), *n.* Same as ★*guide-blade.*

guide-fossil (gīd′fos″il), *n.* A fossil species regarded as specially characteristic of a given geological formation, horizon, or fauna; an index-fossil.

guide-iron (gīd'ī″ėrn), *n.* A piece of iron rod which, having been bent to the contour of a curved pipe-pattern, is used as a guide by which the core-maker strickles up its core without the use of a core-box. *Lockwood.*

guide-lay (gīd'lā), *n.* See ★*side-lay*.

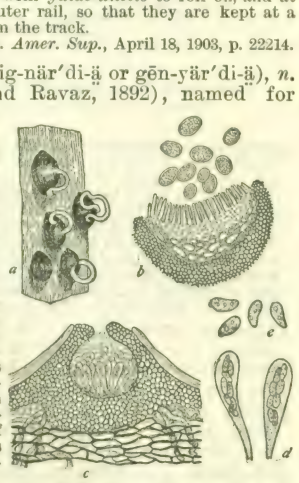
guide-mill (gīd'mil), *n.* A rolling-mill in which the smaller sizes of iron or steel bars are rolled. It is fitted, in front of the passes, with guides, so that the billets or rods shall be presented correctly to the nip of the rolls.

guide-pin (gīd'pin), *n.* 1. A pin that perforates or defines the position of paper in the process of printing, to guide the proper placing of the sheet for following impressions on that paper.—2. One of a set of pins used to hold the hub and felly of a wheel in a concentric position while they are being worked.

guide-plate (gīd'plāt), *n.* 1. In *textile manuf.*, an iron plate, perforated with holes, for guiding several ends of sliver through the drawing-frame. *Nasmith*, Cotton Spinning, p. 173.—2. A plate which holds the axle-box of a locomotive in position longitudinally, while permitting it to slide up and down.

guide-pulley, *n.* 2. In *oval-turning*, a pulley for driving the guide or model at the same speed as the blank which is being turned.

guide-ring (gīd'ring), *n.* In *angling*, a metal ring attached to a fishing-rod, through which the line runs.



guide-straight (gīd'strāt), *n.* In *projective geom.*, any straight of one ruled system on a ruled surface with reference to another ruled system (of which it is said to be a guide-straight).

guide-wheel (gīd'hwēl), *n.* A wheel which is provided for the purpose of guiding a moving structure, rather than of supporting its weight; a pilot-wheel.

The boats are furnished with a hinged device at both ends and provided with *guide-wheels* to roll on, and at each side of the outer rail, so that they are kept at a proper distance from the track.

Sci. Amer. Sup., April 18, 1903, p. 22214.

Guignardia (gwig-när'di-ą or gēn-yär'di-ą), *n.* [NL. (Viala and Ravaz, 1892), named for L. *Guignard*, a French botanist.] A genus of pyrenomycetous fungi of the family *Mycosphærellaceæ*. The perithecia are membranous and are embedded in the tissue of the host; the spores are ellipsoid or spindle-shaped and hyaline. The species are numerous, occurring chiefly on leaves. The pycnidial condition of some species is known to correspond to species of *Phoma* of the *Fungi Imperfecti*. *G. Bidwellii* causes one of the most destructive diseases of the grape, known as *black rot*. See *rot*, 2 (*b*), and *grape-rot*.

Guignardia Bidwellii.

a, portion of epidermis of a grape showing pustules with pycnidia of the *Phoma* stage of black rot and the spores escaping in gelatinous worm-like masses (enlarged); *b*, portion of a pycnidium showing free spores and the basidia upon which they were borne (highly magnified); *c*, section of a mature ascigerous perithecum showing numerous asci (highly magnified); *d*, two separate asci containing spores (highly magnified); *e*, separate ascospores (more highly magnified).

guild-tree (gild'trē), *n.* The European barberry, *Berberis vulgaris*, naturalized in the United States.

Guillaume alloy. Same as ★*invar*.

guillotine, *n.* 4. A machine for breaking iron by means of a falling weight.

guillotine-shears (gil'ō-tēn-shērz), *n.* A heavy type of shearing-machine: used principally for the cutting up of puddled bars and slabs ready for piling. The shears are similar to those of ordinary shearing-machines, but are parallel to the plane of machine framework instead of being set transversely. *Lockwood.*

Guilty ball. See ★*ball*[1].

guinara (gē-nä'rą), *n.* [Philippine Sp., from an undetermined native name.] In the Philippine Islands, a rather coarse stiff cloth made from the fibers of Manila hemp. *Gaz. Philippine Is.*, 1902, p. xxxiv.

guinea, *n.* 4. An Italian. [Slang, eastern U. S.]—**Military guinea,** the English guinea of 1813. —**Third of a guinea,** an English gold coin, of the value of seven shillings, struck in the time of George III.

guinea-boat (gin'ē-bōt), *n.* A fast galley, propelled by oars, used in former times to smuggle gold across the English Channel.

guinea-fowl, *n.*—**Guinea-fowl wood,** either one of two small trees of the family *Myrsinaceæ*, *Badula Barthesia* and *B. insularis*, natives of Mauritius: so called from the glandular punctate leaves and dotted flowers.

guinea-keet (gin'ē-kēt), *n.* A guinea-hen. [Southern U. S.]

guinea-pig, *n.* 4†. A junior midshipman in the East India service.—**Abyssinian guinea-pig,** a fanciers' name for a rough-coated breed somewhat larger than the ordinary guinea-pig.—**Peruvian guinea-pig,** a modern breed with long, silky hair.

guinea-red (gin'ē-red), *n.* See ★*red*[1].

guinea-violet (gin'ē-vī″ō-let), *n.* See ★*violet*[1].

Guipure d'art, linen net upon which are worked raised patterns.—**Guipure de Flanders,** a pillow-lace of the guipure-lace order, ornamented with floral designs connected by bars and brides.

guisaro (gē-sä'rō), *n.* [Native name.] In Central America, a tree of the myrtle family, *Psidium molle*, related to the guava. It bears small, acid fruits having the flavor of strawberries.

guitar-fiddle (gi-tär'fid″l), *n.* An early form of viol, preceding the violin, the body of which was flat like that of a guitar. It had five strings, of which the two highest were usually tuned in unison.

guitar-fish (gi-tär'fish), *n.* A shark-like ray of the family *Rhinobatidæ*, inhabiting warm seas; specifically, *Rhinobatus productus*.

guitar-plant (gi-tär'plant), *n.* *Tricondylus tinctorius*, a small Tasmanian shrub of the family *Proteaceæ*, often cultivated for its ornamental foliage. The mealy dust which clothes the seeds yields a rose-colored dye when infused in water.

guitarro (gē-tär'rō), *n.* [Sp., < *guitarra*, a guitar.] The Spanish name of *Rhinobatus percellens* and of other species of guitar-fish.

guitar-violoncello (gi-tär'vē″ō-lon-chel'ō), *n.* Same as ★*arpeggione*.

gulash (gö'lash), *n.* [Also *goulash*, *goulasch*, etc., < Hung. *gulyas-hús*, lit. 'shepherd's meat'; *gulyas*, shepherd, herdsman (< *gulya*, herd); *hús*, flesh.] A Hungarian stew of beef, veal, potatoes, etc., highly seasoned.

guldan (gůl'dän), *n.* [Pers. **guldān*, < *gul*, flower, rose, + *dān*, holding.] A Persian flower-vase, one form of which is provided with several tubes arranged around the central opening.

gulden, *n.*—**Gold-gulden,** a gold florin current in Germany and the Low Countries from the fifteenth to the eighteenth century.—**St. Andries gulden,** a gold coin of the count of Holland in the fifteenth century.—**St. Maartens gulden,** a gold piece struck by the bishops of Utrecht in the fifteenth century.

gulix (gū'liks), *n.* [Pl. of *Gulik* (sc. *linens*), so called from D. *Gulik*, G. *Jülich* (F. *Juliers*), a town in Prussia.] A linen fabric of fine texture used for shirts.

gull[2], *n.*—**Franklin's gull,** *Larus franklini*, a small species which has, in the breeding plumage, a hood of dull black encircling the head and upper neck, and the blue of the back darker than in Bonaparte's gull. It is about 14 inches long and 35 in spread of wing. Abundant in the central and western United States.

gulleter (gul'et-ėr), *n.* In *angling*, a tool for extracting a fish-hook from a fish's gullet.

gullet-tooth (gul'et-töth), *n.* In a circular saw having inserted teeth, a single tooth adapted to a gullet-saw blade. See *gullet-saw*.

gull-grass (gul'gràs), *n.* The goose-grass, *Galium Aparine*.

gully[1], *n.* 3. A catch-basin.

gully-drain (gul'i-drān), *n.* A pipe or drain which extends from a street drainage catch-basin, catch-pit, or gully.

gully-drainage (gul'i-drā″nāj), *n.* The drainage-water, sewage, or other refuse water passing through a gully.

gully-raker (gul'i-rā″kėr), *n.* 1. A long whip.

As the day wore on, they overtook bullock-drays lurching along heavily, . . . the driver appealing occasionally to some bullock or other by name, following up his admonition by a sweeping cut of his "*gully-raker*," and a report like a musket-shot.

A. C. Grant, Bush-Life in Queensland, I. 40.

2. A cattle-thief. [Australian slang in both senses.]

gully-root (gul'i-röt), *n.* In the West Indies, the roots of the guinea-hen weed, *Petiveria alliacea*, which are used locally as medicine. See *Petiveria*.

gully-squall (gul'i-skwâl), *n.* A violent wind of short duration, from the mountain ravines of tropical America, sometimes experienced in the Pacific Ocean.

guloc (gō'lok), *n.* Same as *machete*. Also *golok*.

gulonic (gū-lon'ik), *a.* [*gul(ose)* + *-one* + *-ic*.] Related to gulose.—**Gulonic acid,** a colorless compound, $C_6H_{12}O_7$, isomeric with dextronic acid. It passes very rapidly into its anhydrid, $C_6H_{10}O_6$.

gulose (gū'lōs), *n.* [Formation not ascertained.] A colorless syrupy sugar, $C_6H_{12}O_6$, unfermentable by beer-yeast. It is produced by the reduction of gulonic acid.

gulper (gul'pėr), *n.* A deep-sea eel, *Saccopharynx ampullaceus*, and other species of the

Gulper (*Saccopharynx ampullaceus*).
(From Bulletin 47, U. S. Nat. Museum.)

family *Saccopharyngidæ*, remarkable for the extraordinary extension of the gape.

gulpin (gul'pin), *n.* [Perhaps orig. **gulp-in*, one who would 'gulp in' or swallow anything told him.] One who swallows without question whatever he hears; a simpleton or credulous person; among sailors a 'marine.'

gum[2], *n.*—**Alk gum.** Same as *Chian turpentine*. See *Chian*.—**Amrad gum,** a white, yellow, or brown substitute for gum arabic obtained from the Abyssinian highlands, probably derived from *Acacia scorpiodes*. It has a sweetish taste and a resinous smell.—**Animal gum,** a complex organic substance, obtained from mucin, which on decomposition yields a carbohydrate that is not fermentable but reduces metallic oxids. It was discovered by Landwehr. The supposed formula is $(C_6H_{10}O_5)_2$.—**Artificial gum.** Same as *dextrine*.—**Babul gum,** a crude gum arabic obtained from *Acacia scorpiodes*. Also called *Bengal gum* and *Gond babul*.—**Bauhinia retusa gum.** Same as *Bauhinia variegata* ★*gum*.—**Bauhinia variegata gum,** a gum which resembles Indian gum arabic but is not very adhesive.—**Beet-root gum,** a gum separated from the juice of the beet-root: it forms a jelly with water.—**Botany Bay gum.** (*b*) *Eucalyptus resinifera*. See *ironbark-tree*.—**Brittle gum,** the brittle, white gum exuded by *Acacia albida* of North Africa.—**Brown gum,** *Eucalyptus robusta*.—**Buchanania latifolia gum,** a clear resinous gum which resembles gum arabic but is only slightly adhesive in solution.—**Cadie gum.** Same as *gamboge*.—**Cape gum,** an amber-brown gum from the *Acacia horrida* of Cape Colony.—**Desert gum,** *Eucalyptus eudesmoides* and *E. gracilis*.—**Fever-gum,** the blue-gum, *Eucalyptus Globulus*. See *fever-tree*, 1.—**Galam gum,** a brittle whitish resin obtained from acacia. It is used in the arts.—**Gum archipin,** a name applied in Mexico to several gum-resins derived from species of *Terebinthus*. See ★*cuajiote*, 2.—**Gum asphaltum.** See ★*asphaltum*.—**Gum-bichromate process.** See ★*process*.—**Gum dammar.** Same as *dammar-resin*.—**Gum disease.** Same as ★*foot-rot*, 2.—**Gum myrrh.** See *myrrh*, 1.—**Irish-moss gum,** the characteristic gum from Irish moss, *Chondrus crispus*.—**Lactic fermentation gum.** Same as *dextran*.—**Leio gum,** a roasted potato starch.—**Manila gum,** a resin of unknown botanical origin, resembling copal and dammar, soluble for the most part in alcohol and readily fusible: used in making insulating varnishes.—**Marsh-mallow gum,** a gum closely resembling tragacanth.—**Mountain gum,** *Eucalyptus tereticornis*.—**Mucic fermentation gum.** Same as *dextran*.—**Mule-gum,** a technological name for Ceara rubber on account of its deficiency in elasticity. See *india-rubber*, 1.—**Orange-gum,** a tree of the myrtle family, *Angophora lanceolata*, native of Australia.—**Peppermint-gum,** *Eucalyptus viminalis*. See *woolly-but* and *manna*, 4.—**Quince gum,** a member of the class of amyloid gums which are distinguished from others by giving a blue color with iodine solution, as starch does, whence the name.—**Ribbon-gum,** one of the peppermint-trees, *Eucalyptus amygdalina*. See *swamp-gum* and *stringy-bark*.—**River-gum,** *Eucalyptus rostrata*. See *red-gum* and *swamp-gum*.—**Rusty gum,** *Eucalyptus eximia*.—**Scrub-gum,** *Eucalyptus cosmophylla*.—**Sennaar gum,** the choicest white variety of gum arabic. Also called *picked Turkey gum*. See *gum arabic*.—**Seraphic gum.** Same as *sagapenum*.—**Sour-gum.** (*a*) See *sour-gum*. (*b*) The sorrel-tree, *Oxydendrum arboreum*.—**Spruce-gum,** the black spruce, *Picea Mariana*; also the gum obtained from this tree.—**Star-leaved gum,** the sweet gum, *Liquidambar Styraciflua*: so called from the star-shaped leaves.—**Sugar-gum.** (*a*) See *sugar-gum*. (*b*) The cider-gum or cider-tree, *Eucalyptus Gunnii*.—**Swamp gum.** See *swamp-gum*.—**Tuno gum,** see ★*tuno*.—**Tupelo gum.** Same as *tupelo*.—**Turpentine-gum.** Same as *American thus* (which see, under *thus*[2]).—**Water-gum.** (*a*) Any one of three trees of the myrtle family, *Callistemon lanceolatus*, *Tristania laurina*, called also *bastard box*, and *T. neriifolia*. (*b*) The *water-tupelo* (which see).—**Weeping-gum,** the woolly-but, *Eucalyptus viminalis*, in New South Wales, and *E. pauciflora* in Tasmania.—**White gum.** (*a*) See *white*[1]. (*b*) The sweet gum, *Liquidambar Styraciflua*.—**Wood-apple gum,** a substance, resembling gum arabic, collected as an exudation from the Indian tree, *Feronia elephantum*. It is met with in Europe as an adulterant of gum arabic, and by Indian native physicians is used as a demulcent remedy in the treatment of diarrhea and dysentery. Known in India as *kuthbel*.—**Wood-gum,** a gum applied to tragacanth and resembling cherry-tree gum, extracted from birch, ash, alder, oak, beech, and willow. It yields xylose when hydrolyzed.—**Yellow gum.** (*a*) The hickory-eucalyptus, *E. punctata*. (*b*) The black- or sour-gum, *Nyssa sylvatica*.

gümbelite (gim'bel-īte), *n.* [Named after C. W. *Gümbel*, a German geologist.] A glittering greenish-white silicate of aluminium, iron, and

potassium, not infrequently replacing the bituminocarbonaceous film of the graptolites. It may be an impure pyrophyllite.

gumbo[1], *n.* **4.** A type of soil in the southern and western United States which forms a tough, dark-colored mass in a high degree plastic and clay-like, yet sometimes consisting chiefly of silt or very fine sand. It is very sticky and difficult to till when wet, and when dry breaks into hard cuboidal lumps. See ★*gumbo clay.*—**Gumbo clay,** a clay which resembles the gumbo of the Mississippi valley, a stratified boulder-clay of the lower till. From the known characters of this material, the term is less precisely applied to any dense, massive, or stratified clay of marked plasticity, especially those forming the subsoil layers of many farming districts.

gum-box (gum′ boks), *n.* In southern Chile, *Escallonia macrantha*, an aromatic evergreen shrub with resinous-dotted simple leaves and red flowers. An infusion is made from the leaves and flowers which is administered as a tonic and emmenagogue, and a balm is made with oil for dressing wounds. Also called *siete-camisas.*

gum-digger (gum′dig″ėr), *n.* A person engaged in digging fossil resin of the kauri pine, which is used in the manufacture of varnish. [New Zealand.]

gum-disease (gum′di-zēz″), *n.* A disease of the bark of orange-trees. See ★*gummosis*, 2.

gum-field (gum′fēld), *n.* In New Zealand, an area where kauri-gum may be found.

gum-flower (gum′ flou″ėr), *n.* An artificial flower. [Scotch.]

gum-flux (gum′fluks), *n.* Same as ★*gummosis*, 2.

gumi (gö′mi), *n.* [Jap.] The Japanese name of *Elæagnus longipes*, a bush that is now cultivated in the United States, prized both for its ornamental character and for the edible cranberry-like fruits.

gum-lancet (gum′lăn″set), *n.* An instrument for incising the gum over a tooth, or for pushing back the gum so as to free the neck of a tooth about to be extracted. See *lancet.*

gumma-bush (gum′ä-bûsh), *n.* [West Indian negro *gumma*, supposed to be of African origin, + *bush*[1].] The black nightshade, *Solanum nigrum*, which is used as a pot-herb by the negroes.

gummer, *n.* **2.** A workman whose business it is to use the gummer in widening the spaces between the teeth of a saw.

gummic (gum′ik), *a.* [NL. **gummicus*, < L. *gummi*, gum.] Pertaining to or derived from gum or gummic acid.—**Gummic acid.** Same as *arabin.*

gummose[1] (gum′ōs), *a.* [NL. **gummosus*, < L. *gummi*, *gummus*, gum: see *gum*, *n.*] Gummy; gummatous.

gummose[2] (gum′ōs), *n.* [*gum* + chem. *-ose.*] An unfermentable reducing sugar, produced by the hydrolysis of mucin.

gummosis, *n.* **2.** An abnormal production and flow of gum from cracks or wounds of trees. Apricots, cherries, and plums are especially subject to this disease. Fungi and bacteria are frequently found in the affected tissues and gum and are believed by some authors to be the cause of the pathological conditions. Also called *gum-flux* and *gum-disease.*

gum-shoe (gum′shö), *n.* A shoe made of gum, that is, india-rubber; a rubber overshoe. [Colloq., U. S.]

gum-shrub (gum′shrub), *n.* In St. Helena, *Commidendrum rugosum*, one of the shrubs there called *gum-wood.* See *scrubwood* and *gum-wood*, 2.

gum-succory (gum′suk″ō-ri), *n.* See *succory.*

gum-sucker (gum′suk″ėr), *n.* A person of European descent born in the Colony of Victoria, in Australia. [Australia; now rare.]

gum-swamp (gum′swomp), *n.* In the southeastern United States, a swamp, or more commonly an area in a large swamp, in which the black-gum or sour-gum, *Nyssa sylvatica*, or any other species of *Nyssa*, is the dominant tree. In the Dismal Swamp these areas are distinguished from the juniper-swamps.

gum-thistle (gum′this″l), *n.* A spiny, cactus-like plant of Morocco, *Euphorbia resinifera*, which yields an acrid, poisonous gum-resin, and is often seen in cultivation. See *euphorbium*, 1, and cut at *Euphorbia*, 1.

gum-tooth (gum′töth), *n.* A molar tooth.

gum-wax (gum′waks), *n.* The balsamic exudate from the sweet gum, *Liquidambar Styraciflua.*

gum-weed (gum′wēd), *n.* **1.** The gum-plant, *Grindelia* (which see; also ★*Grindelia*).—**2.** A weed of the Great Plains, *Lygodesmia juncea*, of the *Cichoriaceæ.* It is a rigid, branching, skeleton-like plant with most of the leaves very small or reduced to scales.

gun[1], *n.* **7.** A professional criminal; a thief; a pickpocket. [Thieves' cant.]

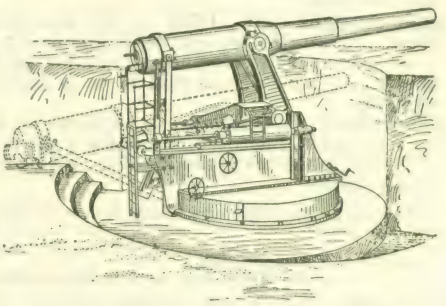
No one knows absolutely how many *guns* there are in New York; the Front Office itself could not tell for a certainty the number of first-class thieves who are on the streets at this moment; but it is a generally accepted fact among the *guns* themselves that every day in the week there are enough grafters in the city to people a good-sized county-seat. *McClure's Mag.*, XVI. 571, 572.

Automatic gun, a gun, generally of small-arms caliber, in which the recoil or the pressure of the powder-gases may be utilized, after the first round (by actuating the proper lever), to perform continuously all the operations of loading, firing, and ejecting the cartridge-case. The cartridges are fed from belts, and very great rapidity of aimed fire may be attained. See *pompom.*—**Barisal guns,** a mysterious booming noise, as of a distant cannon, heard off the coast near Barisal, India, the nature of which is not yet clearly understood. Similar noises off the coast of Holland are there known as *mistpouffers.* In both places they occur in foggy weather. Analogous sounds are often reported from the coasts of Nova Scotia, New Brunswick, and Florida, and from Seneca Lake, New York, where they are known as the *Seneca Lake guns.* Various plausible explanations have been suggested, but nothing has as yet been demonstrated.—**Bofors guns,** a gun of Swedish manufacture, built up of steel castings, having a breech-mechanism and mounted on a carriage of such design that the action may be semi-automatic.—**Built-up gun.** See *gun*[1]. The largest piece is the central tube, which extends throughout the length of the gun. Upon this tube is shrunk a series of jackets and hoops, the most important one of which is the jacket that covers the rear part of the tube from a third to half its length. In modern guns, the threads for the breech-plug are cut in this jacket. The number of hoops and jackets varies with the size and type of gun.—**Canet gun,** a gun manufactured in France on the system of M. Canet. It does not differ materially from other built-up guns, but, with its special mounting, is designed to give high initial velocity and rapid fire.—**Converted gun,** a muzzle-loading gun which has been changed to a breech-loading gun.—**Creusot gun,** a gun manufactured at the Schneider works in Le Creusot, France. The firm manufactures built-up guns of all calibers for any service.—**Crozier wire-wound gun,** a gun composed of a heavy tube wrapped with steel wire. The special feature of its construction is the initial compression of the tube beyond the elastic limit of the metal.—**Disappearing gun,** a gun mounted on a disappearing gun-carriage. See ★*gun-carriage.*—**Dismountable gun,** a gun for mountain service or for the use of naval landing-parties, so designed that it may readily be taken apart for transportation by pack-train and for easy handling.—**Ericsson gun,** a cannon built up by forcing on thin rings under pressure.—**Gathmann gun,** a comparatively short cannon of large caliber, specially designed for firing the Gathmann projectile, which is filled with guncotton as a bursting-charge.—**Gun down,** in *trap-shooting*, said of a gun when it is held in such a position that the butt is below the shooter's elbow.

Shooting to begin at 2 P. M. sharp. First cup, 25 birds, handicap, "*gun down.*"
Forest and Stream, Jan. 24, 1903, p. 79.

Hooped gun, a gun in which the central tube or barrel is reinforced by hoops shrunk on the outside.—**Hotchkiss gun,** a gun manufactured at the Hotchkiss works in St. Denis, France; especially, a revolving cannon, and also the mountain- or field-gun of this manufacture. See *machine-gun, mountain-artillery,* under *artillery,* and *field-gun.*—**Lancaster gun,** a piece of ordnance, patented in the year 1850, having an elliptical bore and increasing twist. It proved to be a failure, since the projectile exerted a wedging action.—**Life-line gun,** a gun about the size and pattern of a cavalry carbine, used to throw a life-line to the top of a burning building to save life imperiled there.—**Maxim gun.** See *machine-gun.*—**Naval gun,** a cannon mounted on board a war-ship or used by the naval forces of a country.—**Nordenfelt gun.** See *machine-gun.*—**Rapid-fire gun,** a breech-loading gun of from 1½ to 8 inches caliber which uses metallic ammunition. Each type is designated by the name of the inventor of the breech-loading system used, as the Gerdom, Fletcher, Seabury, Dashiel, Canet, Schneider, Armstrong, Driggs-Schröder, Maxim-Nordenfelt, Hotchkiss, Gruson, and others.—**Semi-automatic gun,** a cannon of small caliber in which the recoil may be utilized to open the breech, thus saving the time necessary to perform this operation by hand and permitting more rapid firing.—**Seneca Lake guns.** See *Barisal* ★*guns.*—**Sims-Dudley pneumatic gun,** a powder pneumatic gun, the best-known form of which consists of three parallel tubes, of which the center one is much longer than the other two. Both the center and right-hand tubes open at the breech, the former for the introduction of the projectile and the latter for the powder charge. In action, the powder is exploded in the right barrel and the gases pass to its front end, then across to the left barrel, and are finally admitted behind the projectile in the center barrel, mixed with the air in the two side barrels which has been compressed by the process. Shells containing sensitive high explosives can thus be discharged without sufficient shock to cause explosion.—**Subcaliber gun,** a small cannon, generally about 1½ to 3 inches in caliber, placed axially in the chamber of a cannon of large caliber to be fired in target-practice. The arrangement is such that the breech-mechanism of the large gun is operated, and the object of its use is to permit considerable practice without the great expense and wear attending the firing of the large cannon. Also, a small-arms barrel placed, for the same purpose, in the chamber of a field- or siege-gun.—**To lay a gun,** to give a gun the proper elevation and direction to hit an object; aim or point.—**Under the gun,** *in poker,* said of the first man to bet—the player immediately to the left of the age.—**Vickers-Maxim mountain-gun** a mountain-gun of medium power, easily dismounted and having a well-designed pack outfit for gun, carriage, and ammunition.

gun[1], *v.* **II.** *trans.* In *forestry*, to aim (a tree) in felling it. In the case of very large, brittle trees, such as the redwood, a sighting device, called a *gunning-stick,* is used.



guna, *n.* **2.** In the *Sankhya philos.* of India, one of the three constituents of the primal matter out of which the world is evolved. See the extract.

The originator of the Sānkhya doctrine believed that he recognized in the world of matter three substances or constituents (*guṇas*, usually, and very erroneously, rendered by "qualities"), unequal, and mingled in varying proportions: of which the first exhibits the characteristics of lightness, of light, and of delighting; the second, those of mobility, of excitation, and of pain-giving; the third, those of heaviness, of obstruction, and of stupefaction. . . . The undeveloped primeval matter is accordingly the condition of equilibrium of the three *guṇas.*
R. Garbhe, Sānkhya, in Univ. Cyc., VII. 297.

gun-bed (gun′bed), *n.* In *ordnance*, the platform or wood planking on a deck which supports a gun-mount.

gun-bright (gun′brīt), *n.* The common scouring-rush, *Equisetum hyemale*, used in polishing guns.

gun-carriage, *n.*—**Disappearing gun-carriage,** a gun-carriage so arranged that the gun after being fired descends, under the influence of the force of recoil, to the loading position behind the protection of the parapet, where it can be manœuvered without exposing the gun detachment to the enemy's fire. During the recoil of the gun sufficient energy is stored up, by means of a counterweight or by air-compression, to raise the gun to firing position when released. The *Buffington-Crozier disappearing gun-carriage* has been adopted for the sea-coast

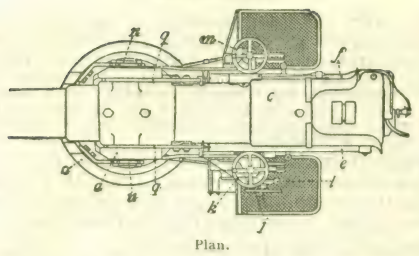
Disappearing Gun-carriage with Gun in Firing Position.
Loading position shown in dotted outline.

service of the United States. The gun is mounted upon levers trunnioned in a top carriage which rolls back under the force of recoil. The lower ends of the levers are compelled to move between vertical guides and raise a counterweight. The constrained motion on two lines approximately perpendicular to each other, thus causing the gun to describe an arc of an ellipse in recoiling, is the mechanical principle of the carriage.—**Hydraulic-recoil gun-carriage,** in *ordnance*, one in which the recoil of the gun, when fired, is gradually resisted by pistons in cylinders filled with liquid. See ★*gun-mount.*

gun-case (gun′kās), *n.* A covering for protecting a gun, generally of cloth or leather: sometimes provided with a handle for carrying the gun when it is not to be used.

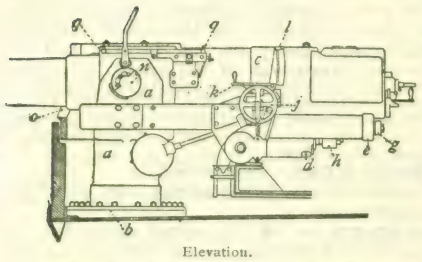
gunda (gun′dä), *n.* [Hind. *gaṇḍa*, *guṇḍa*, Beng. *gaṇḍā*]. A copper coin of Bengal of the value of 4 cowries, or one twentieth of an anna.

gun-fence (gun′fens), *n.* See *fence.*



gun-fire, *n.* **2.** The discharge of small arms or cannon.

gun-layer (gun′lā″ėr), *n.* One who lays or aims a gun; gun-pointer. [Eng.]



Expert *gun-layers* and well-drilled detachments are thus of cardinal importance. *Encyc. Brit.*, XXVIII. 453.

gun-money (gun′mun″i), *n.* **2.** Prize-money, reckoned at so much per gun, given to the captors of an enemy's ship of war that had been destroyed or deserted in fight. *Admiral Smyth*, Sailor's Word-book.

gun-mount (gun′mount), *n.* In *ordnance*, the ensemble of the mechanism, placed on a platform or deck, or in a turret, by which a gun is supported and manipulated. In a modern deck-mount, the principal parts are the pedestal or stand and the top-mount or -carriage. The pedestal or stand is the lower fixed part, permanently bolted to the platform or deck. Upon it the top-carriage turns on a vertical axis to train the gun. The top-carriage includes the gun-cradle or -saddle and the sleeve. The sleeve has trunnions forming a horizontal axis by which it is supported in the saddle, and the gun carried in the sleeve can be elevated or depressed by the elevating gear which connects the sleeve to the saddle. The sleeve carries the hydraulic recoil-cylinders, which check the recoil of the gun through the sleeve when fired, and the springs, which return the gun to its normal position in the sleeve. In a turret-mount, the turret support or foundation on which it rotates replaces the pedestal; the turret itself, with its gun-girders, is equivalent to the saddle. Attached to the girders are heavy steel castings, called *deck-lugs,* which are equivalent to the upper part of the saddle. They have in their upper parts trunnion-bearings to receive the trunnions on the sleeve which carries the gun. The sleeve is of the same general character as that of a deck-mount

Plan.

Elevation.

Central Pivot Gun-mount for 6-inch Rapid-fire Gun.

a, top-carriage saddle; *b*, pedestal or pivot (the only part of the pedestal showing in the cut is the deck-flange, the remainder being in the interior of the top-carriage; *c*, cylindrical sleeve; *d*, hydraulic recoil-cylinder; *e*, *f*, spring return-cylinders; *g*, projecting arm by which gun is attached to spring return-rods; *h*, projecting arm by which gun is attached to recoil-cylinder piston-rod; *j*, hand-wheel for elevating gear; *k*, hand-wheel for training gear; *l*, shoulder-piece; *m*, auxiliary training-wheel; *n*, *n*, trunnion bearings; *o*, gun-shield; *q*, *q*, gun-sights.

described above. (See cut under ★*turret*.) The rapid progress of invention in guns and gun-mounts has resulted in a large number of types, and uncertainty and variety in the nomenclature of the parts.

gunnage, *n.* 2. Same as ★*gun-money*, 2.

gunnarite (gun'ar-īt), *n.* [*Gunnar*, a Swedish name, + *-ite*[2].] An iron-nickel sulphid, perhaps $3FeS_2.2NiS$, occurring with pyrrhotite in Sweden.

gunnel[2] (gun'l), *n.* [*gunnel*[1], *n.*] A name of the elongate blennies, found on the rocky coasts of the North Atlantic and North Pacific, belonging to the genus *Pholis*. The best-known of these fishes in the North Atlantic is *P. gunnellus*.

Gunnellops (gun'e-lops), *n.* [NL., < *Gunnellus*, + Gr. ὤψ (ὠπ-), eye, face.] A genus of blennies, small fishes allied to *Pholis*, found in the North Pacific.

Gunner's daughter, a name formerly given to the broadside gun to which offenders were secured before being lashed or otherwise punished.—**To marry the gunner's daughter**, to be bound to the 'gunner's daughter.'—**Gunner's gang**, the gunner and his mates whose duty it is to keep the guns and mounts clean and in good order.—**Gunner's tailor** (*naut.*), formerly, the man who made the cartridge-bags for the guns.—**Master gunner**, one of the warrant-officers in the British service.

gunning-stick (gun'ing-stik), *n.* A stick used in guiding the fall of a tree. See ★*gun*[1], *v. t.*

gunny-sack (gun'i-sak), *n.* Same as *gunny-bag* (which see, under *gunny*).

gun-pointer (gun'poin″tėr), *n.* The member of a gun's crew whose duty it is to keep the gun pointed at the target and to fire it. In modern methods of gun-practice, the pointer keeps his eye continuously at the sight and manipulates the training and elevating gear to keep the gun continuously aimed at the target notwithstanding the rolling of the vessel.

gunpowder, *n.*—**Smokeless gunpowder**, a substitute for gunpowder which gives off little or no smoke when discharged in a gun and develops increased velocity in the projectile without increased pressure in the gun. It consists in general of an oxidizing agent and a substance added to regulate the explosive force. This latter is technically called a deterrent. Smokeless powders are classified according to the oxidizer used: (1) Picric-acid powders (these are not generally stable); (2) ammonium-nitrate powders (these are highly hygroscopic); (3) guncotton powders; (4) nitroglycerin and guncotton powders. The first two classes have practically been abandoned. Smokeless powders are designated from their appearance, the name of the inventor, or arbitrarily, as *cordite*, *Peyton*, *poudre B.*, etc.

gunpowder-engine (gun'pou-dėr-en″jin), *n.* An internal-combustion motor of early design in which the fuel to supply heat and expand the air in the mixture behind the working-piston came from a charge of gunpowder introduced at each stroke behind the piston and fired. It was noisy and impossible to regulate closely, and the sudden shocks from the explosion of the power made frequent repair necessary. The gasification of the solid material in the gunpowder produced high pressures from small quantities of powder.

gunpowder-hammer (gun'pou-dėr-ham″ėr), *n.* A device for driving piles by exploding gunpowder on top of a piston on whose rod is attached a hammer-head or tup, which is thus driven downward against the top of the pile with great force.

gun-sen (gön'sen″), *n.* [Jap.] In Japan, a large iron-framed folding fan used for signaling and as a weapon of defense.

gun-shield (gun'shēld), *n.* In *ordnance*, an armored shield attached to and turning with the top-carriage of a gun: designed to protect the mechanism and the gun's crew. Such shields are of varied size and shape, in some cases approaching the dimensions of a turret, except that the shield is relatively of thinner armor and is open at the back. See cut under *shield*, 2 (*a*).

gun-sight (gun'sīt), *n.* The rear sight of a small arm or cannon, marked with graduations corresponding to various ranges. See *sight*[1], 12 (*c*).

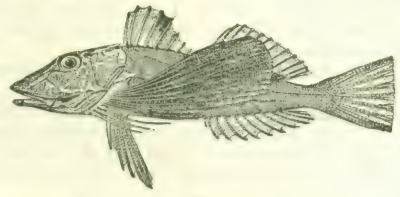
gun-spaniel (gun'span″yel), *n.* A spaniel used in the field in shooting game.

Gun-stock deformity. See ★*deformity*.

gunter (gun'tėr), *n.* Same as *Gunter's scale* (which see, under *scale*[3]).—**According to Gunter.** See ★*according*.

gunyah (gön'yä), *n.* [Aboriginal Australian.] A shelter of the native Australians; a hut of any kind. Compare ★*goondie*.

gunyang (gön'yang), *n.* [Aboriginal Australian.] The native name of the kangaroo-apple, *Solanum aviculare*.



gurah, *n.* See ★*gora*.

gurahen, *n.* Same as ★*buranhem*.

gurgeon-stopper (gėr'jon-stop″ėr), *n.* See *stopper*, 3.

gurjunic (gėr-jö'nik), *a.* [*gurjun* + *-ic*.] Of or pertaining to gurjun resin.—**Gurjunic acid**, a crystalline acid, $C_{44}H_{68}O_8$, from gurjun resin.

gurnard, *n.*—**Bearded gurnard**, *Mullus barbatus*, a fish of the family *Mullidæ*, found in European waters.—**Red gurnard**, the European species of gurnard or sea-

Striped Gurnard (*Prionotus evolans*).
(From Bulletin 47, U. S. Nat. Museum.)

robin, *Trigla cuculus*.—**Striped gurnard**, or sea-robin, *Prionotus evolans*, a trigloid fish found on the South Atlantic coast of the United States. Also called *sea-robin*.—**Tub gurnard**, *Trigla birundo*, a gurnard found on the coast of Europe.

gurnet[1], *n.* 2. In Australia, the fish *Centropogon scorpænoides*, of the family *Scorpænidæ*.—**Flying gurnet**, *Chelidonichthys polyommata*, found on all the Australian coasts from New South Wales to Western Australia. It has large pectoral fins, but cannot support itself in the air like the flying-fish.

gurolite (jur'ō-līt), *n.* Same as *gyrolite*.

gusle (gös'le), *n.* [Servian *gusle*, Bohem. *housle*, = Russ. *gusli*, a fiddle, violin, < OBulg. *gandaň*, *gaňsti*, Russ. *gusti*, etc. (√ *gond-*), play on the guitar, etc.] A Servian viol having only one string; a form of rebab.

gusli (gös'li), *n.* [Russ. *gusli*: see ★*gusle*.] A Russian zither.

gusset, *n.*, (*h*) In *iron shipbuilding*, a piece of plate of triangular form reinforcing on one side the junction of a part which meets another angularly, the gusset-plate being approximately normal to the line of the joint between the parts. See cut under ★*bracket*[1], 9 (*b*).

gusset-needle (gus'et-nē″dl), *n.* In *knitting*, a needle used for inserting a gusset, as that in a stocking.

gusset-plate (gus'et-plāt), *n.* A triangular metal plate used to join two or more pieces where they meet and form a corner or panel-point in a truss; a gusset-stay. *R. H. Thurston*, The Steam-boiler, p. 415.

gusset-stay (gus'et-stā), *n.* A triangular plate having a flange turned on two sides, which is used as a bracket-stay in the corners of a steam-boiler.

Gustatory center, image. See ★*center*[1], ★*image*.

gusto, *n.* 2. Artistic 'style' or 'taste': as, the grand *gusto* (It. *il gran gusto*), the grand style.

Gutenstein limestone. See ★*limestone*.

gut-hook (gut'hůk), *n.* A hook, made by bending a piece of wire, used for joining small round belts, as on a sewing-machine.

gutta[1], *n.*—**Guttæ Anglicanæ** ['English drops'], a preparation, composed chiefly of ammonia and alcohol, formerly employed as a cerebral stimulant.—**Gutta rosacea**, in *pathol.*, same as *acne rosacea*. See *acne*.

gutta[2], *n.* 2. A colorless pulverulent compound, $C_{10}H_{16}$, contained in gutta-percha. It begins to melt at 180° C., and loses its flexibility on

exposure to air and light.—**Gutta merah** [Malay *getah merah*, 'nice gutta'], a trade-name for one of the commercial grades of gutta-percha. *Elect. World and Engin.*, March 14, 1903, p. 449.

gutta-band (gut'ä-band), *n.* In *Greco-Rom. arch.*, same as *regula*, 2.

guttajoolatong (gut″a-jö-lä'tông), *n.* [Prop. **gutta-jelatong*, < Malay *getah*, gutta, + *jelātang*, stinging nettle.] The concrete latex obtained from any one of several Malayan trees of the genus *Dyera* of the dogbane family, especially *D. costulata*. It is an inelastic, creamy-white substance which somewhat resembles gutta-percha, and is imported in large quantities into the United States for mixing with other ingredients in the manufacture of low-grade rubber-goods. Called also *jelatong* and *pontianak*.

Importations of "*gutta-joolatong*," a product of India, which is used in certain industries as a substitute for india rubber, now average more than a million pounds a month.
Elect. World and Engin., June 18, 1904, p. 1150.

gutta-milk (gut'ä-milk), *n.* The freshly exuded milky juice of *Isonandra gutta*, which on drying forms the valuable substance *gutta-percha*. *Sci. Amer. Sup.*, Feb. 28, 1903, p. 22707.

gutta-percha, *n.* 2. In *geol.*, an exceedingly fine, laminated glacial clay. [Scotland.]

guttatim (gu-tā'tim), *n.* [L. *guttatim*, < *gutta*, a drop.] Drop by drop.

gutter[1], *n.* 9. In *turpentine-making*, one of two thin bent strips of metal which are inserted in gashes cut into the face of a tree and serve to conduct resin into a cup.—**Parallel gutter**, a gutter specially built with accurately parallel sides, as distinguished from a fillet gutter or valley gutter.—**Parapet gutter**, a gutter raised upon the surface of a sloping roof near its lower edge, and usually composed of the flashing turned up against the parapet wall beyond.—**Seminal gutter**, in certain earthworms, a groove which connects the two openings of the spermiducal glands on each side of the body.—**Valley gutter**, a gutter produced by the metal flashing of the valley in a roof. Where the run of water is very great this flashing may be hollowed into a decided channel.

gutter-drift (gut'ėr-drift), *n.* Same as *gutter*[1], 5.

gutter-fillet (gut'ėr-fil″et), *n.* A cove made by flashing, as where a chimney breaks the slope of a roof and the flashing is turned up to throw the water away from the masonry.

gutterman (gut'ėr-man), *n.* Same as *swamper*.

gutter-member (gut'ėr-mem″bėr), *n.* The architectural feature made by the decorative treatment of the front or outer edge of the roof-gutter: prominent in the design in the Doric style and in some modern styles.

gutter-plane (gut'ėr-plān), *n.* A grooved plane with a rounded iron which cuts a smooth, hollow molding.

gutter-tile (gut'ėr-tīl), *n.* A tile, usually of pottery, bent to a half-circle or nearly so. Such tiles can be used with the concave side up, forming gutters, or with the convex side up, forming ridges.

gutter-tongs (gut'ėr-tôngz), *n.* A variety of roofing-tongs used in forming the gutters of a tin roof.

gutter-tree (gut'ėr-trē), *n.* 1. Same as *gaiter-tree*.—2. The red-osier dogwood or kinnikinick, *Cornus stolonifera*.

guttery (gut'ėr-i), *n.*; pl. *gutteries* (-iz). [*gut* + *-ery*.] A place where fish are gutted.

gut-tie (gut'tī), *n.* 1. A condition of cattle in which a loop or knuckle of intestine enters a tear in the peritoneum and is held between the remains of the spermatic cord and the anterior margin of the hip-bone, causing obstruction to the passage of excrement and exciting an inflammation which terminates in gangrene and death. Also called *peritoneal hernia*. *U. S. Dept. Agr.*, Rep. on Diseases of the Horse, 1903, p. 56.—2. The twisting or knotting of the bowels of animals, causing severe colicky pains. Same as *volvulus* in man.

Guttural pouch. See ★*pouch*.

gutturalism (gut'u-ral-izm), *n.* [*guttural* + *-ism*.] Guttural quality or character.

There existed of old in the language a group of words beginning with wh and wr; such as whale, wharf, . . . wrath. . . . The contagion of these examples spread to words beginning with H or R simple, and the movement was perhaps aided . . . by the desire to reassert the languishing *gutturalism* of H and . . . of R.
Earle, Philol. Eng. Tongue, ¶ 166.

gutturalize, *v. t.* 2. To impart a guttural character to; render guttural: as, to *gutturalize* a vowel.

gutturolabial (gut″u-rō-lā'bi-al), *a.* and *n.* I. *a.* Pertaining to or produced by both the throat and the lips.

II. *n.* A sound produced in this way.

gutturonasal (gut″u-rō-nā′zal), *a.* Belonging to both the throat and the nose.

gutturopalatine (gut″u-rō-pal′a-tin), *a.* Belonging to both the throat and the palate.

gutturosibilant (gut″u-rō-sib′i-lant), *a.* and *n.* **I.** *a.* Belonging to the throat, but sibilant.

II. *n.* A sound which possesses that characteristic.

gutty[2] (gut′i), *n.* [A diminutized form of *gutta-percha.*] In *golf*, the gutta-percha ball. [Slang.]

gut-weed (gut′wēd), *n.* The corn sow-thistle, *Sonchus arvensis.*

guvacine (gö′va-sin), *n.* A monacid alkaloid, $C_6H_9NO_3$, from the areca-nut. It is deposited in small lustrous crystals which melt at 271–272° C.

guvern, guverness, etc. Simplified spellings of *govern, governess,* etc.

guy[1], *n.*—**Jib-boom guys,** ropes which steady the jib-boom sidewise. They lead from the outboard end of the spar to the bows of the vessel, where they are set up.—**Lower-boom guys,** ropes used for steadying the swinging-boom.—**Spanker-boom guy,** a rope for steadying the spanker-boom when running before the wind, so that the spar may not swing inboard when the vessel rolls deeply to windward.

guy-belly (gī′bel″i), *n.* *Naut.*, a rope that supports the middle part of a derrick or sheer-leg.

guy-chain (gī′chān), *n.* A chain used as a tension-brace or -guy instead of the customary rope.

guy-crane (gī′krān), *n.* A derrick; a crane which is held upright by tension-braces or-guys.

guy-peg (gī′peg), *n.* A peg, usually of wood but sometimes of metal, to which the tension-brace or -guy of a derrick, tent, etc., is made fast.

guy-rings (gī′ringz), *n.* *Naut.*, the iron rings of the head-block on a derrick-mast, to which the guy-ropes are secured.

guy-rod (gī′rod), *n.* A tension-brace or -stay made from a rod instead of rope, as is customary.

Guy-rods are 8 ft. x ⅝ in., provided with an eye at one end, threaded 2 in. at the other, each fitted with two nuts and one washer, and all are of wrought iron or mild steel. *Elect. World and Engin.*, Oct. 31, 1903, p. 711.

guz (guz), *n.* [Also *gaz* and *yudge;* < Hind. *gaz,* an iron bar, a ramrod, a yard-measure, a foot-rule, etc.; Hind. *desī gaz,* the 'native yard' (33 inches), *lambaī gaz,* the 'standard yard' (36 inches); Pers. *gaz,* an ell.] A measure of length used in Hindustan and Arabia, equal to about 27 inches in Bombay, to 33 inches in Madras, to 36 inches in Bengal, to 38 inches in Mysore, to 25 inches at Mocha, and to 31.6 inches at Bagdad.

Gyalectaceæ (jī″a-lek-tā′sē-ē), *n. pl.* [NL., < *Gyalecta* + *-aceæ.*] A family of gymnocarpous lichens named from the genus *Gyalecta.*

Gymnachirus (jim-nak′i-rus), *n.* [NL., < Gr. *γυμνός,* naked, + *ἀχειρ, ἀχειρος,* without hands.] A genus of scaleless soles of the family of *Soleidæ:* found in South America.

Gymnasteria (jim-nas-tē′ri-ä), *n.* [NL., < Gr. *γυμνός,* naked, + *ἀστήρ,* star.] The typical genus of the family *Gymnasteriidæ. Gray.*

Gymnasteriidæ (jim-nas-te-rī′i-dē), *n. pl.* [NL., < *Gymnasteria* + *-idæ.*] A widely distributed family of *Stelleroidea.* It consists of phanerozonia with opposite ambulacral ossicles and unequally developed marginal plates, abactinal skeleton tessellate with irregular plates, and the whole test covered with membrane. The typical genus is *Gymnasteria.*

gymnastics, *n.*—**Swedish gymnastics.** Same as *Swedish* ★*movements.*

Gymneleotris (jim-nel-ē-ō′tris), *n.* [NL., < Gr. *γυμνός,* naked, + *ἐλέωτρις,* a fish of the Nile.] A genus of small gobies with the body largely naked, found about Panama.

Gymnelinæ (jim-ne-lī′nē), *n. pl.* [NL., < *Gymnelis* + *-inæ.*] A subfamily of fishes of the family of *Zoarcidæ,* typified by the genus *Gymnelis.*

Gymnelis (jim′ne-lis), *n.* [NL., used for the proper form ★*Gymnenchelys,* < Gr. *γυμνός,* naked, + *ἔγχελυς,* eel.] A genus of small brightly colored eel-shaped fishes of the family of *Zoarcidæ,* found in the Arctic and Antarctic waters of the Pacific. *G. viridis* is common in Bering Sea.

gymnemic (jim-nem′ik), *a.* [*Gymnema* + *-ic.*] Noting a resinous acid extracted from the leaves of *Gymnema sylvestris,* indigenous in India. The leaves, when chewed, produce the curious effect of temporarily destroying the sense of taste as respects sweet and bitter, so that such substances as sugar and quinine become indistinguishable in the mouth. *E. B. Titchener,* Exper. Psychol., I. ii. 104.

Gymnoascaceæ (jim″nō-as-kā′sē-ē), *n. pl.* [NL., < *Gymnoascus* + *-aceæ.*] A family of simple ascomycetous fungi, named from the genus *Gymnoascus.* It has small ascocarps consisting of a thin peridium of loose hyphæ inclosing globose asci which arise as lateral branches of the ascogenous hyphæ. Simple mold-like conidia occur in many cases. See ★*Gymnoascus.*

Gymnoascus (jim-nō-as′kus), *n.* [NL. (Baranetzky, 1872), < Gr. *γυμνός,* naked, + *ἀσκός,* a sack.] A small genus of fungi of the family *Gymnoascaceæ.* They have the peridium composed of a loose layer of thick-walled much-branched hyphæ whose terminal branches are frequently pointed and sometimes hooked. The spores are simple and hyaline or bright-colored, varying from globose to spindle-shaped. *G. Reessii* occurs on dung.

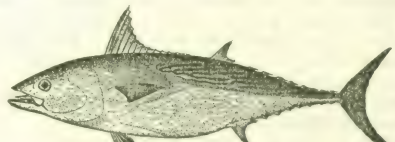
gymnoblastous (jim-nō-blas′tus), *a.* Same as *gymnoblastic.*

Gymnocanthus (jim-nō-kan′thus), *n.* [NL., an error for **Gymnacanthus,* < Gr. *γυμνός,* naked, + *ἄκανθα,* spine.] A genus of fishes of the family *Cottidæ* (the sculpins), found in the North Atlantic and North Pacific. It is characterized by the absence of teeth on the vomer and by the presence of antler-like spines on the preopercle. *G. tricuspis* is found on the coast of Canada.

Gymnocarpeæ (jim-nō-kär′pē-ē), *n. pl.* [NL.] Same as ★*Discolichenes.* See *gymnocarpous.*

gymnocarpic (jim-nō-kär′pik), *a.* Having the spore-bearing surface or hymenium naked: applied by Brefeld to the *Uredinales* and *Dacryomycetales.*

Gymnoglossa (jim-nō-glos′ä), *n. pl.* [NL., < Gr. *γυμνός,* naked, + *γλῶσσα,* tongue.] A group of gastropods destitute of radula and jaws. The proboscis is prominent and in parasitic forms is used to suck the juices of the host. The group contains the families *Eulimidæ* and *Pyramidellidæ.*



gymnoglossate (jim-nō-glos′āt), *a.* and *n.* [As *Gymnoglossa* + *-ate*[1].] **I.** *a.* Having the radula hidden or absent; of or pertaining to the *Gymnoglossa.*

II. *n.* Any gastropod of the group *Gymnoglossa.*

Gymnogongrus (jim-nō-gong′grus), *n.* [NL., < Gr. *γυμνός,* naked, + *γόγγρος,* an excrescence.] A large genus of red algæ which resembles *Chondrus,* or Irish moss; it is widely distributed.

gymnoplast (jim′nō-plåst), *n.* [Gr. *γυμνός,* naked, + *πλαστός,* formed.] A naked protoplasmic mass, that is, one without an inclosing wall or membrane.

Gymnosarda (jim-nō-sär′dä), *n.* [NL., < Gr. *γυμνός,* naked, + *σάρδη,* L. *sarda,* sardine.] A genus of the *Scombridæ* or mackerel-like fishes found in most tropical seas, swimming freely in the open ocean. Members of the species are smaller in size than the true tunnies, reaching a weight of 5 or 6 pounds, and are known as *small tunnies* and *oceanic bonitos.* Two species are well known, *G. alleterata* and *G. pelamis.*

Gymnosarda alleterata.
(From Bulletin 47, U. S. Nat. Museum.)

gymnosome (jim′nō-sōm), *n.* [NL. *gymnosoma.*] In *zoöl.*, one of the *Gymnosomata;* a pteropod with a naked body.

gymnospermic (jim-nō-spėr′mik), *a.* Same as *gymnospermal.*

gymnospermy (jim′nō-spėr-mi), *n.* [*Gymnosperm-ous* + *-y*[3].] In *bot.*, the state or character of being gymnospermous.

gymnospore, *n.* **2.** Specifically, in *bot.*, a spore that is naked in the sense of not being produced in a sporangium.—**3.** In the classification of Le Maout and Decaisne, a cellular cryptogamic plant in which the spores, by absorption of the mother-cell, become free in a common cavity. Their group *Gymnospores* is coextensive with the *Bryophyta.* No longer used.

Gymnosporidia (jim″nō-spō-rid′i-ä), *n. pl.* [NL., < Gr. *γυμνός,* naked, + *σπορά,* seed (spore), + dim. *-ιδιον.*] In Labbé's classification, a group of protozoan cell-parasites, which form an order or a suborder of *Hæmosporidia.* They infest warm-blooded hosts and owe their name to the fact that no resistant cysts are formed in these hosts, sporogony, so far as observed, taking place in an intermediate invertebrate host.

Gymnostomata (jim-nō-stō′ma-tä), *n. pl.* [NL., < Gr. *γυμνός,* naked, + *στόμα(τ-),* mouth.]

An order of *Ciliata* in which the mouth is usually closed except during the inception of food, and is without an undulating membrane. The pharynx, when distinctly developed, is without ciliary structures, but is usually provided with a rod-apparatus or with a modification of one. It includes the families *Chlamydodonta, Enchelina,* and *Trachelina.* Compare ★*Trichostomata.*

gymnostomatous (jim-nō-stō′ma-tus), *a.* [Gr. *γυμνός,* naked, + *στόμα(τ-),* mouth.] Having the mouth unprovided with an undulating membrane, as certain ciliate infusorians.

Gymnothorax (jim-nō-thō′raks), *n.* [NL., < Gr. *γυμνός,* naked, + *θώραξ,* chest.] A genus of morays or eels, of the family *Muræniдæ,* comprising many of the largest and most ferocious members of the group. The genus is characterized by the well-developed dorsal fins and by the absence of tentacles on the posterior nostrils. There are very many species, some of them brilliantly and fantastically colored. *G. moringua* and *G. funebris* are common in the West Indies.

Gympie series. See ★*series.*

gynæcandrous, gynæcarchy, etc. See ★*gynecandrous,* etc.

gynæceum, *n.* **4.** In some countries, that part of a Christian church which is reserved for the women of the congregation.

gynandrism (ji-nan′drizm), *n.* [*gynandr-ous* + *-ism.*] The state of being monœcious or hermaphrodite.

gynandrocratic (ji-nan-drō-krat′ik), *a.* [Gr. *γυνή,* woman, + *ἀνήρ (ἀνδρ-),* man, + *-κρατια,* < *κρατεῖν,* rule.] Equally ruled by man and woman; characterized by social independence of each sex. *L. F. Ward,* Pure Sociol., p. 373.

gynandromorph (ji-nan′drō-môrf), *n.* [Gr. *γύνανδρος,* female and male, + *μορφή,* form.]

Insect gynandromorph: a moth (*Automeris io*), female on the left, male on the right side of the body.

In *biol.*, an animal of a unisexual species but exhibiting the anomaly of having part of the body male and part female. Gynandromorphs are most frequently found among insects.

gynandromorphic (ji-nan-drō-môr′fik), *a.* [*gynandromorph* + *-ic.*] Possessing the characteristics of gynandromorphism.

Gynandromorphic insects, in which the characters of the whole or part of one side of the body, wings and antennæ, are male, while those of the other side are female. *W. Bateson,* Study of Variation, p. 68.

gynandromorphy (ji-nan-drō-môr′fi), *n.* Same as *gynandromorphism. W. Bateson,* Study of Variation, p. 35.

gynecandrous, gynæcandrous (jin-ē-kan′-drus), *a.* [Gr. *γυνή (γυναικ-),* woman, + *ἀνήρ (ἀνδρ-),* man, + *-ous.*] In *bot.*, containing both staminate and pistillate flowers, as the spikelets of some carices; androgynous. [Rare.]

The terminal spike is, in this species, nearly always *gynæcandrous. Amer. Jour. Sci.*, April, 1904, p. 308.

gynecarchy, gynæcarchy (jin′ē-kär-ki), *n.* [Gr. *γυνή (γυναικ-),* woman, + *ἀρχή,* rule. Cf. *gynarchy.*] Rule or supremacy of the female, especially the alleged mother-right or matriarchate of primitive human society. *L. F. Ward,* Pure Sociol., p. 336.

gyneclexis (jin-ek-lek′sis), *n.* [NL., < Gr. *γυνή,* female, + *ἐκλεξις,* choice: see *eclectic.*] Sexual selection through choice by the female. *L. F. Ward,* Pure Sociol., p. 361.

gynecocentric, gynæcocentric (jin″ē-kō-sen′-trik), *a.* [Gr. *γυνή,* woman, + *κέντρον,* center, + *-ic.*] Centering in and depending upon the female. *L. F. Ward,* Pure Sociol., p. 296.—**Gynecocentric theory,** the view that "the female sex is primary and the male secondary" in organic life and evolution, and that the male was developed "under the operation of the principle of advantage to secure organic progress through the crossing of strains." *L. F. Ward,* Pure Sociol., p. 296.

gynecocrat, gynæcocrat (jin′ē-kō-krat), *n.* [*gynecocracy* (*-crat-*).] One who favors or upholds female government. *Fitzedward Hall,* in The Nation, LVI. 68.

gynecocratic, gynæcocratic (jin″ē-kō-krat′-ik), *a.* [*gynecocracy* (*-crat-*) + *-ic.*] Organized on the basis of descent in the female line and governed by woman or by her male relatives; matriarchal.

This phenomenon may point to an original *gynæcocratic* age, such as that proposed by Töpffer in the case of the Minyadæ.

A. H. Smith, in Jour. Hellenic Studies, xiv. 250.

gynecomania, gynæcomania (jin″ē-kō-mā′-ni-ą), *n.* [NL., < Gr. *γυνή* (*γυναικ-*), woman, + *μανία*, madness.] Same as *satyriasis.*

gynecomorphous, gynæcomorphous (jin″ē-kō-môr′fus), *a.* [Gr. *γυνή* (*γυναικ-*), woman, + *μορφή*, form, + *-ous.*] In *biol.*, having the form, attributes, or appearance of a female.

gynecopathic, gynæcopathic (jin″ē-kō-path′-ik), *a.* [*gynecopath-y* + *-ic.*] Of or pertaining to gynecopathy.

gynecopathy, gynæcopathy (jin-ē-kop′ą-thi), *n.* [Gr. *γυνή* (*γυναικ-*), woman, + *πάθος*, disease.] A disease peculiar to women.

gynecophoral, gynæcophoral (jin-ē-kof′ō-rąl), *a.* [*gynecophor-ous* + *-al*[1].] Same as *gynecophoric.*

gynerhopy (ji-ner′ō-pi), *n.* [Irreg. < Gr. *γυνή*, female, + *ῥοπή*, inclination downward, decline.] The state or condition of a species in which the females depart more widely than the males from the ancestral condition.

When female preponderance occurs, it might be called *gynerhopy*. *Science*, Feb. 13, 1903, p. 250.

gynetype (jin′ē-tīp), *n.* [Gr. *γυνή*, woman, + *τύπος*, type.] In *zoöl.*, a female specimen taken as the type of a species.

gyniatrics (jin-i-ā′triks), *n.* [Gr. *γυνή*, woman, + *ἰατρικός*, of medical treatment: see *iatric.*] The treatment of diseases peculiar to women.

gynocardate (jin-ō-kär′dāt), *n.* [*gynocardic* + *-ate*[1].] A salt of gynocardic acid, the active principle of chaulmugra-oil, used in the treatment of leprosy. *Buck*, Med. Handbook, V. 490.

gynocardic (jin-ō-kär′dik), *a.* [*Gynocardia* + *-ic.*] Of or derived from *Gynocardia.*—**Gynocardic acid,** the active principle of chaulmugra-oil. Its salts are used in the treatment of leprosy.

gynocardin (jin-ō-kär′din), *n.* [*Gynocardia* + *-in*[2].] A glucoside from the seeds of *Gynocardia odorata.*

gynodiœcism (jin″ō-dī-ē′sizm), *n.* [*gynodiœc*(*ious*) + *-ism.*] The condition of being gynodiœcious.

gynogenetic (jin″ō-je-net′ik), *a.* [Gr. *γυνή*, female, + *γένεσις*, generation: see *genetic.*] Productive of females only.—**Gynogenetic parthenogenesis,** the production of females only from unfertilized eggs; thelytoky. See ★*homoparthenogenesis.*

gynomonœcism (jin″ō-mō-nē′sizm), *n.* [*gynomonœc*(*ious*) + *-ism.*] The condition of being gynomonœcious.

gynoplasm (jin′ō-plazm), *n.* [Gr. *γυνή*, female, + *πλάσμα*, anything formed (see *plasm*).] The material that is supposed by Haeckel and others to enter into the composition of female cells and give them their distinctive character, and to be unlike anything that enters into the composition of male cells. See quotation under ★*androplasm.*

gynospore (jin′ō-spōr), *n.* [Gr. *γυνή*, female, + *σπορά*, seed (spore).] Same as ★*macrogamete.* *Buck*, Med. Handbook, VIII. 541.

gynostyle (jin′ō-stīl), *n.* [Gr. *γυνή*, woman, + *στῦλος*, pillar: see *style*[2].] In siphonophorans, a female blastostyle.

Gynura (ji-nō′rą), *n.* [NL. (Cassini, 1825), < Gr. *γυνή*, female, + *οὐρά*, tail. The name alludes to the elongated, tail-like stigmas.] An untenable name for *Crassocephalum*, a genus of plants of the family *Asteraceæ.* See ★*Crassocephalum.*

gypsine[2] (jip′sin), *n.* [*gyps-um* + *-ine*[2].] 1. The trade-name for a fire-proof material, for use in building, consisting of plastic hydraulic lime mixed with coke or sand and asbestos and pressed into blocks like bricks.—2. A dusting-powder containing arseniate of lead, applied to plants as an insecticide. *E. G. Lodeman*, The Spraying of Plants, p. 147.

gypsite (jip′sīt), *n.* [*gyps-um* + *-ite*[2].] Gypsum in a finely granular form: a local name in Kansas and Texas, where this variety occurs.

Under the general head of calcined plaster, or plaster of paris, in these reports is included the product of cement plaster made from gypsum dirt, or "*gypsite.*" A greater portion of the gypsum product of Kansas and Texas is of this variety. . . . Under the microscope the *gypsite* of Kansas is seen to consist of a mass of small, angular gypsum crystals of varying size.

An. Rep. U. S. Geol. Surv., 1897–98, pp. 584, 585.

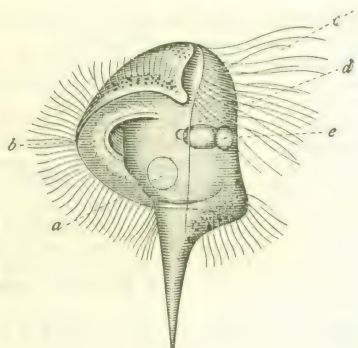
Gypskeuper (güps′koi-pėr), *n.* [G., 'gypsum keuper.'] In *geol.*, a subdivision of the Triassic system in Germany. It is correlated by German geologists with the upper part of the Keuper, and is underlain by the Lettenkohl and overlain by the Rhætic. It reaches a thickness of 1,000 feet and contains numerous plants (*Equisetum columnare*) and labyrinthodont and fish remains.

Gypsornis (jip-sôr′nis), *n.* [NL., < Gr. *γύψος*, gypsum, + *ὄρνις*, bird.] An extinct genus of grallous birds like the rail, found in the Eocene gypsum-beds of Montmartre, France.

gypsum, *n.*—**Gypsum tablet,** a smooth plate of plaster of Paris used in the blowpipe analysis of minerals, particularly of those which yield colored sublimates.—**Paris gypsum,** in *geol.*, the uppermost division of the Upper Eocene (Oligocene) in the Paris Tertiary basin. It consists of four beds of gypsum, intercalated with sands and marls, the highest of which is celebrated for the profusion of its mammalian remains (*Anoplotherium, Palæotherium*, opossum, pachyderms, *Carnivora*).

gypsum-furnace (jip′sum-fėr″nās), *n.* A furnace used to calcine gypsum in the manufacture of stucco or plaster of Paris. More commonly called *gypsum-kiln.*

gypsum-kiln (jip′sum-kil), *n.* Same as ★*gypsum-furnace.*



gyration, *n.* 2. In univalve shells, one of the whorls of the spire.—3. Any system of gyri or convolutions in the brain. *Amer. Anthropologist*, July–Sept., 1901, p. 465.—**Dove's law of gyration.** See *Dove's law of the rotation of the* ★*winds.*—**Gyration in storm-areas,** the rule, announced by Ferrel, that in the northern hemisphere winds must circulate about a low pressure in the direction contrary to the movement of the hands of a watch, but that in the southern hemisphere the circulation must be with the movement. See *Ferrel's* ★*law.*

gyrinid (ji-rin′id), *n.* and *a.* **I.** *n.* One of the *Gyrinidæ.*

II. *a.* Of or belonging to the coleopterous family *Gyrinidæ.*

gyroceracone (jī-rō-ser′ą-kōn), *n.* [Irreg. < Gr. *γυρός*, round, + *κέρας*, horn, + *κῶνος*, cone.] A shell of a nautiloid cephalopod which is curved in a loose spiral like that of *Gyroceras*, the volutions being sometimes in contact but with no impressed zone. *Hyatt.*

Gyrocoryna (jī″rō-kō-rī′nä), *n. pl.* [NL., < Gr. *γυρός*, round, + *κορύνη*, a club.] A family of hete-

Cænomorpha medusula Perty.

From the ventral side, slightly turned to the right. *a*, contractile vacuole; *b*, adoral zone; *c*, cirri; *d*, micronucleus; *e*, meganucleus. Highly magnified. (Bütschli, after Blochmann. From Lankester's "Zoology.")

rotrichous, trichostomatous ciliates. They have a bell-shaped body, with the anterior end rounded and the posterior as a caudal appendage projecting from the bell, and a ventral furrow of cilia, with a row of cilia at the edge of the bell leading to the mouth at the base of the appendage. The only genus is *Cænomorpha.*

Gyrocotyle (jī-rō-kot′i-lē), *n.* [NL., < Gr. *γυρός*, round, + *κοτύλη*, cup.] The typical genus of the family *Gyrocotylidæ. Diesing*, 1850.

Gyrocotylidæ (jī″rō-kō-til′i-dē), *n. pl.* [NL., < *Gyrocotyle* + *-idæ.*] A family of monozoic tapeworms. They have a leaf-shaped body with crenate margins; a small but deep sucker at the pointed extremity; and at the opposite end a rosette organ carried by a cylindrical peduncle, traversed by a canal which opens at each end, from which a peculiar proboscis-like organ can be everted. *Gyrocotyle* is the typical genus.

Gyrodus (jī′rō-dus), *n.* [NL., < Gr. *γυρός*, round, + *ὀδούς*, a tooth.] A genus of extinct ganoid fishes. They have a very flat and deep body completely covered with scales; a blunt nose; flat bean-shaped teeth on the palate and splenial, and a few sharp prehensile teeth on the dentary; a symmetrical caudal fin, and thick scales ridged at the margin. The genus is common in the Jurassic rocks.

gyrograph (jī′rō-grȧf), *n.* [Gr. *γῦρος*, a wheel, + *γράφειν*, write.] An instrument for register-

ing the revolutions of a mechanism, such as a wheel.

gyrographic (jī-rō-graf′ik), *a.* [Gr. *γῦρος*, a wheel, a circle, + *γράφειν*, write, + *-ic.*] Noting an organic acid found in certain lichens (*Gyrophora* or *Umbilicaria pustulata*).

Gyrolepis (jī-rol′ē-pis), *n.* [NL., < Gr. *γυρός*, round, + *λεπίς*, a scale.] A genus of heterocercal ganoid fishes characterized by having the anterior rays of the pectoral fins not articulated and scales marked with irregular wrinkles. It is common in the Mesozoic rocks.

gyromele (jī′rō-mēl), *n.* [Gr. *γῦρος*, a wheel, a turn, + *μήλη*, a probe.] A device consisting of a sponge on the end of a long rotating bougie, used for swabbing out the stomach.

gyrometer (jī-rom′e-tėr), *n.* [Gr. *γῦρος*, a turn, revolution, + *μέτρον*, a measure.] An instrument for indicating continuously the number of revolutions of a rotating axis.

Gyromitra (jī-rō-mī′trä), *n.* [NL. (Fries, 1849), < Gr. *γυρός*, round, + *μίτρα*, a head-dress,

Gyromitra esculenta.

One fourth natural size: *a*, general view of plant; *b*, cross-section of same. (From Engler & Prantl's "Pflanzenfamilien.")

a turban.] A genus of ascomycetous fungi of the family *Helvellaceæ*, having large fleshy stipitate fruiting bodies (ascomata) with the surface irregularly depressed and folded. The name refers to the convoluted turban-like ascoma. Eleven species have been described, some of which are among the largest known *Ascomycetes. G. esculenta*, as its name indicates, is an edible species occurring in America and Europe.

Gyrophoraceæ (jī″rō-fō-rā′sē-ē), *n. pl.* [NL., < *Gyrophora* + *-aceæ.*] A family of gymnocarpous lichens named from the genus *Gyrophora.*

gyro-pigeon (jī′rō-pij″ọn), *n.* [Gr. *γῦρος*, a turn, + E. *pigeon.*] A contrivance of tin having flanges so arranged spirally that when a rotary motion is imparted to it its gyrations cause it to rise in the air: formerly used as a target for shooting.

gyroplane (jī′rō-plān), *n.* [Gr. *γῦρος*, a ring (wheel), + *-plane*, as in E. *aëroplane.*] A flying-machine, of the helicopter type, worked by vertical screw propellers.

gyropter (jī′rop-tėr), *n.* [Gr. *γῦρος*, a wheel, a turn, + *πτερόν*, a wing, a bird.] A helicopter raised and propelled by two large, lateral, horizontally set, umbrella-shaped wings.

Gyroscopic precession. See ★*precession.*

gyrostatics (jī-rō-stat′iks), *n.* That branch of the science of kinetics which deals with the laws of rotating solids.

gyrus, *n.*—**Broca's gyrus.** Same as *inferior frontal gyrus.* See *frontal gyri* under *gyrus.*—**Central gyri.** Same as *central* ★*convolutions.*—**Composite gyrus,** a gyrus, or ridge, just below and in front of the precrucial or anterior portion of the sigmoid gyrus.—**Dentate gyrus,** an imperfectly formed convolution within the dentate fissure.—**Fusiform gyrus,** the lateral occipitotemporal convolution, a convolution of the temporal lobe which lies between the collateral and third temporal fissures. It forms the posterior portion of the fourth temporal gyrus.—**Gyrus geniculi,** a vestigial or degenerate gyrus at the anterior end of the callosum: a prolongation of the longitudinal striæ of the callosum.—**Gyrus intermedius rhinencephali,** a name applied by Retzius to the tubercle of the olfactory tract in the brains of marsupials and edentates.—**Gyrus limbicus,** a thin strip of gray matter upon the callosum which contains the longitudinal striæ of Fancisii. Also *indusium griseum.*—**Gyrus lunaris,** a small sagittal gyrus lying behind the gyrus intermedius in the brains of marsupials, edentates, and insectivores.—**Gyrus subcallosus,** a gyrus which extends from the rostrum of the callosum to the base of the cerebrum immediately in front of the precommissure and lamina terminalis.—**Internal gyrus.** Same as *callosal gyrus.*—**Lingual gyrus,** the median occipitotemporal convolution of the brain.—**Paracentral gyrus,** a convolution bounded by the paracentral and callosomarginal sulci.—**Postcentral gyrus,** a convolution posterior to the central sulcus.—**Precentral gyrus,** a convolution bounded posteriorly by the central sulcus: same as *ascending frontal gyrus.*—**Sagittal gyrus,** a large convolution on each half of the cerebrum, adjacent to the median line or fissure which separates the halves of the cerebrum. It is more or less parallel with the sagittal suture of the skull.

3. (*d*) In *mineral.*, the initial letter of the general symbol, *hkl*, applied to a face of a crystal in the system of Miller. See ★*symbol.* (*e*) In *elect.*, the symbol for *henry* (which see).—4. (*f*) In *pathol.*, *hypermetropia.*

h., hy. In electrotechnics, abbreviations of *henry.*

ha. An abbreviation of *hectare.*

haa (hä'ä), *n.* [Hawaiian.] A tree of the spurge family, *Antidesma platyphyllum*, found on most of the Hawaiian Islands, and reaching a height of 30 feet. Its fruit is a reddish drupe with a bony, flattened putamen.

habanera (hä-bä-nā'rä), *n.* [Sp., < *Habana*, Havana.] A slow Spanish dance in triple rhythm; also, the music for such a dance.

habdalah (häb-dä'lä), *n.* [Heb.: *ha*, the, *b'dālah*, < *badal*, separate.] A religious ceremony among orthodox Jews at the close of the Sabbath. On returning home from the synagogue the master of the house lights a special wax taper, fills a cup with wine, and recites several passages of Scripture which treat of salvation, beginning with: "This is the God of my salvation, in whom I trust and will not be afraid"; "God is my strength and song, and he became my salvation," etc. He then pronounces a blessing on the wine; an ornamented, chased, or carved spice-box is produced, of which all the members of the household smell; and the following blessing is pronounced: "Blessed thou art, O God of the universe, who created all kinds of spices."

Habeas corpus ad respondendum, a writ by which a person was removed out of the custody of one court into that of another to answer to a suit in the latter. It was also employed to compel the production of a person in confinement to answer to a criminal charge.—**Habeas corpus ad satisfaciendum,** a writ by which a prisoner imprisoned by virtue of the judgment of one court was brought into another court to charge him in execution upon a judgment of the latter.

habenal (hạ-bē'nạl), *a.* [NL. **habenalis*, < L. *habena*, a thong, strap, rein, < *habere*, hold: see *have.*] Same as *habenar. Buck*, Med. Handbook, II. 152.

Habenular ganglion. See ★*ganglion habenulæ.*

Haberlia (ha-bėr'li-ạ), *n.* [NL. (Dennstedt, 1818), named in honor of Karl Konstantin *Haberle* (1764–1832), professor of botany at Pesth.] A genus of dicotyledonous trees of the family *Anacardiaceæ.* See *Odina.*

habilla (ä-bē'lyä), *n.* [Amer. Sp., dim. of Sp. *haba*, broad bean, < L. *faba*, bean.] 1. The sand-box tree, *Hura crepitans*, and especially its seeds, which are a drastic cathartic. Called also *javilla.* See *Hura* and *sand-box*, 3.—2. In Central America, *Lens phaseoloides*, or its seeds. See *Entada*, *sea-bean*, 1, and ★*lens*, 5.

habit, *n.*, 1. (*d*) In *petrog.*, the general appearance of a rock given by the texture and the mode, that is, the mineral composition. Rocks may have the same habit and not agree closely in composition.

6. A small piece of linen attached to a woman's collar at the back, designed to go under the neck of the dress and keep the collar in place.

—**Dyvour's habit,** in *Scots law*, a habit which bankrupts were compelled to wear unless in the bankruptcy proceedings it was alleged and proved that the insolvency was the result of misfortune. Bankrupt dealers in an illicit trade were condemned to wear the habit in any event. *Bouvier*, Law Dict.—**Land of steady habits,** the State of Connecticut.

habitancy, *n.* 2. Inhabitants collectively. *De Quincey.*

Habitat group, a sum of plant species affiliated by their requiring similar environments. *Pound and Clements.*

Habitual time. See ★*time*[1].

habituation, *n.*—**Error of habituation.** See ★*error of expectation.*

habutai (hä″bö-tī'), *n.* [Jap. *habutaye.*] A Japanese silk.

hache (häsh), *n.* [F. *hache*, an ax: see *hatchet.*] A palæolithic stone implement, called originally *lang de chat*, evidently used for a great variety of purposes. Also called *coup de poing* (de Mortillet), and Chelleau implement.

This [a Palæolithic workshop] was represented by a dense layer of flint chips, which had evidently never been disturbed since the materials were operated upon, for Mr. Spurrell was able to piece many of the flakes, and to demonstrate that the object sought was the manufacture of *haches.* *J. Geikie*, The Great Ice Age, p. 637.

hacienda-piece (äth-i-ạn'dä-pēs), *n.* A private coin struck by the proprietor of an hacienda or ranch in Mexico or Central America.

hack[2], *n.*, **1.** (*g*) The board on which a hawk's meat is laid.—**To be at hack,** to have partial liberty, as eyas hawks before they begin to be trained.—**To fly at hack,** to be at partial liberty, as a half-trained hawk.

hack[4], *v. i.* 4. To do work as a hack or literary drudge: as, to *hack* for a living.

hackee[2] (hak'ē), *n.* [Origin not ascertained.] In *ceram.*, a mixture of whiting and gum painted on biscuit-ware when a reserved design is desired in a printed pattern. The whiting drops off in the kiln, leaving a white reserved design on the ground color.

hacking[1], *n.* 4. In *pathol.*, the emission of a succession of short coughs.—5. In *massage*, the act of striking the muscles with the side of the hand.

hacking-board (hak'ing-bōrd), *n.* A board on which unburned bricks are dried or hacked.

hackle[3], *n.* 6. One of the long hairs which, when erected, form a crest along the neck and back of a dog.

I could see the great dog standing, not sleeping, in the veranda, the *hackles* alift on her back, and her feet planted as tensely as the drawn wire rope of a suspension bridge. *R. Kipling*, The Recrudescence of Imray.

Dun hackle, in *angling*, an artificial fly.

hackle[3], *v. t.* 3. In *angling*, to dress (an artificial fly) with hackle.

hackle-back (hak'l-bak), *n.* Same as ★ *hatchet-back.*

hackle-bench (hak'l-bench), *n.* A bench or table for supporting hackling-pins.

hackle-sheet (hak'l-shēt), *n.* The movable apron, or sheet, to which are attached the hackling-pins of a hackling-machine.

hackmack (hak'mak), *n.* Same as *hackmatack.*

hackmannite (hak'man-īt), *n.* [Named for Dr. Victor *Hackman* of Helsingfors.] A member of the sodalite group of minerals which occurs in pale reddish-violet dodecahedrons in the rock called tawite from the Tawa valley, Kola Peninsula, Lapland. It is near sodalite in composition but contains also the radical NaS.

hackmatack, *n.* 2. The juniper, *Juniperus communis.*

hackney, *n.* 2. Specifically, a breed of horses which combines thoroughbred blood with that of the English shire horse or cart-horse and also that of the native Irish horse. A hackney is a horse of moderate size, but over 14 hands, compact build, good action and good disposition, not so heavy as a coach-horse nor so 'leggy' as a hunter. The term is used in England much as *roadster* or *driver* is used in the United States, but includes horses for riding as well as for driving.

hack-saw (hak'sâ), *n.* See *saw*[1].

hack-saw (hak'sâ), *v. t.* To cut with a hack-saw.—**Hack-sawing machine,** a power-machine employing a reciprocating hack-saw and used for cutting metal rods, bars, and pipes. Two types are in use. In one the saw is operated by an oscillating frame, and in the other it is directly connected with a rod and crank-pin on a wheel, suitable mechanism being provided for holding the saw to its work on the draw or backward stroke and allowing it to run free on the return stroke, and for allowing for the wear of the saw. Feed-mechanism is also used to bring the rod to be cut to the vise, locking it in the vise while the cut is made, and releasing the saw and the vise while the next length is fed to the saw. The depth and length of cut are adjustable.

hackthorn (hak'thôrn), *n.* [S.AF.D. *haakedorn*, hook-thorn.] A South African thorny, leguminous shrub, *Acacia detinens*, which is considered sacred by some of the native tribes. Called also *wait-a-bit thorn.*

hack-tree (hak'trē), *n.* Same as *hackberry*, 2.

haddock, *n.* 2. A name wrongly applied to *Pseudophycis barbatus* and *Merluccius australis* allied to the family *Gadidæ* or codfishes. The European species of *Merluccius* is known as the *hake.*—**New Zealand haddock,** a gadoid fish, *Merluccius australis*, found in Australian waters.

Hadean (hā'dē-ạn), *a.* Of or pertaining to Hades: as, *Hadean* realms.

When Charon's boat conveyed a spirit o'er
The Lethean water to the *Hadean* shore,
The fare was just a penny,—not too great,
The moderate, regular, Stygian statute rate.
J. G. Saxe, Money King, l. 188.

hadrome (had'rōm), *n.* [Gr. *ἀδρός*, strong, + E. *-ome.*] The xylem or woody part of a vascular bundle.

Hadromerina (had″rō-me-rī'nä), *n. pl.* [NL., < Gr. *ἀδρός*, thick, large, + *μέρος*, part, + *-ina*[2].] An order of monaxonidan *Demospongiæ*, usually of massive form, sometimes stalked or cup-shaped, of compact structure, with the skeletal framework radiate or without order, and the spongin absent or very feebly developed. It includes several families, among them the *Coppatiidæ*, *Clionidæ*, and *Suberitidæ.*

hadromerine (ha-drom'e-rin), *a.* [*Hadromerina.*] Resembling sponges of the order *Hadromerina*; having a massive form.

hadromin (had'rō-min), *n.* [Formation not ascertained.] An aldehyde substance said to accompany natural vanillin.

Hadropterus (ha-drop'te-rus), *n.* [NL., < Gr. *ἀδρός*, thick, + *πτερόν*, wing (fin).] A genus of etheostomatine perches or darters, containing some of the largest and most active species of the group. They are small fishes, olivaceous in color, with large black blotches on the sides, found in the bottom of clear streams in the Mississippi valley. *H. aspro* is the common black-sided darter.

hadrosaurid (had-rō-sâ'rid), *n.* One of the *Hadrosauridæ.*

hadrosauroid (had-rō-sâ'roid), *a.* and *n.* **I.** *a.* Resembling or allied to *Hadrosaurus.*

II. *n.* A saurian having affinities with *Hadrosaurus.*

Haeckelism (hek'ẹl-izm), *n.* The opinions or speculations of Ernst Haeckel, a German zoölogist, especially his opinion that the life-history of the individual organism is a recapitulation of its ancestral history. See ★*recapitulation*, 3, and *Haeckel's* ★*law.*

Hæmamœba (hem-ạ-mē'bä), *n.* [NL., < Gr. *αἷμα*, blood, + NL. *amœba.*] 1. The typical genus of the family *Hæmamœbidæ. H. malariæ* (*Plasmodium quartanæ*) is the cause of quartan fever in man. See ★*malaria*, west cuts. *Grassi and Feletti*, 1890.—2. [*l. c.*] An organism of this genus. Also *hemamœba.*—**Hæmamœba immaculata,** a non-pigmented variety of *H. præcox.*—**H. præcox.** Same as *Plasmodium malignum.*—**H. relicta,** a protozoan blood parasite of the sparrow.—**H. sub-immaculata,** a protozoan blood parasite of the hawk.—**H. subpræcox,** a protozoan blood parasite in the owl, lark, and other birds.—**H. vivax.** Same as *Plasmodium testianæ.*

Hæmamœbidæ (hem-ạ-mē'bi-dē), *n. pl.* [NL., < *Hæmamœba* + *-idæ.*] A family of *Hæmosporidia*, consisting of amœboid organisms found mostly in the red blood-corpuscles. It includes *Halteridium*, found in birds, causing fever and sometimes death; *Hæmamœba*, the cause of malaria in man; and other forms parasitic in frogs, cattle, and other animals.

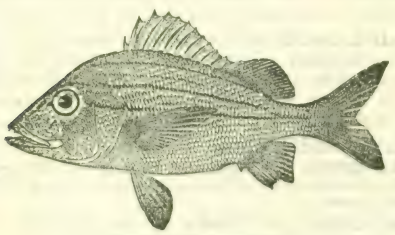
The Italian observers have found that all three species of the human *Hæmamœbidæ* are cultivable in Anopheles claviger and not only in this but in other Italian species of Anopheles, while they . . . have failed to cultivate the parasites in Culex. *L. O. Howard.*

hæmatein, *n.* See *hematein.*

hæmatinone (hē-mat'i-nōn), *n.* Same as *hæmatinum.*

Hæmocytozoa (hem-ō-sī-tō-zō'ä), *n. pl.* [NL., < Gr. *αἷμα*, blood, + *κύτος*, a hollow (a cell), + *ζῷον*, animal.] Same as ★*Hæmosporidia.*

Hæmogregarina (hem-ō-greg-ạ-rī'nä), *n.* [NL., < Gr. *αἷμα*, blood, + NL. *Gregarina.*] A genus of *Hæmosporidia*, typical of the family *Hæmogregarinidæ.* It is parasitic in reptiles, amphibians, and fishes. *Danilewsky*, 1885.



Hæmogregarinidæ (hem-ō-greg-ạ-rin'i-dē), *n. pl.* [NL., < *Hæmogregarina* + *-idæ.*] A family of blood-parasites of the order *Hæmosporidia.* The typical genus is *Hæmogregarina.*

Hæmosporidia (hem″ō-spō-rid′i-ä), *n. pl.* [NL., < Gr. *αἷμα*, blood, + *σπορά*, seed (spore), + dim. *-ιδιον*.] An order of *Sporozoa*, the members of which are parasitic in the blood of fishes, amphibians, and reptiles. The trophozoite is generally a vermiform hæmogregarine, which passes its early stages in a blood-corpuscle, but becomes free when full-grown. There appears to be no alternation of hosts, the entire cycle of development being passed in the body of one animal. This order contains the genera *Lankestrella*, *Karyolysus*, and *Hæmogregarina*. *Danilewsky.*

hæmosporidian (hem″ō-spō-rid′i-an), *a.* and *n.* I. *a.* Of or pertaining to the *Hæmosporidia*.

II. *n.* One of the *Hæmosporidia*.—2. A general designation of the pathogenic *Protozoa* that live and multiply in the corpuscles of the red blood of mammals, and give rise to malaria. See ★*malaria*.

Hæmulidæ (hē-mū′li-dē), *n. pl.* [NL., < *Hæmul(on)* + *-idæ*. Cf. *Hæmulonidæ*.] A family of sparoid fishes, typified by the grunts, which constitute the genus *Hæmulon*. They differ from the *Sparidæ* in having the teeth all pointed; from the *Lutianidæ* in having no teeth on the vomer; and from

Hæmulon Macrostomum.
(From Bulletin 47, U. S. Nat. Museum.)

the *Serranidæ* in having the maxillary bone or side of the upper jaw slipping under the edge of the preorbital bone The species are widely diffused in tropical seas and are valued as food. The family is often called *Pristipomatidæ*. The typical genus is *Hæmulon*.

hæmuloid (hem′ū-loid), *n.* Any fish of the family *Hæmulidæ*.

hagbaha (häg-bä′hä), *n.* [Heb., < *gabah*, lifting.] The elevation of the open sacred scroll (torah) after the reading of the ★parasha (which see). When it is thus exposed to the view of the congregation, all stand up and recite the following: "And this is the law which Moses placed before the children of Israel," etc.; "This is a tree of life to them that grasp it," etc. All ceremonies in connection with the reading of the law, including the hagbaha, are considered meritorious, and are performed by prominent members of the synagogue.

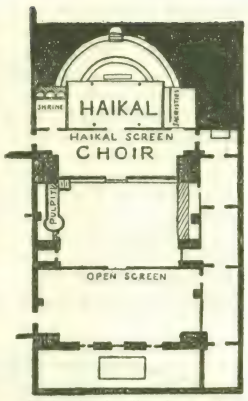
hagbrier (hag′brī-ėr), *n.* The hispid greenbrier, *Smilax hispida*, the stems of which are thickly set with long, straight, slender spines. It ranges from Ontario to North Carolina, and westward to Minnesota and Texas.

haggadah, *n.* 3. The Jewish ritual for the first two nights of Passover. It contains extracts from the Bible and the Talmud treating of the exodus from Egypt, also praise, including hallel (Ps. cxiii.–cxviii.), and prayer for future redemption.

hagiasterium (hā″ji-as-tē′ri-um), *n.*; pl. *hagiasteria* (-ä). [NL., < Gr. *ἁγιαστήριον*, a sanctuary, < *ἁγιάζειν*, make sacred, < *ἅγιος*, sacred: see *hagiology*.] In *early Latin arch.*, the sanctuary, as distinguished from the choir occupied by the singers.

hagiolater (hā-ji-ol′a-tėr), *n.* [Gr. *ἅγιος*, saint, + *-λατρης*, -worshiper.] A saint-worshiper. *F. P. Cobbe.*

hahanui (hä-hä-nö′ē), *n.* [Hawaiian.] A spiny, bristling shrub, *Cyanea ferox*, of the family *Campanulaceæ*, with dissected leaves and purplish-blue flowers.



Hahnemannism (hä′ne-man-izm), *n.* The medical theories of Dr. Hahnemann; homeopathy.

haigua (hī′gwä), *n.* [Nootka *haigua*, also spelled *hiagua*, *hiaqua*, *higua*, *hyagwa*, in Chinook jargon *hykwa*, *hyakwa*.] The *Dentalium* shell used by the Indians of the North Pacific coast of America for ornaments. Sometimes the surface of the shell was decorated with delicate carvings. It was valued according to its size, the value being determined by the number of shells required to make a string one fathom in length. The shortest kind was also called *coop-coop* or *kopkops* (Chinook *ikupkup*).

haikal (hī′käl), *n.* [Coptic.] In churches of the Levant, a sacred place, usually distinguished from the choir. In the Coptic churches of Egypt it forms an important member of the plan and is in some cases covered with a cupola which is richly adorned, having mosaics or paintings. See cut in next column.—**Haikal Screen,** in churches of the Levant, a decorative and elaborate screen-wall which shuts off the haikal from the body of the church. In churches of the Greek rite the screen is called *iconostasis*.

haikh (hīĕh), *n.* [The native name of Armenia.] The Armenian language.

haikwan (hī-kwän′), *n.* [Chinese, < *hai*, sea, + *kwan*, a gateway, a customhouse.] Maritime customs in China.

Haikal in the Church of Abu's Sifain, old Cairo. (From Butler's "Ancient Coptic Churches of Egypt.")

hail[1], *n.*—**Soft hail,** small pellets of ice, sometime frozen raindrops, at other times small hail, usually falling together with rain and rapidly melting away.

hail[3], *n.* The various responses made by naval officers at night to the sentry, by which the latter may learn the rank of the officer approaching the vessel, are as follows: Flag-officers answer "flag!" the captain gives the name of his ship; the ward-room officers answer, "Aye, aye!" the steerage and warrant officers answer, "No, no!" and petty officers and members of the crew answer, "Hello!" Yachtsmen have adopted this code with a slight modification.

hail[3], *v. t.*—**To hail the ball,** to throw or drive the ball to the goal; win the goal. *N. E. D.* [Scotch.]

hail-backed (hāl′bakt), *a.* Having a broad stripe of white running from the back of the neck to the root of the tail: said of cattle.

hail-band (hāl′band), *n.* One of the narrow tracts covered with hail which are characteristic of severe hail-storms, especially in France. They generally lie parallel to one another and to the general path of the storm, leaving between them lanes of little hail but of heavy rain and destructive winds.

hail-cannon (hāl′kan-on), *n.* A small cannon or tube set vertically and furnished with a conical prolongation. The discharge of a few ounces of gunpowder in the cannon sends a vortex-ring of smoke rapidly upward to an altitude of about 1,000 feet. Such cannon have been extensively used since 1890 in southern Europe, under the mistaken belief that numerous discharges of them will prevent injurious hail-storms. See ★*grelifuge cannon*.

hail-cloud (hāl′kloud), *n.* A cloud from which hail falls; that portion of a cumulus cloud which represents the so-called hail-stage and within which the temperature is at freezing-point, the cooling due to expansion being just counterbalanced by the evolution of the latent heat of freezing water from the drops of rain that are being frozen.

hail-gage (hāl′gāj), *n.* A special form of rain-gage constructed to separate the hail from the rain-water and allow of the separate measurment of each.

hailing-port (hāl′ing-pōrt), *n.* The name of the port from which a vessel hails, required by law to be painted on the stern of all documented vessels in the United States; the port in which the managing owner of the vessel lives, or which is nearest to his place of residence; the home port of a vessel.

hail-shooting (hāl′shö″ting), *n.* The firing of cannon for the purpose of dissipating hail-storms or preventing hail: beneficial results of this practice have not been demonstrated.

hailweed (hāl′wēd), *n.* Dodder, especially the thyme-dodder or the flax-dodder. Also *hair-weed*.

haimarada (hī-mä-rä′dä), *n.* [Arawak.] *Lindernia diffusa*, a herbaceous plant of the family *Scrophulariaceæ*, native of South America. In Guiana it is used as medicine in fevers, dysentery and disorders of the liver.

Haimea (hā′mē-ä), *n. pl.* [NL.] The typical genus of the family *Haimeidæ*. *Milne-Edwards.*

Haimeidæ (hā-mē′i-dē), *n. pl.* [NL., < *Haimea* + *-idæ*.] A family of protalcyonacean *Alcyonaria*, consisting of solitary polyps with or without spicules. It contains the genera *Haimea*, *Hartea*, and *Monoxenia*.

hainberry (hān′ber″i), *n.* Same as *hindberry*.

hainite (hīn′īt), *n.* [G. *hain*, grove (see def.), + *-ite*[2].] A silicate, allied to wöhlerite in composition, occurring in slender, colorless to yellow, triclinic crystals: found in phonolite of the Hohe Hain ('high grove') in northern Bohemia.

hair[1], *n.*—**Beaded hair.** See ★*beaded*.—**Collecting hairs,** the hairs on the styles of certain composite plants the function of which it is to collect the pollen as it falls from the anthers.—**Curled hair,** hair from animals' manes and tails steamed and twisted, when hot, into rope, and afterward untwisted and picked apart, making a light springy material for upholstering.—**Fine hair,** an inner and finer hair or down, found on skins, which sometimes remains after the coarser hair is removed.—**In the hair,** with the hair remaining: said of skins.—**Peppercorn hair,** the hair of some African negroid tribes: named from the small spirals which it forms, beginning at the root. The closeness of these spirals gives the impression that the hair grows in tufts, although the roots are quite regularly distributed.—**Ringed hair** a kind of gray hair in which the affected hair is marked by segments of white alternating with the normal color. Also called *trichonosis versicolor*.—**Salamander's hair,** the mineral asbestos.—**Thetis's hair,** a name given by C. T. Jackson to quartz which contains fine needle-like inclosures of actinolite or asbestos. The fibers are generally straight, but penetrate the mass in several directions.—**True-wool hair,** the hair of a sheep's fleece, which possesses the textile properties of a serrated surface, curliness, and elasticity, the typical example being that from the merino sheep.

hair[1], *v. i.* 2. To form fine fibers, as syrup, when tested by dripping.

hair-ball (hār′bâl), *n.* A small pellet or a large concretion, composed chiefly of hair, found in the stomachs of animals which have the habit of licking themselves or other animals. See *bezoar* and ★*heterolith*. *Yearbook U. S. Dept. Agr.*, 1897, p. 501.

Hair-comber's disease. See ★*disease*.

hair-cord (hār′kôrd), *n.* A fabric woven with very fine lines or stripes, usually running lengthwise. Also called *hair-line*.

hair-cuticle (hār′kū-ti-kl), *n.* The outer layer of cells of a hair. See *hair*.

hair-drawn (hār′drân), *a.* Drawn out as fine as a hair; characterized by over-refinement or nicety: as, *hair-drawn* dialectics. *Schaff.*

hair-felt (hār′felt), *n.* Felt made of animal hair.

hair-fern (hār′fėrn), *n.* The American maidenhair, *Adiantum pedatum*.

hair-germ (hār′jėrm), *n.* An ingrowth of epidermal cells from whose base a hair is subsequently developed.

hair-grass, *n.*—**Bearded or long-awned hair-grass,** *Muhlenbergia capillaris*, a species which bears a large light-purple panicle with slender, spreading branches and very delicate pedicels, the flowers also with a slender awn. This grass is found in sandy or rocky soils in the eastern United States.—**California hair-grass,** *Deschampsia holciformis*, a much stouter plant than the Eastern species of the same genus. Also the slender hair-grass, *D. elongata*, and the oat-like hair-grass, *D. calycina*.—**Oat-like hair-grass.** See *California* ★*hair-grass*.—**Silvery hair-grass,** a low, tufted grass, *Aira caryophyllea*, nearly related to *Deschampsia*. Its shining panicle gives a silvery tinge to fields where it abounds. It is a European plant, of no value agriculturally, introduced into the eastern United States and into California. In England sometimes called *mouse-grass*.—**Slender hair-grass.** See *California* ★*hair-grass*.—**Tufted hair-grass,** *Deschampsia cæspitosa*, a European and North American grass found in the northern United States and especially abundant in the Rocky Mountains. It is of little agricultural value, but from its tussock-forming habit is useful in building up and giving firmness to low, wet ground. The stems in rural England have been made into door-mats, and furnish a fiber. Also *hassock-grass* and *tussock-grass*.—**Water hair-grass.** See *water-hairgrass*.—**Wavy hair-grass.** Same as *wood* ★*hair-grass*.—**Wood hair-grass,** *Deschampsia flexuosa*, a more delicate European and American species, worthless except in woodland pastures. The leaves are filiform, the branches of the panicle hair-like, often flexuous.

Tufted Hair-grass (*Deschampsia cæspitosa*).
a, plant, one fourth natural size; *b*, spikelet, enlarged; *c*, florets, still more enlarged.

hairhoof (hār′höf), *n.* [One of the numerous variants of *hairif*.] The woodruff, *Asperula odorata*.

hairhound (hār′hound), *n.* Same as *hoar-hound* (*b*).

hair-line, *n.* 3. Same as ★*hair-cord*.

hair-moss (hār′mōs), *n.* Same as *haircap-moss*.

hair-moth (hār′môth), *n.* One of the clothes-moths, *Tineola biseliella*, whose larva feeds on hair and woolen goods.

hair-peg (hār′peg), *n.* A straight hair-pin with an ornamental head. *A. M. Earle*, Costume of Colonial Times, p. 122.

hair-pencil (hār′pen″sil), *n.* In *entom.*, a group of very long hairs which may occur on several parts of the body of a lepidopterous insect.

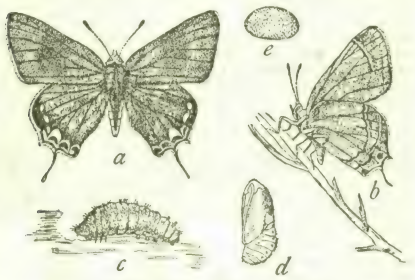
hair-plate (hār′plāt), *n.* The iron plate at the back end of a bloomery-hearth.

hair-restorer (hãr′rē-stōr″ėr), *n.* A preparation used to restore the hair when it is scant.

hair-rooted (hãr′rō-ted), *a.* Noting clouds which have a bulbous center whence proceed long wisps like hairs and short wisps like roots: as, *hair-rooted* cirro-stratus. Also called *tailed cirrus* by Clayden, and *cirrus caudatus* by Clayton.

hair-scale (hãr′skāl), *n.* One of the modified hair-like scales which occur on different parts of the body of certain lepidopterous and trichopterous insects.

hair-shot (hãr′shot), *n.* In *billiards*, a shot which barely moves the first object-ball; also, one which barely misses the second.



hair-slip (hãr′slip), *n.* A place on a green skin where the grain has become decayed, enabling the hair to slip. *Flemming*, Practical Tanning, p. 265.

hair-slipped (hãr′slipt), *a.* Marked by places where the grain has decayed: said of skins. *Flemming*, Practical Tanning, p. 265.

hair-snake (hãr′snāk), *n.* A nematoid worm, *Gordius*, parasitic in insects in its early stages and frequently found in damp places or in pools when mature. Also known as *hairworm* and *horsehair-snake*, from the popular superstition that it is a hair that has metamorphosed into a worm.

hair-stone (hãr′stōn), *n.* Quartz penetrated by slender crystals of rutile, amphibole, or other mineral species. Also called *Venus hair-stone* and *flèche d'amour*.

hairstreak, *n.*—**Acadian hairstreak,** an American butterfly, *Thecla acadica*, occurring from New England to Montana and up and down the Pacific coast. Its larvæ feed on the willow.—**Banded hairstreak,** a lycænid butterfly, *Thecla calanus*, occurring throughout the northern United States east of the Rocky Mountains. The upper surface of the wings is dark brown and the under surface slate-brown. Its larvæ feed on the leaves of the oak and the hickory.—**Coral hairstreak,** an American lycænid butterfly, *Strymon titus*, of wide distribution within the United States. Its larvæ live on the wild cherry and the plum.—**Gray hairstreak,** an American lycænid butterfly, *Uranotes melinus*, occurring throughout the United States. Its larvæ feed on the bean, hop, hawthorn, St.-John's-wort, and hound's-tongue.—**Great purple hairstreak,** an American lycænid butterfly, *Atlides halesus*, the largest of the eastern hairstreaks, expanding nearly two inches. Its larvæ feed on the oak.—**Least purple hairstreak,** an American lycænid butterfly, *Calycopis cecrops*.—**Olive hairstreak,** an American hesperiid butterfly, *Mitoura damon*, occurring in the southern United States, where its larvæ feed on the red cedar and the smilax.—**Striped hairstreak,** an American lycænid butterfly, *Thecla liparops*, wide-spread in the United States east of the Rocky Mountains. Its larvæ live on the oak, willow, shad-bush, and blueberry.—**White-M-hairstreak,** an American lycænid butterfly occurring throughout the southern United States, ranging as far north as New Jersey, Pennsylvania, and Ohio. Its larvæ live on the oak and the milk-vetch.

Gray Hairstreak (*Uranotes melinus*).

a, butterfly; *b*, butterfly with wings closed; *c*, larva from side; *d*, pupa; *e*, egg; all slightly enlarged except *e*, greatly enlarged. (Howard and Chittenden, U. S. D. A.)

hairstrong (hãr′strông), *n.* Same as *harstrong*.

hair-weed (hãr′wēd), *n.* 1. Any hair-like alga. See *mermaid's-hair*.—2. Same as ★*hailweed*.

hair-whorl (hãr′hwėrl), *n.* A more or less spirally arranged ridge of hair, produced by the meeting of hairs running in different directions.

hairy-back (hãr′i-bak), *n.* Any fish of the family *Trichonotidæ*, found in the western Pacific.

hairy-tongue (hãr′i-tung), *n.* Hypertrophy of the filiform papillæ of the tongue: it gives to the surface a hairy appearance. *Buck*, Med. Handbook, III. 291.

hai-tsai (hī-tsī′), *n.* [Chinese, < *hai*, sea, + *ts'ai*, weed.] A seaweed, *Gloiopeltis tenax*, and a gelatin prepared from it. The gelatin is used in the manufacture of lanterns to strengthen or varnish the paper, and to give gloss to silk or gauze. Windows of split bamboo crossed diagonally have their rhombic openings filled with a film of it as a substitute for glass.

hakam (ċha-käm′), *n.* [Judeo-Arabic *ḥakām*, < Heb. *ḥakam*, be wise. Compare Aram. *ḥakim* or *ḥakima*; Ar. *ḥakīm*: see *hakim*.] In Jewish use, a sage or philosopher: a title given to the Sephardi rabbis in the Orient. The chief rabbi of Constantinople is styled *hakām pasha*.

Hakatist (hä-kä-tist′), *n.* [G. *ha*, H, + *ka*, K, + *te*, T, + *-ist*. The letters are the initials of the three founders of the league, Von Hansemann, Von Kennemann, and Von Tiedemann.] A member of the league organized in Germany for the support of Prussian measures against the Poles in Posen. *N. and Q.*, 9th ser., IX. 145, 374.

hake[2], *n.*—**White hake,** a small fish of the family *Gadidæ*, or codfishes. *Urophycis tenuis*, a common species, is found off the New England coast. Others are found in the same region and in Europe.

White Hake (*Urophycis tenuis*).
(From Bulletin 47, U. S. Nat. Museum.)

hako (hä′kō), *n.* [Pawnee.] A ceremony of the Pawnee Indians, intended to benefit certain individuals by bringing to them the promise of children, long life, and plenty, and establishing at the same time a bond between the persons taking part in it, thus insuring friendship and peace between different clans or tribes. *Alice C. Fletcher*, 22d Rep. Bur. Amer. Ethnol., II. 14.

The expression "*hako*" is used to describe the whole of the articles employed in the ceremony, which are two feathered stems of ash wood from which the pith is burnt out; an ear of white corn; three sticks of plane tree; owl and eagle feathers; the heads of two woodpeckers; the head, neck, and breast of two ducks; a wild cat skin; fat from a consecrated deer or buffalo; an oriole's nest; and other objects. . . . The two feathered stems are treated by the tribe with great reverence, and always deposited on the wild cat skin when not in use. One symbolizes the sky, the other the earth. The ear of corn represents the fruitfulness of the earth, and is called "mother." This seems to indicate an origin for the ceremony among agricultural tribes, though it has been adopted by the hunting tribes. It does not appear, however, that the rites were performed at any stated time, or had any connexion with planting or harvesting.

Athenæum, May 20, 1905, p. 628.

hala (hä′lä), *n.* [Hawaiian.] The native screw-pine of the Hawaiian Islands, *Pandanus tectorius*. Coarse mats are made of the leaves.

halachist (hä-läċh′ist), *n.* One who is learned in the halachah (which see).

Halælurus (ha-lē-lū′rus), *n.* [NL., < Gr. ἅλς, sea, + αἴλουρος, cat.] A genus of sharks of the tropical Pacific, belonging to the family *Scyliorhinidæ*.

halah (ċhä′lä), *n.*; pl. *halōth* (ċhä′lōt). [Heb., < *ḥalal*, perforated.] A cake; originally, a loaf used in offerings (Num. xv. 20 *et passim*) and now partaken of at the three meals of Sabbaths and festivals. As now used it is a well-baked, elongated, and twisted loaf, thick in the middle and tapering toward the ends, with poppy-seed sprinkled over the top. The halah of some festivals differs in form from the ordinary Sabbath cake: for example, that used at the Rosh ha-shanah festival (New-Year's day) is made in the form of a ladder. The reason given is that, it being the season of prayer for forgiveness, the ladder symbolizes the ascension of the prayers heavenward.

halapepe (hä-lä-pā′pā), *n.* [Hawaiian.] A tree of the lily family, *Dracæna aurea*, bearing golden-yellow flowers and small yellow berries, and yielding a soft, whitish wood out of which the natives used to carve their idols.

halatinous (ha-lat′i-nus), *a.* [Gr. ἁλάτινος, of salt, < ἅλας (ἁλατ-), salt, < ἅλς, salt: see *salt*[1].] Having the character of common salt. [Rare.]

halbling (hälb′ling), *n.* [G., < *halb*, half, + dim. *-ling*. Cf. *halfling*[1].] A small coin of Basel and of other Swiss and German states.

halching (hal′ching), *n.* [*halch* + *-ing*.] The entanglement of the coils of yarn at the nose, or top, of a spinning-mule cop. *Nasmith*, Cotton Spinning, p. 286.

Haleciidæ (hā-lē-sī′i-dē), *n. pl.* [NL., < *Halecium* + *-idæ*.] A family of campanularian hydroids having the hydrothecæ reduced to shallow, saucer-shaped, pedunculate appendages, the hydranths with conical hypostomes and the gonophores hedrioblastic. It contains the genera *Halecium*, *Diplocyathus*, and *Ophioides*.

Halecium (hā-lē′si-um), *n.* [NL.] The typical genus of the family *Haleciidæ*. *Oken*, 1815.

half. I. *a.*—**Half fifteen,** in *tennis*, a point given to a supposably inferior player at the beginning of the second and subsequent alternate games of the set.—**Half forty,** in *tennis*, two points given to a supposably inferior player at the beginning of the first game, three at the beginning of the second, and so on alternately in the subsequent games of the set.—**Half thirty.** See ★*thirty*.

II. *n.*—**Half a stroke.** See ★*stroke*[1].

half-arc (häf′ärk), *a.* Noting an electric arc-lamp of approximately half the usual illuminating power. In commercial practice arc-lamps supplied with from 9.5 to 10 amperes and 450 or more watts were classed as full-arc lamps; those taking from 6.5 to 7 amperes and 325 to 350 watts, as half-arcs. Also used substantively.

half-beam (häf′bēm), *n.* In *ship-building*, a deck-beam which extends only part way across the vessel, being cut off at a hatchway or similar opening through the deck.

half-bird (häf′bėrd), *n.* One of the smaller ducks, such as the teal: so named because it sells for half the price of the larger species. [Eng.]

half-bit (häf′bit), *n.* The Spanish half-real in the British West Indies.

half-blind (häf′blīnd), *a.* Noting holes in plates (which are to be riveted together) which do not coincide or match, those of one plate being partly covered by the other plate.

half-breadth (häf′bredth), *n.* In *ship-building*, the distance of any given point on the outer skin or of the exterior line of the frames (in the latter case called *molded half-breadth*) to the central longitudinal plane of the vessel.

Half-breadth plan. See *plan*.

half-breed, *n.*—**Bigeneric half-breed,** the product of a cross between varieties of species belonging to different genera.

half-broad (häf′brâd), *n.* An English gold coin, a double crown of James I.

half-bull (häf′bůl), *n.* A term employed by sealers to denote a male fur-seal from four to six years old. The largest half-bulls are practically full grown, but not strong enough to fight their way into the rookeries and establish themselves. They are dark gray in color, lacking the brownish tint characteristic of old male fur-seals. This class of seals is termed *polusikatchi* by the Russians.

half-butt (häf′but), *n.* A cue, used only in English billiards, the length of which is halfway between that of a long and that of an ordinary cue.

half-center (häf′sen″tėr), *n.* The position of the crank-pin of an engine when it is midway between the two dead-centers or dead-points.

half-clutch (häf′kluch), *n.* A jaw-clutch in which each jaw is half a cylinder, and consequently has only one driving-face for each direction.

half-column (häf′kol″um), *n.* An engaged column of which only half, or about half, projects horizontally from the surface of a wall.

half-crown, *n.*—**Newark half-crown,** an English piece of Charles I., struck at the siege of Newark.

half-davit (häf′dav″it), *n.* *Naut.*, a fish-davit.

half-florin (häf′flor″in), *n.* An English coin, first coined in gold by Edward III. *in* 1344. It was current for 3 shillings and weighed 54 grains.

half-hardy (häf′här″di), *a.* *In hort.*, noting an intermediate grade between tender and hardy: said of plants which withstand a little frost, but not a hard one, and are sown or planted out after frosty weather is past and before the weather becomes thoroughly settled. Sometimes used also for plants which will live out of doors throughout the year if given shelter or protection.

half-hit (häf′hit), *n.* See ★*hit*[1].

half-iron (häf′ī″ėrn), *n.* In *golf*, a half-shot with an iron club.

half-joe (häf′jō), *n.* A Portuguese gold coin, originated in 1722, the half-dobra of 6,400 reis: one of the most popular gold coins of the New World in the eighteenth century.

half-lap (häf′lap), *n.* The metallic matrix, or bed, in which are embedded the rows of combing-needles in a cotton-combing machine.—**Half-lap roller,** the part of a cotton-combing machine which carries forward the combed sliver.

half-lapped (häf′lapt), *a.* Lapped about one half as much as when brought to the proper position: used of rivet-holes that do not meet properly, but are half-blind.

half-lichen (häf′lī″ken), *n.* An ascomycete which lives as a saprophyte during its early stage, but later becomes associated with algæ which, usually, have been injured.

Sphæria Lemaneæ and Thermutis velutina are examples of *half-lichens*.

D. H. Campbell, University Text-book of Bot., p. 188.

half-looper (häf′lö″pėr), *n.* Any one of many noctuid larvæ which, because they do not have the normal number of prolegs, move like geometrid larvæ.

half-man (häf′man), *n.* On coasting-vessels, a landsman, or deck-boy. [Eng. slang.]

half-moon, *n.* 5. A species of rudder-fish, *Medialuna californiensis*, found on the coast of southern California.

half-mourner (häf′mōr″nėr), *n.* An old British collectors' name for a black and white European agapetid butterfly, *Melanargia galathea*. Also called the *marbled white*.

half-noble (häf′nō″bl), *n.* A gold coin of Edward III. of England, and of succeeding kings to Edward VI.

half-pace, *n.* 2. A landing in a stair which separates two flights of stairs. It differs from quarter-pace in that it crosses the ends of both flights, so that the direction of the stairs is completely changed.

halfpenny, *n.*—**Mark Newby halfpenny.** Same as *St. Patrick* ★*halfpenny.*—**St. Patrick halfpenny,** a private copper token issued in Ireland between 1660 and 1680, with St. Patrick on the reverse: current in New Jersey in 1682.

half-plane (häf′plān), *n.* Same as ★*hemiplane*.

half-proof (häf′prōf), *n.* In *civil law*, evidence entitled to some weight, but insufficient as foundation for a sentence or decree.

half-rater (häf′rā″tėr), *n.* A small yacht of less than the unit of rating (one ton). [Eng.]

half-ray (häf′rā), *n.* In *math.*, the aggregate of all points of a straight which are on one and the same side of O, a point of the straight.

half-seal (häf′sēl), *n.* In *Eng. law*, a seal used in the Court of Chancery to seal commissions issued to delegates appointed to hear appeals in marine or ecclesiastical causes.

half-sheet (häf′shēt), *n.* In *printing*, an abbreviation of *one half of a sheet of double size*.

When presswork was done on a hand-press, upon sheets of small size, the sheet of octavo had its pages 1, 16, 13, 4, 9, 8, 5, 12, first printed from one form on one side of the sheet. Pages 3, 14, 15, 2, 11, 6, 10, 7, were next printed on the back of that sheet, so arranged that they would fold in order as one sheet of 16 consecutive pages. This method was called *sheetwise*. When large machines were used for presswork the two forms were rearranged in one form to produce 16 pages at one impression on one side. Turning the paper upside down for the subsequent printing on the back of the sheet enables the pressman to back each page with its proper mate and produce two copies of 16 pages. Each *half-sheet* of the paper cut in two contains the same number of pages as that of the sheet, printed sheetwise.

De Vinne, Mod. Book Composition, p. 337.

half-shoe (häf′shö), *n.* A shoe which covers but one side of a horse's foot: used to correct some defect in the growth of the hoof.

half-shot, *n.* 2. In *golf*, a stroke of less distance than a full shot, and played with a half swing: less than a three-quarter shot and more than a wrist or quarter shot.

half-sibling (häf′sib″ling), *n.* A breeders' term for a half-brother or half-sister; the offspring of different mothers by the same sire.

The high values, however, found for *half-siblings* in the case of the thoroughbreds seem to indicate that we must look rather to unit prepotency than intermittent prepotency for the source of the high value of fraternal as compared with parental correlation in the case of the horse. *Biometrika*, Nov. 1903, p. 391.

Half-speed shaft. See ★*shaft*.

half-spring (häf′spring), *n.* A spring made up of one set of leaves; a half-elliptic spring.

half-sprit (häf′sprit), *n.* The sprit of a fore-and-aft rigged vessel, all on one side of the mast.

As she sailed before with a *half-sprit*, like a yacht, she sailed now with a square sail and a mizzen, like a ketch. *Defoe*, Captain Singleton, xviii.

half-stopped (häf′stopt), *a.* In *organ-building*, said of pipes which are partially closed at the top by a lid or cover.

half-tone, *n.* 3. A picture printed from a plate produced by the half-tone process (which see), or the plate itself.—**Half-tone process,** a phototypographic method in which, in the process of photographing the object, a screen of netting, or a ruled glass, is interposed between the lens and the sensitized plate. From the negative thus made, a positive image is produced upon a prepared metal plate and etched into relief by acids. The screen is designed to give to the etching a texture similar to that produced by the engraver. A common, but in large manner remediable, effect of its use is an undue softening of both lights and shadows with loss of distinctness.—**Half-tone screen,** in *photog.*, a sheet of glass ruled with fine lines, crossing one another at right angles, inserted in the camera about one sixteenth of an inch from the negative. It enables half-tones to be obtained in photo-engraving. The lines run from 100 to 250 per square inch. See ★*half-tone process.*—**Three-color half-tone process,** a method of engraving in relief by photography, and etching upon three separate metal plates of printing-surfaces of yellow, red, and blue, which are successively superimposed in printing on a typographic press, to produce the many needed combinations of color required for a truthful picture. Successful workmanship depends on the ability of the photographer to detect and practically dissect the primary colors of a pictorial design, on the skill of the engraver by hand who may seek improvement in varying the cross lines on the plates that make neater combinations of colored lines, on the purity of the primary colors and accuracy of register in printing. The *four-color* process has the added color of black or other dark color that aids distinctness.

II. *a.* Noting a print or plate, produced by the half-tone process. See above.

half-top (häf′top), *n.* *Naut.*, a small, narrow platform which rests upon the trestle-trees of the lower mast on a square-rigged mast; a contracted top. See *top*[1], *n.*, 9.

half-trunk (häf′trungk), *a.* Pertaining to or having a trunk or hollow piston-rod to which the connecting-rod is attached, but not having a trunk on the opposite side of the piston.

half-vision (häf′vizh″on), *n.* Hemianopsia.

half-volley (häf′vol″i), *n.* In *cricket*, a ball which reaches the batsman just after it has pitched upon the ground. *Hutchinson*, Cricket, p. 55.

halibios (ha-lib′i-os), *n.* [Also *halibius;* < Gr. ἅλς, the sea, + βίος, life.] The animals and plants of the ocean considered collectively and in contrast with the animals and plants of fresh water and those of the land. *Haeckel* (trans.), Planktonic Studies, p. 578.

halibiotic (hal″i-bī-ot′ik), *a.* [Also *halobiotic;* as *halibios* + *-ot-* *-ic.*] Living in the sea.

halibut, *n.*—**Arrow-toothed halibut,** the slender-bodied halibut, *Atheresthes stomias*, of the North Pacific, with arrow-shaped teeth.—**Bastard halibut,** a large flounder, *Paralichthys californicus*, found in the Gulf of California. It differs from the true halibut in the much smaller size and in the fact that its tail is doubly concave at the point, instead of simply lunate or forked.

Halichœres (hā-li-kē′rēs), *n.* [NL., prop. *Halichærus*, < Gr. ἅλς, sea, + χοῖρος, hog.] A genus of *Labridæ* found in tropical seas. It is characterized by the presence of 9 spines in the dorsal fin, of large scales, and of a canine tooth in the posterior part of the jaw. There are many species, highly variegated in color. *H. radiatus* is the pudding-wife and *H. bivittatus* the Slippery Dick of the Atlantic coast of the United States.

halichondrine (hal-i-kon′drin), *a.* Resembling or having the characteristics of the sponges belonging to the order *Halichondrina;* halichondroid.

halicurrent (hal-i-kur′ent), *n.* [Gr. ἅλς, sea, + L. *currens*, current.] A stream or current in mid-ocean, as contrasted with a coast current. The Gulf Stream is the most familiar example of a halicurrent. *Haeckel* (trans.), Planktonic Studies, p. 625.

halide (hal′id), *a.* [Gr. ἅλς, salt, + *-ide*[1].] In *chem.*, having a constitution similar to that of common salt; haloid: thus, potassium iodide is a halide salt analogous to sodium chlorid or common salt.—**Halide acid,** an acid corresponding to a halide, or haloid, salt, containing hydrogen in place of the electropositive element or radical of the salt, as hydrochloric acid from sodium chlorid, or hydriodic acid from potassium iodide. *Jour. Physical Chem.*, April, 1904, p. 302.

Halieutæa (hal″i-ū-tē′ä), *n.* [NL., < Gr. ἁλιευτής, otherwise ἁλιεύς (ἁλιευτ-), a fisher, a seaman, < ἁλιεύειν, fish.] A genus of frogfishes of the family *Ogcocephalidæ*, found in the deep waters of the Pacific.

Halieutella (hal″i-ū-tel′ä), *n.* [NL., < Gr. ἁλιευτής, a fisher, + L. *-ella.*] A genus of frogfishes of the family *Ogcocephalidæ*, found in the deep waters of the Atlantic.

halieutic (hal-i-ū′tik), *a.* [Gr. ἁλιευτικός: see *halieutics.*] Of or pertaining to fishing.

Halieutichthys (hal″i-ū-tik′this), *n.* [NL., < Gr. ἁλιευτής, fisher, + ἰχθύς, fish.] A genus of frogfishes of the family *Ogcocephalidæ*, found in the deep waters off the West Indies.

halieutics, *n.* 2. That branch of practical theology ('fishing for men') which treats of the theory of the extension of Christian missions; the science of Christian missions, specifically, of foreign missions.

Halieutinæ (hal-i-ū-tī′nē), *n. pl.* [NL., < *Halieut(æa)* + *-inæ.*] A subfamily of frogfishes of the family *Ogcocephalidæ*, typified by the genus *Halieutæa*.

haligi (hä-lē′gē), *n.* [Also (Sp.) *haligui*, < Tagalog and Bisaya *haligi*.] In the Philippine Islands, one of the wooden posts or piles on which the native houses are built.

haligraphy (ha-lig′ra-fi), *n.* [Gr. ἅλς, salt, + *-γραφια*, < γράφειν, write.] A discussion of the sources, properties, etc., of saline substances. [Rare.]

halilimnic (hal-i-lim′nik), *a.* [Gr. ἅλς, sea, + λίμνη, lake, + *-ic.*] Living in fresh water, but exhibiting genetic affinity with forms of life that are restricted to salt water; actually limnetic, but phylogenetically marine. Also *halolimnic*. See ★*halibiotic*.

The fauna of Lake Tanganyika is to be regarded as a double series, one-half consisting of forms which are found everywhere in African fresh waters, the other of what we may call *halolimnic* organisms, which are found nowhere else in the world, at least so far as is at present known.

J. E. S. Moore, quoted in Internat. Year Book, 1898, p. 270.

halimeter (ha-lim′e-tėr), *n.* [Gr. ἅλς, salt, + μέτρον, measure.] An apparatus for determining the strength of a saline solution; specifically, a device for estimating the amount of water in beer by determining the quantity of salt the beer will dissolve.

halimetric (hal-i-met′rik), *a.* [*halimetr-y* + *-ic.*] Of or pertaining to halimetry or the halimeter. [Rare.]

halimetry (ha-lim′et-ri), *n.* [Gr. ἅλς, salt, + *-μετρια*, < μέτρον, measure.] Determination of the strength of a saline solution. [Rare.]

halimous (hal′i-mus), *a.* [Gr. ἅλιμος, of the sea (< ἅλς, the sea), + *-ous.*] Having relation to the sea, to sea-water, or to common salt. [Rare.]

haling-hand (hāl′ing-hand), *n.* One of a pair of heavy gloves or woolen mittens used to protect the hands of sailors and fishermen on the Maine coast, while hauling heavy cables, etc.: frequently double lined in the palms with leather. *A. M. Earle*, Costume of Colonial Times, p. 122.

halinous (hal′in-us), *a.* [Gr. ἁλινος of salt, < ἅλς, salt.] Having relation to common salt. [Rare.]

haliplankton (hal-i-plangk′ton), *n.* [Gr. ἅλς, the sea, + NL. *plankton.*] The floating and swimming organisms of the ocean, considered collectively and in contrast with the organisms that float or swim in fresh water; the plankton. Also *haloplankton*. See ★*plankton* and ★*limnoplankton*. *Haeckel* (trans.), Planktonic Studies, p. 580.

Halisarca (hal-i-sär′kä), *n.* [NL., < Gr. ἅλς, the sea, + σάρξ (σαρκ-), flesh.] The typical genus of the family *Halisarcidæ*. *Dujardin*.

Halisarcidæ (hal-i-sär′si-dē), *n. pl.* [NL., < *Halisarca* + *-idæ.*] A family of hexaceratine triaxonian sponges, having the flagellated chambers syconate and the skeletal structures absent. It contains the genera *Halisarca* and *Bajulus*.

Halisaurus (hal-i-sâ′rus), *n.* [NL., < Gr. ἅλς, sea, + σαῦρος, lizard.] A genus of marine reptiles, referred to the *Mosasauridæ*, based on incomplete material from the Cretaceous of New Jersey: a synonym of ★*Baptosaurus*.

Haliseris (ha-lis′e-ris), *n.* [NL., < Gr. ἅλς, the sea, + σέρις, endive, chicory.] The correct form for *Halyseris* (which see).

Haliserites (hal″i-se-rī′tēz), *n.* [*Haliseris* + *-ites.*] See *Halyserites*. This plant has flat fronds many times dichotomously divided. The dicotyledonous genera *Fontainea* and *Sapindopsis* from the Amboy clays of New Jersey and the Middle Potomac formation of Virginia, respectively, closely resemble it, and it is regarded by some paleobotanists as a dicotyledonous plant.

Haliserites Reichii, one half natural size. (From Sternberg's "Flora der Vorwelt.")

halistase (hal′i-stās), *n.* [Gr. ἅλς, sea, + στάσις, standing.] The tract of quiet water within the gyration of a great oceanic current. The Sargasso Sea, in the North Atlantic, is the most familiar example of a halistase. *Haeckel* (trans.), Planktonic Studies, p. 622.

halisteresis (ha-lis-te-rē′sis), *n.* [Gr. ἅλς, salt, + στέρησις, deprivation, < στερεῖν, deprive.] Deprivation of salts; specifically, loss of the mineral constituents of bone which causes osteomalacia.

halisteretic (ha-lis-te-ret′ik), *a.* [*halisteresis* (*-et-*) + *-ic.*] Relating to or affected with halisteresis.

halitherioid (hal-i-thē′ri-oid), *n.* and *a.* **I.** *n.* A sirenian mammal allied to *Halitherium*.

II. *a.* Resembling *Halitherium*.

halitosis (hal-i-tō′sis), *n.* [NL., < L. *halitus*, breath, + *-osis*.] Offensive breath.

halitsa, chalitza (ċha-lit′sä), *n.* [Heb. *ḥalitsa*, < *ḥālats*, draw off or out.] The Jewish ceremony of taking off the brother-in-law's shoe. According to the command (Deut. xxv. 5–10), the brother-in-law who refused to marry the widow of his brother who died without child was obliged to appear before the elders at the gate, where the ceremony of taking off the shoe was performed. The formula is still in use, as otherwise the widow, according to Jewish law, is forbidden to marry.

haller (hal′ėr), *n.* [G. dial. variant of *heller*.] A small copper coin of the Swiss canton of Zug.

Halleyan line. See ★*line*[2].

halliblash (hal′i-blash), *n.* A great fire. [Prov. Eng.]

'Oh—go long wi yo!' said Hannah in high wrath. 'He an his loike 'll mak a *halliblash* of us aw soon, wi their silly faddle, an pamperin o' workin men, wha never wor an never will be noa better nor they should be.'

Mrs. Humphry Ward, David Grieve, iv. 11.

hallopodous (ha-lop′ō-dus), *a.* Of or pertaining to the *Hallopodidæ*; of the nature of the *Hallopoda*.

Hallstattian (häl-stät′i-an), *a.* [G. *Hallstatt*, in Austria, where extensive remains characterizing this period were found, + *-ian*.] In *prehistoric archæol.*, noting the first period of the iron age.

hallucar (hal′ū-kär), *a.* [L. *hallux* (*halluc-*), the great toe, + *-ar*[3].] Relating to the hallux or great toe; hallucal. [Rare.]

hallucination, *n.*—**Collective hallucination,** in *psychol.*, a hallucination experienced similarly and simultaneously by a number of persons similarly situated.

hallucinative (ha-lū′si-nā-tiv), *a.* Hallucinatory; productive of hallucinations.

Hallux dolorosus, a condition associated with flat-foot in which pain is felt in the great toe when an attempt is made to walk.—**Hallux flexus,** hammer-toe affecting the great toe.—**Hallux rigidus,** stiffness of one or of both of the joints of the great toe.—**Hallux valgus,** deviation of the great toe outward, so that it overlaps the other toes.—**Hallux varus,** deviation of the great toe inward, away from its fellows.

halma (hal′mä), *n.* [Gr. ἅλμα, a leap, < ἁλλεσθαι, leap.] A game for two persons, played on a special board of 256 squares with 19 men apiece, the object of each player being to drive out his opponent's men from their position and to replace them with his own.

halmatogenesis (hal″ma-tō-jen′e-sis), *n.* [Gr. ἅλμα(τ-), a leap, + γένεσις, production.] In *biol.*, the sudden appearance of new characters in animals or plants. Same as *saltatory* or *discontinuous* ★*variation*.

halo, *n.*—**Diffraction halo.** See ★*diffraction*.—**Hering's halo,** in *psychophys.*, the bright fringe which surrounds the dark after-image of a bright object seen on a dark background: an effect of brightness contrast. *E. C. Sanford*, Exper. Psychol., p. 161.

Halobia (ha-lō′bi-ä), *n.* [NL., < Gr. ἁλς, sea, + βίος, life.] A genus of prionodesmaceous pelecypod mollusks, characterized by the absence of an auricle. It is very abundant in the Triassic rocks.—**Halobia shales.** See ★*shale*[2].

halobiotic (hal″ō-bī-ot′ik), *a.* Same as ★*halibiotic*.

halochromism (hal-ō-krōm′izm), *n.* [Gr. ἅλως, a halo, + χρῶμα, color, + *-ism*.] The property possessed by certain organic compounds of forming highly colored salts with colorless acids and without themselves undergoing any change of structure.

In connection with this subject reference may be made to some recent work of v. Baeyer and Villiger on dibenzylidene acetone and triphenyl methane. They refer to the constitution of colourless substances which form highly coloured salts, and term the phenomenon *halochromism*.

Rep. Brit. Ass'n Advancement of Sci., 1902, p. 119.

halogenate (hal′ō-jen-āt), *v. t.*; pret. and pp. *halogenated*, ppr. *halogenating*. [*halogen* + *-ate*[2].] To introduce a halogen atom into (a compound); especially, to substitute a halogen for hydrogen in an organic compound.

A restatement of the view that the reactivity of the halogens in ortho- and para-*halogenated* nitrobenzenes is due to the assumption of the elements of a molecule of water by the nitro-group, with subsequent intramolecular changes, leading to the production of a tautomeric form of a nitrophenol with the loss of a molecule of a haloid acid. *Nature*, Feb. 12, 1903, p. 358.

halogenize (hal′ō-jen-īz), *v. t.*; pret. and ppr. *halogenized*, ppr. *halogenizing*. [*halogen* + *-ize*.] In *chem.*, to cause (a substance) to combine with or to take up one of the halogen elements, as chlorin or bromine. *Smithsonian Rep.*, 1890, p. 383.

haloidite (hal′oi-dīt), *n.* [Gr. ἅλς, salt, + εἶδος, form, + *-ite*[2].] In *petrog.*, a term applied by Wadsworth (1892) to rock-salt.

halolimnic (hal-ō-lim′nik), *a.* Same as ★*halilimnic*.

halology (ha-lol′ō-ji), *n.* [Gr. ἅλς, salt, + *-λογια*, < λέγειν, speak.] The discussion of saline substances as a class of chemical compounds. [Rare.]

halometer (ha-lom′e-tėr), *n.* [Gr. ἅλς, salt, + μέτρον, measure.] An instrument for measuring the form, angles, and plane surfaces of crystalline salts.

halonial (ha-lō′ni-al), *a.* [*Halonia* + *-al*[1].] Belonging or relating to the fossil plant-form called *Halonia* (which see).

halophil (hal′ō-fil), *a.* Same as *halophilous*. Also *halophile*.

halophilism (ha-lof′i-lizm), *n.* [*halophil* + *-ism*.] The character of being halophilous.

I found a close correspondence between the *halophilism* of the plant and the power of its root-hairs to resist plasmolysis. *W. F. Ganong*, in Bot. Gazette, Nov., 1903, p. 354.

halophilous, *a.* 2. In *zoöl.*, inhabiting salt marshes and sea-coasts.

It seems that littoral Myriopods are much more frequent than is generally supposed, but the author distinguishes accidental *halophilous* forms (three species of Lithobius found in Normandy by Gadeau de Kerville).

Jour. Roy. Microsc. Soc., April, 1904, p. 180.

halophyte, *n.* 2. In *phytogeog.*, a plant adapted to the absorption of common salt or other salts and confined to or preferring a salty substratum, as the sea or the sea-shore. Halophytes were treated by Warming as a class coördinate with hydrophytes, xerophytes, and mesophytes, though recognized as essentially xerophytic in physiological character. Schimper and other late writers have regarded them as included in xerophytes.

halophytic (hal-ō-fit′ik), *a.* [*halophyte* + *-ic*.] 1. Having the character of a halophyte; halophilous: as, a *halophytic* plant.—2. Adapted to the growth of halophytes: as, a *halophytic* region.

haloplankton (hal-ō-plangk′ton), *n.* Same as ★*haliplankton*.

Halopsyche (hal-op-sī′kē), *n.* [NL., < Gr. ἅλς, the sea, + ψυχή, a butterfly.] The typical genus of the family *Halopsychidæ*. *Bronn*, 1862.

Halopsychidæ (hal-op-sik′i-dē), *n. pl.* [NL., < *Halopsyche* + *-idæ*.] A family of tectibranchiate gasteropods of the order *Euthyneura*, which have the body ovate and rounded behind, the fins broadened at the back, and gills and proboscis absent. It includes the genus *Halopsyche*.

halosauroid (hal-ō-sâ′roid), *a.* Of or belonging to the family *Halosauridæ*. *Proc. Zool. Soc. London*, 1897, p. 268.

Halosauropsis (hal″ō-sâ-rop′sis), *n.* [NL., < Gr. ἅλς, sea, + σαῦρος, lizard, + ὄψις, appearance.] A genus of deep-water eel-shaped fishes of the family *Halosauridæ*. Also called *Aldrovandia*.

halosel (hal′ō-sel), *n.* [Gr. ἅλς, salt, + F. *sel*, < L. *sal*, salt.] In *chem.*, a salt of the same type as sodium chlorid; a halide or haloid salt. [Rare.]

halo-symptom (hā′lō-simp″tom), *n.* The appearance as of a colored circle surrounding a light: one of the signs of glaucoma.

halotechnic (hal-ō-tek′nik), *a.* [Gr. ἅλς, salt, + τέχνη, art, + *-ic*.] Concerned with the extraction, preparation, and use of saline substances, as of common salt.

halotechny (hal′ō-tek′ni), *n.* [Gr. ἅλς, salt, + τέχνη, art, + *-y*[3].] The art of extracting, preparing, and using common salt and other saline substances. [Rare.]

halter[2], *v. t.* 2. To hang with a halter; hang.

halter-cast (hâl′tėr-kâst), *a.* Said of an animal which has been thrown by becoming entangled in its halter.

Halteridiidæ (hal-te-rid′i-dē), *n. pl.* [NL., < *Halteridium* + *-idæ*.] A family of *Sporozoa*, of the order *Hæmosporidia*, which contains the genera *Halteridium* and *Polychromophilus*. The former is found in the blood of birds and the latter in that of bats.

Halteridium (hal-te-rid′i-um), *n.* [NL., < (?) Gr. ἁλτήρ, a balancing-weight in leaping, < NL. *halter* (see *halter*[3]), + Gr. dim. *-ιδιον*.] 1. A genus of *Hæmosporidia* which consists of halter-shaped organisms parasitic in the blood-corpuscles of common birds. The typical genus of the family *Halteridiidæ*. *Labbé*, 1894.—2. [*l. c.*] A protozoan of the genus *Halteridium*.

Ross further showed that the mosquito which served as an intermediate host for this parasite could not transmit the malarial parasite of man or another similar parasite of birds (*halteridium*).

G. M. Sternberg, in Pop. Sci. Mo., Feb., 1901, p. 367.

halukah (hä-lö′kä), *n.* [Also *chaluka*; Heb. *ḥalūkah*, < *ḥālak*, divide.] The annual and other contributions sent by Jews for the support of their brethren in the Holy Land. It is divided according to the decision of the Jewish authorities in Jerusalem.

halurgist (hal′ėr-jist), *n.* [*halurg-y* + *-ist*.] A worker in salt.

halurgy (hal′ėr-ji), *n.* [Gr. ἅλς, salt, + ἔργον, work.] The manufacture of salt; salt-working. *T. Ross*, trans. of Humboldt, Travels, III. xxxi. *N. E. D.*

halved, *a.* 2. In *golf*, having the same score on each side: as, a hole is *halved* when each side takes the same number of strokes; a match is *halved* when both sides have won the same number of holes, or have proved equal; etc.

halving (hä′ving), *n.* The act of dividing anything into halves or sharing by halves; specifically, the act of putting together two pieces of material, as wood, by cutting away half of the thickness of each and lapping them one upon another, when a pin or nail or glue may hold them fast.

halving-joint (hä′ving-joint), *n.* A joint made by ★halving (which see).

halyard, *n.*—**Ensign-halyards,** the line or whip by which the ensign is run up or hoisted to the peak of the gaff or to the head of the flag-staff.—**Flying-jib halyards,** the purchase used to hoist the flying-jib along its stay.—**Jib-halyards,** the tackle used in hoisting the jib. The power of the purchase is adapted to the weight of the sail and ranges from a single whip to a double and single block.—**Jib-o'-jib halyards,** the halyards used in hoisting the jib-o'-jib.—**Royal-halyards,** the purchase by which the royal-yard is hoisted.—**Smokestack halyards,** a sailors' name for the cog-wheel or other mechanism by which telescoping smoke-stacks are hoisted.—**Staysail-halyards,** the purchase by which a staysail is run up on its stay.—**Studdingsail-halyards,** the whip which is bent to the studdingsail-yard and by means of which the latter is hauled out to the yard-arm.—**Topgallant-halyards,** the purchase which is used to hoist the topgallant-yard after the topgallantsail has been sheeted home, so that the canvas will be flattened or extended to the wind.—**Topsail-halyards,** these halyards are the heaviest of any for hoisting yards. They pass over large gin- or tie-block sheeves abaft the respective masts, and in order to get a big purchase are rigged or rove as follows: on one side of the deck a long pendant is shackled, which reaches to the top; then a long drift of chain is shackled in, which leads through the gin-block, or topsail tie-block, and thence toward the deck, and to this end, some distance above the deck a purchase is secured by means of which the yard is hoisted.

halysitid (ha-lis′i-tid), *n.* One of the *Halysitidæ*.

ham[1], *n.*—**Beef ham.** Same as *collared beef* (which see, under *collared*).

hamamelidaceous (ham-ä-mē-li-dā′shius), *a.* Belonging or pertaining to the plant family *Hamamelidaceæ*.

hamathionic (ham″a-thī-on′ik), *a.* [Gr. ἅμα, together, + θεῖον, sulphur, + *-on* + *-ic*.] Noting an acid, a syrupy compound, $C_{12}H_{18}SO_{16}$, formed by the action of sulphuric acid on euxanthic acid.

hamatum (hā-mā′tum), *n.*; pl. *hamata* (-tä). [NL., neut. (sc. *os*, bone) of L. *hamatus*, hooked: see *hamate*.] The outermost bone in the second row of carpals, commonly called *unciform* (which see).

hambergite (ham′bėrg-īt), *n.* [Named after A. *Hamberg*, a Swedish mineralogist.] A hydrated beryllium borate, $Be_2(OH)BO_3$, occurring in grayish-white orthorhombic crystals: found in southern Norway.

Hambleton oölite. See ★*oölite*.

hame[1], *n.*—**Concord hame,** a bent-wood harness-hame, strengthened by a strap of iron on the outside.

haminura (ham-i-nū′rä), *n.* [Said to be S. Amer.] A large food-fish, *Hoplias malabaricus* (*Macrodon trahira*), of the family *Erythrinidæ*, inhabiting fresh waters of South America.

Hamitoid (ham′i-toid), *a.* [*Hamite* + *-oid*.] In *ethnol.*, similar to the Hamites; especially, of a Hamitic type which is influenced by negro blood.

Hamito-Semitic (ham′i-tō-sē-mit″ik), *a.* Relating to the peoples speaking Hamitic and Semitic languages which are considered members of one linguistic stock.

hamlet[2], *n.* 2. *Gymnothorax moringa*, an eel of the family *Murænidæ*.

hamlinite (ham′lin-īt), *n.* [Named after A. C. *Hamlin*, an American mineralogist.] A phosphate of aluminium and strontium with fluorin and water, occurring in colorless rhombohedral crystals: found at Stoneham, Maine, and also in Brazil.

hamma (ham′ä), *n.* [AL., < AS. and ME. *ham* (*hamm-*), an inclosure: see *ham*[3].] In *old*

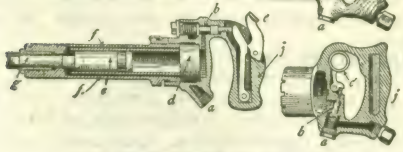
Eng. law, a small inclosed field or meadow; a closed yard adjoining a house.

hammada (ham′a-dä), *n.* [Ar.] A stony desert upland or plateau. [Sahara.]

The composition and influence on the hydrography of the *hammada*, or Cretaceous and Tertiary plateaux of the higher and lower Sahara.

Geog. Jour. (R. G. S.), XVI. 225.

Hammarbya (ham-är′bi-ä), *n.* [NL. (Kuntze, 1891), named in commemoration of *Hammarby*, the villa of Linnæus in the suburbs of Upsala.] A genus of monocotyledonous plants belonging to the family *Orchidaceæ*. See *Malaxis*.



hammel[2] (ham′l), *n.* A shed of about 150 feet area opening into a small courtyard, employed in Great Britain for feeding cattle singly or at most by twos.

hammel-feeding (ham′l-fē″ding), *n.* The system of feeding cattle in hammels. It has the advantage over stall-feeding and box-feeding (feeding free in an inclosure about 10 feet square and 12 feet high) of permitting the animal air and exercise, and also requires less litter.

These objects are attained by the system of *hammel-feeding*, as it is termed. A *hammel* consists of a small shed, etc.

Fream, Complete Grazier (14th ed., 1900), p. 171.

hammer[1], *n.*, **2.** (*j*) In *athletics*, a 16-pound weight (or a 12-pound weight for school-boys), attached by ball-bearing to a wire handle, which competitors, standing in a marked circle, endeavor to throw as far as possible. The old-fashioned hammer had an ordinary stiff wooden handle.—**Boiler-maker's hammer,** a hammer resembling the bridge-builder's hammer, but with shorter and larger heads.—**Bordeaux hammer,** the headache following a debauch. [Colloq.]—**Bridge- or ship-builder's hammer,** a heavy hammer with two long heads with small faces.—**Coppering-hammer,** a boat-builder's hammer with a large flat face and curved peen ending in a claw.—**Corrigan's hammer,** a metal disk attached to a wooden hammer-shaped appliance, formerly employed, when heated and applied to the skin, to cause rubefaction or a blister: similar in principle and application to *Corrigan's button* (which see, under *button*).—**Duplex hammer,** same as *double hammer* (which see, under *hammer*[1]).—**Interchangeable hammer,** a hammer having a clamp on the handle for holding different styles of head and face.—**Magnetic hammer,** a long-handled tack-hammer having a head with a long slender peen. The head is a permanent magnet and can be used to pick up a tack by its head and hold it in position for driving.—**Pneumatic hammer,** a hammer operated by compressed air. It has an automatic valve which alternately

Pneumatic Hammer.

a, inlet for compressed air by flexible hose; *b*, throttle-valve controlling entrance of air; *c*, trigger for operating throttle by thumb of operator; *c′*, trigger for operating throttle by forefinger of operator; *d*, valve-box, carrying valve which admits air to cylinder, drives piston out for working stroke, and retracts it; *e*, piston sliding in working-cylinder, and acting as hammer; *ff*, channel by which air gets to front of piston to drive it back; *g*, shank of cutting-tool or riveting-set or swage; *h*, riveting-set or swage; *j*, handle-grip.

admits and exhausts the air so long as a trigger is kept pressed down by the thumb or forefinger of the workman.—**Revolving hammer,** a form of trip-hammer in which a revolving cam makes the hammer strike a quick succession of blows.—**Slater's hammer.** Same as *sax*[1], 2 (which see).—**Wagner hammer** (from P. Wagner), an automatic electromagnetic interrupter which constitutes the buzzer of du Bois-Reymond's inductorium.

hammer[1], *v.* **I.** *trans.* **5.** To declare (a member) to be in default, after notice by hammering three times on the rostrum. [Stock-exchange slang, Eng.]—**6.** To beat down or depress (price or the market); bear.

II. *intrans.* **4.** To make a knocking noise, as a steam-pipe when steam is let on and a water-hammer is produced. See *water-hammer*, 2.

hammer-action (ham′ėr-ak″shọn), *n.* In *pianoforte-making*, a collective name for the parts which compose and control the hammers.

hammer-block (ham′ėr-blok), *n.* The steel face of a steam-hammer which is fastened to the tup by a dovetailed-joint. Various kinds of hammer-blocks can be used, the form depending on the work to be done.

hammer-break (ham′ėr-brāk), *n.* A system of ignition for internal-combustion motors where an arc is formed by separating two surfaces between which the current passes when they are in contact. When the gap is formed between them, an arc or stream of sparks crosses the gap and fires the charge. The movable element is often shaped like the head of a hammer, and the sparks pass as the hammer is lifted from the anvil on which it has rested.

hammer-butt (ham′ėr-but), *n.* In *pianoforte-making*, the block, pivoted upon the action-rail, into which the base of a hammer-shank is fitted. See cut under *pianoforte*.

hammer-check (ham′ėr-chek), *n.* Same as *hammer-catcher* and *check*[1], 16.

hammerclavier (ham′ėr-kla-vēr), *n.* One of the early forms of the pianoforte.

Hammered pottery. See ★*pottery*.

Hammer-fish oil. See ★*oil*.

hammer-head (ham′ėr-hed), *n.* In *pianoforte-making*, the padded projection of the hammer which strikes against the string.

hammerless (ham′ėr-les), *a.* [*hammer* + *-less*.] Having no hammer or no visible hammer: applied, specifically, to a breech-loading small arm in which the cartridge is fired by the action of a firing-pin or a concealed hammer.

hammer-palsy (ham′ėr-pâl″zi), *n.* See ★*palsy*.

hammer-rest (ham′ėr-rest), *n.* In *pianoforte-making*, the rail which extends through the action from side to side and against which the hammers rest when not in use. Also called *spring-rail*. See cut under *pianoforte*.

hammer-shank (ham′ėr-shangk), *n.* In *pianoforte-making*, the slender rod or shank of wood which bears the hammer-head. See cut under *pianoforte*.

hammersmith (ham′ėr-smith), *n.* One who works or forges metal with a hammer; particularly, one who works large forgings under a steam-hammer.

hammer-tail, *n.* **2.** In *pianoforte-making*, the backward projection of a hammer-head, designed to engage with the check.

hammer-toe (ham′ėr-tō), *n.* A deformity of one of the toes, commonly the second, marked by ankylosis of the joints—the proximal in extension, the distal in flexion.

hammochrysus (ham-ō-krī′sus), *n.* [L.; also *ammochrysus*, < Gr. *ἀμμόχρυσος* (only in Pliny and later Latin writers), < *ἄμμος*, sand, *χρυσός*, gold.] In Pliny and later writers, a name probably designating a yellow mica schist or the sand yielded by it.

hammock[1], *n.*—**Up all hammocks!** The command to lash hammocks and bring them on deck for stowing in the hammock-nettings.

hammock-berthing (ham′ọk-bėr″thing), *n.* *Naval*, a box-like structure built above the deck at the side and forming bulwarks, or in the interior against the side, in which the hammocks are stowed when not in use. See cut under *frame*, 6.

hammock-box (ham′ọk-boks), *n.* *Naval*, a large box in which are stowed hammocks for which there is not room in the hammock-berthing.

hammock-carriage (ham′ọk-kar″āj), *n.* A vehicle in which the passenger is carried in a hammock swung between two posts attached to the axles. [Madeira.]

hammock-lines (ham′ọk-līnz), *n. pl.* *Naut.*, sets of cords at each end of a hammock, by which it is hung up. Also called *clues*.

hammock-moth (ham′ọk-môth), *n.* A South American moth, *Perophora sanguinolenta*, whose larva constructs a portable habitation from its own excrement.

hammock-rail (ham′ọk-rāl), *n.* *Naut.*, the rail around the long troughs, known as hammock-nettings, built on top of the bulwarks.

hammock-stanchions (ham′ọk-stan″shọnz), *n. pl.* *Naut.*, iron shapes to which are secured the hammock-rails. These stanchions are fixed either on the main rail of the ship or on the plank-sheer or covering-board.

hamo (hä′mō), *n.* [Jap.] An eel, *Muræsox cinereus*, of the family *Muræsocidæ*, found in the waters of Japan.

Hampstead beds. See ★*bed*[1].

ham-tail (ham′tāl), *n.* A tail (of a horse) shaped like a ham.

hamular, *a.* **II.** *n.* The hamular process or slender curved end of the pterygoid. [Rare.]

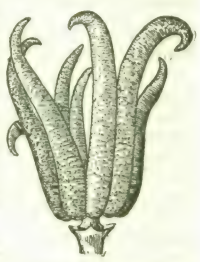
The bullæ are so flattened that when viewed from behind . . . they appear to rise scarcely above the level of tips of *hamulars*. *Annals and Mag. Nat. Hist.*, May, 1901, p. 450.

hana-kago (hä′nä-kä′gō), *n.* [Jap., < *hana*, flower, + *kago*, basket.] In Japan, a flower-basket.

hanch[2] (hanch), *v. t.* and *i.* To snap at threateningly, as a wild or infuriated animal.

Several men had been terribly torn by the bloodhounds, who, when their masters had fled, noble brutes as they were, stood gasping and barking; and *hanching* at us, at the entrance of the opening, thus covering their retreat;—spouting out in a bound or two towards us every now and then, and immediately retiring, and yelling and barking at the top of their pipes.

M. Scott, Cruise of the Midge, p. 19.



hancockite (han′kok-īt), *n.* [Named after E. P. *Hancock* of Burlington, New Jersey.] A member of the epidote group, peculiar in containing lead and strontium, found at Franklin Furnace, New Jersey.

hand, *n.*—**An old hand.** (*a*) One who has had long experience: as, he's *an old hand* at that game. (*b*) One who, in the early days of Australian history, had been a convict.

The men who had been convicts are termed *old hands*; they are mostly rude rough men with no moral principle or religious feeling.

T. McCombie, Australian Sketches, quoted in E. E. Morris, Austral English.

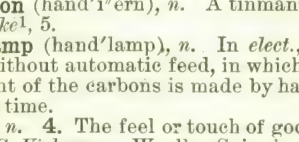
A taut hand, *naut.*, an officer who is a strict disciplinarian.—**Book hand,** a style of penmanship suitable for books, as distinct from ordinary cursive forms of writing.—**Broken hand,** in *bridge*, a hand in which the strength is distributed; one in which there is no suit long enough to be made the trump.—**Buddha's-hand,** a cultivated variety of the citron, *Citrus medica*, in which the individual carpels of the fruit are partially separated, often for half their length, and each is covered by the highly aromatic, oily rind; the whole fruit bearing a rough resemblance to the human hand. This fruit has an important place in Japanese and Chinese mythology and is very often used as a decorative design in ceramics and other works of art.

Fruit of *Citrus medica* (Buddha's-hand). Reduced.

Huge bowls of rare old porcelain held pyramids of fruits—apples, sweet-smelling quinces, and the highly perfumed "*Buddha's-hand.*"

Katharine A. Carl, The Century, Nov., 1905, p. 45.

Cleft hand. See ★*cleft*.—**Comparison of hands.** See ★*comparison*.—**Complete hand,** in *poker*, a hand from which cards have been discarded and to which other cards have been drawn.—**Dead-man's hand,** in *poker*, two pairs, jacks and eights.—**First hand.** (*b*) In *card-playing*, the one who leads in any trick.—**Hands down,** with ease; easily: as, to win the race *hands down*.—**Hand under hand,** the natural movement of the hands when descending a rope without employing the feet.—**Original hand.** In *card-playing:* (*a*) A hand which has not been discarded from. (*b*) In *poker*, the hand before the draw.—**Piano hand,** in *whist* or *bridge*, an easy hand to play.—**Younger hand,** in *card-playing:* (*a*) The opposite of *eldest hand*; the second player on the first trick. (*b*) In *piquet*, the dealer.



hand, *v. t.*—**To hand over,** to deliver.

hand-box (hand′boks), *n.* In *hort.*, a small box, usually of wood, with a sliding pane of glass, used for setting over individual plants or hills of plants in order to force them ahead of their season or to protect them. *L. H. Bailey.* See ★*forcing-hill*.

hand-canter (hand′kan″tėr), *n.* An easy, slow canter. In racing it is understood to refer to an easy victory. If the winner come in at a hand-canter it means that he is so much ahead of his competitors that there is no longer necessity to gallop—that victory is assured.

handcuf, handcuft. Simplified spellings of *handcuff*, *handcuffed*.

hand-dynamometer (hand′dī-na-mom″e-tėr),

Hand-dynamometer.

n. In *physiol.* and *psychophysics*, a dynamometer, of an oval shape, commonly used to measure the force of grip or squeeze of the hand. *E. B. Titchener*, Exper. Psychol., I. ii. 167.

hand-grenade, *n.* **2.** A fire-extinguisher consisting of a glass bottle filled with chemicals.

handhold, *n.* **3.** In *car-building*, an iron bar firmly fixed to the side or end of a freight-car to assist trainmen in boarding it; a grab-iron.

handicap, *n.*—**Flying handicap,** a race in which the starting-post is passed at full speed.

handing (han′ding), *n.* Making work which is symmetrical, on the right and the left hand, with respect to an assumed plane of symmetry.

hand-iron (hand′ī″ėrn), *n.* A tinman's stake. See *stake*[1], 5.

hand-lamp (hand′lamp), *n.* In *elect.*, an arc-lamp without automatic feed, in which the adjustment of the carbons is made by hand from time to time.

handle, *n.* **4.** The feel or touch of goods handled. *C. Vickerman*, Woollen Spinning, p. 266.

handle-bar (han′dl-bär), *n.* In a bicycle or motor-cycle, the curved bar in front of the rider by which the vehicle is guided by the hands. In the motor-cycle many of the controlling devices are affixed to the handle-bar.

handle-piano (han′dl-pi-an″ō), *n.* A mechanical pianoforte operated by a handle or crank, as a street-piano.

hand-light (hand′līt), *n.* A hand-glass; a bell-shaped glass used to shelter young seedlings and cuttings from rain and wind: not in general use in the United States.

Hand-lights are freely used in the market gardens of this district [the vicinity of Evesham and Pershore] for the protection of cucumbers and vegetable marrows.
Encyc. Brit., XXVIII. 532.

handling-room (hand′ling-röm), *n.* In a warship, an ammunition handling-room; a compartment immediately adjacent to those in which ammunition is stored and into which they open. The lower ends of the ammunition-hoists are in the handling-rooms and the ammunition is passed from the magazines into the handling-rooms to be loaded into the hoists. See cut under ★*turret*.

handmaid-moth, *n.*—**Walnut handmaid-moth,** *Datana integerrima*, an American species whose larvæ damage forest trees of different kinds.

hand-me-down (hand′mē-doun″), *a.* Same as *reach-me-down*.

hand-out (hand′out), *n.* In *hand-ball*, *hand-tennis*, and similar sports, the condition of the game when the striker is out and the players change places.

hand-pike (hand′pīk), *n.* A piked lever, usually from 6 to 8 feet long, used in handling floating logs.

hand-rest (hand′rest), *n.* The T-rest on a hand-lathe: so called because used as a rest for a hand-tool in turning and to distinguish it from an automatic or slide-rest.

handscrew, *n.* **2.** A carpenter's clamp.

hand-specimen (hand′spes″i-men), *n.* A specimen of rock or mineral not too large nor too small to be conveniently handled for purposes of study. The standard size for rocks is 1 by 4 by 3 inches.

handspike (hand′spīk), *v. t.*; pret. and pp. *handspiked*, ppr. *handspiking*. **1.** To move by means of a handspike: as, to *handspike* a cannon into place.—**2.** To strike with a handspike.

Perhaps he did not know me—no, he could not, or he never would have *handspiked* me.
Marryat, Snarleyow, vi.

handspoke (hand′spōk), *n.* A long spoke or bar fitted at each end for the hand; specifically, one of the two used in Scotland in carrying a coffin to the cemetery, or from the hearse to the grave. Also called *handspike*.

The coffin, covered with a pall, and supported upon *handspikes* by the nearest relatives, now only waited the father to support the head. *Scott*, Antiquary, xxxi.

hand-square (hand′skwār), *n.* A modification of the squaring-machine, operated by hand, for the preliminary shaping and truing of tiles. See ★*rubbing-bed*.

hand-stake (hand′stāk), *n.* In *glove-making*, a tool used for stretching skins. See the extract.

As soon as the skin is received by the glove maker it is immediately staked by the *hand stake*, which consists of two upright and two horizontal bars, one of the latter being movable to admit the skin, which is held in position by a wedge inserted at the end of the bar.
Sci. Amer. Sup., Jan. 24, 1903, p. 22629.

hand-tree (hand′trē), *n.* Same as *handflower-tree*.

hang, *v.* **I.** *trans.*—**To hang up.** (*c*) To hitch or tie up (a horse) to a post, a tree, or the like. [Colloq. Australia.]

The mail-boy is waiting impatiently in the verandah, with his horse *hung up* to one of the posts.
E. W. Hornung, quoted in E. E. Morris, Austral English.

II. *intrans.* **13.** In *cricket*, to come from the pitch at a perceptibly decreased rate of speed: said of a ball bowled. *Hutchinson*, Cricket, p. 67.—**Hanging ball, bits, glacier, lie, valley.** See ★*ball*[1], etc.

hangar (äṅ-gär′), *n.* [F., a carriage-house, a shed; formerly *angar* (Cotgrave, 1611).] A shed; a shelter for a vehicle, especially for an aëroplane or balloon. *R. W. A. Brewer*, The Art of Aviation, p. 198.

hang-down (hang′doun), *n.* A bearing which is suspended from a roof or beam by a hanging bracket; a hanger.

hanger, *n.*, **5.** (*f*) A vat in which skins are tanned by being suspended in the liquor. *Modern Amer. Tanning*, p. 78. (*g*) A long loop or looped rod which hangs from a transverse beam attached to a foundry crane, and which receives the trunnions of a molding-flask slung therefrom.—**Expanding hanger.** (*b*) An adjustable hanger; a hanger having adjustments to allow for taking up wear and to keep the shaft in line even though the building settles.

hanging-block (hang′ing-blok), *n.* *Naut.*, one of the blocks which are secured under the eyes of the rigging on the foremast, and through which the halyards of the head-sails are rove.

hanging-drop (hang′ing-drop), *n.* The minute portion of nutrient solution suspended from a slide or cover-glass and usually inclosed in a cell, in which bacteria and other micro-organisms are cultivated.

hanging-parrot (hang′ing-par″ọt), *n.* See ★*bat-parrakeet*.

Hangman's knot. See ★*knot*[1].

hangout (hang′out), *n.* One's place of business or resort; a rendezvous. [Colloq.] *Forest and Stream*, Feb. 21, 1903, p. 143.

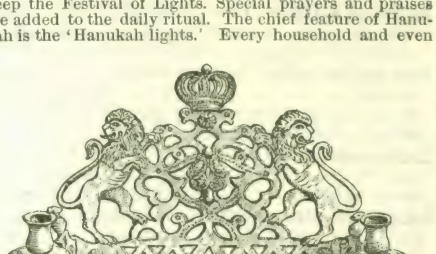
hank-dyeing (hangk′dī″ing). *n.* The process of dyeing yarn in the form of hanks or skeins. It is carried out both by hand and by machinery. Also called *skein-dyeing*. *Georgievics* (trans.), Chem. Technol. Textile Fibres, p. 205.

hank-indicator (hangk′in″di-kā-tọr), *n.* A device attached to some textile machines for registering the amount (in hanks) of their production. *Thornley*, Cotton Combing Machines, p. 196.

hannahill (han′a-hil), *n.* [Origin unknown.] A name of the black sea-bass, *Centropristes striatus*, found on the Atlantic coast of the middle United States. *Jordan and Evermann*, Fishes of North and Middle Amer., p. 1199.

Hannekin defense. Same as *Berlin* or *Prussian* ★*defense*.

Hanot's cirrhosis. See ★*cirrhosis*.



Hansard[2] (han′särd), *n.* [*Hansard*, one of the original compilers.] The official report of the proceedings and debates of the British parliament.

Hansardize (han′sär-dīz), *v. t.*; pret. and pp. *hansardized*, ppr. *hansardizing*. To confront (a member of parliament) with his previous utterances on some question, as recorded in Hansard, and thus convict him of inconsistency. [Colloq., Eng.]

hansom, *n.*—**Cape hansom,** a hansom-cab with a bow top, fitted with a pole like a Cape cart.

Hants. A contraction of ancient *Hantesshire* (now *Hampshire*).

Hanukah (ċhä′ nö-kä), *n.* [Also *Chanukah*, *Chanuca*. Heb. *ḥanūkah*, < *ḥanak*, dedicate.] Among the Jews, the festival of dedication. Josephus (Antiq., XII. vii. 7) calls it the "festival of lights." It is the only post-Biblical festival of importance among the Jews. It begins on the twenty-fifth day of Chisleu (Kisleu), about the end of December, and lasts eight days (until the second day of Tebeth). This festival, like Purim (which see), is the occasion of much rejoicing. It is celebrated in commemoration of the defeat of Antiochus Epiphanes by the Maccabees (B. C. 164). When the temple was recovered from the defeated Syrians it was cleansed and the sacred vessels were purified. One vial of undefiled oil for the golden candlestick was found. According to tradition, that small quantity of oil miraculously continued to burn for eight days and nights until more oil was procured. In memory of this, the rabbis decreed the perpetuation of the festival. Orthodox Jews scrupulously keep the Festival of Lights. Special prayers and praises are added to the daily ritual. The chief feature of Hanukah is the 'Hanukah lights.' Every household and even

Modern Russian Hanukah Lights.

every adult male is obliged to light them at home immediately after the evening prayer. One candle, lamp, or taper is lighted the first night, two on the second, and so on until the eighth night. An additional light, called *shamash* ('servant'), serves to supply the light to the others. Two such lights are sometimes placed in modern forms.

haoma (hä′ọ̈-mä or hou′mä), *n.* [Avestan *haoma* = Skt. *soma*: see *soma*[2].] Same as *homa* and *soma*[2].

On the position of the *Haoma* in the Avesta of the Parsees. *Smithsonian Rep.*, 1890, p. 91.

haori (hä′ọ̈-rē), *n.* A short loose over-jacket or -coat worn in Japan.

Women under their umbrellas wore the graceful short overcoat they call *haori*, and tottered over the wet ground on high wooden pattens.
La Farge, Artist's Letters from Japan, p. 274.

hapaxanthic (hap-aks-an′thik), *a.* [Gr. *ἅπαξ*, once, + *ἀνθεῖν*, bloom, + *-ic*.] Same as ★*hapaxanthous*.

hapaxanthous (hap-aks-an′thus), *a.* [Gr. *ἅπαξ*, once, + *ἀνθεῖν*, bloom, + *-ous*.] In *bot.*, having only a single flowering-period: applied to herbs which after once seeding die throughout. Such plants may be annual (monocyclic) or biennial (dicyclic). *F. E. Clements*.

haphalgesia (haf-al-jē′si-ä), *n.* [NL., < Gr. *ἁφή*, touching, + *ἄλγησις*, the feeling of pain.] A condition of hyperæsthesia in which the slightest touch causes pain.

haplite, *n.* Haplite proper is a granite free, or nearly free, from muscovite or any dark silicate. The name is also applied by Rosenbusch and other petrographers to the highly feldspathic members of the syenite, monzonite, and diorite families, such rocks being usually called *syenite-haplite*, *diorite-haplite*, etc. This extension of the term is connected with the belief that such haplitic rocks are differentiation products of syenitic, monzonitic, or dioritic magmas. The rocks in question often occur in dikes and possess the panautomorphic granular texture, and these features enter into the definitions given by Rosenbusch.

haplitic (hap-lit′ik), *a.* [Also *aplitic*; < *haplite* + *-ic*.] In *petrog.*, pertaining to or having the characters of the rock called haplite.

haplobacteria (hap-lō-bak-tē′ri-ä), *n. pl.* [Gr. *ἁπλόος*, single, + NL. *bacteria*.] Unicellular bacteria of the ordinary rod, spiral, or spherical form, as contrasted with the ★trichobacteria (which see).

Haplocheilus (hap-lō-kī′lus), *n.* [NL., also *Aplocheilus*; < Gr. *ἁπλόος*, single, + *χείλος*, lip.] A genus of killifishes closely allied to *Fundulus*, but differing in the short dorsal and longer anal fin. The species are mainly Asiatic. *Aplocheilus* is the original form of the name.

haplochlamydeous (hap″lō-kla-mid′ē-us), *a.* [Gr. *ἁπλόος*, simple, + *χλαμύς* (*χλαμυδ*), a cloak, + *-eous*.] In *bot.*, having a simple or rudimentary floral envelop, as in the pistillate flowers of the *Juglandaceæ*. In plant development the haplochlamydeous stage succeeds the achlamydeous and is followed by the homoiochlamydeous.

Haplocrinidæ (hap-lō-krin′i-dē), *n. pl.* [NL., < *Haplocrinus* + *-idæ*.] A family of crinoids which belongs to the order *Larviformia* and is typically represented by the genus *Haplocrinus*.

Haplocrinus (hap-lok′ri-nus), *n.* [NL., < Gr. *ἁπλόος*, single, + *κρίνον*, a lily (see *crinoid*).] A genus of inadunate or larviform crinoids typical of the family *Haplocrinidæ*, of which it is the only representative. It has a small pyriform calyx in which there are three compound and two simple radials, uniserial and non-pinnulate arms. It occurs in the Middle Devonian.

Haplodinotinæ (hap″lō-di-nō-tī′nē), *n. pl.* [*Haplodinotus* + *-inæ*.] A subfamily of freshwater drums, typified by the genus *Haplodinotus* (or *Aplodinotus*).

haplodonty (hap′lō-don-ti), *n.* [*haplodont* + *-y*[3].] The condition or fact of having molar teeth with simple crowns. See *haplodont*.

haplogamic (hap-lō-gam′ik), *a.* Pertaining or relating to haplogamy.

haplogamy (hap-log′a-mi), *n.* [Gr. *ἁπλόος*, simple, + *γάμος*, marriage.] A method of cell-conjugation in which the fusions of the nuclei and the chromatin are not deferred to permit the formation of vegetative cells or tissues, plasmapsis, karyapsis, and mitapsis occurring in the same cell. Vegetative tissues of haplogamic structures are composed of cells with a single nucleus and a single set of chromosomes. The alternatives of haplogamy are ★*apaulogamy* and ★*paragamy*. *Cook and Swingle*.

haplohedral (hap-lō-hē′dral), *a.* [Gr. *ἁπλόος*, single, + *ἕδρα*, base, + *-al*.] In *mineral.*, noting the asymmetric or pediad group of the triclinic system in which each form has one face only. See ★*symmetry*.

haploid (hap′loid), *a.* [Gr. *ἁπλόος*, simple, + *-oid*.] Having simple cells. Said of the lower organisms, or of the gametophytic phase of some higher plants, the cells of which contain only one simple nucleus with only a single set of chromosomes; haplogamic. Contrasted with ★*diploid*.

haplology (hap-lol′ọ-ji), *n.* [Gr. *ἁπλόος*, single, + *-λογια*, < *λέγειν*, speak.] The utterance of only one of two similar adjacent syllables or sounds that appear in the full pronunciation of the word. The phenomenon is a universal linguistic fact, and is parallel to that of *haplography* (which see). Both

influences appear in the history of many words. Examples are *idolatry* for *idololatry, symbology* for *symbolology, register*[2] for *registrer, registrar, ably* for *ablely, idly* for *idlely, wholly* (pronounced *wholy*) for *wholely*, etc.

The phenomena seemed related to those of *haplology* in the history of words, as in 'nutrix' for 'nutritrix.'
Scripture, Exper. Phonetics, p. 168.

haplome[2] (hap'lōm), *n.* A member of the *Haplomi*.

Haplomi[2] (hap-lō'mī), *n. pl.* [NL., < Gr. *ἁπλόος*, single, + *ὦμος*, shoulder, upper arm.] An order or suborder of fishes which is characterized by the absence of the mesocoracoid arch and of spines in all of the fins. The families contained in this group are the *Pœciliidæ*, or killifishes, the *Esocidæ* or pikes, the *Umbridæ* or mud-minnows, and the *Amblyopsidæ* or blind-fishes.

Haploscleridæ (hap-lō-sklē'ri-dē), *n. pl.* [NL.]. A large family of halichondrine *Demospongiæ* The spiculation is of a simple type, and the microscleres, if present, are never chelæ. It contains *Halichondria, Chalina, Reniera, Spongilla*, and many other genera.

haploscope (hap'lō-skōp), *n.* [Gr. *ἁπλόος*, single, + *σκοπεῖν*, view.] In *physiol.* and *psychol. optics*, a stereoscope which presents to either eye a field invisible to the other. *E. C. Sanford*, Exper. Psychol., p. 404.

haploscopic (hap-lō-skop'ik), *a.* [*haploscope* + *-ic.*] Pertaining to the haploscope or to its use.

This test is superior to the tests with *haploscopic* figures because it is dependent upon true psychical fusion, while the latter are dependent upon the mere matching together of divided figures.
Optical Jour., June 2, 1904, p. 963.

Haplosporidia (hap″lō-spō-rid'i-ä), *n. pl.* [NL., pl of *Haplosporidium.*] An order of *Sporozoa*. The developmental cycle is very simple. The youngest stage of the parasite is a minute rounded corpuscle with single nucleus; as growth proceeds, multiplication of nuclei occurs, and the mass finally separates into a number of spores of uniform structure, which give rise to uninucleated corpuscles, thus completing the cycle. It contains the genera *Bertramia, Haplosporidium*, and *Cœlosporidium*, parasitic in worms, rotifers, and crustaceans.

Haplosporidium (hap″lō-spō-rid'i-um), *n.* [NL., < Gr. *ἁπλόος*, single, + *σπορά*, seed (spore), + dim. *-ιδιον.*] The typical genus of the order *Haplosporidia*. *Caullery et Mesnil*, 1899.

haptere (hap'tēr), *n.* [G. *hapter*, < NL. *hapteron.*] Same as ★*hapteron*.

hapteron (hap'tẹ-ron), *n.*; pl. *haptera* (-ä). [NL., irreg. < Gr. *ἅπτειν*, fasten.] In *phytogeog.*, a special organ of attachment composed of non-vascular tissue, developed by many aquatic lithophytes, as *Podostemaceæ* and marine algæ. *E. Warming.*

haptic (hap'tik), *a.* [Gr. *ἁπτικός*, < *ἅπτειν*, touch: see *apse.*] Tactile; of or pertaining to haptics: as, a *haptic* sensation. *Amer. Jour. Relig. Psychol. and Education*, May, 1904, p. 33.

haptical (hap'ti-kal), *a.* Same as ★*haptic*.—**Haptical image.** See ★*image*.

haptics (hap'tiks), *n.* [Pl. of *haptic.*] In *psychol.* and *physiol.*, the science of touch: as optics is the science of sight and acoustics the science of hearing. As generally used, the term includes the physiology and psychology not only of the skin and the adjoining mucous membrane, but also of the kinesthetic organs (muscles, tendons, joints).

As a general term for perceptions of touch in the widest sense, M. Dessoir [1892] suggests *Haptics* as an analogue of Optics and Acoustics. This he further divides into Contact-sense (including pure contact and pressure) and Pselaphesia . . . (including active touch and 'muscle sense'). *E. C. Sanford*, Exper. Psychol., p. 1.

haptine (hap'tin), *n.* [Gr. *ἅπτειν*, touch, fasten, + *-ine*[2].] A cast-off receptor. The haptines are represented by the antitoxins, the agglutinins, the precipitins, and the amboceptors of the hemolysins, the bacteriolysins, etc. See ★*immunity*.

haptogenic (hap-tō-jen'ik), *a.* [Gr. *ἅπτειν*, touch, + *-γενης*, -produced.] Used in the term *haptogenic membrane*, a hypothetical albuminous membrane which according to Ascherson surrounds every globule of fat in milk. *C. E. Simon*, Physiolog Chem., p. 408.

haptophil (hap'tō-fil), *a.* [Gr *ἅπτειν*, fasten, + *φιλεῖν*, love.] Same as ★*haptophoric*.

haptophore (hap'tō-fōr), *a.* [Also *haptophore*; < Gr. *ἅπτειν*, fasten, + *-φορος*, < *φέρειν*, bear.] Same as *haptophoric*. Also *haptophor*.

Ehrlich's hypothesis to explain such facts is usually spoken of as the side-chain theory of immunity. He considers that the toxins are capable of uniting with the protoplasm of living cells by possessing groups of atoms like those by which nutritive proteids are united to cells during normal assimilation. He terms these *haptophor* groups, and the groups to which these are attached in the cells he terms receptor groups. The introduction of a toxin stimulates an excessive production of receptors, which are finally thrown out into the circulation, and the free circulating receptors constitute the antitoxin. The comparison of the process to assimilation is justified by the fact that non-toxic substances like milk introduced gradually by successive doses into the blood-stream cause the formation of anti-substances capable of coagulating them.
Rep. Brit. Ass'n Advancement of Sci., 1902, p. 778.

haptophoric (hap-tō-fō'rik), *a.* [As *haptophore* + *-ic.*] Pertaining to that group of a toxin molecule which unites with the corresponding receptor of a cell. The same term is used to designate that group of cell receptors which unites with the immunizing substance. See ★*immunity*.

haptophorous (hap-tof'ō-rus), *a.* [As *haptophore* + *-ous.*] Same as ★*haptophoric*.

haptotics (hap-tot'iks), *n.* [Irreg. < Gr. *ἅπτειν*, touch, + *-otic.*] Same as ★*haptics*.

hapuku (hä'pö-kö), *n.* [Maori.] A fish, the groper (*Polyprion oxygeneios*), found on the coast of New Zealand. Its average weight is about 45 pounds, and in some places it forms an important article of trade. Also *hapuka*.

harakeke (hä-rä-kā'kā), *n.* [Maori.] The common variety of the New Zealand flax, *Phormium tenax*.

harbor-deck (här'bor-dek), *n.* See ★*deck*, 2.

harbor-pirate (här'bor-pī″rāt), *n.* One who robs vessels in port by coming alongside in a small boat and carrying off portable articles, such as brass belaying-pins, running-gear, etc.; a thief whose trade is to steal cargo from docks and vessels in harbor.

harbor-porpoise (här'bor-pôr″pus), *n.* The small porpoise or puffing-pig, *Phocæna phocæna*, or *P. communis*, frequently seen in bays and estuaries.

Harcourt air-gas pentane standard. See ★*air-gas*.

hard, *a.*, **10.** (*h*) In *vocalization*, of a tone made with a rigid attitude of the vocal organs, so as to be wanting in mellowness and sympathy.

hard, *adv.*—**Hard ashore,** said of a vessel when it is firmly fixed on the rocks or on a shoal or beach.—**Hard aweather!** a command to put the steering-wheel over so that the tiller will be turned toward the weather side and the ship's head deflected from the wind: opposed to *hard alee!*—**Hard down!** a command to put the wheel over so that the ship may be brought to the wind: opposed to ★*hard aweather!*—**Hard over!** an order to the helmsman to jam the wheel or tiller over as far as possible.

hardback (härd'bak), *n.* **1.** Any fish of the genus *Callichthys;* any catfish of the family *Loricariidæ*, found in the fresh waters of South America.—2. In the British West Indies and British Guiana, any large beetle, especially one of the larger *Scarabæidæ*.

hard-earned (härd'ėrnd), *a.* Earned with difficulty or hard work.

harden[2], *n.* 2. A cloth of coarse fiber and texture, made from hards.

hardener, *n.* 2. In *photog.*, a chemical, such as alum, which is added to the fixing-bath in the making of gelatin negatives. It prevents the dissolving of the film in warm weather.

hardening-machine, *n.* 2. See ★*heating-machine*.—3. A heating-machine adapted to heating small balls, parts of machines, saw-teeth, nuts, bolts, etc., and delivering them automatically while hot to oil or water hardening-tanks. For heating balls for ball-bearings a spiral conveyer is used to convey the balls through the furnace. Other machines employ different forms of link-belt conveyers, the aim in each type of machine being to expose the things to be heated to the direct action of the gas-flames and to protect the conveyer as much as possible from the destructive effects of the heat. This is accomplished by supporting the things to be heated on rods which project through a slot in the bottom of the furnace, the conveyer carrying the rods being outside the furnace, or by placing refractory bricks on the conveyer.

hardening-off (härd″ning-ôf'), *n.* In *hort.*, the process of inuring or habituating a plant to untoward conditions, as to adapt it gradually to cold before removing it from a hotbed or forcing-house.

hardening-tank (härd'ning-tangk), *n.* A tank or bath containing oil or water in which small metal objects are hardened as they come from the heating- or hardening-machine.

hardenite (här'de-nīt), *n.* A name proposed for the solid solution of iron and carbon containing 0.9 per cent. of carbon: it has the lowest transformation-point. The name has been abandoned by many authorities on iron and steel as being misleading.

Carbonists, however, hold that the pale areas are *hardenite* containing dissolved cementite, the dark areas being a mixture of *hardenite* and free cementite (M. Osmond's methods are evidently not sufficiently delicate to detect in the dark so-called martensite the constituent last named). *Nature*, April 14, 1904, p. 554.

Harderian fossa. See ★*fossa*[1].

hard-grass, *n.* 2. See *St. Augustine* ★*grass*.

hard-gut (härd'gut), *n.* *Mugil dobula*, a fish found in Australia.

hardhack, *n.* 2. The hop-hornbeam, *Ostrya Virginiana.* [Vermont.]

hardhead, *n.* **3.** The name is also applied to many other fishes having hard heads: as in America to *Chriodorus atherinoides* of the family *Hemiramphidæ*, and *Salmo gairdneri*, a trout; in England to *Myoxocephalus scorpius*, a cottoid fish.

11. In the Bahamas, a shrub of the spurge family, *Phyllanthus Epiphyllanthus*. Also called *seaside laurel*. See *laurel*, 3.

hard-horse (härd'hôrs), *n.* A sailors' term for a tyrannical officer.

hardie (här'di), *n.* [AF.: see *hardy.*] **1.** An English billon coin of Edward III. See *hardhead*, 2.—2. A French copper coin of the year 1270, the liard of Philip le Hardi.

Harding sandstone. See ★*sandstone*.

hard-meat (härd'mēt), *n.* Dry fodder; corn and hay as fodder, as distinguished from grass. [Prov. Eng.]

hardness, *n.* **2.** Water, as found in nature, containing salts of lime or magnesia or both of these in considerable quantity, is said to be *hard;* it curdles or precipitates soap by forming insoluble lime or magnesia salts of the fatty acids. Any lime or magnesia present in the condition of carbonate is held in solution by carbonic acid, and if this latter is driven off as carbon-dioxid gas by boiling the water, the earthy carbonates are precipitated, so that the water is to this extent softened. The part of the original hardness which is thus removable by boiling is called *temporary hardness.* The part due to calcium or magnesium in the condition of chlorid or sulphate is not thus removable, and is called *permanent hardness.* The sum of the temporary and permanent hardness constitutes the *total hardness.* Hardness is frequently stated in degrees, each degree representing hardness equivalent to that caused by 1 grain of calcium carbonate in 1 imperial gallon of water; or, now more commonly, 1 part of calcium carbonate in 1,000,000 parts of water.

hard-spun (härd'spun), *a.* Compactly twisted: said of yarn.

hardtail, *n.* 2. See ★*Gila*.

hardwood (härd'wůd), *a.* and *n.* **I.** *a.* Having a hard wood (see *hard wood*, under *wood*[1], *n.*), as a tree; bearing trees with hard wood, as a forest; made of hard wood: as, a *hardwood* floor.

II. *n.* A hardwood tree.

hardyhead[2] (här'di-hed), *n.* An atherinoid fish, *Atherina lacunosa*, inhabiting Australian waters. *E. E. Morris*, Austral. English.

hardy-hole (här'di-hōl), *n.* A rectangular hole in a blacksmith's anvil for the insertion of the shank of a cutting-tool or other piece.

hardystonite (här'di-ston-īt), *n.* [*Hardyston* (see def.) + *-ite*[2].] A silicate of zinc and calcium ($Ca_2ZnSi_2O_7$) which occurs in white granular masses at Franklin Furnace, in Hardyston township, Sussex county, N. J.

hare[1], *n.*, **1.** So many new species and subspecies of hares have been described of late years that common names have not kept pace with scientific names.—**Desert hare,** a subspecies of the Texan hare, *Lepus texensis deserticola*, which like other desert-dwellers has a pale coat.—**Polar hare,** the white northern species which are pure white in winter save the tips of the ears which are black. Besides *Lepus arcticus* other species are now recognized differing decidedly in the proportions of their ears and feet.—**Varying hare,** a name of several species of North American hares, especially of *Lepus americanus* and *L. campestris* which turn white in winter in the northern portion of their ranges.

harebell, *n.*—**Australian harebell.** Same as *Tasmanian* ★*bluebell*.

harelip-needle (hãr'lip-nē″dl), *n.* A slender cannula with a spear-pointed trocar which is passed through the two halves of the lip, the freshened edges being in apposition: the trocar is then withdrawn and a figure-of-8 suture is applied over the cannula.

harem, *n.* **4.** The group of female fur-seals (cows) controlled by a single male fur-seal (bull): the unit of life on the fur-seal rookeries. *Jordan*, Fur Seals and Fur-seal Islands.

Harengula (ha-reng'gū-lä), *n.* [NL., dim. of *harenga*, herring.] A genus of fishes of the family *Clupeidæ*, or herrings, characterized by the firm, usually adherent scales. The species are of small size and tropical in their distribution.

hare-wallaby (hãr'wol″a-bi), *n.* Same as *harekangaroo*.

harf (härf), *n.* [Abyssinian.] An Abyssinian silver coin, the dahab, equal to one twenty-third of a dollar.

Hargeria (här-gē'ri-ä), *n.* [NL.] A genus of extinct toothed birds from the Cretaceous of Kansas. They are closely related to *Hesperornis*, but are distinguished by differences in the quadrate and in having a more slender femur. *Lucas*, 1902.

haricot (har'i-kō), *v. t.* To prepare as, or convert into, a haricot: as, to *haricot* a neck of mutton.

harifuku (hä-ri-fö″kö), *n.* [Jap.] The Japanese name of a fish of the family *Diodontidæ*, *Diodon holacanthus*.

harigue, *n.* See ★*arigue*.

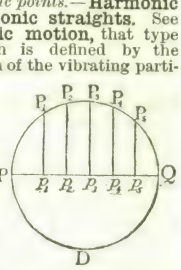
Häring beds. See ★*bed*[1].

Hariota (har-i-ō′tä), *n.* [NL. (Adanson, 1763), named in honor of Thomas *Hariot* (also spelled *Harriot*) (1560–1621), who accompanied Grenville to Virginia and wrote an account of its products. Compare ★*Harriotta*.] A genus of plants of the family *Cactaceæ*. See *Rhipsalis*.

harisembon (hä-ri-sem′bōn), *n.* [Jap.] Same as ★*harifuku*.

Harlequin caterpillar, pigeon, quail, ring, table. See ★*caterpillar*, etc.

harmalol (här′ma-lōl), *n.* [*harmal(ine)* + *-ol.*] A brick-red compound, $C_{12}H_{12}ON_2.3H_2O$, formed by the action of hydrochloric acid on harmaline. It crystallizes in needles.



harmamaxa (här-ma-mak′sä), *n.* [Gr. *ἁρμάμαξα*, ‹ *ἁρμός*, joint, + *ἅμαξα*, wagon.] In *Gr. antiq.*, a covered wagon, much used by women, which is mentioned by Herodotus and Xenophon in descriptions of Persian luxury. It was similar to the ★apena (which see).

harminic (här-min′ik), *a.* [*harmin* + *-ic.*] Derived from harmin or harmaline.—**Harminic acid**, a colorless compound, $C_{10}H_8O_4N_2$, formed by the oxidation of harmin or harmaline. It crystallizes in silky needles and melts and decomposes at 345° C.

harmol (här′mōl), *n.* [*harm(in)* + *-ol.*] A compound, $C_{12}H_{10}ON_2$, formed by the action of fuming hydrochloric acid on harmin.

harmolic (här-mol′ik), *a.* [*harmol* + *-ic.*] Derived from harmol.—**Harmolic acid**, a colorless compound, $C_{12}H_{10}O_5N_2$, formed by fusing harmol with potassium hydroxid. It crystallizes in small needles melting at 247° C.

harmonic. **I.** *a.*—**Harmonic analysis.** (*c*) The resolution or analysis of a series of observed values of any quantity into an equivalent summation of a series of sine and cosine terms each pair of which represents the effect of an imaginary force operating in a specific way. The periods of the successive circles are in arithmetical progression; hence the term *harmonic*.—**Harmonic analyzer.** See ★*analyzer*.—**Harmonic axial pencil**, the four planes projecting harmonic points from an axis not coplanar with their bearer.—**Harmonic integrator**, an apparatus for mechanically summing up the individual terms of the harmonic series representing any natural phenomenon. The most important of these are instruments devised by William Ferrel for daily use by the United States Coast and Geodetic Survey, and by William Thomson (Lord Kelvin) in computing tidal tables, for use in England.—**Harmonic law**, *in linguistics*, the law according to which the vowels in one word must belong to one class, so that *o*, for instance, may stand in conjunction with *a* and *u*, but not with *e* and *i*.—**Harmonic minor mode** or **scale**, in *music*, that form of the minor mode or scale that has a minor sixth and a major seventh. Also called *instrumental minor*.—**Harmonic optimum.** See ★*optimum*.—**Harmonic planes.** Same as ★*harmonic axial pencil*.—**Harmonic points.** (*a*) In *projective geom.*, a harmonic range. (*b*) In *function theory*, two pairs of points, one pair the intersections of a circle about with a circle through the other pair.—**Harmonic quadrangle.** See ★*quadrangle*.—**Harmonic range**, four costraight points, if the first and third are codots of a tetrastigm while the other two are on the connectors through the third codot. Also called *harmonic points*.—**Harmonic spheres.** See ★*sphere*.—**Harmonic straights.** See ★*straight*, *n.*—**Simple harmonic motion**, that type of linear vibratory motion which is defined by the equation $x = a \cos tw$. If the path of the vibrating particle be taken as the diameter of a circle, the displacement of the particle will always be such that its position is the normal projection, upon the diameter, of the position of a point moving around the circle with uniform speed. Let a point starting from P move around a circle P Q D at uniform speed, and another point starting from P move along the diameter in such a manner that when the first point reaches P_1, P_2, P_3, etc., the second will reach p_1, p_2, p_3, etc. The motion of the point along the diameter is then a *simple harmonic motion*.—**Spherical harmonic analysis**, in *math.*, the calculus of special harmonic functions where values are given on a sphere.

Simple Harmonic Motion.

II. *n.*—**Electrical harmonics**, electrical oscillations of higher frequency accompanying an oscillation of lower frequency, usually of greater amplitude, and related to the latter as the harmonic overtones of a complex sound are related to the fundamental tone.—**Ellipsoidal harmonic.** Same as *Lamé's function* (which see, under *function*).—**Higher harmonics**, in alternating currents, electromotive forces, waves of higher frequency, or overtones, which overlie the fundamental harmonic wave and more or less distort it.—**Perturbed harmonic**, in *acoustics*, an overtone the frequency of which is so modified as to throw it out of harmonic relation with the fundamental tone.—**Solid zonal harmonic**, $r^m P_m (\cos\theta)$.—**Surface zonal harmonic**, $P_m(x)$ or $P_m(\cos\theta)$: also known as a *Legendre's coefficient*.—**Tesseral harmonics**, $\cos n\phi \sin^n\theta \frac{d^n P_m(\mu)}{d\mu^n}$ and $\sin n\phi \sin^n\theta \frac{d^n P_m(\mu)}{d\mu^n}$: special cases of the spherical harmonic.

harmonica, *n.* **3.** In *organ-building*, a mixture-stop. [Rare.]

harmonograph (här-mon′ō-graf), *n.* [Irreg. ‹ Gr. *ἁρμονία*, harmony, + *γράφειν*, write.] An apparatus in which two pendulums vibrate at right angles to each other, the movement of a stylus or pen attached to one making a record on a plane surface supported by the other.

Moreover, the table carrying the paper can be rotated and a variety of figures thus obtained, including the epicycloids and hypocycloids, and also curves similar to those given by a *harmonograph* with clockwork table, but without the gradual decrease in amplitude.
Nature, March 6, 1902, p. 421.

harmony, *n.*—**Dominant harmony**, in *music*, either the same as *dominant chord* (which see, under *dominant*), or, more loosely, all chords for which the dominant serves as the bass or which are associated with it as a general basis of reference.

harness, *n.* **8.** *Naut.*, an obsolete term for the furniture of a ship.—**Cape harness**, a harness with a wide breast-collar connected with the breeching. It has hip- and neck-straps, but no saddle or girth. It is used in Cape Colony, South Africa.—**Centered tie-harness**, a method of tying up the heddles of a Jacquard loom for producing large effects from small pattern-cards.—**Coupé harness**, a heavy single harness, generally of a showy character, used with heavy closed pleasure-carriages.—**Double equal plain tie-harness**, a method of tying up the harness of a Jacquard loom in which four comber-boards are used to weave double equal plain fabrics.—**Double-scale harness**, a loom-harness for weaving wide patterns with a set of small Jacquard cards.—**Pressure harness**, a combination of a Jacquard and heddles, in a loom, both moving independently though acting on the same threads.

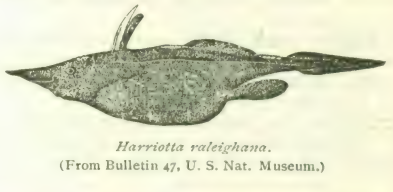
harness-room (här′nes-röm), *n.* A room in which sets of harness are cleaned, repaired, and stored.

harness-shaft (här′nes-shâft), *n.* A frame for holding the heddles of a loom.

harness-slip (här′nes-slip), *n.* In gauze or doup weaving, that part of a doup-heddle which controls the crossing of the warp-thread. *T. W. Fox*, Mechanism of Weaving, p. 234.

harp, *n.*—**David's harp**, the gold florin of David of Burgundy, Bishop of Utrecht (1455–96), with the effigy of St. David and his harp.—**Harp instrument.** See ★*instrument*.—**Pointed harp**, a small triangular form of zither, now obsolete, played in an upright position on a table, having the higher strings on one side of the sound-board and the lower strings on the other. Also called *arpanetta* and *spitzharfe*.

Harpagodes (här-pa-gō′dēz), *n.* [NL., ‹ Gr. *ἁρπάγη*, a hook, + *εἶδος*, form.] A genus of platypodous gastropod mollusks, belonging to the family *Strombidæ* and closely allied to the recent genus *Pterocera*, having an expanded body-whorl with reflected canal and the outer margin of the aperture produced into a number of tubular spinous processes. It occurs in the Jurassic and Cretaceous rocks.



Harpedidæ (här-ped′i-dē), *n. pl.* [NL., ‹ *Harpes* (assumed stem *Harped-*) + *-idæ*.] A family of trilobites characterized by the broad horseshoe-shaped expansion of the cephalon, simple eyes on the fixed cheeks, numerous thoracic segments, and very small pygidium. Species occur in Silurian and Devonian rocks.

Harpes (här′pēz), *n.* [NL., perhaps ‹ Gr. *ἅρπη*, a sickle.] The typical genus of the *Harpedidæ*.

harp-file (härp′fīl), *n.* A wire hook for filing papers, attached to a harp-shaped piece of iron. *Stand. Dict.*

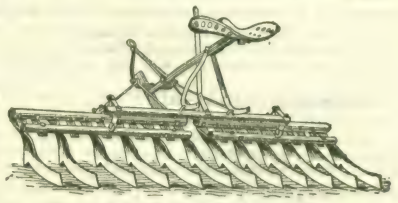
harpy-bat (här′pi-bat), *n.* An East Indian fruit-bat of the genus *Harpyia*, distinguished by tubular, projecting nostrils. There are two or three species of moderate size, the largest being *H. major* of New Guinea and the adjoining islands.

Harriotta (ha-ri-ot′ä), *n.* [NL., named after Thomas *Hariot* or *Harriot* (1560–1621), an English mathematician connected with Grenville's expedition to Virginia under appointment of Raleigh. Compare ★*Hariota*.] A genus of chimæras found in the deep waters of the Gulf Stream, characterized by the long snout which is produced in a soft flat blade. *H. raleighana* is the known species.

Harriotta raleighana.
(From Bulletin 47, U. S. Nat. Museum.)

Harris-buck (har′is-buk), *n.* The large sable antelope, *Hippotragus niger*, of South Africa, discovered by Sir C. Harris.

Harrison china. See *Columbian Star* ★*china*.



Harris's bark-louse, butterfly, cormorant. See ★*bark-louse*, etc.

Harrovian (ha-rō′vi-an), *a.* and *n.* **I.** *a.* Of or pertaining to Harrow, England.

II. *n.* A pupil or student in the college at Harrow, England.

Sir Douglas Straight is credited with being "Sigma," the old *Harrovian* who wrote 'Personalia,' chiefly on the strength of the Harrow Register of his day, which contains the names of many distinguished men, but of very few who are both literary and legal.
Athenæum, Nov. 21, 1903, p. 686.

harrow[1], *n.* **2.** A harrow-like military formation; also, that assumed by flying flocks of wild geese.—**Pulverizing harrow**, a form of riding-harrow in which broad elastic teeth resting on edge are suspended from the frame and are trailed over the ground, acting as small plowshares.—**Spring-tooth harrow**, a harrow having, in place of the fixed teeth used in the ordinary frame-harrow, curved steel teeth bent into a half-circle and acting as curved springs.

Pulverizing Harrow.

harry[2] (har′i), *n.* [Said to be so named from King *Harry* or Henry VIII.] A playing-card having a slight blemish on one surface.

Harry[3] (har′i), *n.* [Also *Harrie*, earlier *Herry*, *Herrie*, assimilated forms of *Henry*, OF. *Henri*, etc.] A common personal name, also used in various extraneous applications. See ★*'Arry*, and *Old Harry*, under *old*.—**Black Harry**, the black sea-bass, *Centropristes striatus*: so named along the Atlantic coast of the United States.

hart, *n.* and *v.* A simplified spelling of *heart*.

hartbeest, *n.*—**Bastard hartbeest.** Same as *sassaby* (which see).—**Coke's hartbeest**, *Bubalis cokei*, a species distinguished from other species of the genus by the wide spread of its horns.—**Hunter's hartbeest**, *B. hunteri*, from Somaliland, distinguished by the white A-shaped marks on the forehead, and long horns.—**Jackson's hartbeest**, *Bubalis jacksoni*, a species found in British East Africa, characterized by the light color of its face.

harth, *n.* A simplified spelling of *hearth*.

Hartogia (här-tō′ji-ä), *n.* [NL. (Linnæus, 1759), named in honor of John *Hartog*, an early Dutch traveler in South Africa.] A genus of plants of the family *Rutaceæ*. There are about 100 species, native in South Africa, several of which are cultivated in greenhouses.

Hart's cell. See ★*cell*.

Hartshill quartzite. See ★*quartzite*.

hartshorn, *n.*—**Oil of hartshorn**, the liquid product, of oily consistence and immiscible with water, obtained in the destructive distillation of the antlers of deer, as formerly practised. It is essentially the same as bone-oil. *Thorpe*, Dict. Applied Chem., III. 8.

harty, *a.* and *n.* A simplified spelling of *hearty*.

Harveian (här′vē-an), *a.* Named, established, or delivered in honor of the famous physician William Harvey (1578–1657), the discoverer of the circulation of the blood: as, the *Harveian* Society of London; the *Harveian* lectures. *Lancet*, June 6, 1903, p. 1608.

harvesting-ant (här′ves-ting-ânt), *n.* An ant of the genus *Aphænogaster* or of one of its immediate allies, such as *Pogonomyrmex*.—They form deep underground nests composed of many chambers, in some of which are stored the seeds of grasses and grains as provision against winter. *Cambridge Nat. Hist.*, VI. 164.

Harveyize (här′vi-īz), *v. t.* [H. A. *Harvey*, the inventor of the process, + *-ize*.] To subject the face of (a steel plate, particularly a steel armor-plate), for the purpose of chilling, to a process of cementation which increases the carbon in that portion of the plate and produces a plate with a comparatively soft and ductile body and a very hard face.

harzburgite (härts′bėr-gīt), *n.* [*Harzburg*, in Saxony, + *-ite*[2].] Same as *saxonite*.

hash-house (hash′hous), *n.* A cheap boarding-house. [Slang, U. S.]

haskinization (has″kin-ī-zā′shon), *n.* [*haskinize* + *-ation*.] A process by which heat of over 212° F. is applied to green lumber under pressure of 200 pounds to the square inch. Wood thus treated becomes indurated and durable. The process is sometimes substituted for creosoting.

haskinize (has′ki-nīz), *v. t.*; pret. and pp. *haskinized*, ppr. *haskinizing*. [*Haskin*, the inventor of the process, + *-ize*.] To subject to the process of ★haskinization (which see).

hasp-hinge (hâsp′hinj), *n.* In *hardware*, a combined hinged plate and hasp used on trunks and boat and yacht fittings.

Hassall or **Hassall's bodies.** See ★*body*.

hassar (has′är), *n.* [S. Amer., perhaps ‹ Tupi *acara* in a form **açara*.] Same as ★*hardback*.

Hassler's map-projection. See *polyconic map-projection.*

hassocky (has′ǫk-i), *a.* [*hassock*[1] + *-y*[3].] 1. Full of thick clumps of coarse grass or sedge. See *hassock*[1], 1, and *hassock-grass.*—2. Of the nature of the soft calcareous sandstone which separates the beds of Kentish ragstone in England.

haste[1], *n.*—**To make haste.** (*b*) In *cricket,* to move quickly after the pitch: said of a ball.

hastifoliate (has-ti-fō′li-āt), *a.* Same as *hastifolious.*

hastingsite (hās′tingz-īt), *n.* [*Hastings* (see def.) + *-ite*[2].] A variety of amphibole from the nephelin-syenite of Dungannon, Hastings county, Ontario: its composition is analogous to that of garnet.

hat[1], *n.* 5. In *bot.*, the pileus or cap of a mushroom.—**Alpine hat.** See ★*alpine.*—**Bee-gum hat,** a silk hat. [Local, U. S.] *Dialect Notes,* II. vii.—**Black hat,** a fresh immigrant; a new-comer; a 'new chum.' [Slang, Australia.] *E. E. Morris,* Austral English.—**Cabbage-tree hat.** See ★*cabbage-tree.*—**Hat trick,** in *cricket,* the feat of a bowler who gets out three batsmen in three successive balls: so called because formerly it was rewarded by the present of a new hat.

It is the custom of many committees to give a sovereign to every professional who scores fifty runs, and money to those who perform the *hat trick* (i.e., take three wickets with consecutive balls). *Encyc. Brit.,* XXVII. 276.

Mackinaw hat, a very coarse straw hat. [U. S.]—**Old hat,** in Australian (Victorian) political slang, see the extract.

Mr. Frank Stephen was the author of the well-known epithet '*Old Hats,*' which was applied to the rank and file of Sir James M'Culloch's supporters. The phrase had its origin through Mr. Stephen's declaration at an election meeting that the electors ought to vote even for an old hat if it were put forward in support of the M'Culloch policy.

The Argus, May 1, 1895, quoted in E. E. Morris, Austral English.

Tamsui hat [named from *Tamsui,* a port and river in Formosa], a hat made of strips of the bleached leaves of *Pandanus tectorius,* a species of screw-pine growing everywhere in Formosa. It rivals the Panama hat in its resistance to weather and hard usage.

hat-camera (hat′kam″ē-rä), *n.* A detective camera that may be concealed in a hat.

hatch[1], *n.*—**Take care of the lee hatch,** an obsolete order to the helmsman which signified that he was not to steer to leeward of the compass course given him.

Hatch Act. See ★*act.*

hatch-beam (hach′bēm), *n.* An extra strong beam fitted across the deck of a vessel at the ends of a large hatch, to compensate for the reduction in strength caused by the opening.

hatch-boat, *n.* 2. A vessel of which the hatches extend fore and aft; a cargo-barge in which the deck is composed almost entirely of hatches.

hatch-coaming (hach′kō″ming), *n.* Same as *coaming.*

hatch-davit (hach′dav″it), *n.* A small portable davit overhanging a hatch, used for loading stores, ammunition, etc., below, by means of a whip, the block of which is hooked into an eye in the upper end of the davit.

hatchet-back (hach′et-bak), *n.* A large river-mussel, *Symphynota complanata,* having a wing-like projection on one edge of the shell, found in the Mississippi river. The shell is used for the manufacture of pearl buttons. Also called *hackle-back.*

hatchetman (hach′et-man), *n.* One who wields a hatchet, in any kind of work.

The fear of a highbinder outbreak in Chinatown grows as the activity of the dreaded *hatchetmen* is observed. *San Francisco Chronicle,* Nov. 14, 1894.

hatchettite (hach′et-īt), *n.* [*Hatchett* (see *hatchettin*) + *-ite*[2].] Same as *hatchettin.*

hatch-gate (hach′gāt), *n.* A gate to regulate the flow of water through a dam or dike or from a reservoir.

hatching-house (hach′ing-hous), *n.* A house in which fish-eggs are hatched.

hatching-pen (hach′ing-pen), *n.* A pen for drawing the fine lines used in shading mechanical drawings and making hatchings.

hatching-station (hach′ing-stā″shon), *n.* An establishment where fish-eggs are hatched.

hatchling (hach′ling), *n.* [*hatch*[2] + *-ling*[1].] A very young fish, usually artificially hatched and not old enough to take care of itself. The young in a fish-hatchery are so called during the period in which they are protected and given prepared food.

hatch-rings (hach′ringz), *n. pl.* Large iron rings in the corners of hatches used for lifting the hatches on and off.

hatch-tackle (hach′tak′l), *n.* A luff-tackle.

Hat-finishing lathe. See ★*lathe*[1].

hath (hăt), *n.* [Hind. *hāth,* a hand, also a measure of length, Prakrit *hattho,* < Skt. *hasta,* a hand.] A Hindu unit of length, equal to 18 inches.

hatherlite (hath′ėr-līt), *n.* [*Hatherley,* in the Transvaal, + *-ite*[2].] A syenite composed chiefly of soda-microcline (anorthoclase) with a little brown hornblende, green pyroxene, and biotite, found in the Transvaal. *Henderson,* 1898.

Hathor (hät′hor), *n.* [Also written *Athor, Hat-har* (Gr. *Ἀθυρί*), < Egypt. *Hāt-Hēr,* 'the house of Horus.'] In *Egypt. myth.*, a divinity, the female counterpart of Osiris, patroness of the cow: usually represented with the head and horns of a cow surmounted with the solar disk.

Hathoric (hat-hor′ik), *a.* In *Egypt. antiq.*, pertaining to the goddess Hathor; decorated with a face or head assumed to be an image of Hathor: as, a *Hathoric* capital or statue; a *Hathoric* column.

Hathoric Capital.

hat-maker (hat′mā″kėr), *n.* A maker of hats; a hatter.

hatoba (hä′tō-bä), *n.* [Jap.] A pier or wharf; a landing-place.

hat-palm (hat′päm), *n.* Any one of several species of palms the leaves of which are used for making hats, especially *Inodes causiarum, I. glauca, Thringis laxa,* and *T. latifrons* of Porto Rico, and *Thrinax argentea* of Panama.

hat-pin (hat′pin), *n.* A long metallic pin, often with a fancy head, used for fastening on a woman's hat.

hat-shag (hat′shag), *n.* A silk-plush fabric for hats.

hatting, *n.* 3. Working by one's self and without associates or helpers, specifically as practised in gold-mining in Australia; one who has everything 'under his own hat.' See *hatter*[1], 2. [Slang, Australia.]

hat-tree, *n.* 2. In Australia, one of the trees called sycamore, *Pœcilodermis lurida.* It yields a white, soft, easily split wood, occasionally used for shingles, and a strong bast fiber.

hat-wire (hat′wīr), *n.* A specially tempered wire used for hat-rims.

hau (hou), *n.* [Hawaiian.] The Hawaiian name of the mahoe, *Pariti tiliaceum,* which occurs in nearly all tropical countries and is abundant in all Pacific islands. It is generally planted near native habitations on account of its dense shade. For its various uses in Polynesia, see ★*balibago* and ★*fau,* 2. In Hawaii a decoction of the flowers is used as an emollient in bronchial and intestinal catarrhs.

hauchecornite (hōsh′kôr-nīt), *n.* [Named for W. *Hauchecorne.*] A sulphobismuthide of nickel, $Ni_7(S,Bi)_8$, occurring in tabular tetragonal crystals of metallic luster and bronze-yellow color.

hauhele (hou-hā′lā), *n.* [Hawaiian.] A native name of a tall shrub or small tree, *Hibiscus Arnottianus,* belonging to the mallow family. Also called *kokio-keokeo.*

haul, *v. t.*—**Hauling-down vacancy,** formerly in the British navy, a vacancy left on the (customary) promotion of the flag-lieutenant and senior midshipman on the conclusion of a cruise and the hauling down of the admiral's flag.—**Let go and haul,** a command, used in tacking a square-rigged vessel, signifying that the braces on one side of the ship are to be let go and the braces on the opposite side hauled on so as to reverse the bracing of the yards.—**To haul over,** to shift (something, as a sheet) across the deck.

haul, *n.* 5. The distance and route over which something is hauled.—**Haul of all** (*naut.*), the act of swinging all the yards at once.

haulabout (hâl′a-bout), *n.* A barge for coaling ships. It carries its own hoisting apparatus, derricks, etc., but has no propelling-engines.

Another type of coaling device which has proved highly successful is what is known as the "*haulabout.*" These *haulabouts* are plain steel hulls, similar to barges, with hatchways extending nearly across the vessel. Fitted to each *haulabout* are two self-contained Temperley traveling tower transporters, the beams of which have a very long over-reach on either side, and are sufficiently high to take coal from a large collier, and deliver it directly to the boat deck of the largest battleships or cruisers, if necessary. *Sci. Amer.,* July 23, 1904, p. 63.

haulage-way (hâl′āj-wā), *n.* A passage through which material is hauled or drawn.

Descending by means of an elevator into the depth of the soft-coal mine before mentioned, we find ourselves in front of a whitewashed *haulageway* which extends far into the distance. *Sci. Amer.,* May 23, 1903, p. 392.

haul-back (hâl′bak), *n.* In *lumbering,* a small wire rope, traveling between the donkey-engine and a pulley set near the logs which are to be dragged, used to return the cable. Also called *trip-line, pull-back,* and *back-line.*

hauling (hâ′ling), *n.* In growing sea-island cotton, the operation of drawing up to the foot of the plant, with the hoe, the loose dirt left by the plow.

This is called "*hauling,*" and by it the new bed is completed, the cotton is kept from "flagging" (falling down), and the grass is kept under. *U. S. Dept. Agr.,* The Cotton Plant, p. 230.

hauling-ground (hâ′ling-ground), *n.* The portion of the shores of the fur-seal islands which is occupied by the young male or bachelor seals: contrasted with *rookery,* the ground occupied by the breeding seals.

As this is a large *hauling-ground,* . . . on which fifteen or twenty thousand (seals) commonly rest. *Elliott,* Fur-Seal Islands of Alaska, p. 43.

hauling-line (hâ′ling-līn), *n.* *Naut.*, a small line lowered to the deck from a top or yard to be bent on to such articles as are needed for work which is going on aloft, as a maul, a marlinspike, or the like.

haul-up (hâl′up), *n.* In *lumbering,* a light chain and hook by which a horse may be hitched to a cable in order to move it where desired.

haunch-bone (hänch′bōn), *n.* The hip-bone, or os innominatum, which forms one side of the pelvis; also the ilium or the largest of the three bones composing each innominate bone.

The skeleton of the hip, or *haunch bone,* is called the os innominatum, and there is one such on each side in the adult man. *Mivart,* Elem. Anat., p. 177.

haunch-joint (hänch′joint), *n.* The hip-joint.

haunch-stone (hänch′stōn), *n.* In a stone arch, any stone placed at or near the haunches of the arch. See *haunch,* 5.

Haussmannize (hous′man-īz), *v. t.*; pret. and pp. *Haussmannized,* ppr. *Haussmannizing.* [*Haussmann* (see def.) + *-ize.*] To alter the appearance of (a city) by cutting long, straight avenues, building fine fronts upon these avenues, and setting up important buildings at either end, so that they will show from afar, as was done in Paris under the control of Baron Haussmann during the Second Empire.

As Louis XIV. set the fashion to palace-builders with Versailles so Haussmann, by the creation of a new Paris, excited to emulation the shapers of cities, and to "*Haussmannize*" has come to mean the substitution of monotonous avenues and rectilinear spaces for the crooked ways and irregular boundaries dear to the archæologist and the historian. *Encyc. Brit.,* XXIX. 235.

haustrum (hâs′trum), *n.*; pl. *haustra* (-trä). One of the small pockets or sac-like folds in the terminal division of the colon.

hautboy, *n.* 3. In *organ-building,* same as *oboe,* 2.

hautecontre (ōt-kontr′), *n.* [F., 'alto counter.'] The obsolete alto viol. See *viola da braccio.*

hautefeuillite (hōt-fė′i-yīt or hât-fū′i-līt), *n.* [Named for P. *Hautefeuille,* a French mineralogist.] A hydrated phosphate of magnesium which resembles bobierrite but differs in containing several per cent. of calcium: it is from Bamle, Norway.

haüynite (hä′win-īt), *n.* [*haüyne* + *-ite*[2].] Same as *haüyne.*

hav, *v.* A simplified spelling of *have.*

havers[3] (hā′vėrz), *n.* Same as *haver-grass.*

The wild oat-grass, or *havers,* Avena fatua L., is a weed of cornfields. *Fream,* Complete Grazier, p. 914.

Haversian fringes, system. See ★*fringe,* ★*system.*

haversine (hav′ėr-sīn), *n.* [*ha(lf) vers(ed) sine.*] In *navig.*, half the versed sine. The word was introduced by James Inman in the 1835 edition of his "Navigation."

havier (hav′yer), *n.* [Also *haver, haveer, hevior,* also *halfer;* origin uncertain.] A castrated fallow-deer.

A poll *havier* has no antlers, nor even the stumps, because he was added to the list in his infancy. *The Field,* March 7, 1891, p. 332.

haw[2], *n.*—**Black haw.** (*a*) See ★*black-haw,* 1 and 2. (*b*) *Crataegus tomentosa,* the pear-haw, and sometimes *C. Douglasii,* the Western haw.—**Dotted haw,** *Crataegus punctata,* a species of the more northern United States east of the Mississippi, with obovate leaves and white-dotted fruit. Sometimes called *large-fruited thorn.*—**May-haw.** See ★*May-haw.*—**Purple haw.** Same as *bluewood* and *logwood,* 3.—**Red haw,** the scarlet haw or

scarlet-fruited thorn, *Cratægus coccinea;* also other red-fruited species, especially *C. mollis, C. Crus-galli, C. cordata,* and *C. viridis.*— **Scarlet haw,** *Cratægus coccinea,* a species, as now understood, ranging from Newfoundland to Connecticut and through the St. Lawrence valley to western Quebec.— **Summer haw.** (*a*) See *haw*[2], 3. (*b*) Same as ★*May-haw.*— **Tree-haw,** *Cratægus viridis,* a species with nearly the distribution of the May-haw, largest (sometimes 35 feet high) in western Louisiana and eastern Texas, where it often forms large thickets. The foliage is extremely brilliant in autumn. Also *red haw.*— **Washington haw.** Same as *Washington thorn* (which see, under *thorn*[1]).— **Western haw,** *Cratægus Douglasii,* of the northwestern United States and British Columbia, a tree 30 or 40 feet high. Most often called *thorn-apple;* also *black thorn,* etc.

haw[3], *n.* 2. (*b*) The inner eyelid or nictitating membrane of dogs: usually concealed, but noticeable in the bloodhound.

Hawaiian subregion. See ★*subregion.*

hawberk, *n.* See *hauberk.*

hawk[1], *n.* 3. A double-hooked instrument for drawing or moving about the cloth in the dyeing-liquor of a hawking-machine.— **Cooper's**

Cooper's Hawk (*Accipiter cooperi*).

hawk, *Accipiter cooperi,* a small but strong and active hawk, abundant in North America south of the Canadian boundary: more destructive to chickens and young poultry than any other species. It is bluish gray above, and white, barred with rufous below, and about 18 inches long and 30 in spread of wings.— **Harris's hawk,** *Parabuteo unicinctus harrisi,* a rather large species, found in the southern and western United States. It has dark plumage and the tail is black with a white band at base and one at the tip.— **Red-**

Red-shouldered Hawk (*Buteo lineatus*).

shouldered hawk, *Buteo lineatus,* a common species of the eastern United States, of a dark reddish brown above and rather rusty colored below: length about 18 inches: spread of wing about 42 inches. It is one of the most omnivorous of hawks, eating frogs, fish, insects, and small mammals.— **Swainson's hawk,** *Buteo swainsoni,* a western species, about 20 inches long and 48 in spread of wing: usually distinguished easily by its rufous breast-band, which contrasts sharply with the white plumage of the under side.— **Tarantula-hawk.** See ★*tarantula-hawk.*

hawk[1], *v.* **II.** *trans.* To draw or to pull with a hawk, as cloth through the dye-vat of a hawking-machine.

hawk-cuckoo (hâk′kŭk″ö), *n.* Any one of six species of cuckoos of the genus *Hierococcyx* which resemble small hawks in appearance and flight. They are gray above, more or less rufous below, and have a banded tail and large yellow eye. All are Asiatic.

hawking-machine (hâ′king-ma-shēn″), *n.* A cloth-dyeing machine constructed with guide-rollers designed to keep the goods covered by the dye-liquor and protected from the air.

hawk's-eye, *n.* 2. The dark-blue variety of crocidolite found in South Africa: when cut in a rounded form and showing the cat's-eye effect, it is known as *hawk's-eye stone.*

hawkweed, *n.*— **Mouse-ear hawkweed.** Same as *mouse-ear,* 1. This plant is adventive in Ontario and in adjacent parts of the United States.— **Orange** or **tawny hawkweed.** Same as *golden mouse-ear* (which see, under *mouse-ear*). The orange hawkweed has become established in parts of Canada and the Eastern and Middle States, and is a bad weed in grass-lands. Called also *red daisy, lady's-paintbrush,* and *devil's-paintbrush,* the latter names probably both referring to the peculiar strong coloring of the heads, the last also to the noxious character of the plant. Compare *king-devil.* See cut under ★*devil's-paintbrush.*

hawok (hä′wok), *n.* [Southern Maidu (in central California).] Shell money of the Californian Indians, consisting of circular disks of *Pachyderma crassatelloides* from a quarter of an inch to an inch in diameter and perforated in the center for stringing.

hawse[1], *n.*— **In the hawse,** a short distance in advance of the cutwater.— **To have a bold hawse,** said of a vessel when its hawse-holes are high above the water.

hawse[3], *n.* 2. A ridge or neck (generally at the head of two oppositely-descending stream-valleys) which connects two higher ridges or summits, as on the Scottish border and in the Lake district of the North of England. [Local.] *N. E. D.*

hawse-boxing (hâz′bok″sing), *n.* An old-fashioned method in ship-building by which a projection equal to the thickness of the inner and outer planking was left upon the hawse-timbers in the wake of the hawse-poles. Against this projection the planking butted.

hawse-fallen (hâz′fâ″ln), *p. a.* In the phrase *to ride hawse-fallen,* said of a vessel when it is at anchor and the water which reaches the decks through the hawse-pipes is heavy in volume.

hawse-full (hâz′fûl), *adv.* See *to* ★*ride hawse-full.*

hawse-jackass (hâz′jak″às), *n.* A canvas bag shaped like a cornucopia, stuffed with oakum and thrust into the hawse-pipes when at sea to prevent the waves from flowing inboard as they break against a vessel's bows.

hawse-laid (hâz′lād), *a. Naut.,* same as *hawser-laid.*

hawser-bend (hâ′zėr-bend), *n.* A bend for joining two hawsers. It is customary to make a bowline in each hawser, so that the bight of one will pass through the bight of the other, or to make a carrick-bend (which see).

Hawthorn beds. See *bed*[1].— **Hawthorn decoration,** a characteristic style of ornamentation on Chinese porcelain, having a blue, black, green, or red ground. See *hawthorn china,* under *hawthorn.*— **Hawthorn lace-bug.** See ★*lace-bug.*— **Indian** or **East Indian hawthorn,** a hardy, ornamental, evergreen shrub of the apple family, *Raphiolepis Indica.* It is a native of southern China and is often cultivated in European gardens.

hawthorn-gooseberry (hâ′thôrn-gös″ber-i), *n.* See ★*gooseberry.*

Chinese Porcelain Jar with Hawthorn Decoration. In the Pennsylvania Museum, Philadelphia.

hay[1], *n.*— **Sour hay,** a form of silage long produced in Austria and Hungary by filling green fodder tightly into pits, either lined or not, and covering with a layer of earth. The resulting fermentation renders the mass acid and imparts a deep brown color, whence the name *brown hay.* In England sometimes *pitted hay,* and, fancifully, *potted hay.*

It gives as its product what is known all over the Austrian Empire as *sour hay.*

J. Wrightson, Fallow and Fodder Crops, p. 246.

haya[2] (hä′yä), *n.* [Jap.] A fish, *Pseudorasbora parva,* of the family *Cyprinidæ,* found in the waters of Japan. Also known as *moroko.*

hay-carrier (hā′kar″i-ėr), *n.* Same as ★*hay-elevator.*

haye (hä′ye), *n.* [Also *hae;* Jap. *haye,* splendor.] A Japanese name for small shiners or minnows of the family *Cyprinidæ,* belonging to the genus *Zacco,* found in the waters of Japan. Also known as *oikawa* and *zako.*

hay-elevator, *n.* These machines, commonly called *hay-carriers,* are used to lift, transport, and deliver hay, straw, corn-stalks, or other material in bulk or in bales. The simplest forms are hay-stackers, which employ a derrick or a cableway, supported by struts, on which a trolley carrier may run. Both employ a mechanical hay-fork or sling for gathering the hay from a wagon and delivering it to a stack or to the cableway, on which it travels to any part of a large and long stack. Those used in barns employ lifting appliances and carriers traveling upon fixed tracks suspended from the roof of the barn. They are usually automatic, and gather the hay from the wagon, elevate it, transport and deliver it, and return for the next load with only slight attention from the operator. See ★*hay-fork* and *stacker*[2].

hay-fork, *n.* Hay-forks used with hay-carriers are made in the form of spears or harpoons, or of hinged grappling-irons resembling a clam-shell dredge. The harpoons are single or double and are provided with barbs which, when the shaft is thrust into the hay, can be thrown out to gather and lift a large bunch of it. The grappling-forks are opened and dropped upon the hay, when a pull upon a cord draws the tines together, gathering and lifting the hay.

hayko (hī′kō), *n.* A Russian name applied in Alaska to the dog- or calico-salmon, *Oncorhynchus keta.*

hay-loader, *n.* A hay-loader of the modern type consists essentially of a broad inclined elevator supported on a pair of wheels, and designed to be attached to the rear end of a hay-wagon; some form of raking or gathering device for collecting the hay from the ground or from windrows; and a conveyer for carrying the hay, as fast as gathered, up to the elevator and stacking it on the wagon. The forward movement of the wagon causes the wheels of the loader to communicate motion, by means of belts, to some form of revolving or reciprocating hay-rake and some form of conveyer that lifts the loose hay gathered by the rakes and deposits it on the wagon. Such machines have largely superseded hand labor in gathering the hay crop.

haymaking (hā′mā″king), *n.* The mowing, curing, and housing of the haycrops; haying.

hayo (hī′yō), *n.* [Native name.] In Venezuela, any one of several species of *Erythroxylum,* the leaves of one of which, *E. Coca,* are known as coca-leaves and yield the alkaloid cocaïne.

hay-rigging (hā′rig″ing), *n.* A temporary wooden framework placed in a wagon to increase its capacity for light loads, such as hay or seaweed; also, a cheap form of farm-wagon having flaring stakes at the sides, used to carry hay.

hay-rope (hā′rōp), *n.* In *foundry-work,* a rope form of tightly twisted hay or dried prairie-grass, used in making cores.

hay-scales (hā′skālz), *n. pl.* Public weighing-scales maintained by a town for general use, as in weighing loads of hay.

haysel (hā′sel), *n.* The haying or haymaking time. [Local, Eng.]

hay-spade (hā′spād), *n.* A hay-knife (which see).

hay-stacker (hā′stak″ėr), *n.* A hay-elevator specially designed for placing hay in stacks out of doors. See ★*hay-elevator.*

hay-sweep (hā′swēp), *n.* A large hand hay-rake. [Local.]

hay-tosser (hā′tos″ėr), *n.* A machine for tossing hay in the process of drying it.

hay-worm (hā′wėrm), *n.* A caterpillar which feeds on hay, as the clover-hay worm (larva of *Hypsopygia costalis*), which see, under *clover.*

hazard, *n.* 8. In *golf,* a bunker, water, path, road, railway, fence, or ditch.— **Hazard chase** or **opening,** in *golf,* a small opening in a hazard or bunker to allow passage for the players.

haze[1], *n.*— **Aqueous haze,** a hazy or misty appearance of the atmosphere due to the presence of particles of water. When the particles are the smallest possible, this haze has a delicate blue tint, but when they are larger a whitish tint. A haze due to dry dust is usually yellowish or reddish. See *water-haze,* under *haze*[1].

hazel[1], *n.* 2. The wood of the sweet-gum, *Liquidambar Styraciflua:* a common use of the word among lumbermen and builders of the eastern United States.— 3. In Australia, either of two small evergreen trees of the buckthorn family, *Pomaderris apetala* and *P. lanigera,* yielding excellent wood. See *bastard* ★*dogwood* (*b*), *cooper's-wood,* and *Pomaderris.*— **Black-knot of hazel.** See ★*black-knot.*— **Snapping hazel,** the witch-hazel: so called from the elastic bursting of the ripe capsule by which its bony seeds are projected.

hazel[2] (hā′zl), *n.* [Short for *hazel-earth.*] A soil consisting of a mixture of gravel or sand, clay, and loam.

hazel-carpet (hā′zl-kär″pet), *n.* See ★*carpet,* 4.

hazel-dodder (hā′zl-dod″ėr), *n.* See ★*dodder*[1].

hazel-fly (hā′zl-flī), *n.* A British anglers' name for a scarabæid beetle, *Phyllopertha horticola,* and for an artificial one made in imitation of it.

hazeline (hā′zl-in), *n.* [*hazel*[1] + *-ine*[2].] A trade-name of a toilet preparation said to be distilled from the fresh leaves and twigs of witch-hazel, *Hamamelis Virginiana.*

hazelly[2] (hā′zl-i), *a.* [*hazel*[2] + *-y*[1].] Consisting of hazel-earth: as, *hazelly* loam. *N. E. D.*

hazelnut, *n.*— **Chinese hazelnut,** the lichi, *Litchi Chinensis.* See *lichi.*

hazel-worm (hā′zl-wėrm), *n.* [A translation of German *haselwurm.*] The blindworm, or slow-worm, *Anguis fragilis.*

hazzan, chazzan (ċhä′zän), *n.* [Heb. *hazzan*, Aram. *ḥazzana*, prob. < Assyr. *ḥazanu, ḥazannu*, overseer, director.] In Jewish use, an overseer; specifically, an official of a Jewish synagogue. Formerly the functions of the hazzan were various: he was not only overseer but also *dayan* (judge), *saphra* (scribe), etc. The chief function of the modern hazzan is that of reader or cantor.

Hb. A contraction of *hemoglobin.*

H-bar (āch′bär), *n.* A bar with an H section.

H. B. Curves. Curves exhibiting the variation of magnetic induction (B) with the magnetizing force (H).

H. C. An abbreviation (*b*) of *Heralds' College.*

H. C. M. An abbreviation of *His* (or *Her*) *Catholic Majesty.*

he[3] (hā), *n.* [Heb. *hē.*] The fifth letter (ה) of the Hebrew alphabet, corresponding to the English *h.* Its numerical value is 5.

He. The chemical symbol of *helium.*

H. E. An abbreviation (*a*) of *His Eminence;* (*b*) of *His* (or *Her*) *Excellency;* (*c*) of *Hydraulic Engineer.*

h. e. An abbreviation (*a*) of the Latin *hic est*, 'he is'; (*b*) of the Latin *hoc est*, 'this is.'

head. **I.** *n.*, **6.** (*m*) (2) A rubble-drift capping a cliff, on the coast of Devon and Cornwall.

This '*head*' consists of a more or less coarse agglomeration of angular débris and large blocks set in an earthy matrix. *J. Geikie*, The Great Ice Age, p. 389.

(*u*) In a bow for instruments of the viol class, properly the end farthest from the player's hand; the point: opposed to *heel* or *nut.* Sometimes, however, the term is loosely applied to the projecting piece at the heel. (*v*) The flexible shank attached to a molded button; a tuft of cloth protruding from the back of a button, by which it may be attached. (*w*) A rotating piece on a machine which carries cutting-knives, as on a wood-planing machine. (*x*) The ram in a quartz-crushing machine. [Mining term, Australia.] (*y*) In *archery*, an arrow-head. (*z*) All the lower part of a golf-club to which the shaft is connected. (*aa*) The upper, or proximal end of a long bone, which has a rounded articular surface, suggesting the head of a man.

The upper end of the humerus shows a large, rounded *head.* *Mivart*, Elem. Anat., p. 148.

(*bb*) The upper, or proximal end of a muscle where it is attached to a bone, and whence its pull is transmitted to another bone.

The biceps is the well-known muscle used in flexing the arm. It arises by two *heads.* *Mivart*, Elem. Anat., p. 293.

(*cc*) The upright timber of a gate which forms the front or swinging end.

7. (*b*) Specifically, the vertical height of the surface of a liquid in a reservoir above the center of figure of an orifice through which efflux takes place. When a liquid flows from a closed vessel under pressure mechanically produced, as by the action of a piston, the pressure at the orifice is always equivalent to that which would be caused by a vertical column of the liquid of requisite height and this height measures the *virtual head.* (*c*) A unit for estimating amounts of water used in irrigation — the amount flowing through an opening 33⅓ inches wide and 3 inches high under a pressure of 4 inches. *U. S. Dept. Agr.*, Div. of Veg. Pathol., Bulletin 2, 1892, p. 85. —**16.** In *astrol.*, the commencement of a zodiacal sign, that is, the point where the sun enters it. *N. E. D.*—**17.** A quarrymen's term for that direction in a massive crystalline rock along which fracture is produced with the greatest difficulty.—**18.** A local name in southern England for the residual products from the weathering of rocks, more or less sorted by the rains. *Geikie*, Text-book of Geol., p. 460. —**19.** In *textile-manuf.*, a section in a machine with completely independent functions, as in a drawing-frame, combing-machine, ribbon lap-machine, etc. *Thornley*, Cotton Combing Machines, p. 20.—**Effective head,** the head or pressure actually available for doing work; the net head; the static head minus the head lost in imparting velocity and overcoming friction and other losses before reaching the point where the force is applied to the motor.—**Head of a ship,** the extreme forward section of a vessel, from the knight-heads forward, including the figure- or scroll-head.—**Head on.** (*b*) The situation of a vessel when her head is held dead against the sea and wind. (*c*) Resulting from the sudden impact of two trains meeting directly on the same track: as, a *head on* collision.—**Heads and posts,** a cavalry exercise consisting in thrusting and cutting at leather heads placed on posts. *Encyc. Brit.*, XXVI. 156.—**Head to tide,** the position of a ship when its head is pointing dead against the tide-stream.—**Hydrostatic head,** the pressure due to a column of water when at rest.—**Knee of the head.** See ★*knee.*—**Railway head,** an attachment to several carding-machines for drawing and evening the card-sliver for the subsequent process.—**Rain-water head,** a center of a rain-water supply, such as is provided by the large continuous roofs of a public building.

A very large field is also opening for cast-lead work, whether associated with architecture, as in the leaden-covered way over Northumberland Street, in London . . . and the fine *rain-water heads* of the Birmingham Law Courts. *Encyc. Brit.*, XXX. 645.

Seamen's head (*naval*), the crew's water-closets, usually placed in the bows of the ship.—**Static head,** the pressure due to a column of liquid of a given height when such liquid is at rest.—**To pump by heads.** See ★*pump.*—**Universal head,** a device with jaws adapted for holding a variety of work: used on the spindle of a lathe or milling-machine.—**Velocity head,** in *hydraul.*, the effective head at the orifice of efflux of a tube through which a liquid flows; the head which, if there were no friction or other resistance to flow, would produce the existing velocity of the liquid. If the velocity of efflux be v, which corresponds to a head of liquid, $hv = \frac{v^2}{2g}$, then hv is called the *velocity head.*

II. *a.*— **Head tide.** See ★*tide*[1].

head, *v.* **I.** *trans.*—**Heading-up machine,** in *barrel-making*, a machine for placing the head in a new barrel, forcing it into the croze and holding it there while one or more hoops are put on, and making it ready for the hoop-driver.—**To head a trick,** to play a better card than any already played to a trick, but not necessarily the best card.—**To head back,** in *hort.*, to shorten or cut off the shoots of (plants); head in.—**To head in,** in *hort.*, to reduce in length or shorten (the shoots and twigs of plants). —**To head off.** (*c*) To direct (a vessel's head) from the course; to allow (a ship) to diverge suddenly from the compass direction which it has been pursuing.—**To head up,** to bring (a ship's head) more in line with the wind or with an object.

II. *intrans.* **5.** Said of the wind when it changes so as to get more in line with the direction that a ship desires to head, or when it draws more ahead of a ship.—**6.** In *geol.*, to slope upward when viewed from below: said of inclined strata; the same as *dip*, 4, but the beds are seen from the opposite direction. —**To head up,** said of a vessel when it 'looks up' closer to the wind.

headache, *n.*—**Bilious headache.** Same as *sick-headache.*—**Organic headache,** a headache due to actual disease of the brain or of the meninges.—**Reflex headache,** a headache due to eye-strain, nasal disorder, indigestion, or some other cause outside of the brain or its membranes. See def. 1 (*c*).

head-ax (hed′aks), *n.* In *whaling*, an ax used for decapitating a whale, when cutting in.

head-bander (hed′ban″dėr), *n.* A person who fastens on the head-bands of books. *N. E. D.*

head-block, *n.* **3.** In a railroad switch, the timber on which the switch-stand and the ends of the switch-rails rest.—**4.** The pivoted casting at the top of the mast of a derrick, to which the guy-ropes, tackle-blocks, etc., are fastened. —**5.** The log placed under the front end of the skids in a skidway, to raise them to the desired height.

head-bolt (hed′bōlt), *n.* A bolt having a head by which it can be turned.

head-clip (hed′klip), *n.* An adjustable clip, usually of metal, for steadying the head: used in photography and in certain psychophysical experiments.

head-cone (hed′kōn), *n.* A cephalocone.

head-course (hed′kōrs), *n.* Same as *heading-course.*

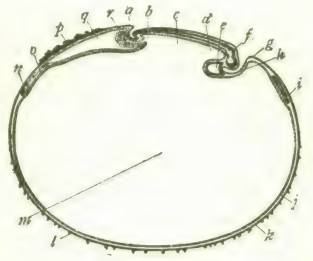
head-cowl (hed′koul), *n.* In certain pteropods, one of the two coverings of the head which inclose and protect the cephalocones.

header, *n.* **10.** A connection at the ends of the tubes in a water-tube boiler. The water usually descends in one header and steam rises in another, thus keeping the current of water and steam flowing in one direction and promoting good circulation.

Instead of having two *headers*, as is the case with the latter type, the Niclausse has only one *header*, which is divided so as to allow for both the upward and downward flows. *Sci. Amer. Sup.*, Jan. 24, 1903, p. 22624.

11. In a floor or roof, the timber used for framing round an opening. It is supported by two trimmers, one at either end, and, in its turn, supports the ends of the two tail-beams. —**12.** A horse used in helping to haul heavily-laden vehicles up heavy grades.—**13.** In *cigar-making*, a workman who shapes or finishes the head or mouth-end of a cigar; also, an appliance used for the same purpose.

header-binder (hed′ėr-bīn″dėr), *n.* A form of header in which the heads are delivered to a binder.



head-fold (hed′fōld), *n.* In *embryol.*, a fold of the amnion covering the head of the vertebrate embryo; also, a fold in the blastodisc which marks off the head-region of the embryo. See cut in next column.

head-footed (hed′fůt″ed), *a.* Having the feet or locomotor organs attached to the head-region, as in cephalopods; cephalopodous.

head-gear, *n.* **4.** The head-rigging of a vessel.

head-gland (hed′gland), *n.* In many nemertines, one of the collections of gland-cells which lie in the head and open at the tip of the latter

in a disk-shaped group of cells bearing long hairs or bristles. It may function as an organ of taste. Also known as *frontal gland.* *Proc. Zool. Soc. London*, 1901, II. 95.

g, Head-fold.

A median longitudinal, or sagittal, section through a rabbit embryo and blastodermic vesicle at the end of the ninth day. (In part after Van Beneden and Julin.)

a, tail-fold of amnion; *b* hind-gut; *c*, mid-gut; *d*, fore-gut; *e*, pericardial cavity; *f*, mid-brain; *g*, head-fold of amnion; *h*, pro-amnion; *i*, sinus terminalis; *j*, hypoblast; *k*, epiblast; *l*, epiblastic villi; *m*, cavity of yolk-sac, or blastodermic vesicle; *n*, sinus terminalis; *o*, mesoblast; *p*, thickened epiblast by which the blastodermic vesicle is attached to the uterus; *q*, extra-embryonic part of the cœloma or body-cavity; *r*, allantois. (From Marshall's "Vertebrate Embryology.")

head-hole (hed′hōl), *n.* One of the eyelet-holes in the head of a sail by which it is secured to a yard or gaff by robands which are passed through the holes and the jack-stay, or by a lacing.

head-house, *n.* **2.** In *railroading*, the end of a terminal station; that part of a terminal station building which contains the ticket-offices, waiting-rooms, and concourse, and forms the front or entrance to the train-shed. It is usually much higher than the train-shed, the upper stories being used as offices for the company, and the main floor connecting with the tracks and platforms and serving as the entrance and exit for the outgoing and arriving passengers. *Sci. Amer.*, Jan. 14, 1899, p.

heading-chipper (hed′ing-chip″ėr), *n.* A pneumatic chipping-hammer used for heading rivets or boiler-tubes.

head-kidney, *n.* **2.** The primitive kidney of annelid worms. *Parker and Haswell*, Zoology, I. 416.

head-lacing (hed′lā″sing), *n.* The lacing which confines the head of a fore-and-aft sail to the gaff.

head-lifting (hed′lif″ting), *n.* A method of divination, practised by the Eskimo and by the Chukchee, in which the future is divined by tying a thong around the head of a reclining person. A second person tries to lift the head of the first by this thong, and his questions as to the future are answered in the affirmative if the head can be lifted, in the negative if it cannot be lifted. Similar forms of divination by lifting stones and charms are found as far south as the Amur river.

Head-lifting is one of the chief divining methods, not less among the Chuckchee than among the American Eskimo. *Amer. Anthropologist*, 1902, p. 635.

Headlight oil. See ★*oil.*

head-line, *n.* **3.** One of the lines in the title of a newspaper article, printed in large type to attract attention.—**4.** Same as *head-fast.*

headline (hed′līn), *v. t.*; pret. and pp. *headlined*, ppr. *headlining.* To announce, refer to, or mention in the large print of newspaper head-lines; give prominence to in head-lines.

My job is private secretary to the President of this Republic, and my duties are running it. I'm not *headlined* in the bills, but I'm the mustard in the salad dressing. *McClure's Mag.*, Feb., 1903, p. 431.

head-mark, *n.* **2.** An unplowed ridge of land left to serve as a boundary; a balk.

head-motion (hed′mō″shon), *n.* A mechanism at the end of a fancy cassimere-loom or dobby-loom embracing the pattern-chains for operating the warp-harnesses and shuttle-boxes.

head-note, *n.* **2.** See *head-tone* and *head-voice.*

Headon beds. See ★*bed*[1].

Headon Hill sands. See ★*sand*[1].

head-pence (hed′pens), *n. pl.* [See *head-penny.*] A tax of forty shillings or more formerly collected from the people of the county of Northumberland by the sheriff twice in every seven years. The sheriff was not accountable to the king for this tax. It was abolished in the reign of Henry VI.

head-piece, *n.* **4.** The figurehead, scroll-piece, or fiddle-head under a vessel's bowsprit.

head-rigging (hed′rig″ing), *n.* The rigging belonging to the foremast, bowsprit, and jib-booms.

head-ring, *n.* 2. In a four-in-hand harness, a ring, fixed at the crown of the bridle of a wheel-horse, through which the lead-rein for one of the leaders passes.

head-room (hed′röm), *n.* 1. The vertical distance from a floor to the ceiling or beams above it: so named because this distance determines whether or not a person has room for his head when standing or walking on the floor.—2. Specifically, the space left above a stair by means of which the head of the person ascending the stair is kept free from striking or coming too near the superstructure. The term may apply either to the vertical distance from the nosing of the step below to the ceiling or any cross-beam or the like above, or to the distance measured out diagonally from the nosing of a step.

head-scab (hed′skab), *n.* Any acariasis of the head, as the sarcoptic scab (black-muzzle head-scab) of sheep. The parasites give rise to a violent itching, causing the sheep to rub and scratch their heads: in advanced cases the eyes may be partly closed, and breathing and even eating may become difficult because of the formation of crusts about the mouth and nostrils.

head-shaping (hed′shā″ping), *n.* The practice of changing the natural conformation of the head by compression: common among many uncivilized tribes and peoples.

Head-shaping has been universal.
Smithsonian Rep., 1899, p. 516.

head-sill, *n.* 2. In a wooden window-frame or door-frame, the horizontal strip or piece which forms the top and holds the sides together.

head-snapping (hed′snap″ing), *n.* Same as *head-hunting*. *Ratzel* (trans.), Hist. of Mankind, I. 447.

head-spanner (hed′span″ėr), *n.* In *anthrop.*, an instrument for measuring the dimensions of the head.

In order to confine the cost of the inquiry within reasonable bounds, a special *head-spanner* was devised.
K. Pearson, in Biometrika, March-July, 1904, p. 134.

head-stock, *n.*, 1. (*d*) The central frame of a spinning-mule, containing the operative mechanism of the machine. *Nasmith*, Cotton Spinning, p. 244.—2. The wooden cross-beam to which a bell is bolted and which serves as the pivot on which it swings. Also called *stock*.

head-wall (hed′wâl), *n.* See *head*.

head-water (hed′wâ″tėr), *n.* One of the upper tributaries of a river: usually in the plural. Also used adjectively.

The *headwater* tributaries of Gila river drain the slopes of several ranges of the Mogollon mountains.
Dept. Com. and Labor, Bur. of Census, Bulletin 16, [Irrig. in U. S., 1902, p. 70.

Head-water mark, a point or mark to define or limit the maximum permissible height of water above a dam, or in a pond, reservoir, or waterway subject to artificial regulation.

headway, *n.* 4. In *railroading*, the time which elapses after one train passes a certain point before the following train passes that point.

head-work, *n.* 3. *pl.* The group of artificial works or constructions at the head of an artificial canal or channel necessary to divert and regulate the flow of water from a river or other body of water into the canal. For an irrigating canal, the head-works would include a diversion weir, if any, with its accessories, a guard-boom to divert floating objects away from the canal-gates, head-gates or sluices to regulate the admission of water to the canal, and gaging or measuring appliances for determining the quantity of water entering the canal. For a water-power canal extending from a stream, reservoir, or mill-pond to a water-power station, the head-works would include a dam to divert or raise the level of the water, a guard-boom to divert large floating objects away from the entrance, a rack or screen to prevent the entrance of smaller floating material, and sluice-gates to regulate the flow of water into the canal.

Headworks can be placed more easily along the banks of smaller streams, or dams built across their beds, raising and controlling the waters.
Sci. Amer. Sup., Jan. 10, 1903, p. 22597.

4. *pl.* A platform or raft with windlass or capstan which is attached to the front of a log-raft or boom of logs for warping, kedging, or winding it through lakes and still water, by hand or horse-power.

heady, *a.* 4. Intelligent.

health, *n.*—**Diploma in Public Health.** See ★*diploma*.

heapstead (hēp′sted), *n.* The entire plant above ground at the shaft of a coal-mine.

hearst† (hėrst), *n.* [Also *hearse;* origin obscure.] In *hunting*, a hind in the second or third year.

heart, *n.*—**Accessory hearts,** certain organs in brachiopods erroneously supposed to function as hearts.—**After one's own heart.** See ★*after*.—**Athletic heart.** See ★*athletic*.—**Fatty heart.** (*a*) Fatty degeneration or infiltration of the wall of the heart. (*b*) An excessive deposit of fat around the heart.—**Heart and soul,** entirely; wholly; unreservedly; with eager enthusiasm; enthusiastically: as, he threw himself *heart and soul* into the work.—**Iced heart.** See ★*iced*.—**Irritable heart,** a functional disorder of the heart marked by rapid pulsations or palpitation, cardiac pain, shortness of breath, etc., on slight exertion or following mental excitement.—**Left heart,** the left auricle and ventricle of the heart taken collectively as the center of the systemic circulation.—**Military heart,** irritable heart in soldiers.—**Pulmonary heart.** Same as *right* ★*heart*.—**Respiratory heart,** the right auricle and ventricle, which receive the blood from the system and send it to the lungs. [Rare.]—**Right heart,** the right auricle and ventricle of the heart taken collectively as the center of the pulmonary circulation.—**Sweepstake hearts,** a form of the game of hearts in which the player who takes no hearts wins everything on the table.—**Systemic heart,** the left auricle and ventricle considered together as furnishing the blood to the body generally. [Rare.]—**To lose heart,** to become discouraged. **Wandering heart,** an abnormally mobile heart.

heart-block[2] (härt′blok), *n.* Contraction of the auricles of the heart which is not transmitted to the ventricles, the auricular pulsations being sometimes of more than double the frequency of the ventricular.

Stokes noted on the readmission of his patient a new symptom—a remarkable pulsation in the right jugular vein, more than double the rate of the ventricular contractions. This feature has been studied by Chauveau, by Quincke, by His, jun., and others, who are of opinion that the jugular pulsations correspond to independent auricular contractions which are not propagated to the ventricles—a state of "*heart-block*," as Gaskell terms it.
Lancet, Aug. 22, 1903, p. 523.

heart-borer (härt′bōr-ėr), *n.* An American noctuid moth, *Anarta cordigera*, found in Canada, Labrador, and Colorado.

hearth-bottom (härth′bot″um), *n.* The stone which forms the bottom of the hearth in a blast-furnace.

hearth-broom (härth′bröm), *n.* A small broom used about a fireplace for sweeping up ashes, cinders, etc.

hearth-brush (härth′brush), *n.* A small brush used to sweep up ashes, etc., on a hearth.

hearth-pit (härth′pit), *n.* A pit under the floor in front of a Lancashire boiler.

hearth-plate, *n.* 2. One of the floor-plates over the hearth-pit of a Lancashire boiler.

heart-hurry (härt′hur″i), *n.* Extreme rapidity of pulse, appearing suddenly and of short duration: a form of tachycardia.

There are certain peculiarities which distinguish true tachycardia from the evanescent "*heart-hurry*" so frequently produced by the most trivial causes.
Med. Record, Feb. 7, 1903, p. 204.

hearting, *n.* 2. (*a*) The interior portion of a mass of masonry, as the portion between the up-stream and down-stream faces of a masonry dam. Commonly called the *backing*. (*b*) The impervious vertical wall of masonry, concrete, or even clay puddle which is placed inside an earth embankment which forms a dam or a reservoir bank, for the purpose of preventing leakage through the embankment. Commonly called *core-wall* if of masonry or concrete, and *puddle-wall* if of clay.

The tower is constructed with a facing of granite, all the stones being dovetailed in the usual manner. The *hearting* of the base is largely composed of concrete.
Encyc. Brit., XXX. 254.

heart-moth (härt′môth), *n.* A British collectors' name for a European noctuid moth, *Dicycla oo*.

heart-rot, *n.* 2. A fungous disease of beets, due to *Phoma Betæ*, which causes a decay of the center of the root.

heart-sac (härt′sak), *n.* The pericardium.

heart's-ease, *n.*, 2. (*c*) In Australia, a small scrophulariaceous plant, *Gratiola pedunculata*.

heart-sounds (härt′sounds), *n. pl.* The sounds caused by closure of the valves of the heart during contraction and relaxation of the muscular walls. The first sound is prolonged and dull, the second short and sharp.—**Reduplication of the heart-sounds,** a double in place of a single first or second heart-sound, due to a lack of synchronism in the closure of the valves.

heart-stroke (härt′strōk), *n.* 1. The impulse of the apex of the heart against the chest wall.—2. Angina pectoris.

heart-trace (härt′trās), *n.* Same as *cardiogram*.

heart-trowel (härt′trou″el), *n.* A moulders' trowel having a heart-shaped outline.

heart-water (härt′wâ″tėr), *n.* A serious, non-contagious, infectious disease of sheep and goats, rarely of calves, in South Africa. The diagnosis depends chiefly upon the post-mortem appearance of the viscera, the distinctive features of the disease being only feebly or not at all evident, until the animal is very near death. The specific cause (doubtless a micro-organism) is unknown. Transmission is by means of the 'bont-tick' (*Amblyomma hebræum*), which sucks blood from the diseased animal, then falls to the ground to moult, and after moulting attacks other sheep or goats and infects them with the disease.

The Government entomologist, Mr. C. P. Lounsbury, records an important discovery in regard to the propagation of the South African sheep and goat disease known as "*heartwater*." The bont-tick has been found to be the only medium of spreading the disease.
Nature, Nov. 26, 1903, p. 91.

heart-wood, *n.* 2. The Tasmanian ironwood, *Notelæa ligustrina*, the hard, close-grained wood of which is used for turning.

heart-work (härt′wėrk), *n.* Work that has been prompted by the heart, or executed with all one's heart.

With all the head-work that there is in these volumes, and all the *heart-work*, too, I have not bitten my nails over a single sentence which they contain.
Southey, Doctor, lviii.

heat, *n.* 9. The quantity or weight of metal undergoing a metallurgical process. See *heat*, 4.—**Blue heat,** in *forging*, the temperature of the heated metal which gives to the film of oxid which forms on a bright surface of a steel bar a color which is blue in daylight. The temperature ranges with the quality of the steel from 430° F. to 560° F.—**Dynamical theory of heat,** the theory that heat is a mode of motion. See def. 2. The term is sometimes applied to the relations of heat and work (thermodynamics), sometimes to the science of radiation, and sometimes to the general theory that heat consists of motions of the particles of matter.—**Heat center.** See ★*center*[1].—**Heat of combustion,** the amount of heat produced when a certain unit mass of a substance is completely burned in oxygen. For a fuel, the unit mass may be one gram, for a chemical compound it may be a gram-atom or a gram-molecule.—**Heat of dilution.** See ★*dilution*.—**Heat of evaporation.** Same as ★*heat of vaporization*.—**Heat of formation,** in *phys. chem.*, the amount of heat set free when a gram-molecule of a compound is formed from its elements. It is positive for exothermic compounds and negative for endothermic compounds, and is measured in calories, that is, by the number of grams (or kilograms) of water warmed one degree, under specified conditions, by the heat produced in the reaction. Commonly it can be experimentally determined by indirect methods; by direct methods only when the reaction of formation can be made to take place rapidly, and without concurrent formation of other compounds. The heat of formation of liquid water from its elements is expressed by the number of grams of water warmed one degree centigrade by the union of sixteen grams of oxygen with 2.015 grams of hydrogen, which is found to be 68400.—**Heat of fusion.** See *latent heat of fusion*, under *fusion*.—**Heat of neutralization,** in *phys. chem.*, the amount of heat produced when a gram-equivalent of a base or of an acid, in dilute solution, is neutralized with a gram-equivalent of an acid or of a base. It is measured in terms of the calory (which see).—**Heat of solution,** in *phys. chem.*, the amount of heat produced when one gram-molecule (or one gram) of a substance is dissolved in a very large volume of the solvent. It has the negative sign when heat is absorbed in the act of solution.—**Heat of vaporization,** the heat, in calories, required to convert one gram of a liquid into vapor. Also called *latent heat of vaporization*.—**Heat rigor.** See ★*rigor*.—**Heat sum,** the sum of the amounts of heat developed in any series of chemical reactions. The total amount of heat developed in a chemical process is independent of the number of stages into which the process may be divided. This principle, due to Hess, is known as the *constancy of the heat sum*.—**Irreversible heat.** (*a*) That part of the heat in a thermodynamic cycle or process which cannot be reconverted into mechanical energy. (*b*) In *elect.*, that portion of the heat developed in an electric circuit which cannot be converted directly into electric energy. The total heat in an electric circuit is $HJ = I^2Rt + PIt$, where H is the heat in calories, *J* is the mechanical equivalent, I the current, R the resistance, t the time during which the current flows, and *P* is the difference of potential due to the heating of any metal junctions that may exist in the circuit. The term I^2Rt represents the *irreversible heat*. Also called *ohmic heat*. Compare *reversible* ★*heat*.—**Joulean heat,** the heat developed by flow of current in an electric circuit. It was shown by Joule that the heat (*H*) produced by causing an electric current of strength *I* to flow for t seconds through a resistance r is $H = I^2rt$. The quantity of heat thus produced, which is proportional to the square of the current and to the resistance of the circuit, is called (in recognition of the discoverer of this law) *Joulean heat*.—**Latent heat of precipitation,** in *meteor.*, that fraction of the latent heat of vaporization which is set free when the vapor is subsequently condensed or precipitated as water and especially as a cloud. If the latent heat remains in the cloud the water, the remaining vapor, and the air have a slightly higher temperature. If the water-drops fall to the earth the remaining vapor and air of the cloud have a still higher temperature.—**Latent heat of vaporization.** Same as ★*heat of vaporization*.—**Law of constant heat sums,** the law, in thermochemical reactions, that the total heat absorbed when certain substances are formed from certain others is independent of the number and nature of the intermediate processes. See ★*heat sum*.—**Low-red heat,** a heat sufficient to impart to iron a strong red color, its temperature being about 1290° F.—**Molecular heat of fusion,** the heat of fusion of a substance multiplied by its molecular weight. Also called *molecular latent heat*.—**Molecular heat of vaporization,** the heat of vaporization of a substance multiplied by its molecular weight.—**Ohmic heat.** See *irreversible* ★*heat*.—**Reversible heat,** in *elect.*, that portion of the heat developed by the flow of current in a heterogeneous circuit which appears or is absorbed at the junction of two metals, according to the direction of the current: distinguished from the so-called *irreversible heat* of the

Joule effect, which is due to the resistance of the circuit and is independent of the direction of the current.—**Stagnation of heat,** an expression intended to mean 'accumulation of heat' caused by the lack of conductivity in the surrounding material: as, in the case of a boiler when the boiler plate is coated with scale.—**Stellar heat,** heat from the fixed stars or planets. Observations of the spectra of stars show that many of these bodies are very similar to the sun and that they probably have temperatures comparable with the solar temperature. It is to be expected, therefore, that heat radiated to the earth by the stars bears the same proportion to their light-giving power as the heat from the sun does to the light received from that luminary. Attempts to detect the heat from the stars by placing the most delicate heat-measuring instruments, as the thermopile or bolometer, in the focus of a telescope directed to a bright star such as Arcturus or Vega have given, however, negative results. Edison, in 1878, made observations on Arcturus by means of the tasimeter, but the indications of heat detected with this instrument in the image of that star have been seriously questioned. In 1888, Boys brought a new instrument, the radiomicrometer, to bear on this subject, and although the sensitiveness of the apparatus was such that $\frac{1}{1000000}$ of the heat received from the moon could have been detected, no effects were obtained in observations upon Jupiter, Saturn, Arcturus, Vega, Capella, and other stars. In 1888–1900 E. F. Nichols, using his form of radiometer and a concave mirror of 61 centimeters aperture, obtained measurable indications of heat in the images of Arcturus, Vega, Jupiter, and Saturn. The sensitiveness of the instrument was such that a candle placed at a distance of 633 meters gave a deflection of 67 millimeters. Since it was possible to read deflections of one tenth of a millimeter it was computed that the heat from a candle at a distance of 4.3 kilometers was capable of detection. The mean intensity of the radiation from two fixed stars and two planets, expressed in meter-candles, was as follows:

Vega,	0.51×10^{-8}	meter-candles.
Arcturus,	1.14	" "
Jupiter,	2.3	" "
Saturn,	0.37	" "

The total radiation of these stars stands in the ratio:

Vega : Arcturus = 1 : 2.2
Vega : Jupiter = 1 : 4.7
Vega : Saturn = 1 : 0.74

Since the photometric intensities of Vega and that of Arcturus are nearly equal it follows that the infra-red spectrum in Arcturus is proportionately much stronger than that of Vega.—**Thermometric heat,** the heat of matter, measurable in calories, as distinguished from radiant energy.—**Total heat.** (*a*) In *thermodynam.*, the quantity E + pv, where E is the intrinsic energy of a substance, p its pressure, and v its volume.

The *total heat* as defined by Regnault . . . differs from (E + pv) only by a quantity which is inappreciable in ordinary practice. *Encyc. Brit.*, XXXIII. 285.

(*b*) The heat in calories required to convert a gram of liquid at its melting-point into saturated vapor at a given pressure.

heat-asphyxia (hēt′as-fik′si-ą), *n.* Symptoms of collapse caused by excessive heat.

heat-coil (hēt′koil), *n.* Same as ★*heating-coil*, 1.

heater, *n.*, (*d*) In *elect.*, that part of the Nernst lamp which, in starting, is heated by the electric current and by its heat starts the glower. See *Nernst* ★*lamp*.—**Baltimore heater,** a stove designed to be set in a fireplace and, commonly, to heat a room overhead by means of hot-air pipes.

heat-filter (hēt′fil′tėr), *n.* In *photog.*, a cell having parallel glass sides filled with water, alum solution, or the like, interposed in the path of rays with the object of removing heat-rays but allowing those of light to pass.

Sun-light and a calcium burner, both of which throw parallel rays, being out of the question for me, I have taken a powerful projection lantern and set it as near to the microscope as the intervening *heat-filter* will permit. *Woodbury*, Encyc. Dict. of Photog., p. 367.

heat-gage (hēt′gāj), *n.* An instrument for ascertaining the temperature of furnaces, depending upon the comparison of the incandescent spiral of an electric lamp with that of the furnace. When both glow alike, the reading of an ammeter, in circuit with a rheostat, is taken. A table gives the corresponding degree of heat.

heath, *n.* 4. In Tasmania, the popular name for several species of the genus *Epacris*, especially *E. impressa*, a beautiful slender shrub bearing white or red axillary flowers. See *Epacris*.—**Alkali heath,** *Frankenia grandifolia*, a deep-rooted perennial able to persist in cultivated ground, the most characteristic plant of the 'gooselands' of California. It is a useful alkali indicator, its presence implying an excess of Glauber's salts in the soil, incompatible with the raising of wheat or stone fruits. Also called *yerba reuma* from its medicinal properties.—**Australian heath,** any one of various species of the genus *Epacris*, which are cultivated in greenhouses, especially *E. longiflora*.—**Besom- or broom-heath,** the cross-leafed heath. See *heath*, 2.—**Cornish heath,** *Erica vagans*, a low gregarious species ranging around the Mediterranean and up the Atlantic coast to Cornwall. Also called *moor-heath*.—**False heath.** Same as *false* ★*heather* (*a*).—**Mountain-heath,** *Phyllodoce cærulea*, an ericaceous shrub, with yew-like evergreen leaves and clusters of pink or purple flowers of the heather type. It is found in the northern Old World, and on the high mountains of New England and far north in North America.

heath-aster (hēth′as′tėr), *n.*—**Rose heath-aster,** *Leucelene ericoides*, a low tufted plant of the aster family with terminal heads, the white rays turning rose-red in drying, found on the plains from Nebraska to Texas and west to California and Mexico.—**White heath-aster.** See ★*aster*1.

heath-butterfly (hēth′but′ėr-flī), *n.* A British collectors' name for several species of agapetid butterflies. See *heath*, 3.

heather, *n.*—**Alaska heather,** the Alaskan ericaceous plant, *Harrimanella Stelleriana*; also any Alaskan plant of the genus *Cassiope*.—**Alpine heather,** a low heather-like shrub, *Phyllodoce Breweri*, found at the snow-line on the high Sierras of California. It forms a carpet with a surface of rosy flowers. (*Parsons and Buck*, Wild Flowers of California, p. 246.)—**Beach-heather.** Same as *false* ★*heather*.—**Bell-heather,** the Scotch heather. See *heath*, 2.—**False heather.** (*a*) An American cistaceous shrub, *Hudsonia tomentosa*, found on sandy shores of the Atlantic, in pine-barrens, and on inland shores northward. It is analogous in habit and habitat to the Old World heaths. Also called *false heath* and *beach-heather*. (*b*) *Menziesia pilosa*. See *Menziesia*.—**Mountain-heather.** Same as *sand-myrtle* (which see, under *myrtle*).—**Red heather,** in northwestern America, the ericaceous shrub, *Phyllodoce glanduliflora*.—**White heather,** *Phyllodoce empetriformis*, of the same region as the red heather. Compare *alpine* ★*heather*.

False Heather (*Hudsonia tomentosa*).

a, plant, one third natural size; *b*, flower, enlarged.

heather-honey (heᴛʜ′ėr-hun″i), *n.* Honey gathered from heather.

heath-stone (hēth′stōn), *n.* A name used by architects in England for certain sandstones which occur in the Bagshot beds of the Eocene.

heating, *n.*—**Counter-current heating.** See *parallel* ★*heating*.—**Parallel heating, parallel-current heating,** the heating of a fluid flowing through a tube or flue by a substance on the outside of the tube flowing in a direction parallel to the direction of flow of the fluid on the inside: distinguished from *counter-current heating*, in which the currents flow in opposite directions.

heating-coil (hē′ting-koil), *n.* A coil of wire heated by the passage of an electric current and used for producing and maintaining a high temperature in various scientific operations or for industrial purposes. Also written *heat-coil*.

heating-furnace (hē′ting-fėr″nās), *n.* Same as *reheating-furnace* (which see, under *furnace*).

heating-machine (hē′ting-mą-shēn″), *n.* A combined heating-furnace and automatic feeding- and conveying-machine. The leer, the reel, and the rotary oven are heating-machines, but the term is commonly applied to combined gas-furnaces and conveying-machines used in annealing, brazing, tempering, and coloring small parts of machines, hardware, and metal pipes, rods, and sheets.

heat-rash (hēt′rash), *n.* Prickly heat (which see, under *heat*).

heat-ray (hēt′rā), *n.* A ray of heat; specifically, one of the less refrangible, infra-red, long-waved rays of the spectrum, discovered by the elder Herschel, which are invisible and have little actinic power, but are detected by means of their thermal effects. In the normal solar spectrum as studied by Langley, they extend the spectrum below the line A to a distance nearly double the length of the visible spectrum. Strictly, all rays of the spectrum are heat-rays, since when absorbed they all heat the absorbing surface.

heat-stroke (hēt′strōk), *n.* Collapse or fever caused by exposure to excessive heat of the atmosphere. See *sunstroke*. *Buck*, Med. Handbook, III. 195.

heat-tone (hēt′tōn), *n.* In *thermo-chem.*, the sum of the heat developed in a chemical reaction and of the heat-equivalent of the external work.

Since we have reactions which evolve heat . . . and also reactions in which heat is absorbed, . . . the *heat tone* may be positive or negative.
H. C. Jones, Physical Chem., p. 286.

heat-unit, *n.*—**Gram-centigrade heat-unit,** the quantity of heat required to raise one gram of water from 0° to 1° C.; a calory.—**Kilogram-centigrade heat-unit,** the quantity of heat required to raise one kilogram of water from 0° to 1° C.; a greater calory.

heat-wave (hēt′wāv), *n.* 1. A day or series of days of unusually hot weather; a hot wave; a broad area of descending wind, dynamically warmed by compression, moving eastward over the United States and often occupying several days in its transit.—2. In *phys.*, an ether-wave capable, by the transformation of the energy of the vibratory disturbance into heat, of raising the temperature of bodies placed in its path. All ether-waves are heat-waves, but the term is usually applied to the longer waves of the spectrum, because these alone possess, in general, sufficient energy to produce a noticeable heating effect. See *heat*, *n.*, 2.

heat-weight (hēt′wāt), *n.* In *mech.*, the entropy-factor: an erroneous term used in discussions on the theory of heat-action upon gases or other media for the conversion of heat-energy into mechanical power. The energy in heat-units expended by a gas in expanding from a higher absolute temperature T_1 to a lower temperature T_2 is the product of the range or difference in absolute temperatures multiplied by the change in the value of the entropy-factor during the expansion. The temperature-range measures the availability of the transformation, and this range must be multiplied by the entropy to give a product denoting the expended energy. In hydraulic-motor practice, the difference in heights of the head-race and tail-race levels measures the availability of the water-power, and this range of height multiplied by the weight of water falling measures the energy expended. Now, by analogy, the entropy-factor acts to multiply temperature, as the weight acts to multiply height in feet: hence, the notion of calling this entropy-factor the *heat-weight* in an effort to give to the entropy a physical presentation as a property of heat-media, which is an impossibility.

heautophany (hē-â-tof′ą-ni), *n.* [Gr. *ἑαυτοῦ*, of himself, + *-φανεια*, ‹ *-φανης*, ‹ *φαίνειν*, show, manifest.] Self-manifestation.

heautophonics (hē-â-tō-fon′iks), *n.* [Gr. *ἑαυτοῦ*, of himself, + *φωνή*, sound, + *-ics*.] Same as *autophony*.

heautotype (hē-â′tō-tīp), *n.* [Gr. *ἑαυτοῦ*, of itself, + *τύπος*, type.] Any specimen identified with a species already described and named, and chosen by the author as an illustration of that species. *Science*, June 9, 1905.

heav, *v.* and *n.* A simplified spelling of *heave*.

heave, *v. i.*—**Heave and awash!** a call to the men at the windlass or capstan signifying that one more turn or heave will bring the anchor-ring to the surface of the water.—**Heave and aweigh!** an order to the men at the windlass or capstan to heave once more, in order to lift the anchor from its bed.—**Heave and break!** Same as ★*heave and aweigh*.—**Heave and pawl!** an order to the men at the capstan to heave until the pawl drops into its socket.—**Heave and rally!** an order to the men at the capstan or windlass to exert themselves; an encouraging cry to the crew.—**Heave in!** a command to get in some of the cable; haul in the slack.—**Heave killick!** heave anchor.—**Heave round!** an order to turn the capstan around by its bars or by steam-power.—**Heave short!** a command to heave in most of the anchor-chain: the cable is hove short when the ship is riding nearly over her anchor without having slack cable out.—**Heave up!** an order to lift the anchor from the bottom.—**To heave and set,** to rise and fall, as a ship, owing to the undulation of the sea; the rise and fall of the waves.—**To heave astern,** to move a ship backward by heaving in on the rope or cable that leads astern.—**To heave away,** to commence heaving in; heave round the capstan; work the windlass-brakes.—**To heave the ship ahead,** to advance the vessel by heaving in on the anchor-chain, or on the line leading ahead.

heave, *n.*—**Cornwall heave,** in *wrestling*, a throw in which the wrestler seizes his opponent by placing one arm in front of him and the other behind him, and lifts and throws backward, falling with him.—**Heave of the sea.** When a vessel is sailing more or less in the trough of a heavy sea the effect of it is to drive her to leeward; this drift, or lifting off, is expressed as *heave of the sea* or *send of the sea*. A shallow vessel will be lifted off more than a deep vessel, and for that reason no general rule can be given for the navigator.

heaved (hēvd), *p. a.* In *geol.*, horizontally displaced by a fault: said of rock-masses or strata. Contrasted with *thrown*, or vertically displaced.

heaven, *n.*—**Son of Heaven,** a translation of Chinese *T'ien tse*, one of the titles given to the Emperor of China, who is supposed to rule by the will of Heaven.

heavs, *n.* A simplified spelling of *heaves*.

heavy1, *a.* **II.** *n.* 1. The heavy part in a theatrical representation in which the dignity and self-importance of successful middle life are portrayed.—2. The actor who takes this part.—3. A member of the heavy cavalry or artillery: usually in the plural.—**Heavy liquor.** See ★*liquor*.

heavy-back (hev′i-bak), *n.* A Jamaican name for a kind of helmet-shell, *Cassis madagascarensis*.

he-balsam (hē′bâl′sam), *n.* See ★*balsam*.

hebamic (he-bam′ik), *a.* [G. *hebamme*, a midwife, + *-ic*.] Of or pertaining to a midwife or midwifery; maieutic.

But the soul is far wiser and truer than it knows and clung to what concealed worth for itself through dark ages and persecutions in a way our philosophy is too small to explain and which should forever make us treat even superstition and the blindest and narrowest orthodoxies with sympathy and if possible with the *hebamic* art which Socrates praised.
Amer. Jour. Relig. Psychol. and Education, May, [1904, p. 46.

hebbakhade (heb-ą-kä′de), *n.* A gum-resin similar to myrrh, but more acrid, imported from Africa. Also called *besabol* and (incorrectly) *East Indian myrrh*.

hebephrenic (hē-bē-fren′ik), *n.* and *a.* Same as *hebephreniac*.

Heberden's nodes. See ★*node*.

hebetic (hē-bet′ik), *a.* [Gr. *ἡβητικός*, ‹ *ἡβητής*, youthful, ‹ *ἥβη*, youth.] Relating to or occurring at the time of puberty.

Hebr. An abbreviation (*a*) of *Hebrew;* (*b*) of *Hebrews.*

Hebraizer (hē′brā-ī-zėr), *n.* One who Hebraizes.

hecastotheism (he-kas-tō-thē′izm), *n.* [Gr. ἕκαστος, each, + Θεός, God, + *-ism.*] The type of primitive belief in which supernatural powers are attributed to both animate and inanimate objects.

In classifying Indian myths Major Powell distinguishes four stages in the growth of mythic philosophy. To the first of these he gives the name of *hecastotheism,* the stage in which supernatural powers are attributed to both animate and inanimate objects, an all pervading animism which answered the questions of how and why to the savage mind.

Amer. Jour. Psychol., Jan., 1903, p. 63.

hecatolite (he-kat′ō-līt), *n.* [Gr. Ἑκάτη, Hecate (the moon), + λίθος, stone.] Same as *moonstone.*

hecdecane (hek′dē-kān), *n.* Same as ★*hexadecane.*

hechima (hā′chē-mä), *n.* [Jap.] The sponge-gourd, *Luffa Luffa.*

heckelphone (hek′el-fōn), *n.* [For W. *Heckel,* its inventor.] An orchestral instrument of the oboe family, invented by Wilhelm Heckel and Sons of Biebrich in 1904, which is intended to serve as a true tenor oboe and thus to replace the English horn. It resembles the oboe and the English horn in mouthpiece, conical bore, and system of finger-holes, and, like the oboe, its normal pitch is C; but its size (nearly 4 feet long) makes its pitch an octave lower than that of the oboe and an octave higher than that of the bassoon. The tone is full, mellow, and susceptible of great variation in volume throughout the whole compass (second B♭ below middle C to second G above middle C).

Heckerism (hek′ėr-izm), *n.* [*Hecker* (see def.) + *-ism.*] The theological views attributed to Rev. Isaac T. Hecker, in which he was charged with minimizing Roman Catholic doctrine to suit American notions. See ★*Americanism.*

heckler, *n.* 2. One who severely questions and cross-questions another; specifically, one who severely questions a candidate for the purpose of finding some weak point in his political creed or professions, or of bringing out his actual opinions or position. [Great Britain.]

The man who asks questions and insists on their being answered is a familiar presence at all party meetings [in England]. One of England's many debts to Scotland is the loan of the expressive word used to describe him. He is known as the *heckler.* The speaker is not allowed to disregard him.

Sidney Brooks, in Harper's Mag., Aug., 1900, p. 338.

heckling-machine (hek′ling-mą-shēn″), *n.* Same as *heckle.*

Hectarthropidæ (hek-tär-throp′i-dē), *n. pl.* [NL., ‹ *Hectarthropus* + *-idæ.*] A family of caridean macrurous crustaceans having all of the trunk-legs similar in structure, simple, six-jointed, with the fifth joint not subdivided, and with the first five pairs carrying exopods. It includes the genera *Proclètes, Icotopus, Eretmocaris,* and *Hectarthropus,* the last being the type.

Hectarthropus (hek-tär′thrō-pus), *n.* [NL., ‹ Gr. ἕκτος, sixth, + ἄρθρον, joint, + πούς (ποδ-), foot.] The typical genus of the family *Hectarthropidæ. Spence Bate,* 1888.

hecto-ampere (hek′tō-am-pār″), *n.* In *elect.,* one hundred amperes or ten c. g. s. units: a practical unit of current strength.

hectocotyliferous (hek″tō-kot-i-lif′ėr-us), *a.* [NL. *hectocotylus* + L. *ferre,* bear, + *-ous.*] Bearing or provided with a hectocotylus: as, a *hectocotyliferous* male among cephalopods.

hectocotylism (hek-tō-kot′i-lizm), *n.* [*hectocotylus* + *-ism.*] The formation or development of a hectocotylus.

hectocotylize (hek-tō-kot′i-līz), *v. t.*; pret. and pp. *hectocotylized,* ppr. *hectocotylizing.* [*hectocotylus* + *-ize.*] To transform or modify into a hectocotylus; fecundate with a hectocotylus.

hectol. An abbreviation of *hectoliter.*

hectowatt (hek′tō-wot), *n.* [*hecto-* + *watt.*] In *phys.,* a practical unit of power equal to 100 watts or 1×10^9 ergs per second. [Rare.]

hectowatt-hour (hek″tō-wot-our′), *n.* In *phys.,* a practical unit of work, equal to 100 watt-hours or 360,000 joules. [Rare.]

hed, *n.* A simplified spelling of *head.*

hedake, *n., a.,* and *v.* A simplified spelling of *headache.*

heddle-setting (hed′l-set″ing), *n.* An arrangement of the heddles in a loom when a change is made from a fine to a coarse reed, or vice versa.

heddling (hed′ling), *n.* A set of heddle-frames for a loom.

Hedenstrœmia (hed-en-strē′mi-ä), *n.* [NL., ‹ *Hedenström,* a Swedish naturalist.] The typical genus of the family *Hedenstrœmidæ.*

Hedenstrœmidæ (hed″en-strem′i-dē), *n. pl.* [NL., ‹ *Hedenstrœmia* + *-idæ.*] A family of ammonoid cephalopods or ammonites in which the principal septal sutures have lobes and saddles with ceratitic outlines. It occurs in Triassic rocks.

heder (hā′dėr), *n.* [Heb.] In Jewish use, an inclosure; a chamber or secret compartment; specifically, a primary school for Jewish children where they are instructed exclusively in Hebrew and the Jewish religion.

hederic, *a.* 2. Derived from *Hedera helix.*—**Hederic acid,** a colorless compound, $C_{16}H_{26}O_4$, found in the berries and leaves of the ivy, *Hedera helix.* It crystallizes in needles or scales and melts at 223° C.

hederidin (he-der′i-din), *n.* [*heder*(*ine*) + *-id* + *-ine.*] A colorless cleavage-product, $C_{26}H_{40}O_4$, of the glucoside hederine. It crystallizes in prisms, and melts at 324° C.

hederigerent (hed-ę-rij′ę-rent), *a.* [L. *hederiger,* ivy-bearing (‹ *hedera,* ivy, + *gerere,* bear), + *-ent.*] Ivy-bearing; wreathed or garlanded with ivy, as the bacchantes in the Dionysian festivals.

Ethel, by this time breathless, threw her tambourine on the bed, and sat down. . . . The *hederigerent* Mænads of old were never more filled with excitement.

Mortimer Collins, Marquis and Merchant, xxiii.

hederinic (hed-ę-rin′ik), *a.* [*heder-ic* + *-in* + *-ic.*] Same as *hederic.*

hedge-bantling (hej′bant″ling), *n.* An illegitimate brat.

"Oh, bathos!" said Lady Bath. . . "Is this *hedge-bantling* to be fathered on you, Mr. Frank?"

"It is necessary, by all laws of the drama, Madam," said Frank, . . . "that the speech and the speaker shall fit each other."

C. Kingsley, Westward Ho! ii. 41.

hedge-bill, *n.* 2. In *entom.,* a British collectors' name for a tineid moth, *Cerostoma horridella.*

hedgehog, *n.* 6. In *elect.,* same as ★*hedgehog-transformer.*

Hedgehog caterpillar, crystals. See ★*caterpillar,* ★*crystal.*

hedgehog-converter (hej″hog-kọn-vėr′tėr), *n.* Same as ★*hedgehog-transformer.*

hedgehog-fish (hej′hog-fish), *n.* Any of the porcupine-fishes of the family *Diodontidæ,* found in most tropical seas.

hedgehog-mushroom (hej′hog-mush″röm), *n.* The edible fungus *Hydnum Erinaceum.* See *hedgehog,* 3.

Hedgehog-mushroom (*Hydnum Erinaceum*), one fourth natural size.

hedgehog-shell (hej′hog-shel), *n.* A species of *Murex, M. erinaceus,* bearing numerous spines.

hedgehog-transformer (hej″hog-tråns-fôr′mėr), *n.* A type of transformer with open magnetic circuit and a straight core of iron wires, the ends of which are separated from one another as widely as possible, like little bristles: hence the name. Also called *hedgehog-converter.*

hedge-hook (hej′hůk), *n.* A local English term for *bill-hook* (which see).

hedge-radish (hej′rad″ish), *n.* Same as *wild radish* (which see, under *radish*).

hedge-rustic (hej′rus″tik), *n.* A British collectors' name for a European noctuid moth, *Luperina cespitis.*

hedionda (ā-dē-ōn′dä), *n.* [Amer. Sp. *hedionda,* fem. (parallel to Sp. *hediondo,* m., applied to another plant, Syrian rue), ‹ Sp. *hediondo,* fetid, stinking, ‹ *heder,* ‹ L. *fetere,* stink: see *fetid.*] 1. In Porto Rico and Spanish America, the coffee-senna, *Cassia occidentalis.* See *Cassia,* 1, and *negro coffee* (under *coffee*).—2. In New Mexico, the creosote-bush, *Covillea tridentata.* See *Larrea.*

hedland, *n.* A simplified spelling of *headland.*

hedlong, *adv., a.,* and *v.* A simplified spelling of *headlong.*

hedonal (hed′ō-nal), *n.* [Gr. ἡδονή, pleasure, + *-al*[1].] A hypnotic remedy; chemically, the ester of methyl propylcarbinol-carbamic acid.

hedonic, *a.* 3. Pertaining to sexual excitement.—**Hedonic calculus, tone.** See ★*calculus,* ★*tone*[1].

hedrioblast (hed′ri-ō-blást), *n.* [Gr. ἕδριον, dim. of ἕδρα, a seat, a base, + βλαστός, a germ.] A term proposed by Allman for the fixed medusoids or sporosacs of hydromedusans; a gonophore. Compare *planoblast.*

hedrumite (hed′rum-īt), *n.* [*Hedrum,* in Norway, + *-ite*[2].] In *petrog.,* a variety of syenite with little or no nephelite which has a trachytic or laminated texture due to the tabular form of the feldspar crystals. *Brögger,* 1890.

Hedyscepe (hē-dis′ē-pē), *n.* [NL. (Wendland and Drude, 1875), ‹ Gr. ἡδύς, sweet, charming, + σκέπη, shelter. The name alludes to the beauty of the type species, *H. Canterburyana,* which is called *umbrella-palm* in Lord Howe Island.] A genus of palms. See *Kentia.*

heehaw (hē′hâ), *n.* The bray of an ass or mule.

heel[1], *n.,* 2. (*h*) The extremity of a knife-blade or of any tool (excluding the handle) which is opposite the point. (*i*) In a bow for instruments of the viol class, the end nearest the player's hand; the nut: opposed to *head* or *point.* (*j*) The base of a tobacco-leaf: so called by manufacturers.—**Glome of the heel.** See ★*glome.*—**Heel of the flat.** See ★*flat*[1].—**His heels,** at *cribbage,* a jack which is cut for a starter, and which counts two immediately.—**Lark heel, larkspur heel,** in *anthrop.,* the prominent long heel of negroid races.—**To go round on her heel,** to turn short around: said of a vessel.

heel[1], *v. t.* 6. In *golf,* to strike (a ball) on the heel of the club. *W. Park,* Game of Golf, p. 100.—**To heel in,** to store (young trees) for planting by laying (them) against the side of a trench and covering the roots with earth.

heel[2], *v. t.*—**To heel the ship,** to list the vessel over on her side.

heel[2], *n.*—**Angle of heel.** See ★*angle*[3].

heel-brace (hēl′brās), *n.* The iron shape on the lower part of a rudder, which acts as a reinforcement to the lower pintles.

heel-chain (hēl′chān), *n.* A light chain formerly used to secure the after end of the jib-boom to the bowsprit. An iron band is now generally employed for this purpose.

Heeled bet. See ★*bet*[2].

heel-fly (hēl′flī), *n.* The adult of the American ox-bot or ox-warble, an œstrid fly, *Hypoderma lineata.* It flies about the heels of cattle and lays its eggs on the hair, whence they are licked by the animal.

Heel-fly (*Hypoderma lineata*).

Female, slightly enlarged. ("Insect Life," U. S. D. A.)

heeling-indicator (hē′-ling-in″di-kā-tọr), *n.* An instrument designed to show the angle of heel or the roll of a vessel: it may be a pendulum, the lower end of which is pointed and moves over a graduated arc, or a spirit-level, curved in an arc of a circle, the bubble of which indicates the angle on a graduated scale.

heel-lashing (hēl′lash″ing), *n.* A lashing passed around the heel of a spar; a number of turns of line around the inner end of a studdingsail-boom and its yard; the rope that secures the inner end of the jib-boom to the bowsprit.

heel-piece, *n.* 3. In *iron ship-building,* a short length of angle-bar which is used to connect the heels of the two sections of a frame which meet at the center-line of the vessel.

heel-string (hēl′string), *n.* The tendo Achillis.

heel-tackle (hēl′tak″l), *n.* A purchase hooked to the heel of a spar; a tackle for securing the heel of a sheer-leg.

heemraad (hām′rād), *n.* [D., ‹ *heem,* home, + *raad,* council.] A local petty court established by the Dutch in South Africa in 1682 for the settlement of minor disputes between the burghers. It consisted of the landrost and four unpaid assessors who held office for two years.

Heersian (hār′siąn), *a.* and *n.* [*Heers,* a town in Belgium.] In *geol.,* noting the lowest division of the Eocene Tertiary in Belgium, corresponding in part to the Thanet sand of England.

hefer, *n.* A simplified spelling of *heifer.*

hefner (hef′nėr), *n.* A unit of intensity of light; the light from a standard amyl-acetate lamp of the form devised by Hefner-Alteneck. See ★*light standard.*

hefner-lux (hef′nėr-luks), *n.* Same as ★*lux*[3], 2.

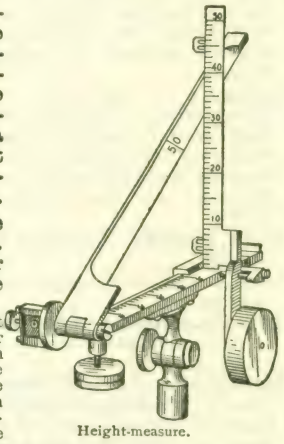
hefner-meter (hef'nėr-mē″tėr), *n.* A unit of illumination, the illumination from a source of light equal in intensity to one hefner at a meter's distance; a lux.

heft[5], *n.* 2. A part or number of a serial publication, as of a magazine; a division of a work which is being issued in parts.

hegemon (hej'e-mon), *n.* [Gr. *ἡγεμών*, a leader: see *hegemony*.] A leader; a ruling power.

The *hegemon* of the Western hemisphere is the United States. Her power is paramount, as all the world recognizes. *The Forum*, Jan.-March, 1904, p. 347.

hegemonist (hē-jem' ō-nist), *n.* An advocate of hegemony.



Hegetotheriidæ (hē″jē-tō-thē'ri-i-dē), *n. pl.* [NL. *Hegetotherium*, the type genus, + *-idæ*.] A family of extinct ungulate mammals, of the suborder *Typotheria*, from the Eocene of Patagonia. *Ameghino*, 1894.

H. E. I. C. An abbreviation of *Honorable East India Company*.

H. E. I. C. S. An abbreviation of *Honorable East India Company's Service*.

Height index. Same as *altitudinal* ★*index*.—**Height of a homogeneous atmosphere.** See ★*atmosphere*.—**Height of land.** See ★*land*[1].—**Metacentric height,** in *naval arch.*, the distance from the center of gravity of the vessel as a whole to the metacenter (which see). The metacentric height is a measure of the stability of a vessel when inclined to a small angle from the position of equilibrium. *Negative metacentric height* is that in which the metacenter is below the center of gravity; the vessel is then in unstable equilibrium and will not remain upright although it may be stable at an inclination from the upright.—**Molar height,** in *craniom.*, the height of the lower jaw at the level of the second molar.—**Nasal height,** in *craniom.*, the distance from the nasion to the medial point of the level of the inferior margin of the nasal aperture.

height-gage (hīt'-gāj), *n.* A fine steel measuring-instrument for ascertaining the height of projections above a plane surface. It measures in thousandths of an inch.

Height-measure.

height-measure (hīt'mezh″ūr), *n.* An instrument for measuring the height of a tree.

The instrument is set up where the operator can readily see both the top and the base of the tree, and the oblique distance from the center of the instrument to the base of the tree is measured. The sliding, weighted rule is then set on the base rule at the graduation corresponding to the measurement just procured. A sight is then taken through the eyepiece and the objective on the base rule to the base of the tree, the hair of the objective being brought into line with the base of the tree. A screw is set to hold the instrument at this angle. A second sight, to bring the hair of the objective on the oblique rule in line with the top of the tree, is then taken. The height of the tree is indicated on the upright rule at the point where the edge of the oblique rule passes it.

heimin (hā-min'), *n.* [Jap., < *hei*, common, + *min*, people.] In Japan, the common people, as distinguished from the nobility.

heintzite (hīnt'zīt), *n.* [*G. heintzit* (1890), named after Prof. *W. H. Heintze*, of Halle, a German chemist.] A hydrous borate of magnesium and potassium occurring in colorless and white monoclinic crystals, found at Leopoldshall, Strassfurt, Prussia.

heir, *n.*—**Irregular heir,** in the civil law of Louisiana, one who takes the succession by provision of law when there are neither legal nor testamentary heirs.—**Legal heir,** in *civil law*, one of the same blood as the descendant who takes the succession by force of law rather than by will. There are three classes: (*a*) children and lawful descendants; (*b*) parents and lawful ascendants; (*c*) collateral kindred.

hei-tiki (hā-tē'kē), *n.* [Maori, < *hei*, a neck ornament, + *tiki*, a carved figure on the gable of a house, also the name of a deity, the creator of man.] Among the Maoris, a small jade figure or image worn around the neck.

hel, *n.* and *v.* A simplified spelling of *hell*.

helbeh (hel'be), *n.* [Ar. *hilba*.] The fenugreek, *Trigonella Fœnum-græcum*, and especially its seeds, which when made into flour and mixed with dhurra form a food largely used by the working classes of Egypt. See *fenugreek*.

helcodermatous (hel-kō-dėr'ma-tus), *a.* [Gr. *ἕλκειν*, draw, + *δέρμα*(*τ*-), skin, + *-ous*.] Boring or tearing; given to boring or tearing.—**Helcodermatous spine.** See ★*spine*.

Helderberg group. See ★*group*[1].

Helderbergian (hel-dėr-bėr'gi-an), *n.* In *geol.*, a group of strata, regarded by New York geologists as of earliest Devonian age, lying on the water-limes of the late Silurian and overlain by the Oriskany sandstone. It takes its name from its typical development in the Helderberg Mountains of New York, where its members, from the base upward, are Coeymans limestone, New Scotland beds, and Becraft limestone. In the earlier nomenclature of the New York rocks it was termed first the Helderberg group and subsequently the Lower Helderberg. See ★*group*.

helenene (hel'ē-nēn), *n.* [*helen*(*in*) + *-ene*.] A yellow, oily hydrocarbon which is formed when helenin is distilled with phosphorus pentoxid.

heleoplankton (hē-lē-ō-plangk'ton), *n.* [Gr. *ἕλος* (gen. *ἕλεος*), a marsh, + NL. *plankton*.] The plankton of a marsh.

helepole (hel'ē-pōl), *n.* [F. *hélépole*, < LL. *helepolis*, < Gr. *ἑλέπολις*, a besieging engine, prop. adj., 'city-taking' (applied to Helen and Iphigenia), < *ἑλεῖν*, take, + *πόλις*, city.] A military engine anciently used in sieges: supposed to have been invented by Demetrius Poliorcetes.

helianthic (hē-li-an'thik), *a.* [*Helianthus* + *-ic*.] Pertaining to the sunflower.—**Helianthic acid,** a colorless compound, $C_{14}H_{18}O_8$, which occurs in sunflower seeds. It is resolved by dilute mineral acids into a fermentable sugar and an acid-violet coloring-matter.

helichryse (hē'li-krīz), *n.* [= *Helichrysum*, Anglicized.] Some golden-flowered plant, perhaps ideal.

> While curling through lush grass one spies
> Tendrils of honied *helichryse*.
> *Symonds*, In the Key of Blue. *N. E. D.*

helicin (hel'i-sin), *n.* [Appar. < Gr. *ἕλιξ* (*ἑλικ*-), a spiral, + *-in*[2].] A colorless compound, $C_6H_{11}O_5\overset{2}{O}C_6H_4\overset{1}{C}HO$, which is formed by the action of nitric acid on salicin. It crystallizes in slender, silky needles, melts at 175° C., and is the glucoside of orthohydroxybenzaldehyde.

Helicina (hel-i-sī'nä), *n.* [NL., appar. < Gr. *ἕλιξ* (*ἑλικ*-), a spiral, + *-ina*.] The typical genus of the family *Helicinidæ*. About 500 species are known, most of which inhabit the Antilles, none being found in Africa. *Lamarck*, 1799.

Helicinidæ (hel-i-sin'i-dē), *n. pl.* [NL., < *Helicina* + *-idæ*.] A family of rhipidoglossate gastropods of the order *Streptoneura*, having the epipodium without tentacles, branchia absent, mantle-cavity transformed into a pulmonary chamber, heart with a single auricle, not traversed by the rectum, and the operculum without apophysis. It contains the genera *Helicina*, *Hydrocena*, and *Georissa*, all terrestrial and found in warm regions.

helicoceran (hel-i-kos'ē-ran), *a.* Having the aspect of, or pertaining to, the cephalopod genus *Helicoceras*.

Helicoceras (hel-i-kos'ē-ras), *n.* [N.L, < Gr. *ἕλιξ* (*ἑλικ*-), a spiral, + *κέρας*, horn.] A genus of ammonoid cephalopods showing phylogenic senility in the open spiral, the coils of which do not touch. It occurs in the Cretaceous rocks.

helicoid, *n.* 2. A helicoid parabola.—**Skew helicoid.** Same as *right helicoid*.—**Helicoidal anemometer.** See ★*anemometer*.

Helicolenus (hel-i-kol'e-nus), *n.* [NL., said to be < Gr. "*ἑλίκος*, strong" (it means 'as big as'), + "*ὠλένη*, elbow, arm."] A genus of scorpænoid fishes, remarkable for their brilliant red coloration, found in the deep waters of both the Atlantic and Pacific. *H. dactylopterus* of the Mediterranean (extending to the Gulf Stream and Japan) is the best-known species.

helicopepsin (hel″i-kō-pep'sin), *n.* [Gr. *ἕλιξ* (*ἑλικ*-), a spiral shell, + E. *pepsin*.] A pepsin-like ferment which is found in snails.

helicoproteid (hel″i-kō-prō'tē-id), *n.* [Gr. *ἕλιξ* (*ἑλικ*-), a spiral shell, + E. *proteid*.] A nucleoalbumin which is found in the albuminous gland of snails. It contains a large amount of reducing substance.

helicopter (hel-i-kop'tėr), *n.* [Gr. *ἕλιξ* (*ἑλικ*-), helix, + *πτερόν*, wing.] A flying-machine in which revolving screws or revolving helicoidal surfaces are depended upon to sustain the machine in the air.

helicorubine (hel″i-kō-rö'bin), *n.* [Gr. *ἕλιξ* (*ἑλικ*-), a spiral shell, + L. *rubus*, red, + *-ine*[2].] An orange-red pigment found in the so-called livers of certain invertebrates.

Helicosporium (hel″i-kō-spō'ri-um), *n.* [NL. (Nees, 1816), < Gr. *ἕλιξ*, a spiral, + *σπορά*, seed (spore).] A genus of hyphomycetous fungi which have a creeping mycelium with short, erect, dark-colored conidiophores bearing curled or spiral, hyaline or colored septate spores. About 40 species have been described. They occur mostly on decaying wood.

helictite (he-lik'tīt), *n.* [Gr. *ἑλικτός*, twisted (< *ἑλίσσειν*, turn about, twist: see *helix*), + *-ite*[2].] A twisted twig-like form of calcium carbonate which occurs in caves in limestone.

Helietta (hē-li-et'ä), *n.* [NL. (Tulasne, 1847), named in honor of Th. *Hélie*, a French physician and pharmacologist.] A genus of shrubs or trees of the family *Rutaceæ*. It is related to the hop-tree, *Ptelea*, but the fruit has three or four carpels, with oblique wings similar to those of a maple. There are two species, one in Colombia, the other (for which see ★*barreta*) in Texas and Mexico.

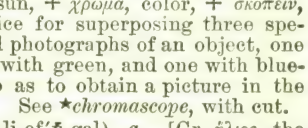
Heligoland yellow. See ★*yellow*.

Heliocentric parallax. See ★*parallax*.

heliocentrically (hē″li-ō-sen'tri-kal-i), *adv.* In a heliocentric manner; as if from the sun's center.

heliochrome (hē'li-ō-krōm), *n.* [Gr. *ἥλιος*, the sun, + *χρῶμα*, color.] A photograph showing an object in its natural colors; specifically, the product of a process devised by Niepce. See *heliochromotype*.

heliochromoscope (hē″li-ō-krō'mō-skōp), *n.* Gr. *ἥλιος*, the sun, + *χρῶμα*, color, + *σκοπεῖν*, view.] A device for superposing three specially prepared photographs of an object, one with red, one with green, and one with blue-violet light, so as to obtain a picture in the natural colors. See ★*chromascope*, with cut.



heliofugal (hē-li-of'ū-gal), *a.* [Gr. *ἥλιος*, the sun, + L. *-fugus*, < *fugere*, flee, + *-al*.] Moving away from the sun, or tending to produce such motion.

heliogram (hē'li-ō-gram), *n.* [Gr. *ἥλιος*, the sun, + *γράμμα*, a writing.] A message which is transmitted by heliographic methods. See *heliograph*.

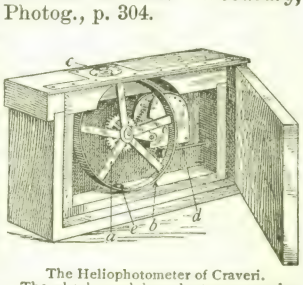
Heliographic chart, paper. See ★*chart*, ★*paper*.

heliographically (hē″li-ō-graf'i-kal-i), *adv.* By heliography; through the heliograph.

Heliolites (hē″li-ō-lī'tēz), *n.* [NL., < Gr. *ἥλιος*, the sun, + *-l-ites*, after F. *-lithe*, < Gr. *λίθος*, a stone.] A genus of fossil alcyonarian corals of the family *Helioporidæ*. They grow in massive coralla in which the autopores have pseudosepta or spinules and sometimes a columella; the siphonopores being without septa and multiplying by fission or intramural gemmation. The genus is characteristic of the Upper Silurian, but also occurs in the Devonian.

Small Colony of *Heliolites interstinctus*, Linné. Natural size. (From Nicholson and Lydekker's "Palæontology.")

heliologue (hē'li-ō-log), *n.* [Gr. *ἥλιος*, the sun, + *λόγος*, word.] Same as ★*heliogram*. *Pall Mall Gazette*, Jan. 8, 1900. [Rare.]



heliometry (hē-li-om'e-tri), *n.* [As *heliometer* + *-y*[3].] The art of using the heliometer; also (rarely), the art of making measurements upon the sun.

heliophobia (hē″li-ō-fō'bi-ä), *n.* [NL., < Gr. *ἥλιος*, the sun, + *-φοβία*, < *φοβεῖν*, fear.] A morbid dread of sunlight.

heliophobous (hē-li-of'ō-bus), *a.* [Gr. *ἥλιος*, the sun, + *-φοβος*, < *φοβεῖν*, fear.] In *phytogeog.*, shunning full sunlight: said of plants which require shade. *F. E. Clements*.

heliophotography (hē″li-ō-fō-tog'ra-fi), *n.* [Gr. *ἥλιος*, the sun, + E. *photography*.] Photography of the solar surface. *Woodbury*, Encyc Dict. of Photog., p. 304.

heliophotometer (hē″li-ō-fō-tom'e-tėr), *n.* [Gr. *ἥλιος*, the sun, + *φῶς* (*φωτ*-), light, + *μέτρον*, measure.] In *meteor.*, a special apparatus for recording the duration of sunlight: constructed by Professor F. Craveri and in use at the observatory at Brá, near Turin, since 1874.

The Heliophotometer of Craveri.

The wheel *a* and drum *b* rotate once a day by clockwork, causing a long, narrow slit of sensitized photographic paper to pass slowly below and close to the narrow slit *c*, in a thin plate of platinum. The ends of the paper strip are clamped at *e*. The mechanism is adjusted from the outside by the screw *d*, so as to keep the paper strip at the proper distance from *c*. A box about 14 x 6 x 8 inches protects the recording-apparatus.

heliophyllite (hē-li-of′i-līt), *n.* [Gr. *ἥλιος*, the sun, + *φύλλον*, leaf, + *-ite*².] Same as ★*ecdemite*.

Heliophyllum (hē-li-ō-fil′um), *n.* [NL., ⟨ Gr. *ἥλιος*, the sun, + *φύλλον*, leaf.] A genus of tetracorals of the family *Cyathophyllidæ*, which grow as simple, occasionally composite coralla, the septa bearing fine vertical ridges or carinæ It occurs in Devonian rocks.

heliopolar (hē″li-ō-pō′lär), *a.* [Gr. *ἥλιος*, the sun, + *πόλος*, pole: see *polar*.] Related to the pole of the sun's rotation as determining one axis of coördinates.

The vector diagram in *heliopolar* coordinates takes the form of a conical surface around the Sun.
Science, Feb. 7, 1902, p. 223.

helioscopy (hē″li-os′kō-pi), *n.* [Gr. *ἥλιος*, the sun, + *-σκοπια*, ⟨ *σκοπεῖν*, view.] Observation of the sun; the use of the helioscope.

heliotactic (hē″li-ō-tak′tik), *a.* [Gr. *ἥλιος*, the sun, + *τάξις*, disposition (see *tactic*).] Sensitive to or responsive to the sun's rays.

It would be extremely interesting to learn something of the mating habits of these highly *heliotactic* males and wingless females. *Biol. Bulletin*, May, 1904, p. 253.

heliotherapy (hē″li-ō-ther′a-pi), *n.* [Gr. *ἥλιος*, the sun, + *θεραπεία*, medical treatment.] Treatment of disease by means of sunlight: a form of phototherapy. *Lancet*, July 11, 1903, p. 104.

heliothermometer (hē″li-ō-thėr-mom′e-tėr), *n.* [Gr. *ἥλιος*, the sun, + E. *thermometer*.] An instrument for determining the intensity of solar radiation: usually a black-bulb thermometer inclosed in a glass-covered case internally blackened.

heliotrope, *n.* 6. A direct coal-tar color of the disazo type, derived from dianisidine. It dyes unmordanted cotton reddish violet in an alkaline salt bath.—**Alizarin heliotrope**, a mordant dyestuff which produces reddish-violet shades with an aluminium mordant. Its constitution has not been published.—**Heliotrope 2B**, a direct coal-tar color of the disazo type, derived from benzidine.

heliotropin (hē-li-ot′rō-pin), *n.* [*heliotrope* + *-in*².] Same as ★*piperonal*.

heliotypography (hē″li-ō-ti-pog′ra-fi), *n.* [Gr. *ἥλιος*, the sun, + *τύπος*, type, + *-γραφια*, ⟨ *γράφειν*, write.] The art of making heliotypes; phototypy; collotypy; that process in photoengraving in which a gelatin film toughened by the action of chrome-alum is employed.

helioxanthin (hē″li-ō-zan′thin), *n.* [Gr. *ἥλιος*, the sun, + *ξανθός*, yellow, + *-in*².] An acid coal-tar color: same as *diphenylamine-orange* (which see, under *orange*¹).

heliozincography (hē″li-ō-zing-kog′ra-fi), *n.* [Gr. *ἥλιος*, the sun, + E. *zincography*.] In *photog.*, a method of reproducing directly on a sensitized zinc plate in contact with a reversed negative. See the extract.

For the rapid reproduction of maps photozincography was, until a few years ago, the method invariably used. Two new methods have now superseded photozincography; one of these, "*heliozincography*," was worked out by the Ordnance Survey, and subsequently adopted by the Survey of India; the other, the "Vandyke process," was invented by Mr. Vandyke, of the Survey of India, and has now been adopted by the Ordnance Survey. The first method consists in reproduction direct on a sensitised zinc plate in contact with a reversed negative.
Nature, Nov. 19, 1903, p. 60.

helixigenin (hē-lik-sij′e-nin), *n.* [*helixi(n)* + *-gen* + *-in*².] A crystalline compound, $C_{26}H_{40}O_4$ obtained, together with glucose, by heating the glucoside helixin with dilute mineral acids.

helixin (hē′lik-sin), *n.* [*helix* (see def.) + *-in*.] A white crystalline glucoside, $C_{32}H_{52}O_{10} + 2H_2O$, contained in the leaves and seeds of the English ivy, *Hedera Helix*.

helixoid (hē′lik-soid), *a.* and *n.* Same as *helicoid*.

hell¹, *n.*—**Harrying or harrowing of hell.** See *harrying*.—**The hound of hell.** See ★*hound*.

hellandite (hel′an-dīt), *n.* [Named after Prof. Ahmund *Helland*, Christiania.] Asilicate of calcium, the cerium metals, aluminium, and iron, which occurs in monoclinic crystals in pegmatite veins near Kragerö, Norway: related to guarinite. The crystals are more or less hydrated and have become optically isotropic in consequence of alteration.

hell-box (hel′boks), *n.* The box provided for the bruised or condemned types of a printing-house. [Printers' slang.]

hell-devil (hel′dev″l), *n.* The hellgrammite-fly or its larva.

helleborate (hel-e-bō′rāt), *a.* [*hellebore* + *-ate*¹.] Mixed or prepared with hellebore.

helleborein (hel-e-bō′rē-in), *n.* [*hellebore* + *-e-* + *-in*².] A colorless glucoside, $C_{26}H_{44}O_{15}$, the most important constituent of black and green hellebore-roots (*Helleborus niger*, *H. viridis*, and *H. fœtidus*). It crystallizes in nodules which carbonize at 280° C., has a sweet taste, and is poisonous. Helleborin, $C_{36}H_{42}O_6$ (?), occurs with it. It is a powerful intestinal irritant and is used in veterinary medicine.

helleboresin (hel″e-bō-rez′in), *n.* [*hellebo(re)* + *resin*.] A resinous substance, $C_{30}H_{38}O_4$, formed, together with glucose, by the action of dilute acids on helleborin.

helleboretin (hel″e-bō-rē′tin), *n.* [*hellebore* + Gr. *ῥητίνη*, resin.] A greenish amorphous powder, $C_{19}H_{30}O_5$, formed, together with glucose and acetic acid, by the hydrolysis of helleboreïn.

helleboric (hel-e-bō′rik), *a.* Of or pertaining to hellebore.

helleborism, *n.* 2. Symptoms due to poisoning by hellebore.

Helleno-Italic (hel″en-ō-i-tal′ik), *a.* Relating to the ancient Greeks and Italians of Roman affinity.

heller, *n.* 2. A modern Austrian coin, the one-hundredth part of a crown.

Helleria (he-lē′ri-ä), *n.* [NL. (Ebner, 1868), ⟨ G. *Heller*, a surname.] The typical and only genus of the family *Helleriidæ*. The single species, *H. brevicornis*, is found in damp moss in Corsica and Italy.

Helleriidæ (he-lē-rī′i-dē), *n. pl.* [NL., ⟨ *Helleria* + *-idæ*.] A small family of oniscoid crustaceans containing the single genus *Helleria*.

hellhoffite (hel′hof-īt), *n.* [From a surname *Hellhoff* + *-ite*².] An explosive consisting of a mixture of dinitrobenzene and nitric acid: one of the Sprengel safety-mixtures.

hell-matter (hel′mat″ėr), *n.* Broken or battered type or printing-material that has been condemned to or put in the hell-box. See ★*hell-box*. [Printer's slang.]

helm¹, *n.*—**Helm-angle indicator.** See ★*helm-indicator*.—**Helm circle.** See ★*circle*.—**Lee helm**, the position of the tiller when the forward end or head is over on the lee side. See *alee*.—**Port helm**, the position of the tiller when its head is on the port side of the midship line of the vessel.—**Put the helm down!** an order to put the tiller to leeward.—**Put the helm up!** an order to put the tiller to windward.—**Starboard helm**, the position of the tiller when its head is on the starboard side of the midship line of the vessel.—**To carry a hard helm**, said of a vessel when the wheel turns hard or when great effort is required to get it to respond to the rudder.—**To carry a lee helm**, said of a vessel the tendency of which is to go off from the wind, and which requires a lee tiller to keep its head up. This is a dangerous fault, since it may be the means of sending a vessel off into the trough of the sea.—**To carry an easy helm**, said of a vessel which steers without effort or requires only a very moderate wheel (number of spokes) to change the direction of its head.—**To carry a weather helm.** (*a*) See *carry*. (*b*) Said of a vessel the tendency of which is to keep coming up into the wind, and which requires that the tiller be kept more or less to windward to counteract it.—**To meet the helm**, to put the tiller over to the opposite side, so as to counteract the swinging of the ship.—**To put the helm alee.** See *alee*.—**To put the helm amidships.** See *amidships*.—**To put the helm aweather**, to shove the tiller over on the weather side of the ship, so that the vessel's head will fall off to leeward.

helmet, *n.* 6. In *entom.*, the galea of an insect's maxilla.—**7.** *pl.* A breed of small, fancy pigeons which have a white body and the tail and top of head black or red. The name is given in allusion to this cap or helmet.—**Helmet creamer.** See ★*creamer*.

helmet-hornbill (hel″met-hôrn′bil), *n.* See ★*hornbill*.

helmet-urchin (hel″met-ėr′chin), *n.* Any sea-urchin of the family *Galeritidæ*.

Helmholtz pendulum. See ★*pendulum*.

Helmholtzian (helm-hōlt′si-an), *a.* Of or pertaining to the German physicist, physiologist, and psychologist Hermann Ludwig Ferdinand von Helmholtz, or to his work or theories: as, the *Helmholtzian* fundamental colors, etc.

helm-indicator (helm′in″di-kā-tor), *n.* *Naut.*, an electrical or mechanical apparatus for indicating in the pilot-house or other steering-station the position of the helm or rudder. Also called *helm-angle indicator* and *rudder-telltale*.

helminthite (hel′min-thīt), *n.* [Gr. *ἕλμις* (*ἑλμινθ-*), a worm, + *-ite*².] A trail of a worm on stone (a fossil), or a worm-like mark in stone.

Helminthochiton (hel-min-thō-kī′ton), *n.* [NL., ⟨ Gr. *ἕλμις* (*ἑλμινθ-*), worm, + NL. *Chiton*, a genus of mollusks.] A genus of chitons or polyplacophorous mollusks from the Silurian rocks.

helmintholite, *n.* 2. Same as ★*helminthite*.—3. Lumachelle or fire-marble.

helminthophobia (hel-min-thō-fō′bi-ä), *n.* [NL., ⟨ Gr. *ἕλμις* (*ἑλμινθ-*), worm, + *-φοβια*, ⟨ *φοβεῖν*, fear.] A morbid dread of intestinal worms, usually associated with an illusion of being infested with them.

helminthous (hel-min′thus), *a.* [Gr. *ἕλμις* (*ἑλμινθ-*), worm, + *-ous*.] 1. Infested with intestinal worms.—2. Relating to worms, especially intestinal worms.

helmitol (hel′mi-tōl), *n.* A colorless, crystalline citric-acid derivative of hexamethylene-tetramine; hexamethylene-tetramine-anhydromethylene citrate: recommended for cystitis, urethritis, pyelitis, etc.

helm-kick (helm′kik), *n.* A sudden jerk of the rudder in a seaway.

helm-port (helm′pōrt), *n.* Same as *rudder-port*.

helm-wind (helm′wind), *n.* Any wind that has the particular combination of moisture and wind-direction necessary to produce helm-cloud.

Helohyidæ (hē-lō-hī′i-dē), *n. pl.* [NL. *Helohyus*, type genus, + *-idæ*.] A family of extinct artiodactyl mammals which have distant affinities with the hogs whose remains occur in the Bridger Eocene. *Marsh*, 1877.

helotism, *n.* 3. The maintenance, by animals of one species, of individuals of another species in return for their labor as servants.—**4.** In *bot.*, a peculiar form of symbiosis in which one organism bears to another the relation of slave to master; noting especially the relation of the algal to the fungal component of a lichen: opposed to *mutualistic* ★*symbiosis*. *Warming*.

heloxyle (hē-lok′sil), *n.* [Gr. *ἕλος*, bog, + *ξύλον*, wood.] Peat-fiber compressed and hardened into various forms for use in building walls, ceilings, floors, etc.: esteemed where dryness, warmth, and freedom from noise are desired. *Sci. Amer. Sup.*, May 21, 1904, p. 23735.

helth, helthy. Simplified spellings of *health*, *healthy*.

helv, *n.* and *v.* A proposed simplified spelling of *helve*.

helvellaceous (hel-ve-lā′shius), *a.* Resembling or pertaining to the family *Helvellaceæ* or the order *Helvellales*.

Helvellales (hel-ve-lā′lēz), *n. pl.* [NL., ⟨ *Helvella* + *-ales*.] An order of discomycetous fungi having ascomata of various forms and including the families *Geoglossaceæ*, *Helvellaceæ*, and *Rhizinaceæ*. Also *Helvellineæ*.

helvellic (hel-vel′ik), *a.* [*Helvella* + *-ic*.] Pertaining to or derived from *Helvella*.—**Helvellic acid**, a highly poisonous organic acid found in certain mushrooms of the helvella family: particularly abundant in old plants.

Helvellineæ (hel-ve-lin′ē-ē), *n. pl.* Same as ★*Helvellales*.

Helvetian epoch. See ★*epoch*.—**Helvetian stage**, a term employed by the French geologists to designate the middle division of the Miocene Tertiary both in Switzerland and in the Paris basin. These deposits are profuse in remains of marine mollusks as well as in mammalian remains—mastodon, hippopotamus, monkeys, cats, sea-cow, dolphin, etc.

Helvidian (hel-vid′i-an), *a.* and *n.* [NL. *Helvidianus*, ⟨ *Helvidius* (see def.).] **I.** *a.* Pertaining to the doctrine of Helvidius, a layman of the fourth century, who denied the perpetual virginity of the mother of Christ.

II. *n.* One who holds the view of Helvidius.

Helygia (he-lij′i-ä), *n.* [NL. (Blume, 1826), irreg. (instead of **Helicia*) ⟨ Gr. *ἕλιξ* (*ἑλικ-*), a spiral. The name alludes to the twining habit of the species.] A genus of dicotyledonous plants belonging to the family *Apocynaceæ*. See *Parsonsia*, 2.

helypsometer (hel-ip-som′e-tėr), *n.* [Irreg. ⟨ Gr. *ἥλιος*, the sun, + E. *hypsometer*.] In *photog.*, a photographic instrument for determining latitude at sea. It consists of a hollow brass hemisphere, about 10 inches in diameter, swung in gimbals, and has a closely fitting cover, pierced at its center with a small round hole. The apparatus is mounted on a foot or base. The silvered interior surface is sensitized with the vapor of iodine. When the cover of the instrument is adjusted and placed in sunlight, the path of the sun is traced on the sensitive surface. By applying a circular protractor after the exposure, the sun's altitude is found in degrees and minutes.

hemachromatosis, hæmachromatosis (hem″a-krō-ma-tō′sis), *n.* Bad forms for ★*hematochromatosis*.

hemacite, hæmacite (hem'ą-sīt), *n.* [Altered, by blunder or intention, from **hematite* (which is used in another sense), ‹ Gr. *αἷμα*, blood, + *-ite*[2].] A plastic material, a substitute for horn, made from blood with the addition of sundry vegetable and mineral materials.

hemacyte, hæmacyte (hem-ą-sīt), *n.* Bad forms for ★*hemocyte*, ★*hematocyte*.

hemacytozoön, hæmacytozoön (hem″ą-sī-tō-zō′on), *n.*; pl. *hemacytozoa, hæmacytozoa* (-ą). [Prop. *hemo-*; ‹ Gr. *αἷμα*, blood, + *κύτος*, a hollow (a cell), + *ζῷον*, animal.] An animal microparasite of the blood-cells. *Buck*, Med. Handbook, V. 674.

hemad, hæmad (hem′ad), *n.* [Gr. *αἷμα*, blood, + *-ad*[2].] A hematocyte or blood-corpuscle.

hemadromometer, hæmadromometer (hem″ą-drō-mom′e-tėr), *n.* [Prop. *hemo-*; ‹ Gr. *αἷμα*, blood, + *δρόμος*, a running, + *μέτρον*, measure.] A device for measuring the rapidity of the blood-current.

hemagglutinative, hæmagglutinative (hem-ą-glö′ti-nā-tiv), *a.* Causing agglutination or clumping of red blood-corpuscles.

I have also tested abrin and ricin, which are strongly *hæmagglutinative*, without finding a corresponding protection. *Hideyo Noguchi*, in Jour. Exper. Med., VII. 201.

hemagglutinin, hæmagglutinin (hem-a-glö′-ti-nin), *n.* Same as ★*hemoagglutinin*.

hemal. I. *a.*—**Hemal axis.** Same as *aorta*.—**Hemal canal.** See ★*canal*[1].—**Hemal process,** the arch below the centrum of a vertebra in fishes. *Starks*, Synonymy of the Fish Skeleton, p. 524.—**Hemal ridge.** See ★*ridge*.

II. *n.* Same as *hemal spine*.

Caudal with long neurals and *hæmals*.
Encyc. Brit., XXIX. 397.

hemalum, hæmalum (hem′ą-lum), *n.* [*hemal, hæmal*, + *-um*.] Same as *ammonia* ★*hematata*. *Lancet*, July 4, 1903, p. 13.

hemamœba, *n.* See ★*Hæmamœba*, 2.

hemangioma, hæmangioma (hem-an-ji-ō′-mą), *n.*; pl. *hemangiomata, hæmangiomata* (-ma-tą). [NL. *hæmangioma*, ‹ Gr. *αἷμα*, blood, + NL. *angioma*.] A tumor composed of blood-vessels; an angioma.

hemapophysis, *n.* 2. A lateral process in fishes to which the rib is usually attached. The term *hemapophysis* is used by Vogt and Yung for the bone so named by Owen and for the bone called *parapophysis* by Owen. *Starks*, Synonymy of the Fish Skeleton, p. 525.

hemarthrosis, hæmarthrosis (hem-är-thrō′-sis), *n.* [Gr. *αἷμα*, blood, + *ἄρθρον*, joint, + *-osis*.] Effusion of blood into a joint.

hemase, hæmase (hem′ās), *n.* [Gr. *αἷμα*, blood, + *-ase*.] A catalase found in the blood.

hematachometry, hæmatachometry (hem″ą-ta-kom′e-tri), *n.* [Prop. *hemo-*; ‹ Gr. *αἷμα*, blood, + *ταχύς*, swift, + *μέτρον*, measure.] Measurement of the rapidity of the circulation of the blood.

hemataërometer, hæmataërometer (hem″-ą-ta-e-rom′e-tėr), *n.* [Gr. *αἷμα*(*τ*-), blood, + *ἀήρ*, air, + *μέτρον*, measure.] A device for estimating the pressure of gases in the blood. *Buck*, Med. Handbook, VI. 950.

hematate, hæmatate (hem′ą-tāt), *n.* [Gr. *αἷμα*(*τ*-), blood, + *-ate*[1].] A compound of hematein.—**Ammonia hematate,** an unstable violet-black compound, $C_{16}H_{12}O_6{}^2NH_3$, of ammonia and hematein. It is used as a stain for microscopical preparations.

hematherapy, hæmatherapy (hem-ą-ther′ą-pi), *n.* Bad forms for ★*hematotherapy*.

hematicum, hæmaticum (hē-mat′i-kum), *n.* [NL. *hæmaticum*, ‹ Gr. *αἱματικός*, of blood: see *hematic*.] A red-brown, clear, aqueous-alcoholic solution of neutral iron compounds. It is used in medicine.

hematid, hæmatid (hem′ą-tid), *n.* [Gr. *αἷμα*(*τ*-), blood, + *-id*[2].] A red blood-corpuscle.

hematimeter, hæmatimeter (hem-ą-tim′e-tėr), *n.* [Properly **hematometer*, ‹ Gr. *αἷμα* (*αἱματ*-), blood, + *μέτρον*, measure.] A form of hemochromometer, hemoglobinometer, or hematinometer.

hematimetry, hæmatimetry (hem-ą-tim′e-tri), *n.* [Properly **hematometry*: see ★*hematimeter*.] The process of counting the number of corpuscles in a given quantity of blood.

hematinic, *n.* **II.** *a.* Relating to hematin.—**Hematinic acids,** two acids, $C_8H_9O_4N$ and $C_8H_8O_5$, discovered by Kuster, formed upon oxidation of hematin.

hematinon (hē-mat′i-non), *n.* [Also erron. *hæmatinone* (Watts); ‹ L. *hæmatinon* (sc. *vitrum*, glass), ‹ Gr. *αἱματῖνον*, neut. of *αἱμάτινος*, bloody: see *hæmatinum* and *hematin*.] Same as *hæmatinum*; also, a similar red glass made by modern processes. *H. Watts*, Dict. of Chem., III. 3.

hematite, *n.* 2. An intaglio cut in hematite. There is in the British Museum a certain lenticular *hematite*.
A. B. Cook, in Jour. Hellenic Studies, XIV. 133.

Brown hematite. Under this name, or that of *brown iron ore*, are included both the mineralogical species limonite and goethite. *Thorpe*, Dict. Applied Chem., I. 387.

hematobium, hæmatobium (hem-ą-tō′bi-um), *n.*; pl. *hematobia, hæmatobia* (-ą). [NL. *hæmatobium*, ‹ Gr. *αἷμα*(*τ*-), blood, + *βίος*, life.] A blood-parasite; one of the *Hæmatozoa*.

hematoblastic, hæmatoblastic (hem″ą-tō-blas′tik), *a.* [*hematoblast* + *-ic*.] Pertaining to or of the nature of a hematoblast; having reference to the formation of blood-corpuscles.

hematocathartic, hæmatocathartic (hem-ą-tō-ka-thär′tik), *a.* [Gr. *αἷμα*(*τ*-), blood, + *καθαρτικός*, cathartic.] Tending to purify the blood.

hematocele, *n.*—**Pelvic hematocele,** effusion of blood into the cellular tissue beneath the peritoneal covering of the uterus and adnexa, or into the cavity of the peritoneum between the uterus and the rectum.—**Pudendal hematocele.** See *pudendal*.—**Scrotal hematocele,** a tumor caused by effusion of blood into the tunica vaginalis testis or into the tissues of the scrotum.

hematochezia, hæmatochezia (hem″ą-tō-kē′-zi-ą), *n.* [NL. *hæmatochezia*, ‹ Gr. *αἷμα*(*τ*-), blood, + *χέζειν*, evacuate the bowels.] Passage of blood from the bowels.

hematochlorin, hæmatochlorin (hem″ą-tō-klō′-rin), *n.* [Gr. *αἷμα*(*τ*-), blood, + *χλωρός*, green, + *-in*[2].] A green pigment which has been obtained from the marginal zone of the placenta.

hematochromatosis, hæmatochromatosis (hem″ą-tō-krō-mą-tō′sis), *n.* [Gr. *αἷμα*(*τ*-), blood, + *χρῶμα*, color, + *-osis*.] The general staining of the tissues with blood-pigment.

hematochrome, hæmatochrome (hem′ą-tō-krōm), *n.* [Gr. *αἷμα*(*τ*-), blood, + *χρῶμα*, color.] **1.** The red coloring-matter of the eye-spot or stigma of the *Flagellata* and other *Protozoa*.—**2.** The red coloring-matter of *Sphærella* and a few other algæ. It is contained in an oily solution instead of a chromatophore.

hematocrit, hæmatocrit (he-mat′ō-krit), *n.* [Gr. *αἷμα*(*τ*-), blood, + *κριτής*, judge, ‹ *κρίνειν*, separate, decide.] A centrifuge with accurately graduated tubes, used for determining the volume of the corpuscular elements in a given quantity of blood. Also *hematokrit, hæmatokrit*.

hematocyanin, hæmatocyanin (hem″ą-tō-sī′-ą-nin), *n.* A more correct form of *hemocyanin*.

hematocyst, hæmatocyst (hem′ą-tō-sist), *n.* [Gr. *αἷμα*(*τ*-), blood, + *κύστις*, bladder (cyst).] **1.** A cyst with bloody contents.—**2.** Hemorrhage into the bladder.

hematocyte, hæmatocyte (hem′ą-tō-sīt), *n.* [Gr. *αἷμα*(*τ*-), blood, + *κύτος*, a hollow (a cell).] A blood-corpuscle.

hematocytometer, hæmatocytometer (hem-ą-tō-sī-tom′e-tėr), *n.* [Gr. *αἷμα*(*τ*-), blood, + *κύτος*, a hollow (a cell), + *μέτρον*, measure.] A device for counting the blood-cells.

hematodynamics, hæmatodynamics (hem″-ą-tō-dī-nam′iks), *n.* [Gr. *αἷμα*(*τ*-), blood, + E. *dynamics*.] A more correct form of *hemadynamics* (which see).

hematodynamometer, hæmatodynamometer (hem″ą-tō-dī-na-mom′e-tėr), *n.* [Gr. *αἷμα*(*τ*-), blood, + E. *dynamometer*.] A more correct form of *hemadynamometer* (which see).

hematodyscrasia, hæmatodyscrasia (hem″-ą-tō-dis-krā′si-ą), *n.* [NL. *hæmatodyscrasia*, ‹ Gr. *αἷμα*(*τ*-), blood, + *δυσκρασία*, bad temperament: see *dyscrasia*.] A disease of the blood.

hematogen, hæmatogen (hem′ą-tō-jen), *n.* [Gr. *αἷμα*(*τ*-), blood, + *-γενης*, -producing, + *-in*[2].] An iron-containing nuclein which may be obtained from the yolk of hens' eggs. It is supposed to be concerned in the production of hemoglobin.

hematogenous, *a.* **2.** Relating to the formation of blood; derived from blood.—**Hematogenous jaundice.** See ★*jaundice*.

hematoglobinuria, hæmatoglobinuria (hem″-ą-tō-glō-bi-nū′ri-ą), *n.* [Gr. *αἷμα*(*τ*-), blood, + E. *globin* + Gr. *οὖρον*, urine.] A more correct form of *hemoglobinuria*.

Hematoid cancer. Same as *fungus hematodes*.

hematokrit, hæmatokrit, *n.* See ★*hematocrit*.

hematolin, hæmatolin (hem-ą-tō′lin), *n.* A dark-blue metallically lustrous compound, $C_{68}H_{78}O_7N_8$, obtained from hematin. See *hematin*, 1.

hematologist, hæmatologist (hem-ą-tol′ō-jist), *n.* [*hematology* + *-ist*.] One who makes a special study of the blood and of the changes which occur in it in health and in disease. *Lancet*, June 25, 1904, p. 1790.

hematolysis, hæmatolysis (hem-ą-tol′i-sis), *n.* [Gr. *αἷμα*(*τ*-), blood, + *λύσις*, dissolution.] The breaking down or dissolution of the red blood-corpuscles with decreased coagulability of the blood; hemolysis.

hematolytic, hæmatolytic (hem″ą-tō-lit′ik), *a.* Of or pertaining to hematolysis; hemolytic.

hematomania, hæmatomania (hem″ą-tō-mā′-ni-ą), *n.* [Gr. *αἷμα*(*τ*-), blood, + *μανία*, madness.] A craze for shedding blood.

The mania for murder which seized the Parisian populace in 1793 was a true pathological outburst. No sense of patriotism thrilled the crowds who ran by the tumbrils and surrounded the guillotines. It was *hæmatomania*, the blood-madness, that was upon them.
Brinton, Basis of Social Relations, p. 116.

hematomphalocele, hæmatomphalocele (hem-ą-tom′fą-lō-sēl), *n.* [Gr. *αἷμα*, blood, + *ὀμφαλός*, navel, + *κήλη*, tumor.] A blood-filled sac projecting at the umbilical opening.

hematomyelia, hæmatomyelia (hem″ą-tō-mī-ē′li-ą), *n.* [Gr. *αἷμα*(*τ*-), blood, + *μυελός*, marrow.] Effusion of blood into the substance of the spinal cord.

hematomyelopore, hæmatomyelopore (hem″-ą-tō-mī′e-lō-pōr), *n.* [Gr. *αἷμα*, blood, + *μυελός*, marrow, + *πόρος*, passage.] A cavity in the substance of the spinal cord remaining after the absorption of a blood-clot.

hematonephrosis, hæmatonephrosis (hem″-ą-tō-nē-frō′sis), *n.* [Gr. *αἷμα*(*τ*-), blood, + *νεφρός*, kidney, + *-osis*.] Hemorrhage into the pelvis of the kidney.

hematonic, hæmatonic (hem-ą-ton′ik), *a.* and *n.* [Prop. *hemo-*; ‹ Gr. *αἷμα*, blood, + *τόνος*, tone, + *-ic*.] **I.** *a.* Tending to improve the quality of the blood.

II. *n.* A blood-tonic.

Iron and arsenic are invaluable *hæmatonics*.
Med. Rec., July 11, 1903, p. 56.

hematopathology, hæmatopathology (hem″-ą-tō-pa-thol′ō-ji), *n.* [Gr. *αἷμα*(*τ*-), blood, + E. *pathology*.] The science of the diseases affecting the constitution of the blood.

hematophagous, hæmatophagous (hem-ą-tof′ą-gus), *a.* [Gr. *αἷμα*(*τ*-), blood, + *φαγεῖν*, eat.] **1.** Feeding on blood-corpuscles: said of the plasmodium of malaria and kindred diseases. —**2.** Feeding upon blood, as do some insects and the bats of the genus *Desmodus*.

hematophilic, hæmatophilic (hem″ą-tō-fil′-ik), *a.* [Gr. *αἷμα*(*τ*-), blood, + *φίλος*, loving, + *-ic*.] Same as *hemophilic*.

hematophyte, hæmatophyte (hem′ą-tō-fīt), *n.* [Gr. *αἷμα*(*τ*-), blood, + *φυτόν*, plant.] A bacterial parasite in the blood.

hematoplania, hæmatoplania (hem″ą-tō-plā′ni-ą), *n.* [Gr. *αἷμα*(*τ*-), blood, + *πλάνη*, wandering.] Discharge of blood from some unusual locality, as in vicarious menstruation.

hematoplast, hæmatoplast (hem′ą-tō-plast), *n.* [Gr. *αἷμα*(*τ*-), blood, + *πλαστός*, formed.] Same as *hematoblast*.

hematoplastic, hæmatoplastic (hem″ą-tō-plas′tik), *a.* [*hematoplast* + *-ic*.] Same as ★*hematoblastic*.

hematoporphyrin, hæmatoporphyrin (hem″-ą-tō-pôr′fi-rin), *n.* [Gr. *αἷμα*(*τ*-), blood, + *πορφύρα*, purple dye, + *-in*[2].] A purplish pigment obtained by treating hematin with concentrated sulphuric acid saturated with hydrobromic acid, the iron of the hematin being split off as the result. Hematoporphyrin is thus hematin minus iron. The substance is apparently related closely to a corresponding pigment which is derived from the chlorophyl of plants and which is termed phylloporphyrin. Both are possibly different oxidation-products of one and the same mother-substance—a chemical evidence of the close genetic relationship between animal and plant life.

hematoporphyrinuria, hæmatoporphyrinuria (hem″ą-tō-pôr″fi-ri-nū′-ri-ą), *n.* [*hematoporphyrin* + Gr. *οὖρον*, urine.] The presence of hematoporphyrin in the urine when voided. *Lancet*, April 18, 1903, p. 1097.

hematoporphyroidin, hæmatoporphyroidin (hem″ą-tō-pôr-fi-rō′i-din), *n.* A decomposition-product of hematoporphyrin, described by Nobel.

hematoscope, hæmatoscope (hem′ą-tō-skōp), *n.* [Gr. *αἷμα*(*τ*-), blood, + *σκοπεῖν*, view.] A form of spectroscope used in examining the spectrum of the blood.

hematoscopy, hæmatoscopy (hem-ą-tos′kō-pi), *n.* [Gr. *αἷμα*(*τ*-), blood, + *-σκοπια*, ‹ *σκοπεῖν*, view.] Examination of the blood by means of the hematospectroscope. Also *hemoscopy*.

hematosepsis, hæmatosepsis (hem″ạ-tō-sep′sis), *n.* [Gr. *αἷμα(τ-)*, blood, + *σῆψις*, putrefaction.] Same as *septicemia*.

hematospectroscope, hæmatospectroscope (hem″ạ-tō-spek′trō-skōp), *n.* [Gr. *αἷμα(τ-)*, blood, + E. *spectroscope*.] A spectroscope used to determine the presence and amount of hemoglobin in the blood.

hematotherapy, hæmatotherapy (hem″ạ-tō-ther′ạ-pi), *n.* [Gr. *αἷμα(τ-)*, blood, + *θεραπεία*, medical treatment.] Treatment of disease by blood or some preparation from it.

hematotoxic, hæmatotoxic (hem″ạ-tō-tok′sik), *a.* [Gr. *αἷμα(τ-)*, blood, + *τοξικ(όν)*, poison.] **1.** Relating to toxemia; causing blood-poisoning.—**2.** Same as ★*hematolytic*.

hematotympanum, hæmatotympanum (hem″ạ-tō-tim′pạ-num), *n.* [Gr. *αἷμα(τ-)*, blood, + *τύμπανον*, drum: see *tympanum*.] An effusion of blood into the drum of the ear. *Phil. Med. Jour.*, Jan. 31, 1903, p. 200.

hematoxic, hæmatoxic (hem-ạ-tok′sik), *a.* Same as ★*hematotoxic*.

hematozoön, hæmatozoön (hem″a-tō-zō′on), *n.*; pl. *hematozoa, hæmatozoa* (-ạ). [Gr. *αἷμα(τ-)*, blood, + *ζῷον*, animal.] A blood-parasite, as the organism of malaria; a hematozoan.

hematuresis, hæmaturesis (hem″ạ-tū-rē′sis), *n.* [Gr. *αἷμα(τ-)*, blood, + *οὔρησις*, urination.] Same as *hematuria*.

hemautogram, hæmautogram (hem-â′tō-gram), *n.* [Gr. *αἷμα*, blood, + *αὐτός*, self, + *γράμμα*, writing.] Same as ★*hemautograph*.

hemautograph, hæmautograph (hem-â′tō-grāf), *n.* [Gr. *αἷμα*, blood, + *αὐτός*, self, + *γράφειν*, write.] A tracing made by blood spurting from a punctured artery, used to register the blood-pressure.

hemautographic, hæmautographic (hem′â-tō-graf′ik), *a.* Of or pertaining to hemautography or the hemautograph; traced by the hemautograph: as, a *hemautographic* pulse curve.

hemautography, hæmautography (hem-â-tog′rạ-fi), *n.* [As *hemautograph* + *-y*³.] A method of recording variations in blood-pressure, by which an incision is made into an artery and the escaping jet of blood is directed against a moving strip of paper.

hemera (hem′ẹ-rạ), *n.*; pl. *hemeræ* (-rē). [Gr. *ἡμέρα*, a day.] In *geol.*, a subdivision of a zone corresponding to the vertical distribution of characteristic species. *Dana*, Manual of Geol., p. 407.

hemeralope (hem′ẹ-ra-lōp), *n.* [A back-formation from *hemeralopia*.] One who is suffering from hemeralopia. *Buck*, Med. Handbook, IV. 627.

hemeralopic, *a.* **II.** *n.* A hemeralope.

After the capture of Sebastopol the number of *hemeralopics* was so great in the French army that certain regiments could not furnish the necessary number of men to mount guard. *Buck*, Med. Handbook, II. 620.

hemeranthous (hem-ẹ-ran′thus), *a.* [Gr. *ἡμέρα*, day, + *ἀνθεῖν*, bloom, + *-ous*. [In *bot.*: (*a*) Opening only in sunlight: said of flowers. (*b*) Bearing hemeranthous flowers: said of plants. *Pound and Clements*.

hemeranthy (hem-ẹ-ran′thi), *n.* [Gr. *ἡμέρα*, day, + *ἀνθεῖν*, bloom, + *-y*³.] In *bot.*, the character of being hemeranthous.

hemeristiid (hem-ẹ-ris′ti-id), *n.* and *a.* **I.** *n.* One of the *Hemeristiidæ*.

II. *a.* Having the characters of, or pertaining to, the *Hemeristiidæ*.

hemerobaptism (hem″ẹ-rō-bap′tizm), *n.* [NL. *hemerobaptista*, < Gr. *ἡμέρα*, day, + *βαπτιστής*, baptist.] Daily baptism practised by certain Jewish and Christian sects. The Essenes (which see) practised daily baptism. The pious among the modern Hasidim still practise daily immersion before morning prayers, so as to pronounce the name of Jehovah in a state of purity. Some of the earlier Christians, including the Ebionites, adopted the same practice.

hemerobiid (hem″ẹ-rō-bī′id), *n.* and *a.* **I.** *n.* A member of the neuropterous family *Hemerobiidæ*.

II. *a.* Of or belonging to the family *Hemerobiidæ*.

hemerology (hem-ẹ-rol′ō-ji), *n.* [Gr. as if **ἡμερολογία* (*ἡμερολόγιον*, a calendar), < *ἡμερολογεῖν*, count by days, < *ἡμέρα*, day, + *λόγος*, a count.] The knowledge of calendars; the art of making calendars; a treatise on calendars.

No better idea can be formed of the number and variety of the Babylonian feasts than by reading a *hemerology* of the intercalary month of Elul, where we find that every day is dedicated to one or other of the gods, and certain rites and ceremonies prescribed for each.

A. H. Sayce, Anc. Babylonians, p. 69.

hemerozoic (hem-ẹ-rō-zō′ik), *a.* [Also erroneously *himerozoic*; < Gr. *ἥμερος*, tame, + *ζῷον*, animal, + *-ic*.] In *geol.*, noting a division of the Human period characterized by evidence of domesticated animals.

hemerythrin, hæmerythrin (hem-e-rith′rin), *n.* [Gr. *αἷμα*, blood, + *ἐρυθρός*, red, + *-in*².] A red coloring-matter found in the corpuscles of the fluid in the body-cavity of gephyreans, probably having a respiratory function like the hemoglobin of other animals. Also *hemærythrin*.

hemiachromatopsia (hem″i-a-krō-ma-top′si-ạ), *n.* [Gr. *ἡμι-*, half, + *χρῶμα(τ-)*, color, + *ὄψις*, view.] Partial or complete color-blindness involving one half of the field of vision. *Encyc. Brit.*, XXXI. 569.

hemialbumin (hem″i-al-bū′min), *n.* [*hemi-* + *albumin*.] A hypothetical albuminous substance containing only the hemicomplex of Kühne, namely, that complex which is readily digested by trypsin and is ultimately converted into leucin and tyrosin and related acids.

hemialgia (hem-i-al′ji-ạ), *n.* [NL., < Gr. *ἡμι-*, half, + *ἄλγος*, pain.] Neuralgia involving only one side of the head or body.

hemiamaurosis (hem″i-am-â-rō′sis), *n.* [NL., < Gr. *ἡμι-*, half, + *ἀμαύρωσις*, dimness (see *amaurosis*).] Hemianopsia.

hemiamblyopia (hem″i-am-bli-ō′pi-a), *n.* [NL., < Gr. *ἡμι-*, half, + *ἀμβλύς*, dim, + *ὤψ* (*ὠπ-*), eye. Defective sight in one half of the visual field; incomplete hemianopsia.

Thus if the left occipital region be injured in a man, a hemianopia of the left sides of both retinæ follows, and the patient sees nothing in the right half of his visual field. If the same operation be performed in a dog, it causes not a complete hemianopia but a *hemiamblyopia*. The dog is not blind for the right half of its visual field, but has only a reduced power of vision.

J. Loeb, Comp. Physiol. of the Brain, p. 271.

hemianatropous (hem-i-a-nat′rō-pus), *a.* Half-anatropous. See *amphitropous*. *Gray*.

Hemiancistrus (hem″i-an-sis′trus), *n.* [NL., < Gr. *ἡμι-*, half, + *Ancistrus*, a related genus.] A genus of South American fresh-water fishes of the family *Loricariidæ*.

hemiangiocarpic (hem″i-an″ji-ō-kär′pik), *a.* [Gr. *ἡμι-*, half, + *ἀγγεῖον*, a vessel, + *καρπός*, fruit.] Having the hymenium covered with a membrane for a part of the time: said of the conidiophore of a fungus.

hemianopia (hem″i-a-nō′pi-ạ), *n.* [NL., < Gr. *ἡμι-*, half, + *ἀν-* priv. + *ὤψ* (*ὠπ-*), eye.] Same as *hemianopsia*. *J. Loeb*, Comp Physiol. of the Brain, p. 271.

hemianopic (hem″i-a-nō′pik), *a.* Same as *hemianoptic*.

Hemianthias (hem-i-an′thi-as), *n.* [NL., < Gr. *ἡμι-*, half, + *Anthias*, a related genus.] A genus of tropical fishes, of the family *Serranidæ*, related to the sea-bass.

Hemiascales (hem″i-as-kā′lēz), *n. pl.* [NL., < Gr. *ἡμι-*, half, + *ἀσκός*, a bag (see *ascus*, 1), + *-ales*.] An order containing what are regarded as the lowest forms of ascomycetous fungi. They produce a many-celled mycelium and bear sporangia (asci) which contain a large and indefinite number of spores. Also called *Hemiascineæ* and *Hemiasci*.

Hemiasci (hem-i-as′sī), *n. pl.* [NL., < Gr. *ἡμι-*, half, + *ἀσκός*, a bag (see *ascus*, 1).] Same as ★*Hemiascales*.

Hemiascineæ (hem″i-a-sin′ẹ̄-ē), *n. pl.* [NL.] Same as ★*Hemiascales*.

hemiaspidid (hem-i-as′pi-did), *n.* One of the *Hemiaspididæ*.

Hemiaspididæ (hem″i-as-pid′i-dē), *n. pl.* [NL., < *Hemiaspis*(*-aspid-*) + *-idæ*.] A family of fossil merostomatous crustaceans of primitive character, typified by *Hemiaspis*, which has a short cephalothorax, nine thoracic segments, and a long tail-spine. All members of the family are from the Silurian rocks.

Hemiaspis limuloides. Woodw. Silurian; Leintwardine, England. (After Woodward.) (From Zittel's "Palæontology.")

hemiaspidoid (hem-i-as′pi-doid), *a.* [*Hemiaspis* (*-aspid-*) + *-oid*.] Similar or related to *Hemiaspis*.

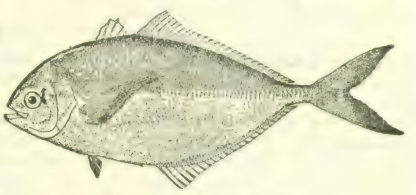
Hemiaspis (hem-i-as′pis), *n.* [NL., < Gr. *ἡμι-*, half, + *ἀσπίς*, a shield.] The typical genus of the family *Hemiaspididæ*.

hemiataxia (hem″i-a-tak′si-ạ), *n.* [NL., < Gr. *ἡμι-*, half, + *ἀταξία*, disorder.] Incoördination affecting one side of the body.

hemiataxy (hem″i-a-tak′si), *n.* Same as ★*hemiataxia*.

Hemibasidiales (hem″i-ba-sid-i-ā′lēz), *n. pl.* [NL., < *hemi-* + *basidium* (which see) + *-ales*.] Same as ★*Ustilaginales*. Also *Hemibasidii* and *Hemibasidieæ*.

hemibenthic (hem-i-ben′thik), *a.* [*hemi-* + *benthic*.] Incompletely benthic; floating or swimming in the water at one time or at one stage of development and living upon or in the bottom at another time or stage. Most hydroids, which are sessile and give rise to swimming medusæ, and most echinoderms, which swim in their larval condition and creep over the bottom when adult, are hemibenthic. Also *hemibenthonic*. See ★*benthic*, *pelagic*, ★*planktonic*.



In the neritic epiplankton of polar waters the larvæ of *hemibenthic* forms are almost absent; indeed, the development of cold-water benthos, whether shallow or abyssal, appears to be in most cases direct, that is, without a larval metamorphosis. *Encyc. Brit.*, XXXIII. 936.

hemibenthonic (hem-i-ben-thon′ik), *a.* Same as ★*hemibenthic*.

hemibody (hem′i-bod-i), *n.* [*hemi-* + *body*.] An albumin which is made up of hemigroups, in the sense of Kühne—for example, casein. See ★*hemigroup*.

Hemibrycon (hem-i-brī′kon), *n.* [NL., < Gr. *ἡμι-*, half, + NL. *Brycon*.] A genus of South American fresh-water fishes of the family *Characinidæ*.

Hemicaranx (hem-i-kar′anks), *n.* [NL., < Gr. *ἡμι-*, half, + NL. *Caranx*.] A genus of pompanos, or fishes of the family *Carangidæ*. *H. amblyrhynchus* is the best-known species.

Hemicaranx amblyrhynchus.
(From Bulletin 47, U. S. Nat. Museum.)

hemicellulose (hem-i-sel′ū-lōs), *n.* [*hemi-* + *cellulose*.] A form of cellulose which is easily hydrolyzed by dilute acids and readily attacked by certain enzyms.

hemicephalous (hem-i-sef′ạ-lus), *a.* [Gr. *ἡμι-*, half, + *κεφαλή*, head, + *-ous*.] Lacking one side of the head: as, a *hemicephalous* fetus. *Buck*, Med. Handbook, I. 129.

Hemichorda (hem-i-kôr′dạ), *n. pl.* [NL., < Gr. *ἡμι-*, half, + *χορδή*, string, cord.] A group of worm-like marine animals considered to be related to the *Chordata*, owing to their possession of gill-slits, a partly dorsal nervous system, and a rudimentary notochord. It includes the genera *Balanoglossus, Cephalodiscus*, and *Rhabdopleura*. The name was introduced in 1884, by Bateson, as a phyletic name for the *Enteropneusta*, then regarded as a class and containing only the genus *Balanoglossus*.

Hemicidaridæ (hem″i-si-dar′i-dē), *n. pl.* [NL., < *Hemicidaris* (*-arid-*) + *-idæ*.] A family of fossil sea-urchins, or *Echinoidea*, having very large spine-tubercles decreasing in size toward the poles, ambulacra increasing in width actinally, and few interambulacral plates. Its species occur in the Permian, Jurassic, and Cretaceous rocks.

Hemicidaris (hem-i-sid′ạ-ris), *n.* [NL., < Gr. *ἡμι-*, half, + NL. *Cidaris*, a genus of sea-urchins.] The typical genus of the *Hemicidaridæ*.

hemiclastic (hem-i-klas′tik), *a.* [Gr. *ἡμι-*, half, + *κλαστός*, broken.] Half clastic: in *petrog.*, applied by Senft to volcanic tuffs and conglomerates.

hemiclistogamous (hem″i-klīs-tog′ạ-mus), *a.* [*hemi-* + *clistogamous*.] Opening only partially, hence not easily cross-fertilized: said of flowers. Hemiclistogamous flowers are either chasmantherous or clistantherous. *Pound and Clements*, Plant Life of Nebraska.

hemicollin (hem-i-kol′in), *n.* [Gr. *ἡμι-*, half, + *κόλλα*, glue, + *-in*².] A vitreous compound, $C_{47}H_{70}O_{19}N_{14}$, formed, together with semiglutin, by boiling glue for thirty hours with water.

hemicomplex (hem-i-kom′pleks), *n.* Same as ★*hemigroup* (in the sense of Kühne).

hemicrescentic (hem″i-kre-sen′tik), *a.* Having the shape of half a crescent: applied to the form of the bill in some birds.

hemicrystalline (hem-i-kris'ta-lin), *a.* [Gr. *ἡμι-*, half, + *κρυστάλλινος*, crystalline.] Same as ★*hypocrystalline*.

hemicyclone (hem-i-sī'klōn), *n.* [*hemi-* + *cyclone*.] In *meteor.*, the upper or lower half of the ideal theoretical cyclonic system, the dividing plane being supposed to be horizontal.

hemidiorite (hem-i-dī'ọ̄-rīt), *n.* [Gr. *ἡμι-*, half, + E. *diorite*.] A name given by Dana (1883) to mica-diorite in order to limit the name *diorite* to hornblendic varieties of the rock.

hemiepiphyte (hem-i-ep'i-fīt), *n.* See ★*epiphyte*, 1.

hemifacial (hem-i-fā'shal), *a.* [*hemi-* + L. *facies*, face, + *-al*[1].] Of or relating to one side of the face.

hemiglossitis (hem″i-glo-sī'tis), *n.* [NL., ‹ Gr. *ἡμι-*, half, + *γλῶσσα*, tongue, + *-itis*.] Inflammation of one lateral half of the tongue.

hemigroup (hem'i-grōp), *n.* [*hemi-* + *group*.] Literally, a half-group. The terms *hemigroup* and *antigroup*, in reference to the constitution of albumins, were originally introduced by Kühne. According to his doctrine, two large complexes exist in most albumins, which are separated during the process of digestion. Of these the hemicomplex is readily hydrolyzed by trypsin, while the anticomplex is quite resistant. In the former the monoamido acids prevail, in the latter the diamido acids. Protoalbumose may be regarded as representing the hemigroup, and heteroalbumose the antigroup. Collagen apparently contains no hemigroup, while casein is a pure hemibody. Kühne's original view is still upheld, but it is now recognized that the majority of albumins contain a third large complex, in which the carbohydrate group is represented.

hemihedral, *a.* 3. In the relation of so-called hemihedral crystals to crystal symmetry, see ★*symmetry*.

hemiheterocercal (hem-i-het'e-rō-sėr″kal), *a.* [*hemi-* + *heterocercal*.] In fishes, having the upper lobe of the externally symmetrical caudal fin partly or completely covered with scales.

hemiheterocercy (hem-i-het'e-rō-sėr″si), *n.* [*hemi-* + *heterocercy*.] A condition denoted by the existence of a hemiheterocercal tail, as in fishes.

hemihydrate (hem-i-hī'drāt), *n.* [*hemi-* + *hydrate*.] In *chem.*, a compound containing water in the proportion of half a molecule for one molecule of another substance, as a salt. Thus calcium sulphate as thrown down in the crystalline state from the water in steam-boilers has the composition $CaSO_4.\frac{1}{2}H_2O$—more correctly represented as $(CaSO_4)_2.H_2O$—and is spoken of as a *hemihydrate*.

hemihyperæsthesia (hem″i-hī″pėr-es-thē'si-ä), *n.* [*hemi-* + *hyperæsthesia*.] Increased sensitiveness limited to one side of the body.

hemihypertrophy (hem″i-hī-pėr'trọ̄-fi), *n.* [*hemi-* + *hypertrophy*.] Hypertrophy of one half: as, facial *hemihypertrophy*.

hemi-idealism (hem″i-ī-dē'a-lizm), *n.* The doctrine that secondary qualities are relative to cognition, while primary qualities are independent of it.

Hemilepidotinæ (hem″i-lep″i-dō-tī'nē), *n. pl.* [NL., ‹ *Hemilepidotus* + *-inæ*.] A subfamily of sculpins, or *Cotidæ*, typified by the genus *Hemilepidotus*.

Hemilepidotus (hem-i-lep-i-dō'tus), *n.* [NL., ‹ Gr. *ἡμι-*, half, + *λεπιδωτός*, scaled, scaly, ‹ *λεπίς*, scale.] A genus of sculpins of the North Pacific, characterized by the presence of two

Hemilepidotus hemilepidotus.
(From Bulletin 47, U. S. Nat. Museum.)

rows of scales along the side separated by a naked area. The species are known in Bering Sea as *Irish lords*. *H. hemilepidotus* and *H. jordani* are both common. The former is distinguished by its spotted ventral fins.

hemilogous (he-mil'ọ̄-gus), *a.* [*hemi-* + (*ana*)*logous*.] In *chem.*, a term which has been suggested for series of organic compounds the terms of which differ by *n*CH.

hemilytic (hem-i-lit'ik), *a.* [*hemi-* + (*dia*)*lytic*.] Noting a stage or condition in which evolutionary progress is retarded by inbreeding and close selection which eliminates the normal individual diversity of the natural species, as in carefully selected domesticated varieties. Compare ★*catalytic*, 2, ★*dialytic*, 4, and ★*prostholytic*. *O. F. Cook*.

hemimellitic (hem″i-me-lit'ik), *a.* [*hemi-* + *mellitic*.] Noting an acid, a colorless compound, $C_6H_3(\overset{1}{C}O\overset{2}{O}H)_3$, sparingly soluble in water, from which it is deposited in needles, melting at 185° C.

hemimerid (he-mim'e-rid), *n.* and *a.* **I.** *n.* A member of the family *Hemimeridæ*.

II. *a.* Of or belonging to the family *Hemimeridæ*.

Hemimeridæ (hem-i-mer'i-dē), *n. pl.* [NL., ‹ *Hemimerus* + *-idæ*.] A remarkable family of blind wingless *Orthoptera* inhabiting Africa and comprising the single genus *Hemimerus*. The development is intra-uterine. *H. hanseni* lives on the body of a large rat. A distinct order, *Diploglossata*, was erected by Saussure for these insects, but has not been accepted.

hemimetabolous (hem″i-me-tab'ọ̄-lus), *a.* [*hemi-* + *metabolous*.] Undergoing partial metamorphosis, as one of the *Hemimetabola*.

Hemimorphic classes of crystals. See ★*symmetry*.

hemimorphous (hem-i-môr'fus), *a.* [Gr. *ἡμι-*, half, + *μορφή*, form, + *-ous*.] Same as *hemimorphic*. *Nature*, Sept. 24, 1903, p. 520.

hemimorphy (hem'i-môr-fi), *n.* [*hemimorph-ic* + *-y*[3].] Same as *hemimorphism*.

hemin, hæmin (hem'in), *n.* [Gr. *αἷμα*, blood, + *-in*[2].] A crystalline substance which may be obtained from hematin on treating it with salt and glacial acetic acid. Its formula is $C_{34}H_{33}N_4O_4FeCl$. The crystals are quite characteristic in appearance, and their formation has for many years represented one of the most important tests for blood-coloring matter. See *Teichmann's* ★*crystals*.—**Hemin test.** See ★*test*[1].

hemioctahedral (hem-i-ok-ta-hē'dral), *a.* [*hemioctahedr(on)* + *-al*[1].] Tetrahedral; of or pertaining to a hemioctahedron.

hemioctahedron (hem-i-ok-ta-hē'drọn), *n.* [*hemi-* + *octahedron*.] A tetrahedron; also, a hemipyramid.

hemiologamous (hem″i-ọ̄-log'a-mus), *a.* [Gr. *ἡμι-*, half, + *ὅλ ς*, whole, + *γάμος*, marriage.] Having one fertile and one neuter flower; sesquialteral: said of the spikelets of some grasses, as species of *Panicum*. *Brande. N. E. D.*

hemiope (hem'i-ōp), *n.* [Gr. *ἡμίοπος* (sc. *αὐλός*, flute), with half the usual holes, namely, with only three holes, ‹ *ἡμι-*, half, + *ὀπή*, hole.] An ancient flute with but few holes.

hemiparabola (hem″i-pa-rab'ọ̄-lä), *n.* [*hemi-* + *parabola*.] That part of a parabola which lies on one side of the axis.

hemiparæsthesia (hem-i-par-es-thē'si-ä), *n.* [*hemi-* + *paræsthesia*.] Perverted sensation on one side of the body, right or left.

hemiparalysis (hem″i-pa-ral'i-sis), *n.* [*hemi-* + *paralysis*.] Same as *hemiplegia*.

hemiparasite (hem-i-par'a-sīt), *n.* [*hemi-* + *parasite*.] A partially parasitic plant.

Like hemisaprophytes, *hemiparasites*, which obtain only a portion of their necessary carbon in an organic form, more or less resemble autotrophic plants as regards the amount of chlorophyll they contain and as regards the form of their leaves.

A. F. W. Schimper (trans.), Plant-Geog., p. 203.

hemiparasitic (hem″i-par-a-sit'ik), *a.* Pertaining to or having the character of a hemiparasite

The degree of connexion between the two and the dependence of the parasite upon the host vary between the completeness of that of holoparasitic Rhizanths, in which little more than the flower of the parasite is visible upon the outside of the stem of the host and the parasitism is absolute, and the limitation of that of the *hemiparasitic* Rhinantheæ, in which to all appearance there is an independent autotrophic geophyte. *Encyc. Brit.*, XXV. 439.

hemipelic (hem-i-pel'ik), *a.* [Gr. *ἡμι-*, half, + *πηλός*, clay, + *-ic*.] Of a medium fine clayey consistency. See ★*pelogenous*.

hemipenis (hem-i-pē'nis), *n.*; pl. *hemipenes* (-nēz). [NL., *hemi-* + *penis*.] One of the two intromittent organs of snakes.

Like the Sauria the Serpentes possess two intromittent organs or *hemipenes*.

Cope, Rept. U. S. Nat. Mus., 1898, p. 700.

hemipeptone (hem-i-pep'tōn), *n.* [*hemi-* + *peptone*.] A hypothetical peptone containing those groups of the albuminous molecule which can be readily liberated on tryptic digestion. According to Kühne's doctrine, gastric digestion leads to the formation of an amphopeptone in which the hemipeptone and antipeptone are still united. During tryptic digestion the hemi- and anti-group are at once separated, the former giving rise to leucin and tyrosin, etc.

hemiphonon (hem-i-fō'non), *n.*; pl. *hemiphona* (-nä). [NL., ‹ Gr. *ἡμίφωνον*, a semivowel, as *r* and *s* (Aristotle), neut. of *ἡμίφωνος*, 'half pronounced,' ‹ *ἡμι-*, half, + *φωνή*, sound.] In *phonol.*, a semivowel.

hemipic (he-mip'ik), *a.* [*hemi-* + (*o*)*p*(*ium*)(ꝑ) + *-ic*.] Same as ★*hemipinic*.

hemipinic (hem-i-pin'ik), *a.* [*hemi-* + (*o*)*p*(*ium*) + *-in* + *-ic*.] Noting an acid, a colorless compound, $(\overset{4}{C}H_3O\overset{5}{)}_2C_6H_2(\overset{1}{C}O\overset{2}{O}H)_2$, formed, together with opianic acid and meconin, by the oxidation of narcotin and narceine. It crystallizes with water of crystallization in quadratic plates, melts at 182° C., and readily forms an anhydrid.

hemiplane (hem'i-plān), *n.* [*hemi-* + *plane*[1].] That part of a plane on one side of a straight line of the plane.

hemiplankton (hem-i-plangk'ton), *n.* [Gr. *ἡμι-*, half, + NL. *plankton*.] In *phytogeog.*, that part of a plant plankton which occurs in shallow water and sinks to the bottom at certain periods, and is thus not wholly independent of the soil, as the typical plankton is. Some macrophytes (*Hydrocharis*, etc.) are included with the microphytes.

hemiplanktonic (hem-i-plangk-ton'ik), *a.* Of or pertaining to hemiplankton.

hemiplegia, *n.*—**Alternate hemiplegia,** paralysis of the face on one side and of the extremities on the other, or of an arm and a leg on opposite sides.—**Crossed hemiplegia.** Same as *alternate* ★*hemiplegia*.—**Hephestic hemiplegia.** Same as *hammer-*★*palsy*.—**Spinal hemiplegia,** hemiparaplegia due to lesion of the spinal cord.

hemiplegiac (hem-i-plē'ji-ak), *a.* and *n.* **I.** *a.* Same as *hemiplegic*.

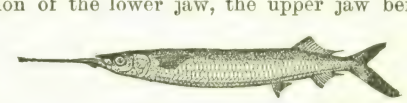
II. *n.* One who is suffering from hemiplegia.

Hemipristis (hem-i-pris'tis), *n.* [NL., ‹ Gr. *ἡμι-*, half, + *πρίστις*, a large fish.] A genus of selachian fishes or sharks of the family *Carchariidæ*. They have the principal teeth large and serrated, and the lower ones slender, incurved, and smooth on the edge. The genus is common in the Miocene and Oligocene Tertiary, and is represented by one living species.

hemiprotein (hem-i-prō'tē-in), *n.* [*hemi-* + *protein*.] Same as ★*hemialbumin*.

hemipsammic (hem-ip-sam'ik), *a.* [Gr. *ἡμι-*, half, + *ψάμμος*, sand, + *-ic*.] Of a medium fine sandy texture. See ★*psammogenous*.

hemipteroid (hē-mip'te-roid), *a.* and *n.* [*Hemiptera* + *-oid*.] **I.** *a.* Having the characters of the *Hemiptera* or *Hemipteroidea*.



II. *n.* One of the *Hemipteroidea*.

Hemipteroidea (hē-mip-te-roi'dē-ä), *n. pl.* [NL., ‹ *Hemiptera* + *-oidea*.] In Scudder's classification of the Paleozoic insects, an order constructed on the same plan as the living *Hemiptera*, but distinguished in name because of their more primitive expression.

hemipterygoid (hem-ip-ter'i-goid), *n.* A small bone resting upon and fusing with the posteroventral part of the palatine, with which the pterygoid articulates.

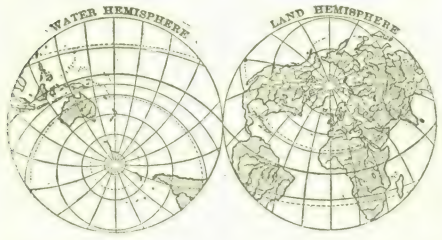
Hemipuccinia (hem″i-puk-sin'i-ä), *n.* [NL., ‹ *hemi-* + *Puccinia*.] A group of species of the genus *Puccinia* in which only uredospores and teleutospores are known. *Schröter*.

Hemiramphidæ (hem-i-ram'fi-dē), *n. pl.* [NL., ‹ *Hemiramphus* + *-idæ*.] A family of soft-rayed fishes characterized by the great elongation of the lower jaw, the upper jaw being

Hemiramphus brasiliensis.
From Bulletin 47, U. S. Nat. Museum.)

very short. The species are known as *half-beaks* and are found in the tropical seas. The typical genus is *Hemiramphus*.

hemisaprophyte (hem-i-sap'rọ̄-fīt), *n.* [*hemi-* + *saprophyte*.] A partially saprophytic plant. See the quotation under ★*hemiparasite* and compare ★*holoparasite*.



hemisomnambulism (hem″i-som-nam'bū-lizm), *n.* In *mental pathol.*, a partial somnambulism; a state in which the subject, while normally conscious and retaining his normal personality, shows certain somnambulistic symptoms (as writing automatically).

As to the persistency of the normal consciousness, while these automatic phenomena are being accomplished, it is the most curious and most discussed characteristic of *hemisomnambulism*.

P. Janet (trans.), Mental State of Hystericals, p. 428.

hemisphere, *n.*—**Biot's hemispheres,** an apparatus used to demonstrate that a charge of static electricity is distributed on the surface. It consists of a polished brass globe on an insulated stand, and of two hollow hemispheres of lacquered brass with insulating handles. If the globe is charged and is then incased by the hemispheres, the latter on being removed take the charge with them on their outer surfaces.—**Hemisphere**

of illumination, that half of a planet's or satellite's surface upon which the sun is shining.—**Hemisphere of vision,** the hemisphere which an observer sees.—**Land hemisphere,** in *phys. geog.*, that half of the earth's surface which is chosen so as to include the greatest possible area of land. The pole of the land hemisphere lies in southeastern England or northwestern France.—**Vegetative hemisphere,** that half or portion of the egg which contains the food-yolk, as distinguished from the *animal hemisphere*, which consists of the more active protoplasm and nuclear elements.—**Water hemisphere,** that half of the earth's surface which contains the greatest area of water.

Hemispheric anomaly, the departure of a local temperature from the corresponding hemispheric normal for the given latitude: the anomaly of Dove (1846).

hemistater (hem-i-stā′tėr), *n.* [Gr. *ἡμιστάτηρον*, ‹ *ἡμι-*, half, + *στατήρ*, stater.] An ancient Greek coin of the value of half a stater.

hemisternum (hem-i-stėr′num), *n.*; pl. *hemisterna* (-nä). One of the two bars of cartilage from which the sternum is developed.

hemisymmetric (hem″i-si-met′rik), *a.* [*hemi-* + *symmetric.*] **1.** Symmetrical with regard to one axis only, as the parabola in contradistinction to the ellipse and hyperbola.—**2.** Pertaining to or exhibiting hemisymmetry. See ★*hemisymmetry*, 2. *Bateson*, Study of Variation, p. 35.—**3.** In *crystal.*, hemihedral; characterized by hemisymmetry, that is, by a grade of symmetry which requires only half the faces that belong to the corresponding form of the holosymmetric (holohedral) type. See ★*symmetry.*

hemisymmetrical, *a.* Same as *hemisymmetric.*

hemisymmetry, *n.* **2.** In *biol.*, bilateral symmetry; the construction of the body of an organism in such a way that one half is a reversed copy of the other.

hemisystematic (hem″i-sis-te-mat′ik), *a.* Hemisymmetric.

hemitery (hem′i-ter-i), *n.* [Gr. *ἡμι-*, half, + *τέρας*, monster, + *-y*[3].] Congenital malformation which is not sufficient in degree to amount to monstrosity.

Hemitomes (he-mit′ō-mēz), *n.* [NL. (Gray, 1857), ‹ Gr. *ἡμιτόμης*, a half-eunuch (in allusion to the atrophy of one of the anther cells); or a mistaken form for **Hemitomias*, ‹ Gr. *ἡμιτομίας*, half a eunuch. Cf. *ἡμίτομος*, half cut through, ‹ *ἡμι-*, half, + *-τομος*, ‹ *ταμεῖν*, cut.] A genus of dicotyledonous plants belonging to the family *Monotropaceæ*. See *Newberrya.*

Hemitripterinæ (hem″i-trip-te-rī′nē), *n. pl.* [NL., ‹ *Hemitripterus* + *-inæ.*] A subfamily of gadoid fishes characterized by the many-rayed spinous dorsal fin, which is developed into two fins, and by the rough surface of the body. The typical genus is *Hemitripterus.*

hemitropism (hē-mit′rō-pizm), *n.* [*hemitrop-ic* + *-ism.*] The crystallization characteristic of ordinary twin crystals, in which one half of the compound crystal has a position relatively to the other half as if it had been revolved through 180°. Also *hemitropy.*

Hemitrypa (hem-i-trī′pä), *n.* [NL., ‹ Gr. *ἡμι-*, half, + *τρῦπα*, a hole.] A genus of fossil *Bryozoa*, of the family *Fenestellidæ.* It differs from *Fenestella* in having a reticulate superstructure corresponding in position with the apertures of the mesh on the lower side. This structure rests on pillars which rise at regular intervals from the carinæ of the branches. The genus occurs in Silurian and Devonian rocks.

hemivertebra (hem-i-vėr′tē-brä), *n.*; pl. *hemivertebræ* (-brē). [*hemi-* + *vertebra.*] One of the vertebræ, in fishes, in which ossification develops below the notochord a hippocrepian plate to which the hemal arches in the caudal region are attached. The vertebral centrum is represented by a pair of lateral plates which are usually fused into a second hippocrepian half-ring, the vertebræ thus consisting of two half-rings.

Hemizonia (hem-i-zō′ni-ä), *n.* [NL. (De Candolle, 1836), ‹ Gr. *ἡμι-*, half, + *ζώνη*, girdle. Each ray achenium is half inclosed by an involucral bract.] A genus of plants of the family *Asteraceæ.* They are erect branching annuals, viscid-glandular and ill-scented, with narrow alternate leaves and yellow or white ray-flowers. There are about 12 species, natives of western North America. Like the species of the closely related genus *Madia*, they are commonly called *tar-weed.*

hemlock, *n.*—**Creeping hemlock.** Same as *ground-hemlock.*—**Western hemlock bark-borer.** See ★*bark-borer.*—**Hemlock bark extract.** See ★*extract.*

hemming-machine (hem′ing-ma-shēn″), *n.* In *sheet-metal work*, a machine for folding over the edges of narrow strips of sheet-metal used in making the handles for cans and other tinware.

hemoagglutinin, hæmoagglutinin (hem″ō-a-glö′ti-nin), *n.* [Gr. *αἷμα*, blood, + E. *agglutinin.*] An agglutinin which will cause the agglutination of red blood-corpuscles.

hemochromatosis, hæmochromatosis (hem-ō-krō-ma-tō′sis), *n.* [Gr. *αἷμα*, blood, + *χρῶμα(τ-)*, color, + *-osis.*] A condition, associated with extensive blood-destruction, in which a deposition of hematogenous pigment occurs in the liver and other organs. The pigment usually found is hemosiderin.

There was a profound *hæmochromatosis*, consisting mainly in the deposition of iron-free pigment granules in the intestinal mucosa, the liver, the blood, the lymph channels, and in the renal epithelium.
Jour. Exper. Med., March 17, 1902, p. 252.

hemochrome, hæmochrome (hem′ō-krōm), *n.* [Gr. *αἷμα*, blood, + *χρῶμα*, color.] The coloring-matter of the blood.

hemochromogen, hæmochromogen (hem-ō-krō′mō-jen), *n.* [Gr. *αἷμα*, blood, + *χρῶμα*, color, + *-γενης*, -producing.] The iron-containing pigment-radical of the coloring-matter of the blood, hemoglobin. It readily combines with oxygen to form hematin. The latter bears the same relation to oxyhemoglobin which hemochromogen bears to hemoglobin. In acid solutions hemochromogen loses its iron and is converted into hematoporphyrin. In alkaline solutions it presents a cherry-red color, and on spectroscopic examination gives rise to two bands of absorption. The substance is crystallizable.

hemochromometer, hæmochromometer (hem″ō-krō-mom′e-tėr), *n.* [Gr. *αἷμα*, blood, + *χρῶμα*, color, + *μέτρον*, measure.] An apparatus for determining the hemoglobin in fluids by a comparison with standard solutions; a hemoglobinometer.

hemocœle, *n.* **2.** A system of blood-sinuses formed by the enlargement and union of blood-vessels.

[The] blood-vessels have swollen and united to form an extensive series of blood-sinuses, to which I have given the name "*hæmocœl.*"
E. R. Lankester, Nat. Sci., April, 1897, p. 268.

hemocœlic, hæmocœlic (hem″-ō-sē′lik), *a.* [*hemocœle* + *-ic.*] Of or pertaining to a hemocœle.

With regard to the development of the vascular system, little can be said here, except that it appears to arise in all cases from the spaces of the mesoblastic reticulum. These acquire special epithelial walls, and form the main trunks and network of smaller vessels found in animals with a canalicular vascular system, or the large sinus-like spaces characteristic of animals with a *hæmocœlic* body-cavity.
Encyc. Brit., XXVIII. 146.

hemocœloma, hæmocœloma (hem″ō-sē-lō′mä), *n.* [NL.; also erroneously *hema-*, *hæmacœloma*, ‹ Gr. *αἷμα*, blood, + *κοίλωμα*, a hollow (see *cœloma*).] In *embryol.*, the portion of the true body-cavity, or cœloma, which in the mammalian embryo is constricted off to form the cavity of the heart.

hemoconion, hæmoconion (hem-ō-kō′ni-on), *n.*; pl. *hemo-*, *hæmoconia* (-ä). [Also *hemokonion*; NL. *hæmoconion*, ‹ Gr. *αἷμα*, blood, + *κόνις*, dust.] One of certain minute granules which occur free in the blood-plasma and are supposedly derived from leucocytes. Also called *dust-particles of Müller.*

hemoconiosis, hæmoconiosis (hem-ō-kō-ni-ō′sis), *n.* [*hemoconi(on)* + *-osis.*] A condition in which there is an unusual amount of blood-dust in freshly drawn blood.

hemocrystallin, hæmocrystallin (hem-ō-kris′ta-lin), *n.* Same as *hematocrystallin.*

hemocyte, hæmocyte (hem′ō-sīt), *n.* Same as ★*hematocyte.*

hemocytolysis, hæmocytolysis (hem″ō-sī-tol′i-sis), *n.* [*hemocyte* + Gr. *λύσις*, dissolution.] A breaking down or dissolution of the blood-corpuscles.

hemocytometer, hæmocytometer (hem″ō-sī-tom′e-tėr), *n.* Same as ★*hematocytometer.* *Nature*, Feb. 26, 1903, p. 388.

hemodynamics, hæmodynamics (hem″ō-dī-nam′iks), *n.* [Gr. *αἷμα*, blood, + E. *dynamics.*] A more correct form of *hemadynamics* (which see).

hemodynamometer, hæmodynamometer (hem-ō-dī-na-mom′e-tėr), *n.* [Gr. *αἷμα*, blood, + E. *dynamometer.*] A more correct form of *hemadynamometer* (which see).

hemoferrum, hæmoferrum (hem-ō-fer′um), *n.* [Gr. *αἷμα*, blood, + L. *ferrum*, iron.] A dry organic compound of iron made from ox-blood and consisting principally of oxyhemoglobin.

hemofuscin, hæmofuscin (hem-ō-fus′in), *n.* [Gr. *αἷμα*, blood + L. *fuscus*, fuscous, + *-in*[2].] A pigment, derived from hemoglobin, which is free from iron. Its formation is often associated with degenerative changes, as in atrophy of the heart and unstriped muscle-tissue.

hemogallol, hæmogallol (hem-ō-gal′ōl), *n.* [Gr. *αἷμα*, blood, + *gall(ic)*[2] + *-ol.*] A reduction-product of hemoglobin which contains iron. It is a reddish-brown powder used as a hematogenous tonic.

hemogenesis, hæmogenesis (hem-ō-jen′e-sis), *n.* [Gr. *αἷμα*, blood, + *γένεσις*, generation.] Same as *hematogenesis.*

hemoglobinated, hæmoglobinated (hem-ō-glō′bi-nā-ted), *a.* [*hemoglobin* + *-ate*[1] + *-ed*[2].] Containing or tinctured with hemoglobin. *Buck*, Med. Handbook, II. 21.

hemoglobinometer, *n.*—**Gower's hemoglobinometer,** an apparatus for determining the percentage of hemoglobin in blood. A small drop of blood (20 cubic millimeters) is diluted with water to measure 2 cubic centimeters. The color of this solution is then compared with a standard color produced by dissolving picrocarmine in glycerin.

hemoglobinous, hæmoglobinous (hem-ō-glō′bi-nus), *a.* [*hemoglobin* + *-ous.*] Containing or tinged by hemoglobin, as the nervous system of heteronemertines.

The *hæmoglobinous* nerve tissue is thus brought close to the surrounding medium.
E. R. Lankester, Treatise on Zoology, IV. 186.

hemoglobinuric, hæmoglobinuric (hem-ō-glō-bi-nū′rik), *a.* Relating to or affected with hemoglobinuria.—**Hemoglobinuric fever.** Same as *hemoglobinuria.*

hemogregarian, hæmogregarian (hem″ō-grē-gā′ri-an), *n.* [*Hemogregar(ina)* + *-ian.*] A hemogregarine; any member of the family *Hæmogregarinidæ*. *Nature*, Aug. 11, 1904, p. 360.

hemogregarine, hæmogregarine (hem-ō-greg′a-rin), *n.* [Gr. *αἷμα*, blood, + E. *gregarine.*] The trophozoite stage of some *Hæmosporidia*, the organism having a fixed body-form and, though motile, not being amœboid like a hemamœba.

hemoid, hæmoid (hē′moid), *a.* [Gr. *αἱμοειδής*, ‹ *αἷμα*, blood, + *εἶδος*, form.] Having the appearance of blood.

hemokonia, hæmokonia, *n. pl.* See ★*hemoconion.*

hemol, hæmol (hē′mol), *n.* [Gr. *αἷμα*, blood, + *-ol.*] A reduction-product of hemoglobin which contains iron. It is used as a hematogenous tonic.—**Copper hemol,** a dark-brown powder consisting of a copper compound of hemol. It contains 2 per cent. of copper, and is used in tuberculosis, scrofula, etc. Also called *cuprohemol.*—**Hemol mercuric iodide,** a hemol compound said to contain 13 per cent. of mercury and 28 per cent. of iodine; hydrargyri-iodo-hemol: used in syphilis.—**Zinc hemol,** a zinc compound of hemol containing 1 per cent. of zinc: antidiarrheic and hematinic.

hemolin (hem′ō-lin), *n.* [Gr. *αἷμα*, blood, + *-ol* + *-in*[2].] A trade-name for a solution of the coloring-matter of logwood used in dyeing leather. *Flemming*, Practical Tanning, p. 120.

hemolutein, hæmolutein (hem-ō-lū′tē-in), *n.* [Gr. *αἷμα*, blood, + L. *luteus*, muddy, + *-in*[2].] A yellow lipochromic pigment which is found in the blood-serum of some animals.

hemolymph, *n.* **2.** The blood and the lymph considered together.

In the second case (advanced cirrhosis) the lymphoid tissue presented the characteristics of hyperplastic *hæmolymph* nodes. *Med. Record*, May 30, 1903, p. 870.

Hemolymph glands or **nodes.** See ★*gland.*

hemolymphocytotoxin, hæmolymphocytotoxin (hem-ō-lim″fō-sī-tō-tok′sin), *n.* A toxin which acts upon the blood- and lymph-corpuscles.

hemolysin, hæmolysin (he-mol′i-sin), *n.* [*hemolysis* + *-in*[2].] A cellular product, having the character of an amboceptor, which causes the dissolution of the red corpuscles of the blood in the presence of a suitable complement. Certain hemolysins can be classed as cytotoxins. These result on immunization of one animal with the blood-corpuscles of an animal of an alien species. Also called *hemotoxin.*

hemolysis, hæmolysis (he-mol′i-sis), *n.* [Gr. *αἷμα*, blood, + *λύσις*, dissolution.] The process of dissolution of the blood-corpuscles (notably the red cells) by means of specific lysins (hemolysins). Also *hematolysis.*

An investigation of the effect of antitoxines (salts, proteids, normal serum, antitetanolysin, etc.) on the power of toxines (ammonia, alkalies, tetanolysin) to produce *hæmolysis* of blood corpuscles, and an attempt to explain the results on the basis of the mass law.
Jour. Phys. Chem., May, 1904, p. 366.

hemolytically, hæmolytically (hem-ō-lit'i-kal-i), *adv.* In reference to hemolysis; by hemolysis.

hemolyzability, hæmolyzability (hem″ō-līza-bil′i-ti), *n.* Susceptibility or liability to hemolysis.

hemolyzable, hæmolyzable (hem′ō-lī-za-bl), *a.* [*hemolyze* + *-able.*] Capable of undergoing hemolysis.

hemolyze, hæmolyze (hem′ō-līz), *v. t.*; pret. and pp. *hemo-, hæmolyzed*, ppr. *hemo-, hæmolyzing.* [Also *hemolyse;* < *hemoly(sis)* + *-ize.*] To bring about hemolysisin.

The blood of animals also is *hæmolysed* by foreign sera —the red corpuscles of the rabbit, for example, being dissolved readily by dog's serum.
Jour. Exper. Med., March 17, 1902, p. 280.

hemomediastinum, hæmomediastinum (hem″ō-mē″di-as-tī′num), *n.* [Gr. *αἷμα*, blood, + NL. *mediastinum.*] Effusion of blood into the mediastinum.

hemometer, *n.* 2. Same as *hemoglobinometer.*

hemopathology, hæmopathology (hem″ō-pathol′ō-ji), *n.* [Gr. *αἷμα*, blood, + E. *pathology.*] The science of the diseases of the blood.

hemoperitoneum, hæmoperitoneum (hem-ō-per″i-tō-nē′um), *n.* [Gr. *αἷμα*, blood, + *περιτόναιον*, peritoneum.] Effusion of blood into the peritoneal cavity.

hemophile, hæmophile (hem′ō-fil), *a.* and *n.* [Gr. *αἷμα*, blood, + *φιλεῖν*, loving.] **I.** *a.* Having reference to an abnormal tendency toward hemorrhage.

II. *n.* One who is subject to hemophilia.

hemophiliac, hæmophiliac (hem-ō-fil′i-ak), *a.* and *n.* Same as ★*hemophile. Buck*, Med. Handbook, V. 361.

hemophobia, hæmophobia (hem-ō-fō′bi-ä), *n.* [Gr. *αἷμα*, blood, + *-φοβια*, < *φοβεῖν*, fear.] Same as *hematophobia.*

hemoplasmodium, hæmoplasmodium (hem″-ō-plas-mō′di-um), *n.* [NL., < Gr. *αἷμα*, blood, + *plasmodium.*] 1. The plasmodium of a hematozoan, or blood-parasite, such as the malarial plasmodium.— 2. Same as *hematozoan.*

hemopoiesis, hæmopoiesis (hem″ō-poi-ē′sis), *n.* Same as *hematopoiesis.*

hemopoietic, hæmopoietic (hem″ō-poi-et′ik), *a.* Same as *hematopoietic.*

hemoptysic, hæmoptysic (hem-op-tiz′ik), *a.* Same as *hemoptysical.*

hemopyrrol, hæmopyrrol (hem-ō-pir′ōl), *n.* [Gr. *αἷμα*, blood, + *πυρρός*, reddish, + *-ol.*] A decomposition-product which can be obtained from hematoporphyrin, as well as from phylloporphyrin, on reduction with phosphonium iodide.

hemorhodin, hæmorhodin (hem-ō-rō′din), *n.* A rose-colored pigment found in the blood of the sea-hare, *Aplysia depilans.*

hemorrhage, *n.*— **Primary hemorrhage,** hemorrhage occurring at the time the causal injury is received or an operation is performed.— **Punctate hemorrhage,** minute areas of blood effused into the tissues from ruptured capillary vessels.

Hemorrhagic septicemia. Same as *cattle-and-game* ★*disease.*

hemorrhagin, hæmorrhagin (hem′ō-raj-in), *n.* [*hemorrhage* + *-in*[2].] The cytotoxin (endotheliotoxin) which causes the destruction of vascular endothelial cells and thus brings about the occurrence of extravasations of blood.

Hemorrhoidal arteries. See ★*artery.*

hemoscope, hæmoscope (hem′ō-skōp), *n.* Same as ★*hematoscope.*

hemoscopy, hæmoscopy (hem-os′kō-pi), *n.* Same as ★*hematoscopy.*

hemosiderin, hæmosiderin (hem-ō-sid′e-rin), *n.* [Gr. *αἷμα*, blood, + *σίδηρος*, iron, + *-in*[2].] A dark pigment containing iron which has been found in extravasated blood and thrombi. It is undoubtedly derived from the blood-pigment.

hemosiderosis, hæmosiderosis (hem-ō-sid-e-rō′sis), *n.* [*hemosider(in)* + *-osis.*] A form of hemachromatosis in which hemosiderin is deposited in the tissues or organs.

hemosozic, hæmosozic (hem-ō-sō′zik), *a.* [Irreg. < Gr. *αἷμα*, blood, + *σώζειν*, save, + *-ic.*] Same as ★*antihemolytic.*

hemostat, hæmostat (hem′ō-stat), *n.* [Gr. *αἷμα*, blood, + *στατός*, < *ἱστάναι*, cause to stand.] An instrument used to compress a bleeding vessel in order to arrest hemorrhage.

Hemorrhage is arrested by picking up the divided blood-vessels with *hemostats.*
Phil. Med. Jour., Jan. 31, 1903, p. 223.

Hemostatic forceps. See ★*forceps* and ★*hemostat.*

hemotachometry, hæmotachometry (hem″-ō-ta-kom′e-tri), *n.* [Gr. *αἷμα*, blood, + *ταχύς*, swift, + *-μετρια*, measurement.] Measurement of the rapidity of the circulation of the blood.

hemotoxic, hæmotoxic (hem-ō-tok′sik), *a.* Same as ★*hematotoxic* and *hemolytic.*

hemotoxin, hæmotoxin (hem″ō-tok′sin), *n.* Same as ★*hemolysin.*

hemotropic, hæmotropic (hem-ō-trop′ik), *a.* [Gr. *αἷμα*, blood, + *-τροπος*, < *τρέπειν*, turn, + *-ic.*] A term sometimes applied to the cytophilic group of the hemolytic amboceptors. —**Hemotropic poison.** See ★*poison.*

hemp, *n.*— **African hemp.** (*b*) Same as *South African* ★*hemp.* See *Sparmannia.*— **American hemp.** (*a*) The common hemp as produced in America. (*b*) The Indian hemp, *Apocynum*, chiefly *A. cannabinum.* (*c*) Same as *American jute* (which see, under *jute*[2]).— **Blackfellow's hemp,** in Australia, the fiber yielded by *Commersonia Fraseri*, a hardy evergreen shrub or small tree belonging to the family *Sterculiaceæ;* or, the plant itself. The bark is used by the settlers as a tying material.— **Bologna hemp,** a very fine, flexible, lustrous white Italian hemp. —**Canadian hemp.** Same as *American* ★*hemp* (*b*).— **Cebu hemp.** Same as *Manila hemp* (which see, under *hemp*).— **Colorado river hemp,** the plant *Sesban macrocarpa* or its fiber product. This plant ranges in low grounds from Pennsylvania to Central America, growing in vast quantities along the Colorado river in Arizona, where it is called *wild hemp.* Its bast has been represented as a fiber of great economic capacity, but as yet has no commercial standing. See *sesban*, 2 [*cap.*].— **Dekhan hemp,** a small herbaceous shrub of the mallow family, *Hibiscus cannabinus*, a native of India, but largely cultivated throughout the world for its fiber. It is also grown in Persia and southeastern Russia, where it is known as *kanaff.* See *Hibiscus*, 1, and *bastard jute*, under *jute*[2].— **Female hemp,** properly, the pistillate plant of the common hemp, as *male hemp* should be the staminate plant; but, according to Lyons ("Plant Names"), in popular use the application of these names is reversed, doubtless from the more fruitful appearance of the staminate panicle.— **Hemp broom-rape, canker, oil.** See ★*broom-rape*, etc.— **Ife hemp,** the fiber of *Cordyline cylindrica.* See ★*ife.*— **Indian hemp.** (*c*) The Indian mallow or velvetleaf, *Abutilon Abutilon.* Also called *American jute.* (*d*) The black Indian hemp, *Apocynum cannabinum.* See *Apocynum.* (*e*) The white Indian hemp, either of two American species of *Asclepias, A. incarnata*, the swamp-milkweed, and *A. pulchra*, the hairy milkweed, which yield a white or light-gray fiber of some commercial value.— **Italian hemp,** *Cannabis sativa*, or common hemp.— **Kaffir hemp,** the strong white bast-fiber obtained from the star-bush, *Grewia occidentalis.*— **Ko hemp,** the fiber obtained from the succulent stems of a twining leguminous plant, *Pueraria Thunbergiana*, native to China.— **Male hemp.** See *female* ★*hemp.*— **Mauritius hemp,** a commercial name for the fiber obtained from the large fleshy leaves of *Furcræa fœtida*, a plant widely distributed in the tropics of both hemispheres, but cultivated on a commercial scale only on the island of Mauritius. It is used in the manufacture of bags, hammocks, etc., but principally for mixing with manila and Sisal fiber in making medium grades of cordage.— **New Zealand hemp.** Same as *New Zealand flax.* See *Phormium.*— **Pooa** (or **pua) hemp,** the fiber of *Maoutia Puya.* See *pooa.*— **Russian hemp,** a commercial grade of the ordinary hemp fiber, grown in Russia or Poland.— **South African hemp,** *Vossianthus Africanus*, a tall shrub of the linden family which yields a strong bast. It is a native of the Cape of Good Hope, but is widely cultivated in greenhouses, and in Queensland is grown for its fiber.— **Swedish hemp,** the common nettle, *Urtica dioica*, said to be used as a fiber plant in Sweden. See *nettle*[1], 1.— **Tampico hemp.** Same as *Tampico* ★*fiber.* —**Wild hemp.** See *Colorado river* ★*hemp.*

hemp-beater (hemp′bē″tėr), *n.* One who beats retted stems of hemp to separate the fibrous bast.

Hempel's gas-analysis apparatus. See ★*apparatus.*

Hemphill porcelain. See *American* ★*porcelain.*

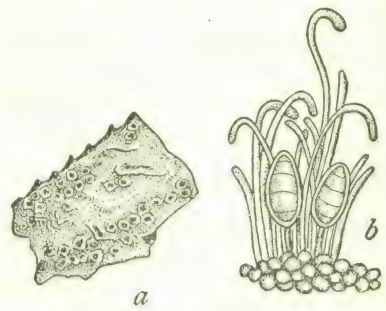
Hempstead beds. Same as *Hampstead* ★*beds.*

hen[1], *n.*— **Hen and chickens,** a name for the Pleiads. —**Native hen,** *Tribonyx mortieri*, an Australian rail.

hen[1] (hen), *v. i.*; pret. and pp. *henned*, ppr. *henning.* To back down in a cowardly way; funk out: as, he *henned* at the last minute. [Scotch.]

henchwoman (hench′wům″an), *n.* A female attendant. [Nonce-word.]

Gudrun and her faithful *henchwoman*, Dalla, illustrate in themselves the conservativeness of the feminine mind.
Daily Telegraph, April 20, 1886, p. 2.



hendecane (hen′de-kān), *n.* [Gr. *ἑνδεκα*, eleven, + *-ane.*] Another name for ★*undecane.*

hendecatoic (hen-dek-a-tō′ik), *a.* [Gr. *ἑνδεκα*, eleven, + *-to-* + *-ic.*] Same as ★*undecylic.*

hendecenoic (hen″dē-se-nō′ik), *a.* [Gr. *ἑνδεκα*, eleven, + *-en* + *-o-* + *-ic.*] Same as ★*undecylenic.*

hendecoic (hen-dē-kō′ik), *a.* [Gr. *ἑνδεκα*, eleven, + *-o-* + *-ic.*] Same as ★*undecylic.*

Hendersonia (hen-dėr-sō′ni-ä), *n.* [NL. (Berkeley, 1841), named for E. G. *Henderson*, an English botanist.] A large genus of sphæropsidaceous fungi having the pycnidia borne

Hendersonia lineolans.
a, habit of the fungus, somewhat enlarged; *b*, hymenium with spores, highly magnified. (From Engler and Prantl's "Pflanzenfamilien.")

beneath the surface of the host but becoming erumpent at maturity. The spores are dark-colored, more or less elongate, and 3- or more celled. Over 250 species have been described. They occur chiefly on the dead branches of trees, but several species have been found on living leaves. *H. Cydoniæ* occurs on quince-leaves in America and *H. lineolans* on branches of willow (*Salix*).

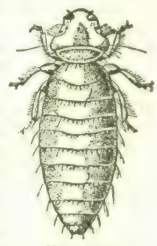
heneicosane (hen-ī′kō-sān), *n.* [Gr. *ἑν*, one, + *εἴκοσι*, twenty, + *-ane.*] A colorless hydrocarbon, $C_{21}H_{44}$, found in brown coal paraffin. It melts at 40.4° C., and boils at 215° C. under 15 millimeters pressure.

hen-feathered (hen′fe҂ᴛʜ″ėrd), *a.* Wearing the plumage of the hen; henny: said of a cock. See *henny.*

hen-feathering (hen′fe҂ᴛʜ″ėr-ing), *n.* The plumage of the hen worn by the cock of the domesticated fowl.

hen-flea (hen′flē), *n.* A cosmopolitan flea, *Sarcopsylla gallinacea*, especially injurious to young poultry.

hen-frigate (hen′frig″ąt), *n.* A vessel in which the master's wife or daughter interferes with the general rules, regulations, and customs on board ship. [Slang.]



Henicocephalus cuticis. Much enlarged.

Henicocephalidæ (hen″i-kō-se-fal′i-dē), *n. pl.* [NL. *Henicocephalus* (*Enicocephalus*, Westwood, 1837) + *-idæ.*] A remarkable heteropterous family, allied to the *Reduviidæ*, in which the upper wings are entirely membranous, as in *Hymenoptera*, and the anterior pair of legs is greatly enlarged. Twelve species are known, two occurring in the United States; they are *Henicocephalus culicis* and *H. formicinis.*

Henle's ligament, loops, spine. See ★*ligament*, etc.

hen-louse (hen′lous), *n.* A wide-spread mallophagan, *Menopon pallidum*, of the family *Liotheidæ.* Compare ★*chicken-louse.*

Hen-louse (*Menopon pallidum*). Enlarged.

hennotannic (hen-ō-tan′ik), *a.* [*henna* + *tannic.*] Noting an acid, a brown resinous compound resembling tannin, contained in commercial henna.

henny, *a.* **II.** *n.* A cock which has the plumage of a hen. —**Henny game,** a breed of game-fowls in which the cocks have the plumage of the hens.

Henoch's purpura. See ★*purpura.*

henogenesis (hen-ō-jen′e-sis), *n.* [Gr. *εἷς* (*ἑν-*), one, + *γένεσις*, generation.] The development of the individual, or ontogeny, as contrasted with the development of species. [Rare.]

henogeny (he-noj′e-ni), *n.* Same as ★*henogenesis.*

hen-pox (hen′poks), *n.* A disease of ordinary fowls, turkeys, pigeons, and more rarely geese, chiefly affecting the head and appearing as an eruption of round or oblong yellow nodules having somewhat the appearance of warts. See also ★*bird-pox.*

Henrietta cloth. See ★*cloth.*

henry (hen′ri), *n.*; pl. *henries* (-riz). [From Joseph *Henry*, 1797–1878.] An electrical unit, the inductance in a circuit when the electromotive force induced in this circuit is one international volt while the inducing current varies at the rate of one ampere per second.

hense, *adv.* and *v.* Another spelling of *hence.*

Hensel, basilar length of. See ★*basilar.*

henselion (hen-sē′li-ǫn), *n.* [Named for *Hensel*, a German anatomist.] In *anthrop.*, the medial point back of the alveoli of the middle incisors. *O. Thomas.*

Hensen, canal of, plane of. See ★*canal*[1], ★*plane*[1].

Hensen's disk, prop-cells. See ★*disk*, ★*prop-cell.*

hentricontane (hen-trī-kon′tān), *n.* [Gr. *ἑν*, one, + *τρι (ά)κοντα*, thirty, + *-ane.*] A colorless hydrocarbon, $CH_3(CH_2)_{29}CH_3$, of the methane series, contained in beeswax and in petroleum. It melts at 68.1° C., and boils at 302° C. under 15 millimeters pressure.

hep[3] (hep), *interj.* [Var. of *hip*[5].] A quick explosive utterance, leading to a sonorous outburst, urging men or horses to more rapid action.

hepar, *n.* **3.** In the homeopathic materia medica, calcium sulphid.—**Hepar antimonii,** in *old chem.*, liver of antimony, the product obtained by fusing together antimonious sulphid and potassium or sodium sulphid. This product consisted of a sulphantimonite of potassium or sodium in a more or less pure condition and partially soluble in water.

hepatectomy (hep-a-tek′tǫ-mi), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *ἐκτομή*, excision.] Surgical removal of a part of the liver.

Hepatic apoplexy, cæcum, ligaments, sugar. See ★*apoplexy*, etc.

hepaticopulmonary (hē-pat″i-kǫ-pul′mǫ-nā-ri), *a.* [Gr. *ἡπατικός*, of the liver, + L. *pulmonarius*, of the lungs.] Relating to both the liver and the lungs.

hepatitis, *n.*—**Acute parenchymatous hepatitis.** Same as *acute yellow atrophy of the liver* (which see, under *yellow*).—**Chronic interstitial hepatitis,** cirrhosis of the liver.

hepatochrome (hep′a-tǫ-krōm), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *χρῶμα*, color.] Same as ★*cholechrome.*

hepatocolic (hep″a-tǫ-kol′ik), *a.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *κόλον*, colon, + *-ic.*] Relating to both the liver and the colon.—**Hepatocolic ligament.** See ★*ligament.*

hepatoduodenal (hep″a-tǫ-dū-ǫ-dē′nal), *a.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + E. *duodenum* + *-al*[1].] Relating to both the liver and the duodenum.

hepatodynia (hep″a-tǫ-din′i-ä), *n.* [NL., < Gr. *ἡπαρ (ἡπατ-)*, liver, + *ὀδύνη*, pain.] Pain in the hepatic region.

hepatogenic (hep-a-tǫ-jen′ik), *a.* Same as *hepatogenous.*

Hepatogenous jaundice. See ★*jaundice.*

hepatoid (hep′a-toid), *a.* [Gr. *ἡπατοειδής*, < *ἡπαρ (ἡπατ-)*, liver, + *εἶδος*, form.] Resembling the liver in structure.

hepatolith (hep′a-tǫ-lith), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *λίθος*, stone.] A gall-stone.

hepatolithic (hep″a-tǫ-lith′ik), *a.* [*hepatolith* + *-ic.*] Relating to or characterized by the presence of gall-stones.

hepatological (hep″a-tǫ-loj′i-kal), *a.* [*hepatolog-y* + *-ic* + *-al*[1].] Of or relating to hepatology.

hepatolysin (hep-a-tol′i-sin), *n.* [*hepatolys(is)* + *-in*[2].] A cytolysin which results on immunization with liver cells.

hepatolysis (hep-a-tol′i-sis), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *λύσις*, dissolution.] Destruction of the cells of the liver.

hepatolytic (hep″a-tǫ-lit′ik), *a.* Causing hepatolysis.

> The post-mortem findings resemble those of acute yellow atrophy, or of phosphorus poisoning. We have to deal in this case with a *hepatolytic* serum.
> *Med. Record*, July 18, 1903, p. 84.

hepatomalacia (hep″a-tǫ-ma-lā′si-ä), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *μαλακία*, softness, < *μαλακός*, soft.] Softening of the liver.

hepatoperitonitis (hep″a-tǫ-per″i-tǫ-nī′tis), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + NL. *peritonitis.*] Inflammation of the peritoneal coat of the liver.

hepatopexy (hep′a-tǫ-pek-si), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *πῆξις*, fastening.] Surgical fixation of a floating liver.

hepatophlebitis (hep″a-tǫ-flē-bī′tis), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *φλέψ (φλεβ-)*, vein, + *-itis.*] Inflammation of the veins of the liver.

hepatoptosis (hep″a-top-tǫ′sis), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *πτῶσις*, falling.] Displacement downward of the liver.

hepatopulmonary (hep″a-tǫ-pul′mǫ-nā-ri), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + L. *pulmonarius*, of the lungs.] Same as ★*hepaticopulmonary.*

hepatorenal (hep″a-tǫ-rē′nal), *a.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + L. *ren*, kidney, + *-al*[1].] Relating to both the liver and the kidney.—**Hepatorenal ligament.** See ★*ligament.*

hepatorrhaphy (hep-a-tor′a-fi), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *ῥαφή*, sewing.] The operation of suturing a wound in the liver.

hepatorrhexis (hep″a-tǫ-rek′sis), *n.* [NL., < Gr. *ἡπαρ (ἡπατ-)*, liver, + *ῥῆξις*, rupture.] Rupture of the liver.

hepatosplenitis (hep″a-tǫ-splē-nī′tis), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *σπλήν*, spleen, + *-itis.*] Inflammation of both liver and spleen; Banti's disease.

hepatotoxemia (hep″a-tǫ-tok-sē′mi-ä), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *τοξ(ικόν)*, poison, + *αἷμα*, blood.] Systemic poisoning through circulation in the blood of toxic products normally destroyed in the liver.

hepatotoxin (hep″a-tǫ-tok′sin), *n.* [Gr. *ἡπαρ (ἡπατ-)*, liver, + *τοξ(ικόν)*, poison, + *-in*[2].] A cytotoxin resulting on immunization with liver cells.

Hephæstic, Hephestic (he-fes′tik), *a.* [*Hephæstus* + *-ic.*] Of or pertaining to Hephæstus, the Greek Vulcan; hence, allusively, relating to blacksmithing, or wielding of the hammer.—**Hephæstic cramp** or **Hephæstic hemiplegia.** Same as *hammer-*★*palsy.*

hepialid, *n.* and *a.* See ★*epialid.*

Heppia (hep′i-ä), *n.* [NL. (Nägeli, 1854), named for Philip *Hepp*, a German lichenologist.] A genus of lichens having a foliose thallus and large disciform immersed apothecia. The spores are unicellular and hyaline.

Heppiaceæ (hep-i-ā′sē-ē), *n. pl.* [NL., < *Heppia* + *-aceæ.*] A family of gymnocarpous lichens named from the genus *Heppia.*

Hepplewhite (hep′l-hwīt), *n.* A style of furniture based on the designs of A. Hepplewhite, in England, in the later part of the eighteenth century. The Hepplewhite style is a delicate well-made adaptation of the current French motives of the period.

Hepplewhite Chair.

heptacarbon (hep-ta-kär′bon), *a.* [Gr. *ἑπτά*, seven, + *carbon.*] Containing seven atoms of carbon.

hepta-compound (hep-ta-kom′pound), *n.* A compound containing seven atoms of some element.

heptactin (hep-tak′tin), *n.* [Gr. *ἑπτά*, seven, + *ἀκτίς (ἀκτιν-)*, a ray.] A sponge-spicule having seven arms.

Heptad axis of symmetry. See ★*symmetry.*

heptadecane (hep-ta-dek′ān), *n.* [Gr. *ἑπτά*, seven, + *δέκα*, ten, + *-ane.*] A colorless crystalline compound, $CH_3(CH_2)_{15}CH_3$, found in brown coal paraffin. It melts at 22.5° C. and boils at 303°C. Also called *normal heptadecane.*

heptahydrate (hep-ta-hī′drāt), *n.* [Gr. *ἑπτά*, seven, + *ὐδωρ (ὑδρ-)*, water, + *-ate*[1].] In *chem.*, a compound containing seven molecules of water, as common copperas in crystals, or ferrous sulphate heptahydrate ($FeSO_4.7H_2O$).

heptahydrated (hep-ta-hī′drā-ted), *a.* [As *heptahydrate* + *-ed*[2].] In *chem.*, containing seven molecules of water, as heptahydrated sodium sulphate ($Na_2SO_4.7H_2O$). *G. Lunge*, Sulphuric Acid, II. 22.

heptameral (hep-tam′e-ral), *a.* [NL., < Gr. *ἑπτά*, seven, + *μέρος*, part.] Having seven chambers or spaces, especially as applied to septal divisions in the *Anthozoa* or corals.

heptametrical (hep-ta-met′ri-kal), *a.* In *pros.*, consisting of seven feet or measures. *Southey.*

heptanone (hep′ta-nōn), *n.* A ketone, $C_7H_{14}O$, derived from heptane. Three isomeric forms are known: 2-*heptanone*, which boils at 151–152° C.; 3-*heptanone*, which boils at 147–148° C.; and 4-*heptanone*, which boils at 143.5° C. These are also known, respectively, as *methylamyl ketone*, *ethylbutyl ketone*, and *dipropylketone* or *butyrone.*

Heptapla (hep′ta-plä), *n.* [Gr. *ἑπταπλόος*, sevenfold, < *ἑπτά*, seven, + *-πλοος*, -fold.] One of the editions of the Old Testament, by Origen (third century) containing seven versions of the Scriptures (or of parts of them) in parallel columns.

Heptastadium (hep-ta-stā′di-um), *n.* [Gr. *ἑπταστάδιον*, a space of seven stadia, neut. of *ἑπταστάδιος*, seven stadia long, < *ἑπτά*, seven, + *στάδιον*, stadium.] A great mole, built by Ptolemy Soter (117-81 B.C.), connecting Pharos island with the mainland at Alexandria in Egypt: so named from its length (seven stadia). The region is now a wide isthmus and occupied.

> Any remains that may exist at the Emporium, the Apostases, the Navalia, the *Heptastadium*, the buildings on the Pharos island or round the Eunostus Harbour (i. e., the present port), are either under the sea or beneath occupied land. They cannot be explored and are probably not in the least worth exploring.
> *E. F. Benson*, in Jour. Hellenic Studies, XV., Sup., p. 11.

heptatonic (hep-ta-ton′ik), *a.* [Gr. *ἑπτάτονος*, seven-toned, < *ἑπτά*, seven, + *τόνος*, tone.] In *music*, consisting of seven tones to the octave: said of scales: often contrasted with *pentatonic.*

heptavalency (hep-ta-vā′len-si), *n.* [Gr. *ἑπτά*, seven, + E. *valency.*] In *chem.*, valence or valency equivalent to that of seven monad atoms, as of hydrogen.

heptine (hep′tin), *n.* [Gr. *ἑπτά*, seven, + *-ine*[2].] A colorless liquid, C_7H_{12}, with a characteristic odor, formed by the distillation of colophonium resin. It boils at 103–104° C., readily absorbs oxygen, and is a homologue of acetylene. There are four other isomeric compounds to which the term *heptine* is strictly applicable and which differ according to the position of the acetylene union.

heptoic (hep-tō′ik), *a.* [*hept(ane)* + *-o-* + *-ic.*] Pertaining to or derived from heptane.—**Heptoic acid** a colorless liquid compound, $CH_3(CH_2)_5COOH$, with an odor of tallow, formed by the oxidation of castor-oil or of oleic acid. It boils at 223–223.5° C. and melts at 10.5° C. Also called *œnanthic acid.*

heptone (hep′tōn), *n.* [Gr. *ἑπτά*, seven, + *-one.*] A colorless liquid compound, C_7H_{10}, belonging to the valylene series of hydrocarbons. It boils at 115° C.

heptose (hep′tōs), *n.* [Gr. *ἑπτά*, seven, + *-ose.*] Sugar containing seven atoms of carbon. Such sugars closely resemble the corresponding ones of the hexose series.

heptoxid (hep-tok′sid), *n.* [Gr. *ἑπτά*, seven, + *oxid.*] In *chem.*, a compound containing seven atoms of oxygen, as sulphur heptoxid (S_2O_7), corresponding to persulphuric acid ($H_2S_2O_8$).

Heptranchias (hep-trang′ki-as), *n.* [NL., a blunder for **Heptabranchius*, < Gr. *ἑπτά*, seven, + *βράγχια*, gills.] A genus of sharks of the family *Hexanchidæ*, remarkable for the presence of seven gill-openings instead of five, the usual number. They are closely related to extinct forms. *H. cinereus* is found in the Mediterranean, *H. maculatus* on the coast of California.

heptylamine (hep-til-am′in), *n.* [Gr. *ἑπτά*, seven, + *-yl* + *amine.*] A colorless compound, $CH_3(CH_2)_5CH_2NH_2$, prepared by the action of bromine and potassium hydroxid on caprylic amide. It boils at 153–155° C. Also called *1-aminoheptane.*

heraclin (her′a-klin), *n.* [*Heracl(eum)* + *-in*[2].] A colorless indifferent compound, $C_{22}H_{22}O_{10}$, obtained from the seeds of *Heracleum villosum.* It forms long, silky, lustrous needles melting at 185° C.

Heræa (hē-rē′ä), *n. pl.* [Gr. *Ἡραῖα*, neut. pl. of *Ἡραῖος*, adj. < *Ἥρα*, Hera.] In *Gr. archæol.*, a festival celebrated in honor of Hera.

Heraldic crab. See ★*crab*[1].

herapathite (her′a-path-īt), *n.* [*Herapath*, name of its discoverer, + *-ite*[2].] A little-used name for a crystalline iodoquinine sulphate used in medicine.

herbarism† (hėr′bā-rizm), *n.* [*herbary* + *-ism.*] Herbalism; botany.

> The very pith and marrow of *herbarism.*
> *Southey*, Doctor, xxiv. P. I.

Herbert river cherry. Same as *Queensland* ★*cherry.*

herb-impious (hėrb-im′pi-us), *n.* [NL. *herba impia*, 'irreverent plant.'] The cotton-rose, *Gifola Germanica:* so called because each succeeding flower-head rises above the last older one. This plant is related to the cudweeds *Gnaphalium.*

herbivority (hėr-bi-vor′i-ti), *n.* [*herbivor-ous* + *-ity.*] The quality of being herbivorous; herbivorous nature.

> Admitting the *herbivority* of the fossil [Stereognathus], it is not certain that it was hoofed.
> *Owen*, in Encyc. Brit. (8th ed.), XVII. 159.

Herbivorous ladybird. See ★*ladybird.*

Herculaneum ware. See ★*ware*[2].

Hercules metal, powder, stone. See ★*metal*, etc.

Hercynian, *a.* 2. In *geol.*: (*a*) Applied to a division of the Precambrian crystalline rocks in Westphalia, termed by Gümbel the *Hercynian gneiss*, lying above more highly altered rocks, and beneath those which are less altered and consist of mica schists and shales. (*b*) First applied to the lowest Devonian strata of the Harz Mountains and Westphalia, but subsequently restricted so as to refer to the calcareous or deeper water facies of these early Devonian rocks and their organic contents.

herderite, *n.*—It occurs also at Paris and Hebron, Maine. It is shown by Penfield to be monoclinic (pseudo-orthorhombic) in crystallization, with a composition expressed by the formula $Ca[Be(F,OH)]PO_4$. Pure fluor-herderite has not yet been observed; the mineral from Paris is a hydrofluor-herderite, and that from Hebron a hydroherderite.

herd-header (hėrd′hed′er), *n.* The bull which heads a herd of cattle.

The man who expects success as a breeder cannot look upon the selection of his *herd-header* as a light matter.
Rep. Kan. State Board Agr., 1901–02, p. 50.

herdwick (hėrd′wik), *n.* [*herd*[2] + *wick*[2]. Hence the frequent village name *Hardwick*.] 1†. The tract of land under the charge of a herd or shepherd.—2. Applied to designate a hardy breed of sheep, found in the mountains of Cumberland and Westmoreland, and usually rented with the farm on which they are owned.

here[1] (hēr), *n.* [*here*, adv.] That which is here; the present; this world. [Poetical.]

A half-effaced inscription. . .
Full of hope and yet of heart-break,
Full of all the tender pathos
Of the *Here* and the Hereafter.
Longfellow, Hiawatha, Introd., l. 113.

hereanent (hēr′a-nent′), *adv.* [*here* + *anent.*] Relating to or concerning this; having a bearing on this matter. [Chiefly Scotch.]

Hereditary substance. See *substance of* ★*heredity.*

hereditation (hē-red-i-tā′shon), *n.* [NL. **hereditatio(n-)*, < LL. *hereditare*, inherit: see *heredity, inherit.*] Generation of like by like, by regular course; reproduction. [Rare.]

hereditist (hē-red′i-tist), *n.* [*heredit(y)* + *-ist.*] One who believes that children inherit their character from their parents. [Rare.]

hereditivity (hē-red-i-tiv′i-ti), *n.* [**hereditive* + *-ity.*] Ability to reproduce or generate descendants like the parents. [Rare.]

Natural selection resolves itself into two laws: *hereditivity* and adaptivity, the latter being the accomodation to circumstances, etc. *Science*, May 2, 1902, p. 711.

heredito-syphilitic (hē-red′i-tō-sif-i-lit′ik), *a.* and *n.* I. *a.* Relating to or suffering from hereditary syphilis.

II. *n.* One who suffers from hereditary syphilis.

heredity, *n.* 2. (*c*) Metaphorically, that which makes living beings inherit; the explanation or cause of the kinship or resemblance to ancestors which living beings exhibit, or the force or agent or principle that brings about this kinship or resemblance. This metaphorical use of the word leads to forgetfulness of the fact that the word is only a general term for formulating the facts of kinship, and to the regarding of heredity and variation as independent and antagonistic principles or agents or factors in the origin of species. Since we can separate, in our minds, the kinship of living beings, or their likeness to their kind, from their individuality or difference from their kind, and since we find this intellectual analysis useful, some think that what is intellectually separable must be separate in fact, and that organic development is due to heredity and variation as antagonistic principles or agencies.—**Amphigonic heredity,** inheritance in organisms produced by sexual reproduction. *Weismann* (trans.), Germ-plasm, p. 253.—**Ancestral heredity.** See ★*inheritance.*—**Cross heredity,** the resemblance of descendants to ancestors considered reciprocally. See *heredity.*—**Galton's and Pearson's laws of heredity.** See ★*inheritance.*—**Homochronic heredity,** the development of the organs and tissues in the same chronological order in the offspring as in the parent, considered as a distinct form of inheritance. *Weismann* (trans.), Germ-plasm, p. 75.—**Homotopic heredity,** the development of the tissues and organs of the offspring in their parental positions, considered as a distinct form of inheritance. *Weismann* (trans.).—**Social heredity,** the acquisitions by social animals of the habits and customs and traditions of their kind, through their power to profit by experience and to use it to advantage, and quickly to acquire the mode of life that is characteristic of their species by imitation and example and instruction, without the risk that attends trial and error: considered as a determining factor in the origin of species. Since social animals cannot acquire the customs of their kind without natural aptitude, and since those that fail to find places for themselves in society are at a disadvantage in the struggle for existence, social heredity is rather a special case of natural selection than an independent determining factor in the origin of species.—**Substance of heredity, hereditary substance.** (*a*) The material basis of inheritance or the living matter that is transmitted from parent to offspring in reproduction, and in the transmission of which reproduction consists. There is evidence, which is accepted as conclusive by most authorities, that the essential fact in reproduction is the transmission of the chromosomes of the germ-cells, and this is commonly held to be proof that the chromosomes are the material basis of inheritance, although this conclusion does not follow of necessity from the facts, if the term is understood as implying that they are not also the material basis of individuality. While descendants resemble ancestors, they are never identical with them. Each living being is unique: there is no other like it; and while it resembles its kind, it is different from all of its kind and from everything else in nature. Proof that the chromosomes are the substance of heredity is no proof that they are not also the substance of variation. (*b*) Metaphorically, the substratum or support or bearer or giver or cause of inheritance: that which makes the offspring to be like its parents or ancestors. This meaning (which depends upon an uncritical use of the word *substance*, and upon the opinion that we account for inheritance by calling it heredity) leads to the belief that since resemblance to parents may be considered by itself, it therefore exists in nature separated from the individuality of living beings.

Hereford (her′ē-ford), *n.* A breed of beef cattle, maintained chiefly in Herefordshire, England. The body color is a deep red, the face, mane, throat and chest white, and the horns are moderately long.

heregeld, *n.* A variant of *heregild.*

herem (her′em), *n.* [Heb. *herem*, < *haram*, to ban, exterminate, forbid: see *harem.*] Excommunication from the synagogue. This punishment was specially meted out to those holding doctrines contrary to the Jewish religion. The reformed Jews, however, have abandoned the practice, but it is still a formidable weapon in the hands of the rabbis of orthodox Jewish communities in Russia and the Orient. Also *cherem.*

Heremetabola (her-ē-me-tab′ō-lä), *n. pl.* [NL., said to be formed (if so, properly **Eremometabola*) < Gr. ἤρεμος, quiet, + μεταβολή, change.] A group of insects including those forms which have a gradual but incomplete metamorphosis, with a resting-stage, as in the *Cicadidæ.*

hereticize (hē-ret′i-sīz), *v. t.*; pret. and pp. *hereticized*, ppr. *hereticizing.* [*heretic* + *-ize.*] Same as *hetericate.*

Hering's and Wundt's figures. See ★*figure.*

herisseal (he-ris′ē-al), *n.* [Appar. < F. *hérisson*, hedgehog, + *-e-al.*] A lateral bone behind the eyeball of the head of fishes connected with the pterygoid and palatine; the mesopterygoid. *Starks*, Synonymy of the Fish Skeleton, p. 514.

heritage, *n.*—**Diligence against the heritage.** See ★*diligence.*

hermana (er-mä′nä), *n.* [Sp.] 1. A sister.—2. A sister-in-law.

Hermann's demarcation current. Same as ★*current of injury.*

hermano (er-mä′nō), *n.* [Sp.] 1. A brother.—2. A brother-in-law.

Hermaphrodite duct. See ★*duct.*

Hermellidæ (hėr-mel′i-dē), *n. pl.* [NL., < *Hermella* + *-idæ.*] A family of cryptocephalous *Polychæta* having the peristomium enormously developed and in the form of a bilobed hood capable of closing over the mouth, the lobes bearing defensive chætæ. It contains the single marine genus *Sabellaria* or *Hermella*, which lives in tubes in the sand.

Sabellaria alveolata L. Ventral view of anterior region. Enlarged about six times.

a, multifid palp (gill filaments); *b*, mouth; *c*, notopodial cirrus; *d*, neuropodium; *e*, notopodium; *f*, ventral (tubiparous) gland shield; *m k. j*, *h*, and *g*, segments following peristome; *i*, neuropodial cirrus; *n*, ridges after removal of gill filaments; *o*, tentacle; *p*, peristomial chaetæ; *q*, hood formed by peristomium. (From "Cambridge Natural History.")

hermeneutical (hėr-mē-nū′ti-kal), *a.* Relating to hermeneutics; hermeneutic.

Hermetic books. See *Hermetic*, 2.

Hermetism (hėr′me-tizm), *n.* [*cap* or *l. c.*] The philosophical, theosophical, and alchemical doctrines of Hermes Trismegistus; hermetics.

The modern alchemists accept all the traditions of their ancient predecessors, but give them a new significance, and interweave the novel phenomena derived from researches in pure science. They claim that during the fourteenth, fifteenth and sixteenth centuries the official schools of instruction taught exclusively the physical part of the sciences, and that the metaphysical part (which is the real life and soul of the study) has been rejected under the opprobrious name of occult science. This living aspect of science has, however, been studied in the secret societies of the initiated, which have preserved the traditions of the kabala, the mysteries of *hermetism*, and the practice of transmutation.
H. C. Bolton, in Smithsonian Rep., 1897, p. 213.

Hermetist (hėr′me-tist), *n.* [*cap.* or *l. c.*] One who accepts the occult doctrines of the Hermetic books; a Hermetic philosopher.

The astral undulations determine the position of the atoms or neutralize them. Herein lies the secret of transmutation, and it becomes the privilege of the *hermetist* to acquire the power of controlling this agent.
H. C. Bolton, in Smithsonian Rep., 1897, p. 215.

hermetologist (hėr-me-tol′ō-jist), *n.* A Hermetist; a believer in the Hermetic philosophy.

The services of the new psychology to the Christian religion, I believe it is impossible to overestimate. Its teachings of the manifold human degeneracies make the doctrine of sin as vital as with the most ardent of the old *hermetologists*, and far more tempered and potent.
G. S. Hall, in The Forum, Aug. 1894, p. 719.

herminiid (hėr-min′i-id), *n.* and *a.* I. *n.* One of the lepidopterous family *Herminiidæ.*

II. *a.* Of or belonging to the *Herminiidæ.*

hermitage, *n.* 3. In *landscape-gardening*, a secluded building, arbor, or other feature.

The *hermitage* being directly on the axis of the villa, one looks out from the latter down the admirable perspective of the tapis vert and up the Scala Santa to the little house at its summit.
Edith Wharton, Italian Villas, p. 66.

Hermite process. See ★*process.*

hermit-lobster (hėr′mit-lob′stėr), *n.* A hermit-crab.

hermophenol (hėr-mō-fē′nōl), *n.* [Gr. Ἑρμῆς, Hermes, Mercury, + E. *phenol.*] Mercury-phenol-disulphonate of sodium. It is antiseptic and antisyphilitic.

Hermosilla (hėr-mō-sil′ä), *n.* [NL., < *Hermosilla*, the capital of Sonora, Mexico, < Sp. *hermoso*, beautiful, < L. *formosus*, beautiful.] A genus of rudder-fishes of the family *Kyphosidæ*, found on the coast of Sonora in the Gulf of California. *H. azurea* is the known species.

hernani (er-nä′ni), *n.* [From the (F.) personal name *Hernani.*] A grenadine dress fabric woven in small meshes of coarse threads of silk, cotton, or wool, and their intermixtures.

hernia, *n.*—**Complete hernia,** a hernia in which the contents have passed beyond the external ring of the inguinal canal.—**Concealed hernia,** a form of incomplete hernia of such small size as to be impossible of detection by ordinary examination.—**Congenital hernia,** a scrotal hernia present at birth or appearing shortly after.—**Diaphragmatic hernia,** hernia of a portion of the bowel through a ruptured diaphragm into the chest cavity.—**Diverticular hernia,** a hernia formed by a diverticulum from the intestine, usually the ileum, and not containing a complete loop of the bowel.—**Hernia obturatoria,** hernia through the obturator foramen.—**Hernia of the cornea.** Same as *ceratocele.*—**Hernia testis,** a fungus-like appearance of the testicle due to rupture of the fibrous coat.—**Hesselbach's hernia,** a form of femoral hernia.—**Incompiete hernia,** a hernia in which the sac has not passed beyond the external ring.—**Littré's hernia.** Same as *diverticular* ★*hernia.*—**Mucosal hernia,** extrusion of the mucous membrane of the intestine through a defect in the muscular coat.—**Peritoneal hernia.** See ★*gut-tie.*—**Richter's hernia,** hernia in which only a part of the circumference of the bowel is involved: possibly an early stage of a diverticular hernia.—**Slipped** or **sliding hernia,** hernia of the cæcum or sigmoid flexure, in which only a portion of the bowel is in the sac, the outside part having no peritoneal covering.—**Tunicary hernia.** Same as *mucosal* ★*hernia.*

hernia-knife (hėr′ni-ä-nīf), *n.* Same as ★*herniotome.*

herniarin (hėr-nī′a-rin), *n.* [*Herniaria* + *-in*[2].] A grayish powdery glucoside, $C_{19}H_{30}O_{10}$, found in *Herniaria glabra* and *H. hirsuta.* It resembles saponin in general properties.

herniotome (hėr′ni-ō-tōm), *n.* [*hernia* + Gr. *-τομος*, < ταμεῖν, cut.] A knife resembling a bistoury with a short cutting-edge, the rest of the blade being rounded, used for incising the constricting tissues in **hernia.**

herniotomist (hėr-ni-ot′ō-mist), *n.* [*herniotom-y* + *-ist.*] One who is skilled in herniotomy.

Herodianic (he-rō-di-an′ik), *a.* Of or pertaining to Herodianus, a Byzantine grammarian (200 A. D.).—**Herodianic signs.** See ★*sign.*

heroin (her′ō-in), *n.* Diacetyl-morphia: a remedy valuable in the treatment of various forms of respiratory disease.

heron, *n.*—**Cow-heron, cattle-heron,** *Bubulcus ibis*, so named from following and even alighting on cattle and buffaloes to feed on ticks. It is stoutly built; white, with reddish plumes on the head and back during the breeding-season. It is about 18 inches long. It is common in northern Africa and is frequently pointed out to tourists as the sacred ibis.—**Purple heron.** See *purple.*

Heronic (hē-ron′ik), *a.* Of or pertaining to Heron (about 250 B. C.), an Alexandrian mathematician.—**Heronic cyclic polygon, cyclic quadrilateral, parallelogram, pyramid.** See ★*polygon*, etc.

heronite (her′on-īt), *n.* [*Heron* Bay, on the north shore of Lake Superior, + *-ite*2.] An aphanitic dark-colored rock occurring in a dike composed of analcite, orthoclase, plagioclase, and ægirite. The analcite forms a matrix for the other minerals, which are in radiating groups. *Coleman*, 1899.

Heros (hē′ros), *n.* [NL., without evident allusion, < L. *heros*, < Gr. ἥρως, hero.] A very large genus of perch-like fishes found in the waters of Central and South America, and characterized by the large number of anal spines. The species are very numerous, one of them, *H. cyanoguttatus*, extending north to the waters of Texas.

Hero's lamp. See ★*lamp*1.

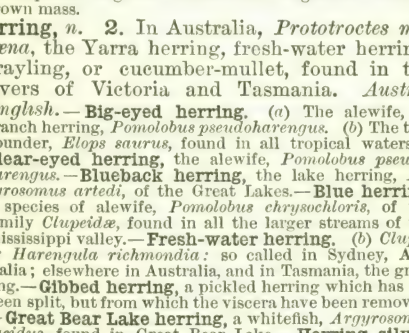
herotheism (hē-roth′ē-izm), *n.* [Gr. ἥρως, hero, + θεός, god, + *-ism.*] The worship of deified heroes. *N. E. D.*

Herpes circinatus, ringworm.—**Herpes iris,** a form of herpes in which the vesicles are grouped in an annular form.—**Herpes præputialis,** herpes affecting the prepuce.

herpet. An abbreviation of *herpetology.*

herpetiform (hėr-pet′i-fôrm), *a.* [Gr. ἑρπετόν, reptile, + L. *forma*, form.] Resembling or having the characters of a reptile.

herpetography (hėr-pe-tog′ra-fi), *n.* [Gr. ἑρπετόν, reptile, + *-γραφια*, < γράφειν, write.] The description of reptiles; also, in a general sense, same as *herpetology.*



herpetospondylian (hėr″pe-tō-spon-dil′i-an), *a.* and *n.* **I.** *a.* Relating to or having the characters of the *Herpetospondylia.*

II. *n.* A member of the reptilian subclass *Herpetospondylia.*

Herpobdellidæ (hėr-pob-del′i-dē), *n. pl.* [NL., < **Herpobdella* + *-idæ.*] A family of leeches in which the pharynx is without denticulate jaws but has three unarmed chitinous plates. It contains the genus *Trocheta.*

Herpotrichia (hėr-pō-trik′i-ä), *n.* [NL. (Fuckel, 1869), irreg. < Gr. ἕρπειν, creep, + θρίξ (τριχ-), hair, thread.] A genus of pyrenomycetous fungi having the perithecia usually seated upon a brown mycelial layer, a subiculum. The spores are more or less elongate, several-celled, and brown. *H. nigra* is parasitic on pines and other conifers in alpine or subalpine regions. The mycelium envelops the twigs and fastens them together in a dark-brown mass.

herring, *n.* 2. In Australia, *Prototroctes maræna*, the Yarra herring, fresh-water herring, grayling, or cucumber-mullet, found in the rivers of Victoria and Tasmania. *Austral English.*—**Big-eyed herring.** (*a*) The alewife, or branch herring, *Pomolobus pseudoharengus.* (*b*) The tenpounder, *Elops saurus*, found in all tropical waters.—**Blear-eyed herring,** the alewife, *Pomolobus pseudoharengus.*—**Blueback herring,** the lake herring, *Argyrosomus artedi*, of the Great Lakes.—**Blue herring,** a species of alewife, *Pomolobus chrysochloris*, of the family *Clupeidæ*, found in all the larger streams of the Mississippi valley.—**Fresh-water herring.** (*b*) *Clupea* or *Harengula richmondia:* so called in Sydney, Australia; elsewhere in Australia, and in Tasmania, the grayling.—**Gibbed herring,** a pickled herring which has not been split, but from which the viscera have been removed.—**Great Bear Lake herring,** a whitefish, *Argyrosomus lucidus*, found in Great Bear Lake.—**Herring silver.** See ★*silver.*—**King of the herrings.** (*b*) One of the common names applied to the opah, *Lampris guttatus*, and to various other unrelated fishes.—**Mountain herring,** the Rocky Mountain whitefish, *Coregonus williamsoni*, a small gamy fish of great excellence as food, found in streams of the Rocky Mountains, the Sierra Nevada, and northward.—**Perth herring,** *Dorosoma erebi*, a clupeoid fish found in Australia. Also called *bony bream.*—**Picton herring,** a name given to several fishes when dried (like 'kipper'), especially to the sea-mullet, and the moray of New South Wales. *E. E. Morris*, Austral English.—**Queen of the herrings,** *Alosa alosa*, a clupeoid fish found on the coasts of Europe.—**Rainbow herring,** a common name for *Osmerus dentex*, a smelt found on the coast of Alaska, and south on the eastern Pacific coast of northern China.—**River herring,** the alewife, *Pomolobus pseudoharengus.*—**Summer herring.** Same as *glut-herring.*—**Tailor herring.** Same as *fall herring* (which see, under *herring*).—**Yarra herring.** Same as ★*grayling*, 4.

Mountain Herring (*Coregonus williamsoni*).
Upper figure, mature fish; lower figure, young fish.
(From Bulletin 47, U. S. Nat. Museum.)

herring-bone, *v. t.* 2. In *carp.*, to strengthen (a floor) by herring-bone bridging, that is, with short pieces of studding set diagonally from the lower edge of one beam to near the upper edge of the next.—3. In *masonry*, to build, as a wall, of stone, tiles, or bricks laid at an angle with the horizon so as to show on the face in a series of diagonals, generally in alternate courses so as to produce a continued zigzag.

herring-cale (her′ing-kāl), *n.* In New South Wales, the fish *Olistherops brunneus*, of the family *Labridæ*, or wrasses. *E. E. Morris*, Austral English.

herringer, *n.* 2. A boat engaged in the herring-fisheries.

herring-pond (her′ing-pond), *n.* The Atlantic Ocean. [Jocose.]

herring-salmon (her′ing-sam″un), *n.* A whitefish, *Argyrosomus artedi*, found in the Great Lakes. It is neither a herring nor a salmon.

Herschel's fringes. See ★*fringe.*

Herts. An abbreviation of *Hertfordshire.*

Hertwigia (hėrt-wig′i-ä), *n.* [Named from *Hertwig.*] The typical genus of the family *Hertwigidæ. O. Schmidt*, 1880.

Hertwigidæ (hėrt-wig′i-dē), *n. pl.* [NL., < *Hertwigia* + *-idæ.*] A family of lyssacine, hexactinellid sponges, having the skeletal framework composed of hexactines and diactines united by synapticulæ. It contains the genera *Hertwigia* and *Trachycaulus.*

Hertzian (hert′si-an), *a.* Of or pertaining to Heinrich Hertz, (1857–1894) the discoverer of electro-magnetic waves, or (specifically) to such waves.—**Hertzian exciter.** See ★*exciter.*—**Hertzian wave.** See ★*wave*1.

Herzegovinian (hert″se-gō-vin′i-an), *a.* and *n.* [*Herzegovina* + *-ian.*] **I.** *a.* Of or pertaining to Herzegovina.

II. *n.* A native of Herzegovina.

hesperetin (hes-pe-rē′tin), *n.* [Appar. < Gr. ἑσπέρα, the west, + ῥητίνη, resin. If this is correct, the form *hesperitin* is an alteration.] Same as ★*hesperitin.*

hesperetol (hes-per′e-tōl), *n.* [*hesperet(in)* + *-ol.*] A colorless crystalline compound, $CH_2 : \overset{1}{C}H.C_6H_3(\overset{3}{O}H)\overset{4}{O}CH_3$, formed by heating isoferulic acid. It melts at 57° C.

hesperic (hes-per′ik), *a.* [Gr. ἑσπέρα, the west, + *-ic.*] Noting an acid, a colorless, crystalline, tasteless compound, $C_{22}H_{28}O_7$, extracted from orange-peel by means of alcohol.

hesperidene (hes-per′i-dēn), *n.* [*hesper(ic)* + *-id* + *-ene.*] Same as *citrene* and *carvene.*

hesperinic (hes-pe-rin′ik), *a.* [*hesper(ic)* + *-in* + *-ic.*] Derived from hesperidene.—**Hesperinic acid,** a colorless compound, $C_{20}H_{28}O_{17}.2H_2O$, formed by the oxidation of d-limonene with nitric acid.

Hesperioidea (hes-per-i-oid′ē-ä), *n. pl.* [NL., < *Hesperia* + *-oidea.*] The butterflies of the family *Hesperiidæ* considered as a superfamily.

hesperitin (hes-per′i-tin), *n.* [See ★*hesperetin.*] A colorless, intensely sweet compound, $\overset{3}{H}OC_6H_3(\overset{4}{O}CH_3)\overset{1}{C}_2H_2 . \overset{5}{O}C\overset{1,3}{O}C_6H_3(OH)_2$, which is obtained by boiling hesperidin with dilute aqueous-alcoholic sulphuric acid. It crystallizes in plates and melts and decomposes at 226° C.

Hesperornithes (hes-pe-rôr′ni-thēz), *n. pl.* [NL., pl. of *Hesperornis.*] An order of toothed birds representing the superorder *Odontolcæ* and represented by the genus *Hesperornis* (which see).

hesperornithid (hes-pe-rôr′ni-thid), *n.* One of the *Hesperornithidæ* or *Hesperornithes.*

hesperornithoid (hes-pe-rôr′ni-thoid), *a.* and *n.* [*Hesperornis* (*-ornith-*) + *-oid.*] **I.** *a.* Having the characters of or related to the *Hesperornithes.*

II. *n.* A bird resembling *Hesperornis.*

hessenbergite (hes′en-bėrg-īt), *n.* [F. *Hessenberg* + *-ite*2.] A silicate of undetermined composition occurring in colorless tabular crystals in the hematite of Mount Fibbia, St. Gotthard, Switzerland. It may be the same mineral as the more recently described bertrandite.

Hessian1, *a.*—**Brilliant Hessian purple.** See ★*purple.*—**Hessian bellows, blue, Bordeaux, brown, violet, yellow.** See ★*bellows*, etc.

Hessian2, *n.*—**Hessian of a curve** (of the *n*th order), a curve of the $3(n-2)$th order, which not only passes through the double points of the original, but has itself double points which coincide with them.—**Hessian of a net of plane curves,** the locus of the double points of the curves of the net. It is the locus of points whose polars with regard to these curves are copunctal.—**Hessian of a surface** (of the *n*th order), a surface of the $4(n-2)$th order, which passes through the double and the parabolic points of the original.

Hessle clay. See ★*clay.*

hetæric (he-ter′ik), *a.* [Gr. ἑταιρικός, < ἑταῖρος or ἑταίρα, companion: see *hetæra.*] Of or pertaining to the hetæræ. Also *hetairic.*

Heteractidæ (het-e-rak′ti-dē), *n. pl.* [NL., < *Heteractis* + *-idæ.*] A family of actiniarian *Zoantharia* which have clavate knobbed tentacles. It contains the genera *Heteractis, Stauractis, Rhopalactis, Ragactis*, and *Eloactis.*

heteractinid (het-e-rak′ti-nid), *a.* [Gr. ἕτερος, other, + ἀκτίς (ἀκτιν-), ray, + *-id.*] Having more than the usual (five) rays, as an echinoderm, especially one of the genus *Asterias.*

Heteractis (het-e-rak′tis), *n.* [NL., < Gr. ἕτερος, other, + ἀκτίς (ἀκτιν-), ray.] The typical genus of the family *Heteractidæ. Milne-Edwards*, 1857.

Heterandria (het-er-an′dri-ä), *n.* [NL., < Gr. ἕτερος, other, different, + ἀνήρ (ἀνδρ-), man (male).] A genus of very small killifishes which belong to the family *Pœciliidæ.* The males are very much smaller than the females, and the anal fin of the male is much modified, serving as an intromittent organ. *H. formosa* is common in Florida. It attains a length of a little more than half an inch, and is perhaps the smallest known vertebrate.

heterandrous (het-er-an′drus), *a.* [Gr. ἕτερος, other, different, + ἀνήρ (ανδρ-), man, stamen, + *-ous.*] In *bot.*, having stamens of two kinds as regards length or other characters.

heterandry (het-er-an′dri), *n.* [*heterandr-ous* + *-y*3.] The character of being heterandrous.

heteraxial (het-e-rak′si-al), *a.* [Gr. ἕτερος, other, + L. *axis*, axis, + *-al*1.] Having three axes, of unequal length, perpendicular to one another.

Hetereupuccinia (het″e-rū-puk-sin′i-ä), *n. pl.* [NL., < Gr. ἕτερος, different, + *eu-*, true, + NL. *Puccinia.*] A group of species of fungi of the genus *Puccinia*, in which the uredospores and teleutospores are developed on one host and the spermogonia and æcidia on another.

heterism (het′e-rizm), *n.* [Gr. ἕτερος, other, different, + *-ism.*] A general term for intraspecific differences of organisms not caused by the environment. Diversified sexes and castes are specializations of heterism. *Cook and Swingle.*

heterization (het″e-rī-zā′shon), *n.* [*heterize* + *-ation.*] The act or process of heterizing or making other or different.

The estrangement, alienation or *heterization* of the individual from the whole and the ultimate reconciliation is well illustrated in sex love, which from the standpoint of intelligence seems the most personal thing in the world, but is really, when we penetrate the illusions, seen to be in every item dominated by the interest of the species. *Saunders and Hall*, in Amer. Jour. Psychol., XI. 574.

heterize (het′e-rīz), *v. t.*; pret. and pp. *heterized*, ppr. *heterizing.* [Gr. ἕτερος, other, + *-ize.*] To make other or different; change.

heteroagglutinin (het″e-rō-a-glö′ti-nin), *n.* An agglutinin which will cause the coalescence of cells from an animal of an alien species: in contradistinction to ★*isoagglutinin.*

heteroalbumose (het″e-rō-al′bū-mōs), *n.* A primary albumose which is very closely related to the original albumin from which it is derived. On standing it becomes insoluble in part and is then called *dysalbumose.* Heteroalbumose is an antibody, in the sense of Kühne, and is thus related to antipeptone. See ★*albumose* and *peptone.*

heterobiophorid (het″e-rō-bī-of′ō-rid), *n.* See ★*biophorid.*

heteroblastically (het″e-rō-blas′ti-kal-i), *adv.* In a heteroblastic manner.

heteroblasty (het′e-rō-blas″ti), *n.* [Gr. ἕτερος, other, + βλαστός, germ, + *-y*3.] In *embryol.*, the origin, in allied animals, of organs, similar in function and position, from different embryonic or germ layers.

Heterocardia (het″e-rō-kär′di-ä), *n. pl.* [NL., Gr. ἕτερος, other, + καρδία, heart.] A division of the gastropod *Mollusca* now regarded as equivalent to the suborder *Docoglossa;* the limpets. *Perrier.*

heterocarpic (het″e-rō-kär′pik), *a.* Same as *heterocarpous. Amer. Nat.*, Jan., 1904, p. 82.

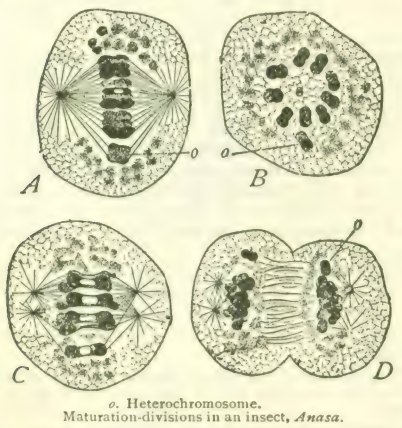
heterocarpism (het-ę-rō kär'pizm), *n.* [*heterocarp(ous)* + *-ism*]. The character of being heterocarpous.

heterocarpy (het'ë-rō-kär″pi), *n.* Same as ★*heterocarpism*.

heterocaseose (het″ę-rō-kā'sē-ōs), *n.* The heteroalbumose derived from casein.

heterocerid (het-ę-ros'ę-rid), *n.* and *a.* **I.** *n.* A member of the coleopterous family *Heteroceridæ*.

II. *a.* Of or belonging to the family *Heteroceridæ*.



heterochiral (het″ę-rō-kī'ral), *a.* [Gr. ἕτερος, other, + χείρ, hand, + *-al*[1].] Reversed as regards right and left, but otherwise identical in form and size; having the relations of an object to its image in a plane mirror.

heterochlamydeous (het″ę-rō-kla-mid'ē-us), *a.* [Gr. ἕτερος, different, + χλαμύς (χλαμυδ-), a cloak, + *-eous*.] In *bot.*, dichlamydeous, with the inner whorl of a different color from the outer. It applies to the most normal type of floral envelop, in which the calyx is green and the corolla of some other color. In plant development the heterochlamydeous stage succeeds the homochlamydeous.

heterochromatic (het″ę-rō-krō-mat'ik), *a.* Containing or consisting of more than one color: opposed to *monochromatic*.—**Heterochromatic photometry.** See ★*photometry*.

heterochrome (het'ë-rō-krōm), *a.* [Gr. ἕτερος, other, + χρῶμα, color.] In *psychol. optics*, pertaining to or concerned with different colored lights or color-sensations: as, *heterochrome* brightness; *heterochrome* photometry.

heterochromosome (het″ę-rō-krō'mō-sōm), *n.* [Gr. ἕτερος, other, + E. *chromosome*.] In *cytol.*,

o, Heterochromosome.
Maturation-divisions in an insect, *Anasa*.

A, primary spermatocyte in metaphase; *B*, equatorial plate, showing ten large tetrads and one small one, the heterochromosome, at *o*; *C*, separation of the dyads; *D*, telophase, which is also a prophase of the second division. (From Wilson's "The Cell.")

a modified chromosome differing in form, size, and presumably also in function from all the other chromosomes in the same nucleus. *T. H. Montgomery*, 1904.

heterochrosis (het″ę-rō-krō'sis), *n.* [NL., < Gr. ἕτερος, other, + χρῶσις, coloring.] Organic coloring which is different from that which prevails in the species; specifically, in *ornith.*, an abnormal coloration of the plumage which may take the form of albinism, melanism, the intensification of the normal colors or, more rarely, the introduction of other colors.

heterochthon (het-ę-rok'thon), *n.* [NL., < Gr. ἕτερος, other, + χθών, earth.] That element of the fauna of a given region which is evidently derived by immigration from another region: contrasted with ★*autochthon*, 3.

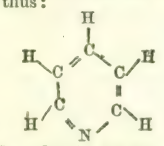
The parasitic worms of the holarctic region are not found with the indigenous (autochthon) mammals or birds, but only with the strangers (*heterochthon*) that immigrated at a late period. *Amer. Nat.*, May, 1903, p. 350.

heterocladic (het″ę-rō-klad'ik), *a.* [Gr. ἕτερος, other, + κλάδος, branch.] Noting an anastomosis between terminal twigs derived from different arteries: opposed to ★*homocladic*.

heteroclinous (het″ę-rō-klī'nus), *a.* Same as *heterocline*.

Heterocœla (het″ę-rō-sē'lą), *n. pl.* [NL., < Gr. ἕτερος, other, + κοῖλος, hollow.] A suborder of calcareous sponges in which the collared cells are restricted to more or less well-defined flagellated chambers. It contains the families *Leucasidæ*, *Sycettidæ*, *Grantiidæ*, *Heteropidæ*, and *Amphoriscidæ*. Compare ★*Homocœla*.

heterocœlous (het″ę-rō-sē'lus), *a.* [Gr. ἕτερος, other, + κοῖλος, hollow.] **1.** having the gastral layer discontinuous and restricted to chambers, as the *Heterocœla*: opposed to ★*homocœlous*.—**2.** Having the ends of the vertebral centra concave in one plane and convex in the other, as the cervicals of birds; saddle-shaped; ephippic.



Both ends of each vertebra are saddle-shaped, . . . a condition which may be called *heterocœlous*.
Coues, Key to North Amer. Birds, p. 138.

heterocomplement (het″ę-rō-kom'plē-ment), *n.* A complement furnished by an animal of a species different from the one which yields the amboceptor.

heterocomplementophilic (het″ę-rō-kom″plē-men-tō-fil'ik), *a.* [*heterocomplement* + Gr. φίλος, loving, + *-ic*.] Having reference to an affinity for heterocomplements.

Heterocotylea (het″ę-rō-cot-i-lē'ą), *n. pl.* [NL., < Gr. ἕτερος, other, + κοτύλη, cup.] An order of trematoids having one or several suckers at the posterior end. It includes several families, among them the *Polystomidæ*, *Gyrodactylidæ*, and *Microcotylidæ*.

heterocyclic (het″ę-rō-sik'lik), *a.* [Gr. ἕτερος other, + κύκλος, circle.] In *chem.*, of a substance the molecule is believed to consist of a ring or continuous chain of atoms, containing in such a ring atoms of more than a single element. Thus the molecule of pyridine consists of a ring of six atoms consecutively united with each other, five of these atoms being of carbon and one of nitrogen (each carbon atom having also a hydrogen atom attached to it)—thus:

Heterocyemida (het″ę-rō-sī-em'i-dą), *n. pl.* [NL., < **Heterocyema* + *-ida*.] An order of *Rhombozoa* in which the ectoderm of the adult is not ciliated and there is no polar cap, but at the anterior end the ectoderm cells contain refringent bodies and may give rise to four terminal wart-like papillæ. It contains the genera *Conocyema* and *Microcyema*, both parasitic in the renal sacs of cephalopods.

Heterocysteæ (het″ę-rō-sis'tē-ē), *n. pl.* [NL., < Gr. ἕτερος, other, + κίστις, a bag, + *-eæ*.] In *bot.*, a suborder of the blue-green algæ characterized by the presence of heterocysts (which see).

heterocytotoxin (het″ę-rō-sī-tō-tok'sin), *n.* [Gr. ἕτερος, other, + E. *cytotoxin*.] A cytotoxin which will cause the destruction of cells from an animal of an alien species. *Science*, May 2, 1902, p. 697.

heterodermatous (het″ę-rō-dėr'mą-tus), *a.* [Gr. ἕτερος, other, + δέρμα(τ-), skin, + *-ous*.] Having the skin of a different character in different parts of the body.

heterodesmotic (het″ę-rō-des-mot'ik), *a.* [Gr. ἕτερος, other, + δεσμός, a band, + *-ot-ic*.] Noting nerve-fibers which connect dissimilar centers in the gray matter of the brain or spinal cord, or connect a nerve-center with an end-organ.

heterodiphycercal (het″ę-rō-dif″i-sėr'kal), *a.* [Gr. ἕτερος, other, + διφυής, of double nature, + κέρκος, tail, + *-al*.] In *ichth.*, noting a form of the caudal fin in which the vertebral column is elongated in an upward curve and fringed above and below with fin-rays, but the rays of the upper lobe are much less developed than those of the lower.

heterodistyly (het″ę-rō-dis'ti-li), *n.* [Gr. ἕτερος, other, + δι-, two, + στῦλος, pillar (style), + *-y*[3].] In *bot.*, that form of heterostyly in which some of the flowers have long filaments and short styles, and others short filaments and long styles.

heterodontism (het″ę-rō-don'tizm), *n.* [*heterodont* + *-ism*.] The condition of having teeth of more than one kind, as in most mammals where incisors, canines, premolars, and molars may be present: opposed to ★*homodontism*.

heterodrome (het'ę-rō-drōm), *n.* [Gr. ἕτερος, other, + δρόμος, a running, < δραμεῖν, run.] In *physiol.*, a negative induction-current. *Philos. Trans. Roy. Soc.* (London), 1901, ser. B, p. 184.

heterodynamous (het″ę-rō-din'ą-mus), *a.* [Gr. ἕτερος, other, + δύναμις, power.] Of or pertaining to the condition of dominance in respect to a given character in ancestral inheritance. (See ★*inheritance*.) When the cross-bred offspring of two parental races or varieties produce descendants of which some are like one parental race, and others like the other, the parental races are said to be *heterodynamous*.

Correns proposes the terms "*heterodynamous*" and "homodynamous" to express that an organism is dominant or not dominant in respect of a given character.
Bateson and Saunders, Rep. Evol. Com. Roy. Soc., 1902, [I. 126.

Heterodynamous determinant. See ★*determinant*.

heteroform (het'ę-rō-fôrm), *a.* Relating to the heteroproteoses in contradistinction to the protoproteoses. *C. E. Simon*, Physiological Chem., p. 175.—**Heteroform ferment.** See ★*ferment*.

heterogamic (het″ę-rō-gam'ik), *a.* Same as *heterogamous*. *Science*, Oct. 7, 1904, p. 472.

heterogamous, *a.* **2.** Illustrative of or characterized by heterogenesis, or alternation of generations.—**3.** Of or pertaining to heterogamy, or the marriage or pairing of unlike individuals.—**Heterogamous mating.** See ★*mating*.

heterogamy, *n.* **2.** In *biol.*, heterogenesis, or alternation of generations, considered as an alternation between sexual and asexual reproduction or between parthenogenesis and bisexual reproduction.—**3.** Marriage or mating or pairing between unlike individuals, as contrasted with homogamy, or the mating of like with like.

heterogeneity, *n.* **2.** A dissimilarity of structure in different parts of an organism.—**Lithological heterogeneity**, in *geol.*, the commingling in glacial drift of materials derived from rock formations of different characters.—**Physical heterogeneity**, in *geol.*, the mingling of unassorted constituents of unlike physical character: especially characteristic of glacial till where coarse and fine materials of all grades are deposited together in a mass. *R. D. Salisbury*, in Geol. Surv. of New Jersey, 1891, p. 48.

heterogenic (het″ę-rō-jen'ik), *a.* Of other or different origin; characterized by heterogenesis.

heterogenicity (het″ę-rō-jē-nis'i-ti), *n.* [*heterogenic* + *-ity*.] The character of being heterogenic. *Jour. Exper. Med.*, Nov. 29, 1901, p. 82.

heterogenite (het-ę-roj'e-nīt), *n.* [*heterogen-ic* + *-it-e*[2].] A hydrated oxid of cobalt which occurs in black amorthous masses. It is derived from the alteration of smaltite.

heterogeny, *n.* **2.** In *biol.*, mixed parthenogenesis, the alternation of sexual and parthenogenetic generations. See *normal* ★*parthenogenesis*.

heteroglobulose (het″ę-rō-glob'ū-lōs), *n.* A heteroalbumose derived from a globulin.

heterognath (het'ę-rō-gnath), *a.* and *n.* **I.** *a.* Of or pertaining to the suborder *Heterognathi*, fresh-water fishes of the tropics related to the *Cyprinidæ*.

II. *n.* One of the *Heterognathi*.

Heterognathi (het-ę-rog'na-thī), *n. pl.* [NL., < Gr. ἕτερος, other, different, + γνάθος, jaw.] A suborder of fishes typified by the South American family of river-fishes, *Characinidæ*. They differ from the *Cyprinidæ* in having teeth in the jaws and an adipose fin.

heterogomph (het'ę-rō-gomf), *a.* [Gr. ἕτερος, other, + γόμφος, peg, tooth.] Having dissimilar teeth, as the bristles of certain chætopodous worms.

A more important point, however, is the occurrence of *heterogomph* bristles at the inferior border of the upper series of bristles in the foot.
Annals and Mag. Nat. Hist., Sept., 1902, p. 256.

heterogone, *a.* **II.** *n.* A heterogonous plant.

heterogonous, *a.* **2.** In *biol.*, characterized by indirect development, with metamorphosis or alternation of generations.

heterogony, *n.*—**Law of the heterogony of ends.** See ★*end*.

heterography, *n.* **2.** The writing of another word instead of the one intended by the writer: analogous to *heterophemy*.

heteroicism, *n.* Same as *heterœcism*.

heteroimmune (het″ę-rō-i-mūn'), *a.* Immune to cells or cell-products of an animal of a different species from the one which furnishes the immune serum. *Lancet*, April 4, 1903, p. 944.

heterokinesis (het″ę-rō-ki-nē'sis), *n.* [NL., < Gr. ἕτερος, other, + κίνησις, movement.] The division of cells into daughter-cells which are different from one another in their hereditary tendencies and in the history for which each is predestined. Belief in heterokinesis is an essential part of Weismann's view of the nature of inheritance, although some authorities believe there is experimental evidence that all cell-division is into parts that are essentially alike, and that the differences in their history are due to the presence or absence of food within them and to their interactions among one another and with the external world.

heterokinesy†, *n.* Action caused by something else. See *autokinesy*. *Cudworth*.

heterolalia (het″ẹ-rō-lā′li-ă), *n.* [Gr. *ἕτερος*, other, + *-λαλια*, ‹ *-λαλος*, ‹ *λαλεῖν*, talk.] A form of aphasia in which the words uttered are not those in the mind of the speaker.

heterolateral (het″ẹ-rō-lat′ẹ-ral), *a.* [Gr. *ἕτερος*, other, + L. *latus* (*later-*), side, + *-al*[1].] Referring to opposite sides. *Buck*, Med. Handbook, II. 240.

heterolecithal (het″ẹ-rō-les′i-thal), *a.* [Gr. *ἕτερος*, other, + *λέκιθος*, the yolk of an egg.] In *embryol.*, having the food-yolk distributed unequally, as in telolecithal and perilecithal eggs: opposed to ★*homolecithal*. *Baldwin*, Dict. of Philos. and Psychol., I. 476.

heterolith (het′ẹ-rō-lith), *n.* [Gr. *ἕτερος*, other, + *λίθος*, stone.] A concretion in the intestinal tract of animals, not formed from mineral matter. Heteroliths are principally found in the stomachs of ruminants and are due to the accumulation of masses of hair and dry vegetable matter. See ★*hair-ball*.

heterologous, *a.* **3.** In researches in immunity, originating, as cells or serum, from an animal of a species different from the one undergoing immunization: thus, in immunizing a rabbit with the red blood-corpuscles of a goat, the latter are of *heterologous* origin. —**Heterologous determinant, id, tumor.** See ★*determinant*, etc.

heterolysin (het-ẹ-rol′i-sin), *n.* [*heterolys-is* + *-in*[2].] A lysin which will cause the destruction of cells of animals of an alien species: used in contradistinction to ★*isolysin* or ★*homolysin*.

heterolysis (het-ẹ-rol′i-sis), *n.* [NL., ‹ Gr. *ἕτερος*, other, + *λῦσις*, dissolution.] The destruction of cells by heterolysins. See ★*autolysis*. *Vaughan and Novy*, Cellular Toxins, p. 129.

heterolytic (het″ẹ-rō-lit′ik), *a.* [*heterolysis* (*-lyt-*) + *-ic*.] Of or pertaining to heterolysis or the heterolysins.

heteromaton (het-ẹ-rom′a-ton), *n.* [Gr. *ἕτερος*, other, + **ματός*, moving, moved: see *automaton*.] A thing that is moved by something else.

heteromecic (het″ẹ-rō-mē′sik), *a.* [Gr. *ἕτερος*, other, different, + *μῆκος*, length.] Having different lengths (or values).—**Heteromecic number.** See ★*number*.

heterometabolic (het″ẹ-rō-met-a-bol′ik), *a.* Same as *heterometabolous*.

Heteromi (het-ẹ-rō′mī), *n. pl.* [NL., ‹ Gr. *ἕτερος*, other, different, + *ὠμος*, shoulder, upper arm.] An order or suborder of fishes which comprises the *Notacanthidæ* and related families; eel-like fishes having a short girdle inserted behind the head and spines in the dorsal fin.

Heteromonadidæ (het″ẹ-rō-mō-nad′i-dē), *n. pl.* [NL., ‹ **Heteromonas* (*-monad-*), a genus (?), + *-idæ*.] A family of flagellate *Protozoa* which consists of small colorless monads having one or two accessory flagella in addition to the chief flagellum. They are often colonial upon a stalk. Reproduction is by longitudinal fission. Among the genera included are *Monas*, *Dendromonas*, and *Anthophysa*.

Heteromonadina (het″ẹ-rō-mon-a-dī′nă), *n. pl.* [NL.] Same as ★*Heteromonadidæ*.

heteromorph, *n.* **2.** A decorative design representing a certain object, but modified in character by representing another object at the same time, as, for instance, flower designs the branches of which represent animals.

I propose to adopt the term *heteromorph* for a confusion with one another of two or more different skeuomorphs, or with the amalgamation of any two or more biomorphs, or with the combination of any skeuomorph with any biomorph. *Haddon*, Evolution in Art, p. 192.

heteromorphic, *a.* **3.** Of or pertaining to heteromorphism, in any sense of that word. *T. H. Morgan*, Regeneration, p. 24.

heteromorphism, *n.* (*d*) In *biol.*, the property of replacing lost parts by new parts which are different from those that have been lost. See ★*heteromorphosis*.

heteromorphosis (het″ẹ-rō-môr′fō-sis), *n.* [NL., ‹ Gr. *ἕτερος*, other, + *μόρφωσις*, formation.] In *biol.*: (*a*) The replacement of a lost part by a new part that is different from the part that has been removed; neomorphosis.

The processes of *heteromorphosis*—that is, the transformation or substitution of one organ for a morphologically different one by means of certain external influences—force us to the same view.
J. Loeb, Compar. Physiol. of the Brain, p. 203.

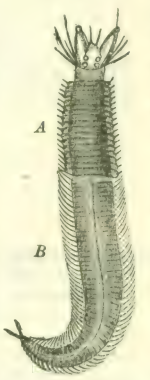
When the new part is different from the part removed the process has been called by Loeb *heteromorphosis*.
T. H. Morgan, Regeneration, p. 24.

(*b*) The replacement of a lost part by a new part that has its axes reversed as compared with the old part of which it is a mirror image.
T. H. Morgan, Regeneration, p. 25.

heteromorphous, *a.* **2.** Same as ★*heteromorphic*, 3.

Heteromyidæ (het″ẹ-rō-mī′i-dē), *n. pl.* [NL. *Heteromys*, the type genus, + *-idæ*.] A family of rodents which comprises the kangaroo-rats, pocket-mice, and their allies. The name replaces *Dipodidæ*, which is not available. *J. A. Allen*, 1893.

Heteronemertini (het″ẹ-rō-nē-mėr-tī′nī), *n. pl.* [NL., ‹ Gr. *ἕτερος*, other, + NL. *Nemertini*.] An order of nemerteans in which the lateral nerves are in the dermal muscles outside the circular muscles, and the body-wall consists of ectoderm, dermis, an outer longitudinal layer of muscles, a circular and an inner longitudinal muscular layer. It includes the families *Eupoliidæ* and *Lineidæ*. Compare ★*Protonemertini*, ★*Mesonemertini*, and ★*Metanemertini*.



heteronephrolysin (het″ẹ-rō-nef-rol′i-sin), *n.* [Gr. *ἕτερος*, other, + E. *nephrolysin*.] A nephrolysin which is directed against the renal cells of animals of a different species.

heteronereid (het″ẹ-rō-nē′rē-id), *n.* and *a.* **I.** *n.* A heteronereis.

II. *a.* Of or pertaining to a heteronereis: as, a *heteronereid* condition. *Science*, April 14, 1905, p. 570.

heteronereis (het″ẹ-rō-nē′rē-is), *n.* [ML., ‹ Gr. *ἕτερος*, other, + NL. *Nereis*.] The sexual stage of some worms of the genus *Nereis:* so named on the erroneous supposition that they are of a distinct genus. Compare ★*heterosyllis*.

In many species of Nereis, for instance, those segments containing the generative products undergo more or less extensive changes (at maturity) while the anterior ones remain unaltered. The body of the ripe Nereis is then distinguishable into an anterior non-sexual region and a posterior sexual region; and so great are these changes in certain species that the mature worms were for a long time believed to belong to a different genus, and received the name *Heteronereis*.
Camb. Nat. Hist., II. 276.

Male Heteronereis of *Nereis pelagica*.
A, non-sexual region; *B*, sexual, modified region. Natural size. (From "Cambridge Natural History.")

heteronomous, *a.* **3.** Subject to or governed by different principles or laws.—**4.** In *zoöl.*, made up of dissimilar segments or metameres: said of annelids or arthropods in which the various metameres differ in structure through the suppression of certain organs and the unusual development of others. Opposed to ★*homonomous*.

heteronomously (het-ẹ-ron′ō-mus-li), *adv.* In a heteronomous manner.

heteronomy, *n.* **3.** In *biol.*, the state of divergent modification in parts that exhibit general homology or homonomy. When the serially homologous, or homonomous, segments of an annelid are modified in different ways they may be said to exhibit heteronomy in so far as their modifications are under consideration. Heteronomy is the secondary, or adaptive, complication of homonomy.

Heteronymous diplopia. Same as *crossed* ★*diplopia*. —**Heteronymous images.** See ★*image*.

heteroparthenogenesis (het″ẹ-rō-par″then-ō-jen′e-sis), *n.* [Gr. *ἕτερος*, other, + NL. *parthenogenesis*.] **1.** That type of parthenogenesis in which the unfertilized eggs produce males and females: contrasted with ★*homoparthenogenesis*, or the production of only one sex from unfertilized eggs. Parthenogenetic female animals which produce both males and females are called *sexupara*. See *normal* ★*parthenogenesis* and ★*sexupara*.—**2.** Mixed parthenogenesis, or the alternation of sexual and parthenogenetic generations. See *normal* ★*parthenogenesis*.

Heterophlebia (het″ẹ-rō-flē′bi-ă), *n.* [NL., ‹ Gr. *ἕτερος*, other, + *φλέψ* (*φλεβ-*), vein.] A genus of fossil dragon-flies from the Jurassic lithographic slates of Bavaria.

heterophony (het-ẹ-rof′ō-ni), *n.* Same as *heterophonia*.

heterophoric (het″ẹ-rō-for′ik), *a.* Related to or affected with heterophoria.

heterophthalmia (het″ẹ-rof-thal′mi-ă), *n.* [NL., ‹ Gr. *ἕτερος*, other, + *ὀφθαλμός*, eye.] A want of similarity, as in color or in the direction of the axes, in the two eyes.

heterophthalmy (het″ẹ-rof-thal′mi), *n.* Same as ★*heterophthalmia*.

heterophyletic (het″er-ō-fī-let′ik), *a.* [Gr. *ἕτερος*, other, + *φῦλον*, tribe, family.] **1.** Of or belonging to different groups.—**2.** In *biol.*, different in ancestry, but alike in appearance; convergent; isomorphic.

A few fundamental characters are better indications of the affinities of a given group of birds than a great number of agreements if these can be shown to be cases of isomorphism or *heterophyletic*, convergent analogy.
Encyc. Brit., XXVI. 255.

Heteropia (het-ẹ-rō′pi-ă), *n.* [NL., ‹ Gr. *ἕτερος*, other, + *ὤψ* (*ὠπ-*), eye, face.] The typical genus of the family *Heteropidæ*. *Carter*, 1886.

Heteropidæ (het-ẹ-rop′i-dē), *n. pl.* [NL., ‹ *Heteropia* + *-idæ*.] A family of heterocœlus *Calcarea* which have a poriferous dermal cortex and subdermal sagittal triradiate spicules: an articulate chamber skeleton may or may not be present. It contains the genera *Heteropia*, *Grantessa*, and *Vosmæropsis*.

heteroplasm (het′ẹ-rō-plazm), *n.* [Gr. *ἕτερος*, other, + *πλάσμα*, anything formed.] Any heterologous tissue. See *heteroplasia*.

heteroplastid (het″ẹ-rō-plas′tid), *n.* [Gr. *ἕτερος*, other, + E. *plastid*.] An organism consisting of numerous cells differing from one another in structure: opposed to ★*homoplastid*.

heteroplasty (het′ẹ-rō-plas″ti), *n.* [Gr. *ἕτερος*, other, + *πλαστός*, ‹ *πλάσσειν*, form.] **1.** A surgical operation, for the restoration of a lost part, in which the new skin or other tissue is taken from another individual.—**2.** Abnormal formation of tissue; heteroplasia.

heteropodal (het-ẹ-rop′ō-dal), *a.* In *neurol.*, of or pertaining to nerve-cells which have branches or processes of different kinds: opposed to ★*homoiopodal*. *Baldwin*, Dict. of Philos. and Psychol., II. 155.

Heteropolar dynamo, a generator or motor the armature windings of which in revolving pass successively poles of opposite magnetization.

Heteropora (het-ẹ-rop′ō-ră), *n.* [NL., ‹ Gr. *ἕτερος*, other, + *πόρος*, a pore.] A genus of cyclostomatous *Bryozoa* of the family *Cerioporidæ* which have ramose or massive zoaria, zoœcia with rounded apertures, and abundant interstitial tubes. It abounds in the Jurassic and Cretaceous rocks and has existed to the present time.

heteroproteose (het″ẹ-rō-prō′tē-ōs), *n.* [Gr. *ἕτερος*, other, + E. *proteose*.] A heteroalbumose derived from any albumin in the narrower sense of the term. See ★*proteose* and ★*albumin*.

It appears that the *hetero-proteose* molecule is about five or six times the size of the molecule of proto-proteose. *Encyc. Brit.*, XXXI. 720.

heterorhabdic (het″ẹ-rō-rab′dik), *a.* [Gr. *ἕτερος*, other, + *ῥάβδος*, a rod.] Having the gill-filaments unlike in size, as in certain mollusks. Compare ★*homorhabdic*. *Lankester*.

The filaments of the same gill-lamella may be arranged in a flat, uniform series, or the lamella may be thrown into vertical folds or plicæ. . . . The filament that occupies the bottom of the depression between two successive plicæ of a plicate lamella is in most species of greater size than the others. It will be spoken of as the principal filament, the others as ordinary filaments. Homorhabdic gills are those with all the filaments alike; *heterorhabdic* gills are those which exhibit the above-mentioned differentiation into principal and ordinary filaments.
Philos. Trans. Roy. Soc. (London), 1903, ser. B, p. 154.

heteroscope (het′ẹ-rō-skōp), *n.* [Gr. *ἕτερος*, other, + *σκοπεῖν*, view.] An instrument for determining the degree of heteroscopy. *Optical Jour.*, March, 1904, p. 351.

heteroscopy (het-ẹ-ros′kō-pi), *n.* [Gr. *ἕτερος*, other, + *-σκοπια* ‹ *σκοπεῖν*, view.] Inequality of vision in the two eyes.

heterosexual (het″ẹ-rō-sek′sū-al), *a.* [Gr. *ἕτερος*, other, + L. *sexus*, sex, + *-al*[1].] Relating to the opposite sex. *Buck*, Med. Handbook, V. 134.

Heterosporium (het″ẹ-rō-spō′ri-um), *n.* [NL. (Klotzsch, 1832), ‹ Gr. *ἕτερος*, other, + *σπορά*, seed (spore).] A genus of hyphomycetous fungi. They have short simple or branched conidiophores, usually forming a layer on the surface of the matrix, and the spores are dark-colored, 3- or more celled, and roughened with warts or spines. Some species are regarded as the cause of plant-diseases. *H. echinulatum*, a widely distributed species, is said to cause the fairy-ring spot of carnations.

heterospory (het-ẹ-ros′pō-ri), *n.* [*heterosporous* + *-y*[3].] The condition of being heterosporous.

heterostachyous (het″ẹ-rō-stā′ki-us), *a.* [Gr. *ἕτερος*, other, + *στάχυς*, an ear or spike of corn, + *-ous*.] In *bot.*, having the flowers bisexual and the sexes in different spikes: said of species of *Carex*.

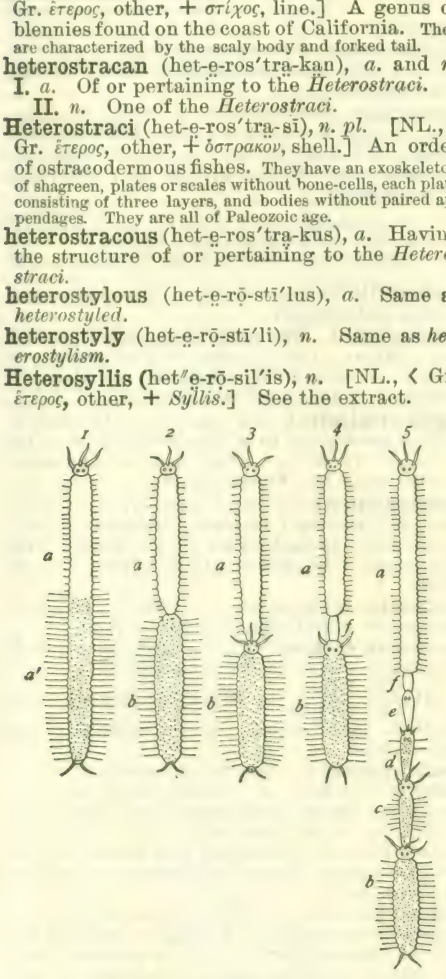
Where a species with normally gynæcandrous spikes appears as inseparable from others which are truly *heterostachyous*. *Amer. Jour. Sci.*, Dec., 1903, p. 452.

Heterosteus (het-ę-ros'tē-us), *n.* (NL., ⟨ Gr. ἕτερος, other, + ὀστέον, bone.] A genus of arthrodirous fishes of very large size, similar to *Homosteus*, but with enormous anterior processes on the dorsolateral body-plates. It occurs in the Upper Devonian.

Heterostichus (het-ę-ros'ti-kus), *n.* [NL., ⟨ Gr. ἕτερος, other, + στίχος, line.] A genus of blennies found on the coast of California. They are characterized by the scaly body and forked tail.

heterostracan (het-ę-ros'trạ-kạn), *a.* and *n.* **I.** *a.* Of or pertaining to the *Heterostraci*.

II. *n.* One of the *Heterostraci*.



Heterostraci (het-ę-ros'trạ-sī), *n. pl.* [NL., ⟨ Gr. ἕτερος, other, + ὄστρακον, shell.] An order of ostracodermous fishes. They have an exoskeleton of shagreen, plates or scales without bone-cells, each plate consisting of three layers, and bodies without paired appendages. They are all of Paleozoic age.

heterostracous (het-ę-ros'trạ-kus), *a.* Having the structure of or pertaining to the *Heterostraci*.

heterostylous (het-ę-rō-stī'lus), *a.* Same as *heterostyled*.

heterostyly (het-ę-rō-stī'li), *n.* Same as *heterostylism*.

Heterosyllis (het″ę-rō-sil'is), *n.* [NL., ⟨ Gr. ἕτερος, other, + *Syllis*.] See the extract.

Heterosyllis.

Diagram illustrating the various stages in the asexual formation of a chain of zoöids. (Modified from Malaquin.)

1, heteromereid or hetercsyllid stage; *a*, non-sexual, *a'*, sexual region of the body, with modified parapodia. 2, *Syllis*, the hinder sexual region; *b* is similarly modified, and will separate from the parent zoöid, *a*, and become an independent zoöid. 3, *Autolytus*: the hinder zoöid, *b*, develops a head by budding before separation. 4, *Autolytus*, etc.; a zone of budding, *f*, makes its appearance in front of the head of *b*, and by its growth will give rise to a series of new segments in the middle of the body. 5, *Myrianida*, *Autolytus*, etc. From the zone of budding, *f*, a very large number of segments have been formed, which have, further, become grouped so as to form three individuals, *c*, *d*, *e*; *b* is the hindmost zoöid, which is either formed from the hinder segments of the parent zoöid or is produced by budding, like *c*, *d*, *e*. (From Cambridge Natural History.)

In some genera [of the family *Syllidæ*], there occur changes quite similar to those characterising "Heteronereis"—that is, the posterior segments in which the genital organs exist become altered, so that the worm consists of two distinct regions, and is termed a "*Heterosyllis*."
Camb. Nat. Hist., II. 278.

heterotelic (het″ę-rō-tel'ik), *a.* [Gr. ἕτερος, other, + τέλος, end.] Directed upon or subserving an external or foreign end: opposed to ★*autotelic*. *Baldwin*, Dict. of Philos. and Psychol., I. 96.

heterothallic (het′ę-rō-thal″ik), *a.* [Gr. ἕτερος, other, + θαλλός, sprout, shoot, + *-ic*.] Having the zygospores formed only as the result of the conjugation of hyphæ from two different strains: said of zygospore-forming plants.

heterotherm (het'ę-rō-thėrm), *n.* [Gr. ἕτερος, other, + θέρμη, heat.] A cold-blooded animal, or one whose bodily temperature differs little from that of the surrounding medium and changes with it.

With the others the (*heterotherms*) . . . there is a temperature which is correspondingly low.
Smithsonian Rep., 1900, p. 412.

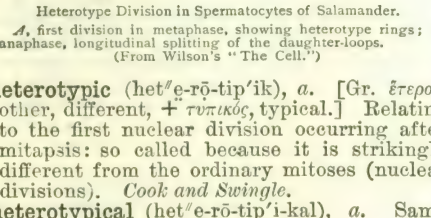
heterothermal (het″ę-rō-thėr'mal), *a.* [Gr. ἕτερος, other, + θέρμη, heat, + *-al*.] Having blood which varies in temperature with the temperature of the environment; pœcilothermal: said of cold-blooded animals such as reptiles. Opposed to ★*homœothermal*.

heterothermic (het″ę-rō-thėr'mik), *a.* [As *heterotherm* + *-ic*.] 1. Noting a condition of water, air, or other liquid in which warm and dry air are very much mixed without having had time to come to an equilibrium.—2. Of or pertaining to heterotherms or cold-blooded animals; cold-blooded.

Another class of organisms, representatives of which are never found among birds or mammals, are called *heterothermic*—cold-blooded—animals; creatures of variable temperature, since, in their normal physiological state, their individual temperature follows closely the changes in the atmosphere about them.
Smithsonian Rep., 1890, p. 407.

heterotonous (het-ę-rot'ō-nus), *a.* [Gr. ἕτερος, other, + τόνος, tone.] In *music*, of scales or chords, having tones that are unlike.

heterotristyly (het″ę-rō-tris'ti-li), *n.* [Gr. ἕτερος, other, + τρι-, three, + στῦλος, pillar (style), + *-y*³.] That form of heterostyly in which there are three kinds of flowers, namely, those having a long style with medium and short stamens, those having a medium style with long and short stamens, and those having a short style with long and medium stamens.



heterotrophic (het″ę-rō-trof'ik), *a.* [Gr. ἕτερος, other, + τροφή, nourishment, + *-ic*.] Not self-sustaining; dependent upon others for food. Since all animals depend, either immediately or ultimately, upon plants for food, they are sometimes termed *heterotrophic*, in contrast with the *autotrophic* or self-sustaining plants. See ★*autotrophic*.

The root-difference between plants and animals is one of nutrition. Plants are autotrophic, animals *heterotrophic*.
Rep. Brit. Ass'n Advancement of Sci., 1901, p. 820.

heterotropia (het″ę-rō-trō'pi-ạ), *n.* [NL., ⟨ Gr. ἕτερος, other, + τρόπος, a turning, ⟨ τρέπειν, turn.] In *ophthalmol.*, strabismus or squint. *Optical Jour.*, March, 1904, p. 348.

heterotropy (het-ę-rot'rō-pi), *n.* [Gr. ἕτερος, other, + *-τροπια*, ⟨ τρέπειν, turn.] In *embryol.*, same as ★*anisotropy*, 2 (which see).

heterotype (het'ę-rō-tīp), *a.* [Gr. ἕτερος, other, + τύπος, type.] Of a different type or of different types.—**Heterotype division** or **mitosis**, that form of mitotic or karyokinetic cell-division in which the chromosomes undergo a precocious longitudinal splitting and form more or less regular rings. *Flemming*, 1887.

Heterotype Division in Spermatocytes of Salamander.

A, first division in metaphase, showing heterotype rings; *B*, anaphase, longitudinal splitting of the daughter-loops. (From Wilson's "The Cell.")

heterotypic (het″ę-rō-tip'ik), *a.* [Gr. ἕτερος, other, different, + τυπικός, typical.] Relating to the first nuclear division occurring after mitapsis: so called because it is strikingly different from the ordinary mitoses (nuclear divisions). *Cook and Swingle*.

heterotypical (het″ę-rō-tip'i-kạl), *a.* Same as ★*heterotypic*.

heteroxanthin (het″ę-rok-san'thin), *n.* [Gr. ἕτερος, other, + E. *xanthin*.] A xanthin derivative, $C_6H_6N_4O_2$, which contains one methyl group. It has been found in the urine.

heterozetesis (het-ę-rō-zē-tē'sis), *n.* [NL., ⟨ Gr. ἕτερος, other, + ζήτησις, seeking, inquiry, investigation.] The confusion of what one has really proved with a different proposition; the opinion that one has proved what one has not proved: a fault of logic substantially the same as an *ignoratio elenchi*. *G. S. Hall*, Adolescence, II. 533.

heterozonal (het″ę-rō-zō'nal), *a.* [Gr. ἕτερος, other, + ζώνη, belt (zone), + *-al*.] Belonging to different zones: said of the faces of a crystal. Compare *tautozonal*.

heterozygosis (het″ę-rō-zī-gō'sis), *n.* [NL., ⟨ *heterozyg(ote)* + *-osis*.] Development from a heterozygote.

Special attention has been given to the illustrations of reversion following *heterozygosis*.
W. Bateson, Exper. Studies, II. 4.

heterozygote (het″ę-rō-zī'gōt), *n.* and *a.* [Gr. ἕτερος, other, + E. *zygote*.] **I.** *n.* 1. A zygote formed by the union of two unlike gametes.—2. In Mendelian phraseology, a hybrid animal or plant which combines the characters of two dissimilar parents; a mule-form.

Consequently if *Aa*'s breed together, the new *A* gametes may meet each other in fertilization, forming a zygote *AA*, namely, the pure *A* variety again. Similarly two *a* gametes may meet and form *aa*, or the pure *a* variety again. But if an *A* gamete meets an *a*, it will once more form *Aa*, with its special character. This *Aa* is the hybrid or "mule" form, or, as I have elsewhere called it, the *heterozygote*, as distinguished from *AA* or *aa* the homozygotes.
W. Bateson, Mendel's Prin. of Heredity, p. 23.

II. *a.* Of or pertaining to a fertilized egg, or to origin from a fertilized egg, which is formed by the union of two opposite allelomorphic germ-cells: as, *heterozygote* characters. *Bateson and Saunders*, Rep. Evol. Com. Roy. Soc., 1902, I. 127.

heterozygous (het″ę-rō-zī'gus), *a.* [Gr. ἕτερος, other, + ζυγόν, yoke.] 1. Of or pertaining to germ-cells with opposite allelomorphic characters. *Bateson and Saunders*, Rep. Evol. Com. Roy. Soc., 1902, I. 147.—2. Of or pertaining to characters which will not become fixed or constant under continual selection.—**Heterozygous forms**, certain forms which, as has long been known to breeders, cannot be fixed by selection.

heth (ḥāt, ḥāth), *n.* [Heb. *hēth*, *hēt*. From the corresponding Phen. name was derived the name of the Greek ἦτα, used for long E.] The eighth letter (ח) of the Hebrew alphabet, corresponding in sound to the Scotch *ch* in *loch*. Its numerical value is 8.

hether, *n.* A simplified spelling of *heather*.

hetocresol (het-ō-krē'sōl), *n.* [Gr. ἕτερος, other, + E. *cresol*.] A non-poisonous crystalline compound, the cinnamic acid ester of metacresol: used in treatment of tuberculosis.

hetol (hē'tōl), *n.* [Appar. ⟨ *he(c)t(ic)* + *-ol*.] Cinnamate of sodium, a remedy which has been used in the treatment of tuberculosis.

Hettangian (he-tan'ji-ạn), *a.* Of Hettange in Luxemburg: applied, in *geol.*, to a stage of the Lias in France and Switzerland which lies at the base of the series. The rocks are marls, sandstones, and limestones which abound in invertebrate fossils and remains of ferns and cycads.

heubachite (hoi'baċh-īt), *n.* [Named from (G.) *Heubachthal* in Baden.] A hydrated oxid of cobalt and nickel occurring as a black incrustation on barite.

heumite (hā'öm-īt), *n.* [*Heum*, in Norway, + *-ite*².] In *petrog.*, a name given by Brögger (1898) to a dark-colored aphanitic rock without phenocrysts, composed of abundant soda-orthoclase or soda-microcline and barkevikite, with considerable biotite and a small amount of nephelite, sodalite, and diopside, and accessory minerals.

heuristic, *a.* **II.** *n.* Same as *heuretic*.

Many analogies of this change are, and more may be, drawn from the metamorphosism of insects, and here biology supplies the best *heuristic*.
G. S. Hall, Adolescence, II. 331.

Heuskara (hūs-kä'rạ), *n.* Another form of *Euskara* (the Basque language).

Heuskarian (hūs-kä'ri-ạn), *a.* and *n.* Another form of *Euskarian*.

heveene (hē'vę-ēn), *n.* [*Hevea* + *-ene*.] An amber-yellow oil, $C_{15}H_{24}$, belonging to the sesquiterpenes; the least volatile product of the destructive distillation of caoutchouc and gutta-percha. It boils at 255–265° C.

heven, *n.* A simplified spelling of *heaven*.

hevy, *a.* and *n.* A simplified spelling of *heavy*.

Hewers of wood and drawers of water, persons who perform the humblest kind of work; drudges; slaves.

And the princes said unto them, Let them live; but let them be *hewers of wood and drawers of water* unto all the congregation. *Joshua* ix. 21.

hex-, hexa-. [Gr. ἕξ, in comp. ἑξα-, six.] In *chem.*, in compound words, signifying the presence of six atoms of an element or six molecules of a compound.

hexabasic (hek-sạ-bā'sik), *a.* [Gr. ἕξ, six, + βάσις, base, + *-ic*.] Having a basicity of six; capable of combining with a proportion of base or metal equivalent to six atoms of hydrogen.

hexacanth (hek'sạ-kanth), *a.* [Gr. ἕξ, six, + ἄκανθα, thorn.] Having six hooks: as, the *hexacanth* embryo of some tapeworms.

hexacanthous (hek-sạ-kan'thus), *a.* Same as ★*hexacanth*.

hexacarbon (hek-sạ-kär'bọn), *a.* [Gr. ἕξ, six, + E. *carbon*.] Containing six carbon atoms.

Hexaceratina (hek″sạ-sę-rat'i-nạ), *n. pl.* [NL., ⟨ Gr. ἕξ, six, + κέρας (κερατ-), horn, + *-ina*².] An order of ceratose sponges proposed by Lendenfeld to contain the families *Aplysillidæ*

and *Halisarcidæ*. It includes sponges with large and saccular ciliated chambers with simple canals, the skeleton composed of soft horny fibers, sometimes accompanied by horny spicules. The skeleton may be absent.

hexachlorid (hek-sa-klō′rid), *n.* [Gr. *ἕξ*, six, + E. *chlorid.*] In *chem.*, a compound containing six atoms of chlorin united to a more electropositive element or radical: as, tungsten *hexachlorid* (WCl_6). *Jour. Soc. Chem. Industry*, XI. 599.

hexachordal (hek-sa-kôr′dal), *n.* [*hexachord* + *-al*[1].] Pertaining to or consisting of hexachords.

hexacid (heks-as′id), *a.* [Gr. *ἕξ*, six, + E. *acid.*] Used, in contrast with ★*hexabasic*, to denote that a substance is capable of combining with six equivalents of an acid.

hexacompound (hek-sa-kom′pound), *n.* A compound containing six similar atoms or groups.

hexacontahedron (hek″sa-kon-ta-hē′dron), *n.* [Gr. *ἑξήκοντα*, sixty, + *ἕδρα*, seat, base.] A solid of sixty sides.—**Deltoidal hexacontahedron**, a 60-faced solid, formed by a deltoidal bossing of the icosahedron and reciprocal to the small rhombicosidodecahedron.

Hexacrinus (hek-sak′ri-nus), *n.* [NL., < Gr. *ἕξ*, six, + *κρίνον*, a lily (see *crinoid*).] A genus of camerate *Crinoidea* belonging to the family *Hexacrinidæ*. It is characterized by three basal plates and five very large and elongate radials with a similar anal plate. It is found in the Devonian of Europe and North America.

hexact, *a.* **II.** *n.* Same as ★*hexactine*.

hexactine (hek-sak′tin), *n.* [Gr. *ἕξ*, six, + *ἀκτίς* (*ἀκτιν-*), ray.] In the nomenclature of the spicular elements of sponges, a six-rayed or triaxial form typically expressed as six arms at right angles to one another. The hexactine is the fundamental form in the silicious skeletons of the *Hexactinellida* and is susceptible of modification into a vast variety of shapes, anchors, umbels, pine-trees, fish-hooks, rosettes, etc. The fusion of the arms of adjacent hexactines produces a latticed supporting skeleton in some orders of *Hexactinellida*.

hexactine (hek-sak′tin), *a.* [For ★*hexactinine*, < Gr. *ἕξ*, six, + *ἀκτίς* (*ἀκτιν-*), ray, + *-ine*[1].] **1.** Having six rays: same as *hexactinal*.—**2.** Having the characters of or pertaining to a hexactine.—**3.** Hexactinellidan.

hexactinellidan (hek-sak-ti-nel′i-dan), *a.* and *n.* **I.** *a.* Pertaining to or characteristic of the *Hexactinellida*.

II. *n.* Any sponge of the order *Hexactinellida*.

hexactinian (hek-sak-tin′i-an), *a.* and *n.* **I.** *a.* Pertaining to or having the characters of the *Hexactiniæ*; having six mesenteries or tentacles, or a multiple of that number, as some anthozoans.

II. *n.* Any anthozoan of the group *Hexactiniæ*.

hexad. **I.** *n.* **3.** A hexagon.

Given two opposite points of a regular *hexad* (namely, the corners a_1, a_4, of a regular hexagon).
Harkness and Morley, Analytic Functions, p. 25.

II. *a.* Having a combining power equivalent to six times that of hydrogen. Same as *hexavalent* and *sexivalent*.

hexadecane (hek-sa-dek′ān), *n.* [Gr. *ἕξ*, six, + *δέκα*, ten, + *-ane.*] A colorless compound, $CH_3(CH_2)_{14}CH_3$, contained in petroleum. It forms pearly lustrous leaflets, which melt at 19–20° C. and boil at 287.5° C. Sometimes called *cetane*.

hexadecoic (hek″sa-de-kō′ik), *a.* [Gr. *ἕξ*, six, + *δέκα*, ten, + *-o-* + *-ic.*] Containing sixteen carbon atoms.—**Hexadecoic acid.** Same as *palmitic acid*.

hexadecyl (hek-sa-dē′sil), *n.* [Gr. *ἕξ*, six, + *δέκα*, ten, + *-yl.*] The radical $C_{16}H_{33}$. It is derived from hexadecane, and is also called *cetyl*.

hexadecylic (hek″sa-dē-sil′ik), *a.* [*hexadecyl* + *-ic.*] Pertaining to hexadecyl or hexadecane.

hexadrachm (hek′sa-dram), *n.* [Gr. *ἑξάδραχμος*, of the value of six drachmas, < *ἕξ*, six, + *δραχμή*, drachma.] An ancient Greek gold coin of the value of 6 drachmas.

hexaëdral (hek-sa-ē′dral), *a.* See *hexahedral*.

hexagon, *n.*—**Brianchon hexagon**, a hexagon circumscribed about a conic. See *hexagram*, 2.—**Lemoine hexagon**, the hexagon whose vertices are the 6 intersections with the sides of a triangle of the parallels to the sides drawn through the symmedian point (the Lemoine point K).—**Pascal hexagon**, a hexagon inscribed in a conic. See *hexagram*.

Hexagonal number. See ★*number*.

hexagonite (hek-sag′ō-nīt), *n.* [*hexagon* + *-ite*[2].] A pink variety of tremolite from St. Lawrence county, New York, supposed at first to be a new hexagonal species. It contains a small amount of manganese.

hexagonize (hek-sag′ō-nīz), *v. t.*; pret. and pp. *hexagonized*, ppr. *hexagonizing*. [*hexagon* + *-ize.*] To change into a hexagon; make hexagonal. *N. E. D.*

Hexagramminæ (hek″sa-gra-mī′nē), *n. pl.* [NL., < *Hexagrammos* + *-inæ.*] A subfamily of fishes typified by the genus *Hexagrammos*.

hexahedrite (hek-sa-hē′drīt), *n.* [*hexahedr-on* + *-ite*[2].] A meteoric iron having a cubic or hexahedral structure and cleavage. Iron meteorites of this class are much less common than the octahedrites. See ★*meteorite*.

hexahemeron (hek-sa-hem′e-ron), *n.* Same as *hexaëmeron*.

hexahydrate (hek-sa-hī′drāt), *n.* [Gr. *ἕξ*, six, + E. *hydr(ogen)* + *-ate*[1].] In *chem.*, a compound containing six molecules of water, as crystallized calcium chlorid or calcium chlorid hexahydrate ($CaCl_2.6H_2O$).

hexahydrated (hek-sa-hī′drā-ted), *a.* In *chem.*, containing six molecules of water, as the mineral carnallite, which is hexahydrated potassium-magnesium chlorid ($KCl.MgCl_2.6H_2O$). *G. Lunge*, Sulphuric Acid, II. 44.

hexahydrocarvacrol (hek″sa-hī-drō-kär′va-krol), *n.* [Gr. *ἕξ*, six, + E. *hydro(gen)* + *carvacrol.*] A colorless oily compound, $CH_3^1C_6H_9^2(C_3^4H_7)OH^3$, formed by the action of hydrogen on carvacrol. It boils at 220° C.

hexahydrothymol (hek″sa-hī-drō-tī′mol), *n.* [Gr. *ἕξ*, six, + E. *hydro(gen)* + *thymol.*] compound, $CH_3^1.C_6H_9(C_3^4H_7)OH^3$, formed by the action of hydrogen on thymol. It closely resembles hexahydrocarvacrol in properties.

hexaicosane (hek-sa-ī′kō-sān), *n.* [Also *hexeikosane*, and erroneously called *hexacosane*, *hexakosane*; Gr. *ἕξ*, six, + *εἴκοσι*, twenty, + *-ane.*] A soft, waxy compound, $C_{26}H_{54}$, closely resembling paraffin. It melts at 44° C.

hexakisoctahedral (hek″sa-kis-ok-ta-hē′dral), *a.* See ★*hexoctahedral*.

hexakistetrahedral (hek″sa-kis-tet-ra-hē′dral), *a.* Of or pertaining to a hexakistetrahedron; same as ★*hexatetrahedral*.

hexakistetrahedron (hek″sa-kis-tet-ra-hē′dron), *n.* [Gr. *ἑξάκις*, six times, + *τέτρα-*, four, + *ἕδρα*, base.] In *crystal.*, the hemihedral form of the hexakisoctahedron; same as *hexatetrahedron*.

hexakosane, *n.* See ★*hexaicosane*.

hexaldehyde (hek-sal′dē-hīd), *n.* [Gr. *ἕξ*, six, + E. *aldehyde.*] A colorless liquid, $CH_3(CH_2)_4CHO$, prepared by the distillation of a mixture of calcium formate and calcium caproate. It boils at 128° C. Also called *hexyl aldehyde*, *caproic aldehyde*, and *hexanal*.

hexamere (hek′sa-mēr), *n.* [Gr. *ἕξ*, six, + *μέρος*, part.] In the nomenclature of the skeletal parts of reticulate sponges, or *Dictyospongidæ*, a reticulum mesh of the sixth order.

hexamerism (hek-sam′e-rizm), *n.* [*hexamer-ous* + *-ism.*] The condition or state of having the organs arranged according to the number six or to a multiple of that number, as in some anthozoans, especially corals. *Science*, July 17, 1903, p. 80.

Hexameroceras (hek″sam-e-ros′e-ras), *n.* [Gr. *ἑξαμερής*, of six chambers, + *κέρας*, horn.] A Silurian genus of nautiloid *Cephalopoda*, belonging to the family *Trimeroceratidæ*, and characterized by having six lateral sinuses in the aperture.

hexamethylated (hek-sa-meth′i-lāt-ed), *p. a.* [Gr. *ἕξ*, six, + E. *methyl* + *-ate*[1] + *-ed*[2].] Containing six methyl groups or radicals. *Buck*, Med. Handbook, VI. 785.

hexamethylene (hek-sa-meth′i-lēn), *a.* [Gr. *ἕξ*, six, + E. *methylene.*] Containing six methylene (CH_2) groups.

hexanephric (hek-sa-nef′rik), *a.* [Gr. *ἕξ*, six, + *νεφρός*, kidney.] Having six Malpighian vessels, as nine of the orders of insects.

hexaped (hek′sa-ped), *n.* [Gr. *ἕξ*, six, + L. *pes* (*ped-*), foot.] See *hexapod*.

hexaphase (hek′sa-fāz), *a.* [Gr. *ἕξ*, six, + *φάσις*, phase.] Having six phases: said of certain types of alternating currents.

hexapodal (hek-sap′ō-dal), *a.* [*hexapod* + *-al*[1].] Same as *hexapodous*.

hexaprotodont (hek-sa-prō′tō-dont), *a.* [Gr. *ἕξ*, six, + *πρῶτος*, first, + *ὀδούς* (*ὀδοντ-*), tooth.] Having six lower incisors; resembling or having the characters of *Hexaprotodon*, a genus of extinct hippopotamuses distinguished by the presence of six lower incisors.

hexaradial (hek-sa-rā′di-al), *a.* [Gr. *ἕξ*, six, + NL. *radius*, radius, + *-al*[1].] Having six parameres or structural radii.

The lily has the same regular typical form as the *hexaradial* coral or anemone.
Haeckel (trans.), Wonders of Life, p. 171.

hexarch (hek′särk), *a.* and *n.* [Gr. *ἕξ*, six, + *ἀρχή*, beginning (used for a vascular strand).] **I.** *a.* Having six strands: as, a *hexarch* stele.

II. *n.* In *bot.*, a stele which has six plerome strands.

hexasepalous (hek-sa-sep′a-lus), *a.* [Gr. *ἕξ*, six, + NL. *sepalum*, sepal, + *-ous.*] In *bot.*, having six sepals.

hexastigm (hek′sa-stim), *n.* [Also *hexastim*; Gr. *ἕξ*, six, + *στίγμα*, a point, dot.] A polystigm of 6 dots, that is, a system of 6 coplanar points, with all the ranges they determine (connectors).

In a *hexastim* there are 15 connectors and 45 codots. In a hexagram there are 15 fans and 45 diagonals.
Merriman and Woodward, Higher Mathematics, p. 77.

hexastylic (hek-sa-stil′ik), *a.* [*hexastyle* + *-ic.*] Same as *hexastylar*.

hexasulphid, hexasulphide (hek-sa-sul′fid, or -fīd), *n.* [Gr. *ἕξ*, six, + E. *sulphid.*] In *chem.*, a compound containing six atoms of sulphur, as triphosphorus hexasulphid (P_3S_6).

hexatetrahedral (hek″sa-tet-ra-hē′dral), *a.* Of or pertaining to a hexatetrahedron or the class of crystals of which it is the characteristic form. See ★*symmetry*, 6.

hexavalency (hek-sav′a-len-si), *n.* [Gr. *ἕξ*, six, + E. *valency.*] In *chem.*, valence or valency equivalent to that of six monad atoms, as of hydrogen. *W. Ramsay*, in N. Y. Sun, Dec. 30, 1900.

hexazane (hek-saz′ān), *n.* [Gr. *ἕξ*, six, + E. *az(ote)* + *-ane.*] Same as *piperidine*.

hexazene (hek-saz′ēn), *n.* [Gr. *ἕξ*, six, + E. *az(ote)* + *-ene.*] A colorless liquid, $NH<^{CH_2.CH_2}_{CH:CH}>CH_2$, which decomposes when boiled. Also called *tetrahydropyridine* and *piperideine*.

hexeikosane, *n.* See ★*hexaicosane*.

hexene (hek′sēn), *n.* [Gr. *ἕξ*, six, + *-ene.*] A colorless, liquid, olefinic compound, $CH_3(CH_2)_3CH:CH_2$, which boils at 68–70° C. It is prepared from hexyl chlorid and is homologous with ethylene. Also called *hexylene* and *normal butylethylene*.

hexine (hek′sin), *n.* [Gr. *ἕξ*, six, + *-ine*[2].] A colorless unstable liquid, $CH_3.C:C(CH_2)_2CH_3$, which boils at 83–84° C. It is prepared from hexylene bromide and is homologous with acetylene. Also called *methyl normal propylacetylene*.

hexiodide (hek-sī′ō-did), *n.* [Gr. *ἕξ*, six, + E. *iodide.*] In *chem.*, a compound containing six atoms of iodine: as, sulphur *hexiodide* (SI_6).

hexite (hek′sīt), *n.* [Gr. *ἕξ*, six, + *-ite*[2].] An alcohol, such as mannitol, containing six hydroxyl groups. The compounds are sometimes termed *hexahydric alcohols* and *hexacid alcohols*.

hexobiose (hek-sō-bī′ōs), *n.* [Gr. *ἕξ*, six, + E. *biose.*] A disaccharide which yields two hexose molecules on decomposition, as cane sugar, which yields one molecule of dextrose and one of levulose.

hexoctahedral (hek-sok-ta-hē′dral), *a.* [*hexoctahedr-on* + *-al*[1].] Of or pertaining to a hexoctahedron or to the class of crystals of which it is the characteristic form. See ★*symmetry*, 6.

hexode (hek′sōd), *a.* [Gr., < *ἕξ*, six, + *ὁδός*, way.] In *elect.*, six-way; sixfold; such that six messages can be sent at the same time over the same wire, as in a multiplex telegraph.

hexoic (hek-sō′ik), *a.* [Gr. *ἕξ*, six, + *-o-* + *-ic.*] Pertaining to hexane.—**Hexoic acid.** Same as normal *caproic acid*.

hexone (hek′sōn), *n.* [= G. *hexon*; < Gr. *ἕξ*, six, + *-one.*] **1.** A term applied by Kossel to any one of several bases, such as arginin, lysin, etc., which contain six atoms of carbon in the molecule.

This gave a solution which should contain the *hexon* bases, viz., arginine, lysine, histidine, and lysatine.
Amer. Chem. Jour., April, 1903, p. 378.

2. A liquid mixture of hydrocarbons, C_6H_8, obtained by compressing illuminating gas, which has been prepared by heating fats and resins. It boils at 70–85° C.

hexonic (hek-son'ik), *a.* [*hexone* + *-ic.*] Of or pertaining to the hexone bases arginin, lysin, and histidin. See ★*hexone*, 2.

hexosazon (hek-sos-az'on), *n.* [Gr. ἕξ, six, + E. *osazon.*] The osazon of a hexose sugar; that is, a sugar containing six carbon atoms.

hexose (hek'sōs), *n.* [Gr. ἕξ, six, + *-ose.*] A simple sugar (monosaccharide) containing six atoms of carbon.

hexoside (hek'sō-sid), *n.* [*hexose* + *-ide*[1].] A glucoside derived from a hexose.

hexotriose (hek-sō-trī'ōs), *n.* [Irreg. ‹ Gr. ἕξ, six, + *-o-* + Gr. τρι-, three, + *-ose.*] The class name of sugars which contain eighteen atoms of carbon in the molecule and are capable of resolution into three molecules of a sugar which contains six atoms of carbon in the molecule. Thus raffinose is a hexotriose and may be decomposed into equal molecules of fructose (levulose), glucose, and galactose.

hexoylene (hek-sō'i-lēn), *n.* [Gr. ἕξ, six, + *-o-* + *-yl* + *-ene.*] A colorless liquid, $CH_3(CH_2)_3C{:}CH$(?), prepared from hexylene bromide. It boils at 80–85° C. Also called 5-*hexine* and *normal-butylacetylene.*

hextetrahedral (heks-tet-ra-hē'dral), *a.* Same as ★*hexatetrahedral.*

hextetrahedron (heks″tet-ra-hē'dron), *n.* Same as *hexatetrahedron.*

hexylamine (hek-sil-am'in), *n.* [Gr. ἕξ, six, + *-yl* + *amine.*] A poisonous ptomaïne ($C_6H_{15}N$) found in cod-liver oil and also obtained from yeast.

hexylene (hek'si-lēn), *n.* [Gr. ἕξ, six, + *-yl* + *-ene.*] A colorless liquid, $CH_3(CH_2)_3CH{:}CH_2$, prepared from hexyl chlorid and formed during the distillation of boghead coal or from superheated paraffin. It boils at 68–70° C. Also called 5-*hexene.*

hexylic (hek-sil'ik), *a.* [*hexyl* + *-ic.*] Pertaining to hexane or hexylic acid. Same as *hexyl.*—**Hexylic acid.** Same as *caproic acid.*

Heyduck, *n.* Same as *Haiduk* (which see).

hf. A contraction of *half.*

hf. bd. A contraction of *half-bound.*

hf. cf. A contraction of *half calf.*

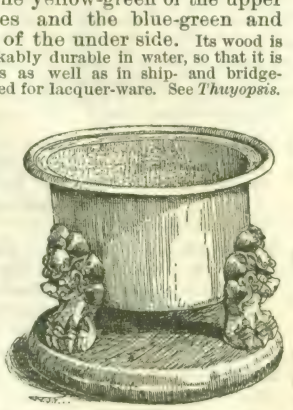
hg[2]. A contraction of *hectogram.*

H. G. An abbreviation (*a*) of *His Grace;* (*b*) of *Horse Guards.*

H. G. D. H. An abbreviation of *His* (or *Her*) *Grand Ducal Highness.*

H. I. An abbreviation of *Hawaiian Islands.*

hiagua, *n.* See ★*haigua.*



hialoa (hē-ä-lō'ä), *n.* [Hawaiian.] A common weed, *Waltheria Americana*, of the family *Sterculiaceæ*, occurring in many of the Polynesian islands and most tropical countries.

hiant (hī'ant), *a.* [L. *hians* (*hiant-*), ppr. of *hiare*, gape: see *hiatus.*] Gaping: said of the jaws of certain insects.

Hiatus aorticus, the aortic orifice in the diaphragm. See *aortic orifice.*—**Hiatus ventriculi,** a term proposed by A. Hill as synonymous with *choroidal fissure,* or the lateral portion of the rima transversa cerebri. *Philos. Trans. Roy. Soc.* (London), 1893, ser. B, p. 425.

hiba (hē'bä), *n.* [Jap.] A species of cypress, *Thuyopsis dolobrata*, easily distinguished from other species by the yellow-green of the upper side of the leaves and the blue-green and peculiar marking of the under side. Its wood is yellow, and is remarkably durable in water, so that it is much used for stakes as well as in ship- and bridge-building. It is also used for lacquer-ware. See *Thuyopsis.*

hibachi (hē-bä'-chē), *n.* [Jap. *hibachi,* ‹ *hi,* fire, + *hachi,* a bowl, basin, pot.] In Japan, a pan or box in which charcoal is kept burning for the purpose of warming the hands or heating an apartment; a brazier.

Hibachi, with Tongs.

hibernant (hī'-bėr-nant), *a.* and *n.* I. *a.* Hibernating or lying dormant during winter. [Rare.]

II. *n.* An animal that hibernates; a resident of a given locality during the winter season only. [Rare.]

hibernate, *v. i.*—**Hibernating gland.** See ★*gland.*

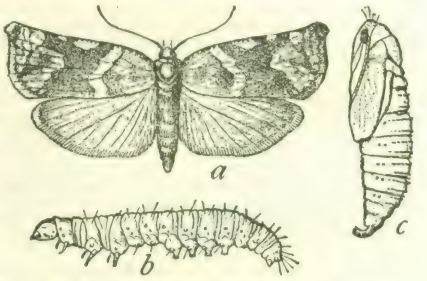
hibernator (hī'bėr-nā-tor), *n.* An animal that hibernates or lies dormant during the winter; contrasted with ★*estivator.*

The Faurde is really one of the *hibernators* like our own hedgehog. *Sunday Mag.*, 1883, p. 674.

Hiberno-Celt (hī-bėr'nō-selt″), *n.* A native Irishman of Celtic stock.

hibschite (hib'shīt), *n.* [Named after J. E. *Hibsch.*] A mineral occurring with green melanite crystals in the phonolite of the Marienberg near Aussig, Bohemia. It is isotropic, has an octahedral form, and, in composition, is near lawsonite, having perhaps the same formula ($H_4CaAl_2Si_2O_{10}$).

hickory, *n.* **3.** In Australia, a name applied to several trees the wood of which is used for the same purposes as that of the American hickories, especially the hickory-acacia, *Acacia leprosa*, the blackwood of Australia, *Acacia Melanoxylon*, and the hickory-eucalyptus, *Eucalyptus punctata.*—**4.** In Tasmania, a shrub or small tree of the rue family, *Phebalium squameum*, conspicuous for its strong smell, silvery under-surface of the leaves, and small pink-and-white flowers.—**Big-bud hickory,** *Hicoria alba.* See *white-heart* ★*hickory* and *mockernut.* [Florida.]—**Bitter hickory.** Same as *bitternut.*—**Black hickory.** (*a*) Same as *pignut,* 2. (*b*) Same as *white-heart* ★*hickory.*—**Broom-hickory,** the pignut, *Hicoria glabra:* so called from the use of its finely split wood in making brooms.—**Brown hickory.** See *pignut,* 2.—**Hickory gall-louse, horned-devil caterpillar.** See ★*gall-louse,* ★*caterpillar.*—**Nutmeg-hickory.** See ★*nutmeg-hickory.*—**White hickory.** (*a*) Same as *white-heart* ★*hickory.* (*b*) Same as *pignut,* 2. (*c*) Same as *bitternut.* (*d*) The shellbark, *Hicoria ovata.*—**White-heart hickory,** the mockernut, *Hicoria alba*, a timber-tree distributed from southern Ontario and southern New England over the eastern United States, abundant only southward. The leaves have a conspicuous resinous fragrance. The wood is heavy, hard, tough, and flexible, and, like that of the shellbarks, is of great value in the manufacture of agricultural implements, carriages and wagons, ax-helves, etc., and for fuel. The heart-wood is of a rich brown, the thick sap-wood nearly white. Also called *bullnut.*



hickory-aphis (hik'o-ri-ā″fis), *n.* A plant-louse, *Lachnus caryæ*, which infests the twigs and small branches of the hickory.

Hickory-borer (*Dicerca lurida*).

hickory-borer (hik'o-ri-bōr″-ėr), *n.* Any one of more than forty species of cerambycid, ptinid, or scolytid beetles whose larva bore into the trunk and limbs of hickory-trees. A common hickory-borer is *Dicerca lurida.*—**Painted hickory-borer,** a cerambycid beetle, *Cyllene pictus.*

hickory-moth (hik'o-ri-môth), *n.* Any one of several moths whose larvæ feed on hickory leaves. Among them are the hickory tussock-moth, *Halisidota caryæ*, of the family *Arctiidæ; Ennomos subsignarius*, of the family *Geometridæ; Acrobasis rubrifasciella*, of the family *Phycitidæ;* and *Archips* (*Cacœcia*) *semiferana*, of the family *Tortricidæ.*

Hickory-moth (*Archips semiferana*).
a, moth; *b*, larva; *c*, chrysalis. About twice natural size.

hickory-pole (hik'o-ri-pōl), *n.* A pole of hickory, often used as a flagstaff. From 1828 to 1860 a pole of this kind with a brush at the top was the emblem of the Democratic party in the United States: in allusion to Andrew Jackson's popular name of 'Old Hickory.' *Jour. Amer. Folk-lore,* Oct.–Dec., 1902, p. 245.

hickory-shad, *n.* **2.** A fish, *Pomolobus mediocris*, of the Atlantic coast of the United States.

Hicks's bottles. See ★*bottle*[2].

Hicoria (hi-kō'ri-ä), *n.* [NL. (Rafinesque, 1808), ‹ *hickory,* the American name.] A genus of dicotyledonous trees belonging to the family *Juglandaceæ.* Until recently it has been known as *Carya*, a name given it by Nuttall, but now Rafinesque's name *Hicoria*, from the aboriginal Indian name, has been restored, and all the species have been renamed under this latter generic name. The species of *Hicoria* are all native to eastern North America, and are about fifteen in number. The shellbark hickory, pecan, pignut, mockernut, and bitternut all belong in this genus. See *Carya.*

hidalga (ē-däl'gä), *n.* [Sp.] A Spanish noblewoman. See *hidalgo.*

hidalgoism (hi-dal'gō-izm), *n.* Same as *hidalgism* (which see).

hidated (hī'dā-ted), *p. a.* Measured by or reckoned in hides. See *hide*[3], *n.*

An elaborate *hidated* survey, which possesses a peculiar value from its references to the Domesday survey. *Athenæum,* Sept. 28, 1889, p. 421.

hidation (hī-dā'shon), *n.* Measurement or assessment by hides.

hideling, *a.* **II.** *n.* A person or a thing that is in the habit of hiding itself. *N. E. D.*

hideondo (ē-dā-on'dō), *n.* [Amer. Sp.] The creosote-bush, *Covillea tridentata.*

hidradenitis (hi-drad-e-nī'tis), *n.* [NL., ‹ Gr. ἱδρ(ώς), sweat, + ἀδήν, gland, + *-itis.*] Inflammation of the sweat-glands.

hidroadenitis (hid″rō-ad-e-nī'tis), *n.* Same as ★*hidradenitis.*

hidropoiesis (hid″rō-poi-ē'sis), *n.* [NL., ‹ Gr. ἱδρώς, sweat, + ποίησις, making.] Secretion of the sweat.

hidropoietic (hid″rō-poi-et'ik), *a.* Pertaining to or characterized by hidropoiesis; sudoriparous.

hielaman (hē'la-man), *n.* [Australian *elimang* (Hunter), *e-lee-mong* (Collins), *hīlaman* (Ridley).] A narrow, elongated shield used by the Australian aborigines. *E. E. Morris,* Austral English.

hielaman-tree (hē'la-man-trē″), *n.* The bat's-wing coral-tree, *Erythrina Vespertilio*, so called from the use of its wood by the Australian natives for making their hielamans or shields. See *bat's-wing* ★*coral-tree.*

Hieracian (hī-e-rā'shan), *n.* Same as *Hieracite.*

hieratica (hī-e-rat'i-kä), *n.* [L. fem. of *hieraticus*, hieratic.] A grade of papyrus, used for religious writings in Egypt.

hieratite (hī'e-ra-tīt), *n.* [Named from *Hiera,* an ancient name of Vulcano.] A mineral containing silicon, fluorin, and potassium, obtained in isometric crystals from the aqueous solution of stalactitic concretions found at the crater of Vulcano, one of the Lipari Islands.

hierocratic (hī″e-rō-krat'ik), *a.* [*hierocracy* (*-crat-*) + *-ic.*] Pertaining to or of the nature of a hierocracy; hierarchal: as, *hierocratic* rule.

herodulic (hī″e-rō-dū'lik), *a.* [*herodule* + *-ic.*] Of or pertaining to the herodule or temple slave.

hierogamy (hī-e-rog'a-mi), *n.* [Gr. ἱερός, sacred, + γάμος, marriage.] A sacred marriage. *Stand. Dict.*

We must now recall the fact that the *hierogamy* of Zeus and Europa was annually celebrated at Gortyna in Crete. *Lenormant* (trans.), Beginnings of Hist., App. i, p. 550.

hieroglyphic. **I.** *a.* **4.** Of or pertaining to certain vermiform structures which occur in the flysch, in Carpathian sandstone, and in the marine facies of the Cretaceous and Jurassic formations of the Alps. See II, 2.

II. *n.* **2.** One of certain vermiform structures, abundant in the Cretaceous and Jurassic rocks of some countries, probably in part the trails of mollusks or worms.

hieroglyphism (hī-e-rog'li-fizm), *n.* [*hieroglyph* + *-ism.*] The use of hieroglyphs in expressing ideas.

It is far beyond the scope of the present article to describe fully the development of *hieroglyphism* in Egypt. *Encyc. Brit.,* I. 605.

hieroglyphology (hī″e-rō-gli-fol'ō-ji), *n.* [*hieroglyph* + Gr. *-λογια,* ‹ λέγειν, speak.] The scientific study of hieroglyphs.

hieroglyphy (hī-e-rog'li-fi), *n.* [*hieroglyph* + *-y*[1].] The art of writing in hieroglyphs; the use of hieroglyphs.

hieroglyptic (hī″e-rō-glip'tik), *a.* [Gr. ἱερός, sacred, + γλυπτικός, carved: see *glyptic.*] Same as *hieroglyphic.*

Two other characteristics of *hieroglyptic* script are also to be noted.
A. J. Evans, in Jour. Hellenic Studies, XIV. 300.

hieromania (hī″e-rō-mā'ni-ä), *n.* [NL., ‹ Gr. ἱερός, sacred, religious, + μανία, madness.] Religious mania.

hieropœi (hī″e-rō-pē'ī), *n. pl.* [NL., ‹ Gr. ἱεροποιοί, pl. of ἱεροποιός, ‹ ἱερά, sacred rites, + ποιεῖν, do.] In *Gr. antiq.*, secondary officers of temples, usually grouped in colleges, charged with assisting the priests, and with various duties about the temples.

They are the accounts of the *Hieropœi* of the Delian temple of Apollo, and they give, amongst other things, the salaries of various officials.
F. B. Jevons, in Jour. Hellenic Studies, XV. 246.

high. I. *a.* 15. Noting the strength of a suit, as in whist or bridge: as, queen *high* in spades, and ten *high* in diamonds.—**High roof, tide, vacuum.** See ★*roof*[1], etc.—**No higher** (*naut.*), an order to the helmsman not to bring the ship any closer to the wind.—**The sun is high.** See ★*sun*[1].—**To point high.** See ★*point*[1].

II. *n.* 3. One of the points in the game of all-fours.—4. The area of high barometric pressure shown on the daily weather map, usually moving eastward and toward the equator, its front being marked by suddenly falling temperature, drier air, strong polar winds, and spits of rain or snow, followed by clear weather and by a temperature that may be either high or low depending on the balance between radiation, insolation, convection, and thermodynamic action.

The hot wave had its inception in the wake of a high area, which dropped down from northern New York over Virginia and the neighboring States. Here it seemed to join forces with the permanent *high* over the ocean and remained nearly stationary for a number of days.
Yearbook, U. S. Dept. Agr., 1900, p. 332.

Tropical high, the area of high pressure under the tropics of Capricorn or Cancer, which prevails over the continents in winter, but over the oceans in summer.

high-ball (hī′bâl), *n.* 1. A method of settling who shall pay for something, in which the numbered balls that are used in the game of pinpool are thrown out from a receptacle, the highest ball winning and the lowest paying.—2. A 'long drink,' consisting of a modicum of whisky diluted with club soda or mineral water, and served with cracked ice in a tall glass. [Slang.]

high-blower (hī′blō″ėr), *n.* A horse that 'blows' vigorously in galloping: a healthy habit, entirely different from 'roaring.' *U. S. Dept. Agr.*, Rep. on Diseases of the Horse, 1903, p. 118.

high-duty (hī′dū″ti), *a.* Performing a high percentage of service; high-economy: used of pumping-engines. A high-duty pump is one that delivers a proportionately large number of foot-pounds of work, in the form of water pumped, per million heat-units furnished by the boiler. The American basis for measuring duty is now the million heat-units furnished by the boiler, instead of (as formerly) a given quantity of coal burned.

high-five (hī′fīv), *n.* See ★*cinch*, 4.

high-flier, *n.* 3. A phaëton with low front wheels, arched reaches, and boxes over both axles. The body was hung high upon four S-springs. It was popularized by the Prince of Wales (afterward George IV.) and other young sporting men of his day.

high-grade (hī′grād), *a.* Of a superior grade or quality; specifically, having more than three quarters pure blood: applied by stock-breeders to animals.

high-handedness (hī′han″ded-nes), *n.* High-handed, arbitrary, and unreasonable conduct or treatment.

The "free-choice" system in club practice was generally recommended as supplying the relatively best protection against the *high-handedness* of the clubs.
Lancet, April 4, 1903, p. 997.

high-heeled (hī′hēld), *a.* Made with or having high heels: as, *high-heeled* shoes.

high-kilted (hī′kil″ted), *a.* Having the skirt or petticoat kilted or tucked up.

Highland Scotch. See ★*Scotch*[1].

highlander, *n.* 2. A playing-card having slight blemishes on both surfaces. *Household Words*, VI. 332.—**Arctic highlanders,** the Eskimo tribe of Smith Sound, Greenland, so called by their discoverer, Sir John Ross.

high-low-jack, *n.* 2. A form of billiard-pool with fifteen object-balls, based in part on the card game of all-fours: once popular, but now obsolete.

high-pressure, *a.* 2. Noting an engine which exhausts at atmospheric pressure as distinguished from a condensing-engine; hence, non-condensing. This use of the term is confusing and inadvisable.

high-roller (hī′rō″lėr), *n.* A recklessly extravagant, high-living 'sport.' [Slang.]

high-warp (hī′wârp), *a.* A translation of French *haute-lisse* (which see).

All three of the tapestry looms at Merton are constructed on the *high-warp* system.
A. Vallance, William Morris, p. 92.

Higo pottery. See ★*pottery*.

higuera (ē-gā′rä), *n.* [One of the extended uses of Sp. *higuera*, a fig-tree, < *higo*, < L. *ficus*, a fig: see *fig*[1].] In Porto Rico, the calabash-tree, *Crescentia Cujete*. See *Crescentia*. In Mexico and other Spanish-American countries it is commonly called *jícara*.

hike (hīk), *v.* [Also *hyke;* a widely used dialect word, parallel to *hick*[1] and *hitch*, recently emerging into some colloquial use; prob. orig. an imitative word, parallel to *hit*, expressing a quick stroke or motion; compare E. Fries. *hikken*, thrust, push, punch. See *hick*[1] and *hitch*.] I. *trans.* 1. To thrust; push; punch or gore with the horns.—2. To toss up and down; swing; jolt.—3. To lift out with a sharp instrument; move with a jerk; pull; raise; lift.—4. To snatch away; run off with.—5. To dismiss peremptorily.

II. *intrans.* To move suddenly or hastily; go away; walk off; decamp. [Prov. or colloq. Eng. and U. S., in all uses.]

hiker (hī′kėr), *n.* [*hike, v.* + *-er*[1].] An overdrawn bridle-check. [Local, southern U. S.]

hikuli (hē-kö′lē), *n.* [Tarahumar, a Piman dialect spoken in Chihuahua, Mexico.] In the state of Chihuahua, Mexico, the name of the narcotic cactus *Lophophora Williamsii*, a plant held in high esteem by the Indians. See ★*mescal-button*.

At one of the feasts which I witnessed I wished to taste *hikuli*, as it was new to me. . . . The man who carried the gourd first danced in front of the shaman, then around the fire, and finally brought it to me. The liquid tasted somewhat bitter, but not exactly disagreeable; and while I drank, the man looked at me with astonishment, as if he had expected that *hikuli* would refuse to be taken by me.
C. Lumholtz, Unknown Mexico, I. 374.

hil, *n.* and *v.* A simplified spelling of *hill*.

hilaria (hi-lā′ri-ä), *n. pl.* [L., neut. pl. of *hilaris*, joyful: see *hilarious*.] In *Rom. antiq.*, a joyous festival in honor of Cybele, celebrated at the vernal equinox.

hilasmic (hi-laz′mik), *a.* [Gr. *ἱλασμός*, propitiation, < *ἱλάσκεσθαι*, appease, propitiate.] Propitiatory. [Rare.]

Hildebrandic (hil-dē-bran′dik), *a.* Same as *Hildebrandine*.

hill[1], *n.*, 3. (*b*) The cluster of plants in a hill. Formerly, the practice of 'hilling' was general, when only hand tools were used; but latterly the universal tendency is to practise level culture. While the hill itself has disappeared, the group of plants has taken the name. A 'hill,' therefore, is a more or less separated or detached group of two or more plants, in contradistinction to the single plants that follow each other regularly in a drill.—**Lenticular hill,** a drumlin, or drumloidal hill.

They exhibit many variations in size and shape, however, some being nearly circular, mammillary hills, and others *lenticular hills*, in which the longer axis is two or three times as great as the shorter axis.
I. C. Russell, Glaciers of North America, p. 24.

Mammillary hill, a hill of rounded form. *I. C. Russell*, Glaciers of North America, p. 24.—**Remnant hill,** a residual hill remaining when the neighboring surface is worn down to a peneplain; a small monadnock. *W. M. Davis*, Elem. Phys. Geog.

hill[1], *v. i.* 2. To assemble on rising ground. [Rare.]

In the spring the Ruffs *hill*, as it is termed; that is they assemble upon a rising spot of ground contiguous to where the Reeves propose to deposit their eggs.
G. Montagu, Ornith. Dict., p. 444.

hill-engraver (hil′en-grā″vėr), *n.* A man skilled in representing topography by means of hachures or contours on an engraved plate.

This course, in addition to being, I believe, the best method of representation, would have the additional advantage of continuing for a time the employment of *hill-engravers*, who are, as already stated, so much required for the completion of the hill-engraving of the 1-inch map. *Geog. Jour.* (R. G. S.), XV. 589.

hill-fox (hil′foks), *n.* A fox, *Vulpes montanus*, very similar to the common fox of Europe, but paler: found in the Himalayas.

hill-grub (hil′grub), *n.* A British gardeners' name for the larva of a European noctuid moth, *Charæas graminis*. It injures pastures and meadows.

hill-map (hil′map), *n.* A topographic map showing the relief of the land surface.

Progress of the 1-inch *hill-map* of the United Kingdom. *Geog. Jour.* (R. G. S.), XV. 578.

hill-planting (hil′plan″ting), *n.* Same as ★*mound-planting*.

Hillsboro sandstone. See ★*sandstone*.

hill-shading (hil′shā″ding), *n.* A conventional graphic device for representing the slopes of the earth's surface.

The map is clearly drawn, and printed in four colours—sea, blue; *hill-shading*, brown; forests, green; and rivers, roads, and lettering, black.
Geog. Jour. (R. G. S.), XV. 678.

hilum, *n.*, 2. (*d*) A protrusion of a portion of the iris through a rupture of the cornea. (*e*) A depression on the ventrolateral surface of the mammalian brain in the region of the vallecula Sylvii. *Philos. Trans. Roy. Soc.* (London), 1899, ser. B, p. 297.

hilus (hī′lus), *n.* Same as *hilum*. *Proc. Zool. Soc. London*, 1902, I. 226.

H. I. M. An abbreviation of *His* (or *Her*) *Imperial Majesty*.

hind[1], *n.* 3. A small bass-like fish, *Cephalopholis cruentalis*, of the family *Serranidæ*, found in the West Indies. Those found in deep waters are red, and are known as *red hinds;* those found near the shore are dark brown, and are known as *brown hinds*.—**Rock hind,** a species of grouper of the family *Serranidæ*, *Epinephelus adscensionis*, found in the West Indies.—**Speckled hind,** a species of grouper, *Epinephelus drummond-hayi*, characterized by dark-brown color marked with bright white spots, found in the Gulf of Mexico.

hind-castle (hīnd′kàs″l), *n.* The high poop, or after-castle, on old-fashioned vessels, as distinguished from the *forecastle;* formerly the elevated structure on the after part of a ship, the top of which was used as a fighting-platform.

hinder[2] (hin′dėr), *n.* In *hand-ball*, a ball struck by a player which afterward strikes his opponent; or one with which the server hits his opponent while standing in the ace-line; or one which strikes the opponent, who thus hinders it from reaching the front wall.

Hindia (hin′di-ä), *n.* [NL., named after G. J. *Hinde*.] A Silurian genus of lithistid sponges, belonging to the suborder *Eutaxicladina*, characterized by the spherical body and the composition of the skeletal elements which consist of three single rays and a reduced button-like fourth ray.

hind's-foot (hīnds′fůt), *n.*; pl. *hind's-feet* (-fēt). A crossbow bent by a lever composed of two articulated pieces. See *goat's-foot lever*, under *lever*[1].

Hind's nebula. See ★*nebula*.

Hindu numerals. See ★*numeral*.

hindwing (hīnd′wing), *n.* A moth of the family *Noctuidæ*.—**American copper hindwing,** *Pyrophila pyramidoides*, a noctuid moth of wide range in the United States, where its larvæ feed on the foliage of the grape and the Virginia creeper.

hinge, *n.* 6. In *bot.*, the flexible lamella of the guard-cells of a stoma which renders them mobile.—**Frontonasal hinge,** in *ornith.*, a transverse groove which more or less completely separates the nasals and frontals, permitting considerable freedom of movement, in a vertical plane, to the beak. It is most marked in parrots, where the separation is nearly or quite complete, but is found to a lesser degree in many other birds, such as cormorants. This arrangement permits the beak to serve to some extent as an organ of prehension, and facilitates the capture and manipulation of food. Also *nasal hinge*.—**Nasal hinge.** Same as *frontonasal* ★*hinge*.—**Parliament hinge,** a simple form of hinge or butts in which the joint projects from the door and frame, keeping the door when open away from the molding or edge of the door-frame.

hinge-area (hinj′ā″rē-ä), *n.* The space between the beaks of the dorsal and ventral valves of a bivalve mollusk.

hinge-ligament (hinj′lig″a-ment), *n.* In bivalve mollusks, a tough, uncalcified, elastic membrane which connects the two valves. It consists of two parts, the external, or ligament proper, and the internal, or cartilage. The former is inelastic, while the latter is very elastic and is composed of parallel fibers.

The operation of [the *hinge-ligament*] . . . is in opposition to that of the adductor muscles. When the latter close the valves, they compress the ligament, an action which its elasticity resists: thus its operation tends in part towards keeping the valves open. But when ligament and cartilage are both fully developed, they work in opposition to one another, the ligament, by its resistance to compression, preventing any straining of the adductor muscles when the valves are open, and the cartilage, for the same reason, preventing the ventral margins of the shell from closing too rapidly upon one another when the valves are being shut. *Cambridge Nat. Hist.*, III. 272.

hinge-plate (hinj′plāt), *n.* In the *Brachiopoda*, a plate which bounds the elevated sockets of the dorsal valve; in the *Pelecypoda*, the horizontal lamina of the cardinal margin on which the teeth are set.

Hinnites (hi-nī′tēz), *n.* [NL., < Gr. *ἵννος*, a mule, + *-ites*, E. *-ite*[2].] A genus of prionodesmaceous pelecypod mollusks belonging to the family *Pectinidæ*, characterized by an adherent and more or less distorted shell. It extends from the Trias to the present time.

hinoki (hē-nō′kē), *n.* [Jap. *hi-no-ki*, 'fire-tree': *hi*, fire, *no*, of, *ki*, tree.] A variety of the Japanese cypress, *Chamæcyparis obtusa*, having foliage of a golden color. See *Retinospora*. This tree is particularly sacred in Shinto worship, and on this account is cultivated more than any other. Its wood is white or pink, smooth, light, and very tough. It is preferred to all others for lacquer-ware, and is used exclusively in building Shinto temples.

hinterhand (hin′tėr-hand), *n.* [G.] In *skat*, the last player on the first trick.

hinterland (hin′tėr-land), *n.* [G., < *hinter*, back, + *land*, country.] Territory that lies

back of and is tributary to a coast region or port.

The province of Shantung is the *hinterland* of the very large harbor the Germans have seized.
Bulletin Amer Geog. Soc., XXX. 57.

hintzeite (hint'se-it), *n.* [G. *hintzeit*, named (by L. Milch, 1890) after C. H. *Hintze*, a German mineralogist.] Same as ★*heintzeite*.

Hiodon (hī'ō-don), *n.* [NL. (Le Sueur, 1818), erroneously for *Hyodon*, ⟨ Gr. *ὑ*(οειδής), Y-shaped (see *hyoid*), + ὀδούς (ὀδοντ-), tooth.] A genus of mooneyes, herring-like fishes of a brilliant silvery color, remarkable for a row of strong teeth on the tongue: found in the Mississippi basin and neighboring waters. *H. tergisus* is the common species.

Hiodontidæ (hī-ō-don'ti-dē), *n. pl.* [NL., ⟨ *Hiodon*(*t-*) + *-idæ*.] A family of herring-like fishes known as mooneyes, typified by the genus *Hiodon*. Three species are known, all of which are confined to the Mississippi valley and neighboring waters.

hi-ogi (hē-ō'gē), *n.* [Jap. *hi-ōgi*, ⟨ *hi*, fire (in *hi-noki*: see ★*hinoki*), + *ōgi*, a folding fan.] In Japan, a folding court-fan made of hinoki, a delicate brown wood used in its natural color.

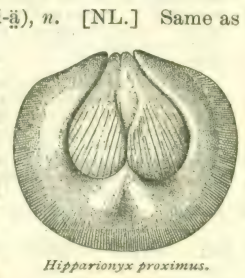
hiortdahlite (hē-ôrt'dä-līt), *n.* [Named for Prof. Th. *Hiortdahl* of Christiania.] A rare silicate containing zirconium, calcium, and sodium, with fluorin, which occurs in yellow triclinic crystals: found in southern Norway.

hip-disease (hip'di-zēz″), *n.* Same as *hip-joint disease* (which see, under *disease*).

hipe (hīp), *v. i.* In *wrestling*, to effect a fall by pressing the knee against the inside of one of the opponent's legs after lifting him from the ground. Also spelled *hype*.

hip-pain (hip'pān), *n.* Sciatica. [Colloq.]

hippalectryon (hip-a-lek'tri-on), *n.* [Gr. ἱππαλεκτρυών, ⟨ ἵππος, horse, + ἀλεκτρυών, cock.] In *Gr. antiq.*, an imaginary animal which combines the head and front of a horse with the tail and feet of a cock. Its representation in art is not common. The most important example is a fragment of late sixth-century sculpture found upon the Acropolis at Athens.



Hippalectryon.
From an amphora in the Louvre.

hipparaffin (hi-par'a-fin), *n.* [*hip*(*puric*) + *paraffin*.] A colorless compound, $CH_2(NHCOC_6H_5)_2$, formed by the oxidation of hippuric acid or from benzonitrile and methylal. It crystallizes in long needles and melts at 220.5–221° C. Also called *methylene-dibenzamide*.

hipparch (hip'ärk), *n.* [Gr. ἱππάρχης, also ἱπαρχος, ⟨ ἵππος, horse, + ἀρχειν, lead.] In *Gr. antiq.*, a leader of cavalry. In the Ætolian and Achean leagues this officer was charged with other functions.

Hipparchia (hi-pär'ki-ą), *n.* [NL.] Same as *Satyrus*, 3.

Hipparionyx (hi-pā-ri-on'iks), *n.* [NL., ⟨ Gr. ἱππάριον, a colt, + ὄνυξ, a hoof.] A genus of Devonian *Brachiopoda* which attained a large size. It is named from the singular resemblance of the cast of the ventral valve to the impression of a colt's foot. It belongs to the family *Strophomenidæ*, and is abundant in and very characteristic of the Oriskany sandstone of New York and the equivalent horizon in other regions.

Hipparionyx proximus.
Oriskany sandstone.
(From N. Y. Geol. Reports, after Hall and Clarke.)

hipped[1], *p. a.* 2. Having hips: said of a roof, or of one end of a roof. A roof may be hipped at one end and gabled at the other.

Hippelates fly. See ★*fly*[2].

hippiatrical (hip-i-at'ri-kąl), *a.* Same as *hippiatric*.

hippiatrics (hip-i-at'riks), *n.* Same as *hippiatry*.

hippic (hip'ik), *a.* [Gr. ἱππικός, ⟨ ἵππος, horse, = L. *equus*, horse: see *equine*.] Of or pertaining to horses or horse-racing: as, *hippic* festivals.

Hippidium (hi-pid'i-um), *n.* [NL., ⟨ Gr. ἱππίδιον, dim. of ἵππος, a horse.] Same as *Pliohippus*.

hippo[2] (hip'ō), *n.* A colloquial abbreviation of *hippopotamus*.

In broad daylight a *hippo* charged the steamer that was towing my dinhbeeah.
Sir S. W. Baker, Wild Beasts and their Ways, p. 247.

hippoboscid (hip-ō-bos'id), *n.* and *a.* **I.** *n.* A member of the family *Hippoboscidæ*.

II. *a.* Of or belonging to the dipterous family *Hippoboscidæ*.

Hippocampal commissure. See ★*commissure*.—**Hippocampal lobule.** See ★*lobus pyriformis*.—**Hippocampal tubercle.** See ★*tubercle*.

Hippocampus nudus, a small portion of hippocampus which appears on the median surface of the brain, filling up the concavity of the arc formed by the subsplenial bending of the fascia dentata.

hippocentaur (hip-ō-sen'târ), *n.* [Gr. ἱπποκένταυρος, ⟨ ἵππος, horse, + κένταυρος, centaur.] A fabulous animal, part man and part horse; a horse-centaur.

Hippocephalus (hip-ō-sef'ą-lus), *n.* [NL., ⟨ Gr. ἵππος, horse, + κεφαλή, head.] A genus of sea-poachers of the family *Agonidæ*. They are remarkable for the external distortion of the head. *H. japonicus* is found in the Kurile Islands.

hippocoprosterin (hip″ō-kō-pros'te-rin), *n.* [Gr. ἵππος, horse, + κόπρος, dung, + στέαρ, fat, + *-in*[2].] A form of cholesterin obtained from the feces of the horse.

Hippocratic fingers or **nails, oath.** See ★*finger*, ★*oath*.

hippodamist (hi-pod'ą-mist), *n.* [Gr. ἱππόδαμος, horse-taming, + *-ist*.] A horse-breaker.

hippodamous (hi-pod'ą-mus), *a.* [Gr. ἱππόδαμος, horse-taming, ⟨ ἵππος, horse, + δαμάζειν, tame.] Relating to the taming or breaking of horses.

hippo-fly (hip'ō-flī), *n.* An undetermined gadfly of the family *Tabanidæ*, common in the upper Nile valley and in wet places in equatorial Africa.

Owing to the numerous swamps, flies of various kinds are abundant, and as early as September the large biting fly called the "*hippo*" *fly* was a great annoyance. Our stock suffered severely from the thousands of these flies which attacked them every evening.
Geog. Jour. (R. G. S.), XVIII. 75.

hippoform (hip'ō-fôrm), *n.* [Gr. ἵππος, horse, + L. *forma*, shape.] Having the form of a horse. *Amer. Anthropologist*, Jan.-March, 1903, p. 138.

Hippoglossina (hip″ō-glo-sī'nä), *n.* [NL., ⟨ Gr. ἵππος, horse, + γλῶσσα, tongue, + *-ina*[1].] A genus of flounders of the shores of tropical America. *H. macrops*, of the west coast of Mexico, is the species longest known.

hippoid (hip'oid), *a.* and *n.* [Gr. ἵππος, horse, + εἶδος, form.] **I.** *a.* Pertaining to or having the characters of the *Hippidæ*.

II. *n.* An animal which is related to or resembles the horse.

hip-pole (hip'pōl), *n.* A beam which supports an angle-rafter.

hippological (hip-ō-loj'i-kąl), *a.* Relating to hippology or the scientific study of the horse.

Hippolyte (hi-pol'i-tē), *n.* [NL. (Leach, 1813), ⟨ Gr. Ἱππολύτη, a female name.] The typical genus of the family *Hippolytidæ*.

Hippolytidæ (hip-ō-lit'i-dē), *n. pl.* [NL., ⟨ *Hippolyte* + *-idæ*.] A family of macrurous decapod crustaceans. They have a large rostrum, the eyes not covered by the carapace, the mandibles with or without a cutting-edge and palp, and the first and second pair of trunk-legs with chelæ. It includes about a dozen genera, among them being *Cryptocheles*, *Hippolyte*, and *Platybema*.

hippomelanin (hip-ō-mel'ą-nin), *n.* [Gr. ἵππος, horse, + μέλας (μελαν-), black, + *-in*[2].] A black pigment which has been obtained from melanotic tumors of horses.

Hipponychidæ (hip-ō-nik'i-dē), *n. pl.* [NL., ⟨ *Hipponyx* (*-onych-*) + *-idæ*.] A family of tænioglossate pectinibranchiate gastropods. The visceral mass and shell are conical, and the foot is reduced, secreting a thin calcareous plate on its ventral surface. The family contains the genera *Hipponyx* and *Mitularia*.

Hipponyx (hip'ō-niks), *n.* [Gr. ἵππος, a horse, + ὄνυξ, hoof.] A genus of capulid *Gasteropoda* characterized by a thick, obliquely conical shell and an internal hippocrepian muscular impression. It has existed from the Cretaceous period to the present time.

hippophagism (hi-pof'ą-jizm), *n.* [*hippophag-y* + *-ism*.] Same as *hippophagy*.

hippopotamian (hip″ō-pō-tā'mi-ąn), *a.* Resembling or suggesting a hippopotamus.

hippotragine (hi-pot'rą-jin), *a.* Related to, resembling or having the characters of the genus *Hippotragus*: as, the *hippotragine* section of the *Bovidæ*.

hippurin (hip'ū-rin), *n.* [*hippur-ic* + *-in*[2].] A colorless oxidation-product of hippuric acid, $C_8H_9O_2N$. It crystallizes in large needles and melts at 45.7° C.

Hippurite limestone. See ★*limestone*.

hipsy (hip'si), *n.* [Origin obscure.] A sailors' punch composed of wine, water, and brandy.

Drinking of *Hipsy*, a liquor compounded of wine, water, and brandy, which, by the admirers of it, is also call'd meat, drink, and cloth.
W. Betagh, in N. and Q., 10th ser., III. 61.

hip-truss (hip'trus), *n.* A truss erected to sustain the angle-rafters of a hip-roof.

Hirado porcelain. See ★*porcelain*[1].

Hircic acid. See ★*hircin*.

hircin (hėr'sin), *n.* [L. *hirc-us*, goat, + *-in*[2].] A fatty principle found in the fat of goats and, to a certain extent, in that of sheep. The corresponding fatty acid is termed *hircic acid*.

hircocerf (ėr-kō-serf'), *n.* [F., ⟨ L. *hircus*, goat, + *cervus*, deer. The word translates Gr. τραγέλαφος: see *tragelaphus*, *n.*, 1.] A fabulous animal, the same as *tragelaphus*.

Renan described himself as "a tissue of contradictions, recalling the classic *hir*[*c*]*ocerf* with two natures. One of my halves is constantly occupied in demolishing the other, like the fabulous animal of Ctesias, who ate his paws without knowing it."
C. Lombroso (trans.), Man of Genius, p. 25.

hiro (hē'rō), *n.* [Jap.] A Japanese unit of length equal to 4.97 feet; a 'fathom.'

H-iron (āch'ī″ėrn), *n.* An I-beam with flanges very wide relatively to the vertical depth.

hirrient (hir'i-ent), *n.* [L. *hirriens*, ppr. of *hirrire*, snarl, as a dog: an imitative word.] In *phonetics*, a strongly trilled sound, like the snarl of a dog.

hirschgulden (hirsh'göl″den), *n.* [G.: see *hart*[1] and *gulden*.] A coin of Würtemberg of the seventeenth century, so called from the figure of a hart on the reverse.

hirsinghar (hėr-sing-gär'), *n.* [Hindi.] A tall Indian shrub of the olive family, *Nyctanthes Arbor-tristis*. Also called *sad-tree*, *night-flower*, and *night-jasmine*. See *Nyctanthes*.

hirst-frame, *n.* See ★*hurst-frame*.

hirsuties, *n.* 2. In *pathol.*, excessive hairiness, especially in women.

hirtic (hėr'tik), *a.* [*hirta* (see def.) + *-ic*.] Derived from *Usnea hirta*.—**Hirtic acid,** an acid found in the lichen *Usnea hirta*.

hirudine (hi-rö'din), *a.* [For ★*hirudinine*, ⟨ L. *hirudo* (*hirudin-*), a leech, + *-ine*[1].] Relating to or characteristic of the leeches.

hirudinean (hir-ō-din'ē-ąn), *n.* [*Hirudinea* + *-an*.] Any leech of the group *Hirudinea*.

hirudiniculture (hir-ō-din'i-kul-tūr), *n.* [L. *hicudo* (*-din-*), leech, + *cultura*, culture.] The art or occupation of propagating leeches.

hislopite (his'lop-īt), *n.* [Named (1859) after the Rev. Stephen *Hislop*, who brought the mineral from India.] A grass-green cleavable calcite from India which derives its color from inclosed glauconite.

Hispa, *n.* 2. [*l. c.*] A beetle of the genus *Hispa*.—**Rosy hispa,** an American chrysomelid beetle, *Odontota rosea*, whose larvæ damage the leaves of apple-trees.

Hispano-Moresque (his-pan″ō-mō-resk'), *a.* Pertaining to the art of the Moors in Spain or to Spanish art as influenced by that of the Moors.—**Hispano-Moresque pottery,** pottery made in Spain which shows Moorish influence. Much of this ware was covered with a metallic glaze or luster.

Hispano-Portuguese (his-pan″ō-pōr-tū-gēs'), *a.* Belonging or common to both Spain and Portugal.

histerid (his'te-rid), *n.* and *a.* **I.** *n.* A member of the family *Histeridæ*.

II. *a.* Of or belonging to the coleopterous family *Histeridæ*.

histic (his'tik), *a.* [Gr. ἱστός, a web, tissue, + *-ic*.] Relating to or having the properties of a tissue.

histidin (his'ti-din), *n.* [Gr. ἱστίον, web, tissue, + *-id* + *-in*[2].] A colorless compound, $C_6H_9O_2N_3$, formed by the hydrolysis or decomposition of many proteids and albuminoids, such as casein, albumin, and horn. It crystallizes in plates.

Histiobranchus (his″ti-ō-brang'kus), *n.* [NL., ⟨ Gr. ἱστίον, web, + βράγχια, gills.] A genus of deep-sea eels of the family *Synaphobranchidæ*.

histioclastic (his″ti-ō-klas'tik), *a.* [Gr. ἱστίον, a web, tissue, + κλαστός, ⟨ κλᾶν, break.] Breaking-down tissues: said of certain cells, like the osteoclasts, which destroy cartilage and produce a medium in which the osteoblasts can live and produce bone. *Proc. Zool. Soc. London*, 1902, I. 208.

Histiocottus (his″ti-ō-kot′us), *n.* [NL., ⟨ Gr. *ἱστιον*, web, + *κόττος*, a fish (see *cottus*).] A genus of sculpins of the family *Cottidæ* found in the North Pacific.

histionic (his-ti-on′ik), *a.* [Gr. *ἱστίον*, a web, + *-ic.*] In *biol.*, pertaining to or derived from a tissue or unitarily functioning cell-group.

If a single stimulus may . . . leave a permanent impression, which can be spontaneously reproduced later on, we are bound to assume, in explaining the phenomenon, a *histionic* presentation, dependent on the psychoplasm of the associated tissue-cells.
Haeckel (trans.), Riddle of the Universe, p. 118.

histoblast (his′tō-blȧst), *n.* [Gr. *ἱστός*, a web, tissue, + *βλαστός*, a germ.] **1.** The cell or morphological unit which is distinctive of a particular tissue.—**2.** An imaginal disk, one of the formative cell-centers in the insect larva which give rise to the appendages and other organs of the imaginal or adult insect.

histocyte (his′tō-sīt), *n.* [Gr. *ἱστός*, a web, + *κύτος*, a hollow (a cell).] A tissue-forming cell, as in sponges.

histodialytic (his″tō-dī-ą-lit′ik), *a.* [*histodialysis* (*-lyt-*) + *-ic.*] Of or pertaining to histodialysis.

histogeography (his″tō-jē-og′rą-fi), *n.* [For **histo(rio)geography*, ⟨ Gr. *ἱστορία*, history, + *γεωγραφία*, geography.] Same as ★*anthropogeography*. [Rare.] *W. Z. Ripley*, Races of Europe, p. 6.

histogram (his′tō-gram), *n.* [Gr. *ἱστός*, a web, + *γράμμα*, a writing.] A diagram of structural form-elements.

We should like to protest against any such crude process of determining goodness of fit as that of placing a normal curve down on seven or eight blocks forming a "*histogram*," and judging the look of the fit.
Nature, Dec. 17, 1903, p. 149.

histographer (his-tog′rą-fėr), *n.* [*histograph(y)* + *-er*[2].] One who is versed in histography; a histologist.

histographical (his-tō-graf′i-kąl), *a.* Of or pertaining to histography.

histology, *n.*—**Pathological histology.** Same as ★*histopathology*.

histometabasis (his″tō-me-tab′ą-sis), *n.* [Gr. *ἱστός*, web, + *μετάβασις*, exchange.] That condition of fossilization in which an entire exchange of the original substance for another has occurred in such manner as to retain or reproduce the minute and even microscopic texture of the original. *C. A. White*, Smithsonian Rep. (Nat. Mus.), 1892, p. 264.

histomorphotic (his″tō-môr-fot′ik), *a.* [*histomorphosis* (*-phot-*) + *-ic.*] Of or pertaining to histomorphosis, or the formation of tissue in plants or animals.

histon (his′ton), *n.* [Gr. *ἱστός*, a web, tissue.] An albuminous substance which occurs in combination with certain radicals, such as hematin (in hemoglobin), and nucleinic acids (nucleoproteids). Bodies of this order have been obtained from the thymus, the lymph-glands and spleen, the red corpuscles of the goose, etc. Globin, the albuminous radical of hemoglobin, is a histon. The histons are closely related to the protamines, and, like these, are markedly basic: they both form precipitates with albumins. The thymus histon is said to have the composition $C_{273}H_{459}N_{81}SO_{84}$.

Histona (his-tō′nä), *n. pl.* [NL., ⟨ Gr. *ἱστός*, tissue, + *-ona.*] A term proposed by Haeckel to designate the multicellular organisms, or those with tissues, as contrasted with the *Protista*.

histonal (his-tō′nąl), *a.* [*Histona* + *-al*[1].] **1.** Of or pertaining to the *Histona*.—**2.** Same as ★*histionic* (which see).

We have cellular ideas, *histonal* ideas, unconscious ideas of the ganglionic cells, . . . all of them being physiological functions of their psychoplasm.
Pop. Sci. Mo., Sept., 1902, p. 416.

Histonal selection. See ★*selection*.

histopathologic (his″tō-path-ō-loj′ik), *a.* [Gr. *ἱστός*, a web, tissue. + E. *pathology* + *-ic.*] Pertaining or referring to diseased tissues in animals or plants.

The *histopathologic* states of the finer structures of the labyrinth. *Detroit Med. Jour.*, Feb., 1903, p. 705.

histopathological (his-tō-path-ō-loj′i-kąl), *a.* Same as ★*histopathologic*.

histopathology (his″tō-pą-thol′ō-ji), *n.* [Gr. *ἱστός*, a web, tissue, + E. *pathology*.] The study of morbid changes in minute structures. *Med. Record*, March 28, 1903, p. 511.

histophysics (his-tō-fiz′iks), *n.* [Gr. *ἱστός*, a web, tissue, + *φυσικά*, physics.] The physics of the animal and plant tissues.

histophysiology (his″tō-fiz-i-ol′ō-ji), *n.* [Gr. *ἱστός*, a web, tissue, + E. *physiology*.] The physiology of the cells and tissues as distinguished from the physiology of the organs.

historical, *a.* **5.** In *biol.*, ancestral or inherited, or due to conditions which existed in the past history of an organism.

So far as the definition given above of *historical* properties concerns the inherited specific peculiarities of plants, the term is not metaphorical from the point of view of the Theory of Descent, but must be taken in its literal signification. *Sachs* (trans.), Botany, p. 697.

Historical painting. See ★*painting*.

historicocritical (his-tor″i-kō-krit′i-kąl), *a.* Based on both historical and critical investigation: as, "the *historicocritical* reconstruction of primitive Christianity," *Schaff*.

historics (his-tor′iks), *n.* History conceived as a division of social science coördinate with statistics, economics, and politics. [Rare.]

I classify the sciences of sociology as *statistics*, *economics*, *civics*, *historics*, and *ethics*, and shall attempt to characterize them for the purpose only of setting forth their nature.
J. W. Powell, in An. Rep. Bur. Amer. Ethnol., 1898–99, [p. lx.

historiographership (his-tō-ri-og′rą-fėr-ship), *n.* The office of historiographer.

historionomer (his-tō-ri-on′ō-mėr), *n.* [Gr. *ἱστορία*, history, + *νόμος*, law, + *-er*[2].] A historian who is versed in both the facts of history and the principles which regulate its course. *Lowell*, *Leaves from Journal in Italy*.

Histosporidia (his″tō-spō-rid′i-ą), *n. pl.* [NL., ⟨ Gr. *ἱστός*, a web, tissue, + *σπορά*, seed (spore), + dim. *-ιδιον*.] The *Myxosporidia* and the *Sarcosporidia* taken together. Also *Histozoa*. *Labbé*.

histotherapy (his-tō-ther′ą-pi), *n.* [Gr. *ἱστός*, a web, tissue, + *θεραπεία*, medical treatment.] A method of treating disease by the use of substances derived from the tissues or organs of animals. *Buck*, Med. Handbook, VI. 409.

histotomy (his-tot′ō-mi), *n.* [Gr. *ἱστός*, a web, tissue, + *-τομια*, ⟨ *ταμεῖν*, cut.] The dissection or analysis of animal and plant tissues; histology.

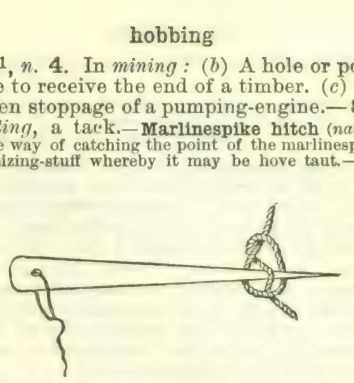
Histozoa (his-tō-zō′ą), *n. pl.* Same as ★*Histosporidia*.

Histrionic paralysis. See ★*paralysis*.

histrixite (his′trik-sīt), *n.* [Erroneously formed; properly **hystrichite*, ⟨ Gr. *ὑστριξ* (*ὑστριχ-*), a porcupine, + *-ite*[2].] A doubtful sulphid of bismuth, antimony, copper, and iron occurring in radiating groups of crystals: found in Tasmania.

hit[1], *v. t.*—**To hit off.** (*c*) In *cricket*, to score (a required number of runs) by hitting or forcing the game.—**To hit off the neck,** in *golf*, to strike (a ball) on the neck of the club.

hit[1], *n.* **8.** In *archery:* (*a*) The act of hitting the target. (*b*) An arrow which hits the target. Usually a hit is scored according to its nearness to the center.—**9.** In *base-ball*, a safe hit (see below); also, though not usually, any kind of stroke wherein the bat hits the ball.—**Base hit,** in *base-ball*, a ball hit fairly by the batsman to such a place that it cannot be caught on the fly or thrown by a fielder to first base before the runner can reach that point.—**Fair hit.** See ★*fair*[1].—**Free hit,** in *field-hockey* and similar games, a hit allowed, as a penalty or otherwise, with which the opponents cannot interfere.—**Half-hit,** in *cricket*, a mistimed or misdirected hit which sends the ball into the air.—**Leg-hit,** in *cricket*, a hit to leg, that is, to that part of the field which is directly behind the batsman as he is batting. *R. H. Lyttelton*, Cricket and Golf, p. 33.—**Safe hit,** in *base-ball*, a base hit; a ball that is hit within the foul-lines with such force or in such a direction that a fielder cannot catch it before it strikes the ground, or cannot, even with the most accurate play, get it to the first-baseman before the runner reaches that base.—**Two-base hit,** in *base-ball*, a ball hit under such conditions as enable a runner to reach second base before the ball can be caught or fielded there. Similarly, *three-base hit*, etc.



hit-and-catch (hit′and-kach′), *n.* A difficult shot in billiards. With the three balls almost in a straight-line 'tie-up,' with no cushion to aid, and too far out for a massé, the striker is required to carom by double contact, so as not wholly to sacrifice position. He must drive the first ball nearly full upon the second or his own will go wide of the mark. Out in the open the force communicated to the second ball will almost equal that imparted to the first, and the striker's ball has to travel about fifteen inches to catch up.

hit-and-miss (hit′and-mis′), *a.* That sometimes hits and sometimes misses. Used specifically in describing a type of governor much used on internal-combustion engines. This governor controls the engine by making it miss an impulse as occasion demands.

hitch[1], *v.* **I.** *intrans.* **5.** To catch or dig into: said specifically of a tool that digs too deeply into a piece of work that is being cut. This action is usually due to an incorrect form of the cutting-tool, but it may be due to the fibrous structure of the material.

II. *trans.* **4.** In *mining*, to dig or pick (pockets) to receive the ends of timbers.

hitch[1], *n.* **4.** In *mining:* (*b*) A hole or pocket made to receive the end of a timber. (*c*) The sudden stoppage of a pumping-engine.—**8.** In *yachting*, a tack.—**Marlinespike hitch** (*naut.*), a simple way of catching the point of the marlinespike in the seizing-stuff whereby it may be hove taut.—**Midshipman's hitch** (*naut.*), several turns with the end of a rope under and over around the bight.—**Slippery hitch** (*naut.*), a hitch that will not hold; a landsman's effort.

Marlinespike Hitch.

Midshipman's Hitch.

hitch[2] (hich), *n.* [Appar. California Indian: see ★*chi*[2], ★*chigh*.] A large chub, *Lavinia exilicauda*, found in the waters of California. Also *chi*.

hitch-pin (hich′pin), *n.* In *pianoforte-making*, the pin to which a string is fastened at the end opposite to the tuning-peg.

hitchpin-block (hich′pin-blok), *n.* In *pianoforte-making*, the bar or brace in which are the hitch-pins.

Hitopadesha (hi-tō-pa-dā′shä), *n.* [Skt. *hitopadeśa*, good instruction, ⟨ *hitá*, good, lit. 'put,' + *upadeśa*, instruction, rule, reference.] The Sanskrit name of a collection of tales and fables compiled from the larger collection known as the Panchatantra, and forming one of the sources of the Æsopic fables of Europe.

Hittorf rays. See *obscure* ★*rays*.

Hittorf's transport numbers. See *transport* ★*numbers*.

hive, *n.* **6.** In *oyster-culture*, an artificial bed prepared for spat.—**Bar-hive,** a hive in which the honeycomb is hung from bars.

hive-evil (hīv′ē″vl), *n.* A sickness to which bees are liable. *N. E. D.*

hive-syrup (hīv′sir″up), *n.* A syrup containing squill, senega, and tartar emetic; compound syrup of squill; croup syrup.

hjelmite, *n.* See *hielmite*.

hkl. See ★*k*, 6.

hl. An abbreviation of *hectoliter*. See *metric system*.

hlonipa (hlō-nē′pä), *n.* [Zulu *hlonipa*, act respectfully or modestly; *inhloni*, shame.] A custom among the Zulus and certain other tribes of South Africa according to which they must show respect to certain of their relatives and to the head men of the tribe. This is done in several ways, but especially by refraining from mentioning their names and from using any word similar in sound. This necessitates the substitution or coinage of new words, and leads to many changes in the vocabulary of the language.

That strange custom (by no means unknown elsewhere in Africa) of "*hlonipa*," by which a constant local change of vocabulary takes place owing to the dislike to mentioning names of things which resemble the names of relatives; so that if there be a prominent person in the tribe, for instance, whose name is actually equivalent to "ox," or even whose name sounds like the word for ox, in that village or community the ox will henceforth be known by a paraphrase or by a substituted word.
Nature, May 19, 1904, p. 57.

hm. An abbreviation of *hectometer*. See *metric system*.

H. M. An abbreviation (*b*) of *Hallelujah Meter*; (*c*) of *Home Mission* or *Home Missionary*.

H. M. P. An abbreviation of the Latin *hoc monumentum posuit*, erected this monument.

Hoar-frost line, a curve indicating upon a diagram the pressures at which, for different temperatures, a solid and its vapor may occur simultaneously.

hoary-edge (hōr′i-ej), *n.* An American hesperiid butterfly, *Achalarus lycidas*, occurring in the United States from the Mississippi valley eastward. Its larvæ feed on *Meibomia*.

hob[1], *n.*, **3.** (*b*) A milling-machine cutter used in forming the teeth of worm-gears. It is of the shape of the worm which is to mesh in the interdental spaces of the gear, and in use cuts out of the blank gear this space, leaving the teeth correctly formed.

7. A master die; a steel punch cut to a certain design, used for making coining-dies.

hobbing (hob′ing), *n.* The process of cutting the threads of worm-wheels, dies, or chasers with a hob or master tap in a milling-machine or a lathe. See ★*hob*[1], 3 (*b*).

hobbing-machine (hob′ing-ma-shēn″), *n.* A milling-machine specially designed to cut gears by means of a hob. See ★*hob*[1], 3 (*b*).

hobo (hō′bō), *n.* [Origin obscure.] A tramp. [Recent slang, U. S.]

hobson-jobson (hob′son-job′son), *n.* [An Anglo-Indian corruption of the cry *Ya Hasan! Ya Hosain!* of the "Mohammedans as they beat their breasts in the procession of the *Moharram.*" *Yule and Burnell.*] In India, a native festal excitement; especially the Moharram ceremonies. *Yule and Burnell.*

hock[1], *n.*—**To cap the hocks.** See ★*cap*[1].—**Vulture hock,** in fanciers' language, a tarsus clothed with stiff feathers.

While the feathering should be abundant, all semblance to *vulture hock*, or stiff feathering, should be avoided.
U. S. Dept. Agr., Standard Varieties of Chickens, p. 14.

hocking (hok′ing), *n.* The feasting and merriment of the annual hocktide festival formerly observed in England.

Hock-Tuesday money. See ★*money.*

Hodgson's disease. See ★*disease.*

hodometric (hod-ō-met′rik), *a.* Pertaining to or measured by a hodometer; hodometrical; odometric.

hoe[1], *n.*—**D-hoe,** a scuffle, or Dutch hoe, in which the blade is secured to the handle by curved prongs, which have, with the blade, the form of a capital D. See *hoe*[1], Fig. *b.*

hoe[1], *v. i.* 2. To play or dance a hoe-down. [Colloq., southern U. S.]

hoe[5], *n.* See ★*hoey.*

hoe-mother (hō′muтн″ėr), *n.* [*hoe*[2] + *mother*[1].] The basking-shark, *Cetorhinus maximus*, found in the arctic seas. It reaches a length of nearly 40 feet.

hoe-plow (hō′plou), *v. t.* To dig and turn over (earth) with a hoe as a preparation for planting. [West Indies.]

The land should be ploughed or *hoe-ploughed* twice in the wettest season of the year.
Letter of John Castles from Grenada, read before the [Roy. Soc., May, 1890.

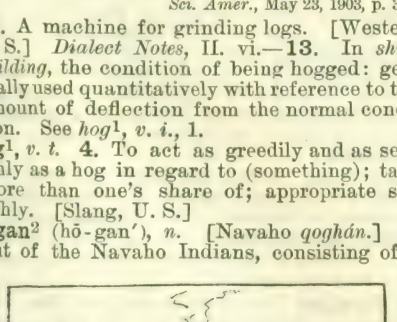
hoernesite (hėr′ne-sīt), *n.* [Named for Dr. *Hörnes*, an Austrian mineralogist.] A hydrated magnesium arseniate, $Mg_3As_2O_8 + 8H_2O$, occurring in snow-white monoclinic crystals: found in Hungary. Also *hörnesite.*

hoe-tusk (hō′tusk), *n.* A shark, *Mustelus canis*, of the family *Galeidæ:* found in the Atlantic on the coasts of the United States and Europe.

hoey, hoe[5] (hō-ā′, hō-ē′), *n.* [Chinese *hwui*, Amoy *hòe, húi*, Swatow *húi*, Fu-chau *hwi*, etc.] A society of Chinese, especially a secret society of Chinese resident in a foreign community.

Hoffman kiln. See ★*kiln.*

Hoffmann's anodyne. See ★*anodyne.*



hog[1], *n.* 11. A small locomotive used for hauling cars about mines; a hogback locomotive. [Slang.]

In anthracite drifts steam locomotives of a small and peculiar type known as "*hogs*" haul the trains.
Sci. Amer., May 23, 1903, p. 392.

12. A machine for grinding logs. [Western U. S.] *Dialect Notes*, II. vi.—**13.** In *shipbuilding*, the condition of being hogged: generally used quantitatively with reference to the amount of deflection from the normal condition. See *hog*[1], *v. i.*, 1.

hog[1], *v. t.* 4. To act as greedily and as selfishly as a hog in regard to (something); take more than one's share of; appropriate selfishly. [Slang, U. S.]

hogan[2] (hō-gan′), *n.* [Navaho *qoghán.*] A hut of the Navaho Indians, consisting of a

A Navaho Hogan.

conical framework covered with poles, bark, and earth. The main beams turn north, south, and west, while the entrance is on the east side. Sometimes the shelters of the Pima tribes are also called *hogans.*

hogback, *n.* **II.** *a.* Resembling a hog's back in form: used specifically in describing a small locomotive which is very low in build and has no cab.

The motor or "electric mule" is a vehicle closely resembling a "*hog-back*" mine locomotive, and is 10 feet long by 2 feet wide and 30 inches from the rail.
Amer. Inventor, April 15, 1904, p. 173.

hog-beetle (hog′bē″tl), *n.* An old name for a curculionid beetle. [Eng.]

Hog-cholera bacteria. See ★*bacterium.*

hog-engine (hog′en″jin), *n.* A locomotive-engine having usually four pairs of drivers and receiving steam from a boiler with a very wide fire-box at the back.

hog-feast (hog′fēst), *n.* The feast that follows the killing of the family pig by a peasant or cottager. [Prov. Eng.]

hogger-pump (hog′ėr-pump), *n.* The top pump in the series, when stage-pumping is used for draining a mine.

hogging[2] (hog′ing), *n.* The curving or distortion of a structure when it droops at the ends or rises in the middle, as a boiler-furnace or a ship. The hogging of boiler-furnaces is usually due to the local expansion of the flue, caused by the fire being particularly hot in one part of the grate.

hogging-moment (hog′ing-mō″ment), *n.* In *naval arch.*, the moment, at any given point, of the forces which tend to cause a vessel to hog: opposed to *sagging-moment*, that which tends to cause a vessel to sag. These moments for each point in the length of a vessel are plotted in a curve of bending-moments. See ★*curves of ship calculations.*

Any ordinate of the latter curve represents to scale the bending moment (usually expressed in foot-tons) at the corresponding cross-section of the ship. Ordinates set off above the base-line indicate '*hogging*' *moments*, while 'sagging moments' are indicated by ordinates set off below the base-line. *White*, Naval Arch., p. 304.

hog-meat, *n.* 2. Pork.

hog-perch (hog′pėrch), *n.* *Percina caprodes*, a percoid fresh-water fish found in the Great Lakes and southward.

hog-plague (hog′plāg), *n.* A fatal infectious disease of swine, producing necrotic ulceration of the intestinal mucous membrane, with sometimes a secondary involvement of the lungs; hog-cholera.

hog-pox (hog′poks), *n.* An acute febrile eruptive disease of swine similar to sheep-pox and smallpox, characterized by the formation of pocks in various parts of the body.

Hogshead of sugar, in the West Indies, often a definite weight of 1,600 pounds.

hog's-pence (hogz′pens), *n.* Roman coins found in Leicestershire: so called from being turned up by swine.

hog-tie (hog′tī), *v. t.*; pret. and pp. *hog-tied*, ppr. *hog-tying.* To tie as a hog is tied, all four feet together.

Mr. Masterson wore a narrow crimson sash wound twice about his waist, . . . and when [he] donned it, . . . he explained the same as something wherewith he might *hogtie* steers when in the course of duty he must rope and throw them. Doubtless the sash, being of a soft, reluctant texture and calculated to tie very tight into knots that would not slip, was of the precise best material with which to *hogtie* steers.
A. H. Lewis, Sunset Trail, p. 3.

hog-truss (hog′trus), *n.* The main truss or frame of a dredge or boat. See cut under *hog-frame.*

The upper structure of the boat (which is stayed by means of *hog trusses* and 22-foot King posts) covers its full width and the rear eighty feet of its length.
Elect. World and Engin., Oct. 1, 1904, p. 559.

hogweed, *n.* 2. In the West Indies, any one of several plants of the genus *Boerhaavia*, especially *B. erecta*, which is much relished by hogs.

hohlflute (hōl′flöt), *n.* [G. *hohlflöte*, < *hohl*, hollow, + *flöte*, flute.] In *organ-building*, a flue-stop of metal which gives a dull, hollow tone; it is made in three or four sizes or pitches. Also *holflute.*

hohl-quint (hōl′kwint), *n.* [G.] In *organ-building*, a quint stop of the hohlflute kind.

hohmannite (hō′man-īt), *n.* Same as ★*amarantite.*

hoi (hō′i), *n.* [Polynesian.] In Hawaii and Tahiti, the common yam, *Dioscorea sativa.* Before the introduction of the potato it was cultivated for the supply of ships.

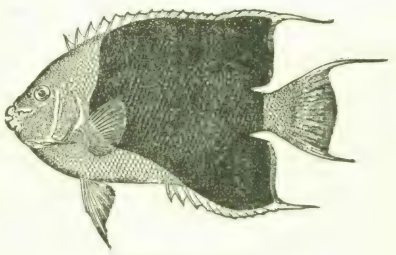
hoist, *n.*—**Builders' hoist,** a hoisting-machine of a portable or semi-portable type, having the boiler, engine, and drum on one bed, for use in raising building materials in structures in process of erection.—**Hoist-conveyer.** See ★*conveyer.*—**Traveling hoist,** any form of hoist in which the hoisting-motor or -machine is arranged to travel along an elevated trackway. In the electric traveling hoist, the motor, gearing-blocks, and hoisting-ropes are on a trolley which is supported on wheels that run on the flanges of an I-beam or other form of beam.

In some hoists the operator travels in a cab suspended from the track, operating the motor to lift the load and also to cause it to travel along the track.—**Tripping hoist,** a hoist which trips or tips the bucket at a prescribed point, thus emptying the load automatically.

hoistaway (hoist′a-wā), *n.* An elevator; a hoist; a lift; a device for raising or lowering heavy weights.

hoist-hole (hoist′hōl), *n.* An elevator-shaft; a hole or opening through which materials are hoisted.

hoisting-block (hois′ting-blok), *n.* The lower of the two blocks of a block-and-fall; the block which moves with the load.



hoki (hō′kē), *n.* [Maori.] A New Zealand fish, *Coryphænoides novæ-zelandiæ*, belonging to the family *Macruridæ*, which are deep-sea gadoids. See *Tasmanian* ★*whip-tail. Austral English.*

hokko, *n.* See *hocco.*

hola (hō′lä), *n.* [Hawaiian.] A name in Hawaii of the root and stalk of the ahuhu, *Cracca purpurea.* See ★*ahuhu* and *Tephrosia.*

Holacanthinæ (hol″a-kan-thī′nē), *n. pl.* [NL., < *Holacanthus* + *-inæ.*] A subfamily of butterfly-fishes of the family *Chætodontidæ*, typified by the genus *Holacanthus.*

Holacanthus (hol-a-kan′thus), *n.* [NL., < Gr. ὅλος, whole, + ἀκανθα, spine.] A genus of

Holacanthus tricolor.
(From Bulletin 47, U. S. Nat. Museum.)

butterfly-fishes of the family *Chætodontidæ.* They are characterized by the many spines in the dorsal fin, and by the presence of a strong spine on the preopercle. Many of the species are brilliantly colored. *H. ciliaris* is the angel-fish of the Florida Keys. *H. tricolor* is found in the same region.

holagogue (hol′a-gog), *n.* [Gr. ὅλος, whole, + ἀγωγός, a leader.] In *med.*, an agent supposed to be capable of removing all morbid humors.

Holanthias (hō-lan′thi-as), *n.* [NL., < ὅλος, whole, + ἀνθίας, a certain fish (< ἄνθος, flower).] A genus of fishes of the family *Serranidæ* found in tropical seas.

Holarctic region or **realm.** See ★*region.*

holarthritis (hol-är-thrī′tis), *n.* [NL., < Gr. ὅλος, whole, + ἄρθρον, joint, + *-itis.*] Inflammation involving all or most of the joints of the body.

Holconoti (hol-kō-nō′tī), *n. pl.* [NL., pl. of *Holconotus.*] A group of the *Embiotocidæ*, or viviparous surf-fishes: found in the waters of the Pacific from California to Japan.

Holconotus (hol-kō-nō′tus), *n.* [NL., < Gr. ὅλκος, a groove (< ἕλκειν, draw, trail, tow), + νῶτος, back.] A genus of surf-fishes, of the family *Embiotocidæ*, found on the coast of California. *H. rodoterus* is the common species.

hold[1], *v.* **I.** *trans.*—**Holding-out catch.** See ★*catch*[1].—**To hold a good full, a good luff, a good wind.** See ★*full*[1], ★*luff*[2], ★*wind*[2].—**To hold of.** (*b*) To belong or pertain to; depend on or upon.

A spark disturbs our clod;
Nearer we *hold of* God
Who gives, than of His tribes that take, I must believe.
Browning, Rabbi Ben Ezra, stanza 5.

To hold out. (*c*) In *poker* and other card-games, to hold (certain cards) in the sleeve or elsewhere until there is a valuable stake for which to play.—**To hold the land, the luff, the wind.** See ★*land*[1], ★*luff*[2], ★*wind*[2].—**To hold to.** (*a*) To adhere to: as, he still *holds to* his former statement. (*b*) Same as *hold*[1], *v. i.*, 7.—**To hold up.** (*d*) To refuse to give up (the commanding card of an adversary's suit), especially in whist and bridge. (*e*) To hold or back up (a rivet which is being headed over).

II. *intrans.* 6. (*b*) Specifically, in *archery*, to make a short pause, after drawing a bow, for fixing the aim and preparing to loose the bowstring.—**7.** Of a female animal, to retain the spermatozoa of the male so that she may become pregnant.—**To hold true,** to remain true; be applicable or indisputable: as, "the saying of the poet *holds true* in a large degree." *S. Smiles*, Character, ii.

hold[1], *n.* 8†. In *old Eng. hist.*, the title of an officer in the Danelaw corresponding to the high reeve among the English.—**Referee's hold,** in *wrestling*, a hold given to opponents by the referee.—

Shore hold, in *lumbering*, the attachment of the hawser of a raft of logs to an object on the shore.—**Tail hold,** in *lumbering*, a means of obtaining increased power, in moving a log by tackle, by passing the cable through a block attached to the log and fastening the end to a stationary object, so that hauling on the other end gives twice the power which would be attained by attaching the cable directly to the log.

hold[3], *n.*—**Hold stanchions.** See ★*stanchion.*—**Lower hold** (*naut.*), the second space beneath the spar-deck, or the space under the lower deck, of a vessel having two decks.—**To break out the hold,** to begin to unload the cargo of a ship; break bulk.

hold-all (hōld′âl), *n.* A portable bag or case used in traveling, etc., for holding miscellaneous articles.

hold-down (hōld′doun), *n.* A device to prevent a machine or piece of apparatus from jumping or shaking: as, the *hold-down* of a saw-table.

holder-up (hōl′dėr-up), *n.* One who holds a sledge or anvil against a rivet which is being headed; also, a device for holding rivets by air-pressure while they are being driven.

holdfast, *n.* 3. The root-like organ of attachment developed by many of the algæ. Also *haptere* and *rhizoid.*

> Kelp *hold-fasts,* of which none grow in the immediate vicinity, were taken in abundance by the dredge.
> *Science,* Jan., 1902, p. 59.

holding, *n.* 6. In *archery,* the short pause after drawing a bow to fix the aim and make ready for loosing the bowstring. See ★*hold*[1], *v. i.,* 6 (*b*).

holding-boom (hōl′ding-bōm), *n.* See ★*storage-boom.*

holding-plate (hōl′ding-plāt), *n.* Same as *anchor-plate,* 1.

hold-on (hōld′on), *n.* Any weight, base, or heavy casting which serves to hold a portable tool or machine in place while it is in use.—**Magnetic hold-on,** an electromagnet which serves to hold a tool to any iron or steel surface. See *magnetic* ★*chuck.*

hold-over (hōld′ō″vėr), *n.* 1. A place of detention; a lock-up. *New York Times,* July 15, 1905.—2. An office-holder who remains in office, or in possession, beyond his regular term: sometimes used attributively.

hold-stringer (hōld′string″ėr), *n. Naut.,* a combination of angle-bars and plates, fitted on the inside of the frames of a vessel between the upper turn of the bilge and the lowest complete tier of beams.

hole[1], *n.*—**Tap-sized hole,** a hole of such a diameter as to be ready to receive the tapered end of a screw-cutting tap and admit the cutting of a full thread inside of it. It has the diameter of the tap measured between the bottoms of the threads on opposite ends of a diameter.

hole[1], *v. i.*—**To hole out.** (*a*) In *golf,* to play the ball into one of the holes of the course: as, *to hole out* in four strokes. (*b*) In *billiards,* to win by pocketing. Some billiard games of mixed pockets and caroms require the final shot to be a carom; others insist upon a pocket.—**To hole up,** to retire to a burrow for winter; to den up.

hole, *a., n.,* and *adv.* A simplified (and the earlier) spelling of *whole.*

holectypoid (ho-lek′ti-poid), *a.* [*Holectypoid-a.*] Having the characters of, or related to, the *Holectypoida.*

Holectypoida (ho-lek-ti-poi′dä), *n. pl.* [NL., ⟨ *Holectypus* + *-oida.*] An order of sea-urchins or *Euechinoidea.* They have an actinal, central peristome, the periproct situated beyond the dorsocentral system in the posterior interambulacrum, and a pair of pores, or only one pore, to an ambulacral plate.

Holectypus (ho-lek′ti-pus), *n.* [Gr. ὅλος, entire, + ἔκτυπος, worked in relief, ⟨ ἐκ, out, + τύπτειν, strike.] A genus of *Euechinoidea* typical of the *Holectypoida.* They have straight, narrow ambulacra and wide interambulacra; large decagonal peristome; and pyriform periproct situated between the peristome and the posterior edge of the test. They occur in Jurassic and Cretaceous rocks.

holely, *adv.* An amended spelling of *wholly.*

holesale, *n., a.,* and *v.* An amended spelling of *wholesale.*

holesum, *a.* An amended spelling of *wholesome.*

holetrous (hō-lē′trus), *a.* Having the characters of the *Holetra.*

holflute, *n.* Same as ★*hohlflute.*

holiday, *n.*—**The holidays.** Specifically—(*a*) School vacation. (*b*) The Christmas season. [U. S.]

holidayer (hol′i-dā-ėr), *n.* One who takes or makes a holiday; an excursionist or picnicker on a holiday; a holiday pleasure-seeker.

holkion (hol-kī′on), *n.*; pl. *holkia* (-ä). [Gr. *ὁλκεῖον,* also *ὁλκαῖον.*] In *Gr. archæol.,* a large bowl.

Holland process. See ★*process.*

Hollander, *n.* 2. [*l. c.*] In *paper-manuf.,* a beating-engine or beater; a Holland beater. See *beating-engine.*

Hollardia (ho-lär′di-ä), *n.* [NL. (Poey, 1858 or 1861), named for Henri *Hollard,* a French professor of zoölogy.] A genus of trigger-fishes, of the family *Triacanthidæ,* found on the coast of Cuba.

hollow-backed (hol′ō-bakt), *a.* Having the back abnormally curved downward: a common deformity in horses. Less properly, same as ★*broken-backed,* 3.

hollower (hol′ō-ėr), *n.* A machine for hollowing out the inner sides of the staves for a keg, barrel, or cask.

hollow-ware, *n.* 2. China, glass, and other wares in the form of cups, tumblers, tea-pots, etc.: in distinction from *flat ware,* such as plates, saucers, or the like. *Webb,* Industrial Democracy, II. 685.

holluschick (hol′us-chik), *n.*; pl. *holluschickie* (-chik-i). An American corruption, in Alaskan waters, of *holostiak,* a young male fur-seal. See ★*holostiak.*

> The "*holluschickie*" are the champion swimmers of all the seal-tribe. *Elliott,* Fur-Seal Islands of Alaska, p. 45.

holly[1], *n.*—**Cape holly,** the saffronwood, *Elæodendrum croceum.*—**Ground-holly,** the pipsissewa or prince's-pine, *Chimaphila umbellata.*—**Native holly.** (*a*) In Australia, *Tricondylus ilicifolius,* a small tree of the family *Proteaceæ.* (*b*) In Tasmania, a shrub of the madder family, *Coprosma hirtella.* See ★*coffee-berry,* 2.—**New Zealand holly,** a spiny-leaved shrub or small tree of the aster family, *Shawia ilicifolia* (*Olearia ilicifolia* of Hooker), valued by the Maoris on account of its musky odor.

Hollybush sandstone. See ★*sandstone.*

holly-cherry (hol′i-cher″i), *n.* Same as *islay.*

hollyhock-bug (hol′i-hok-bug), *n.* An American capsid bug, *Orthotylus delicatus,* bright green in color. It sucks the juices of young hollyhock plants, causing them to wilt, and is also found on ash and other trees and plants.

hollyhock-disease (hol′i-hok-di-zēz″), *n.* See ★*disease.*

Holman's formula. See ★*formula.*

holm-berry (hōlm′ber″i), *n.* See ★*berry*[1].

holm-gang (hōlm′gang), *n.* A going to a holm to engage in mortal combat; the duel then fought. *Kingsley.*

Holmgren test. See ★*test*[1].

Holmia[1] (hol′mi-ä), *n.* [NL., named after G. *Holm,* a Swedish geologist.] A genus of trilobites belonging to the family *Olenidæ* and characterized by possessing 10 free segments and a small unsegmented pygidium. It occurs in the Lower Cambrian rocks.

holmia[2] (hol′mi-ä) *n.* [NL.: see ★*Holmia*[1].] In *chem.,* one of the rare earths, found with yttria in gadolinite, and supposed to be the oxid of a distinct element, holmium: but it may be an as yet unseparated mixture. What was first called *holmia* has been shown to contain dysprosia, and the name now applies to what remains after this has been separated.

holmic (hol′mik), *a.* [*holm(ium)* + *-ic.*] In *chem.,* containing holmium: as, *holmic* oxid; a *holmic* salt.

holmos (hol′mos), *n.*; pl. *holmoi* (-moi). [Gr. ὅλμος, a round, smooth stone, a mortar, etc.] In *Gr. antiq.,* a mortar; also, a drinking-vessel. The name is also applied to a bowl-like crater sometimes supported on a trumpet-shaped foot. The holmos frequently had two handles set low and horizontally.

holoacid (hol′ō-as-id), *n.* [Gr. ὅλος, whole, + E. *acid.*] In *chem.,* a hypothetical product of the union of an acid oxid, not merely with the elements of water, but also of hydrogen dioxid.

holoacral (hol-ō-ā′kral), *a.* [Gr. ὅλος, whole, + ἄκρον, summit, + *-al*[1].] In *math.,* having all the summits opposite to similar summits. See *summit,* 3.

holoaxial (hol-ō-ak′si-al), *a.* [Gr. ὅλος, whole, + L. *axis,* axis, + *-al*[1].] Noting a form of crystal having all the axes of symmetry which can coexist, but without planes of symmetry. *H. A. Miers.*

holobaptist (hol-ō-bap′tist), *n.* [Gr. ὅλος, whole, + βαπτιστής, baptist.] One who baptizes the whole body; an immersionist.

holobenthic (hol-ō-ben′thik), *a.* [Gr. ὅλος, entire, + E. *benthic.*] Completely benthic; living on the bottom under the water and nowhere else. See ★*benthos,* ★*benthic.*

> Another hindrance to the extension of many deep-sea species is that they are *holobenthic,* that is, do not pass through a free swimming larval stage.
> *Encyc. Brit.,* XXXIII. 935.

holobranch (hol′ō-brangk), *a.* and *n.* [Gr. ὅλος, whole, + βράγχια, gills.] **I.** *a.* Having each branchial arch provided with a pair of hemibranchs or half-gills: said of the gills of fishes.

II. *n.* A gill having filaments on both of its lower and posterior edges.

Holobranchia, *n. pl.* 3. A subclass of the *Bryozoa,* characterized by having the lophophore unbroken and either circular or horse-shoe-shaped.

holocaine (hō-lok′ā-in), *n.* [Gr. ὅλος, whole, + E. (*co*)*caine.*] A local anesthetic, resembling in its action, and employed as a substitute for, cocaine; a combination of paraphenetidin and phenacetin.

holocarpic (hol-ō-kär′pik), *a.* [Gr. ὅλος, whole, + καρπός, fruit, + *-ic.*] In certain unicellular algæ, noting the transformation of the simple vegetative body into a sporangium or a spore.

holocarpous (hol-ō-kär′pus), *a.* [Gr. ὅλος, whole, + καρπός, fruit, + *-ous.*] Same as ★*holocarpic.*

Holochoanites (hol″ō-kō-ą-nī′tēz), *n. pl.* [NL., prop. singular, ⟨ Gr. ὅλος, entire, + χόανος, a funnel, + *-ites,* E. *-ite*[2].] A suborder of the nautiloid cephalopods in which the funnels of siphuncular segments reach from the septum of origination to the next septum apicad or beyond this.

holochoanitic (hol″ō-kō-ą-nit′ik), *a.* Of or resembling the *Holochoanites;* having the structure of the siphuncular wall as in the *Holochoanites.*

holochordate (hol-ō-kôr′dāt), *a.* [Gr. ὅλος, whole, + χορδή, chord, + *-ate*[1].] Having the

Holochordate.

Young *Amphioxus* during the adolescent period. (After Kowalevsky.) *a,* notochord extending entire length of body; *b,* spinal chord; *c,* anus; *d,* intestine; *e,* atrial pore; *f,* liver; *g,* gill-slit, with tongue-bar in act of formation; *h,* gill-slit; *i,* oral tentacles. (Magnified.) (From Marshall's "Vertebrate Embryology.")

chorda or notochord extending the full length of the body, as *Amphioxus.*

holochroal (hō-lok′rō-al), *a.* [Gr. ὅλος, whole, + χρόα, the skin, + *-al*[1].] In the compound eyes of trilobites and other crustaceans, having a corneous layer extending continuously over the entire visual surface, as in *Proëtus, Asaphus,* etc. Contrasted with ★*schizochroal.*

holoclastic (hol-ō-klas′tik), *a.* [Gr. ὅλος, whole, + κλαστός, broken.] Noting clastic rocks of aqueous origin as distinguished from those of volcanic origin (hemiclastic). *Senft,* 1857.

Holocystis (hol-ō-sis′tis), *n.* [NL., ⟨ Gr. ὅλος, entire, + κύστις, a bladder.] A genus of Cretaceous corals having characters of the *Tetracoralla,* four of the septa being larger than the rest and the visceral chamber containing tabulæ.

holoedric (hol-ō-ē′drik), *a.* [Gr. ὅλος, whole, + ἑδρα, seat, base.] In *group-theory,* designating isomorphism in which two groups are simply isomorphic.

hologonic (hol-ō-gon′ik), *a.* [Gr. ὅλος, whole, + γωνία, angle, + *-ic.*] Same as ★*holoacral.*

hologonidium (hol″ō-gō-nid′i-um), *n.*; pl. *hologonidia* (-ä). [Gr. ὅλος, whole, + NL. *gonidium.*] A group of algal cells invested with fungus threads which, under proper conditions, may reproduce the thallus of a lichen. Also *soredium.*

holohedron (hol-ō-hē′dron), *n.* [Gr. ὅλος, whole, + ἑδρα, seat, base.] A holohedral (holosymmetric) crystal. See ★*holosymmetric,* 2.

holohexagonal (hol″ō-hek-sag′ō-nal), *a.* [Gr. ὅλος, whole, + ἑξάγωνος, six-cornered, + *-al*[1].] See ★*holosymmetric,* 2.

holohyaline (hol-ō-hī′ą-lin), *a.* [Gr. ὅλος, whole, + ὑάλινος, of glass.] In *petrog.,* completely glassy; without crystals.

holo-isometric (hol″ō-ī-sō-met′rik), *a.* See ★*holosymmetric,* 2.

holometabole (hol″ō-me-tab′ō-lē), *n.* [NL.] Same as *holometaboly.*

Holometopa (hol-ō-met′ō-pä), *n. pl.* [NL., ⟨ Gr. ὅλος, whole, + μέτωπον, front, face.] In Brauer's system, a group of dipterous insects including the family *Conopidæ* and the acalyptrate *Muscidæ.*

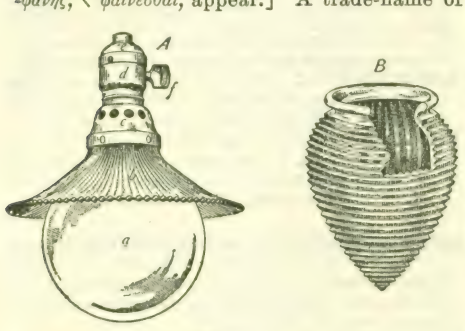
holomorphic, *a.* 2. (*b*) Noting a function of a complex variable which is continuous, one-valued, and has a derived function when the variable moves in a certain region of the plane: so called to indicate that it is like an integer function for which this property holds throughout the entire plane.

holomorphosis (hol-ō-môr′fō-sis), *n.* [NL., ⟨ Gr. ὅλος, entire, + μόρφωσις, formation.] In

biol., the perfect replacement or regeneration of a lost part, as contrasted with ★*meromorphosis*.

Under this heading we may distinguish two cases, in one of which the entire lost part is at once, or later, replaced—*holomorphosis*; in the other the new part is less than the part removed—meromorphosis.
T. H. Morgan, Regeneration, p. 24.

holoparasite (hol-ō-par'ą-sit), *n.* [Gr. ὅλος, whole, + παράσιτος, parasite.] A completely parasitic plant. Compare ★*hemiparasite*.



Holoparasites, which live entirely at the cost of the organic substance of their host, like holosaprophytes are devoid of chlorophyll and, if phanerogams, develop scales in the place of foliage-leaves.
A. F. W. Schimper (trans.), Plant-Geog., p. 203.

holoparasitic (hol″ō-par-ą-sit'ik), *a.* [*holoparasite* + *-ic*.] Pertaining to or of the nature of a holoparasite.

The degree of connexion between the two and the dependence of the parasite upon the host vary between the completeness of that of *holoparasitic* Rhizanths, in which little more than the flower of the parasite is visible upon the outside of the stem of the host and the parasitism is absolute, and the limitation of that of the hemiparasitic Rhinantheæ, in which to all appearance there is an independent autotrophic geophyte.
Encyc. Brit., XXV. 439.

Holopea (hol-ō-pē'ą), *n.* [NL., < Gr. ὅλος, entire, + ὤψ (ὠπ-), face.] A genus of *Gasteropoda* belonging to the family *Littorinidæ*. It is characterized by a short conical shell and roundly oval aperture with entire margin, and occurs in the Silurian and Devonian rocks.

holophane (hol'ō-fān), *n.* [Gr. ὅλος, whole, + -φανης, < φαίνεσθαι, appear.] A trade-name of

Holophane.

A, meridian lamp with holophane reflector: *a*, bulb; *b*, holophane reflector; *c*, reflector-holder; *d*, socket-cover; *e*, socket-cap; *f*, key. *B*, holophane globe.

a glass globe or reflector for electric or other lights, of clear glass, pressed, either only on the outer surface or on both surfaces, with prismatic corrugations: in the latter case the prisms of the inner surface are at right angles to those of the outer surface and are arranged so as to scatter the transmitted light in the special manner required.

holophrase (hol'ō-frāz), *n.* Same as ★*holophrasm*. See *holophrasis*.

holophrasm (hol'ō-frazm), *n.* [Irreg. formed from *holophrasis*.] A holophrastic expression. *Amer. Anthropologist*, Oct.–Dec., 1900, p. 615.

holophyte (hol'ō-fīt), *n.* [Gr. ὅλος, whole, + φυτόν, plant.] In *bot.*, a plant which manufactures its own food, being in no sense saprophytic or parasitic.

holophytic, *a.* 2. In *bot.*, having the character of a complete plant in point of nutrition; autotrophic: said of ordinary green plants as opposed to parasites and saprophytes.

holoplankton (hol-ō-plangk'ton), *n.* [Gr. ὅλος, entire, + NL. *plankton*.] The plants and animals that pass their whole life swimming or floating in the water, considered collectively and in contrast with those that float or swim for only a part of their lives, passing the rest upon or in the bottom. See ★*hemibenthic*, ★*holobenthic*, ★*hemiplankton*, ★*holoplanktonic*, ★*planktonic*.

holoplanktonic (hol″ō-plangk-ton'ik), *a.* [*holoplankton* + *-ic*.] Living in the water of the sea throughout life: contrasted with ★*meroplanktonic* (which see). *Haeckel* (trans.), Planktonic Studies, p. 583.

holopneustic (hol-op-nū'stik), *a.* [Gr. ὅλος, entire, + *πνευστός, < πνεῖν, breathe.] Having many pairs of external openings to the air. Most adult insects are holopneustic, being provided with a tracheal system which communicates with the outer air through many pairs of stigmata or external apertures.

holopodous (hō-lop'ō-dus), *a.* Belonging to or characteristic of the family *Holopodidæ*.

Holops (hol'ops), *n.* [NL., < Gr. ὅλος, whole, + ὤψ, the face.] A genus of crocodiles from the Cretaceous rocks of North America.

holoptic (hō-lop'tik), *a.* [Gr. ὅλος, whole, + ὀπτικός, of seeing.] In *entom.*, having the eyes of the two sides meeting in a line on top of the head, as in many male dipterous insects.

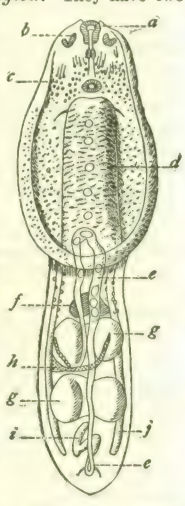
holoptychiid (hol-op-tik'i-id), *n.* One of the *Holoptychiidæ*.

holorachischisis, holorrhachischisis (hol″ō-ra-kis'ki-sis), *n.* [NL., < Gr. ὅλος, whole, + ῥάχις, spine, + σχίσις, division.] Spina bifida extending the entire length of the spine.

holorhiny (hol-ō-rī'ni), *n.* [Gr. ὅλος, whole, + ῥίς (ῥιν-), nose, + *-y*³.] In *ornith.*, the fact or condition of having holorhinal nostrils, that is, of having the narial openings more or less oval in shape and with their posterior margin in advance of the posterior ends of the premaxillaries.

holosaprophyte (hol-ō-sap'rō-fīt), *n.* [Gr. ὅλος, whole, + E. *saprophyte*.] A completely saprophytic plant. See extract under ★*holoparasite*.

holosaprophytic (hol″ō-sap-rō-fit'ik), *a.* Pertaining or relating to a holosaprophyte.



holospheric (hol-ō-sfer'ik), *a.* [Gr. ὅλος, whole, + σφαῖρα, sphere, + *-ic*.] Of the entire globe. —**Holospheric anomaly**, the departure of a local temperature from the holospheric normal for that latitude.—**Holospheric isabnormal**, a line connecting places having the same holospheric anomaly. *Sella*, 1896.—**Holospheric normal**, the average temperature of the whole of any two circles of equal latitude in the northern and southern hemispheres. *Sella*, 1896.

holostiak (ho-los-tyäk'), *n.*; pl. *holostiaks* or (after Russian) *holostiaki* (-tyä'ki). [Russ. *kholostyákŭ* (pl. *-kíi*), a bachelor.] A young male fur-seal; a bachelor seal. Compare ★*holluschick*.

He carefully distinguishes the various classes of seals, . . . the polusikatchi, or young bulls; the *holustiaki*, or bachelors. *L. Stejneger*, Russian Fur-seal Islands, p. 60.

Holostomatidæ (hol″ō-stō-mat'i-dē), *n. pl.* [NL.] An erroneous form for *Holostomidæ*.

Holostomidæ (hol-ō-stom'i-dē), *n. pl.* [NL., < *Holostomum* + *-idæ*.] A family of trematoids of the order *Malacotylea*. They have two suckers and a peculiar adhesive apparatus behind the ventral sucker on the anterior region of the body, and the body divided into an anterior flattened and a posterior cylindrical region. The family contains the genera *Holostomum*, *Diplostomum*, *Hemistomum*, and *Polycotyle*, found mostly in the alimentary canal of birds, reptiles, and mammals, rarely in amphibia and fishes.

Holostomidæ (*Metastatica*) *Hemistomum* of Birds. *Hemistomum clathratum* Dies., from the gut of *Lutra brasiliensis*, ventral view (from Bronn, after Brandes).
a, oral sucker; *b*, openings of glands, *c*; *d*, ventral adhesive apparatus (the ventral sucker is just in front of this); *e*, uterus (the opening of the uterus is rather indistinctly rendered, just below the lower *e*); *f*, ovary; *g*, testis; *h*, shell-glands; *i*, vesicula seminalis; *j*, yolk-glands.
(From Sedgwick's "Zoology.")

Holostomum (hō-los'tō-mum), *n.* [NL., < Gr. ὅλος, whole, + στόμα, mouth.] The typical genus of the family *Holostomidæ*. *Nitzsch*, 1816.

holostylic (hol-ō-stil'ik), *a.* [*holostyl-y* + *-ic*.] Relating to or having the condition of the visceral arches known as holostyly.

holostyly (hō-los'ti-li), *n.* [Gr. ὅλος, entire, + στῦλος, pillar, + *-y*³.] The condition of having the palatoquadrate fused with the cartilaginous cranium and the second visceral arch entire and free from the cranium. It occurs in the chimæras or *Holocephali*. *W. K. Gregory*, 1904.

holosymmetric, *a.* Specifically—2. Having the highest degree of symmetry possible under the given system, and hence showing the maximum number of faces for each form. The holosymmetric forms under each of the crystalline systems are sometimes designated, respectively, as *holoisometric* (also *holotesseral*, etc.), *holotetragonal*, *holohexagonal*, etc.—**Holosymmetric group.** See ★*symmetry*, 6.

holosystematic (hol″ō-sis-te-mat'ik), *a.* Same as ★*holosymmetric*, 2.

holotesseral (hol-ō-tes'e-ral), *a.* [Gr. ὅλος, whole, + L. *tessera*, a square, + *-al*¹.] See ★*holosymmetric*, 2.

holotetragonal (hol″ō-te-trag'ō-nal), *a.* [Gr. ὅλος, whole, + τετράγωνος, four-cornered, + *-al*¹.] See ★*holosymmetric*, 2.

holotonia (hol-ō-tō'ni-ą), *n.* [NL., < Gr. ὅλος, whole, + τόνος, tension.] General muscular spasm of the entire body.

holotonic (hol-ō-ton'ik), *a.* [*holotonia* + *-ic*.] Relating to or affected with holotonia.

holotrichal (hō-lot'ri-kal), *a.* Same as *holotrichous*.

holotrochal (hō-lot'rō-kal), *a.* [Gr. ὅλος, whole, + τροχός, a wheel, + *-al*¹.] Having the body covered with cilia: said of certain invertebrate larvæ: opposed to ★*atrochal*. *Proc. Zool. Soc. London*, 1901, II. 716.

holotropical (hol-ō-trop'i-kal), *a.* [Gr. ὅλος, whole, + -τροπος, < τρέπειν, turn, + *-ic-al*¹.] Same as *tropicopolitan*.

holotype (hol'ō-tīp), *n.* [Gr. ὅλος, entire, + τύπος, type.] A particular individual selected as the type of a species, or the only specimen known at the time of publication of the species.

A *holotype*, therefore, is always a single individual, but may embrace one or more parts, as the skin, skeleton, or other portions. *Science*, April 23, 1897, p. 638.

holoxid (hol-ok'sid), *n.* [Gr. ὅλος, whole, + *oxid*.] In *chem.*, a compound assumed to contain as a constituent molecular instead of atomic oxygen.

Holstein-Friesian cattle. See ★*cattle*.

Holy City. (*b*) A nickname for Adelaide, South Australia. *E. E. Morris*, Austral English.—**Holy-Cross toad.** Same as *Catholic* ★*frog*.

holzin (hōlt'sin), *n.* [G. *Holz*, a German surname (?), + *-in*².] A solution of formalin in methyl alcohol, used as a deodorizer.

holzinol (hōlt'si-nol), *n.* [*holzin* + *-ol*.] A mixture of menthol and formalin.

hom³ (hōm), *n.* Same as ★*homa*.

homa (hō'mą), *n.* [Middle Pers. *hōma*, Avestan *haoma*, = Skt. *soma*: see *soma*².] Same as *soma*².

The Soma or *Homa* ceremony consisted in the extraction of the juice of the *Homa* plant by the priests during the recitation of prayers, the formal presentation of the liquid extracted to the sacrificial fire, the consumption of a small portion of it by one of the officiating priests, and the division of the remainder among the worshippers. As the juice was drunk immediately after extraction and before fermentation had set in, it was not intoxicating. The ceremony seems to have been regarded, in part, as having a mystic force, securing the favor of heaven; in part, as exerting a beneficial influence upon the body of the worshipper through the curative power inherent in the *Homa* plant.
G. Rawlinson, Seven Great Monarchies, The Third [Monarchy, II. iv.

The word is used erroneously in the following quotation:

Persia was accustomed to set her own peculiar seal upon her figured webs by mingling in her designs the mystic "*homa*." . . . Borrowed perhaps originally from Hebrew tradition, this symbol of "the tree of life" had in it nothing objectionable to the Christian, the Jew, or the Moslem.
D. Rock, S. K. Handbook, Textile Fabrics, p. 52.

Homacanthus (hom-ą-kan'thus), *n.* [NL., < Gr. ὁμός, equal, + ἄκανθα, a spine.] A group of slender, bilaterally symmetrical fish spines (probably belonging to the cestracionts sharks) found in the Devonian and Carboniferous rocks.

Homacodontidæ (hom″ą-kō-don'ti-dē), *n. pl.* [NL. *Homacodon*, the type genus, + *-idæ*.] A family of small, extinct, artiodactyl, ungulate mammals, which contains species about the size of rabbits. The brain-case is large, the orbit open, and the molars have conspicuous, conical tubercles. *Nanomeryx* and *Bunomeryx* are other genera. The species occur in the Eocene of North America and Miocene of Europe. *Marsh*, 1894.

Homalocenchrus (hom″ą-lō-sen'krus), *n.* [NL. (Mieg, 1760), in allusion to the compressed spikelets and the general resemblance of the plant to millet-grass, *Milium effusum*; < Gr. ὁμαλός, flat, compressed, + κέγχρος, millet.] A genus of grasses. See *Leersia*.

Homalodontotheriidæ (hom″ą-lō-don-tō-thē-rī'i-dē), *n. pl.* [NL. *Homalodontotherium*, the type genus, + *-idæ*.] A family of extinct artiodactyl mammals, of the suborder *Ancylopoda*, which contains a number of genera of large mammals from the Santa Cruz (Miocene ?) of Patagonia. The skull is massive, limbs stout, and vertebral centra slightly flattened. *Ameghino*, 1889.

homalographic (hom″ą-lō-graf'ik), *a.* [*homalograph-y* + *-ic*.] Pertaining to or by means of homalography: noting a method of anatomical demonstration by means of a series of plane sections, usually of a frozen body.

homalography (hom-ą-log'rą-fi), *n.* [Gr. ὁμαλός, level, plane, + γράφειν, write.] In *anat.*, the study of anatomical structures by means of plane sections of the body.

homaloid (hom'a-loid), *n.* [Gr. *ὁμαλός*, level, plane, + *εἶδος*, form.] A homaloidal space or universe.

Homaloidal surface. See ★*surface*.

Homalonotus (hom″a-lō-nō'tus), *n.* [Gr. *ὁμαλός*, smooth, + *νῶτος*, back.] A genus of trilobites belonging to the family *Calymmenidæ*. They are characterized by a broad, flat body in which the lobation is very indistinct, and are usually of large size; they prevailed in the late Silurian and early Devonian.

homalotropous (hom-a-lot'rō-pus), *a.* [Gr. *ὁμαλός*, level, +-*τροπος*, ‹ *τρέπειν*, turn, + *-ous*.] In *bot.*, growing in a horizontal direction. *Noll.*

homaxial (hō-mak'si-al), *a.* [Gr. *ὁμός*, the same, + L. *axis*, axis, + *-al*[1].] Same as *homaxonial*.

Home counties. See ★*county*[1].

home-bird (hōm'bėrd), *n.* A bird raised or cared for in the home; hence, a child nurtured at home, and under home influences.

The child is still a *home-bird*, and in the humanities above all, this sentiment must find a place right through into boyhood. *Nature*, Feb. 5, 1903, Sup., p. v.

homelyn (hōm'lin), *n.* [Also *homlin*, *hommelin*; origin obscure.] The rough ray, *Raja maculata*, found on the coasts of Europe.

homeochronous (hō-mē-ok'rō-nus), *a.* [Gr. *ὁμοιος*, of the same appearance, like, + *χρόνος*, time.] Same as ★*homochronous*.

homeophony (hō-mē-of'ō-ni), *n.* [Gr. *ὁμοιος*, of the same nature, + *φωνή*, voice, sound.] Similarity of sound.

homeopraxis (hō″mē-ō-prak'sis), *n.* [Gr. *ὁμοιος*, of the same nature, + *πρᾶξις*, doing, action.] A similar action or a like development; a parallel evolution.

This is a phenomenon of "dynamic convergence," which the author calls "*homeopraxis*." It is, indeed, very striking that the rightful tenant and the insinuated parasite which replaces it should have similar adaptations, both structural and functional, securing emergence. There is a parallel adaptation of host and parasite to the same conditions.

Jour. Roy. Micros. Soc., Dec., 1904, p. 649.

homer[1], *n.* 2. In *base-ball*, a home run.

Homerist (hō'mē-rist), *n.* 1. A Homeric scholar; a student or an admirer of Homer or his poems. — 2. An imitator of Homer or his style.

Homerologist (hō-mē-rol'ō-jist), *n.* One who is versed in Homerology.

homested, *n.* and *v.* A simplified spelling of *homestead*.

homester (hōm'stėr), *n.* [*home* + *-ster*.] One who belongs to or represents the locality; especially, a member of the local or 'home' team in any sporting contest. [Eng.]

Homesthes (hō-mes'thēz), *n.* [NL. (Gilbert), ‹ Gr. *ὁμός*, the same, + *ἔσθιειν*, eat.] A genus of blennies found on the coast of Panama.

homethrust (hōm'thrust), *v. i.* To thrust home; deliver a home thrust; hit the mark directly and with effectiveness.

hominal (hom'i-nal), *a.* [L. *homo* (*homin-*), man, + *-al*[1].] Pertaining to or characteristic of man or mankind; human. [Rare.]

hominian (hō-min'i-an), *n.* [L. *homo* (*homin-*), man, + *-ian*.] One of the *Hominidæ*; a human being.

hominify (hō-min'i-fī), *v. t.*; pret. and pp. *hominified*, ppr. *hominifying*. [L. *homo* (*homin-*), man, + *-ficare*, ‹ *facere*, make.] To render manlike or human; attribute human qualities to; make man.

hominocentric (hom″i-nō-sen'trik), *a.* [L. *homo* (*homin-*), man, + *centrum*, center, + *-ic*.] Pertaining to the doctrine or idea that all things are created or designed to please or satisfy man. [Rare.]

It was the old idea that all things exist merely to please man: this *hominocentric* doctrine Darwin disproved.

L. H. Bailey, Outlook to Nature, p. 272.

homobiophorid (hō″mō-bī-of'ō-rid), *n.* [Gr. *ὁμός*, the same, + E. *biophorid*.] See ★*biophorid*.

homobranchiate (hō-mō-brang'ki-āt), *a.* [Gr. *ὁμός*, the same, + *βράγχια*, gills, + *-ate*[1].] Having gills of uniform structure, as decapod crustaceans; pertaining to or having the characters of the *Homobranchia*.

homobront (hō'mō-bront), *n.* [Gr. *ὁμός*, the same, + *βροντή*, thunder.] A line connecting points around an advancing thunder-storm at which the first thunder is heard simultaneously; an isobront. *Von Bezold*.

homocamphoric (hō″mō-kam-for'ik), *a.* [Gr. *ὁμός*, the same, + (*cyan*)*camphor* + *-ic*.] Noting an acid, a colorless crystalline compound, $HO.COC_8H_{14}.CH_2.COOH$, formed by boiling cyancamphor with potassium hydroxid. It melts at 234° C., and was at one time called, incorrectly, *hydrocamphocarboxylic acid*.

homocentrically (hō-mō-sen'tri-kal-i), *adv.* Concentrically.

homocerebrin (hō-mō-ser'ē-brin), *n.* [Gr. *ὁμός*, the same, + L. *cerebrum*, brain, + *-in*[2].] A colorless compound, $C_{70}H_{138}O_{12}N_2$(?), formed by the action of barium hydroxid solution on brain matter. It crystallizes in transparent spheres, melts at 170–176° C., and is also called *phrenosin*.

homochelidonin (hō″mō-ke-lid'ō-nin), *n.* [Gr. *ὁμός*, the same, + *Chelidon(ium)* + *-in*[2].] An alkaloid, $C_{21}H_{21}O_5N$, obtained from the root of *Sanguinaria Canadensis*. Two compounds with this formula are known, distinguished as *β*- and *γ*-*homochelidonin*. Both crystallize in needles; the former melts at 159° C., the latter at 169° C. The latter is also found in *Chelidonium majus*.

homochiral (hō-mō-kī'ral), *a.* [Gr. *ὁμός*, the same, + *χείρ*, hand, + *-al*[1].] Related in the manner of one right hand to another right hand, or of one left hand to another left, that is, formed in the same way and turned in the same direction; identical in form and direction.

homochirally (hō-mō-kī'ral-i), *adv.* In a homochiral manner.

homochlamydeous (hō″mō-kla-mid'ē-us), *a.* [Gr. *ὁμός*, the same, + *χλαμύς* (*χλαμυδ-*), cloak, + *-e-ous*.] In *bot.*, dichlamydeous, but with all the members of the perianth similarly colored. In plant development, the homochlamydeous stage succeeds the homoiochlamydeous, and is followed by the heterochlamydeous.

homochromosome (hō-mō-krō'mō-sōm), *n.* [Gr. *ὁμός*, the same, + *χρῶμα*, color, + *σῶμα*, body: see ★*chromosome*.] An ordinary or typical chromosome, as contrasted with an accessory chromosome.

Montgomery's (26) terms *homochromosome* and heterochromosome to distinguish between the ordinary chromosomes and the accessory. *Biol. Bulletin*, Dec., 1904, p. 6.

homochromy (hō-mok'rō-mi), *n.* [Gr. *ὁμός*, the same, + *χρῶμα*, color.] The coloring of organisms in resemblance to the prevailing color of their normal environment; general cryptic coloring.

homochronic (hō-mō-kron'ik), *a.* [As *homochron-ous* + *-ic*.] Appearing in the offspring at the same point of development as in the parent. — **Homochronic heredity.** See ★*heredity*.

homochronous (hō-mok'rō-nus), *a.* [Gr. *ὁμόχρονος*, of the same time, ‹ *ὁμός*, the same, + *χρόνος*, time.] Appearing in the children at the same age as in the parents. See the extract.

This kind of inheritance (of characters of the parents in such manner that they appear in the latter at the same age in which they occur in the former) has been called *homochronous*. *Eimer*, Organic Evolution, p. 167.

homocladic (hō-mō-klad'ik), *a.* [Gr. *ὁμός*, the same, + *κλάδος*, branch.] Noting an anastomosis formed between terminal twigs of the same artery: opposed to ★*heterocladic*.

Homocœla (hō-mō-sē'lä), *n. pl.* [NL., ‹ Gr. *ὁμός*, the same, + *κοῖλος*, hollow.] A suborder of calcareous sponges in which there are no flagellated chambers, the entire internal surface being lined by collared cells. It includes the family *Asconidæ*. Compare ★*Heterocœla*.

homocœlous (hō-mō-sē'lus), *a.* [Gr. *ὁμός*, the same, + *κοῖλος*, hollow, + *-ous*.] Having the gastral layer of cells continuous, as in sponges of the family *Clathrinidæ*; resembling or having the characteristics of the *Homocœla*: opposed to ★*heterocœlous*.

homoconine (hō-mō-kō'nin), *n.* [Gr. *ὁμός*, the same, + E. *conine*.] A colorless liquid, $C_5H_9(NH)CH_2.CH(CH_3)_2$, closely allied to conine, which it resembles in odor. It boils at 181–182° C. Also called *a-isobutylpiperidine*.

homocyclic (hō-mō-sik'lik), *a.* and *n.* [Gr. *ὁμός*, the same, + *κύκλος*, circle.] **I.** *a.* Having the same or only one circle or cycle.

Spectra of the third variety. These show absorption bands, and the substances yielding them are generally constituted on the type of benzene, naphthalene, anthracene, phenanthrene, &c.; but the rings may be either *homocyclic* or heterocyclic without the character of the spectra being altered. *Nature*, Sept. 17, 1903, p. 475.

II. *n.* A closed-chain compound in which the ring consists only of carbon atoms, as benzene.

Homocysteæ (hō-mō-sis'tē-ē), *n. pl.* [Gr. *ὁμός*, the same, + *κύστις*, a bag, + *-eæ*.] A suborder of the blue-green algæ characterized by the absence of heterocysts.

homodermatous (hō-mō-dėr'ma-tus), *a.* [Gr. *ὁμός*, the same, + *δέρμα*(*τ-*), skin, + *-ous*.] Having the skin of uniform structure throughout the body.

homodermy (hō-mō-dėr'mi), *n.* [Gr. *ὁμός*, the same, + *δέρμα*, skin.] In *biol.*: (*a*) Similarity in relation to the germ-layers. (*b*) The doctrine or opinion that homologous parts always stand in the same relation to the embryonic germ-layers, and that embryonic origin is the final and decisive test of homology.

homodesmotic (hō″mō-des-mot'ik), *a.* [Gr. *ὁμός*, the same, + *δεσμός*, a bond, + *-otic*.] Joining similar parts of the central nervous system: noting nerve fibers which perform this office.

homodontism (hō-mō-don'tizm), *n.* [*homodont* + *-ism*.] The condition of having a dentition in which all teeth are alike, as toothed whales. [Rare.]

homodoxia (hō-mō-dok'si-ä), *n.* [NL., ‹ Gr. *ὁμός*, the same, + *δόξα*, opinion.] The holding of opinions in common; or, opinions held in common. *G. S. Hall*, Adolescence, II. 133.

homodrome (hō'mō-drōm), *n.* [Gr. *ὁμός*, the same, + *δρόμος*, a running.] In *physiol.*, a positive induction current. *Proc. Roy. Soc.* (London), July, 1902, p. 190.

homodynamic (hō″mō-dī-nam'ik), *a.* Same as *homodynamous* in all senses.

homodynamous, *a.* 2. Noting the absence of a condition of dominance in respect to a given character in ancestral inheritance. When the cross-bred offspring of two parental races or varieties breeds true or produces offspring like itself, the parents of the cross-bred offspring are held to be *homodynamous*. — **Homodynamous determinant.** See ★*determinant*.

homœocephalic (hō″mē-ō-se-fal'ik), *a.* [Gr. *ὁμός*, the same, + *κεφαλή*, head, + *-ic*.] Relating to skulls of similar type.

homœochromatic (hō″mē-ō-krō-mat'ik), *a.* [Gr. *ὁμοιος*, like, + *χρῶμα*(*τ-*), color.] Exhibiting similar colors (in different adjacent species); of or pertaining to homœochromatism.

homœochromatism (hō″mē-ō-krō'ma-tizm), *n.* [*homœochromat(ic)* + *-ism*.] In *biol.*, similarity in the colors of different species of animals or plants that occur in the same locality. *Athenæum*, Oct. 24, 1903, p. 552.

homœocrystalline (hō″mē-ō-kris'ta-lin), *a.* [Gr. *ὁμοιος*, like, + E. *crystalline*.] In *petrog.*, composed of crystals or grains of equal size: sometimes applied to evenly granular crystalline rocks.

homœogenesis (hō″mē-ō-jen'e-sis), *n.* [NL., ‹ Gr. *ὁμοιος*, like, + *γένεσις*, genesis.] Community of origin or ancestry. [Rare.]

homœogeneous (hō-mē-ō-jē'nē-us), *a.* [Gr. *ὁμοιογενης*, of like kind, + *-eous*.] Of a similar kind.

homœokinesis (hō″mē-ō-ki-nē'sis), *n.* [NL., ‹ Gr. *ὁμοιος*, like, + *κίνησις*, motion.] The form of karyokinetic or mitotic cell-division in which the two daughter-nuclei receive chromosomes of the same kind: opposed to ★*heterokinesis*.

homœomorphic (hō″mē-ō-môr'fik), *a.* [Gr. *ὁμοιόμορφος*, of the same form, + *-ic*.] Of similar type or order.

In a remarkable proportion of cases of mental and other nervous disturbances we find a history of antecedent nervous conditions, either *homœomorphic*, i.e., of the same order, or heteromorphic, of different type.

Buck, Med. Handbook, IV. 660.

homœomorphous, *a.* 2. Of like shape and structure.

homœoplasia (hō″mē-ō-plā'si-ä), *n.* [NL., ‹ Gr. *ὁμοιος*, like, + *πλάσις*, forming.] The assumption by the tissues of one part of the body of the form of those from another region, as when the skin of the arm is grafted on the cheek to heal a wound.

homœosis (hō-mē-ō'sis), *n.* [NL., ‹ Gr. *ὁμοίωσις*, a becoming like, likeness, ‹ *ὁμοιοῦν*, make like, ‹ *ὁμοιος*, like.] In *biol.*, the presence in an organism of a normal member of a meristic series of parts in an abnormal position, as the presence, in a crustacean, of an antenna in the place where the eye is normally situated. When homœosis is exhibited in the part that replaces a part that has been removed, as when the amputated eye of a crustacean is replaced by an antenna, the phenomenon is termed *heteromorphosis*. See ★*heteromorphosis* and ★*metamorphy*, 2.

For the term 'Metamorphy' I therefore propose to substitute the term *Homœosis*, which is also more correct; for the essential phenomenon is not that there has merely been a change, but that something has been changed into the likeness of something else.

W. Bateson. Study of Variation, p. 85.

homœotherm (hō′mē-ō-thėrm), *n.* [MGr. *ὁμοιόθερμος*, of like warmth, ⟨ Gr. *ὅμοιος*, like, + *θέρμη*, heat.] An animal with a bodily temperature which is nearly constant and independent of, and usually higher than, that of the surrounding medium; a warm-blooded animal. [Rare.]

These phenomena, which are numerous . . . in animals of the higher class (*homœotherms*), are much less so in cold-blooded animals. *Smithsonian Rep.*, 1890, p. 411.

homœothermal (hō″mē-ō-thėr′mal), *a.* [As *homœotherm* + *-al*[1].] Having blood which retains a uniform temperature notwithstanding the temperature of the environment: said of warm-blooded as opposed to cold-blooded, pœcilothermic, or heterothermal animals.

homœothermic (hō″mē-ō-thėr′mik), *a.* [*homœotherm* + *-ic.*] Of or pertaining to homœotherms or warm-blooded animals; homœothermal.

Man, mammals, and birds are called . . . *homœothermic* — that is, warm-blooded — animals.
Smithsonian Rep., 1890, p. 407.

homœothermism (hō″mē-ō-thėr′mizm), *n.* [As *homœotherm* + *-ism.*] The maintenance by warm-blooded animals of a bodily temperature which is independent of that of the surrounding medium.

homœotic (hō-mē-ot′ik), *a.* [*homœosis* (*-ot-*) + *-ic.*] Pertaining to or characterized by homœosis.

Though in some of these examples there may be change in the total number of vertebræ shewing that true Meristic change has occurred, they cannot well be treated apart from the more distinctly *Homœotic* cases.
W. Bateson, Study of Variation, p. 106.

Homœotic variation. See ★*variation.*

homœotopy (hō-mē-ot′ō-pi), *n.* Such a similarity of words as leads to errors in copying.

homœotype (hō′mē-ō-tīp), *n.* [Gr. *ὅμοιος*, like, + *τύπος*, type.] A specimen identified by a specialist from comparison with the original type, or a subsequently selected cotype: designed to replace *homotype*, which is in use for another purpose.

homœotypical (hō″mē-ō-tip′i-kal), *a.* [Gr. *ὁμοιος*, like, + *τύπος*, type, + *-ic-al*[1].] In *cytol.*, of or pertaining to a form of mitosis occurring in the secondary spermatocytes of some animals, such as the salamander, and differing from the typical form of mitosis only in the shortness of the chromosomes and their irregular arrangement in the daughter-nuclei. *Flemming*, 1887.

homogamic (hō-mō-gam′ik), *a.* Same as *homogamous.*

homogamous, *a.* 2. Of or pertaining to homogamy or assortative mating. Also *homogamic.*

[The] whole range of effects from pure random mating to perfectly *homogamous* unions.
Biometrika, Nov., 1903, p. 481.

Homogamous mating. See ★*mating.*

homogamy, *n.* 2. Assortative mating; the pairing or mating of animals, or the marriage of human beings, with some common distinctive characteristic considered apart from the question whether the mating is due to conscious selection of, or preference for, this characteristic or is unintentional or unconscious; sexual selection in its widest sense.

If the male class of a given character tends to mate with a female class with generally like character, we have a tendency to *homogamy*. *Biometrika*, Nov., 1903, p. 481.

homogen, *n.* 3. A homogenous or homogenetic part or organ.

Homogeneous part. See ★*part.*

homogenetical (hō″mō-jē-net′i-kal), *a.* Of or pertaining to homogeny.

homogenic (hō-mō-jen′ik), *a.* Of or pertaining to homogeny; exhibiting homogeny or sameness of nature.

homogenist (hō-moj′e-nist), *n.* [*homogen-y* + *-ist.*] One who believes that the races of mankind have had a common origin or ancestral history and that they constitute a single species.

homogenize, *v. t.* — **Homogenized milk,** a trade-name for milk which has been heated to 185° F. and forced by heavy pressure through a number of very fine openings, the jets impinging upon a porcelain plate. It is asserted that the result is to divide the fat into globules much smaller and more nearly uniform in size than those of the original milk, so that the product may be kept for a long time without the emulsion being broken up by the separation of cream in a distinct layer. *Sci. Amer.*, April 16, 1904, p. 315.

homogentisic (hō″mō-jen-tis′ik), *a.* [Gr. *ὁμός*, the same, + E. *gentisic.*] Noting an acid, a colorless compound, $HO_2C_6H_3CH_2COOH.H_2O$, found in small quantity in normal urine and in plant-roots. The amount is increased in cases where alkapton is present in the urine, or when the roots are geotropically stimulated. It crystallizes in prisms and melts at 146.5–147° C. Also called *dihydroxy-phenylacetic acid.*

homogentisin (hō-mō-jen′ti-sin), *n.* An incorrect term for ★*homogentisic acid.*

homogentisinic (hō″mō-jen-ti-sin′ik), *a.* An incorrect term for ★*homogentisic.*

homoglot (hō′mō-glot), *a.* [Gr. *ὁμός*, the same, + *γλῶττα*, tongue.] Possessing the same language. *N. E. D.*

homogomph (hō′mō-gomf), *a.* [Gr. *ὁμός*, the same, + *γόμφος*, a bolt, a nail.] Having similar spines or 'teeth.'

The setigerous region ends in a conical papilla behind that for the spine, and bears a single brown spine and a series of *homogomph* bristles.
Annals and Mag. Nat. Hist., Sept., 1902, p. 259.

homogonous, *a.* 2. In *biol.*, characterized by direct development, without metamorphosis or alternation of generations.

homogony, *n.* 2. In *biol.*, same as *homogenesis.*

homographic, *a.* 3. In *philol.*, of or pertaining to homographs. — **Homographic division.** See ★*division.*

homoiochlamydeous (hō″moi-ō-kla-mid′ē-us), *a.* [Gr. *ὅμοιος*, like, + *χλαμύς* (*χλαμυδ-*), cloak, + E. *-eous.*] In *bot.*, having a single but fully developed floral envelop, as the oaks, the nettle family, etc. In plant development the homoiochlamydeous stage succeeds the haplochlamydeous, and is followed by the homochlamydeous.

homoiopodal (ho-moi-op′ō-dal), *a.* [Gr. *ὅμοιος*, like, + *ποίς* (*ποδ-*), foot, + *-al*[1].] In *neurol.*, noting nerve-cells which have branches or processes of only one kind: opposed to ★*heteropodal. Baldwin*, Dict. of Philos. and Psychol., II. 155.

homoiothermal (hō″moi-ō-thėr′mal), *a.* Same as ★*homœothermal.*

Homola (hom′ō-lä), *n.* [NL. (Leach, 1815).] The typical genus of the family *Homolidæ.*

homolecithal (hō″mō-les′i-thal), *a.* [Gr. *ὁμός*, the same, + *λέκιθος*, yolk, + *-al*[1].] In *embryol.*, having the food-yolk uniformly distributed throughout the egg, as in alecithal eggs: opposed to ★*heterolecithal. Mark*, 1892.

Homolidæ (hō-mol′i-dē), *n. pl.* [NL., ⟨ *Homola* + *-idæ.*] A family of anomalous *Brachyura* in which the carapace is quadrangular or subtriangular, the eye-stalks usually very long

Latreillia valida (de Haan).

a, female; *b*, head of male; *c*, head of female; *d*, same, from below; *e*, abdomen of male; *f*, abdomen of female.

and slender, the orbits incomplete, and the first antennæ not retractile into special fossettes. There are 5 genera, *Homola*, *Dicranodromia*, *Latreillia*, *Latreillopsis*, and *Homologenus*, and the various species extend to moderate depths.

homolinolein (hō″mō-li-nō′lē-in), *n.* [Gr. *ὁμός*, the same, + E. *linolein.*] In *chem.*, the substance $C_3H_5.(C_{18}H_{31}O_2)_3$, which forms the chief constituent of linseed-oil. The name *linolein* is reserved for the corresponding glycerid of an acid with 16 atoms of carbon.

homologen (hō-mol′ō-jen), *n.* [*homolo(gous)* + *-gen.*] The group of atoms by which a member of a homologous series differs from the one immediately preceding or succeeding it. In the methane series of compounds the homologen is CH_2.

homologenic (hō-mol-ō-jen′ik), *a.* [*homologen* + *-ic.*] Noting the molecule or group to which the homologen is successively added.

homologous, *a.* (*e*) In *pathol.*, noting a neoplasm composed of tissues of the same type as those of the part from which it springs: distinguished from ★*heterologous.* — **Homologous determinant, id, series, tumor, twins.** See ★*determinant*, etc.

homology, *n.* (*c*) In *chem.*, the relationship which the members of a homologous series bear to one another. — **Genetic homology,** special homology regarded as a result of descent from a common ancestor. — **Meristic homology** the similarity between corresponding or repeated parts in the same individual; nearly equivalent to *serial homology.* The five rays of a starfish are meristically, but not serially, homologous. *E. B. Wilson*, Biol. Lectures, 1895, p. 101. — **Parameter of homology,** the coefficient of homology.

homolysin (hō-mol′i-sin), *n.* [Gr. *ὁμός*, the same, + *λύσις*, dissolution, + *-in*[2].] A lysin which will cause the destruction of the cells of an animal of the same species.

homomorph (hō′mō-môrf), *n.* [Gr. *ὁμός*, the same, + *μορφή*, form.] In the study of primitive art, a term used to describe characters, types, or motives which are essentially the same in form.

Characters substantially the same, or "*homomorphs*" (to use Colonel Mallory's term) made by one set of people, have a different signification among others.
Haddon, Evolution in Art, p. 215.

homomorphosis (hō″mō-môr′fō-sis), *n.* [NL., ⟨ *ὁμός*, the same, + *μόρφωσις*, formation.] The replacement of a lost part in an organism by a part that is like the one that has been lost: opposed to ★*heteromorphosis.*

When the new part is like that removed, or like a part of that removed, as when a leg or a tail is regenerated in a newt, the process is one of "*homomorphosis.*"
T. H. Morgan, Regeneration, p. 23.

homonataloin (hō″mō-nā-tal′ō-in), *n.* [Gr. *ὁμός*, the same, + (?) L. *natus*, born, + E. *aloin.*] A colorless compound, $C_{15}H_{16}O_7$, obtained from aloin.

homonoia (hō-mō-noi′ä), *n.* [Gr. *ὁμόνοια*, agreement, concord, ⟨ *ὁμόνοος*, of the same mind, ⟨ *ὁμός*, the same, + *νόος*, mind.] 1. The sharing of thoughts and sentiments; or, thoughts and sentiments mutually shared. *G. S. Hall*, Adolescence, II. 133. — 2. [*cap.*] A Greek divinity equivalent to the Roman *Concordia.* She is often represented on coins.

homonomous, *a.* 2. In *zoöl.*, made up of like segments or metameres: said of annelids or arthropods in which the various metameres are of the same or similar structure. Opposed to ★*heteronomous.*

homonomously (hō-mon′ō-mus-li), *adv.* In a homonomous manner.

homonym, *n.* 3. Specifically, in systematic biology, a name given to a group (usually a genus or species) at a later date than that at which the same name had been given to another group. Such a name is said to be *preoccupied.* In order to avoid confusion with the earlier names, all homonyms are rejected. Thus the use of *Torreya* by Rafinesque in 1818 as the name of a genus of plants belonging to the family *Menthaceæ* prevents the recognition of *Torreya*, published by Arnott in 1838, as a valid name for a genus of the family *Taxaceæ*, the latter genus consequently taking its next older name *Tumion*, published in 1840. Similarly *Agriotherium* was used by Wagner for a genus of carnivores and by Scott for a genus of ungulates; and *Brachyurus* was applied by Fischer to a genus of rodents and by Spix to a genus of monkeys.

Homonymous images. See ★*image.*

homoparthenogenesis (hō″mō-pär-the-nō-jen′e-sis), *n.* [NL., ⟨ Gr. *ὁμός*, the same, + NL. *parthenogenesis.*] That type of parthenogenesis in which the unfertilized eggs produce only one sex, as contrasted with ★*heteroparthenogenesis*, or the production of both males and females from unfertilized eggs. When the unfertilized eggs produce only males, as in the bee, the phenomenon has been called *arrhenotoky* or *androgenetic parthenogenesis.* When females alone are produced it has been called *thelytoky*, or *gynogenetic parthenogenesis.*

homoperiodic (hō″mō-pē-ri-od′ik), *a.* [Gr. *ὁμός*, the same, + *περίοδος*, period, + *-ic.*] Having the same periods.

homophene (hō′mō-fēn), *n.* [Irreg. ⟨ Gr. *ὁμός*, the same, + *φαίνειν*, show, appear.] A word having the same visible form or spelling as another; a homograph.

homophenous (hō-mof′e-nus), *a.* Having the character of a homophene.

homoplastid (hō-mō-plas′tid), *n.* [Gr. *ὁμός*, the same, + E. *plastid.*] An organism consisting of numerous cells of uniform structure: opposed to ★*heteroplastid.*

homoplasty (hō′mō-plas-ti), *n.* [Gr. *ὁμός*, the same, + *πλαστός*, formed, + *-y*[3].] Same as *homoplasy.*

homopolar, *a.* 2. In *elect.*, same as *unipolar*, 1. *Jour. Brit. Inst. Elect. Engin.*, 1901–02, p. 948.

homorhabdic (hō-mō-rab′dik), *a.* [Gr. *ὁμός*, the same, + *ῥάβδος*, rod.] Having the gill-filaments of the same size, as certain mollusks: opposed to ★*heterorhabdic. Lankester.*

homosexual (hō-mō-sek′ṣū-al), *a.* [Gr. *ὁμός*, the same, + L. *sexus*, sex, + *-al*[1].] 1. Of or pertaining to the same sex or to individuals of the same sex. — 2. Relating to homosexuality.

In one of our cases, *homosexual* impulses were a feature of degeneracy. *Med. Record*, June 13, 1903, p. 925.

homosexuality (hō″mō-sek-şū-al′i-ti), *n.* [*homosexual* + *-ity.*] Perverted sexual desire for one of the same sex. *C. H. Hughes*, in Alien. and Neurol., Feb., 1903, p. 74.

Homosteus (hō-mos′tē-us), *n.* [NL., < Gr. *ὁμός*, the same, + *ὀστέον*, bone.] A genus of arthrodirous fishes belonging to the family *Coccosteidæ*. They are of very large size, with slender and toothless jaws, and orbits completely inclosed in the head-shield. They are found in the Old Red Sandstone.

homostyly (hō-mos′ti-li), *n.* [*homostyl(ed)* + *-y*³.] In *bot.*, the condition of being homostyled.

homosystemic (hō″mō-sis-tem′ik), *a.* [Gr. *ὁμός*, the same, + E. *system* + *-ic.*] Of or pertaining to the same system, as organs derived from the same germ-layer in the embryo.

homotaxia (hō-mō-tak′si-ą), *n.* [NL.] Same as *homotaxis*.

homotenous (hō-mot′e-nus), *a.* Noting insects which have incomplete metamorphoses, as opposed to the polymorphous groups. *A. S. Packard*, Text-book of Entom., p. 597.

homothallic (hō-mō-thal′ik), *a.* [Gr. *ὁμός*, the same, + *θαλλός*, sprout, + *-ic.*] Having the zygospores formed only as the result of the conjugation of hyphæ from a single plant or strain: said of zygospore-forming plants.

homothermic (hō-mō-thėr′mik), *a.* Same as *homothermous*.

homothetic, *a.* **II.** *n.* A transformation which changes every plane figure into a homothetic figure.

For example, the group of the projective transformations of the plane and the group of *homothetics*, that is to say, transformations which change every plane figure into a homothetic figure [a figure similar and similarly placed]. *Science*, Sept. 16, 1904, p. 360.

homotonic (hō-mō-ton′ik), *a.* Same as *homotonous*.

homotopic (hō-mō-top′ik), *a.* [Gr. *ὁμός*, the same, + *τόπος*, place, + *-ic.*] Occurring at the same place in the offspring as in the parent.—**Homotopic heredity.** See ★*heredity*.

homotopy (hō-mot′ō-pi), *n.* [Gr. *ὁμός*, the same, + *τόπος*, place, + *-y*³.] The development of an embryo into an adult organism by a series of changes which occur in the parts of the body in which they occurred in the development of its parents. [Rare.] *Cope*, in Amer. Nat., Jan., 1878.

homotype, *n.* (*c*) Same as ★*homœotype*.

homotypic, *a.* 2. In *cytol.*, relating to the second nuclear division after mitapsis: so called because it is very similar to ordinary mitosis. *Cook and Swingle*.

homotyposis (hō″mō-tī-pō′sis), *n.* [NL., < Gr. *ὁμός*, the same, + *τύπωσις*, < *τύπος*, type.] In *biol.*, a forming after a model: a term proposed by Pearson for the correlation between meristically repeated parts.

On *Homotyposis* in Homologous but Differentiated Organs: Prof. Karl Pearson, F. R. S. *Nature*, Feb. 12, 1903, p. 360.

Cross-homotyposis, homotyposis considered reciprocally. *Biometrika*, April, 1902, p. 344.

homozygosis (hō″mō-zī-gō′sis), *n.* [Gr. *ὁμός*, the same, + *ζύγωσις*, joining. See *zygote.*] Development from a homozygote.

In such cases . . . proof of *homozygosis* of resolved forms will furnish the only reliable criterion. *W. Bateson*, in Rep. Evol. Com. Roy. Soc., 1905, II. 125.

homozygote (hō-mō-zī′gōt), *n.* [Gr. *ὁμός*, the same, + E. *zygote.*] A zygote formed by the union of two gametes of the same kind or stock: opposed to ★*heterozygote*. See extract under ★*heterozygote*.

homozygous (hō-mō-zī′gus), *a.* [Gr. *ὁμός*, the same, + *ζυγόν*, yoke, + *-ous.*] Of, pertaining to, or derived from like zygotes or germ-cells.

The hybrids produced by pairing a heterozygous waltzing form $G'_1G'_2$ with a *homozygous* albino GG will be of two kinds, GG'_1 and GG'_2. *Biometrika*, Jan., 1904, p. 16.

Hon. An abbreviation (*b*) of *honorary*.

Honble. A contraction of *Honorable*. Same as *Hon.* (*a*).

Hond. An abbreviation of *Honduras*.

Honduras rubber. See ★*rubber*.

honey, *n.*—**Date honey.** See the extract.

Other varieties [of dates], such as the Khars, which are full of sugary juice when ripe, are not so easily handled. The Arabs usually hang up the bunches and allow the juice to drain off into jars. This juice, which they call *date honey*, is preserved and used, and the fruit, which has become somewhat dry, is then packed in boxes, or more often in skins. *Yearbook U. S. Dept. Agr.*, 1900, p. 482.

Extracted honey, honey which has been separated from the comb.—**Sham honey,** a hard glossy body found in the flowers of *Lopezia, Parnassia,* and *Cleome,* resembling drops of nectar, and so placed as to promote cross-fertilization through the agency of the attracted insects, which are deceived by it.—**White honey,** honey that flows from the cells spontaneously without pressure, being that made by bees that have not swarmed. *N. E. D.*

honey-board (hun′i-bōrd), *n.* In *bee-keeping*, a partition of perforated sheet-metal placed in a hive to confine the queen bee to the brood-chamber and yet permit other bees to pass from one division of the hive to another through the perforations.

honey-box (hun′i-boks), *n.* In *bee-keeping*, a folding wooden box in which the bees in a hive form a comb and fill it with honey. At the end of the season the filled box is removed from the hive without disturbing the bees. Also called a *honey-section*.

Honeycomb coral. See ★*coral*.—**Honeycomb scall** or **tetter.** Same as *favus*, 2.

honeycomb-radiator (hun′i-kōm-rā″di-ā-tọr), *n.* A radiator much used on motor-cars for abstracting the heat from the cooling-water. It is made up of a series of small hexagonal passages surrounded by thin walls, and in appearance somewhat resembles a honeycomb.

honeycomb-weave (hun′i-kōm-wēv), *n.* A style of weave resembling the cells of a honeycomb.

honey-creeper, *n.*—**Bahama honey-creeper,** a small bird, *Cœreba*, or *Certhiola, bahamensis*, belonging to the family *Cœrebidæ*. The general coloration is gray and yellow.

honey-crop (hun′i-krop), *n.* The distended crop of the honey-bearers among the so-called honey-ants.

honey-drop (hun′i-drop), *n.* A mole or similar spot on the skin.

honey-evaporator (hun′i-ē̤-vap″ō̤-rā-tọr), *n.* An apparatus for removing any excess of liquid from the honeycomb for the safe transportation of the latter.

honey-extractor (hun′i-eks-trak″tọr), *n.* A honey-strainer.

honey-flower, *n.* 2. Same as ★*honey-plant*, 2. See *Hoya*.—3. In Australia, a tall evergreen shrub of the family *Proteaceæ*, *Lambertia formosa*: so named from the large quantity of nectar contained in its flowers.

honey-gate (hun′i-gāt), *n.* A gate-valve made particularly for drawing off honey, molasses, or other thick liquids from barrels, extractors, etc.

honey-guide, *n.* 2. In *bot.*, a marking or a streak of nectar or honey in a flower serving to guide the insect to the nectary.

honey-holder (hun′i-hōl″dėr), *n.* Same as *honey-bearer*.

honey-mark (hun′i-märk), *n.* 1. A spot of a different color from the rest of the corolla of a flower, supposed by Sprengel to guide insects to the nectary.—2. Same as ★*honey-drop*.

honey-mushroom (hun′i-mush″röm), *n.* The fungus *Armillaria mellea*, which produces a form of root-rot in trees.

honey-plant (hun′i-plant), *n.* 1. The bee-balm, *Melissa officinalis*.—2. A plant of the genus *Hoya*.—3. In Tasmania, a shrub, *Cystanthe scoparia* (*Richea scoparia* of Hooker), of the family *Epacridaceæ*, growing in the form of a very dense bush, one and a half feet high, and bearing small honey-scented flowers which vary in color from white to pink and orange.

honey-section (hun′i-sek″shọn), *n.* Same as ★*honey-box*.

honey-stopper (hun′i-stop″ėr), *n.* An arrangement of chitinous valves fringed with bristles at the entrance of the proventriculus or honey-stomach of the honey-bee.

honeysuckle, *n.* 4. The color of the flowers of the common honeysuckle; "a combination of pale pink and even paler yellow." *Daily News* (London), Nov. 20, 1890. *N. E. D.*—**Cape honeysuckle,** *Leucadendron melliferum*. See *Leucadendron*.—**Honeysuckle ornament,** in the *fine arts*, a peculiar type of decoration, in which there is a resemblance to a sprig or flower of the honeysuckle: found especially on late Greek vases. See *anthemion* (*a*), with cut.

honey-weasel (hun′i-wē″zl), *n.* The ratel or honey-badger, *Mellivora ratel*, a large member of the weasel family found in Africa. A near relative, *M. indica*, occurs in India. The animal is fond of honey, whence the common name.

honeywood. (hun′i-wụd), *n.* The Tasmanian dogwood. See *dogwood*, 3, and *Tasmanian*.

Honiton braid. See ★*braid*¹.

honky-tonk (hong″ki-tongk′), *n.* A low groggery: a slang name among the negroes of the southern United States.

honoki (hō-nō′kē), *n.* [Jap.] A tall Japanese timber-tree, *Magnolia hypoleuca*. The light, grayish-white wood, which gradually changes to a deeper shade, is soft, easily bent, and elastic, and has a fine, even grain, making it applicable to many uses. It is used for the groundwork in the manufacture of lacquer ware, for pattern-blocks in printing cloth, and from it is prepared the soft, fine-grained charcoal which is used throughout Japan for rubbing the lacquer, and for polishing the enamel of cloisonné ware.

honor, *n.* 11. In *golf*, the right to play off first from the tee.—**Simple honors,** in *bridge*, three out of the five honors which may be held.—**To do the honors,** to act as host or hostess on any occasion, as in presiding at a banquet or in dispensing hospitality.

honoris causa (hō-nō′ris kâ′zä). [L.] See ★*causa*.

honthin (hon′thin), *n.* A tasteless, odorless compound of tannin, keratin, and albumin claimed to be unaffected by the gastric juice but decomposed into its components by the intestinal secretions: an intestinal astringent.

hood, *n.* 6. (*b*) The rise in the quarter-deck which gives more head-room to the cabin. (*c*) A covering over a hatchway to protect the opening from the weather.—7. (*a*) A projecting shelter-like canopy over an outer door, usually carried by corbels or brackets. See *hood-mold*. (*b*) A similar projecting member over a hearth, intended to direct the smoke inward toward the flue. In houses the fire might be built on a wholly open hearth without projecting jambs, and the hood six or seven feet above it was conical or pyramidal in form, leading to the flue above. This hood might hang free in the room, but was more commonly attached to the wall, from which it projected, and supported on corbels. (*c*) In modern ventilation, a projection above a range or furnace, intended to carry off the smell of cooking or noxious gases. (*d*) In chemical laboratories, a fixed appliance consisting of an inclosed and covered space within which offensive gases or vapors may be evolved and carried off by a connected flue without escaping into the room. It is usually provided with a sliding or hinged door in front for the introduction and removal of apparatus. (*e*) A curved cover for a machine or for any part of one. (*f*) The cover for a blacksmith's forge. (*g*) In *elect.*, a protecting cover, also sometimes serving as a reflector, placed over an arc-lamp.—**Naval hoods,** in *ship-building*, heavy pieces of timber which encircle the hawse-holes.—**Oral hood,** the fringed membrane which surrounds the vestibule or mouth-opening of amphioxus (*Branchiostoma*).

hood-cover, *n.* 2. *Naut.*, a covering of wood or canvas for a hatch, companionway, or skylight.

hood-nozle (hụd′noz″l), *n.* A nozle having a hood or hinged cover which may be swung across its mouth to cut off a part or all of the stream of water.

hoof, *n.*—**Dished hoof,** a hoof in which the wall is concave from the coronet to the plantar surface.—**Hoof-and-mouth disease.** Same as *foot-and-mouth disease* (which see, under *foot*).—**To beat the hoof.** See ★*beat*¹.—**To pad the hoof.** See *pad*¹.

hooflet (höf′let), *n.* [*hoof* + *-let.*] One of the small or false hoofs found in many ruminants, especially in deer, on either side of the pair of principal hoofs; a dew-claw. They may have their supporting bones in a very v stigial condition, as in the ox and bison, or of considerable size, as is the case with the moose and reindeer. *Smithsonian Rep.* (*Nat. Mus.*), 1896, p. 566.

hook, *n.* 10. In *golf:* (*a*) The angle of the face of a club when it lies in to the ball. (*b*) A ball played with a distinct curve to the left. —11. In *cricket*, the ★hook-stroke (which see). —12. A curved or angled line added to a written or printed letter, or forming a part of it, or, as in phonography, used as a distinct symbol.—13. In *well-boring*, a fishing-tool in the form of a horizontally curved hook which engages the shoulder of rods or tools that may have become unscrewed.—**Malgaigne's hooks,** sharp hooks used to bind together the two parts of a fractured patella.

hook, *v. t.* 6. In *golf*, to play (a ball) so that it curves more or less to the left.

When standing too far, the ball is apt to be 'drawn' or 'hooked'—that is to say, struck with the point or 'toe' of the club, in which case the ball flies in to the left. *Chambers' Inform.*, II. 695. *N. E. D.*

7. In *cricket*, to hit (the ball) to the 'on' side with a horizontal bat, after stepping back: said of the batsman.—**To hook Jack,** to play truant. [Slang.]

The boy "*hooked Jack*" for a whole day. *Joseph Lincoln*, Partners of the Tide, iv.

hook-and-strap (hụk″and-strap′), *n.* A hinge-strap in which the hook or pintle is an integral part of the strap. It is more customary to form the eye on the strap.

hook-book (hụk′bụk), *n.* In *angling*, a case in the form of a book, with leaves of cloth or other material, in which fish-hooks are kept; a fly-book.

hooker[1], *n.* 3. [*cap.*] See ★*Amish.*

Hookera (hůk′e-rä), *n.* [NL. (Salisbury, 1808), named for William *Hooker* (1779–1832), a British botanical artist.] A genus of plants of the family *Liliaceæ*. There are about 15 species, natives of western North America, chiefly of California. See ★*Brodiæa.*

hooker-on (hůk′ėr-on′), *n.* In *mining*, a bottom-man; a man who puts mine-cars on a cage. *Barrowman*, Glossary.

Hooke's law. See ★*law*[1].

hookey[2], *n.*—**Blind hookey**, a gambling game, frequently played on transatlantic steamers. The banker offers the pack to the players and they divide it into several packets, face down. One of these, chosen at random, is assigned to the banker. Bets are then placed on the remaining piles and all are then turned face up. The bottom cards of each pile that are higher than that of the dealer's win; those lower lose. Also called *Dutch bank.*

hook-gage (hůk′gāj), *n.* An instrument for measuring the head of water on the crest of a weir. See ★*gage*[2].

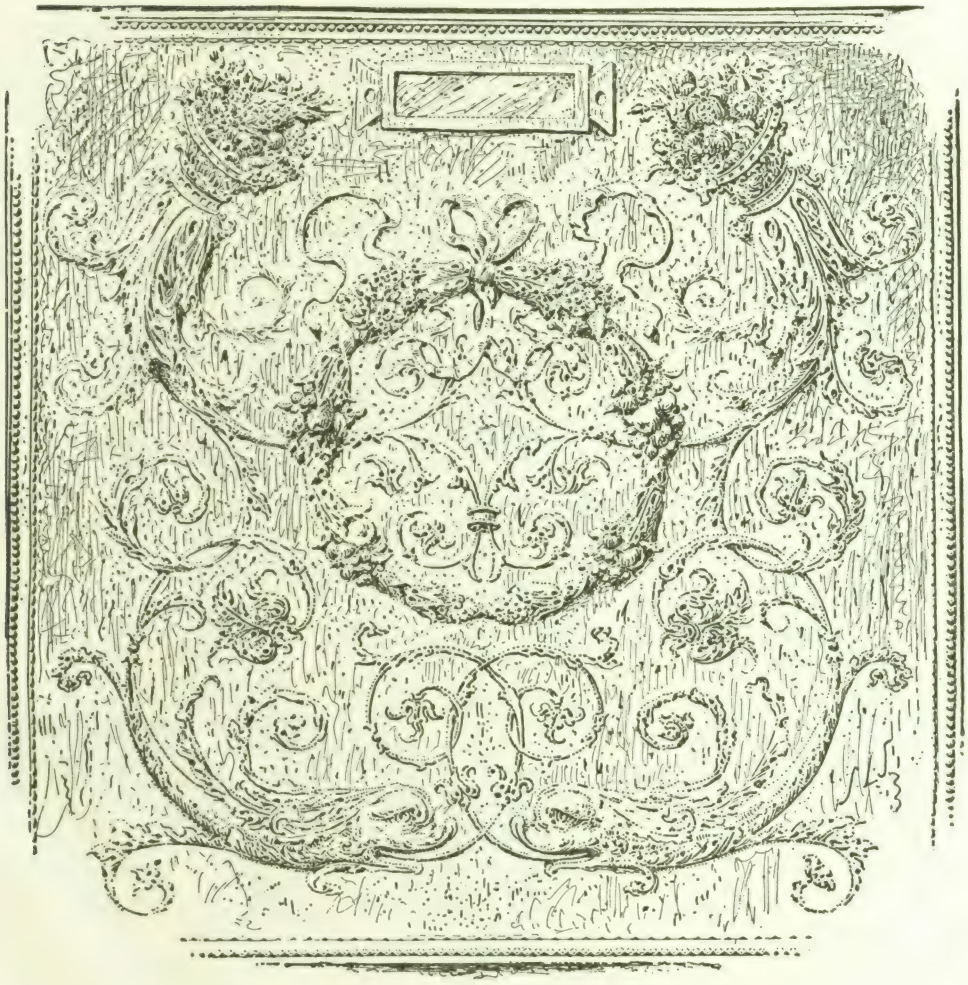
hook-gear (hůk′gēr), *n.* A valve-gear for engines, in which the eccentric-rod is hooked on a pin on the valve-stem.

hooklet, *n.* (*c*) One of the hook-shaped bodies which form a circle about the head of the echinococcus, and are found floating free in the fluid of a hydatid cyst.

hook-plate (hůk′plāt), *n.* A casting forming a long and narrow plate from the face of which projects a line of curved hooks; an expansion-plate. It is fastened to a wall to support a series of steam-heating pipes. When rings are substituted for hooks it is called a *ring-plate.*

hook-stroke (hůk′strōk), *n.* In *cricket*, the stroke in which the batsman steps back and hits the ball round to the 'on' side with a horizontal bat.

hook-tender (hůk′ten″dėr), *n.* The foreman of a yarding-crew; specifically, one who supervises the attaching of the cable to a turn of logs.



hookworm (hůk′wėrm), *n.* An intestinal parasite, *Uncinaria americana* or *Ankylostoma duodenale:* so called originally from the presence of rays or ribs, interpreted as hooks, in the membranous expansion or caudal bursa, at the hinder end of the male worm. It infests man, cattle, dogs, foxes, sheep, seals, and other animals.—**Hookworm disease.** See ★*uncinariasis.*

hooligan (hö′li-gan), *n.* Originally, a member of a South London gang of young street rowdies said to have been led by one named Hooligan, who indulged in boisterous horse-play and breaches of the peace; hence, any street ruffian, especially one who is a member of an organized gang; a 'hoodlum.'

hooligan (hö′li-gan), *v. i.* and *t.*; pret. and pp. *hooliganed*, ppr. *hooliganing.* I. *intrans.* To play the hooligan. II. *trans.* To assault in the manner of the hooligans.

hooliganism (hö′li-gan-izm), *n.* Indulgence in the boisterous horse-play and ruffianism of the hooligans of South London and other large centers of population.

There is a good deal of moralizing in print over the disorderly scenes and outbreaks of "*Hooliganism*" at London's patriotic town show. *N. Y. Tribune*, Oct. 31, 1900.
